

Recording System Upgrade - December 3rd

Acclaim is Coming!

We are pleased to announce the pending upgrade of our recording system software to Acclaim, by Harris Recording Systems. This is a new product for us, brought to us by the same vendor that provides our current OnCore system.

Those who work with Douglas County records are already familiar with the look and feel of performing an internet search using Acclaim, so disruption to your workflow should hopefully be minimal. Due to the likelihood that our customers are also customers of Douglas County, we will not be holding public training sessions.

This upgrade will not impact availability of Recording services. The weekend prior, however, our internet search may be unavailable. Please email or call Nina if you would like more information.
