

# Lower Lake Chelan Basin Regional Planning Study

## We Want to Hear from You

Second Public Meeting – August 14, 2008 at 4:30 pm Chelan City Hall

1. Which vision statement best describes your vision for the Lower Lake Chelan area?

### Vision Option 1 - UGA Extension Plan

- This vision will protect and enhance the inherent beauty and quality of the lake, the natural environment, and the agricultural community, while providing an economically balanced community. The region will incorporate additional residents without infringing or threatening the agricultural character and environmental quality of the region by concentrating growth in adequately serviced walkable urban areas.

### Vision Option 2 and 3- Corridor or Cluster Plan

- This option will protect and enhance the inherent quality of the lake and the agricultural community while providing economically balanced communities within distinct and adequately serviced areas. The region will incorporate additional residents within the UGA and in corridors or clusters that have access to existing roads within the basin.

### Vision Option 4- Existing Zoning Plan

- This vision will protect and enhance the inherent quality of the lake and its natural environment. Growth will occur in areas that can adequately serve the increased population without undermining the environmental quality.

2. Do you have a revision or alternate suggestion for a Vision Statement?

---

---

---

3. How would you prefer to see future growth occur?

- Only within existing Urban Growth Areas (UGA)? (The UGA Extension Plan)
- Within Urban Growth Areas and along existing or new roadways as corridors of development? (The Corridor Plan)
- Within existing Urban Growth Areas and as clusters outside the UGA? (The Cluster Plan)
- Within existing Urban Growth Areas and large lot subdivisions outside the UGA? (The Existing Zoning Plan)
