The number one priority should be which ever project increases stream flow the greatest during mid to late summer. This would have the greatest positive effect on fish, ^{and} ~~as~~ it would also insure a more reliable water flow for the Wenatchee Valley agricultural industry.

That project/projects would be the rebuilding of the Eight Mile Lake Dam to it original "legal" height, along with installing

automated valves.

as for the boiler field, learn to
live with it, as past generations have
