

SD2011 West Eaglerock Drive Drainage Improvement Project

Phone: (509)667.6415 Fax: (509)667.6250 PublicWorks@co.chelan.wa.us

Chelan County's Surface and Stormwater Management Utility is proposing a drainage improvement project adjacent to West Eaglerock Drive in the fall of 2016. It has become apparent over the last few years that the current stormwater conveyance system currently in place needs to be improved in order to safely convey the short, but intense, summer rain storms that the Wenatchee Valley experiences.

Over the last six months, the Stormwater Utility has completed a hydrologic analysis utilizing the built conditions within the Eaglerock basin and determined the capacity of the existing roadside drainage system. With this information available, specific upgrades to the stormwater system have been proposed; with the ultimate goal of increasing roadside drainage capacity, while decreasing the flood frequencies. Specific components of this project will include: roadside ditch improvements (increase size, stabilization with geotextile fabric and quarry spalls, establish vegetation cover, and clear obstructions), increase the size of some driveway culverts, installation of additional catch basins, enlarge culvert sizing under West Eaglerock Drive, and redesign of the detention facility.

This project will occur along approximately 500 feet of April Lane, West Eaglerock Drive, and West Eaglerock Place. Improvements will only occur within the county's right-of-way. Funding for this project is through Chelan County's Surface and Stormwater Management Utility.

If a culvert under your driveway is proposed to be replaced, the county will contact you directly to discuss this project further.
