

CRP 693 West Cashmere Bridge Replacement

Goodwin Street (MP 0.00 – MP 0.50)

Last Updated: March 8, 2019

Vicinity Map

Project Number: County Road Project 693

Project Length: 0.50 miles

Basis for Project: Bridge Replacement

Construction: Spring 2020 - Fall 2021

Project Description: The current structure has both height and weight restrictions that prevent the bridge from properly serving freight traffic, forcing trucks down through the residential area of the city of Cashmere. The replacement bridge will remove the need for restrictions and provide unimpeded access to Cashmere. The anticipated advertisement for bids is November 2019.

Status: Design is 90% completed. The design is being reviewed by WSDOT. A community meeting was held in September 2018 in Cashmere to update the public on the project.

Travel Impact: During phases of construction, travelers can expect road closures and detours and flagger-controlled traffic with delays of up to 20 minutes. Travel restrictions will be updated as construction progresses.

Funding Sources:

BRAC (Federal)	\$12,000,000
Statewide Transportation Program	\$2,600,000
State Transportation Budget 2017	\$2,000,000
