

Hi Mike,

Anne and I both read the watershed working group information and had meant to write earlier. The proposed plan looks like a good approach to us as it seems to have minimal impact for a great benefit to the region. After reading the Sunday paper, I certainly hope there isn't going to be negative fall-out from the Puget Sound group.

The only curiosity I have is if you all have some construction impact estimations/projections re the dam rebuild at Eight Mile lake that you could share. After our personal experience with the quick recovery of our own property after the impacts from the bridge project I'm not concerned, just curious if you have any info.

Thanks for all the great work you and your department is doing!

Best always,
Kayt
