

#### KMZ Instructions

- 1) Download the KMZ file package (VSP KMZ June 25 2014.KMZ is the main file – there are supplemental files with specific detailed features given file size/loading considerations) from the county website.
- 2) Download and install Google Earth from <http://www.google.com/earth/>. Google Earth is a free product and is necessary to view the map files.
- 3) Once Google Earth is installed, double-click the VSP KMZ June 25 2014.KMZ to open the file within Google Earth (you can add supplemental KMZ files in the same way).
- 4) The application will automatically zoom to Chelan County. Use the controls in the upper righthand corner to pan and zoom to specific areas.
- 5) Depending on what layer is on “top” the user can click on the feature to see what information is available e.g. crop type and approximate acres – note if a broad geographic area is on top such as the County or WRIA boundaries it may block the ability to click on information about other features below.
