Chelan County Board of Commissioners,

This request is for a 3-year service contract, from an existing vendor, to clean and service the L&J rooftop HVAC chiller.

Applied Industrial Systems is the regional vendor for York International, who built and supplied the L&J's existing HVAC rooftop chiller needing serviced.

I am requesting BOCC approval to shift from our existing year-to-year contract to a 3-year contract as a cost savings on annual service.

Thank you.

Sincerely,

Brian Travis
Facility Department
Director

TERMS AND CONDITIONS

This agreement contains the entire scope of work to be performed and verbiage necessary for both parties to enter in agreement. The entire agreement is accepted, approved and authorized by representatives from both parties and is understood that no statement, remark, agreement, or understanding, oral or written, not considered herein, will be recognized or enforced.

Payment:

Invoices shall be paid thirty (30) days of Applied Industrial Systems (the company) date of invoice; the company reserves the right to discontinue its services if payments are not received as agreed. Failure to make payments will relieve the company from any obligations or liabilities pertaining to this agreement.

Initial Inspection:

During the first thirty (30) days of this agreement or upon seasonal start-up, if the company should find any equipment covered under this agreement to be in need of repair and replacement, the company will inform the customer in writing of the equipment condition and propose corrective action. When the company so notifies the customer, it is understood that the company will not be responsible for the present, or future repair or replacement, or operability of the equipment until such time the equipment is restored to a condition acceptable to the company.

Exclusions:

It is understood that the following are not the responsibility of the company under this agreement:

- Operation of the equipment
- Services, repairs or replacement necessitated by misuse, improper operation, and operation of equipment against its original manufactures specifications, or negligence of customer, customer employees, agents, contractors, or invitees.
- Correction or replacement of equipment or components damaged due to corrosion, lack of water treatment, vibration, electrolytic action, or other causes beyond the control of the company.
- Inspections, alterations or replacements required by insurance companies, municipal or government authorities.
- Replacement of major components which cannot be repaired due to age or unavailability of replacement parts.
- Replacement or servicing of equipment or components that are not maintainable such as pneumatic piping, fuses, starters, circuit breakers, disconnect switches, electrical and control wiring, plumbing, non-moving parts, such as pressure vessels, heat exchangers, system pipe, tubes, panels, ductwork, refractory, structural supports, and decorative casings, unless specifically included in this agreement.
- The cleaning of air passages, grills, or air/water balancing of the system.
- The company shall not be required to furnish any items of equipment, labor, or make special tests recommended or required by insurance companies, federal, state, municipal or other authorities except as otherwise stated in this agreement.

Customer Responsibilities:

- Provide reasonable and timely access to all equipment covered by this agreement.
- Provide proper disposal of used oil and contaminated refrigerant in accordance with applicable laws and regulations.
- To allow the company to start and stop the equipment, as necessary.
- Unless otherwise included in this agreement, to provide water treatment, as appropriate for the proper functioning of the equipment covered by this agreement.

Termination:

The company may terminate this agreement upon written notice to the customer in the event that any sums or monies due and payable under this agreement are not paid, or when alterations, additions, or repairs are made to covered equipment by others. Either party may terminate upon the anniversary date of this agreement, provided that written or verbal notice of such termination is received by the other party prior to the anniversary date. Neither party shall be liable to the other party for any reason because of such termination at the anniversary date. If written termination notice is received by the company during the term of the contract, the customer will be liable to pay only for services received and/or executed previously.

Disputes and costs:

In the event the company must commence legal action in order to recover any amount payable under this agreement, Customer shall pay the company all court costs and attorneys fees incurred by the company. Any legal action against the company relating to this agreement, or the breach thereof, shall be commenced within one (1) year from the date the claim arose. Failure of either party to comply with this limitation shall constitute a voluntary and knowing waiver of such claim.

AIR COOLED VARIABLE SPEED DRIVE SCREW CHILLER

Annual Equipment Shutdown Inspection and Preventive Maintenance
(Fall Service)

The following tasks are performed once each year to properly evaluate the equipment status and prepare the equipment for the next cooling season:

- Meg motor winding resistance.
- Check level in Variable Speed Drive coolant circuit.
- Check for proper oil levels and refrigerant charge
- Perform a leak test utilizing electronic leak detector and liquid leak detection agent.
- Report location and severity of each leak found.
- Check each compressor heater for proper operation
- Inspect all electrical wiring connections and tighten as required
- Visually inspect internals of drive cabinet looking for abnormalities.
- Clean internal drive cabinet and internal cooling coil as needed.
- Check lubrication circuit
- Review history log, and ensure problems are addressed
- Check the condenser fan motors for proper rotation and operation
- Check the operation of all controls including all safety controls, loading/unloading and external interlocks
- Complete and submit written report for customer records.

APPLIED
INDUSTRIAL SYSTEMS

Operating Season Inspection
(Spring Startup Operating Inspection)

The following inspection items ensure the unit is operating reliably and efficiently:

- Perform a leak test utilizing electronic leak detector and liquid leak detection agent.
- Report location and severity of each leak found.
- Check for the proper oil level and refrigerant charge
- Check the operation of oil heater, oil temperature and lube system operation
- Check the operation of all controls including all safety and transducers, adjust as needed
- Check super heat and sub-cooling.
- Check operation of drain valve, fill valve and level sensor accuracy.
- Check the general condition and operation of the unit
- Equipment consultation with the operator to review operating conditions.
- Check drive cooling circuit operation to include pump, drive cabinet fan and drive cabinet coil.
- Check IGBT Baseplate temperatures and cabinet temperatures.
- Check operation of all condenser fan motors.
- Remove oil sample for analysis from each circuit. Oil Analysis to be performed by independent laboratory using full spectrum analysis.
- Check and report of cleanliness of condenser coils.
- Clean Condenser Coils with Backflushing of all condenser sections as necessary.
- Review operating procedures and owner's log with operator.
- Log operating conditions after the system and unit is stabilize
- Provide a complete report to owner with any recommendations for repairs or unit upgrading with a formal proposal prior to completing work.

Operating Season Inspection
(Summer Operating Inspection)

The following inspection items ensure the unit is operating reliably and efficiently:

- Perform a leak test utilizing electronic leak detector and liquid leak detection agent.
- Report location and severity of each leak found.
- Check for the proper oil level and refrigerant charge
- Check the operation of oil heater, oil temperature and lube system operation
- Check the operation of all controls including all safety and transducers, adjust as needed
- Check super heat and sub-cooling.
- Check operation of drain valve, fill valve and level sensor accuracy.
- Check the general condition and operation of the unit
- Equipment consultation with the operator to review operating conditions.
- Check drive cooling circuit operation to include pump, drive cabinet fan and drive cabinet coil.
- Check IGBT Baseplate temperatures and cabinet temperatures.
- Check operation of all condenser fan motors.
- Review operating procedures and owner's log with operator.
- Log operating conditions after the system and unit is stabilize
- Provide a complete report to owner with any recommendations for repairs or unit upgrading with a formal proposal prior to completing work.

Operating Season Inspection
(Winter Shutdown Inspection)

The following inspection items ensure the unit is operating reliably and efficiently:

- Perform a leak test utilizing electronic leak detector and liquid leak detection agent.
- Report location and severity of each leak found.
- Check the operation of oil heaters.
- Provide a complete report to owner with any recommendations for repairs or unit upgrading with a formal proposal prior to completing work.

INTERLOCAL AGREEMENT BETWEEN CHELAN COUNTY, WASHINGTON AND THE CITY OF LEAVENWORTH, WASHINGTON, FOR THE HOUSING OF INMATES IN THE CHELAN COUNTY REGIONAL JUSTICE CENTER

THIS INTERLOCAL AGREEMENT is made and entered into on this 27th **day of** October**, 20**26 **by and between the City of LEAVENWORTH, Washington, a Washington municipal corporation, hereinafter referred to as "City", and Chelan County, Washington, hereinafter referred to as "Chelan County", each party having been duly organized and now existing under the laws of the State of Washington.**

WITNESSETH:

WHEREAS, The Chelan County Regional Justice Center and the City Mayor or designee are authorized by law to have charge and custody of the County Jail and the City prisoners or inmates, respectively; and

WHEREAS, the City wishes to designate the CCRJC as a place of confinement for the incarceration of one or more inmates lawfully committed to its custody; and

WHEREAS, Chelan County Regional Justice Center is desirous of accepting and keeping in its custody such inmate(s) in the CCRJC for a rate of compensation mutually agreed upon by the parties hereto; and

WHEREAS, RCW 39.34.080 and other Washington law, as amended, authorizes any county to contract with any other county or city to perform any governmental service, activity or undertaking which each contracting county is authorized by law to perform; and

WHEREAS, the governing bodies of each of the parties hereto have determined to enter into this Agreement as authorized and provided for by RCW 39.34.080 and other Washington law, as amended,

NOW, THEREFORE, in consideration of the above and foregoing recitals, the payments to be made, the mutual promises and covenants herein contained, and for other good and valuable consideration, the parties hereto agree as follows:

1. GOVERNING LAW

The parties hereto agree that, except where expressly otherwise provided, the laws and administrative rules and regulations of the State of Washington shall govern in any matter relating to an inmate or inmates confined pursuant to this Agreement.

2. DURATION

This Agreement shall enter into full force and effect from **January 1, 2027 and end December 31, 2027**, subject to termination as provided by Section 3 herein. Nothing in this Agreement shall be construed to require the City to house inmates in Chelan County continuously.

Docusign Envelope ID: 8DF6C4DE-7C5F-831D-83AF-299208585846

3. **TERMINATION**

(a) Termination of this Agreement by either party may be accomplished on ninety (90) days written notice to the other party and to the State Office of Financial Management as required by RCW 70.48.090 stating the grounds for said termination and specifying plans for accommodating the affected prisoners.

(b) In the event of termination of this agreement for any reason, the City shall compensate Chelan County for prisoners housed by Chelan County after notice of such termination until the City retakes its inmates in the same manner and at the same rates as if this Agreement had not been terminated.

The city and county agree that this contract terminates on December 31, 2027 and the county's notice provisions in RCW 70.48.090 are satisfied for termination on December 31, 2027.

4. **MAILING ADDRESSES**

All notices, reports, and correspondence to the respective parties of this Agreement shall be sent to the following:

Chelan County: Chelan County Regional Justice Center
401 Washington St., Level 2
Wenatchee, WA 98801

Primary Contact Person: Chris Sharp, Director
Secondary Contact: Jeff Jones, Business Manager

City of Leavenworth: City of Leavenworth
P.O. Box 287
Leavenworth, WA 98826

Primary Contact Person: Matthew Selby, City Administrator

Notices mailed shall be deemed given on the date mailed. The parties shall notify each other in writing of any change of address.

5. **DEFINITIONS**

The parties hereby agree that the following terms shall have the specified meanings unless indicated otherwise herein:

Day. One prisoner day shall be each day or portion thereof which a prisoner appears in custody on the jail management system. The count shall be conducted by the jail management system and each participating jurisdiction shall be charged for each prisoner who is detained in the Regional Justice Center on a charge and/or conviction from the participating jurisdiction.

Docusign Envelope ID: 8DF6C4DE-7C5F-831D-83AF-299208585846

6. **COMPENSATION**

(a) Daily Rate: The Contract Agency agrees to pay the county a daily rate for each day or portion of a day a Contract Agency inmate is in custody at the jail facilities. The daily bed rate for 2027 is $213.00 per day.

(b) No Split Billing: No split billing between agencies for inmates that may be in custody on multiple jurisdictions charges. Each Contract Agency will be responsible for their inmates at the daily rate established.

(c) Billing: The County will bill the Contract Agency each month for amount due to the County under this agreement for the services rendered in the prior calendar month. (The County will run a report from the Jail Management System that will provide how many total bed days the Contract Agency has accumulated for the previous month).

An invoice will be sent on the (1st) first of each month unless it is a weekend or holiday, in this case it will be sent on the first available business day, with the amount due 30 days following the invoice. **If payment is not made by the due date, a late fee of 1% per month of the past due amount will be added to the balance. Late fees will continue to accrue monthly (12% per annum) until the account is current.**

7. **RIGHT OF INSPECTION**

The City shall have the right to inspect, at all reasonable times, all Chelan County facilities in which inmates of the City are confined in order to determine if such jail maintains standards of confinement acceptable to the City and that such inmates therein are treated equally regardless of race, religion, color, creed or national origin; provided, however, that Chelan County shall be obligated to manage, maintain and operate its facilities consistent with all applicable federal, state and local laws and regulations.

8. **FURLOUGHS, PASSES, AND WORK RELEASE**

Chelan County agrees that no early releases or alternatives to incarceration, including furloughs, passes, electronic home detention or work release shall be granted to any inmate housed pursuant to this Agreement without written authorization by the committing court.

9. **INMATE ACCOUNTS**

Chelan County shall establish and maintain an account for each inmate received from the City and shall credit to such account all money which is received and shall make disbursements, debiting such accounts in accurate amounts for the inmate's personal needs. Disbursements shall be made in limited amounts as are reasonably necessary for personal maintenance. The Director of the CCRJC shall be accountable to the City for such inmate funds. At either the termination of this Agreement, the inmate's death, release from incarceration, or return to either the City or indefinite release to the court, the inmate's money shall be transferred to either the inmate's account in care of the City, at such time the City shall be accountable to the inmate for said fund, or to the inmate.

Docusign Envelope ID: 8DF6C4DE-7C5F-831D-83AF-299208585846

10. **INMATE PROPERTY**

The City may transfer to Chelan County only limited amounts of personal property of the City's inmates' recovered from or surrendered by inmates to the City upon booking. Personal property in excess of one simple "grocery bag" shall at no time be transferred to Chelan County.

11. **RESPONSIBILITY FOR OFFENDER'S CUSTODY**

It shall be the responsibility of Chelan County to confine the inmate or inmates; to provide treatment, including the furnishing of subsistence and all necessary medical and hospital services and supplies; to provide for the inmates' physical needs; to make available to them programs and/or treatment consistent with the individual needs; to retain them in said custody; to supervise them; to maintain proper discipline and control; to make certain that they receive no special privileges and that the sentence and orders of the committing court in the State are faithfully executed; provided that nothing herein contained shall be construed to require Chelan County, or any of its agents, to provide service, treatment, facilities or programs for any inmates confined pursuant to this Agreement, which it does not provide for similar inmates not confined pursuant to this Agreement. Nothing herein shall be construed as to require Chelan County to provide services, treatment, facilities or programs to the City's inmates above, beyond or in addition to that required by applicable law.

12. **MEDICAL SERVICES**

(a) Inmates shall receive such medical, psychiatric and dental treatment when emergent and necessary to safeguard their health while housed in the CCRJC. Chelan County shall provide or arrange for the providing of such medical, psychiatric and dental services. Except for routine minor medical services provided in the CCRJC, the City shall pay directly or reimburse Chelan County for any and all costs associated with the delivery of any emergency and/or major medical service provided to the City's inmates. The City shall be responsible for any and all medical, psychiatric and dental treatment provided outside of the CCRJC and shall be billed therefore. Examples of medical services which may be provided in the CCRJC but which are not routine, and for which the City shall be billed include, but are not necessarily limited to, HIV/AIDS treatment, chemotherapy, dialysis treatment, hemophiliac treatment and all prescriptions. No dental treatment can be provided in the CCRJC; all dental treatment of the City's inmates shall be billed to the City.

(b) An adequate record of all such services shall be kept by Chelan County for the City's review at its request, to the extent consistent with confidentiality regulations. Any medical or dental services of major consequence shall be reported to the City as soon as time permits.

(c) Should medical, psychiatric or dental services require hospitalization, the City agrees to compensate Chelan County dollar for dollar any amount expended or cost incurred in providing the same; provided that, except in emergencies, the City will be notified by contacting **Matthew Selby, City Administrator** at **(509) 548-5275 Ext 133** prior to the inmate's transfer to a hospital, if and when circumstances allow, or as soon afterward as practicable. Medical cost recovery will be split between User Agencies if the individual has multiple jurisdictions. Medical cost recovery will be split between User Agencies if the individual has multiple jurisdictions billings

Docusign Envelope ID: 8DF6C4DE-7C5F-831D-83AF-299208585846

(d) The City shall be responsible for non–routine healthcare costs for inmates arrested and incarcerated on a felony offense until that charge is filed in Superior Court. Thereafter, the responsibility for non-routine healthcare costs for inmates arrested and incarcerated on a felony offense shall lie with Chelan County.

13. **DISCIPLINE**

Chelan County shall have physical control over and power to execute disciplinary authority over all inmates of the City's. However, nothing contained herein shall be construed to authorize or permit the imposition of a type of discipline prohibited by applicable law.

14. **RECORDS AND REPORTS**

(a) The City shall forward to Chelan County before or at the time of delivery of each inmate a copy of all inmate records pertaining to the inmate's present incarceration. If additional information is requested regarding a particular inmate, the parties shall mutually cooperate to provide any additional information in a timely manner.

(b) Chelan County shall keep all necessary and pertinent records concerning such inmates in the manner mutually agreed upon by the parties hereto. During an inmate's confinement in Chelan County, the City shall upon request be entitled to receive and be furnished with copies of any report or records associated with said inmate(s) incarceration.

15. **REMOVAL FROM THE JAIL**

An inmate of the City's legally confined in Chelan County shall not be removed there from by any person without written authorization from the City or by order of any court having jurisdiction. The City hereby designates **Matthew Selby, City Administrator** the official authorized to direct Chelan County to remove the City's inmates from the CCRJC. Chelan County agrees that no early releases or alternatives to incarceration including furloughs, passes, work release, work crews or electronic home detention shall be granted to any inmate without written authorization from the committing court. This paragraph shall not apply to an emergency necessitating the immediate removal of the inmate for medical, psychiatric, dental treatment or other catastrophic condition presenting an eminent danger to the safety of the inmate or to the inmates or personnel of Chelan County. In the event of any such emergency removal, Chelan County shall inform the City of the whereabouts of the inmate or inmates so removed, at the earliest practicable time, and shall exercise all reasonable care for the safe keeping and custody of such inmate or inmates.

16. **ESCAPES**

In the event any City inmate escapes from Chelan County's custody, Chelan County will use all reasonable means to recapture the inmate. The escape shall be reported immediately to the City. Chelan County shall have the primary responsibility for and authority to direct the pursuit and retaking of the inmate or inmates within its own territory. Any cost in connection therewith shall be chargeable to and borne by Chelan County; however, Chelan County shall not be required to expend unreasonable amounts to pursue and return inmates from other counties, states or countries.

Docusign Envelope ID: 8DF6C4DE-7C5F-831D-83AF-299208585846

17. **DEATH OF AN INMATE**

(a) In the event of the death of a City inmate, the Chelan County Coroner shall be notified. The City shall receive copies of any records made at or in connection with such notification.

(b) Chelan County shall immediately notify the City of the death of a City inmate, furnish information as requested, and follow the instructions of the City with regard to the disposition of the body. In the case of an unattended death, suspicious death, or criminal case, the Chelan County Coroner would have authority over the deceased and would coordinate with local law enforcement to finish the investigation prior to the release of the deceased inmate. The City hereby designates **Matthew Selby, City Administrator** the official authorized to request information from and provide instructions to Chelan County regarding deceased inmates. The body shall not be released except on written order of said appropriate official of the City. Written notice shall be provided within three (3) weekdays of receipt by the City of notice of such death. All expenses relative to any necessary preparation of the body and shipment charges shall be paid by the City. With the City's consent, Chelan County may arrange for burial and all matters related or incidental thereto, and all such expenses shall be paid by the City. The provisions of this paragraph shall govern only the relations between or among the parties hereto and shall not affect the liability of any relative or other persons for the disposition of the deceased or for any expenses connected therewith.

(c) The City shall receive a certified copy of the death certificate for any of its inmates who have died while in Chelan County's custody.

18. **HOLD HARMLESS AND INDEMNIFICATION**

Chelan County agrees to hold harmless, indemnify and defend the City, its officers, agents and employees, from and against any and all claims, losses, or liability, for injuries, sickness or death of persons, or damage to property, arising out of any willful misconduct or negligent act, error, or omission of Chelan County, its officers, agents, or employees, in connection with the services required by the Agreement, provided, however, that:

(a) Chelan County's obligations to indemnify, defend and hold harmless shall not extend to injuries, sickness, death or damage caused by or resulting from the sole willful misconduct or negligence of the City, its officers, agents or employees or sub-consultants; and

(b) Chelan County's obligations to indemnify, defend and hold harmless for injuries, sickness, death or damage caused by or resulting from the concurrent negligence or willful misconduct of the Chelan County and the City or of Chelan County and a third party other than an officer, agent or employee of Chelan County, shall apply only to the extent of the negligence or willful misconduct of Chelan County.

Docusign Envelope ID: 8DF6C4DE-7C5F-831D-83AF-299208585846

19. **RIGHT OF REFUSAL AND TRANSPORTATION**

(a) Chelan County shall have the right to refuse to accept any inmate from the City when, in the opinion of Chelan County, its inmate census is at capacity that there is a substantial risk that, through usual operation of the jail, the reasonable operational capacity limits of the jail might be reached or exceeded.

(b) Chelan County shall further have the right to refuse to accept any inmate from the City who, in the judgment of Chelan County, has a current illness or injury which may adversely affect the operations of the CCRJC, has a history of serious medical problems, or presents a substantial risk of self-harm.

20. **INDEPENDENT CONTRACTOR**

In providing services under this contract, Chelan County is an independent contractor and neither it or its officers, agents or employees are employees of the City for any purpose, including responsibility for any federal or state tax, industrial insurance or Social Security liability. Neither shall the provision of services under this Agreement give rise to any claim of career service or civil service rights, which may accrue to an employee of the City under any applicable law, rule or regulation.

21. **GENERAL PROVISIONS**

(a) Severability. In the event any provisions of this Agreement shall be determined to be unenforceable or otherwise invalid for any reason, such provisions shall be enforced and valid to the extent permitted by law. All provisions of this Agreement are severable and unenforceability or invalidity of a single provision herein shall not affect the remaining provisions.

(b) Governing Law and Venue. This Agreement shall be governed by the laws of the State of Washington, and venue for any lawsuit shall be the Chelan County Superior Court.

(c) Attorney's Fees. In the event it is necessary for either party to utilize the services of an attorney to enforce any of the terms of this Agreement, such enforcing party shall be entitled to compensation for its reasonable attorney's fees and costs. In the event of litigation regarding any terms of this Agreement, the substantially prevailing party shall be entitled, in addition other relief, to such reasonable attorney's fees and costs as determined by the Court.

(d) Waiver of Breach. The waiver by either party of the breach of any provision of this Agreement by the other party must be in writing and shall not operate nor be construed as a waiver of any subsequent breach by such other party.

(e) Savings Clause. Nothing in this Agreement shall be construed so as to require the commission of any act contrary to law, and wherever there is any conflict between any provisions of this Agreement and any statute, law, public regulation or ordinance, the latter shall prevail but in such event, the provisions of this Agreement affected shall be curtailed and limited only to the extent necessary to bring it within legal requirements.

Docusign Envelope ID: 8DF6C4DE-7C5F-831D-83AF-299208585846

(f) Filing. This Agreement shall be filed with the Chelan County Auditor's Office pursuant to RCW 39.34.040.

22. INTERPRETATION

This Agreement has been submitted to the scrutiny of all parties and their counsel, if desired, and it shall be given a fair and reasonable interpretation in accordance with its words, without consideration or weight given to its being drafted by any party or its counsel. All words used in the singular shall include the plural; the present tense shall include the future tense; and the masculine gender shall include the feminine and neuter gender.

23. ACCESS TO RECORDS CLAUSE

The parties hereby agree that authorized representatives of the parties shall have access to any books, documents, paper and record of the other party that are pertinent to this Agreement for the purposes of making audits, examinations, excerpts and transcriptions. All such records and all other records pertinent to this Agreement, and work undertaken pursuant to this Agreement shall be retained by the parties for a period of three (3) years after the final expiration date of this Agreement or any amendments hereto, unless a longer period is required to resolve audit, findings or litigation. In such cases, the parties may expressly agree by an amendment or separate agreement for such longer period for record retention.

CHELAN COUNTY
COMMISSIONERS OFFICE

INTERNAL PROPOSAL FOR OPIOID SETTLEMENT FUNDING

TO: Board of Chelan County Commissioners (BOCC)
FROM: Chelan County Juvenile Center
PROGRAM: Chelan Douglas CASA
PROJECT TITLE: Opioid Remediation Strategies
REQUESTED FUNDING PERIOD: 3 Calendar Years 2027, 2028, and 2029

---

1. Executive Summary

The Chelan County Juvenile Center respectfully submits this three-year funding request to the Board of Chelan County Commissioners (BOCC) for Opioid Settlement Funds to support the implementation of abatement strategies through the Chelan Douglas CASA program.

The opioid epidemic has had a significant impact on families throughout Chelan County, contributing to circumstances in which children may experience abuse, neglect, and parental incapacity. Children removed from their homes due to parental opioid use may experience adverse childhood experiences (ACEs), trauma, and disruptions to their development. Operating in accordance with RCW 13.34, the Chelan Douglas CASA program provides highly trained, independent community volunteers to advocate exclusively for the best interests of children involved in juvenile court dependency proceedings.

To address critical funding gaps and meet the needs of children and families involved in dependency cases, this proposal requests three years of opioid settlement funding for 2027, 2028, and 2029. Funds will directly support CASA volunteer recruitment and retention, professional supervision, trauma-informed training, and services that promote child and family wellbeing. The remediation activities are intended to align with the *Exhibit E List of Opioid Remediation Uses* specifically Schedule B: Approved Uses and will strengthen the program's capacity to advocate for children and support positive outcomes for families affected by the opioid epidemic.

---

2. Detailed Project Description

<u>Program Overview & Services Provided</u>

Chelan Douglas CASA serves dependent children and youth who have experienced abuse and neglect. CASA volunteers establish consistent, one-on-one relationships with the children they serve, gathering information from the parents, caregivers, family members, educators, medical personnel, and behavioral health professionals. Through this

independent advocacy, volunteers present recommendations directly to the juvenile court regarding each child's safety, health, emotional wellbeing, and long-term permanency. Opioid settlement funding will enhance Chelan Douglas CASA's capacity to advocate for children impacted by parental opioid use and any co-occurring substance use disorders/mental health conditions (SUD/MH). Key remediation strategies delivered under this project may include, but are not limited to, the following:

- Connecting children and families to supportive services: Facilitate connections among birth parents, foster parents, and relative caregivers and appropriate home-based, wrap-around services, parenting education, and bilingual (English/Spanish) resources when a parent has Opioid Use Disorder (OUD) or co-occurring SUD/MH.
- Supporting children and families affected by trauma: Enhance advocacy and connections to appropriate services for children and family members experiencing trauma associated with addiction, with particular attention to children who have endured adverse childhood experiences (ACEs).
- Providing trauma-informed court-based advocacy: Deliver specialized, trauma-informed advocacy for children who have been removed from their homes and placed in kinship/foster care due to circumstances involving parental opioid use.

These remediation strategies will help ensure that children affected by parents with OUD have a consistent advocate who can identify unmet needs, facilitate connections to supportive services, and promote safety, stability, and positive long-term outcomes.

Target Population & Historical Service Volume

Children and youth are referred to Chelan Douglas CASA through the Chelan County Juvenile Court in connection with dependency proceedings initiated under applicable Washington State law including RCW 13.34. Historical program data illustrates the age distribution of children and youth served annually in Chelan County:

- Ages 0-5: Approximately 40-50 children annually, including infants who may be affected by prenatal opioid exposure and Neonatal Abstinence Syndrome (NAS) as well and young children at risk of developmental delays and other early childhood challenges.
- Ages 6-11: Approximately 20-25 children annually who may experience the ongoing effects of trauma, disruptions in education, and challenges related to family stability and wellbeing.
- Ages 12-18: Approximately 25-35 youth annually who may face complex behavioral health needs, educational challenges, and barriers to achieving stability and long-term permanency.

Service Delivery Locations & Cross-Agency Collaboration

Services are coordinated and delivered across community, court, and home settings throughout Chelan County. The Chelan Douglas CASA program maintains formal operational cross-agency collaborations with:

- Department of Children, Youth and Families (DCYF)
- Assistant Attorney General (AAG)
- Chelan County Superior Court and Juvenile Court Judicial Officers
- Local Medical and Behavioral Health Providers ensuring children, parents and family members are referred for treatment
- Local Schools, Wenatchee Valley College and Treehouse ensuring children and youth are referred for academic supports
- Parents for Parents
- Chelan County Regional Justice Center
- Chelan County Juvenile Detention and Probation
- Link Transit
- Kinship Navigator
- Womens Resource Center, Grace House, HopeSource, YWCA
- Chelan Douglas Volunteer Attorney Services
- Skillsource and Worksource
- The Center for Alcohol and Drug Treatment, CAFÉ, New Path
- Visitation agencies ensuring children visit with their parents during their time out of the home

---

3. Program Evaluation, Outcomes, and Rationale

Intended Impact on Chelan County Residents

By ensuring that children and youth affected by parental opioid use have a trained CASA volunteer advocating on their behalf Chelan County must invest in consistent, trusted adult relationships and individualized and relevant support for some of its most vulnerable residents. CASA best interest advocacy identifies unmet needs, connects children and families with appropriate services, and supports efforts to reduce the lasting effects of trauma. Through independent court advocacy and focus on child safety, family reunification when appropriate, and stable, permanent placements, the program seeks to improve

outcomes for children and youth, promote lasting family stability, and reduce the long term impacts of the opioid epidemic in Chelan County.

Tracked Efficacy Metrics & Performance Data

To support accountability and comply with BOCC evaluation requirements, Chelan Douglas CASA can provide quarterly/annual reports documenting program performance, service delivery, and outcomes. Key performance indicators may include:

- Caseload and service coverage.
- Volunteer recruitment, training, and retention.
- Case duration and permanency.
- Service connections.

Funding Rationale & Loss of Alternative Revenue

This proposal addresses a critical funding vulnerability resulting from reductions in Chelan County general fund support. Opioid settlement funding would help sustain essential CASA services and prevent reductions in the program's capacity to serve children involved in dependency proceedings.

Funding will support staff infrastructure necessary to recruit, screen, train and supervise community volunteers and provide consistent independent advocacy for children who have experienced abuse or neglect. By supplementing existing revenue sources, opioid settlement funds will help Chelan Douglas CASA sustain services, respond to local dependency caseloads, and ensure children have access to a trained advocate during a critical period in their lives.

Multi year funding for 2027-2029 would provide greater financial stability, allowing the program to plan for staffing, volunteer development and service delivery while continuing to support Chelan County children and families affected by the opioid epidemic.

---

4. Implementation Timeline & Key Milestones (2027–2029)

The proposed project will span three years, from January 1, 2027, through December 31, 2029. The following milestones will guide implementation, service delivery, and program evaluation.

- Milestone 1: Volunteer Recruitment and Training (Q1 and ongoing)
  Launch a targeted community recruitment campaign in Chelan County to expand the pool of qualified CASA volunteers. Provide an initial 36 hour preservice for new volunteers covering ACES and childhood trauma, Ages and Stages, child

development and individual needs, substance use disorders, family engagement, and collaboration with other professionals. Continue recruitment and training efforts throughout the project period to support volunteer capacity and retention.

- Milestone 2: Ongoing Advocacy and Volunteer Development (2027-2029)
  Assign trained CASA volunteers to children involved in juvenile court dependency proceedings involving parental opioid use or other substance use, as program capacity and court appointments permit. Work toward ensuring that every eligible child has a trained CASA advocate, provide ongoing supervision, case consultation, and ensure active volunteers meet their annual continuing education requirements.
- Milestone 3: Program evaluation and reporting (Quarterly/Annually 2027-2029)
  Track program performance through regular data collection and reporting, including the number of children served, volunteer recruitment and retention, case duration, permanency outcomes, and connections to appropriate services. Submit monthly expenditure reports, prepare quarterly and annual program summaries for the BOCC, documenting progress toward project objectives, use of settlement funds and opportunities for improvement.

---

5. Budget Narrative & Financial Overview

The requested allocation will support essential operational costs necessary to sustain high-quality, effective child advocacy services consistent with National CASA/GAL Association standards, applicable Washington State Law, and Washington State Superior Court Guardian ad Litem rules.

Funding will help sustain the staffing and program infrastructure necessary to recruit, screen, train, supervise, and retain qualified CASA volunteers. These investments will strengthen the program's capacity to provide consistent, trauma-informed advocacy for children who have experienced abuse and neglect associated with parental substance use disorders. By supporting volunteer development, professional supervision, and ongoing operations, opioid settlement funds will help Chelan-Douglas CASA maintain service continuity, respond to local dependency caseloads, and promote child safety, well-being, and permanency throughout the three-year funding period.

Budget (2027–2029)

Expense Category	Focus Area	Year 1 (2027)	Year 2 (2028) (+3.0% CPI)	Year 3 (2029) (+3.0% CPI)	3-Year Total
Volunteer Supervision & Staffing Infrastructure	Maintaining staff needed to recruit, screen, train, and supervise community volunteers providing independent court advocacy.	$11,500	$11,845	$12,200	**$35,545**
Trauma, ACEs & SUD Volunteer Training	Funding 36-hour pre-service training (ACEs, childhood trauma, SUD) and annual continuing education requirements.	$3,500	$3,605	$3,713	**$10,818**
Volunteer Recruitment & Screening	Targeted community recruitment campaigns in Chelan County, screening, and volunteer retention efforts.	$2,500	$2,575	$2,652	**$7,727**
Child & Caregiver Support Services	Facilitating connections to wrap-around services, parenting education, and bilingual (English/Spanish) resources.	$1,500	$1,545	$1,591	**$4,636**
Data Tracking & BOCC Reporting	Preparing monthly expenditure reports and quarterly/annual program performance summaries for the BOCC.	$1,000	$1,030	$1,060	**$3,090**
TOTAL REQUESTED FUNDS	**3-Year Opioid Settlement Allocation**	**$20,000**	**$20,600**	**$21,216**	**$61,816**

2027

Project Proposal – Opioid Abatement Funding

Prepared By: Rebecca Gollehon
Columbia River Drug Task Force
10/23/2026

COLUMBIA RIVER DRUG TASK FORCE

401 Washington St, Level 1, Wenatchee, WA 98801
PHONE (509) 664-2310 FAX (509) 664-2318

Project Description

1. **Provide an executive summary of the proposal.**
   The Columbia River Drug Task Force is a multijurisdictional task force comprised of the Chelan County Sheriff's Office, Douglas County Sheriff's Office, East Wenatchee Police Department, Wenatchee Police Department, and the Washington State Department of Corrections. The primary mission of the Columbia River Drug Task Force is to combat illegal drug activity, gangs, and violent crime in our communities. In recent years, funding for multijurisdictional drug task forces has been redirected, with the last of the funding ending on June 30, 2025. To cover basic operational costs, the Columbia River Drug Task Force is requesting a total of $99,284.00 to be divided by population from each of the four jurisdictions that the task force operates in. The total we are requesting from Chelan County for fiscal year 2027 is $36,102.92.
2. **Provide a detailed description of the proposed project. Please include an implementation plan, internal and cross-agency collaboration, services to be provided, how many potential individuals will receive services, and where services will be delivered.**
   The proposed project is a multi-jurisdictional task force established in 1991, the Columbia River Drug Task Force, operating in both Chelan and Douglas County. The Columbia River Drug Task Force is comprised of the Chelan County Sheriff's Office, Douglas County Sheriff's Office, Wenatchee Police Department, East Wenatchee Police Department, and the Washington State Department of Corrections. The unit is currently made up of a commander, supervisor, administrative assistant, and five detectives. The primary mission of the Columbia River Drug Task Force is to combat illegal drug activity, gangs, and violent crime in our communities. Along with that mission we realize there are other serious issues driven by illegal drugs that are affecting our communities as well. These issues include; violent crime involving gang members and drug dealers, property crime, vehicle prowls, trafficking in stolen property, vehicle thefts, wanted felons fleeing from law enforcement, and a flood of fentanyl coming into our communities. The ultimate goals/vision of the Columbia River Drug Task Force are to reduce crime, increase community safety, and improve quality of life.
3. **What Opioid Remediation Use(s) does your project align with? (See List of Opioid Remediation Uses) (Attachment 2)**
   The Columbia River Drug Task Force aligns closely with "Part Two: Prevention", more specifically "Prevent Misuse of Opioids" and "Prevent Overdose Deaths and Other Harms (Harm Reduction)". The task force works to disrupt and/or dismantle drug trafficking organizations that are supplying our community and surrounding areas with harmful drugs.

COLUMBIA RIVER DRUG TASK FORCE

401 Washington St, Level 1, Wenatchee, WA 98801
PHONE (509) 664-2310 FAX (509) 664-2318

Evaluation

1. **What is the intended impact to Chelan County Residents?**
   The Columbia River Drug Task Force continuously works to reduce crime, increase community safety, and improve quality of life. The task force is operational in both Chelan and Douglas County, and frequently work cases within Chelan County. These cases include: drug seizures, arrests, and/or the disruption/dismantling of drug trafficking organizations within the County.
2. **What outcomes will be tracked to demonstrate efficacy?**
   The Columbia River Drug Task Force keeps monthly stats that include; number of new cases opened, number of cases closed by arrest, number of individuals arrested, number of firearms seized, drug types and amounts seized, and more. We are also able to track the number of individuals that are or were a part of a drug trafficking organization, and whether the drug trafficking organization has been disrupted or dismantled. We track the number of arrested individuals that are known gang members. We also look at crime trends and citizen complaints quarterly to assess whether those numbers have increased or declined.
3. **How will these outcomes demonstrate program effectiveness?**
   In order to achieve the goals of the task force, the unit needs to be successful in seizing drugs and disrupting and dismantling drug trafficking organizations operating in the Wenatchee valley. By tracking quantitative data, we're able to demonstrate the effectiveness of our unit by showing the amount of drugs being taken off of the street and how many drug trafficking organizations have been effected. The arrest stats also play a big role. There can be cases where the drug seizures may not have been significant, but the unit was still able to arrest individuals responsible for distributing drugs around the valley.
4. **Does this proposal support an existing program that has lost funding? If so, provide rationale and data supporting the efficacy of the program?**
   Historically, the 18 narcotics task forces in Washington State were funded by the federal Edward Byrne Memorial Justice Assistance Grant (JAG). Over the years the funding language through BJA (Bureau of Justice Assistance) expanded, so this funding could be used for other programs. Over the last 15 years the use for this funding has become broader and broader resulting in the money that historically has helped fund these task forces, being diverted to other projects. Three years ago, a bi partisan letter was written from our Washington Congress men and women requesting that Governor Inslee find funding at the state level to continue to help fund these task forces. Governor Inslee did create that funding in his budget, however the funding ended in June 2025 with no plan to continue. We are truly in a drug epidemic with Fentanyl being the leading cause of death for Americans and Washingtonians from ages 19-49. Long term, stable funding is critical for our task force to continue to keep our community safe and healthy for years to come.

COLUMBIA RIVER DRUG TASK FORCE

401 Washington St, Level 1, Wenatchee, WA 98801
PHONE (509) 664-2310 FAX (509) 664-2318

Timeline

1. **Describe the timeline and at least three major implementation milestones for this project.**
   The project is a multi-jurisdictional task force, therefore it is ongoing and has no timeline. We are regularly opening new investigations, following leads, cultivating confidential informants, doing controlled buys, etc. In order to accomplish the ultimate goals of the task force, the unit has to conduct thorough investigations. Detectives are typically working multiple cases at once, and it's typical for investigations to last weeks if not months. They are expected to build strong cases that will stand prosecution.
2. **What is the anticipated start date of services?**
   We are requesting funding for fiscal year 2027. The project is established and ongoing, therefore we'd be requesting reimbursement for expenses beginning January 1, 2027 if possible.
3. **Indicate the period that funding is requested for.**
   We are requesting funding in the amount of $36,102.92 for fiscal year 2027.

Budget Narrative

1. **Provide a short description of the budget items include a budget worksheet, including justification and rationale for cost estimates.**
   We are requesting funding for operating costs for the fiscal year. Operating costs include but are not limited to: rent, utilities, vehicle impound storage, equipment subscriptions, fuel, cell phones, etc. The total amount of $99,284.00 will be split among the four jurisdictions that make up the task force based on population, thus making Chelan County's portion $36,102.92.

MEMO

TO: Board of Commissioners

FROM: Ron Cridlebaugh, Economic Services Director

DATE: November 2nd, 2026

RE: OVOF Action Plan

Commissioners,

OVOF has completed its 2027 - 2031 action plan which contains 108 action items and 11 game changers. OVOF has identified 27 items that they are asking Chelan County to be a lead partner on. Chelan County wouldn't necessarily be the only lead partner and there are often many supporting partners as well. The lead partner items for Chelan County are:

Focus Area: Well-Planned Region

1. Build Out the Pathways Project: Fund and construct the four Pathways Project plans, connecting our communities with safe walking and biking paths.
2. Complete the Confluence Parkway Project: Secure funding needed to complete all phases of the Confluence Parkway project, creating a continuous north-south transportation corridor that improves safety, reduces congestion, strengthens emergency evacuation routes, and supports future economic and residential growth throughout the Wenatchee Valley.
3. Create Neighborhood Services: Revise zoning regulations throughout the region to allow small-scale, walkable commercial uses, such as cafes and corner stores, in or near residential neighborhoods.
4. Improve Bicycling Infrastructure: Construct lanes and parking as recommended in the CDTC Regional Transportation Plan to create safe and useful corridors for bike transit.
5. Manson-Chelan Emergency Access Corridor: Develop a secondary corridor designated primarily as a dedicated Emergency Vehicle Ingress Route for first responders during large-scale events and regional incidents separate from SR 150.

6. Online Permit Portal: Assess the feasibility of a shared, regional online permit portal for residential and commercial applications, streamlining submissions to reduce time and costs for applicants.
7. Parks Access: Ensure all residents of Chelan and Douglas Counties have local access to parks and green spaces. Develop or improve parks in rural communities such as Rock Island, Entiat, Orondo, and Malaga.
8. Regional Planning: Convene community leaders from jurisdictions and agencies to coordinate long-term planning for land use, housing accessibility, infrastructure projects, and transportation as part of the regional ecosystem.

Focus Area: Safe, Healthy Supported People

9. Crisis Response Center: Conduct a feasibility study into building an NCW crisis response center that provides jail commitment and post-jail commitment support services to people experiencing mental health and substance-use disorder challenges so they can successfully reintegrate back into the community. Fold behavioral health, workforce training, housing, transportation, and other services into the crisis response center's programs.
10. Regional Jail: Research the feasibility of a regional jail for Chelan, Douglas, Grant, and Okanogan Counties. Identify future capacity needs, programming, specialized services, and regional solutions to improve safety, operations, and outcomes.
11. Supportive Housing: Develop a permanent supportive housing village with small homes, shared community space, and on-site services for people transitioning out of chronic homelessness in coordination with local housing partners.

Focus Area: Sustainable Environment

12. Dark Sky Designation: Develop and protect a regional dark sky international designation to support wildlife habitat, encourage visitor dispersal beyond core hubs and support off-peak tourism.
13. Forest Products Campus: Develop a forest products campus in Chelan County to process small diameter wood to improve the return on investment of forest health thinning in the region.
14. Implement the Belonging in the Outdoors Report: Advance the 17 recommendations from the Belonging in the Outdoors Report to make outdoor recreation more accessible, affordable, and welcoming for people of all abilities, backgrounds, and identities through coordinated partnerships, community engagement, and investment.
15. Invest in Outdoor Recreation: Invest in the region’s existing outdoor recreation assets as essential infrastructure. Strengthen stewardship and improve access through coordinated regional funding and advocacy.
16. Lake Chelan Access: Increase public access to Lake Chelan by developing “road end” mini parks in public right of ways.

CHELAN COUNTY
ECONOMIC SERVICES
Community Services & Housing Division
400 WASHINGTON STREET, WENATCHEE, WA 98801
T: 509.667.6881

17. Preservation of Open Space Lands: Protect and invest in undeveloped open space lands identified as priorities in local comprehensive plans, including areas of community significance near the East Wenatchee Foothills, Chelan Butte, and Burch Mountain.
18. Resource Intensive Projects: Convene community discussions about data centers and other large, resource-intensive development projects to explore potential environmental and economic impacts. Bring together stakeholders to identify key questions, information gaps, and areas for additional study. Develop a nonbinding framework of community considerations and guiding principles to help inform public conversations, engagement and decision-making about future resource-intensive development in the region.
19. Reuse and Recycling Systems: Expand regional partnerships and infrastructure that encourage reuse, repair, recycling, organics recovery, and material recovery while increasing public awareness of available programs. Support collaborative solutions that strengthen local markets for recovered materials, reduce waste, and improve access to reuse and recycling opportunities.
20. Youth Shelter: Develop a regional youth shelter to provide safe housing and 24-hour care for unaccompanied minors. Include case management, drop-in outreach, and connection to school and healthcare.
21. Veterans Resource Center: Establish a centralized location to connect veterans with services and resources from public agencies and community-based organizations
22. Veterans Suicidal Response Unit: Develop a veteran-focused mental health and crisis response unit in partnership with local agencies. Connect at-risk veterans with trained veteran peers who can provide de-escalation and support. Engage families and support networks to strengthen early intervention, connection to services, and ongoing support.

Focus Area: Shared Prosperity

23. Food Truck Lots: Update zoning and codes to allow food truck lots or similar small-scale food and beverage hubs as a low-cost entry point for entrepreneurs and to create affordable dining options and gathering places.
24. Lake Chelan Economic Development Strategy: Develop a year-round multifaceted economic strategy for the Lake Chelan Valley to expand job opportunities, raise local wages, and strengthen year-round resiliency and prosperity for the community.
25. Peshastin Mill Property: Continue to research and seek community input about potential future uses of the Peshastin Mill property
26. Regional Flea Market: Develop a regional flea market in which vendors offer a wide range of affordable, unique goods, tasty street food, and a culturally welcoming atmosphere.
27. Rural Economic Diversification: Invest in and support economic diversification in rural communities, each of which has unique challenges and strengths. Conduct a study to identify goals to fill each community's business mix, infrastructure, and building gaps.

CHELAN COUNTY
ECONOMIC SERVICES
Community Services & Housing Division
400 WASHINGTON STREET, WENATCHEE, WA 98801

GRANT SERVICES AGREEMENT
RE: 2026 LODGING TAX FUNDED ACTIVITIES

THIS AGREEMENT, made and entered into by and between Chelan County, a municipal corporation of the State of Washington, hereinafter referred to as "County," and NCW Arts Alliance hereinafter referred to as "Contractor."

WHEREAS, the County, after the Lodging Tax Advisory Committee duly advertised, reviewed and recommended lodging tax funded activities, based on the information provided in the application attached hereto as the scope of work; and

WHEREAS, the Contractor represents that the tourism promotion activities in said application meet all the requirements set forth in RCW 67.28.1816. And further agree to any reporting requirements set out in this RCW or otherwise required by the County.

NOW, THEREFORE, and in consideration of the mutual benefits set out herein, it is agreed as follows:

1. **Services.** The Contractor shall perform the services identified in the attached Scope of Work (LTAC Application) as approved by the County's Lodging Tax Advisory Committee, and provide all staffing, materials and supplies in order to carry out such work.

2. **Funding Amount.** The County shall grant to the Contractor under this Agreement a sum not to exceed $500.00 for satisfactorily carrying out the Scope of Work described in the LTAC Application Amendment. Payments made pursuant to this paragraph shall be the total compensation by the County for the services to be performed by Contractor. Payments will be made on a reimbursement basis after the Contractor has submitted attached "Reimbursement Request" as well as the "Attendance and Recap Report" to cm.ltac@co.chelan.wa.us. Funds may not be reallocated to other activities.

3. **Indemnification.** Contractor shall defend, indemnify and hold the County, its officers, officials, employees and volunteers harmless from any and all claims, injuries, damages, losses or suits including attorney fees, arising out of or resulting from the acts, errors or omissions of the Contractor in the performance of this Agreement, except for injuries and damages caused by the sole negligence of the County.

4. **Term.** The term of this Agreement and the performance of the Contractor shall commence upon signing by both parties and shall terminate on December 31, 2026.

5. **Reporting.** Contractor shall complete the "Attendance and Recap Report" within 30 days following the event/activity. This form must be returned to **cm.ltac@co.chelan.wa.us**.

6. **No Discrimination.** Contractor shall, in employment made possible or resulting from this Agreement, ensure that there shall be no unlawful discrimination against any employee or applicant for employment in violation of RCW 49.60.180, as currently written or hereafter amended, or other applicable law prohibiting discrimination, unless based upon a bona fide occupational qualification as provided in RCW 49.60.180 or as otherwise permitted by other applicable law. Further, no person shall be denied or subjected to discrimination in receipt of the benefit of any services or activities made possible by or resulting from this Agreement in violation of RCW 40.60.215 or other applicable law prohibiting discrimination.

7. **Dispute Resolution.** Any dispute concerning questions of fact in connection with the work not disposed of by agreement between Contractor and the County shall be referred for determination to the County Commissioners, whose decision in the matter shall be final and binding on the parties of this agreement, provided, however, that if an action is brought challenging the Commissioners' decision, that decision shall be subject to de novo judicial review. In the event of litigation over the terms of this agreement, each party shall bear its own attorney's fees and costs incurred therein.

FOR
MALAGA COMMUNITY PARK IMPROVEMENT PROJECTS

This Coordination Agreement ("Agreement") is made and entered into by and between Chelan County ("County") and the Malaga-Colockum Community Council ("Council"), known collectively as the "Parties," as of the effective date below.

RECITALS

A. Malaga-Colockum Community Council owns the Malaga Community Park and is working with Chelan County to implement improvements at the Community Park.

B. Chelan County has received and is managing funds from Microsoft on behalf of the Malaga-Colockum Community Council for Malaga Community Park improvements.

C. The purpose of the Agreement is to set forth the terms and conditions whereby the Parties will coordinate their efforts.

AGREEMENT

The Parties hereby agree as follows:

1. Term. This Agreement shall commence upon the date of mutual execution (the "Effective Date") and expire in 24 months, subject to extension upon mutual agreement by the Parties.

2. Responsibilities of the Parties.

2.1 County. County is and shall be responsible for the following:

2.1.1 Management and disbursement of Microsoft funds to Council for eligible Community Park improvement projects.

2.1.2 Reporting to Microsoft on the use of funds for Community Park improvement projects.

2.1.3 Reporting to Council status of available Microsoft funds.

2.2 Council. Council is and shall be responsible for the following:

2.2.1 Identification and implementation of Community Park improvement projects in accordance with the designated purposes and requirements of the Microsoft funding.

2.2.2 Project reports to County describing use of Microsoft funds for Community Park improvement projects.

2.2.3 Timely requests for reimbursement by County for Community Park improvement project expenses

2.3 All Parties. County and Council shall regularly communicate and collaborate on their efforts.

The names, addresses, and telephone numbers of the parties to this Agreement for use in written communication between the parties are as follows:

Chelan County:	**Malaga-Colockum Community Council:**
Mike Kaputa, Director	Aaron Rosenberg, Chairman

Change Order

PROJECT:
Company Creek Road Emergency Repairs
TO CONTRACTOR:
Mountain Barge Services LLC
41 Anderson Road
Chelan, WA 98816

CHANGE ORDER NUMBER: 001
DATE: November 3, 2026
CONTRACT DATE: September 15, 2026
CONTRACT FOR: Construction

THE CONTRACT IS CHANGED AS FOLLOWS:
Provide all Labor, Materials, Equipment, Incidentals and other Services as required to complete Work as set forth below:

BID ITEM # 7: CRUSHED SURFACING TOP COURSE
This bid item is deleted in its entirety; deleting 110 C.Y at a rate of $249.08/ C.Y.

TOTAL CHANGE ($27,398.80)

BID ITEM # 8: CRUSHED SURFACING BASE COURSE
This bid item is deleted in its entirety; deleting 170 C.Y at a rate of $248.00/ C.Y.

TOTAL CHANGE ($42,160.00)

BID ITEM # 9: QUARRY SPALLS
This bid item is increased by 170 C.Y at a rate of $135.91/ C.Y.

TOTAL CHANGE $23,104.70

BID ITEM # 12: CHANNEL EXCAVATION
The quantity for bid Item #12 for "Channel Excavation" is increased by 396 C.Y (22 trucks at 18 C.Y/ truck) at a rate of $4.63/ C.Y.

TOTAL CHANGE $1,833.48

ADD BID ITEM # 16: PROJECT STANDBY

Standby costs were incurred between the dates of September 28 and October 22, 2026 due to a temporary shutdown of work. Daily rates were determined between the Contractor and Contracting Agency for M-F, 8-hour work days during this period. The total combined expense for these standby costs is $102,730.00.

TOTAL CHANGE $102,730.00

ADD BID ITEM # 17: REMOVAL OF NPS SUPERSACKS

Bid Item #17 is created to reflect the work necessary to remove supersacks along the NPS temporary roadway to allow for construction of work under this Contract. This work took approximately four (4) hours at a rate of $350/HR.

TOTAL CHANGE $1,400.00

CORRECTION TO TOTAL EXTENSIONS OF BID ITEMS:
The total price extension based on the unit price and quantity for bid items 7, 8, 12 & 13 were found to be slightly incorrect during processing of the first invoices associated with this project. See Attachment A for corrected totals based on unit cost extensions. This corrects the original contract amount to $1,122,927.72, $4.64 different from that shown on the final Contract Agreement.

DATE OF SUBSTANTIAL COMPLETION:

The contractual date of substantial completion was scheduled for October 16, 2026. No work occurred between the dates of September 28 and October 22, 2026 due to a temporary project shutdown. The date of substantial completion is revised to reflect the addition of 18 M-F working days beyond the original date listed in the Contract. The new date of Substantial Completion is November 17, 2026.

In accordance with the descriptions written above, Contractor Change Order Proposal and Documentation, there is a net addition of $59,509.38 (excluding wsst) to the total contract amount associated with this change order.

The original **corrected** contract sum was	$	1,122,927.72
The net change by previously authorized Change Orders	$	0.00
This Change Order will increase the Contract Sum by	$	$59,509.38
The new Contract Sum including this Change Order will be:	$	$1,182,437.10

The Contract Time will be changed by eighteen (18) Days M-F working days, or thirty-two (32) Calendar days.

NOTE: This Change Order does not include changes in the Contract Sum, Contract Time or Guaranteed Maximum Price which have been authorized by Construction Change Directive until the cost and time have been agreed upon by both the Owner and Contractor, in which case a Change Order is executed to supersede the Construction Change Directive.

NOT VALID UNTIL SIGNED BY THE CONTRACTOR AND OWNER.

OWNER: Chelan County

COMPANY CREEK ROAD REPAIR
CHANGE ORDER 001

ATTACHMENT A:

The following graphic is the base bid schedule. The items highlighted in red have total price extensions which have been corrected based on the unit cost and bid quantity. In total, this corrects the Contract amount listed on the Agreement to $1,122,927.72 (excluding wsst) and amounts to a $4.64 difference. This is only to correct the base bid, and does not reflect changes/ additions to the Contract as outlined in CO No. 001.

COMPANY CREEK ROAD EMERGENCY REPAIRS BID SCHEDULE					
Item	**Description**	**Bid Unit**	**Bid Quantity**	**Unit Price (CY)**	**Total Price**

To: **Chelan County Commissioners**
Wenatchee, Washington

From: **Hannah Pygott, Senior Natural Resource Specialist**

RE: **Sand Creek Culvert Replacement Project**

A. Substantial Completion (Action Item)

Commissioners:

Morgan and Son Earthmoving has successfully completed this Project as of October 20, 2026, hence recommendation is being made to accept the Project as Substantially Complete. Subsequent to the Commissioners' approval of Substantial Completion, the Project Closeout letter will be issued to the Contractor requesting that they provide the following documents prior to the consideration for Final Acceptance:

1. Contractor's Affidavit of Payment of Debts and Claims
2. Contractors Affidavit of Release of Liens
3. Consent of Surety to Final Payment
4. Final Application for Payment of Retainage

Recommendation: It is recommended that the Chelan County Board of Commissioners approve Substantial Completion of the Sand Creek Culvert Replacement Project and execute the included Certificate of Substantial Completion.

Respectfully Submitted,

Hannah Pygott, Senior Natural Resource Specialist

CERTIFICATE OF SUBSTANTIAL COMPLETION

PROJECT: Sand Creek Culvert Replacement Project

TO CONTRACTING AGENCY: Chelan County
Natural Resources Department
411 Washington Street, Suite 201
Wenatchee, WA 98801

STATE OF: WASHINGTON **CONTRACT FOR:** Construction

COUNTY OF: CHELAN **CONTRACT DATED:** May 7, 2026

DATE OF ISSUANCE: November 9, 2026

Project or Designated Portion Shall Include:

All work associated with this project is complete as of 10/20/26.

The work performed under this CONTRACT has been reviewed and found to be substantially complete. The date of substantial completion of the project or portion thereof designated above is hereby established as of October 20, 2026 which is also the date of commencement of applicable warranties as required by the Contract Documents, except as stated below.

Definition of Date of Substantial Completion
The Date of Substantial Completion of the Work or designated portion thereof is the date certified by the project administrator when construction is sufficiently complete in accordance with the Contract Documents, so the CONTRACTING AGENCY can occupy or utilize the work or designated portion thereof for the use for which it is intended, as expressed in the Contract Documents.

CONTRACTOR	BY	DATE

The CONTRACTING AGENCY accepts the Work or designated portion thereof a substantially complete and will assume full possession thereof on October 20, 2026.

CHELAN COUNTY COMMISSIONER	BY	DATE

The responsibilities of the CONTRACTING AGENCY and CONTRACTOR for security, maintenance, heat, utilities, damage to the work, and insurance shall be as follows:

N/A

NOTE: Contracting Agency's and Contractor's legal and insurance counsel should determine and review insurance requirements and coverage; Contractor shall secure consent of surety company, if any.

PROJECT BUDGET – REVISION 1

SUBRECIPIENT: City of Leavenworth
PROJECT TITLE: Critical Facility Generators for the City of Leavenworth

APPROVED BUDGET CATEGORY	*ESTIMATED COST*
Pre-Award Costs	~~$9,500.00~~ $7,486.92
Project Management Costs, Legal Expenses, etc.	$18,600.00
Site Work	~~$60,000.00~~ $103,000.00
Equipment	~~$261,800.00~~ $589,164.80
Miscellaneous	$100.00
	Project Total ~~*$350,000.00*~~ *$718,351.72*
SubMC – This category is restricted to eligible grant administration costs, including indirect costs, and is limited to 5% of eligible *project* expenditures. The amount shown here reflects the maximum amount available, based on the approved project budget.	$17,500.00
TOTAL (Project Total + SubMC):	~~**$367,500.00**~~ **$735,851.72**

Tracking and Reporting Project Costs: Project expenses for which reimbursement is sought must be tracked and reported by approved budget cost categories, above. Documentation of expenditures by approved budget cost categories should be made on a separate spreadsheet or table and included with each A-19. Supporting documentation of all costs shall include, but not be limited to: tracking of staff time spent on the project through timesheets or other similar documentation; dated invoices from contractors and subcontractors for work completed; dated invoices for goods and services purchased; and documentation of in-kind contributions of personnel, equipment and supplies.

Final Payment: Final payment of any remaining, or withheld, funds will be made upon submission by the SUBRECIPIENT within 60 days of completion of the project of the final report and an A-19, Voucher Distribution, and completion of all final inspections by the DEPARTMENT. Final payment also may be conditioned upon a financial review, if determined necessary by the DEPARTMENT. Adjustments to the final payment may be made following any audits conducted by the DEPARTMENT, Washington State Auditor's Office, the United States Inspector General, or their authorized representatives.

Per 2023 Hazard Mitigation Assistance Program and Policy Guide, no cost overruns will be funded. If costs exceed the maximum amount of FEMA funding approved, the SUBRECIPIENT shall pay the costs in excess of the approved budget.

A request for additional funds to cover a cost overrun may be granted by the DEPARTMENT and FEMA only if funds are available within the HMGP ceiling for this disaster, (FEMA-FM-5395-WA). A request for additional funds must be fully documented and justified.

Elle Robinson
Chelan County Natural Resources Department
411 Washington Street, Suite 201
Wenatchee, WA 98801

Subject: Lake Chelan Woody Debris Waterway Assessment

Dear Elle Robinson,

The purpose of this project is to conduct a waterway and debris clearance assessment on Lake Chelan and its major tributaries due to recurrent flooding. This is prompted by the increasing buildup of woody debris that occupies the lake. The proposed assessment will evaluate the location and amount of wood loading, likelihood and susceptibility analysis for future wood mobilization, public safety and flood risk analysis on the threat posed to public, private and environmental resources, as well as options to remove wood from the water system. The assessment will also include an evaluation of the public and private assets at risk, including shoreline infrastructure, parks, water intakes, docks, boat lifts and other water-based features.

The Chelan County Natural Resources Department (CCNRD) has been awarded a grant under the Washington County Risk and Needs Assessment program to assess large woody debris (LWD) in and around Lake Chelan. Geosyntec Consultants, Inc. (Geosyntec) has prepared this scope of work to support CCNRD in facilitating the LWD subcommittee of the Lake Chelan Collaborative (LCC) and complete the LWD assessment. The proposed work is intended to document the available information regarding the current distribution and movement of LWD in Lake Chelan, evaluate near- and long-term management options, and establish a coordinated framework for funding, permitting, response, and beneficial reuse. The goal of our work is to develop actionable recommendations for Lake Chelan and priority tributaries to address public safety, infrastructure, navigation, ecological, and regulatory considerations around LWD.

SCOPE OF WORK

We have divided the proposed scope of work into the following five tasks:

Task 1. LWD Subcommittee Facilitation and Public Outreach

Geosyntec will work with CCNRD to organize and facilitate up to four Lake Chelan Collaborative LWD Subcommittee meetings.

Activities:

- Develop meeting agendas and coordination with participants.
- Attend up to four in-person LWD subcommittee meetings located in Chelan, Washington; meetings are expected to be 1.5 hours.
- Prepare meeting materials including agendas and PowerPoint presentations.
- Manage the participant contact list.

- Prepare and distribute meeting minutes.
- Perform outreach to LWD subcommittee members.
- Support public outreach efforts to get feedback on the LWD assessment.

The general goals for each meeting are as follows:

- Meeting 1: Develop an understanding of key LWD issues and work completed to date, determine if outreach to additional stakeholders is needed, and get feedback on priorities for LWD assessment.
- Meeting 2: Discuss roles and responsibilities framework, past management efforts, and permitting strategy.
- Meeting 3: Present the draft assessment and maps, and discuss funding strategy and the potential for repurposing LWD.
- Meeting 4: Present the final assessment.

Deliverables:

- Meeting agendas, presentation materials, and meeting minutes for four LWD subcommittee meetings.

Assumptions:

- CCNRD will secure in person meeting locations and provide equipment for allowing virtual meeting attendance.

Task 2. Project Initiation, Field Work, and Data Review

Geosyntec will establish a common technical and organizational foundation for the assessment and confirm the locations, decisions, and audiences that should receive priority. Geosyntec will also compile GIS data and other information regarding locations of LWD accumulation, source areas in Lake Chelan and in the near-shore area. The inventory will be designed to support risk screening, management decisions, future monitoring, and comparison after subsequent events.

Activities:

- Conduct a kickoff meeting with CCNRD to confirm objectives, available information, schedule, communications, and decision-making process.
- Review relevant literature and case studies on LWD assessments in lakes.
- Compile and review available aerial imagery, photographs, records of LWD impacts and removal, and other relevant data or anecdotal information in coordination with Sawtooth Geosciences.
- Acquire other relevant publicly available information, including but not limited to, meteorological data, flow data, DNR debris flow and wildfire mapping, aerial imagery, and landcover datasets.
- Conduct a field reconnaissance of woody debris along the lower basin shorelines.
- Develop a GIS inventory of public and private assets at risk, including shoreline infrastructure, parks, water intakes, docks, boat lifts and other water-based features.
- Establish GIS layers and metadata that may be updated following future events.
- Identify data gaps which could be filled by future monitoring.

- Produce a series of maps showing burned areas, areas of known LWD accumulation within the lake, and areas of LWD on the shoreline which may enter the lake during a future storm event. This will be based on anecdotal information and existing observations.
- Conduct a qualitative evaluation of movement patterns within the lake based on seasonal flow and meteorological conditions as well as observed movement.
- Coordinate with Sawtooth Geosciences (Phil Long) on the data inventory and mapping.

Deliverables:

- Maps and GIS database.
- Summary of existing data and literature, data gaps, and evaluation of LWD movement will be included in the Task 4 Lake Chelan Woody Debris Waterway Assessment.

Assumptions:

- Mapping will be limited and focus on tributary outlets, anecdotal observations, and key locations within the lake.

Task 3. Research and Stakeholder Coordination

Geosyntec will research the topics identified as important by the LWD subcommittee which will inform the LWD Assessment (Task 4). This includes developing a funding strategy, coordinating with permitting agencies to develop a permitting strategy, evaluating actions which can be taken to prepare for future events, developing options to manage existing LWD, and assessing viable options to repurpose LWD for beneficial uses. Task 3 includes five subtasks, outlined below:

1. **Establishment of Roles and Responsibilities:**
   - Identify and coordinate with the relevant agencies and the LWD subcommittee to establish roles and responsibilities to manage existing LWD and respond to future LWD events.
2. **Funding Strategy:**
   - Work with the LWD subcommittee to research and identify potential funding opportunities for both immediate response and removal needs, as well as preparedness, mitigation, monitoring, and long-term program needs.
   - Coordinate with potential funding agencies such as the United States Forest Service (USFS), National Park Service (NPS), Washington Department of Natural Resources (DNR), and Chelan Public Utilities District (PUD).
3. **Permitting Strategy:**
   - Develop a permitting framework for routine, time-sensitive, and emergency LWD management while protecting habitat and avoiding unnecessary regulatory delays.
   - Conduct outreach to U.S. Army Corps of Engineers and the Washington State Department of Fish and Wildlife to identify high priority permitting considerations.
4. **Future Event Preparedness and Preemptive Mitigation:**
   - Evaluate susceptibility of future wood mobilization within the watershed and threat to public safety, infrastructure, environmental resources.

- Identify feasible measures that can be planned, permitted, procured, or positioned before the next major flood, post-fire runoff event, or period of debris mobilization.
- Evaluate potential controls such as strategically located log booms, debris deflection or capture systems, temporary staging areas, pre-event drawdown or operational coordination where feasible, tributary monitoring or targeted source-area treatment, and pre-positioned contracts and equipment.
- Identify decision points for implementing actions based on existing data sources.

5. **LWD Removal Methods, and Options for Repurposing and Beneficial Use**
   - Evaluate options for removing LWD from the lake.
   - Identify practical pathways to reuse suitable wood and reduce handling or disposal costs while maintaining public safety and avoiding transfer of risk including habitat enhancement, floodplain or stream restoration, shoreline projects, biochar or biomass applications, mulch for agriculture and forest management uses, milling, and other locally viable outlets.
   - Identify potential recipient projects, partners, approval needs, handling requirements, and seasonal or logistical constraints.
   - Develop a decision framework for reuse, relocation, disposal, or leaving wood in place.

Deliverables:

- The deliverables for this task will be limited to summary materials for presentation to the LWD subcommittee; documentation will be in the technical memorandum (Task 4).

Task 4. Lake Chelan Woody Debris Waterway Assessment

The final products of this project will be a report or assessment which includes a study of the consequences to Lake Chelan, and recommended mitigation work to minimize the hazards posed by woody debris. Geosyntec will document our work and the data from Tasks 1-3 in a final Lake Chelan Woody Debris Waterway Assessment (LCWDWA).

Activities:

- Develop a draft LCWDWA report to document the work in Tasks 1-3 and provide recommendations for next steps, including funding sources for LWD removal, and areas for further data collection.
- Develop a final LCWDWA report incorporating Chelan County and LWD Subcommittee feedback.

Deliverables: Draft and final LCWDWA report.

Assumptions: One round of comments from the LWD Subcommittee in the final assessment.

Task 5. Project Management

Geosyntec will provide regular email status updates and will work directly with CCNRD to provide regular monthly updates on the status of effort and budget, and any unanticipated changes in scope or project schedule.

Activities:

- Monthly check-in meetings with CCNRD.
- Invoicing and monthly progress reports.
- Staffing and subcontractor coordination.

Deliverables: Monthly progress reports.

WORKPLAN

Geosyntec prepared the workplan shown below outlining the anticipated schedule for the tasks described above and key milestones. All grant activities will be completed by June 15, 2027.

Month	Sep-26	Oct-26	Nov-26	Dec-26	Jan-27	Feb-27	Mar-27	Apr-27	May-27	Jun-27
Task 1. LWD Subcommittee Facilitation										
LWD Subcommittee meetings	*			*			*			*
Public outreach										
Task 2. Project Initiation and Data Review										
Data compilation and literature review										
Field reconnaissance survey										
Summarize key issues										
Develop maps										
Task 3. Research and Stakeholder Coordination										
Permitting strategy/outreach to permitting agencies										
Establish agency/stakeholder roles and responsibilities										
Woody debris management and pre-emptive mitigation recommendations										
Recommendations for future monitoring										
Funding strategy										
Task 4. Technical Memorandum										
Draft LWD Assessment							*			
Final LWD Assessment									*	
Task 5. Project Management										
Monthly client checkin meetings, progress reports, invoicing										*

*Key Milestone

COMPENSATION

Compensation will be provided on a time-and-materials basis under the Professional Services Agreement included as Attachment A. A task-specific budget estimate is provided below as Table 1.

Table 1. Task Budget

Task	Estimated Cost
Task 1. LWD Subcommittee Facilitation and Public Outreach	$26,000
Task 2. Project Initiation, Field Work, and Data Review	$17,000
Task 3. Research and Stakeholder Coordination	$25,000
Task 4. Lake Chelan Woody Debris Waterway Assessment	$22,000
Task 5. Project Management	$10,000
TOTAL	**$100,000**

PERIOD OF PERFORMANCE

The period of performance for this contract will be September 30, 2026 through June 15, 2027.

CLOSURE

We appreciate the opportunity to support CCNRD in developing the Lake Chelan Woody Debris Waterway Assessment.

Sincerely,

Kelsey Mach

Kelsey Mach, LG, CWRE
Senior Geologist

Daniel R. Haller

Dan Haller, PE
Senior Principal Water Resources Engineer

Attachment A: Professional Services Agreement and Rate Sheet

By its signature below, the Chelan County Natural Resources Department accepts and agrees to the Scope of Services, Schedule and Compensation described above, and authorizes Geosyntec Consultants, Inc. and its subsidiaries and affiliates to proceed with the Scope of Services to be performed in accordance with the referenced terms and conditions.

Agreed and Accepted By the Chelan County Board of Commissioners:

Geosyntec

Dan Haller, PE
Senior Principal Water Resources Engineer

BOARD OF CHELAN COUNTY COMMISSIONERS

CHAIRMAN

COMMISSIONER

ATTEST: Clerk of the Board

COMMISSIONER

DATE

ATTACHMENT A
PROFESSIONAL SERVICES AGREEMENT

This Professional Services Agreement ("Agreement") is attached to and made a part of the proposal submitted to Chelan County Natural Resources Department ("Client") by Geosyntec Consultants, Inc., and its subsidiaries and affiliates (collectively "Geosyntec"), dated November 3, 2026 ("Proposal"). Geosyntec shall perform the scope of services described in the Proposal, subject to the following terms and condition upon acceptance of the Proposal or Client's authorization to proceed. The Client and Geosyntec are referred to herein individually as "Party" and collectively as "Parties".

1. **ACCEPTANCE OF TERMS:** The terms and conditions set forth below and the contents of the Proposal shall constitute the full Agreement between the Client and Geosyntec and shall be deemed mutually accepted and effective upon Client's signing the Proposal, issuing an authorization to proceed with the Proposal or by payment of an invoice submitted by Geosyntec. Any changes or amendment to these terms and conditions, are conflicting terms introduced by the Client in a purchase order or other document, are expressly rejected unless both Parties agree to these changes in writing and they are incorporated into this Agreement. Any amendment must be in writing signed by Client and Geosyntec.

2. **SCOPE OF SERVICES:** The services to be provided by Geosyntec pursuant to this Agreement ("Services") are described in the Proposal, and any amendments or Service Orders issued thereto, which shall set forth the schedule and estimated charges for the Services. If the Services are to be rendered in connection with a specific location, the Proposal shall also describe the site ("Project Site").

3. **CLIENT RESPONSIBILITY:** Client shall provide Geosyntec, in writing (where applicable), all information relating to Client's requirements for the Project in a timely manner, give Geosyntec prompt written notice of any suspected deficiency in the Services and with reasonable promptness to avoid impacts to the progress of the Project, and provide Geosyntec with approvals and decisions. When the Services include on-site activities, Client shall also correctly identify the location of subsurface structures, such as pipes, tanks, cables, and utilities and notify Geosyntec of any potential hazardous substances or other health and safety hazards or conditions known to Client existing on or near the Project Site. Client shall be responsible for obtaining all necessary permits required to execute the Services and Project work. If included in the Services, Geosyntec will assist Client with permit applications, however all impacts and obligations will be the responsibility of the Client, and Geosyntec shall not be liable for any delays related to obtaining permits, whether caused by the Client, regulatory bodies, or other third parties. In addition, Client agrees to hold Geosyntec harmless from any claim related to or arising from circumstances, acts or omissions in connection with the Project Site which occurred prior to Geosyntec providing any Services under this Agreement.

4. **COMPENSATION, INVOICING AND PAYMENT:** The method of compensation shall be identified in the Service Order. When the method of compensation is on a time and materials basis, Geosyntec shall submit invoices to Client reflecting the number of hours worked multiplied by the hourly rate reflected in Geosyntec's rate schedule attached to the Service Order, along with any pre-approved expenses for reimbursement. The rates and rate schedule for projects lasting more than one year may be adjusted annually. The rates are inclusive of all taxes except such value added, sales, service or withholding taxes that are imposed by some jurisdictions, and which shall be explicitly identified. Any such applicable taxes will be added to the invoice and shall be paid by the Client. Geosyntec shall not be liable for taxes imposed outside the U.S., Canada, Australia, Ireland, and the United Kingdom. Where compensation is subject to a "not to exceed" budget such limit shall only apply to the total approved budget. Any amount allocated to a task or milestone may be exceeded without Client authorization as long as the total budget limit is not exceeded. Rates for days of actual testimony at depositions, trials, or hearings will be two times the rate shown on the rate schedule. All costs incurred and time spent by Geosyntec responding to subpoenas related to litigation which Geosyntec is not a named party shall be reimbursable in accordance with Geosyntec's then current rate schedule.

Geosyntec shall periodically submit invoices to Client and Client shall pay each invoice within thirty (30) days of the date of the invoice. Payment shall not be conditioned upon Client's receipt of payment from any other parties. No deductions shall be made from Geosyntec's compensation on account of penalty, liquidated damages or other sums withheld from payments to Client or others, or on account of the cost of changes in the Services. If Client objects to all or any portion of any invoice, Client shall notify Geosyntec in writing of the objection within fifteen (15) calendar days from the date of the invoice, give reasons for the objection, and pay that portion of the invoice not in dispute.

Geosyntec may invoice Client for any expense authorized by the Client exceeding $5,000 before the expense has been incurred by Geosyntec. Client shall pay the greater of an additional charge of one percent (1%) of the amount of the invoice per month or the maximum percentage allowed by law for any payment received by Geosyntec more than thirty (30) days from the date of the invoice. Payment thereafter shall first be applied to accrued interest and then to the unpaid principal. The additional charge shall not apply to any disputed portion of any invoice resolved in favor of Client. No deductions shall be made from Geosyntec's compensation on account of penalty, liquidated damages or other sums withheld from payments to Client or others, or on account of the cost of changes in the Services.

In addition to the above, if payment of Geosyntec invoices is not maintained on a thirty (30) day current basis, Geosyntec may, by ten (10) days' written notice to Client, suspend further performance and withhold any and all deliverables and data from Client until such

invoice payments are restored to a current basis. If the Project Site is located in a jurisdiction which requires Geosyntec to pay any subcontractors within a stated period of time, the Client shall make payment to Geosyntec within five (5) days prior to the lapse of such time period.

5. CHANGES: In the event services beyond those specified in the Scope of Services are provided by Geosyntec or requested by the Client, the Parties shall negotiate an adjustment to the scope, schedule or fee, and the Service Order shall be equitably adjusted to represent such changes.

6. RECOGNITION OF RISK: Client recognizes that services and opinions relating to environmental, geologic, and geotechnical conditions are based on limited data and that actual conditions may vary from those encountered at the times and locations where data are obtained, and that the limited data results in uncertainty with respect to the interpretation of these conditions, despite the use of due professional care. In addition, any estimate of costs prepared by Geosyntec represents judgment as a design professional and is supplied for the general guidance of the Client. Since Geosyntec has no control over the cost of labor and material, or over competitive bidding or market conditions, Geosyntec does not guarantee the accuracy of such estimates as compared to Contractor bids or actual cost to the Client. Accordingly, any estimates, forecasts and predictions provided as part of the Services are presented solely on the basis of the assumptions accompanying the estimates, forecasts and predictions.

7. STANDARD OF CARE: Geosyntec shall render its Services in a manner consistent with the level of care and skill ordinarily exercised by other firms rendering the same services under similar circumstances at the time the Services are performed. The representations provided herein are provided expressly in lieu of all other warranties or conditions, express or implied. All statutory or implied warranties and conditions including but not limited to those of merchantability and fitness for a purpose are hereby expressly negated and excluded. Should an error or omission become apparent in the Services during the term of the Agreement or within ninety (90) days following the completion of the Services, Geosyntec's liability shall be limited to the correction of the error or omission shall be contingent upon Geosyntec being notified promptly of the defect.

8. INDEMNIFICATION: To the fullest extent permitted by law, the Parties shall indemnify and hold harmless each other (and each of their respective officers, directors, shareholders, partners, employees, and representatives) from and against all claims, demands, causes of actions, suits, based upon or arising from allegations of illness, injuries to persons, destruction of or damage to property, costs, expenses and all reasonable expenses, legal or otherwise, to the extent arising out of the indemnifying Party's negligent acts or omissions. In addition, the Parties shall indemnify, defend, and hold harmless the other party against all loss, cost, expense, royalties, claims for damages or liability in law or in equity, including without limitation, attorney fees, court costs, and other litigation expenses that may at any time arise or be set up for any infringement (or alleged infringement) of any patent, copyright, trade secret, or other proprietary right of any person or entity in consequence of the use by indemnifying Party of any documents or materials.

9. LIMITATION OF LIABILITY: To the fullest extent permitted by law, the liability of Geosyntec, its employees, agents, and subcontractors for claims of loss, injury, death, damage, or expense incurred by the Client including without limitation third party claims for contribution and indemnification), arising out of or relating to Services rendered or obligations imposed under this Agreement or any Service Order issued hereunder, shall not exceed in the aggregate the greater of $100,000 or the amount paid to Geosyntec under the applicable Service Order. The Client shall indemnify and defend Geosyntec against any third-party claims against Geosyntec exceeding the limitation of liability. In addition, neither Party shall be entitled to recover consequential damages, including, without limitation, loss of use or loss of profits, from the other Party, their employees, representatives, agents, subsidiaries, affiliates, successors or assigns. The foregoing limitations of liability shall apply regardless of whether the allegation is based on a theory of breach of contract, negligence or other wrongful act, but shall not apply if caused by gross negligence or willful misconduct.

10. INSURANCE: Geosyntec shall maintain during the term of this Agreement the following minimum insurance coverage:

(i)	Workers' Compensation Employer's Liability	Statutory - $1,000,000 per occurrence
(ii)	Commercial General Liability or Public Liability Insurance	- $1,000,000 per occurrence
(iii)	Comprehensive Automobile Liability	- $2,000,000 combined single limit
(iv)	Professional Liability	- $2,000,000 per claim

Geosyntec shall provide Client with an insurance certificate upon Client's request.

11. DISPUTES: The Parties agree to promptly resolve their differences through good faith negotiations as a condition precedent to filing a formal claim. In the event disputes remain following such good faith negotiations between the Parties, the remaining dispute shall be submitted to a senior representative of each Party who shall have the authority to enter into an agreement to resolve the dispute ("Representative"). The Representatives shall not have been directly involved in the performance of the Subcontracted Services and shall negotiate in good faith. If the Representatives are unable to resolve the dispute within three weeks or within such longer time period as the Representatives may agree, the dispute shall be mediated by an independent third-party agreed to by both parties. Any disputes or portions thereof remaining following mediation shall be determined by remedies at law or equity, as they may be available, subject to the limitations in this Agreement and the venue selection stated in the Governing Law and Venue Section below. Any

applicable statute of limitations on any claim in any way related to Agreement shall commence to run and alleged cause of action shall be deemed to have accrued no later than the date of either Geosyntec's final invoice or termination of this Agreement by either Party. Both Parties agree that the applicable statute of limitations for any claims in any way related to this Agreement shall be shortened to a period not longer than two years, unless a shorter statute of limitations would otherwise apply.

12. RIGHT OF ENTRY: Client grants to Geosyntec, and, if the Project Site is not owned by Client, will provide that permission for a right of entry from time to time for Geosyntec, its employees, agents, and subcontractors for the purpose of providing the Services. If Geosyntec is required to enter into agreements with third parties to obtain access to property to perform the Services, such agreements must be consistent with the obligations imposed on Geosyntec under this Agreement and the Compensation, Schedule and terms and conditions of this Agreement shall be subject to an equitable adjustment to reflect additional obligations imposed thereunder. If the provisions of any written access agreement between Client and the property owner require the Client's agents, such as Geosyntec, to name the property owner as an additional insured, those provisions shall be incorporated into this Agreement. Client shall indemnify and defend Geosyntec for any liabilities or claims that may result from a right of entry agreement with legal obligations imposed upon Geosyntec greater than those in this Agreement.

13. PROJECT SITE RESPONSIBILITIES: If included in the Services, Geosyntec shall visit the Project Site as needed to complete the Services. Construction Observation responsibilities will occur at appropriate intervals to allow Geosyntec to become generally familiar with the progress, quality of work (contractors' work), to determine if the work is proceeding in general accordance with the contract documents. Visits to the Project Site and observations made by Geosyntec shall not make Geosyntec responsible for, nor relieve the construction contractor(s) of the full responsibility for all construction means, methods, techniques, sequences, and procedures necessary for coordinating and completing all portions of the work under the construction contract(s) and for all safety precautions incidental thereto. Geosyntec shall incur no liability for unforeseen costs and/or claims relating to the Services that arise from Project Site conditions that differ from anticipated conditions, including without limitation for any subsurface conditions or systems and/or utility configurations.

14. HAZARDOUS SUBSTANCES: "Hazardous Substances" shall refer to any hazardous, toxic, or dangerous substance that cannot be introduced back into the environment under existing law without additional treatment. In the event that Geosyntec encounters unanticipated Hazardous Substances, it may suspend work for safety reasons until mutually agreeable arrangements are made, including but not limited to amendments to this Agreement. Solely upon Client's request, Geosyntec may assist Client in identifying options for off-site treatment, storage or disposal of the Hazardous Substances. Geosyntec will not make any independent determination relating to the selection of a treatment, storage, or disposal facility nor subcontract such activities through transporters or others. Client shall sign all necessary manifests for the disposal of Hazardous Substances. In the event Parties mutually agree that Geosyntec will sign manifests, Geosyntec will only sign as agent on behalf of Client, and Geosyntec will not be a generator, transporter, or disposer of the Hazardous Substances. Client shall indemnify, defend, and hold harmless Geosyntec against any claim or loss resulting from such signing and from Geosyntec's handling of Hazardous Substances.

15. CONFIDENTIALITY: Geosyntec will maintain as confidential the provisions of this Agreement and any business information that is not generally known to, and cannot be readily ascertained by others, and which a reasonable person under the circumstances would consider confidential and will not release, distribute, or publish same or Geosyntec's test results to any third party without prior permission from Client, unless required by law, order of a court or regulatory body of competent jurisdiction. Such release will occur only after prior notice to Client.

16. INTELLECTUAL PROPERTY AND USE OF DOCUMENTS: Provided that Geosyntec has been fully paid for the Services, Client shall have a perpetual, non-transferable license and right to use the documents, maps, photographs, drawings, and specifications resulting from Geosyntec's efforts on the Project. Except where necessary to give effect to the foregoing limited license, Geosyntec is not granting Client any license for Geosyntec's patents, patent applications, patent disclosures, inventions and improvements (whether patentable or not), copyrights, copyrightable works (including computer programs), trade secrets, trademarks, service marks, know-how, database rights, or any other form of intellectual property created, developed, or conceived outside the performance of Services. Geosyntec shall have the right to retain copies of all such materials. Work products delivered in electronic form are subject to anomalies, errors, misinterpretation, deterioration, and unauthorized modification, or may be draft or incomplete work products, electronic documents provided by Geosyntec are furnished solely for convenience and only those professional work products in hard-copy format bearing Geosyntec's signature or professional stamp may be relied upon by Client or other recipients approved in writing. Geosyntec may rely upon data provided by Client or other third parties without independent verification unless otherwise provided in the Service Order. If the Services include the use of a GIS database Client acknowledges that any changes to the information contained in the database will result in different results. The Client will be solely responsible for any modifications to the database made by Client.

Geosyntec is performing the Services under this Agreement solely for Client and solely with respect to the Project, and not for any other party or purpose. No party other than Client shall be entitled to rely on any reports or recommendations provided by Geosyntec as part of the Services ("Reports") without Geosyntec's separate written consent, and Geosyntec shall have no liability for the use of any Reports by any party for any purpose other than the Project. Client will indemnify, defend and hold Geosyntec harmless from any claims by third parties arising from the use of any Reports.

17. DELAYS AND FORCE MAJEURE: Geosyntec shall not be responsible for any delays resulting from actions or inactions of the Client or third parties. In the event that Geosyntec field or technical work is interrupted due to causes reasonably outside of its control, Geosyntec's schedule for performance and compensation shall be equitably adjusted (in accordance with Geosyntec's current Rate Schedule) for the additional labor, equipment, time, and other charges associated with maintaining its work force and equipment available during the interruption, and for such similar charges that are incurred by Geosyntec for demobilization and subsequent remobilization.

Except for the foregoing provision, neither Party shall hold the other responsible for damages or delays in performance caused by force majeure, acts of God, or other events beyond the reasonable control of the other Party. Delays within the scope of this Section which cumulatively exceed forty-five (45) days shall, at the option of either Party, make the applicable Service Order subject to termination for convenience or to renegotiation.

18. SUSPENSION/TERMINATION: If a Service Order or Geosyntec's Services are suspended by the Client for more than thirty (30) days, upon resumption of Services the Client shall compensate Geosyntec for expenses incurred as a result of the suspension and resumption of Services and Geosyntec's schedule and fees for the remainder of the Services shall be equitably adjusted. If the Services are suspended for more than ninety days, consecutive or in the aggregate, Geosyntec may terminate the Service Order upon giving not less than five (5) days written notice to the Client.

Either Party can terminate this Agreement for cause if the other commits a material and uncured breach of this Agreement, including untimely payment, or becomes insolvent, has a receiver appointed, or makes a general assignment for the benefit of creditors. Termination for cause shall be effective five (5) calendar days after receipt of a written notice of termination, unless a later date is specified in the notice of termination. The notice of termination for cause shall contain specific reasons for termination, and both Parties shall cooperate in good faith to cure the causes for termination stated in the notice of termination. Termination for cause shall not be effective if reasonable action to cure the breach has been taken before the effective date of the termination. Client shall pay Geosyntec upon invoice for services performed and charges incurred prior to suspension or termination, plus suspension and termination charges. Termination charges shall include, without limitation, the putting of Project documents and analyses in order and all other related charges incurred which are directly attributable to termination. In the event of termination for cause, the Parties shall have their remedies at law as to other rights and obligations between them, subject to the other terms and conditions of this Agreement.

19. ASSIGNMENTAND THIRD PARTY RIGHTS: Neither Party to this Agreement shall assign its duties and obligations hereunder without the prior written consent of the other Party. This Agreement shall not create any rights or benefits to Parties other than Client and Geosyntec.

20. VALIDITY AND SEVERABILITY: The provisions of this Agreement shall be enforced to the fullest extent permitted by law. If any provision of this Agreement is found to be invalid or unenforceable, the provision shall be construed and applied in a way that comes as close as possible to expressing the intention of the Parties with regard to the provisions and that saves the validity and enforceability of the provision. In the event that any provision or portion of this Agreement is held to be unenforceable or invalid the remaining provisions or portions shall remain in full force and effect.

21. GOVERNING LAW AND VENUE: This Agreement and all disputes related to it shall be governed and construed by the laws of the State of Washington, without giving effect to any choice or conflict of law provision or rule that would cause the laws of any other jurisdiction to apply. Any disputes, controversies, or claims related to this Agreement shall be heard in the Superior Court of Chelan County. The Parties to this Agreement waive any objection to the jurisdiction of these courts, whether based on convenience or otherwise. The Parties agree that the UN Convention on Contracts for the International Sale of Goods will not apply to this Agreement.

22. INTEGRATED WRITING: This Agreement constitutes a final and complete repository of the agreements between Client and Geosyntec. It supersedes all prior or contemporaneous communications, representations, or agreements, whether oral or written, relating to the subject matter of this Agreement. Modifications to the terms and conditions of this Agreement shall not be binding unless made in writing and agreed to by both Parties. Any written authorization or notice to proceed given by the Client to Geosyntec regarding Services shall be incorporated into the relevant Service Order and shall have the effect of attaching this Agreement to the authorized Services.

23. NOTICES, SIGNATURES AND AUTHORIZED REPRESENTATIVES: The signatories of this Agreement and/or the authorization to proceed are the authorized representatives of Client and Geosyntec for the execution of this Agreement. Each Service Order shall set forth the name and address of the respective authorized representatives of the Parties for the administration of that Service Order. Any information or notices required or permitted under this Agreement or any Service Order shall be deemed to have been sufficiently given if in writing and delivered to the authorized representative identified in the applicable Service Order. Notice given by mail may also be transmitted electronically at the time of mailing.

EVENT INFORMATION
Name of Event/Activity: Santa's Arrival - Parade to escort Santa to photo location
Type/Description of Event/Activity: Parade from Leffler Field to Pedoi St.
Date(s) of Proposed Event/Activity: 11/28/2026
Times for Proposed Event/Activity: 11:30am-2:00pm

Describe proposed route on county right-of-way, including start and end points, assembling points, and parking (please submit a map illustrating the route and other pertinent information):

The intention of this parade is to escort Santa to the specifically designated photo location.

Staging will take place on Leffler Field, NNA Manson, WA. The parade will proceed west through the North Shore Bible Church parking lot up to Wapato Way where it will join EMS vehicles in a rolling slow down to the point where it joins the road closure at Totem Pole Rd. Three certified flaggers will assist at the intersections of N. Harris, S. Harris. and Totem Pole Rds. County closure is requested along Wapato Way from Totem Pole Rd. to Pedoi St. The parade will end at Radiance Winery at 71 Wapato Way and disburse from there. No parking congregation will be expected with the exception of Leffler Field which has been approved by the Manson Parks Department and the Manson School District.

Estimated number of people, vehicles, and/or animals expected to participate or be included in the event/activity (please provide detailed information):

The parade will include 1 "float," pedestrians, and EMS vehicles.

Specifically, a truck (with 1 passenger in the cab and 6 passengers in the bed) with trailer (with 2 passengers on the trailer sitting on an ATTACHED sleigh), 2-3 EMS vehicles, and approximately 50-75 walking pedestrians between vehicles. The parade will be led by two pedestrians holding a "Santa" banner. The EMS vehicles will be the end. No candy or other items will be tossed or disbursed along the route.

Proof of permissions for event/activity officials, participants, and spectators to enter onto private and public property in relation to this activity (please submit documentation):

Historic Manson will provide insurance as the Chamber has done in the past

Proof of authorizations from other involved jurisdictions (please submit documentation):

N/A

Name of organizer's insurance company and policy number for coverage of this event/activity (please submit a certificate/proof of insurance showing coverage's and an endorsement including Chelan County as additional insured and providing that the organizer's insurance poly shall be primary insure for the event/activity):

Company:

Policy Number:

Describe organizer's previous experience with the conduct and administration of this type of event/activity:

The event has been taking place since the 1970's, actually, but records show it having taken place by this organization, specifically, on an annual basis since at least 2007. Plenty of adults will be working this event to ensure the safety of the participants. The route will NOT be altered. The pace will be a very slow walking pace. The only difference for this year is that the event is now being managed by the HMMSA, officially, instead of the Manson Chamber. The SAME people are managing, working and participating.

In addition, this is planned to go EXACTLY as planned for 2024 by myself and Eric Pierson, and carried out in both 2024 and 2025.

Traffic plan, safety plan, race plan:

Traffic will proceed one direction from start to finish and then disburse. Barriers will be put up and removed in a timely fashion according to the requested closure times. Certified flaggers will be posted at appropriate intersections. Safety plan includes adults along the route to ensure safety, with EMS following the parade and easily at hand if necessary.

Will any road closure or lane/shoulder restrictions be needed? (Yes or No): No.
If yes, provide details: ***IF A ROAD CLOSURE IS TO LAST IN EXCESS OF 12 HOURS, THE APPLICANT SHALL PUBLISH NOTICE IN A LOCAL PAPER AND POST ONSITE A MINIMUM OF 3 DAYS PRIOR TO THE CLOSURE IN ACCORDANCE WITH RCW 47.48.***
Documentation for any requested waiver or exemption (please submit):
Other:
Plan for Event Clean-Up: Volunteers will remove barriers and collect any trash that may have been left behind.

DESCRIPTION OF OPERATIONS / LOCATIONS / VEHICLES / SPECIAL ITEMS
Regarding street closure of Hwy 150 for annual Santa Arrival. Chelan County Public Works Department is named as Additional Covered Party as respects General Liability regarding this street closure only and is subject to coverage terms, conditions, and exclusions. Additional Covered Party endorsement is attached.

CERTIFICATE HOLDER	AUTHORIZED REPRESENTATIVE
Chelan County Public Works Department 316 Washington Street, Suite 402 Wenatchee, WA 98801	Elizabeth Ralston

ADDITIONAL COVERED PARTY AMENDMENT – DESIGNATED PERSON OR ORGANIZATION

This endorsement modifies coverage provided under the following:

GENERAL LIABILITY COVERAGE PART

This endorsement changes the Coverage Agreement effective on the inception date of the Coverage Agreement unless another date is indicated above. Providing the certificate of coverage that this endorsement is attached to has been issued by and is on file with the Company, the following applies.

SCHEDULE

Person or Organization (Additional **Covered Party**):

Chelan County Public Works Department
316 Washington Street, Suite 402
Wenatchee, WA 98801

Description of Activities / Operations / Designated Premises:

Regarding street closure of Hwy 150 for annual Santa Arrival. Chelan County Public Works Department is named as Additional Covered Party as respects General Liability regarding this street closure only and is subject to coverage terms, conditions, and exclusions. Additional Covered Party endorsement is attached.

With respect to coverage under the General Liability Coverage Part (including Products/Completed Operations):

A. The Definition of **Covered Party** in the LIABILITY COVERAGES – COMMON CONDITIONS, DEFINITIONS AND EXCLUSIONS section of this Coverage Agreement is amended to add as a **Covered Party** the person or organization shown in the above Declarations with whom you have agreed in a written contract, written agreement, or permit that such person or organization be added as an additional **Covered Party** in your Coverage Agreement. Such person or organization is a **Covered Party** only with respect to their liability assumed by you that would be otherwise imposed by law in the absence of any contract, agreement, or permit relating to or arising out of the specified activity(ies) or operations described in the above Declarations.

However, this coverage only applies with respect to liability for **Bodily Injury, Property Damage, or Personal and Advertising Injury** caused, in whole or in part, by your acts or omissions or the acts or omissions of those acting on your behalf:

1. In performance of your ongoing operations; or
2. In connection with your premises owned or rented to you.

The following provisions also apply:

(1) The written contract, written agreement, or permit must be in effect at the inception of the **Coverage Period** or become effective during the **Coverage Period**; and

(2) The written contract, written agreement, or permit must be executed prior to the **Bodily Injury** or **Property Damage.**

Subject to the paragraphs above, any such person's or organization's status as an additional **Covered**

Party ends when any of the following first occurs:

(1) This Coverage Agreement terminates;
(2) The written contract, written agreement, or permit terminates; or
(3) The specified activity(ies) or operations described in the above Declarations terminate.

B. The following is added to Condition D. Other Insurance in the LIABILITY COVERAGES – COMMON CONDITIONS, DEFINITIONS AND EXCLUSIONS section of the Coverage Agreement, and supersedes any provision to the contrary:

For the additional **Covered Party** under your Coverage Agreement shown in the above schedule, and subject to Paragraph A. above, this coverage is primary to and will not seek contribution from any other insurance available to such additional **Covered Party** provided that:

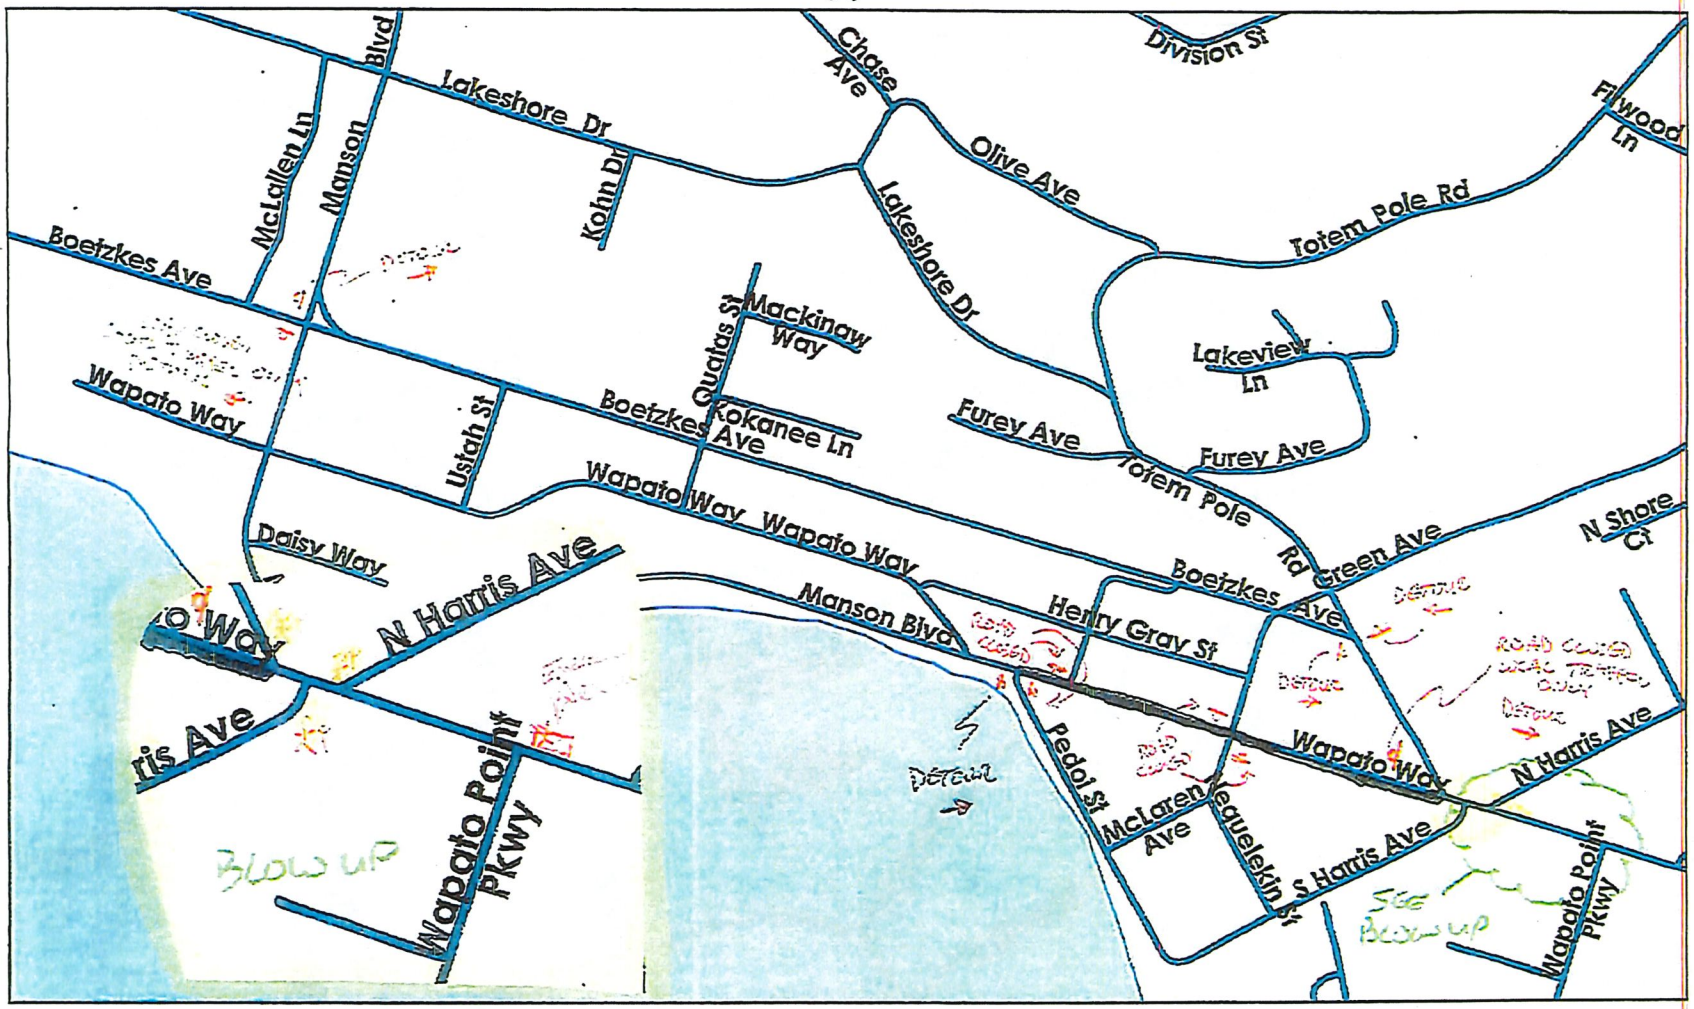
a. The additional **Covered Party** is a Named Insured under such other insurance; and
b. You have agreed in writing in a contract, agreement, or permit that this Coverage would be primary and would not seek contribution from any other insurance available to the additional **Covered Party** for amounts payable under the coverage provided by this endorsement.

C. The Limits of Coverage applicable to the additional **Covered Party** is the lesser of those limits specified in either the:

- Written contract, written agreement, or permit; or
- Declarations for this Coverage Agreement,

In no case will the limits of coverage provided under this General Liability endorsement exceed the limits as required in the contract or agreement, or the limit of liability available under this Coverage Agreement. These Limits of Coverage are part of and not in addition to the Limits of Coverage shown in the Declarations.

Except with respect to the Limits of Coverage, and any rights or duties specifically assigned in this Coverage Part to the **Covered Member**, this coverage applies:



a. As if each **Covered Member** were the only **Covered Member**; and
b. Separately to each **Covered Party** against whom claim is made or **Suit** is brought.

All other terms and conditions remain unchanged

Subject: Malaga Resident Opposition to Additional Industrial Data Centers – 392 Margaux Loop

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Commissioner Overbay,

I am writing as a property owner at 392 Margaux Loop in Malaga to respectfully but firmly oppose Chelan County's approval of any additional industrial data center development in Malaga, including the proposed facility that would sit right next to our home.

You grew up in the Malaga area, so you know what makes it special: a quiet, rural community of homes and orchards along the river. That character is changing fast. Microsoft's first Malaga data center is coming online this year, the campus is planned for up to three buildings, and Microsoft has already bought adjacent land for future expansion. Sabey Data Centers has replaced roughly 80 acres of cherry orchard near the Malaga fire station with a planned

campus of around 144 megawatts. Each new approval adds to an industrial footprint that residents never asked for and that the County has not fully planned for.

I ask the County not to approve additional data centers in Malaga for the following reasons:

1. Constant noise. Data centers run cooling fans 24 hours a day, producing a low-frequency hum that carries well beyond the property line, and they rely on banks of diesel backup generators that must be test-run on a regular schedule. For homes next door, this is a permanent change to daily life, day and night.

2. Air quality. Those diesel generators emit exhaust and particulates close to where families live and children play. Washington's own Data Center Workgroup identified air quality as a concern with these facilities.

3. Water. Port estimates for Microsoft's first three buildings alone were roughly 121,000 gallons per day, and a separate $16.8 million site was needed just to dispose of cooling water. Our area is semi-arid, and the long-term effect of adding more facilities on wells, the Malaga Water District, and the Columbia River has not been answered.

4. Electricity and utility rates. The state workgroup found that data centers are the largest source of expected new electricity demand in the Pacific Northwest, and utilities are receiving requests that would double or triple their current loads. Chelan County residents have long benefited from low PUD rates; we should not put that at risk, or bear the cost of new substations and transmission lines running through our neighborhood.

5. Property values, light and visual impact. Large windowless buildings, security lighting, fencing and transmission lines next to residential lots reduce the value and enjoyment of homes we have invested in.

6. Traffic and loss of farmland. Construction and operations traffic is already heavy on Malaga-Alcoa Highway, and each project converts productive orchard land to industrial use permanently.

7. Planning has not caught up. The County itself raised concerns last year about the pace of development in Malaga and its effects on land use, transportation infrastructure and comprehensive planning. Those concerns apply directly here. Other Washington communities, such as Cle Elum, have paused new data center approvals to study noise, water, heat, power and generator impacts before deciding.

I respectfully ask that you and the Board:

- Deny approval of additional industrial data centers adjacent to residential properties in Malaga;
- At minimum, require a full Environmental Impact Statement under SEPA covering noise, generator emissions, water, power and traffic before any decision; and
- Consider a moratorium on new data center approvals in Malaga until the County adopts clear standards for setbacks, noise limits, generator testing, lighting and water use.

Please include this letter in the public record for this project, and let me know of any upcoming hearings or comment deadlines so I can participate.

Thank you for your time and for your service to Chelan County.

Sincerely,

Brad & Amy Yaple

Subject: Wenatchee School District Concerns with Rezoning
Date: Tuesday, November 3, 2026 10:33:39 AM

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello County Commissioners,

Thank you for the opportunity to comment on the proposed Malaga Urban Growth Area. I am writing to ask the County to carefully consider how rezoning land in this area from Rural Village to R-1 could affect property held by the Wenatchee School District, specifically the following parcels:

- 222127430100
- 222127840010
- 222127840020
- 222127840030
- 222127840040
- 222127840050
- 222127840060
- 222127840070
- 222127840080
- 222127840090

Together, these parcels represent a significant landholding that could help the District meet community needs in the future, and the zoning decision made now will shape what is possible for years to come.

The Wenatchee School District Board of Directors has done an excellent job planning for the future of education in the greater Wenatchee area, including setting aside land for potential future school facilities. However, the District's enrollment will change over time and the future needs of the school district remain unknown. As a result, the large tracts of land once anticipated for new schools may not be needed for that purpose. It is important that this land remain flexible enough to serve other public needs as circumstances change.

One of the most pressing of those needs is affordable housing. Our District, like much of the Wenatchee Valley, lacks housing that is affordable for teachers, classified staff, and the families we serve. Districts across Washington are increasingly exploring ways to use surplus land to support workforce and affordable housing. Rezoning this property to R-1 would narrow the range of allowable uses and could close the door on options like these before the District and community have had a chance to fully evaluate them.

I respectfully ask that the planning team:

- Consider the long-term impact of the R-1 designation on publicly owned land, including school district property;
- Preserve zoning flexibility, or provide a pathway for higher-density or mixed housing, on land that could help address affordable housing needs; and
- Coordinate directly with the Wenatchee School District before finalizing zoning for these parcels.

Thank you for your work on this plan and for considering these comments.

Sincerely,

Commissioners,

You have a decision to make that will change Malaga for the next 20 years.

Unfortunately you don't have the Microsoft Malaga Water District agreement to know if water will be available for housing.

On October 19th, 2026, the Malaga Water District adopted a resolution to implement a 2.5 acre lot size minimum zoning in their 750 acre Wellhead protection area. Only you, the Commissioners can legally do that.

This is all based on RH2's theory that new housing is the reason for the increase in nitrates in wells 1 & 2 and they and Chelan County Staff have blamed our company and subdivisions as the cause.

This theory is based on RH2 engineering reports, RH2 as you know is Microsoft's, Malaga Water District's, and the Port District's engineer. They are also Chelan County's consultants, so this is definitely not an independent review. Chelan County Staff has the available CARA reports that convinced Andrew Kottkamp to approve our 11 lot subdivision (even though Chelan County Staff did not recommend it).

Chelan County Staff completely ignored the CARA reports and strictly used Microsoft's engineer RH2's findings.

Please change the zoning to not allow a data center next door to 280+ family homes. Data centers are important, but not as important as Chelan County residents, family homes, or affordable housing!

Malaga data center
Sent from my iPhone

Hi Kevin,

My name is Elizabeth Perry and I live in Malaga off Cathedral Rock Road. My neighbor sent me a picture of your sign in Malaga so I'm contacting you to voice my opposition. I am adamantly opposed to data centers for all the obvious reasons. Thanks for doing this. Someone definitely needs to!

Just in case you need it, again, my name is Elizabeth Perry and my address is 322 Faraway Ln., Malaga WA 98828. My phone number is (509) 670-0505.

Thank you again for taking comments on the proposed plan.
1. I do not support the allocation of 25% of the planned growth to the rural lands. This goes against the County residents' own desires to maintain the rural character. The existing UGA's should be further relied upon to provide future growth.
2. Furthermore, I do not support LAMRID designations within the County. The unincorporated county is not intended to provide so much housing, lest it lose it's rural character. I recognize this goes against many private property rights opinions, but I've yet to meet anyone who lives in the County who wants to see more development, even if that means less affordability.
3. Based on the trends seen in Malaga, 12,000 sq ft is not a "rural" lot size, and septic systems should not be allowed on lots less than 1 acre.
4. I read nothing about the proposed Mission Ridge expansion. Considering their current proposal puts a town the size of Chelan up there, it should be discussed. And preferably eliminated as a potential development, that is not the kind of development residents of Chelan County want to see.
5. Lastly, I would like to remind the creators, reviewers, and approvers of this plan that they should keep in mind who the planning document is written to support. It doesn't feel like it's written to support existing county residents. There is far too much emphasis on growth and development, and not nearly enough concrete actions, sideboards, and guidance on maintaining the EXISTING ways of life and rural feel. No one moves to the County to live in a cul-de-sac, or another spec home development where you can dang near touch your neighbor's house from yours and every home looks like a westside suburban development.

I do appreciate the amount of time it's taken to create this document and hope that my comments do not come across too harshly. I appreciate your public service.

Subject: Data Centers

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

I am writing today from Malaga, WA, to voice my opposition to approvals for future data centers in Chelan County.

As you are aware, Microsoft is in the process of building an enormous data center in Malaga. They have bribed the Malaga Water District, which charges exorbitant fees for local water, by paying $50 million for an expansion project. I was at a Malaga Water District meeting where this was discussed and it's clear that the folks in charge have bought into a false promise of new jobs in the area.

Let's take a moment to look at the reality of data centers: Yes, it takes a lot of people to build and outfit a data center. The vast majority of those people are not local; they travel into the area specifically for this work and then depart when the work is done. Then, once the data center is up and running, how many people do you think are required to maintain it? Has anyone actually asked? We're not looking at hundreds of new jobs for local people. I seriously doubt any data center in the area employs more than a dozen people at full time jobs once they are up and running.

Meanwhile, data centers are notorious for consuming huge amounts of power and water. We are fortunate in Chelan County to have some of the lowest electric rates in the country, and I'd really like it to stay that way, especially since I pay so much for water. But what's going to happen when the Microsoft data center comes up to full power and begins to use more electricity than what is locally available? What happens when we have to start buying electricity at peak hours off the grid? Who's going to pick up the cost of that? Or are you going to simply allow them to run their generators or build their own power plants to add noise and bad air to their list of nuisances?

And what's the benefit of a data center, anyway? They don't employ very many people, they destroy the landscape, they consume vast amounts of water and power, and they don't create anything of value. And maybe you can explain to me why it's apparently vital for them to illuminate their buildings so brightly and shine lights into the sky at night? There's nothing positive about having a data center in the area.

Please listen to the folks around you, the folks who have to live with these nuisance sites nearby. None of us want them. Why does Chelan County?

Subject: Comprehensive Plan - Malaga UGA - Land Use Designation - Additional Comment
Date: Tuesday, October 20, 2026 10:59:40 AM
Attachments: image002.png

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good day Susan and Community Development,

I am writing to formally request a change to the land use designation for a parcel owned by Microsoft that is adjacent to the other Microsoft-owned parcels within our assemblage located inside the proposed Malaga UGA boundary. The parcel is identified as parcel number 222135210175 and is located at 5043 Malaga Alcoa Hwy.

For an unknown reason, this parcel was not included with the surrounding group of parcels designated as Campus Industrial. Given its ownership, location, and relationship to the other parcels in the assemblage, we respectfully request that its land use designation be amended to Campus Industrial as well.

At the County Commissioners' public hearing on 10/14, there was an expressed desire to keep parcels with specific designated uses grouped together under corresponding and appropriate land use designations. Changing the designation of parcel 222135210175 to Campus Industrial would be consistent with that stated objective and would provide greater continuity with the adjoining parcels already designated for the same use.

In addition, the requested designation would better align this parcel with the planned future development of the broader assemblage. Applying a consistent Campus Industrial designation across these adjacent parcels would support cohesive land use planning and avoid having a single parcel within the assemblage carry a designation that differs from the surrounding properties intended for coordinated development.

We respectfully ask that the County Commissioners consider this additional comment and include parcel 222135210175 within the group of parcels designated Campus Industrial as part of the Comprehensive Plan Update and proposed Malaga UGA land use designations. Thank you for your consideration of this request.

Thank you,

Anne Hessburg

Hello, Commissioners,

I spoke during the October 14 meeting regarding the Malaga UGA proposals for zoning layout. I will state my concerns here for the record, but first, some context about myself.

I am a resident of Malaga at 4355 Saturday Ave., and am a licensed architect. I designed and built my house and ADU, completing construction in 2023. I have lived at this address since 2019. I am becoming involved in the community, attending Malaga Colockum Community Council meetings for the past few months.

Now for my concerns.

1. **The Sabey property on Dixie Lane:**
   I urge you to not make this property any "Industrial" zone. In my training as an architect and in conversations with community development departments, I have clearly heard that industrial and residential zones are best made distant from each other.
   The uses clash. Industrial uses are generally noisy, ugly, odoriferous, and large. Such uses also tend to operate day and night, unceasingly or with little down time.
   In contrast, residential uses are generally quiet, visually pleasing, have scant scents, and are small- or mid-scale in size. Residences typically have activity only during the daytime and are peaceful at night.
   Industrial uses exist for profit. Residential uses exist to provide respite from chasing profits. These are antithetical to each other.
   The Sabey leadership may say their structures will come across as good neighbors, but ultimately, these people do not have to reside next to their imposing behemoths. Please respect those of us who also wish to avoid this.

2. **My own property and its surrounding area (see address above):**
   This has evidently not been a focus of attention. The proposed plan I saw at the Oct. 14 hearing showed a hodgepodge of residential and commercial uses all in this vicinity. I have some suggestions for cohesion and improvement of practical use.
   My property and that directly north of mine are in a geographic depression, about 30 feet below the Malaga Highway and also lowered in elevation from Saturday Avenue. This makes all but the southwestern part of my property difficult to access from public roads, and the property to the immediate north impractical to access except from my property.
   The property to the north of mine is split into 3 pieces (see the image below taken from Chelan County GIS). This makes cohesive zoning difficult unless properties north of Malaga Highway are zoned the same as those to the highway's south.
   I propose making this group of lots, meaning those to the immediate west of Saturday Ave. along with those to the road's immediate east, UR-3 zone (high-density residential).
   This will work well with the limited access from a street rather than the highway. It also allows for apartments to be built in the future, which fit well within an urban context with adjacent commercial zones (such as is currently proposed to the north of the highway).
   I heard that one or more of my neighbors want this area to become a commercial district. While I understand and respect their personal ambitions, this area is the edge of a residential region. Extending traffic into Saturday Avenue would disrupt the peace and increase traffic to a cumbersome level for nearby residents. In contrast, a high-density residential zone here would allow for a natural, steady mitigation in traffic and bustle coming off the highway. It would make an effective buffer between places of commerce and sanctuaries of rest.

Thank you for considering my comments.

Chris Hanson

Subject: Comment on CPA 26-148, Malaga UGA: Campus Industrial zoning for the Sabey parcels
Date: Saturday, October 24, 2026 11:37:54 PM

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Chelan County Commissioners,

I live in Malaga, about two miles from the roughly 80 acres on Firehouse Road that SDC Wenatchee 1 LLC (Sabey Data Centers) bought in 2025. I'm writing about the proposal to zone that land Campus Industrial as part of the Malaga UGA.

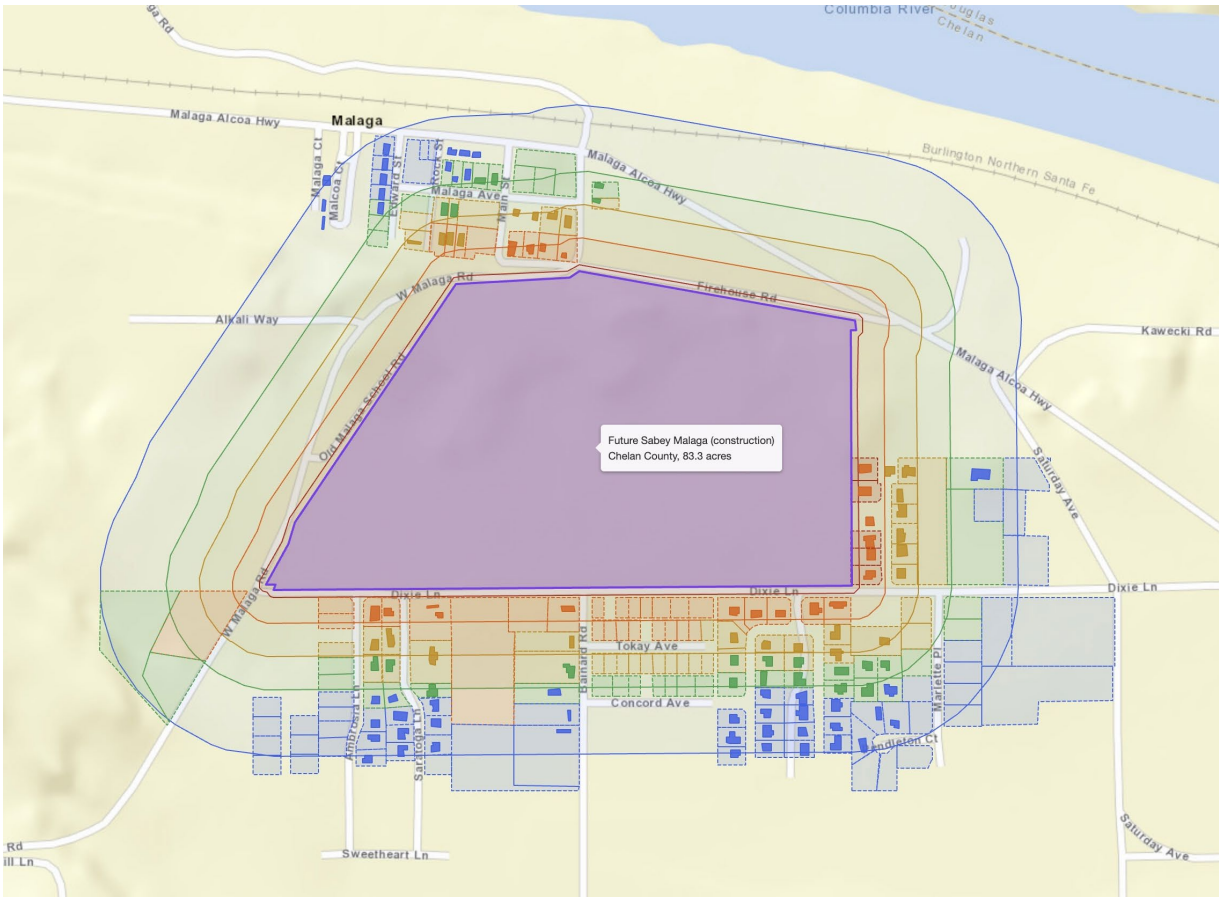
In general I think Chelan and Douglas counties have done a good job managing data center buildout, the Large Loads policy, and ensuring that water and power usage hikes don't get passed on to consumers. I appreciate the tax revenues and jobs they bring. All things considered, I would much rather have data centers in Chelan/Douglas instead of in places where they must be powered with gas turbines or rented diesel generators (like the ones we've seen stood up in Texas recently).

That said, I have some feedback about the Sabey data center bordering downtown Malaga, mainly because I don't want to see the county, Malaga Water, Sabey, and the affected neighbors involved in a prolonged and expensive fight:

The July 2026 draft of the Malaga UGA Plan showed Sabey's two main parcels as R1. The community council's UGA committee kept them R1 in its August 31 addendum, in its words "to honor the clear feedback from the community." On September 9 the Planning Commission voted 5-0, with four members absent, to recommend the plan "including accepting" edits submitted by Sabey and by Microsoft. Those edits were never posted for the public to read. The recommended map now puts all of Sabey's land in Campus Industrial.

Sabey has been clear about what it wants that zone for. Its land use attorneys wrote on August 10 that Campus Industrial was acceptable "as long as the Sabey property can be utilized for development and use as a datacenter." On September 29 Sabey asked to review the Malaga development regulations "while they are still being developed." Sabey told the Port in April 2025 that it hopes to break ground in early or mid 2027 and be online in January 2029.

As of October 24, the county has not posted development regulations for the Malaga UGA zones. They are not on the county's Malaga UGA page or in any Planning Commission packet through October 28, and when I asked county staff for them on October 18, the reply did not include them. The county is being asked to adopt a zone for a known data center site without anyone outside the process knowing what noise, setback, buffer, or height standards will apply.



1. Publish the Campus Industrial regulations, and take public comment on them, before the zoning map is adopted. The developer asked to see them early, I think the neighbors deserve the same chance.

2. At a minimum, carry forward the protections the site has today under Rural Industrial zoning: the state noise limits of WAC 173-60 (60 dBA by day and 50 dBA from 10 PM to 7 AM at a residential property line), no vibration noticeable at the property line without instruments, heat and glare kept inside buildings, a 30-foot side and rear setback next to non-industrial zones, and a 60-foot height limit. Rezoning should not quietly remove any of these.

3. Adopt data center standards modeled on Chandler, Arizona's Ordinance No. 5033, which Chandler passed unanimously in 2022 after years of complaints from residents about the constant drone of a nearby data center. Chandler requires:
- that a data center be allowed only through an explicit approval, not by right in an industrial zone;
- mailed notice to every address within a half mile, a posted sign, and two neighborhood meetings attended by someone with authority over the design;
- a third-party acoustic study of existing sound levels at the nearest residential property line before the first meeting;
- that the facility be designed so its sound does not exceed that measured baseline, with the mitigation design submitted before a building permit is issued;
- a noise study when the facility opens and again every year at peak operation for five years, filed with the city;
- an on-site liaison to take noise complaints from 8 AM to 10 PM every day;
- backup generator testing only between 9 AM and 5 PM on weekdays, excluding holidays, announced publicly at least 24 hours in advance.

I'd add one thing Chandler's ordinance doesn't cover. The sound studies and limits should include low-frequency sound, measured C-weighted or by octave band. The standard A-weighted measure discounts exactly the low hum that drives most complaints about data centers. Mechanical equipment should also be placed on the side of the site away from homes.

4. Require a real buffer wherever Campus Industrial meets a residential zone, because nothing in Chelan or Douglas County compares to this site. Using the state's parcel records, I counted residential parcels near every data center and crypto-mining site I could locate in the two counties, built or under construction: Microsoft's East Wenatchee and Malaga campuses, Sabey's Intergate Columbia, Actapio, Bitdeer, Salcido's Pangborn and Cashmere sites, and the Confluence Technology Center.
- The large campuses already here (Microsoft East Wenatchee, Microsoft Malaga, Sabey Intergate Columbia, and Actapio) have 2 residential parcels within 100 meters of their property lines, combined. Sabey's Malaga land has 87.
- Within 100 meters, all eight of those sites together have 13. Within 250 meters, they have 53. Sabey's Malaga land alone has 87 and 193.
- The most crowded existing site is a crypto mine inside the former Tree Top plant in Cashmere, with 11 residential parcels within 100 meters. Sabey's Malaga land has nearly eight times that.
- At least twenty-five homes border Sabey's land directly. Five, on Arlington Place and Judge Way, share a property line with it. At least twenty more face it from across Dixie Lane, Margaux Loop, West Malaga Road and neighboring streets, 11 to 16 meters away. The current 30-foot setback would let a data center building stand 30 feet from the first five homes' property lines.
- Microsoft's Malaga campus, about a mile and a half down the highway, has 1 residential parcel within 250 meters.

Hyperscale data centers in this valley have been built away from homes. This one would be built into an existing neighborhood, and its standards should reflect that.

5. Follow the community's own committee. Its August 31 addendum kept Sabey's parcels R1 "to honor the clear feedback from the community," and barred generative AI data centers from every zone. The Planning Commission set both aside when it accepted Sabey's edits.

6. Address water before zoning for this use. The Malaga Water District's minutes from July 2025 record that Sabey's water request "would take up most of our available water rights." The plan should say how that demand would be met, or limited, before the county commits the land to it.

7. Explain why the Chelan County PUD parcel next to the site (parcel 58489, 5.33 acres of utility land) is zoned R3.

Other communities are setting these rules before an application arrives. On October 20 the Scottsdale City Council voted unanimously to have its city attorney draft data center regulations on siting, noise, and water use. Scottsdale's mayor said "it's incumbent on us to look ahead," and that "every industrial zoned area could be one." Scottsdale has no application in hand. Malaga has a known developer, a known site, and a target groundbreaking in 2027. If the county is going to zone this land for a data center, the rules should be written, published, and protective before the zone is adopted, not after.

Thank you for your consideration.

> Altered Lake stratification during increasingly warmer weather, combined with enhanced nutrient loading, creates a disturbing trend of toxic algae blooms. Let the experts tell you what direction the lake is going. Let them provide the facts from their long term studies.

Lake Chelan is fragile. Even the changing odor at times of the lake demonstrates its degrading condition.

To justify adding Degradation of Lake Chelan, consider the nutrient loading that is occurring from out of control wildfire and the resulting sediment runoff into the lake. Also consider lakefront properties that fertilize their lawns up to their sea walls and runoff into the lake occurs. Also, another example, consider Stormwater runoff. Confirm from experts at the Lake Chelan Research Institute how climate change is altering lake thermal layers.

The degradation of Lake Chelan is an emerging hazard and threat. It should be listed as a climate change hazard in the comprehensive plan. It is just as important as Wildfire/Smoke, Drought, Snowpack, Flooding, Extreme Weather.

Thank you for your consideration.

Chelan County Commissioners
400 Douglas Street Suite #201
Wenatchee, WA 98801

Commissioners Overbay, Smith and Hawkins,

I have attended several meetings and was present on-line during the Public Hearing yesterday regarding zoning and location concerns with respect to the proposed data centers in Malaga.

Following are my thoughts on some of the issues;

I am concerned that the Microsoft properties would be classified as Campus Industrial which is the same as the proposed Sabey property.

Not all data centers are the same. Hyperscale facilities such as the Microsoft facilities should be classified as Industrial and not be located anywhere near residences. That should be evident by just looking at what has been built to date. That zoning should remain Industrial.

At the very least the Sabey property should never be a location for a hyperscale data center. People are discussing the property from the standpoint that Sabey will be a good neighbor and that very well may be the case but at the end of the day their bottom line is still profit. In a world of mergers and acquisitions how is one to know if that property may be sold at any time by Sabey and then will our neighborhoods be faced with a hyperscale facility and the County indicating there is nothing that can be done about it?

Distinguish zoning based on the types of data centers.

I appreciate that there are residents from Malaga and a planning commission engaged with the County in an advisory capacity although they and the County have limited experience with data centers. This is an undertaking that could go horribly wrong. It does concern me that the County has not engaged with impartial third-party specialty consultants with regard to an aquifer study, noise specific study taking into

consideration the distinct topography of the area, and the development of zoning standards unique to the different types of data centers.

Malaga deserves that a moratorium be put into place and final approval by the commission to move forward put on hold until such time these studies are completed.

In closing I am opposed to any type of industrial zoning adjacent to our neighborhoods. How does this fit in with the promise of the UGA development providing compatible zoning?

It is doubtful that there is a single person from the adjacent neighborhood that would be in favor of a data center next door. It is always easier when it is not you that has been affected. I am certain that if these people knew that they were going to have a data center next door that they would not have purchased their homes in that location.

Residents rely on their elected officials and county administrators to keep them safe. With the recent accelerated emergence of data centers there is little available long-term data with regard to their cumulative impacts. It would be unfortunate for Malaga to become a case study for what not to do at a later date.

And finally, I heard several comments from commenters indicating that if these people were so concerned about this that they would be present at the hearing. Anyone think that just maybe these people are at work during the day trying to pay for their homes and taxes?

Sincerely,

Linda Colasurdo

Chelan County Commissioners
400 Douglas Street
Wenatchee, WA 98801

RE: Malaga Urban Growth Area Designation – Comment letter

Dear Commissioners,

On behalf of the Chelan Douglas Regional Port Authority, we offer the following additional comments regarding the proposed creation of the Malaga Urban Growth Area:

1. Washington State is a challenging environment for industrial and manufacturing activities. The Washington Economic Development Association ("WEDA") prepared a summary and set of recommendation for the Governor's Economic Development Council in the Summer of 2026. The recommendations are attached to this comment letter. Please note the opportunities identified by WEDA are primarily focused on technology related industries, including Aerospace & Space, Ag-Tech, Expanding Clean Tech & Renewable Energy, Broadening Creative & Digital Tech, and Life Sciences & Global Health. WEDA then summarizes the greatest economic development challenges, including (i) cost of living and affordability (Washington ranks as one of the least affordable states), and (ii) business climate and competitiveness (including increased tax pressures and lack of regulatory certainty and predictability related to development). There are several other challenges to economic development in Washington State identified by WEDA.

2. The importance of maintaining flexibility for businesses that can locate on the Alcoa property is underscored by the economic development leads the Port receives through the Washington State Department of Commerce. Many of these opportunities are not a fit for our region due to factors such as our distance from major interstate highways, large labor force requirements, extensive infrastructure requirements, and high electricity, natural gas, and water demands. For example, recent leads have included advanced manufacturing projects requiring 150–400+ acres, 1–10-mile proximity to major interstates, available skilled work force of 1700-2700, and 100–500 megawatts of readily available electricity.

3. It is clear that Chelan County needs additional industrial space and we encourage the County to consider including the southern Alcoa parcels within the Urban Growth Area and zoned for industrial purposes. These parcels are identified as 212208110050 and 212209200050. We understand that there may be concerns about proximity to the Ravenwing Ranch development.

BOARD OF DIRECTORS
Donn Etherington, Commissioner, Chelan County Dist. 1 | **Jim Huffman,** Commissioner, Douglas County Dist. 1 | **JC Baldwin,** Commissioner, Chelan County Dist. 2
W. Alan Loebsack, Commissioner, Douglas County Dist. 2 | **Richard DeRock,** Commissioner, Chelan County Dist. 3 | **Mark Spurgeon,** Commissioner, Douglas County Dist. 3

Based on current activities of Chelan County and Chelan County PUD occurring in adjacent parcel, there appears to be a logical boundary to designate most of the two identified tax parcel numbers for inclusion within the urban growth area and zoned for industrial purposes, while also providing a buffer to Ravenwing Ranch. Please see enclosed map. Consideration of these parcels were also identified as an alternative ("Alternative 2") in mapping developed and presented at public meetings earlier this year. On June 8, 2026, the Port submitted a comment letter in support of Alternative 2 and encouraging the County to include these two parcels within the urban growth area. Inclusion of the southern Alcoa parcels within the urban growth area is important as it gives the highest chance of the southern Alcoa properties being developed. The location, market and overall economic conditions will allow for a determination in the future whether some or all of this property should be rezoned from Industrial to Campus Industrial.

4. The remaining Alcoa holdings are currently proposed to be zoned for industrial purposes (not Campus Industrial). It certainly appears that Alcoa is not going to redevelop the site. It also appears that Alcoa desires to sell all of its holdings in Chelan County, perhaps in a single bulk sale. The Alcoa property represents a substantial, strategically important industrial asset, and maintaining flexibility for technology-related uses could expand the range of prospective businesses capable of redeveloping the site. Restricting these uses before a viable redevelopment opportunity is identified risks further narrowing an already limited pool of potential buyers and employers. Given the scale of the property and the importance of returning it to productive use, the County should preserve a broad range of compatible industrial and technology-related uses to maximize the likelihood of redevelopment, private investment, and long-term economic benefits for Chelan County.

5. Put another way, our primary concern is that the proposed Industrial designation of all of the Alcoa property will hamper redevelopment, result in significant delays, and will impact, stall or prevent redevelopment negotiations. Unless the zoning allows for tech-related businesses, there is high risk it will remain an idle asset for a considerable time, resulting in a missed economic development opportunity. The Port respectfully requests that the County zone the majority of the remaining Alcoa holdings as Campus Industrial, except for that portion immediately to the west of the PUD parcel (which is proposed to be zoned for Industrial uses). See attached map.

6. Taken together, the attached map provides for a division of the Alcoa properties between Campus Industrial and Industrial, with a logical configuration, grouping of parcels and better transition in zones (the area proposed for Campus Industrial is a natural extension of areas already proposed with that zoning designation [primarily MSFT]).

Thank you for your consideration and the opportunity to provide comments on this important decision.

WASHINGTON ECONOMIC DEVELOPMENT ASSOCIATION

Recommendations for Governor's Economic Development Council: Washington State's Economic Development Opportunities & Challenges, and Short & Long-Term Executive/Legislative Action - *Summer 2026*

V. 2.0 – DRAFT for continued discussion

What are the greatest Economic and Economic Development <u>opportunities</u> in Washington State?

- **<u>Washington State's Distinguishing Assets and Strengths:</u>** Washington has an unbelievable and unparalleled quality of life, uniquely diverse industry sectors and a highly skilled workforce. It is the "Home of Big Ideas" and an engine of innovation, with multiple globally-leading corporations and research institutions headquartered and based in our state.
  Key facts and competitive advantages:
  - One in three workers in WA State have a post-secondary degree. We have a deep established network of the community college system, technical schools, apprenticeship programs and research institutions that support new and expanding businesses with certified and strong talent.
  - Washington is a place where new ideas become international icons. Companies such as Starbucks, Boeing, Microsoft, Nordstrom and Amazon, among others, have not only become highly revered brands but have changed the face of their respective industries through their innovation.
  - WA is still the largest producer of clean, sustainable hydroelectric power in the country.
  - WA is equidistant between Europe and Asia; our ports and transportation system serve as a gateway to opportunity.

<u>Particular Economic Development Opportunities:</u>

- **Location:** Leveraging our Pacific Rim trade gateway for aerospace and advanced manufacturing, maritime as well as agriculture.
- **Aerospace & Space:** Washington's historic and global-leading aerospace hub and strengths in next-generation sustainable aviation, space exploration and advanced engineering.
- **Ag-Tech:** Washington is the leading national producer of apples, cherries, pears and hops. Our heavy focus on food innovation and exports, coupled with our tech talent and innovation strengths, creates opportunities for ag-tech startups and job growth.
- **Expanding Clean Tech & Renewable Energy:** Despite capacity concerns, Washington has advantages with hydroelectric power, state and private resources interested in robust and sustainable energy production, electric vehicles and building/construction and grid modernization.
- **Broadening Creative & Digital Tech:** Software development, cloud computing and a significant video game and digital arts sector, in addition to our strong commitment to the creative economy/arts & culture.
- **Life Sciences & Global Health:** Our world-class research institutions, philanthropic presence and companies have created a cluster and climate to foster growth in biotechnology, and medical device and pharmaceutical innovations.

Attachment 2

What are the greatest Economic and Economic Development challenges in Washington State?

- **Cost of Living and Affordability:**
  - **Housing Shortages:** Washington ranks among the least affordable states for housing, with high and skyrocketing median home prices and significant deficits in available rental units for low-income households.
  - **High Cost of Living:** Residents face steep costs for food, goods, fuel and utilities, with local inflation frequently outpacing national averages.
  - **Childcare Costs:** Washington ranks near the top nationally for the high annual cost of raising young children and accessing infant care.
- **Business Climate and Competitiveness:**
  - **Tax Pressures:** Recent expansions in state taxes (including B&O tax adjustments, capital gains levies and the millionaire's tax) and high minimum wage thresholds have caused our competitive advantages to erode.
  - **Lack of Certainty & Predictability in Regulation & Development:** Permit timelines, across multiple levels of government, have become a significant inhibitor to private sector investment and development and business growth.
  - **Stalling Job Growth:** Slower hiring velocity, tech-sector layoffs and high-profile expansions by major local companies into lower-cost states have increased economic concerns.
  - **Energy Capacity and Operating Costs:** Rising electricity rates and fuel expenses, and lack of energy capacity, create hurdles for manufacturing, retail and small business retention.
- **Lack of Energy Capacity:** Regulations and requirements for siting energy facilities for large and smaller-scale, including Battery Energy Storage Systems (BESS) as well as large-scale grid capacity, are too onerous. These should be streamlined and reduced in order to increase production and capacity.
- **State Fiscal Challenges:**
  - **Budget Shortfalls:** The Governor and State Legislature have faced structural budget gaps and have relied on one-time fiscal solutions that have prompted warnings from major credit rating agencies.
  - **Rising Service Caseloads:** The growth rate in state service caseloads has accelerated well past historical averages, outpacing general revenue collection growth.
- **Lack of Commitment & Investment in Intentional and Well-Aligned Economic Development:** The Governor and Legislature have supported extremely harmful reductions to the economic development ecosystem in recent legislative sessions. Economic Development returns critically-needed revenue for the State and communities; reductions to the economic development ecosystem and toolbox only result in lost opportunities for revenue, employers and workers.
- **Unique Challenges of Rural Economic Development:** Economic Development is much more difficult in rural communities. Rural communities need state subsidies to retain and grow jobs and support for strategic initiatives to catalyze investment. A "One Washington" Economic Development strategy recognizes and elevates the connectivity between our rural and urban economies.
- **Dismantling of Industry-Focused Community College Program:** Washington's Centers of Excellence played a vital role in strengthening workforce education by connecting community and technical colleges with industry partners to ensure alignment between educational programs and the skills employers need. State funding for Centers of Excellence was eliminated on June 30, 2026, ending years of collaboration, innovation and expertise, and an efficient system to provide specialty focus areas at certain colleges. A "next iteration" should be developed in consultation with colleges, faculty, workforce educators, students and industry.

Recommendations for short-term executive or legislative action:

- **Execute on the creation and implementation of a strong statewide Economic Development & Competitiveness Strategic Plan, aligned with regional plans and stakeholders, as well as the multiple state agencies that impact employers. Leverage partnerships to fund Plan as needed.**
  - Ensure benchmarking against peer states. A critical component of this analysis should be how long other states' programs have been operating, how many professionals staff them and how long it took their programs to see results; sustained commitment is critical.
  - Focus on job growth, and creation of economic opportunity.
  - Implement and invest in economic development programs at a large enough scale and long enough time duration that there is a chance for a measurable Return on Investment.
  - WEDA's code: *"Regions and communities that strategize, plan and work together go farther with vibrancy than communities that do not."*
- **Restore Funding for Commerce and Associate Development Organizations' Economic Development functions, as well as business support/technical assistance organizations.**
  - Continue to hold these entities accountable for results and alignment.
  - Continue to require local match investments, recognizing these are more difficult to secure in the most rural communities.
  - Pass an Associate Development Organization (ADO) "trailer bill" that cleans up drastic reductions to rural ADOs and restores critical regional capacity to recruit and retain employers and grow jobs.
  - Focus on developing entrepreneurial and innovation ecosystems that ensure the launching and expansion of businesses and fostering of innovation.
  - Continue to address access to capital gaps and support systems, particularly in underserved communities.
- **Spark Energy Capacity Increases**: Immediately address most prominently concerning regulations and requirements for siting that are too onerous, demonstrating short-term and commitment to long-term streamlining, and regulatory reduction.
- **Streamline Permitting:** Codify Executive Order 25-03 to mandate that all cabinet-level permitting agencies (such as Ecology and Transportation) match the 50%-75% processing time reductions recently achieved by the Department of Licensing and Labor & Industries.
- **Extend and Expand the Equitable Access to Credit program**: Scale the existing Department of Commerce capital programs by pooling state funds with private qualified lending institutions to immediately inject credit into historically underserved community businesses.
- **Infrastructure Investment:** Support much-investments from energy to transportation -- priority should be given to projects that impact job growth.
  - Adequate reliable, modern infrastructure is critical for successful economic development. Underpinning all commerce is physical infrastructure: roads, transit, airports, railroads, water/sewer, broadband and energy. Public investments in infrastructure create construction jobs, set the stage for future private investment and shape an area's prospects for generations.
- **Site Readiness:** Establish Statewide Site Certification Program, and support site readiness programs, including technical assistance to organizations and communities pursuing projects and strengthening site readiness.
- **Increase & Strategically Leverage the Strategic Reserve Fund**: Immediately deploy additional available dollars from the Governor's Strategic Reserve Fund and increase these funds to anchor advanced manufacturing, quantum computing and clean energy projects, particularly in rural and economically distressed areas.
- **Restore Research & Development Tax Credit**, and explore other incentives for innovation, Research & Development.

Recommendations for long-term executive or legislative action:

- **Long-Term, Sustained Commitment to implementation of the Economic Development & Competitiveness Strategic Plan**: Sustained commitment to reliable Economic Development funding that fosters and leverages consistent intergovernmental/public and private investment will help ensure the time necessary to construct, implement and deliver successful outcomes. Partnerships to fund the Plan development and implementation should be fostered as needed.
- **Build out a robust Rural Digital Infrastructure:** Expand high-speed rural broadband to bridge economic divides and unlock remote-work and small-business potential outside major metro areas.
- **Global Trade Optimization:** Upgrade deep-water ports and freight corridors as a primary trading gateway between the US interior and Asian markets.
    - Continue to grow Export Assistance programs, in collaboration with federal resources.
- **Workforce Development:** Address challenges to growing local talent, from Cradle to College & Career, and flexible and nimble workforce development programs to meet employers' current and future needs, and foster access and opportunity. Fund and prioritize responsive and dynamic workforce development programs and targeted state training programs focused on clean energy jobs, advanced trades and digital literacy to keep pace with evolving industry demands.
- **Ecosystem Alignment:** Explore more transformative alignment between Economic Development & Workforce Development/Education Ecosystems.
- **Statutory Constraints:** Explore statutory constraints on Economic Development, including constitutional bans on more robust incentives and targeted job growth tools.

Dear commissioner Overbay,

I would like to provide examples of how the data center construction has supported the development of my life and career. I started out as an apprentice in the IBEW Local Union 191 back in January of 2019 up in East Wenatchee. I have worked on the construction of data centers since then with various other projects. The main data center buildings I've helped construct have been in Quincy, East Wenatchee, and Malaga. Building data centers has provided me the opportunity to earn a living wage and support a family of four with a single income. I am able to provide for my family and still be present at all of their sporting, academic, and extracurricular hobbies.

Data centers account for 37% of IBEW construction hours in Washington. In Chelan County, 350 wiremen are currently building a large project in Malaga. In Quincy, Washington, data center tax revenue helped fund a new hospital, school, and fire station while reducing local property taxes by 70 percent. Data center construction offers a valuable opportunity to expand our county and improve a rural area to support further development.

In closing I would like to support the change of Malaga to Industrial Campus.

Thank you for taking the time to read this.

In solidarity,

Lucas C Behrens

IBEW local 191

Subject: Request for Commercial Zoning Consideration – 4360 Dixie Lane, Malaga, WA 98828
Date: Tuesday, October 20, 2026 11:44:02 AM

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Chelan County Commissioners,

I am writing to respectfully request your consideration of a commercial zoning designation for my property located at 4360 Dixie Lane, Malaga, Washington 98828, as part of the proposed Malaga Urban Growth Area (UGA) planning process.

I have lived in Malaga since November 2017, and during my time here, I have developed a strong appreciation for this community and its residents. I am excited about Malaga's future and would like the opportunity to contribute to its growth by investing in a small neighborhood Mexican grocery store on my property.

After reviewing the preliminary zoning maps, I noticed that the proposed commercial designation appears to extend very close to my property, yet my parcel remains outside the proposed commercial area. Given its location near the intersection of Dixie Lane and Saturday Avenue, I respectfully ask the County to consider including my property within an appropriate neighborhood commercial designation.

There is also a meaningful historical connection between this property and commercial activity. My understanding is that a butcher shop operated at this location during the 1990s, possibly even earlier. In conversations with neighbors, I have heard positive recollections of its history, and several residents have expressed enthusiasm about the possibility of restoring a commercial use to the property.

My vision is to establish a small Mexican grocery store that would provide convenient access to everyday food products and specialty items while contributing to the character and vitality of Malaga. I believe a locally owned neighborhood store could serve families, support the community's continued growth, and provide a welcoming place for residents to shop closer to home.

I understand that zoning decisions must consider many factors, including surrounding land uses, infrastructure, traffic, and the long-term development of the area. I am not asking the County to overlook those considerations. Rather, I am asking that my property be evaluated as a reasonable opportunity for small-scale commercial development, particularly given its proximity to the proposed commercial area and its history of commercial use.

As Malaga plans for the next several decades, I believe it is important to create opportunities not only for residential growth but also for small, locally owned businesses that can serve the people who live here. Including my property in an appropriate commercial designation would allow me to explore this investment and contribute to the future of our community.

I respectfully ask the Board of County Commissioners to consider this request before the proposed land-use designations are finalized. I would also appreciate guidance on the appropriate process for formally requesting this zoning change and submitting any additional information needed to support my proposal.

Thank you for your time, your consideration, and your service to the residents of Chelan County. I appreciate the work involved in planning Malaga's future, and I hope to have the opportunity to contribute to that future as both a resident and a local investor.

Sincerely,

Carlos Barragan
4360 Dixie Lane
Malaga, WA 98828

Thanks... Carlos

Subject: Please Vote Yes on the Malaga Industrial Campus Reclassification

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Commissioners Smith, Overbay, and Hawkins,

My name is David Arlt, and I live in East Wenatchee. I am writing on behalf of myself and the many hard-working families who rely on data center work to make a living. I urge you to vote yes on reclassifying the Malaga site from Industrial to Industrial Campus.

For more than 10 years I have worked for Schmitt Electric, a local contractor right here in the valley. Our owner, Jim, passed away this month. He was the best boss I have ever had. He took care of his employees and treated every one of us like family. Companies like Schmitt are what this decision is really about. Data center work keeps local crews working close to home, keeps local paychecks in local households, and lets valley contractors grow and hire. That is the legacy Jim built, and it is worth protecting.

This is not abstract for us. Thousands of skilled tradespeople across Washington depend on this industry for steady, high-paying jobs with real benefits. These are careers that let people buy homes, raise families, and stay in the communities where they grew up. IBEW members build and maintain this infrastructure, and our workforce is among the best trained anywhere.

Chelan County has a real opportunity here, but industrial land is limited. The Industrial Campus classification lets Malaga grow in a planned, orderly way. That means more work for local contractors, more jobs, more tax revenue, and more economic stability for the whole community.

If we fail to act, these jobs and investments will go elsewhere, and so will the work, often to contractors from outside the area. Please do not let that happen. I respectfully but firmly ask you to vote yes and stand with the local companies and working families who depend on this work.

Thank you for your time and your service.

Sincerely,
David Arlt
Schmitt Electric

AGENDA MEMO

To: Board of Chelan County Commissioners

From: Brad Scott

Via: Deanna Walter, Director

Subject: Review refund request for a Shoreline Substantial Development Permit application PL 26-169, submitted by Pacific Engineering & Design, PLLC (applicant) on behalf of Fish Lake Acres, Inc (owners), in the amount of $1075.00.

Agenda Time: 10 minutes

The following refund in the amount of $1075.00 is hereby **Approved by Chelan County Commissioners**

_____
Shon Smith, Chairman

Date: _____

Exhibits Attached:

1. Copy of receipt #26-01164, dated June 29, 2026.
2. Copy of email Ryan Walker (Pacific Engineering & Design, PLLC) (applicant), dated November 02, 2026, requesting withdrawal of PL 26-169 and a refund of any applicable fees.

Expenditure Required:	$1075.00	Amount Budgeted:	$0	Appropriation Required:	$0

Funding Source:

010.020.32210.05.000	Shoreline Substantial Development Permit
010.020.34589.03.000	Environmental Review (SEPA)

Previous BOCC Action: N/A

Narrative:

On June 29, 2026, Pacific Engineering & Design, PLLC (Applicant), on behalf of Fish Lake Acres, Inc (owner), applied for a Shoreline Substantial Development Permit (SDP) for the removal of eight (8) existing solid-surface docks and the proposed installation of a new 390 sq. ft. grated-surface single-use pier within shoreline jurisdiction of Fish Lake.

1. Fish Lake Acres, Inc. is the owner of property located at 14583 Fish Lake Road, Lake Wenatchee, Washington, further identified as parcel# 27-17-16-400-050.

2. On June 29, 2026, SDP application PL 26-169 was submitted by Pacific Engineering & Design, PLLC (applicant) on behalf of Fish Lake Acres, Inc (owner), for the removal of eight (8) existing solid-surface docks and the proposed installation of a new 390 sq. ft. grated-surface single-use pier within shoreline jurisdiction of Fish Lake.

3. A Determination of Incomplete was issued on July 27, 2026, describing how the property appeared to be out of compliance its existing Conditional Use Permit (CUP 96-039) and identifying active code enforcement (CE 21-0013) for shoreline violations. The applicant was given 60 days to provide the deficient materials (expiration date of September 25, 2026).

4. On September 18, 2026, Pacific Engineering & Design, PLLC, emailed requesting a 45-day extension to the file. A 45-day extension was granted resulting in a new expiration date of November 09, 2026.

5. On November 02, 2026, Pacific Engineering & Design, PLLC, emailed requesting the withdrawal of SDP application PL 26-169 and a refund of any available application fees.

6. Pursuant to Resolution 2019-128, Revised Fee Schedule, the following building permit fees were paid upon permit submittal:

PL 26-169

Shoreline Substantial Development Permit	= $	988.00
Environmental Review (SEPA)	= $	283.00
Total Fees Paid	= $	1231.00

Available Refund Amounts:

Shoreline Substantial Development Permit	= $	988.00
Environmental Review (SEPA)	= $	283.00
2 Hours of Staff Review Time @ $78/hr.	= $	-156.00
Total Available Refund Amount	= $	1075.00

Recommended Action:

The Administrator recommends Approval of the partial refund of the Shoreline Substantial Development Permit fees associated with PL 26-169.

Suggested Motion: Approve the requested refund of Shoreline Substantial Development Permit fees in the amount of $1075.00 to Fish Lake Acres, Inc.

010.020.34589.03.000	Environmental Review (SEPA)

Previous BOCC Action: N/A

Narrative:

On October 09, 2026, Gregory A & Susan P Lair Revocable Trust (owners), applied for a Shoreline Conditional Use Permit (SCUP) for an access trail and stairs within shoreline jurisdiction along the Wenatchee River within a Channel Migration Zone.

1. Gregory A & Susan P Lair Revocable Trust are the owners of property located at 6650 Pinnacle View Road, Cashmere, Washington, further identified as parcel# 24-19-31-240-110.

2. On October 09, 2026, SCUP application PL 26-269 was submitted by Clay Gatens (applicant) on behalf of Gregory A & Susan P Lair Revocable Living Trust (owners), for the installation of an access trail and stairs located within shoreline jurisdiction on the owner's property to access the Wenatchee River.

3. Upon review of the application materials and the Shoreline Master Program, it was discovered that the owner's proposal would qualify for a Shoreline Exemption rather than requiring a Shoreline Conditional Use Permit.

4. Pursuant to Chelan County Shoreline Master Program (CCSMP), Table 3.6-a Shoreline Use Matrix, "Fill and Excavation" as defined in CCSMP, Section 5.9, shall require a Shoreline Conditional Use Permit (SCUP) if development is occurring in a Channel Migration Zone (CMZ). However, single-family residential development is exempt from CCSMP, Section 5.9. Additionally, residential appurtenances are exempt from Section 5.9 if the proposal does not exceed two hundred fifty cubic yards. And finally, WAC 173-27-040(2)(a) identifies development which has a cost threshold of less than $8,504.00 to be exempt from a shoreline substantial development permit. The proposed project's cost valuation is identified at $5,000.00, which therefore qualifies it as a Shoreline Exemption.

5. On October 28, 2026, all parties of the application were informed that their proposal would qualify as a Shoreline Exemption, rather than requiring a Shoreline Conditional Use Permit, and were offered the opportunity to withdraw their current application for a refund and then re-apply for the appropriate permit type.

6. On October 28, 2026, Clay Gatens emailed staff requesting the withdrawal of PL 26-269 and the refund of application fees to the owner.

7. Pursuant to Resolution 2019-128, Revised Fee Schedule, the following building permit fees were paid upon permit submittal:

PL 26-269

Shoreline Conditional Use Permit	= $	3035.00
Environmental Review (SEPA)	= $	283.00
Total Fees Paid	= $	3318.00

Available Refund Amounts:

Shoreline Conditional Use Permit	= $	3035.00
Environmental Review (SEPA)	= $	283.00
Total Available Refund Amount	= $	3318.00

Recommended Action:

The Administrator recommends Approval of the partial refund of the Shoreline Conditional Use Permit fees associated with PL 26-269.

Suggested Motion: Approve the requested refund of Shoreline Conditional Use Permit fees in the amount of $3318.00 to Gregory A & Susan P Lair Revocable Living Trust.

Sent: Wednesday, October 28, 2026 8:43 AM
To: Jessica Pavelka <Jessica@pacificengineering.net>
Cc: Clay Gatens <clay@ggw-law.com>
Subject: SCUP 26-269 - Lair

Good morning Jessica,

I was assigned your Shoreline Conditional Use Permit (SCUP) application (PL 26-269) for the Lair's and in looking through the application materials and SMP requirements, it looks like your proposal would not require a SCUP, but rather a Shoreline Exemption (SE).

Pursuant to Chelan County Shoreline Master Program (CCSMP), Table 3.6-a Shoreline Use Matrix, Fill and Excavation (as defined in CCSMP, Section 5.9), upland inside of a Channel Migration Zone (CMZ) would require a SCUP.

However, pursuant to Chelan County Shoreline Master Program (CCSMP), Section 5.16(B)(4), states that "all residential development requiring fill and/or excavation shall comply with Section 5.9 Fill and Excavation, excluding single-family residential development. Additionally, appurtenances may be exempt if not exceeding two hundred fifty cubic yards and not placing fill in any wetland or waterward of the ordinary high watermark."

It is the fill and excavation criteria of Section 5.9 that triggers the SCUP in the CMZ; however, if the residential appurtenance meets the exemption requirements, a SCUP would not be required.

Since the subject property has an existing single-family residence, this access trail would be considered a residential appurtenance, and since the proposed project involves less than 250 cubic yards of fill/excavation, it would be exempt from CCSMP, Section 5.9. And, since the proposal valuation is less than $8,504.00, it would qualifiy as a shoreline exemption.

If your client would like to withdraw their SCUP application, I can initiate a refund request for the SCUP application fees of $3318.00. Then, if you would like to amend the application materials and apply for a shoreline exemption, that application fee would only be $1493.00.

On a side note, the Gatens' project (PL 26-268) two parcels over, would not be able to qualify for the shoreline exemption since there is not an existing residential use currently on the property. As it stands, that property would need the SCUP if they wanted an access trail right now. If your client would rather wait until their have the residential use on the property, they may then be able to qualify for the exemption.

Please let me know how you would like to proceed.

Thank you,
Brad

HEARING DATE: November 10, 2026
FILE NUMBER: CPA 26-007 Heart for Homes, LLC

RECOMMENDED MOTION
The Chelan County Planning Commission, at their duly advertised public hearing on September 23, 2026 made a motion to recommend approval (Attachment 1) of CPA 26-007 Heart for Homes LLC requested comprehensive plan map amendment from Rural Industrial (RI) to Rural Commercial (RC).

GENERAL INFORMATION

Applicant	Heart for Homes, LLC
Planning Commission Notice of Hearing Published	September 12, 2026
Planning Commission Hearing	September 23, 2026
Board of County Commissioners Hearing	November 10, 2026
60-day State agency review	February 19, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review
A Determination of Non-Significance was issued under WAC 107-11-340 on April 30, 2026. The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The decision was made after a review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:
Comments were received from the Chelan County Fire Marshal, Chelan County PUD and the Chelan Douglas Health District all of whom indicated no objection to the proposal.

Public Comment:
None received to date.

60-Day Notice

Sent to Department of Commerce February 19, 2026.

PROJECT DESCRIPTION – CPA 26-007 Heart for Homes, LLC

The applicant is requesting approval of a comprehensive plan map amendment in order to change the designation of a 0.38-acre parcel from Rural Industrial (RI) to Rural Commercial (RC). Development on the site consists of a vacant 5,000-sf single story warehouse built in 1926, that the property owner would like to rehabilitate and use as a community center. The property in question is also known as parcel number 27-23-32-515-096. The site is located within the community of Chelan Falls, a Local Area of More Intense Rural Development (LAMIRD). Zoning in the immediate vicinity of the site is Rural Industrial (RI) adjacent to the north, south and east, and Rural Commercial (RC) to the west across 2nd St and the railroad tracks.

COMPREHENSIVE PLAN

Chelan County conducts an annual review of development regulation text amendments for compliance with the adopted Comprehensive Plan. The Comprehensive Plan represents the long-term vision for future land uses and development. For the county-initiated text amendments, the merits of the requested change must be demonstrated as being consistent with adopted goals and policies.

The following Comprehensive Plan goals and policies are relevant to the proposal:

LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

LU 1.7: Consistent with the Growth Management Act, ensure provision of necessary public facilities and public services for the development, infill and redevelopment of existing residential and mixed-use centers outside urban growth areas, such as LAMIRDs or rural communities. Such services should not be extended in a manner that promotes low density sprawl in rural areas.

RE 2.6: To achieve a variety of rural densities and uses, allow for development clustering, density transfer, design guidelines, conservation easements, and other innovative techniques to accommodate growth consistent with rural character.

RE 3.9: Allow the infill, development, and redevelopment of existing intensely developed rural areas where consistent with the goals and policies of the comprehensive plan, including recreational, residential, mixed-use, and shoreline developments.

RE 6.1: Development in LAMIRDs, except for industrial areas or industrial sites within mixed- use areas, should be principally designed to serve the existing and projected rural population.

REVIEW CRITERIA

The proposals were analyzed based on existing code provisions and past practices or when readily available, within existing County resources. While each proposed amendment may or may not have met all the criteria, the proposals must be weighed by their individual and collective impacts. Additionally, agency and public comment play a role in understanding potential impacts to surrounding land uses, impacts to rural character, and how the amendment may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following review criteria were used to evaluate the proposed amendments:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals whose purpose is to guide the development of comprehensive plans and development regulations among other things. These goals address the following that are relevant to the subject proposal: 5) Economic Development. The Growth Management Act (GMA) permits the development, redevelopment and infill of existing intensely developed rural areas known as LAMIRDs. The proposed land use change would allow for the redevelopment of an unused industrially designated property into a facility to serve the community.

Requirements of the GMA that allow more intense development in rural areas include a provision that these areas serve primarily the existing and projected rural population, generally to ensure rural sprawl does not occur where inappropriate.

The current Rural Industrial land use designation allows for a variety of industrial uses and is currently developed with a 5,000 square foot structure built in 1926 which has been vacant and unused for some time. The applicant's intent in requesting the map amendment is to rehabilitate the existing building in order to use it as a community meeting place.

Conclusion: The requested map amendment would comply with the goals of the Growth Management Act (GMA).

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: If approved, the map amendment would make provision for the redevelopment of an under-utilized lot and provide opportunity for infill within an existing LAMIRD. In the instant case, the applicant is seeking approval of the amendment in order to provide a community center in an existing building that is no longer used for its original purpose.

Conclusion: The proposal would be consistent with the GMA goals and County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The subject property is located in an existing LAMIRD with Rural Public (RP), Rural Industrial (RI), Rural Commercial (RC) and Rural Village (RV) zoning in the immediate vicinity.

LAMIRDs are designated to identify more intense areas of existing development, and to minimize and contain those existing developed areas within the rural lands. LAMIRDs are rural; they are contained and compact, and, with minor exceptions, were built before July 1, 1990.

Conclusion: Based on the designation/siting criteria for LAMIRD designations, as outlined in the Comprehensive Plan, the proposed amendment would be consistent as it would provide the

opportunity for redevelopment within an already existing LAMIRD without impacting the rural character of the area.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: Access to the site is via Chestnut Street. The proposed use is intended to serve the community of Chelan Falls and is not expected to generate traffic from out of the area.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are zoned for and developed as industrial, commercial, public park and small lot residential uses.

Conclusion: The proposed amendment would not adversely affect the surrounding land uses as it would allow lower intensity uses than currently allowed and would be intended to serve the existing residents.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The property is developed with a vacant warehouse on an industrially zoned parcel. No resource lands of long-term commercial significance or designated critical areas would be impacted.

Conclusion: The proposed amendment does not appear to have the potential to adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to redevelop the site into a facility to serve the community. The change in use from industrial to commercial would not impact the supply of land for residential purposes.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; as it would not contribute to the possibility of sprawl, nor would it be expanding the existing LAMIRD.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment would allow the applicant to rehabilitate an aging structure in order to develop it into a facility to serve the existing community.

Conclusion: The proposed amendment would serve the interest of both the applicant as well as the general public health, safety and welfare the Chelan Falls community.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on February 19, 2026, submittal ID 2026-S-11532 (Attachment 3), pursuant to RCW 36.70A.106.
6. A request for a Comprehensive Plan Map Amendment was submitted by Wesley M. Sherer on behalf of Heart for Homes to change the land use designation for the subject property from Rural Industrial (RI) to Rural Commercial (RC). The subject property is located at 85 Chestnut St, Chelan Falls, WA 98817 and further identified by Assessor Parcel No: 27-23-32-515-096.
    a. The location and characteristics are consistent with Chelan County Comprehensive Plan designation for Rural Commercial (RC), as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

RECOMMENDED MOTION

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

A. Re-designation of the site from Rural Industrial (RI) to Rural Commercial (RC) would comply with applicable Chelan County goals and policies for LAMIRD's pursuant to the findings of fact and conclusions of law cited below.

Notice of Application to Surrounding Properties	February 19, 2026
Planning Commission Notice of Hearing Published	September 12, 2026
Planning Commission Hearing on	September 23, 2026
60-day State agency review	February 19, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance (DNS) was issued under WAC 197-11-340(2) for CPA 26-007 on February 19, 2026 (Attachment 1). The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030 (2)(c). The decision was made after review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

The Chelan Douglas Health District (CDHD) and the Chelan County PUD, indicated they have no comments related to the proposal.

The Chelan County Fire Marshal's office will require any new development to comply with all fire safety requirements.

Public Comment:

No public comments have been received regarding the proposal.

PROJECT DESCRIPTION – CPA 26-007 – Heart for Homes, LLC

Proposal: The applicant is requesting approval of a comprehensive plan map amendment in order to change the designation of a 0.38-acre parcel from Rural Industrial (RI) to Rural Commercial (RC). Development on the site consists of a vacant 5,000-sf single story warehouse built in 1926, that the property owner would like to rehabilitate and use as a community center. The property in question is also known as parcel number 27-23-32-515-096. The site is located within the community of Chelan Falls, a Local Area of More Intense Rural Development (LAMIRD). Zoning in the immediate vicinity of the site is Rural Industrial (RI) adjacent to the north, south and east, and Rural Commercial (RC) to the west across 2nd St and the railroad tracks.

Chelan County Land Use Designations

Density: The existing Rural Industrial zoning does not allow residential development. In the proposed Rural Commercial zoning, residential units are only permitted above the ground floor. The applicant has indicated the intent to develop the existing vacant warehouse building into a community center to serve the Chelan Falls area.

COMPREHENSIVE PLAN

Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan policies are relevant to the proposed request for CPA 20-001:

LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

LU 1.7: Consistent with the Growth Management Act, ensure provision of necessary public facilities and public services for the development, infill and redevelopment of existing residential and mixed use centers outside urban growth areas, such as LAMIRDs or rural communities. Such services should not be extended in a manner that promotes low density sprawl in rural areas.

RE 2.6: To achieve a variety of rural densities and uses, allow for development clustering, density transfer, design guidelines, conservation easements, and other innovative techniques to accommodate growth consistent with rural character.

RE 3.9: Allow the infill, development, and redevelopment of existing intensely developed rural areas where consistent with the goals and policies of the comprehensive plan, including recreational, residential, mixed-use, and shoreline developments.

RE 6.1: Development in LAMIRDs, except for industrial areas or industrial sites within mixed- use areas, should be principally designed to serve the existing and projected rural population.

REVIEW CRITERIA

Review Criteria
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals whose purpose is to guide the development of comprehensive plans and development regulations among other things. These goals address the following that are relevant to the subject proposal: 5) Economic Development. The Growth Management Act (GMA) permits the development, redevelopment and infill of existing intensely developed rural areas known as LAMIRDs. The proposed land use change would allow for the redevelopment of an unused industrially designated property into a facility to serve the community.

Requirements of the GMA that allow more intense development in rural areas include a provision that these areas serve primarily the existing and projected rural population, generally to ensure rural sprawl does not occur where inappropriate.

The current Rural Industrial land use designation allows for a variety of industrial uses and is currently developed with a 5,000 square foot structure built in 1926 which has been vacant and unused for some time. The applicant's intent in requesting the map amendment is to rehabilitate the existing building in order to use it as a community meeting place.

Conclusion: The requested map amendment would comply with the goals of the Growth Management Act (GMA).

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: If approved, the map amendment would make provision for the redevelopment of an under-utilized lot and provide opportunity for infill within an existing LAMIRD. In the instant case, the applicant is seeking approval of the amendment in order to provide a community center in an existing building that is no longer used for its original purpose.

Conclusion: The proposal would be consistent with the GMA goals and County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The subject property is located in an existing LAMIRD with Rural Public (RP), Rural Industrial (RI), Rural Commercial (RC) and Rural Village (RV) zoning in the immediate vicinity.

LAMIRDs are designated to identify more intense areas of existing development, and to minimize and contain those existing developed areas within the rural lands. LAMIRDs are rural; they are contained and compact, and, with minor exceptions, were built before July 1, 1990.

Conclusion: Based on the designation/siting criteria for LAMIRD designations, as outlined in the Comprehensive Plan, the proposed amendment would be consistent as it would provide the opportunity for redevelopment within an already existing LAMIRD without impacting the rural character of the area.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: Access to the site is via Chestnut Street. The proposed use is intended to serve the community of Chelan Falls and is not expected to generate traffic from out of the area.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are zoned for and developed as industrial, commercial, public park and small lot residential uses.

Conclusion: The proposed amendment would not adversely affect the surrounding land uses as it would allow lower intensity uses than currently allowed and would be intended to serve the existing residents.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The property is developed with a vacant warehouse on an industrially zoned parcel. No resource lands of long-term commercial significance or designated critical areas would be impacted.

Conclusion: The proposed amendment does not appear to have the potential to adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to redevelop the site into a facility to serve the community. The change in use from industrial to commercial would not impact the supply of land for residential purposes.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; as it would not contribute to the possibility of sprawl, nor would it be expanding the existing LAMIRD.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment would allow the applicant to rehabilitate an aging structure in order to develop it into a facility to serve the existing community.

Conclusion: The proposed amendment would serve the interest of both the applicant as well as the general public health, safety and welfare the Chelan Falls community.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on February 19, 2026, submittal ID 2026-S-11532 (Attachment 3), pursuant to RCW 36.70A.106.
6. A request for a Comprehensive Plan Map Amendment was submitted by Wesley M. Sherer on behalf of Heart for Homes to change the land use designation for the subject property from Rural Industrial (RI) to Rural Commercial (RC). The subject property is located at 85 Chestnut St, Chelan Falls, WA 98817 and further identified by Assessor Parcel No: 27-23-32-515-096.
    a. The location and characteristics are consistent with Chelan County Comprehensive Plan designation for Rural Commercial (RC), as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

STAFF Finding

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners,

pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

The Comprehensive Plan Amendment to change the subject property's land use designation from Rural Industrial (RI) to Rural Commercial (RC), given file number CPA 2026-007, based upon the findings of fact and conclusions of law contained would comply with relevant with adopted county goals and policies.

CODE REQUIREMENTS

The proposal/project shall conform to all applicable requirements of the International Fire Code and Chelan County Code administered by the Chelan County Fire Marshal.

FIRE FLOW FOR BUILDINGS

The minimum fire flow and flow duration requirements for one and two-family dwellings having a fire-flow calculation area which does not exceed three thousand six hundred square feet shall be seven hundred fifty gallons per minute. Fire flow and flow duration for dwellings having a fire-flow calculation area in excess of three thousand six hundred square feet shall not be less than that specified in Table B105.1(1) of the IFC, except that reduction in required fire flow of fifty percent, as approved, is allowed when the building is provided with an approved automatic sprinkler system.

FIRE FLOW MODIFICATIONS

The Fire Marshal may modify Fire-flow requirements downward by applying fire protection credits for isolated buildings or a group of buildings in rural areas or small communities where the development of full fire-flow requirements is impractical. Applicant is encouraged to contact this office to ascertain how the attached fire protection credits options apply to their project. A note on the face of the final short plat shall state: **"Without the installation of a fire hydrant capable of delivering the required fire flow and within the required distance to the lots in question, the applicant may choose one or any combination of alternatives using the installation of automatic fire sprinklers and/or fire protection credits as approved by the Fire Marshal."**

FIRE HYDRANTS

Fire hydrants serving single family or duplex dwellings shall have a maximum lateral spacing of 600 feet with no lot or parcel in excess of 300 feet from a fire hydrant when serving lots less than 43,560 square feet (one acre).

Fire hydrants serving single family or duplex dwellings shall have a maximum lateral spacing of 1000 feet with no lot or parcel in excess of 500 feet from a fire hydrant when serving lots greater than 43,560 square feet (one acre).

All fire hydrants shall be accessible to the fire department by roadways or accesses meeting the requirements of Chapter 15.30, Road Standards, and meet the requirements of 3.04.080 International Fire Code amended, Section 507.5.7, Fire Hydrant Installation and maintenance requirements.

BUILDINGS IN THE WILDLAND URBAN INTERFACE

Class A roofing/noncombustible roof covering, as defined in the International Building Code, shall be used in all areas of Chelan County. A note on the face of the final mylar shall state that **"All buildings that require a building permit within this short plat shall have Class A roofing materials."**

ADDRESS SIGNS

A note on the face of the final mylar shall state that **"New homes shall have approved address numbers, building numbers or approved building identification placed in a position that is plainly legible and visible from the street or road fronting the property."** The design of the proposed sign shall be submitted to the Fire District and/or Fire Marshal for approval prior to installation.

WILDLAND URBAN INTERFACE

A note on the face of the final mylar shall state that **"All buildings within this plat that require a building permit shall comply with the provisions of the Wildland-Urban Interface Code as adopted by Chelan County at the time the building permit is submitted".**

RE: Heart for Homes (CPA 26-007) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Industrial (RI) to Rural Commercial (RC). The subject property is located at 85 Chestnut St., Chelan Falls, WA 98817 (county tax parcel: 272332515096)

As proposed, I have no objections to further approval of this project.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-signif icance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

Subject: Notice of Application for CPA 26-007 Heart for Homes LLC - Chelan County Dept. of Community Development
Attachments: CPA 26-007 NOA.pdf; CPA 26-007 - Affidavit of Posting NOA.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Heart for Homes LLC's property, File# CPA 26-007. This notice should be posted on the subject property by February 19th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days, starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impacts of these proposals.**

CPA 26-007 Heart for Homes - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Industrial (RI) to Rural Commercial (RC). 85 Chestnut St., Chelan Falls, WA 98817 also known as Assessor's Parcel No.: 27-23-32-515-096.

CPA 26-026 G&B Properties East LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 acres (RR5) to Rural Commercial (RC). 18625 Beaver Valley Road, Plain, WA 98826 also known as Assessor's Parcel No.: 26-17-13-720-007.

On February 19, 2026, these applications were noticed to the public, and no action will be taken on these projects until the agency comment period ends March 5, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Attachment 1 of 4 to Sherer ltr of January 7, 2026

COMPREHENSIVE PLAN TEXT AMENDMENT
Applicant: Mike Sherer
Property Address: 85 Chestnut St, Chelan Falls, WA 98817
Subject: Request for Map Amendment and Rezone from Rural Industrial (RI) to Rural Commercial (RC)
Re: CCC 14.14.045 (B)

(i) **What is to be changed?**
Zoning change of an existing warehouse from Rural Industrial (RI) to Rural Commercial (RC)

(ii) **Why is change needed?**
Reason for Change:
The Subject Property contains a pre-existing warehouse structure that has remained vacant and unused under its current industrial designation. The applicant intends to restore and re-purpose this existing footprint to serve as a community meeting area. The current Rural Industrial zoning restricts the property to heavy intensity uses that do not align with the applicant's community-oriented vision. Re-zoning to Rural Commercial will allow for the adaptive reuse of the building, transforming a blighted, vacant industrial site into a vibrant community asset while preserving the rural character of Chelan Falls.

(iii) **How consistent with goals of Growth Management Act.**
The proposed amendment aligns with the goals of the Washington State Growth ManagementAct (RCW 36.70A.020) in the following ways:
- Goal 1 (Urban Growth) & Goal 2 (Reduce Sprawl): The project focuses development on a site with an existing structure rather than developing raw land. By re-purposing a standing warehouse, the proposal promotes infill and prevents low-density sprawl into undeveloped areas.
- Goal 5 (Economic Development): The amendment fosters economic vitality in the rural community of Chelan Falls by revitalizing a dormant commercial property and permitting a use (community meeting area) that serves local residents.
- Goal 12 (Public Facilities): The Subject Property is already served by pre-existing septic and water connections and possesses a valid septic permit. Development will occur where adequate public facilities already exist, without requiring new, costly extensions of services.
- Goal 13 (Historic Preservation): The proposal involves the restoration of an existing building, helping to maintain the historic footprint and character of the community rather than demolition and new construction.

(iv) **How does this rezone support the comprehensive plan goals and policies?**
The amendment supports specific policies within the Chelan County Comprehensive Plan (2017-2037):
- Policy LU 1.5 (Infill Development): The project fulfills the county's goal to "encourage infill of vacant and underdeveloped land in existing residential areas... or rural communities." This proposal activates a vacant warehouse in the established Chelan Falls community.
- Policy RE 6.1 (Rural Services): The requested Rural Commercial designation allows for

services that support the rural population. A community meeting area provides a necessary social and civic gathering space appropriate for a Local Area of More Intense Rural Development (LAMIRD).
• Policy CF 2.5 (Infrastructure Efficiency): The proposal maximizes the use of existing capital facilities (water/septic) rather than burdening the county with demands for new infrastructure.

(v) **Will this proposed change affect resource lands of long-term commercial significance and/or critical areas?**
• Critical Areas (Aquifer Recharge): The subject property is located within a 10-year Wellhead Protection Area.
• Impact Mitigation: The rezone from Rural Industrial to Rural Commercial is beneficial for the protection of this critical area. Industrial zones typically permit uses involving hazardous materials, heavy machinery, and chemical storage that pose higher risks to groundwater. A community meeting area (Commercial) presents a significantly lower risk of contamination.
• Resource Lands: The project utilizes an existing developed footprint (Land Use Code 82/Warehouse) and does not encroach upon or convert active agricultural land or designated forest land of long-term commercial significance.

(vi) **How will this change serve the public as a whole as well as the applicant?**
The proposed amendment serves the broader public interest by revitalizing a vacant structure in the heart of Chelan Falls and converting it into a community asset.
• Public Welfare: Transitioning the property from "Rural Industrial" to "Rural Commercial" allows for the creation of a community meeting area. This provides a much-needed social infrastructure for the residents of Chelan Falls, fostering community connection and providing a space for local events, which directly supports the social welfare of the area.
• Health and Safety: The property is located within a 10-year Wellhead Protection Area. Industrial uses permitted under the current zoning often involve activities or materials that pose a higher risk of groundwater contamination. By zoning to a commercial use (community meeting area), the potential for hazardous discharge is significantly reduced, thereby better protecting the public drinking water supply and public health.
• Applicant Interest: The amendment allows the applicant to put a disused building back into productive service in a manner that is economically viable and compatible with the neighborhood's current character.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

Zone Change for 100 year old building, recently renovated, to be used for public meetings.

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): N/A
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: Warehouse
   South: Ware house
   East: Post office/PUD Park
   West: Gas Station
4. What is the current use of the property? Storage
5. Sanitation Disposal: ☐ N/A ☑ Septic Permit ☐ Sewer District: _____
6. Water Source: ☐ N/A ☐ Single Private Well ☐ Shared Private Well ☐ Group B
   ☑ Public Water Supplier: Chelan PUD
7. Irrigation Water:
   ☑ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: 7 School District: Chelan
9. Power Service: Chelan PUD
10. Are there critical areas or critical area buffers on the property?
    ☐ Airport Overlay: N/A
    ☐ Aquifer Recharge Area (see attached) N/A
    ☐ Floodplain / Floodway N/A

    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☐ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☐ Habitat/Riparian Area, protected species/area: _____
    ☐ Streams / Waterbodies: _____ ☐ Shoreline Environment Designation: _____
    ☐ Drainage or Seasonal Stream: _____ ☐ Wetland, if so what category: _____
    ☐ Cultural or Archeological: _____
11. Will landfill be required? ☑ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    N/A
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:
No new construction'

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☒ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

☑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.

☑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).

☑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.

☑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.

☑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines. N/A, none

☑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- [x] Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- [x] Label the name and width of roads bordering the property and indicate whether they are public or private.
- [x] Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- [x] Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- [x] Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- [x] Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- [x] Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel. None except water
- [x] Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- [x] If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- [x] If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- [x] If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

7. Chelan County is hereby given consent to enter the property(ies) listed above.

8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

10. I certify that this application has been made with the consent of the lawful property owner(s).

11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

Attachment 3 of 4 to Sherer ltr of January 7, 2026

COMPREHENSIVE PLAN AMENDMENT

Applicant: Mike Sherer

Property Address: 85 Chestnut St, Chelan Falls, WA 98817

Subject: Request for Map Amendment and Rezone from Rural Industrial to Rural Commercial

Re: CCC 14.14.050

(i) **Proposal and Rationale**

Proposed Change:

The applicant proposes a Site-Specific Comprehensive Plan Map Amendment and concurrent Zone Change for the property located at 85 Chestnut St, Chelan Falls (the "Subject Property"). The request is to amend the Chelan County Comprehensive Plan Map designation from Rural Industrial (RI) to Rural Commercial (RC) and concurrently amend the Official Zoning
Map to reflect this change.

Reason for Change:

The Subject Property contains a pre-existing warehouse structure that has remained vacant and unused under its current industrial designation. The applicant intends to restore and repurpose this existing footprint to serve as a community meeting area. The current Rural Industrial zoning restricts the property to heavy intensity uses that do not align with the applicant's community-oriented vision. Re-zoning to Rural Commercial will allow for the adaptive reuse of the building, transforming a blighted, vacant industrial site into a vibrant community asset while preserving the rural character of Chelan Falls.

(ii) **Consistency with the Growth Management Act (GMA)**

The proposed amendment aligns with the goals of the Washington State Growth ManagementAct (RCW 36.70A.020) in the following ways:

- Goal 1 (Urban Growth) & Goal 2 (Reduce Sprawl): The project focuses development on a site with an existing structure rather than developing raw land. By re-purposing a standing warehouse, the proposal promotes infill and prevents low-density sprawl into undeveloped areas.
- Goal 5 (Economic Development): The amendment fosters economic vitality in the rural community of Chelan Falls by revitalizing a dormant commercial property and permitting a use (community meeting area) that serves local residents.
- Goal 12 (Public Facilities): The Subject Property is already served by pre-existing septic and water connections and possesses a valid septic permit. Development will occur where adequate public facilities already exist, without requiring new, costly extensions of services.
- Goal 13 (Historic Preservation): The proposal involves the restoration of an existing building, helping to maintain the historic footprint and character of the community rather than demolition and new construction.

(iii) **Compliance with Comprehensive Plan Goals and Policies**

The amendment supports specific policies within the Chelan County Comprehensive Plan (2017-2037):

- Policy LU 1.5 (Infill Development): The project fulfills the county's goal to "encourage infill of vacant and underdeveloped land in existing residential areas... or rural

communities." This proposal activates a vacant warehouse in the established Chelan Falls community.
• Policy RE 6.1 (Rural Services): The requested Rural Commercial designation allows for services that support the rural population. A community meeting area provides a necessary social and civic gathering space appropriate for a Local Area of More Intense Rural Development (LAMIRD).
• Policy CF 2.5 (Infrastructure Efficiency): The proposal maximizes the use of existing capital facilities (water/septic) rather than burdening the county with demands for new infrastructure.

(iv) **Compliance with Land Use Designation & Siting Criteria**
The Rural Commercial designation is the most appropriate classification for the Subject Property. The site is located within Chelan Falls, an area characterized by a mix of rural uses.
The Chelan County Code allows for Rural Commercial uses in areas established as LAMIRDs to
provide goods and services to the surrounding rural area.
• Scale and Intensity: The proposed use (community meeting area) is consistent with the rural scale. It does not introduce high-density housing or urban-scale retail but provides a specific, low-intensity service.
• Compatibility: The site is historically developed. Transitioning from "Industrial" to "Commercial" reduces the potential intensity of the site, making it more compatible with the rural lifestyle than a potential heavy manufacturing user.

(v) **Consistency with Capital Facility and Transportation Elements**
• Capital Facilities: The site has verified pre-existing water and septic connections, including a valid septic permit. No new capital improvements or public expenditures are required to serve the proposed use.
• Transportation: The property is located on Chestnut Street, which was previously designed to accommodate industrial traffic. The proposed downzone from Rural Industrial to Rural Commercial will likely result in a reduction of heavy truck traffic and industrial hauling, thereby reducing wear and tear on Chestnut Street and preserving the County's transportation infrastructure.

(vi) **Surrounding Land Uses and Impacts**
• Context: The property is situated in the Chelan Falls area, surrounded by a mix of rural, residential, and agricultural uses.
• Impact Analysis: The change will have a positive impact on surrounding land uses. An unused industrial warehouse can become a blight or safety hazard. Restoring it as a community meeting area improves the visual aesthetics of the neighborhood. Furthermore, removing the "Industrial" designation eliminates the possibility of future noise, dust, or odor-generating industrial activities, ensuring the site remains a "good neighbor" to nearby properties.

(vii) **Effect on Resource Lands and Critical Areas**
• Critical Areas (Aquifer Recharge): The subject property is located within a 10-year Wellhead Protection Area.
• Impact Mitigation: The rezone from Rural Industrial to Rural Commercial is beneficial for

the protection of this critical area. Industrial zones typically permit uses involving hazardous materials, heavy machinery, and chemical storage that pose higher risks to groundwater. A community meeting area (Commercial) presents a significantly lower risk of contamination.
• Resource Lands: The project utilizes an existing developed footprint (Land Use Code 82/Warehouse) and does not encroach upon or convert active agricultural land or designated forest land of long-term commercial significance.

(viii) **Effect on Land Supply**
• Impact on Industrial Supply: The removal of this single parcel from the Rural Industrial inventory will have a negligible effect on the County's overall supply of industrial land. The site is currently dormant and has not contributed to the industrial base for years.
• Impact on Commercial Supply: The amendment positively affects the supply of Rural Commercial land by activating an existing structure in a developed area (Chelan Falls). This helps accommodate projected demand for rural services and community gathering spaces without requiring the conversion of new, undeveloped land.

(ix) **Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare.**
The proposed amendment serves the broader public interest by revitalizing a vacant structure in the heart of Chelan Falls and converting it into a community asset.
• Public Welfare: Transitioning the property from "Rural Industrial" to "Rural Commercial" allows for the creation of a community meeting area. This provides a much-needed social infrastructure for the residents of Chelan Falls, fostering community connection and providing a space for local events, which directly supports the social welfare of the area.
• Health and Safety: The property is located within a 10-year Wellhead Protection Area. Industrial uses permitted under the current zoning often involve activities or materials that pose a higher risk of groundwater contamination. By downzoning to a commercial use (community meeting area), the potential for hazardous discharge is significantly reduced, thereby better protecting the public drinking water supply and public health.
• Applicant Interest: The amendment allows the applicant to put a disused building back into productive service in a manner that is economically viable and compatible with the neighborhood's current character.

SEPA[1] Environmental Checklist

Attachment 4 to Sherer Ltr of January 7, 2026

Mike Sherer
190 Quetilquasoon Rd.
Manson, WA 98831-9666

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

A. Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**
   Zoning Change for 85 Chestnut St Chelan Falls WA 98817
2. **Name of applicant:**
   Wesley M. Sherer / Heart for Homes LLC
3. **Address and phone number of applicant and contact person:**
   Contact – Same as 2. above
   190 N. Queen Quasson Rd. Manson WA 98831
4. **Date checklist prepared:**
   November 15, 2025
5. **Agency requesting checklist:**
   Chelan County Development
6. **Proposed timing of schedule (including phasing, if applicable):**
   ASAP
7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**
   No
8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**
   Unknown
9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**
   No
10. **List any government approvals or permits that will be needed for your proposal, if known.**
    Zoning Change
11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)** Change zoning for 85 Chestnut St. Chelan Falls WA 98817 from Rural Industrial (RI) to Rural Commercial (RC)
12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section,**
    85 Chestnut St. Chelan Falls WA 98817

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. General description of the site:

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. What is the steepest slope on the site (approximate percent slope)?

5%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Sand, no soil removal

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

N/A

f. Could erosion occur because of clearing, construction, or use? If so, generally describe.

N/A

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

25% already in place (100 year old warehouse)

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

None

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

None

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**

N/A

3. Water

Find help answering water questions[5]

a. **Surface:**

Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

No

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

No

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

N/A

---

[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water

[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

No

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

No

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

No

b. **Ground:**
Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

No

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals...; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

Domestic Sewage to new pressurized system for intermittent use 10 x 30 drainfield.

c. **Water Runoff (including stormwater):**

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

No disposal of runoff for 100 years.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

No waste materials other than domestic sewage (New approved system)

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

No

d. **Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:**

None

4. Plants

Find help answering plants questions

a. **Check the types of vegetation found on the site:**

- ☐ **deciduous tree: alder, maple, aspen, other**
- ☐ **evergreen tree: fir, cedar, pine, other**
- ☐ **shrubs**
- ☐ **grass**
- ☐ **pasture**
- ☐ **crop or grain**
- ☐ **orchards, vineyards, or other permanent crops.**
- ☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**
- ☐ **water plants: water lily, eelgrass, milfoil, other**
- ☐ **other types of vegetation**

b. **What kind and amount of vegetation will be removed or altered?**

None

c. **List threatened and endangered species known to be on or near the site.**

Unknown

d. **Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.**

None

e. **List all noxious weeds and invasive species known to be on or near the site.**

None

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.** Occasional neighborhood dogs

Examples include:

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. List any threatened and endangered species known to be on or near the site.

None

c. Is the site part of a migration route? If so, explain.

Unknown

d. Proposed measures to preserve or enhance wildlife, if any.

None

e. List any invasive animal species known to be on or near the site.

Unknown

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. Electric for heating and lights

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe. No

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.

None

7. Environmental health

Health Find help with answering environmental health questions[10]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.

N/A

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou

[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

1. **Describe any known or possible contamination at the site from present or past uses.**

   Unknown

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

   N/A

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

   None planned

4. **Describe special emergency services that might be required.**

   Unknown

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None

b. **Noise**

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   Traffic, light.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   None

3. **Proposed measures to reduce or control noise impacts, if any:**

   Keep doors shut.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

   Rural Industrial (RI) currently. Adjacent properties are mixed (RI) and Rural Commercial (RC)

b. **Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have**

   N/A

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

1. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?

No

c. Describe any structures on the site.

100 year old Warehouse, 10,000 ft² on two floors

d. Will any structures be demolished? If so, what?

No

e. What is the current zoning classification of the site?

Rural Industrial (RI)

Answer these

f. What is the current comprehensive plan designation of the site?

Rural Public Lands and Facilities

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Unknown ~~Yes; Wellhead Protection Area?~~

i. Approximately how many people would reside or work in the completed project?

5

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any.

N/A

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.

Chapter 11.84 Distillery Chart

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

N/A

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

N/A

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

N/A

c. **Proposed measures to reduce or control housing impacts, if any:**

N/A

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

30 ft. Building material masonary block

b. **What views in the immediate vicinity would be altered or obstructed?**

None

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

None

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

None except deck lights after dark.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

No

c. **What existing off-site sources of light or glare may affect your proposal?**

None

d. **Proposed measures to reduce or control light and glare impacts, if any:**

None

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?** 2 PUD Parks within 1 block.

b. **Would the proposed project displace any existing recreational uses? If so, describe.**

No

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**

~~None~~ N/A

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

No

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.**

None Known

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.**

N/A

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.**

N/A

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**

See Vicinity Map

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?** LINK transit is on call

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**

No

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**

Property abuts railroad.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

~~Guess: 10 trips/day~~ Unknown

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

No

g. **Proposed measures to reduce or control transportation impacts, if any:**

None

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

No

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

   N/A

   - **Proposed measures to avoid or reduce such increases are:**

     None

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

   N/A

   - **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

     None

3. **How would the proposal be likely to deplete energy or natural resources?**

   N/A

   - **Proposed measures to protect or conserve energy and natural resources are:**

     None

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

   N/A

   - **Proposed measures to protect such resources or to avoid or reduce impacts are:**

     None

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

   N/A

   - **Proposed measures to avoid or reduce shoreline and land use impacts are:**

     None

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

   N/A

   - **Proposed measures to reduce or respond to such demand(s) are:**

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

Attachment 1 of 4 to Sherer ltr of January 7, 2026

COMPREHENSIVE PLAN TEXT AMENDMENT
Applicant: Mike Sherer
Property Address: 85 Chestnut St, Chelan Falls, WA 98817
Subject: Request for Map Amendment and Rezone from Rural Industrial (RI) to Rural Commercial (RC)
Re: CCC 14.14.045 (B)

(i) **What is to be changed?**
Zoning change of an existing warehouse from Rural Industrial (RI) to Rural Commercial (RC)

(ii) **Why is change needed?**
Reason for Change:
The Subject Property contains a pre-existing warehouse structure that has remained vacant and unused under its current industrial designation. The applicant intends to restore and re-purpose this existing footprint to serve as a community meeting area. The current Rural Industrial zoning restricts the property to heavy intensity uses that do not align with the applicant's community-oriented vision. Re-zoning to Rural Commercial will allow for the adaptive reuse of the building, transforming a blighted, vacant industrial site into a vibrant community asset while preserving the rural character of Chelan Falls.

(iii) **How consistent with goals of Growth Management Act.**
The proposed amendment aligns with the goals of the Washington State Growth ManagementAct (RCW 36.70A.020) in the following ways:
- Goal 1 (Urban Growth) & Goal 2 (Reduce Sprawl): The project focuses development on a site with an existing structure rather than developing raw land. By re-purposing a standing warehouse, the proposal promotes infill and prevents low-density sprawl into undeveloped areas.
- Goal 5 (Economic Development): The amendment fosters economic vitality in the rural community of Chelan Falls by revitalizing a dormant commercial property and permitting a use (community meeting area) that serves local residents.
- Goal 12 (Public Facilities): The Subject Property is already served by pre-existing septic and water connections and possesses a valid septic permit. Development will occur where adequate public facilities already exist, without requiring new, costly extensions of services.
- Goal 13 (Historic Preservation): The proposal involves the restoration of an existing building, helping to maintain the historic footprint and character of the community rather than demolition and new construction.

(iv) **How does this rezone support the comprehensive plan goals and policies?**
The amendment supports specific policies within the Chelan County Comprehensive Plan (2017-2037):
- Policy LU 1.5 (Infill Development): The project fulfills the county's goal to "encourage infill of vacant and underdeveloped land in existing residential areas... or rural communities." This proposal activates a vacant warehouse in the established Chelan Falls community.
- Policy RE 6.1 (Rural Services): The requested Rural Commercial designation allows for

services that support the rural population. A community meeting area provides a necessary social and civic gathering space appropriate for a Local Area of More Intense Rural Development (LAMIRD).
• Policy CF 2.5 (Infrastructure Efficiency): The proposal maximizes the use of existing capital facilities (water/septic) rather than burdening the county with demands for new infrastructure.

(v) **Will this proposed change affect resource lands of long-term commercial significance and/or critical areas?**
• Critical Areas (Aquifer Recharge): The subject property is located within a 10-year Wellhead Protection Area.
• Impact Mitigation: The rezone from Rural Industrial to Rural Commercial is beneficial for the protection of this critical area. Industrial zones typically permit uses involving hazardous materials, heavy machinery, and chemical storage that pose higher risks to groundwater. A community meeting area (Commercial) presents a significantly lower risk of contamination.
• Resource Lands: The project utilizes an existing developed footprint (Land Use Code 82/Warehouse) and does not encroach upon or convert active agricultural land or designated forest land of long-term commercial significance.

(vi) **How will this change serve the public as a whole as well as the applicant?**
The proposed amendment serves the broader public interest by revitalizing a vacant structure in the heart of Chelan Falls and converting it into a community asset.
• Public Welfare: Transitioning the property from "Rural Industrial" to "Rural Commercial" allows for the creation of a community meeting area. This provides a much-needed social infrastructure for the residents of Chelan Falls, fostering community connection and providing a space for local events, which directly supports the social welfare of the area.
• Health and Safety: The property is located within a 10-year Wellhead Protection Area. Industrial uses permitted under the current zoning often involve activities or materials that pose a higher risk of groundwater contamination. By zoning to a commercial use (community meeting area), the potential for hazardous discharge is significantly reduced, thereby better protecting the public drinking water supply and public health.
• Applicant Interest: The amendment allows the applicant to put a disused building back into productive service in a manner that is economically viable and compatible with the neighborhood's current character.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

Zone Change for 100 year old building, recently renovated, to be used for public meetings.

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): N/A
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: Warehouse
   South: Ware house
   East: Post office/PUD Park
   West: Gas Station
4. What is the current use of the property? Storage
5. Sanitation Disposal: ☐ N/A ☑ Septic Permit ☐ Sewer District: _____
6. Water Source: ☐ N/A ☐ Single Private Well ☐ Shared Private Well ☐ Group B
   ☑ Public Water Supplier: Chelan PUD
7. Irrigation Water:
   ☑ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: 7 School District: Chelan
9. Power Service: Chelan PUD
10. Are there critical areas or critical area buffers on the property?
    ☐ Airport Overlay: N/A
    ☐ Aquifer Recharge Area (see attached) N/A
    ☐ Floodplain / Floodway N/A

    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☐ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☐ Habitat/Riparian Area, protected species/area: _____
    ☐ Streams / Waterbodies: _____ ☐ Shoreline Environment Designation: _____
    ☐ Drainage or Seasonal Stream: _____ ☐ Wetland, if so what category: _____
    ☐ Cultural or Archeological: _____
11. Will landfill be required? ☑ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    N/A
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:
No new construction'

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☒ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

☑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.

☑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).

☑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.

☑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.

☑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines. N/A, none

☑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- [x] Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- [x] Label the name and width of roads bordering the property and indicate whether they are public or private.
- [x] Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- [x] Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- [x] Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- [x] Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- [x] Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel. None except water
- [x] Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- [x] If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- [x] If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- [x] If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

7. Chelan County is hereby given consent to enter the property(ies) listed above.

8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

10. I certify that this application has been made with the consent of the lawful property owner(s).

11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

Attachment 3 of 4 to Sherer ltr of January 7, 2026

COMPREHENSIVE PLAN AMENDMENT

Applicant: Mike Sherer

Property Address: 85 Chestnut St, Chelan Falls, WA 98817

Subject: Request for Map Amendment and Rezone from Rural Industrial to Rural Commercial

Re: CCC 14.14.050

(i) **Proposal and Rationale**

Proposed Change:

The applicant proposes a Site-Specific Comprehensive Plan Map Amendment and concurrent Zone Change for the property located at 85 Chestnut St, Chelan Falls (the "Subject Property"). The request is to amend the Chelan County Comprehensive Plan Map designation from Rural Industrial (RI) to Rural Commercial (RC) and concurrently amend the Official Zoning
Map to reflect this change.

Reason for Change:

The Subject Property contains a pre-existing warehouse structure that has remained vacant and unused under its current industrial designation. The applicant intends to restore and repurpose this existing footprint to serve as a community meeting area. The current Rural Industrial zoning restricts the property to heavy intensity uses that do not align with the applicant's community-oriented vision. Re-zoning to Rural Commercial will allow for the adaptive reuse of the building, transforming a blighted, vacant industrial site into a vibrant community asset while preserving the rural character of Chelan Falls.

(ii) **Consistency with the Growth Management Act (GMA)**

The proposed amendment aligns with the goals of the Washington State Growth ManagementAct (RCW 36.70A.020) in the following ways:

- Goal 1 (Urban Growth) & Goal 2 (Reduce Sprawl): The project focuses development on a site with an existing structure rather than developing raw land. By re-purposing a standing warehouse, the proposal promotes infill and prevents low-density sprawl into undeveloped areas.
- Goal 5 (Economic Development): The amendment fosters economic vitality in the rural community of Chelan Falls by revitalizing a dormant commercial property and permitting a use (community meeting area) that serves local residents.
- Goal 12 (Public Facilities): The Subject Property is already served by pre-existing septic and water connections and possesses a valid septic permit. Development will occur where adequate public facilities already exist, without requiring new, costly extensions of services.
- Goal 13 (Historic Preservation): The proposal involves the restoration of an existing building, helping to maintain the historic footprint and character of the community rather than demolition and new construction.

(iii) **Compliance with Comprehensive Plan Goals and Policies**

The amendment supports specific policies within the Chelan County Comprehensive Plan (2017-2037):

- Policy LU 1.5 (Infill Development): The project fulfills the county's goal to "encourage infill of vacant and underdeveloped land in existing residential areas... or rural

communities." This proposal activates a vacant warehouse in the established Chelan Falls community.
• Policy RE 6.1 (Rural Services): The requested Rural Commercial designation allows for services that support the rural population. A community meeting area provides a necessary social and civic gathering space appropriate for a Local Area of More Intense Rural Development (LAMIRD).
• Policy CF 2.5 (Infrastructure Efficiency): The proposal maximizes the use of existing capital facilities (water/septic) rather than burdening the county with demands for new infrastructure.

(iv) **Compliance with Land Use Designation & Siting Criteria**
The Rural Commercial designation is the most appropriate classification for the Subject Property. The site is located within Chelan Falls, an area characterized by a mix of rural uses.
The Chelan County Code allows for Rural Commercial uses in areas established as LAMIRDs to
provide goods and services to the surrounding rural area.
• Scale and Intensity: The proposed use (community meeting area) is consistent with the rural scale. It does not introduce high-density housing or urban-scale retail but provides a specific, low-intensity service.
• Compatibility: The site is historically developed. Transitioning from "Industrial" to "Commercial" reduces the potential intensity of the site, making it more compatible with the rural lifestyle than a potential heavy manufacturing user.

(v) **Consistency with Capital Facility and Transportation Elements**
• Capital Facilities: The site has verified pre-existing water and septic connections, including a valid septic permit. No new capital improvements or public expenditures are required to serve the proposed use.
• Transportation: The property is located on Chestnut Street, which was previously designed to accommodate industrial traffic. The proposed downzone from Rural Industrial to Rural Commercial will likely result in a reduction of heavy truck traffic and industrial hauling, thereby reducing wear and tear on Chestnut Street and preserving the County's transportation infrastructure.

(vi) **Surrounding Land Uses and Impacts**
• Context: The property is situated in the Chelan Falls area, surrounded by a mix of rural, residential, and agricultural uses.
• Impact Analysis: The change will have a positive impact on surrounding land uses. An unused industrial warehouse can become a blight or safety hazard. Restoring it as a community meeting area improves the visual aesthetics of the neighborhood. Furthermore, removing the "Industrial" designation eliminates the possibility of future noise, dust, or odor-generating industrial activities, ensuring the site remains a "good neighbor" to nearby properties.

(vii) **Effect on Resource Lands and Critical Areas**
• Critical Areas (Aquifer Recharge): The subject property is located within a 10-year Wellhead Protection Area.
• Impact Mitigation: The rezone from Rural Industrial to Rural Commercial is beneficial for

the protection of this critical area. Industrial zones typically permit uses involving hazardous materials, heavy machinery, and chemical storage that pose higher risks to groundwater. A community meeting area (Commercial) presents a significantly lower risk of contamination.
• Resource Lands: The project utilizes an existing developed footprint (Land Use Code 82/Warehouse) and does not encroach upon or convert active agricultural land or designated forest land of long-term commercial significance.

(viii) **Effect on Land Supply**
• Impact on Industrial Supply: The removal of this single parcel from the Rural Industrial inventory will have a negligible effect on the County's overall supply of industrial land. The site is currently dormant and has not contributed to the industrial base for years.
• Impact on Commercial Supply: The amendment positively affects the supply of Rural Commercial land by activating an existing structure in a developed area (Chelan Falls). This helps accommodate projected demand for rural services and community gathering spaces without requiring the conversion of new, undeveloped land.

(ix) **Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare.**
The proposed amendment serves the broader public interest by revitalizing a vacant structure in the heart of Chelan Falls and converting it into a community asset.
• Public Welfare: Transitioning the property from "Rural Industrial" to "Rural Commercial" allows for the creation of a community meeting area. This provides a much-needed social infrastructure for the residents of Chelan Falls, fostering community connection and providing a space for local events, which directly supports the social welfare of the area.
• Health and Safety: The property is located within a 10-year Wellhead Protection Area. Industrial uses permitted under the current zoning often involve activities or materials that pose a higher risk of groundwater contamination. By downzoning to a commercial use (community meeting area), the potential for hazardous discharge is significantly reduced, thereby better protecting the public drinking water supply and public health.
• Applicant Interest: The amendment allows the applicant to put a disused building back into productive service in a manner that is economically viable and compatible with the neighborhood's current character.

SEPA[1] Environmental Checklist

Attachment 4 to Sherer Ltr of January 7, 2026

Mike Sherer
190 Quetilquasoon Rd.
Manson, WA 98831-9666

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

A. Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**
   Zoning Change for 85 Chestnut St Chelan Falls WA 98817
2. **Name of applicant:**
   Wesley M. Sherer / Heart for Homes LLC
3. **Address and phone number of applicant and contact person:**
   Contact – Same as 2. above
   190 N. Queen Quasson Rd. Manson WA 98831
4. **Date checklist prepared:**
   November 15, 2025
5. **Agency requesting checklist:**
   Chelan County Development
6. **Proposed timing of schedule (including phasing, if applicable):**
   ASAP
7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**
   No
8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**
   Unknown
9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**
   No
10. **List any government approvals or permits that will be needed for your proposal, if known.**
    Zoning Change
11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)** Change zoning for 85 Chestnut St. Chelan Falls WA 98817 from Rural Industrial (RI) to Rural Commercial (RC)
12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section,**
    85 Chestnut St. Chelan Falls WA 98817

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. General description of the site:

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. What is the steepest slope on the site (approximate percent slope)?

5%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Sand, no soil removal

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

N/A

f. Could erosion occur because of clearing, construction, or use? If so, generally describe.

N/A

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

25% already in place (100 year old warehouse)

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

None

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

None

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**

N/A

3. Water

Find help answering water questions[5]

a. **Surface:**

Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

No

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

No

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

N/A

---

[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water

[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

No

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

No

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

No

b. **Ground:**
Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

No

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals...; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

Domestic Sewage to new pressurized system for intermittent use 10 x 30 drainfield.

c. **Water Runoff (including stormwater):**

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

No disposal of runoff for 100 years.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

No waste materials other than domestic sewage (New approved system)

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

No

d. **Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:**

None

4. Plants

Find help answering plants questions

a. **Check the types of vegetation found on the site:**

- ☐ **deciduous tree: alder, maple, aspen, other**
- ☐ **evergreen tree: fir, cedar, pine, other**
- ☐ **shrubs**
- ☐ **grass**
- ☐ **pasture**
- ☐ **crop or grain**
- ☐ **orchards, vineyards, or other permanent crops.**
- ☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**
- ☐ **water plants: water lily, eelgrass, milfoil, other**
- ☐ **other types of vegetation**

b. **What kind and amount of vegetation will be removed or altered?**

None

c. **List threatened and endangered species known to be on or near the site.**

Unknown

d. **Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.**

None

e. **List all noxious weeds and invasive species known to be on or near the site.**

None

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.** Occasional neighborhood dogs

Examples include:

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. List any threatened and endangered species known to be on or near the site.

None

c. Is the site part of a migration route? If so, explain.

Unknown

d. Proposed measures to preserve or enhance wildlife, if any.

None

e. List any invasive animal species known to be on or near the site.

Unknown

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. Electric for heating and lights

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe. No

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.

None

7. Environmental health

Health Find help with answering environmental health questions[10]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.

N/A

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou

[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

1. **Describe any known or possible contamination at the site from present or past uses.**

   Unknown

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

   N/A

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

   None planned

4. **Describe special emergency services that might be required.**

   Unknown

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None

b. **Noise**

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   Traffic, light.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   None

3. **Proposed measures to reduce or control noise impacts, if any:**

   Keep doors shut.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

   Rural Industrial (RI) currently. Adjacent properties are mixed (RI) and Rural Commercial (RC)

b. **Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have**

   N/A

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

1. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?

No

c. Describe any structures on the site.

100 year old Warehouse, 10,000 ft² on two floors

d. Will any structures be demolished? If so, what?

No

e. What is the current zoning classification of the site?

Rural Industrial (RI)

Answer these

f. What is the current comprehensive plan designation of the site?

Rural Public Lands and Facilities

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Unknown ~~Yes; Wellhead Protection Area?~~

i. Approximately how many people would reside or work in the completed project?

5

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any.

N/A

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.

Chapter 11.84 Distillery Chart

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

N/A

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

N/A

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

N/A

c. **Proposed measures to reduce or control housing impacts, if any:**

N/A

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

30 ft. Building material masonary block

b. **What views in the immediate vicinity would be altered or obstructed?**

None

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

None

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

None except deck lights after dark.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

No

c. **What existing off-site sources of light or glare may affect your proposal?**

None

d. **Proposed measures to reduce or control light and glare impacts, if any:**

None

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?** 2 PUD Parks within 1 block.

b. **Would the proposed project displace any existing recreational uses? If so, describe.**

No

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**

~~None~~ N/A

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

No

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.**

None Known

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.**

N/A

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.**

N/A

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**

See Vicinity Map

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?** LINK transit is on call

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**

No

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**

Property abuts railroad.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

~~Guess: 10 trips/day~~ Unknown

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

No

g. **Proposed measures to reduce or control transportation impacts, if any:**

None

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

No

---

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

   N/A

   - **Proposed measures to avoid or reduce such increases are:**

     None

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

   N/A

   - **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

     None

3. **How would the proposal be likely to deplete energy or natural resources?**

   N/A

   - **Proposed measures to protect or conserve energy and natural resources are:**

     None

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

   N/A

   - **Proposed measures to protect such resources or to avoid or reduce impacts are:**

     None

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

   N/A

   - **Proposed measures to avoid or reduce shoreline and land use impacts are:**

     None

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

   N/A

   - **Proposed measures to reduce or respond to such demand(s) are:**

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

Subject: Notice of Application for CPA 26-007 Heart for Homes LLC - Chelan County Dept. of Community Development
Attachments: CPA 26-007 NOA.pdf; CPA 26-007 - Affidavit of Posting NOA.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Heart for Homes LLC's property, File# CPA 26-007. This notice should be posted on the subject property by February 19th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days, starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.
Thank you,

Jessica Thompson

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impacts of these proposals.**

CPA 26-007 Heart for Homes - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Industrial (RI) to Rural Commercial (RC). 85 Chestnut St., Chelan Falls, WA 98817 also known as Assessor's Parcel No.: 27-23-32-515-096.

CPA 26-026 G&B Properties East LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 acres (RR5) to Rural Commercial (RC). 18625 Beaver Valley Road, Plain, WA 98826 also known as Assessor's Parcel No.: 26-17-13-720-007.

On February 19, 2026, these applications were noticed to the public, and no action will be taken on these projects until the agency comment period ends March 5, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

CHELAN COUNTY
DEPARTMENT OF COMMUNITY DEVELOPMENT
316 WASHINGTON STREET, SUITE 301
WENATCHEE, WA 98801
(509) 667-6225

TO: Chelan County Board of County Commissioners
FROM: Chelan County Community Development
HEARING DATE: November 10, 2026
FILE NUMBER: CPA 26-026 G&B Properties East, LLC

RECOMMENDED MOTION

The Chelan County Planning Commission, at their duly advertised public hearing on September 23, 2026 made a motion to recommend approval (Attachment 1) of CPA 26-026 G&B Properties East, LLC requested comprehensive plan map amendment from Rural Residential/Resource 5 (RR5) to Rural Commercial (RC).

GENERAL INFORMATION

Applicant	G&B Properties East, LLC
Planning Commission Notice of Hearing Published	September 12, 2026
Planning Commission Hearing	September 23, 2026
Board of County Commissioners Hearing	November 10, 2026
60-day State agency review	February 19, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance was issued under WAC 107-11-340 on April 30, 2026. The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The decision was made after a review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

The Washington State Department of Commerce has expressed significant concerns regarding the proposed amendment. State comments indicate that if approved, the change in designation from Rural Residential/Resource 5 (RR5) to Rural Commercial (RC) would be in clear violation of the Growth Management Act in that this action would represent an expansion of a Local Area of More Intensive Development (LAMIRD).

The Chelan Douglas Health District has no objections to approval the amendment.

The Chelan County Fire Marshal's office has indicated that any future development of the site will be required to meet all current fire regulations.

The Washington State Department of Health provided comments regarding future utility developments that may be necessary for new commercial development, including the possibility of a new water system being required and adding a new wellhead protection area, of which many already exist in the immediate vicinity.

Public Comment:
Comments were received from a member of the public expressing no objection to the re-designation of the site, however the commenter did have concerns regarding the extent of the rezone and indicated they felt the area should be reduced and limited to the already developed portion of the site.

60-Day Notice
Sent to Department of Commerce February 19, 2026.

PROJECT DESCRIPTION – CPA 26-026 G&B Properties East, LLC
The application is a request for a comprehensive plan map amendment in order to re-designate the 4.94-acre parcel from Rural Residential/Resource 5 (RR5) to Rural Commercial (RC). The property is located at 18625 Beaver Valley Road in the Plain community, and is developed with several pole buildings and shed cover/carport structures. The Assessor's Parcel Number for the property is 26-17-13-720-007.

COMPREHENSIVE PLAN

Chelan County conducts an annual review of development regulation text amendments for compliance with the adopted Comprehensive Plan. The Comprehensive Plan represents the long-term vision for future land uses and development. For the county-initiated text amendments, the merits of the requested change must be demonstrated as being consistent with adopted goals and policies.
The following Comprehensive Plan goals and policies are relevant to the proposal:

Policy LU 6.1: Strengthen existing commercial centers rather than permitting the aimless spread of new development.

Policy LU 6.3: Promote employment opportunities for rural residents by permitting isolated cottage industries and small-scale businesses where public services and public facilities would be limited to those necessary to serve these uses and be provided in a manner that does not permit low density sprawl.

Policy LU 6.4: Take advantage of Chelan County's rural character and natural setting by promoting small scale, non-residential, recreation and tourist uses, including associated commercial facilities in rural areas.

Policy LU 7.2: Implement regulations to ensure recreation or tourist uses and associated commercial facilities in rural areas are compatible with surrounding land uses.

Policy LU 7.7: Support placement of commercial activities and land use designations to meet the economic needs of the County and provide for a range of commercial opportunities that support diversification of the area economy.

Review Criteria
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 1) Urban Growth, 2) Reduce Sprawl, 3) Transportation, and 5) Economic Development. The Growth Management Act (GMA) and the Chelan County Comprehensive plan allows for the development of small-scale recreation and tourist oriented commercial uses. Rural Commercial is an implementing designation of a Type II LAMIRD, which is described as an existing tourist or recreational commercial uses as well as some new commercial tourist uses in a rural location. Although the applicant has indicated intent to develop the site into new commercial uses that would serve the large number of visitors to the Plain community, uses on the site have primarily been agricultural in nature and not commercial. The intent of a Type II LAMIRD is to recognize existing areas of recreation and tourist oriented commercial services.

Conclusion: The Plain community is served by a rural commercial center directly across Beaver Valley Road from the subject property which includes a hardware store, grocery store, mini-storage, lodge which includes both typical lodging rooms with stand-alone housing also available, and a full-service restaurant. Expanding the commercial center would not be consistent with the goals of the Growth Management Act and applicable county-wide planning policies.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: Existing comprehensive plan goals and policies encourage the development of small-scale recreational, tourist and resort use in areas where these uses already exist. Plain is a popular regional draw in the winter for a large cross-country ski trail system sponsored and developed by the owners adjacent to the north of the site. These same owners also own and operate the Mountain Springs Lodge which attracts visitors to the area in both summer and winter, increasing recreation and tourism traffic in the community. The applicant asserts that these factors have resulted in a need for additional commercial uses to serve the tourist population.

Conclusion: The proposal would not be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The Rural Commercial designation is intended to be located in areas with existing commercial or higher intensity residential uses in addition to other rural development. The site

proposed for amendment has been used for agriculture production storage and does not include existing commercial uses.

Conclusion: The proposed amendment would not comply with the comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: Access to the site is via Beaver Valley Road. The designation of the site would provide an opportunity for services to support the large number of visitors to the area both in summer and winter.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The area west of the subject property is zoned Rural Commercial and is developed with a number of commercial, agricultural, recreational and low-density residential uses.

Conclusion: The proposed amendment would not adversely affect the surrounding land uses.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The site, although used for agriculture use, is not designated for Commercial Agriculture. If approved, the site would no longer be available for agricultural use.

Conclusion: The proposed amendment would not have the potential to adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The site proposed for designation is approximately 5 acres and is located in a relatively remote area in an identified cohesive community. Earlier development has resulted in a large number of small, recreational lots that have evolved into more year-round housing and rental properties increasing the permanent population and visitors to the area.

Conclusion: The proposed amendment would not have an adverse impact on projected growth.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment would provide opportunities for additional services to both the tourists and year-round residents of the community. The applicant asserts existing services are strained by the large number of visitors to the area who cross-country ski in the winter and enjoy water sports, camping and large multi-day festivals in the summer.

Conclusion: The proposed amendment would serve the interest of both the applicant and general public including health, safety and welfare.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on February 19,2026, submittal ID 2026-S-11534 (Attachment 3), pursuant to RCW 36.70A.106.
6. A request for a Comprehensive Plan Map Amendment was submitted by Ryan Walker (agent) on behalf of G&B Properties East, LLC to change the land use designation for the subject property from Rural Residential/Resource 5 to Rural Commercial (RC). The subject property is located at 18625 Beaver Valley Rd., Plain, WA 98826 and further identified by Assessor Parcel No: 26-17-13-720-007.
    a. The location and characteristics are not consistent with Chelan County Comprehensive Plan designation for Rural Commercial (RC), as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would not be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would not comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.

7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

2026 Comprehensive Plan Map Amendment
Staff Report

TO:	Chelan County Planning Commission
FROM:	Chelan County Community Development
HEARING DATE:	September 23, 2026
FILE NUMBER:	CPA 26-026 G&B Properties East, LLC

RECOMMENDED MOTION

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

A. Re-designation of the site from Rural Residential/Resource (RR5) to Rural Commercial (RC) would not comply with applicable Chelan County goals and policies for LAMIRD's pursuant to the findings of fact and conclusions of law cited below.

GENERAL INFORMATION

Planning Commission Workshop	August 26, 2026
Notice of Application to Surrounding Properties	February 19, 2026
Planning Commission Notice of Hearing Published	September 12, 2026
Planning Commission Hearing	September 23, 2026
60-day State agency review	February 19, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance (DNS) was issued under WAC 197-11-340(2) for CPA 26-007 on April 30, 2026 (Attachment 1). The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030 (2)(c). The decision was made after review of a completed environmental checklist and other information on file with the lead agency.

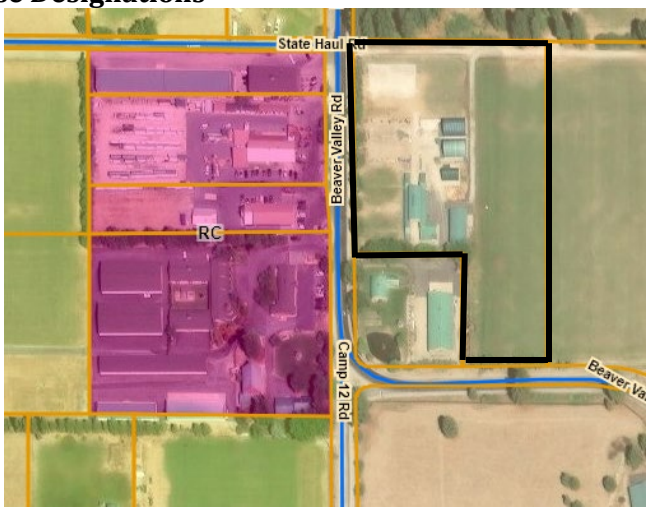
Agency Comments:

The Washington State Department of Commerce has expressed significant concerns regarding the proposed amendment. State comments indicate that if approved, the change in designation from Rural Residential/Resource 5 (RR5) to Rural Commercial (RC) would be in clear violation of the Growth Management Act in that this action would represent an expansion of a Local Area of More Intensive Development (LAMIRD).

The Chelan Douglas Health District has no objections to approval the amendment.

The Chelan County Fire Marshal's office has indicated that any future development of the site will be required to meet all current fire regulations.

The Washington State Department of Health provided comments regarding future utility developments that may be necessary for new commercial development, including the possibility of a new water system being required and adding a new wellhead protection area, of which many already exist in the immediate vicinity.



Public Comment:

Comments were received from a member of the public expressing no objection to the re-designation of the site, however the commenter did have concerns regarding the extent of the rezone and indicated they felt the area should be reduced and limited to the already developed portion of the site.

PROJECT DESCRIPTION – CPA 26-026 G&B Properties East LLC

Proposal: The application is a request for a comprehensive plan map amendment in order to re-designate the 4.94-acre parcel from Rural Residential/Resource 5 (RR5) to Rural Commercial (RC). The property is located at 18625 Beaver Valley Road in the Plain community, and is developed with several pole buildings and shed cover/carport structures. The Assessor's Parcel Number for the property is 26-17-13-720-007.

Chelan County Land Use Designations

Density: The existing Rural Residential/Resource 5 (RR5) zoning allows one dwelling unit per five acres. The proposed Rural Commercial (RC) designation would allow the development of a variety of uses. Residential development in the RC zoning is limited to above the ground floor.

Comprehensive Plan
Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan policies are relevant to the proposed request:

Policy LU 6.1: Strengthen existing commercial centers rather than permitting the aimless spread of new development.

Policy LU 6.3: Promote employment opportunities for rural residents by permitting isolated cottage industries and small-scale businesses where public services and public facilities would be limited to those necessary to serve these uses and be provided in a manner that does not permit low density sprawl.

Policy LU 6.4: Take advantage of Chelan County's rural character and natural setting by promoting small scale, non-residential, recreation and tourist uses, including associated commercial facilities in rural areas.

Policy LU 7.2: Implement regulations to ensure recreation or tourist uses and associated commercial facilities in rural areas are compatible with surrounding land uses.

Policy LU 7.7: Support placement of commercial activities and land use designations to meet the economic needs of the County and provide for a range of commercial opportunities that support diversification of the area economy.

Review Criteria

The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 1) Urban Growth, 2) Reduce Sprawl, 3) Transportation, and 5) Economic Development. The Growth Management Act (GMA) and the Chelan County Comprehensive plan allows for the development of small-scale recreation and tourist oriented commercial uses. Rural Commercial is an implementing designation of a Type II LAMIRD, which is described as an existing tourist or recreational commercial uses as well as some new commercial tourist uses in a rural location. Although the applicant has indicated intent to develop the site into new commercial uses that would serve the large number of visitors to the Plain community, uses on the site have primarily been agricultural in nature and not commercial. The intent of a Type II LAMIRD is to recognize existing areas of recreation and tourist oriented commercial services.

Conclusion: The Plain community is served by a rural commercial center directly across Beaver Valley Road from the subject property which includes a hardware store, grocery store, mini-storage, lodge which includes both typical lodging rooms with stand-alone housing also available, and a full-service restaurant. Expanding the commercial center would not be consistent with the goals of the Growth Management Act and applicable county-wide planning policies.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: Existing comprehensive plan goals and policies encourage the development of small-scale recreational, tourist and resort use in areas where these uses already exist. Plain is a popular regional draw in the winter for a large cross-country ski trail system sponsored and developed by the owners adjacent to the north of the site. These same owners also own and operate the Mountain Springs Lodge which attracts visitors to the area in both summer and winter,

increasing recreation and tourism traffic in the community. The applicant asserts that these factors have resulted in a need for additional commercial uses to serve the tourist population.

Conclusion: The proposal would not be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The Rural Commercial designation is intended to be located in areas with existing commercial or higher intensity residential uses in addition to other rural development. The site proposed for amendment has been used for agriculture production storage and does not include existing commercial uses.

Conclusion: The proposed amendment would not comply with the comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: Access to the site is via Beaver Valley Road. The designation of the site would provide an opportunity for services to support the large number of visitors to the area both in summer and winter.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The area west of the subject property is zoned Rural Commercial and is developed with a number of commercial, agricultural, recreational and low-density residential uses.

Conclusion: The proposed amendment would not adversely affect the surrounding land uses.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The site, although used for agriculture use, is not designated for Commercial Agriculture. If approved, the site would no longer be available for agricultural use.

Conclusion: The proposed amendment would not have the potential to adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The site proposed for designation is approximately 5 acres and is located in a relatively remote area in an identified cohesive community. Earlier development has resulted in a large number of small, recreational lots that have evolved into more year-round housing and rental properties increasing the permanent population and visitors to the area.

Conclusion: The proposed amendment would not have an adverse impact on projected growth.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment would provide opportunities for additional services to both the tourists and year-round residents of the community. The applicant asserts existing services are strained by the large number of visitors to the area who cross-country ski in the winter and enjoy water sports, camping and large multi-day festivals in the summer.

Conclusion: The proposed amendment would serve the interest of both the applicant and general public including health, safety and welfare.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on February 19,2026, submittal ID 2026-S-11534 (Attachment 3), pursuant to RCW 36.70A.106.
6. A request for a Comprehensive Plan Map Amendment was submitted by Ryan Walker (agent) on behalf of G&B Properties East, LLC to change the land use designation for the subject property from Rural Residential/Resource 5 to Rural Commercial (RC). The subject property is located at 18625 Beaver Valley Rd., Plain, WA 98826 and further identified by Assessor Parcel No: 26-17-13-720-007.
   a. The location and characteristics are not consistent with Chelan County Comprehensive Plan designation for Rural Commercial (RC), as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would not be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would not comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

STAFF Finding

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

The Comprehensive Plan Amendment to change the subject property's land use designation from Rural Residential/Resource to Rural Commercial (RC), given file number CPA 2026-026, based upon the findings of fact and conclusions of law contained would not comply with relevant with adopted county goals and policies.

RE: G & B Properties East LLC (CPA 26-006) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 5 acres (RR5) to Rural Commercial (RC). The subject property is located at 18625 Beaver Valley Rd., Plain WA 98826 (county tax parcel: 261713720007)

As proposed, I have no objections to further approval of this project.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

Re: Proposed Changes to Chelan County's 60-day Notice of Intent to Adopt Amendment--2026-S-11534

Dear Ms. Walter:

Thank you for the opportunity to comment on the proposed changes to Chelan County's comprehensive plan. We appreciate your coordination with our agency as you work to achieve the community's vision consistent with the goals and requirements of the Growth Management Act (GMA). We encourage you and your community to consider the following as you present these amendments to your appointed and elected officials.

The Department of Commerce has significant concerns about this amendment as proposed, which, if adopted, is a clear violation of Washington State's Growth Management Act (GMA). This amendment proposes to change the land use designation for 4.94 acres at 18625 Beaver Valley Road in Plain, WA from Rural Residential Resource 5 (RR5) to Rural Commercial (RC).

The GMA was amended in 1997 to provide flexibility in comprehensive plans for economic development while maintaining rural character. The amendments allowed counties to identify LAMIRDs, which are areas of higher intensity commercial, industrial, residential, or mixed-use development.[1] LAMIRDs are characterized as shoreline development, villages, hamlets, rural activity centers, or crossroads developments.

The GMA identifies three types of LAMIRDS. Type I contains existing commercial, industrial, residential, and mixed uses as described in RCW 36.70A.070(5)(d). GMA laws pertaining to LAMIRDS address the need to reduce low-density urban sprawl in rural areas, a main goal of the GMA.

When designating LAMIRDs, counties must "adopt measures to minimize and contain the existing areas or uses of areas of more intensive rural development."[2] The law is very specific

[1] RCW 36.70A.070(5)(d)
[2] RCW 36.70A.070(5)(d)(iv)

in limiting LAMIRDs to the existing development patterns on the landscape **as they existed on July 1, 1990**.[3] This is primarily determined by the built environment at that time. A core function of LAMIRDS is a logical outer boundary that does not allow for expansion of low-density rural sprawl.

In addition, these rules are clearly stated in the Chelan County Comprehensive Plan Land Use Chapter, Section IV, Designations/Siting Criteria – Rural, E. Rural Commercial (RC):

> "This designation is considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act where it is applied to existing mixed use areas."
>
> "Purpose: These areas must be clearly identifiable as rural commercial developments, mixed use areas or intensely developed residential developments where a logical boundary can be delineated and set by the built environment. **Such a boundary shall not permit or encourage new rural commercial development outside of these boundaries."**

And Section V. Limited Areas of More Intensive Rural Development (LAMIRD), Intent of the Chelan Comprehensive Plan:

> "LAMIRDS are not intended by the Legislature to be mini-UGAs, suburbs or areas for significant development. LAMIRDS are rural; they are contained and compact, and, with minor exceptions, were built before July 1, 1990."

The other two types of LAMIRDS) can be created new. Type II allows for the creation of **small-scale recreational or tourist uses.**[4] Type III allows development of isolated cottage industries and isolated small-scale businesses that are **not** principally designed to serve the existing and projected rural population.[5]

To reiterate, new Type I LAMIRDS are not allowed under the GMA, and this comprehensive plan amendment, if adopted, would clearly violate rural planning provisions in 36.70A.070(5) as well as the Chelan County Comprehensive Plan. The Washington State Department of Commerce, Growth Management Services, therefore advises Chelan County to **deny** this comprehensive plan amendment.

Effective Date

The effective date for decisions to create or expand a limited area of more intensive rural development, according to RCW 36.70A.067, must not go into effect until 60 days after notice of the decision has been published, or in cases where a petition has been filed with the hearings board, when the case has been resolved. The Dept. of Commerce interprets RCW 36.70A.067 as publication in the newspaper. Please see RCW 65.15.160, Publication of Ordinances for more information.

Thank you again for the opportunity to comment. If you have any questions or need technical assistance, please contact me at joanne.wright@commerce.wa.gov or (509) 601-0385.

Good afternoon,

Commerce's attached response to this proposed rezone under 60-day notice (RCW 36.70A.106) brought this project to my attention. It doesn't appear that we received the SEPA consultation notice in our agency mailbox, so I'm providing you with information related to the proposal at a later stage than the requested March deadline.

I note that Commerce has expressed significant concerns about this proposal. In case it ultimately moves ahead, please be aware of potential utilities improvements that would be associated with future development. The SEPA checklist for the current proposal notes only a single-party well & on-site (septic) system serving the site. *Not* in terms of the rezoning proposal itself, but if future commercial use(s) are developed on the site, it seems probable this subsequent development would trigger a new Group A public water system & potentially improvements to the existing septic system. WAC 246-290-020 provides information about public system thresholds. Any new/additional water rights for a new system would need to be allocated by Ecology.

There are already several Group A & B sources in the Plain area whose wellhead protection areas (WHPA) are shown below. The creation of an additional system would, in turn, apply another WHPA overlapping others in the vicinity. Because of this, it appears that such development would also require compliance with Chapter 11.82 CCC.

Source: https://experience.arcgis.com/experience/9dc3fd45206d450f828ebd7ed9cdf7be

If this project is approved and proceeds into commercial development, we'd be happy to provide more targeted consultation on necessary improvements. Thank you for your consideration.

Date: 2/18/26
Address: 85 Chestnut St. Parcel # 272332515096
Type: CPA 26-007

CODE REQUIREMENTS

The proposal/project shall conform to all applicable requirements of the International Fire Code and Chelan County Code administered by the Chelan County Fire Marshal.

FIRE FLOW FOR BUILDINGS

The minimum fire flow and flow duration requirements for one and two-family dwellings having a fire-flow calculation area which does not exceed three thousand six hundred square feet shall be seven hundred fifty gallons per minute. Fire flow and flow duration for dwellings having a fire-flow calculation area in excess of three thousand six hundred square feet shall not be less than that specified in Table B105.1(1) of the IFC, except that reduction in required fire flow of fifty percent, as approved, is allowed when the building is provided with an approved automatic sprinkler system.

FIRE FLOW MODIFICATIONS

The Fire Marshal may modify Fire-flow requirements downward by applying fire protection credits for isolated buildings or a group of buildings in rural areas or small communities where the development of full fire-flow requirements is impractical. Applicant is encouraged to contact this office to ascertain how the attached fire protection credits options apply to their project. A note on the face of the final short plat shall state: **"Without the installation of a fire hydrant capable of delivering the required fire flow and within the required distance to the lots in question, the applicant may choose one or any combination of alternatives using the installation of automatic fire sprinklers and/or fire protection credits as approved by the Fire Marshal."**

FIRE HYDRANTS

Fire hydrants serving single family or duplex dwellings shall have a maximum lateral spacing of 600 feet with no lot or parcel in excess of 300 feet from a fire hydrant when serving lots less than 43,560 square feet (one acre).

Fire hydrants serving single family or duplex dwellings shall have a maximum lateral spacing of 1000 feet with no lot or parcel in excess of 500 feet from a fire hydrant when serving lots greater than 43,560 square feet (one acre).

All fire hydrants shall be accessible to the fire department by roadways or accesses meeting the requirements of Chapter 15.30, Road Standards, and meet the requirements of 3.04.080 International Fire Code amended, Section 507.5.7, Fire Hydrant Installation and maintenance requirements.

BUILDINGS IN THE WILDLAND URBAN INTERFACE

Class A roofing/noncombustible roof covering, as defined in the International Building Code, shall be used in all areas of Chelan County. A note on the face of the final mylar shall state that **"All buildings that require a building permit within this short plat shall have Class A roofing materials."**

ADDRESS SIGNS

A note on the face of the final mylar shall state that **"New homes shall have approved address numbers, building numbers or approved building identification placed in a position that is plainly legible and visible from the street or road fronting the property."** The design of the proposed sign shall be submitted to the Fire District and/or Fire Marshal for approval prior to installation.

WILDLAND URBAN INTERFACE

A note on the face of the final mylar shall state that **"All buildings within this plat that require a building permit shall comply with the provisions of the Wildland-Urban Interface Code as adopted by Chelan County at the time the building permit is submitted".**

Subject: Public comment regarding CPA 26-026, Chelan County Comprehensive Map amendment application for Tax Parcel #261713720007

The subject Comp Plan amendment requests rezoning Tax Parcel #261713720007 from the existing RR5 designation to RC. The application discusses in great detail the appropriateness of the rezone due to this parcel's adjacency to the existing RC zoning across the "main street" of Plain. I support the RC designation for a portion of the parcel, the already heavily developed portion adjacent to the "main street" area, as it seems to fit the rezone criteria.

Criteria for RC rezone, taken from Chelan County Compressive Plan, Chapter 3.VII.E on Page 59:

E. RURAL COMMERCIAL (RC):

(in part, emphasis added)

These areas must be clearly identifiable as existing rural commercial developments, mixed use areas or intensely developed residential developments; *where a logical boundary can be delineated and set by the built environment*. Such a boundary shall not permit or encourage new rural commercial development outside of these boundaries.

The remaining portion of the parcel is undeveloped, and also abuts Beaver Valley Road after it turns from running north-south, to east-west. The character of the road changes from "main street" back to a "country road." This portion of the road does NOT support commercial development because it becomes sloped and curvy, having limited sight distances, and increased vehicle speeds. This portion of the road can become quite slippery and hazardous; we observe cars in the ditch throughout the winter. It would be hazardous to locate any driveways here.

Recently, in November of 2025, the subject property (Tax Parcel #261713720007) underwent a Boundary Line Adjustment (BLA), apparently in preparation for this rezoning application. While the new lot lines meet the criteria for a BLA, they do NOT meet the criteria for a re-zone to RC. As shown on the attached maps, the new property boundary lines do NOT provide a "logical boundary" for a zoning map change, as it greatly exceeds the built environment, and would encourage new commercial development in a current pasture immediately adjacent to existing residential homes. The boundary also seems illogical, in that commercial zoning would completely surround one existing residence.

I believe the rezone should only be granted if the boundary line is limited to only the existing heavily developed portion of the property, and not the entire 4.94 acre parcel. If this requires another BLA, this should not be onerous on the applicant, because they just went through this process. (It is unclear to me the rationale for the

BLA generated a parcel which is just below the RR5 minimum lot size of 5 acres, but I suspect there might be one)

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-signif icance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

Subject: Notice of Application for CPA 26-026 G&B Properties East LLC - Chelan County Dept. of Community Development
Attachments: CPA 26-026 NOA.pdf; CPA 26-026 - Affidavit of Posting NOA.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding G&B Properties East LLC's property, File# CPA 26-026. This notice should be posted on the subject property by February 19th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days, starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application, please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.
Thank you,

Jessica Thompson

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impacts of these proposals.**

CPA 26-007 Heart for Homes - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Industrial (RI) to Rural Commercial (RC). 85 Chestnut St., Chelan Falls, WA 98817 also known as Assessor's Parcel No.: 27-23-32-515-096.

CPA 26-026 G&B Properties East LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 acres (RR5) to Rural Commercial (RC). 18625 Beaver Valley Road, Plain, WA 98826 also known as Assessor's Parcel No.: 26-17-13-720-007.

On February 19, 2026, these applications were noticed to the public, and no action will be taken on these projects until the agency comment period ends March 5, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Sincerely,

Susan Dretke 2/2/26

SEPA[1] Environmental Checklist

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

[1] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/Checklist-guidance

A.Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**

   G&B Properties East LLC Comprehensive Plan Map Amendment and Rezone

2. **Name of applicant:**

   G&B Properties East LLC; Grahame Watson

3. **Address and phone number of applicant and contact person:**

   Grahame Watson; G&B Properties East LLC
   18623 Beaver Valley Road
   Plain, WA 98826
   509-670-3796

   Agent:
   Ryan Walker
   Pacific Engineering and Design, PLLC
   200 South Columbia St, Suite 300
   Wenatchee, WA 98801
   5409-630-7917
   ryanw@pacificengineering.net

4. **Date checklist prepared:**

   January 2026

5. **Agency requesting checklist:**

   Chelan County

6. **Proposed timing of schedule (including phasing, if applicable):**

   The application will follow the Chelan County process for Comprehensive Plan Map Amendments.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   Rural commercial uses such as a public market may be proposed in the future.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   Stream Typing (Pacific Engineering 2025)

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

Comprehensive Plan Map Amendment and Zoning Map Amendment.

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 4.94 acres from to Rural Residential/Resource 5 (RR 5) to Rural Commercial (RC).

The zoning and comprehensive plan designations are proposed to be changed to align the property with the rural commercial nature of Plain. The adjacent property to the west is zoned Rural Commercial, which is the zone that the subject property is proposed to be changed to.

Beaver Valley Road runs north/south between the commercial zone and the subject property. The road has become the de facto main street of Plain as the community has grown and demand for commercial uses has expanded. Because the subject property is immediately across the street from the commercial core of Plain the more appropriate zoning is for them to also be zoned commercial based on the nature of the existing development district uses and a logical outer boundary.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 18625 Beaver Valley Road in Plain, WA, within Section 13, T 26N, R 17E.W.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. General description of the site:

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. What is the steepest slope on the site (approximate percent slope)?

5%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Soil mapped for the property on the USGS soil survey website (https://websoilsurvey.nrcs.usda.gov) is Chiwawa gravelly fine sandy loam, 0-3 percent slopes (CmA); Wintoner silt loam, 0-3 percent slopes (WnA); and Wintoner silt loam, 3 to 8 percent slopes (WnB). CmA is prime farmland; WnA is prime farmland if irrigated and WnB is farmland of statewide importance.

None of the soil will be removed.

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling, excavation or grading is proposed.

f. Could erosion occur because of clearing, construction, or use? If so, generally describe.

No.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

There will be no change in the impervious surface.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any.

None.

2. Air

Find help answering air questions[4]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air

None.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None.

3. Water

Find help answering water questions[5]

a. Surface:

Find help answering surface water questions[6]

1. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

No. The DNR stream typing map shows a type N stream but it has been determined to not be present.

2. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None.

4. Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.

No.

5. Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6. Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

No.

b. Ground:

Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No.

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   No waste material will be discharged.

c. Water Runoff (including stormwater):

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   There will be no change in stormwater runoff.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None.

4. Plants

Find help answering plants questions

a. Check the types of vegetation found on the site:

☒ **deciduous tree: alder, maple, aspen, other**

☒ **evergreen tree: fir, cedar, pine, other**

☒ **shrubs**

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

☒ **grass**

☐ **pasture**

☐ **crop or grain**

☐ **orchards, vineyards, or other permanent crops.**

☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

☐ **water plants: water lily, eelgrass, milfoil, other**

☐ **other types of vegetation**

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions[8]

a. List any birds and other animals that have been observed on or near the site or are known to be on or near the site.

Examples include:

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

None.

e. **List any invasive animal species known to be on or near the site.**

None known.

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

The plan amendment does not have energy needs.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

No.

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

None.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

No.

1. **Describe any known or possible contamination at the site from present or past uses.**

   None known.

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

   None known.

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

   None known.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

4. **Describe special emergency services that might be required.**

   None known.

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   Beaver Valley Road is adjacent to the property to the west. It is a primary route between Leavenworth and Plain. It is the alternate state highway route when State Route 2 is closed in Tumwater Canyon which causes vehicle noise.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   The comprehensive plan map amendment will not generate noise.

3. **Proposed measures to reduce or control noise impacts, if any:**

   None.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

The current use of the site is residential and agricultural. The adjacent properties to the west are used for commercial purposes. Properties to the north, east and south are used for residential and agricultural purposes. Additionally, the properties to the north and east host several large gatherings each summer which bring thousands of tourists to Plain for the Northwest Overland Rally (https://overlandadventurerallies.com/nwor/) and Touratech Rally (https://www.touratechrally.com/). The adjacent properties are routinely used as a fire camp in the summer months which results in the establishment of a temporary city providing lodging, bathing facilities, food service and logistics for hundreds of employees. In the winter months the adjacent properties are used for public Nordic skiing including groomed trails and parking available for pass holders managed through Plain Valley Ski Trails (https://www.skiplain.com/)

The surrounding area is currently used for commercial purposes and events and therefore the proposal will not affect existing land uses.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

Yes. The property has been used as a hay farm including growing, harvesting and storage of agricultural products.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

   No.

c. Describe any structures on the site.

Parcel no. 261713720007: Two hay storage structures, 4,608 sq ft steel frame storage building, 2,160 sq ft storage building, two agricultural buildings.

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

Rural Residential/Resource 5.

f. What is the current comprehensive plan designation of the site?

Rural Residential/Resource 5.

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No.

i. Approximately how many people would reside or work in the completed project?

None.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

None proposed.

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.

None proposed.

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None proposed.

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

   None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

   None.

c. **Proposed measures to reduce or control housing impacts, if any:**

   None proposed.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

   No structures proposed.

b. **What views in the immediate vicinity would be altered or obstructed?**

   No.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

   None proposed.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

   None.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

   No.

c. **What existing off-site sources of light or glare may affect your proposal?**

   None.

d. **Proposed measures to reduce or control light and glare impacts, if any:**

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing
[13] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics
[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

None proposed.

12. Recreation

Find help answering recreation questions

a. What designated and informal recreational opportunities are in the immediate vicinity?

Hiking, bicycling, Nordic skiing and rafting occur in the vicinity.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None proposed.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

According to the DAHP WISAARD online mapping tool, the Wenatchee Chiwawa Irrigation canal located to the east is an eligible historic feature. The Burgess homestead and sawmill are located to the north.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The DAHP WISAARD online mapping tool was used.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

14. Transportation

Find help with answering transportation questions[16]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Beaver Valley Road fronts the property on the west and south sides. No new access is proposed.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No. The nearest transit stop is in Leavenworth.

c. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

d. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

e. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

None.

f. Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

g. Proposed measures to reduce or control transportation impacts, if any:

None proposed.

15. Public services

Find help answering public service questions[17]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation
[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities

Find help answering utilities questions[18]

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

x Grahame Watson

Type name of signee: Grahame Watson

Position and agency/organization: Owner

Date submitted: 1/28/2026

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

   The proposal may result in construction of a new onsite septic system in the future. Future construction could increase storm water runoff and emissions during construction.

   - **Proposed measures to avoid or reduce such increases are:**

     All future development will comply with local state and federal regulations including critical areas, storm water management and onsite septic requirements.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature
[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

Future development would not affect plants, animals, fish or marine life. The property is currently intensively used for agriculture, farm machinery and are adjacent to commercial uses which receive hundreds of customers per day.

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

  Compliance with Chelan County Critical area regulations at the time of development.

3. How would the proposal be likely to deplete energy or natural resources?

The proposal would not deplete energy or natural resources. Plain is served by Chelan County PUD which provides abundant clean, renewable energy.

- **Proposed measures to protect or conserve energy and natural resources are:**

  Future development is likely to use low energy lighting such as LEDs and will comply with the energy code in effect at the time of building.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

Future use of the property may reduce hay farming on approximately 2.4 acres of prime farmland.

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

  Compliance with Chelan County Critical area regulations at the time of development.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

The property is not located in the shoreline zone and are not regulated by the Shoreline Management Act or Chelan County Shoreline Master Program.

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

  Future development of the property would meet all county regulations for land use.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Future commercial uses could increase trips to the Plain community thereby adding more vehicle trips to area roads and the potential for more emergency service needs. Future customers are likely to be residents or guests from the Plain and Lake Wenatchee area who would otherwise need to travel to Leavenworth. Therefore, the future commercial use of the property may reduce the length of vehicular trips and decease traffic in Tumwater Canyon and Chumstick Highway.

- **Proposed measures to reduce or respond to such demand(s) are:**

  Compliance with Chelan County Code at the time of development. Future development would include construction of a cistern to provide onsite fire flow.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

The proposal will not conflict with any laws for the protection of the environment.

TECHNICAL MEMORANDUM

January 28, 2026

TO: Chelan County Planning Commission
316 Washington Street Suite 301
Wenatchee, WA 98801

FROM: Ryan Walker, Environmental Department Manager
Pacific Engineering & Design P.L.L.C.

SUBJECT: G&B Properties East LLC Application for Comprehensive Plan Map Amendment

Chelan County Code 14.14.050 Application for Comprehensive Plan Map Amendment Review Criteria.

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 4.94 acres from to Rural Residential/Resource 5 (RR 5) to Rural Commercial (RC). The property is located on Beaver Valley Road in Plan, within Section 03, T 26N, R 17E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 36.

The zoning and comprehensive plan designations are proposed to be changed to align the property with the rural commercial nature of Plain. The adjacent properties to the west are zoned Rural Commercial, which is the zone that the subject property is proposed to be changed to.

Beaver Valley Road runs north/south between the commercial zone and the subject property. The road has become the de facto main street of Plain as the community has grown and demand for commercial uses has expanded. Because the subject property is immediately across the street from the commercial core of Plain the more appropriate zoning is to also be zoned commercial based on the nature of the existing development district uses and a logical outer boundary.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

Growth Management Act Goals

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An

additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for commercial use, while the demand for rural commercial services in the Plain and greater Lake Wenatchee area is high.

The high demand and low inventory of commercial property is causing Plain to burst at its seams. During the winter, vehicles are parked on both sides of Beaver Valley Road to visit the hardware store, restaurant, grocery store and gas station. Demand for Nordic ski rentals and groomed trails—both available in Plain—is a significant driving factor. In the winter months the adjacent properties are used for public Nordic skiing including groomed trails and parking available for pass holders managed through Plain Valley Ski Trails (https://www.skiplain.com/). In the summer months, parking along the road is even more over-capacity on weekends for the popular Plan Valley Farmers Market. The properties across the road from the commercial zone host several large gatherings each summer which bring thousands of tourists to Plain for the Northwest Overland Rally (https://overlandadventurerallies.com/nwor/) and Touratech Rally (https://www.touratechrally.com/). The adjacent properties are routinely used as a fire camp in the summer months which results in the establishment of a temporary city providing lodging, bathing facilities, food service and logistics for hundreds of employees.

Plain Cellars Winery and Tasting Room is located nearby which serves food and beverages and hosts weekly live music events (https://www.plaincellars.com/).

RCW 36.70A.020(1) encourages urban growth. The property is not located in an urban growth area but are located in the epicenter of commercial property in the Plain and Lake Wenatchee area. Encouraging growth adjacent to existing commercial uses concentrates that use in an appropriate setting.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land that would be concentrated in a commercial area. The best use for this land is allowing commercial growth from within to expand to a logical boundary while preserving open space and critical areas outside the commercial core.

RCW 36.70A.020(3) encourages reducing greenhouse gas emissions from transportation and minimizing per capita vehicle miles travelled. Future increases in commercial services would be intended to serve residents or guests from the Plain and Lake Wenatchee area who would otherwise need to travel to Leavenworth. Therefore, the future commercial use of the property may reduce the length of vehicular trips and decease traffic in Tumwater Canyon and Chumstick Highway resulting in a reduction in emissions and miles travelled.

RCW 36.70A.020(5) encourages economic development throughout the state that is consistent with adopted comprehensive plans, promotes economic opportunity for all citizens of this state including recruitment of new businesses and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

Approval of this rezone encourages rural economic development by allowing business expansion and new recruitment that is consistent with the local context. Rural-based economies

enhance the state's desirability and quality of life. In order to continue to meet the goal, expanded commercial uses need to maintain the visual and social character of the rural community which can be achieved through approval of this application to align the zoning districts on both sides of Beaver Valley Road.

RCW 36.70A.020(11) emphasizes public participation and coordination. This application will be publicized per CCC Title 14 including posting a public notice on the site, mailing to nearby property owners and publishing in the Wenatchee World newspaper. The Planning Commission and Chelan County Commissioner meetings will be publicized and encourage public participation. The residents of Plain should determine its future.

RCW 36.70A.020(14) urges to consider climate change and resiliency by mitigating the effects of a changing climate; supporting reductions in greenhouse gas emissions and per capita vehicle miles traveled. Providing opportunity for expanded local commercial services reduces the need for residents to drive long distances (e.g., to Leavenworth or Wenatchee), which aligns with not only this GMA goal but also the county's new 2026 Climate Resilience Sub-Element aimed at reducing environmental impacts.

County Wide Planning Policies

Policy 4: The proposal is consistent with the policies for county-wide transportation facilities and strategies, through compliance with the Transportation Element discussed below. Beaver Valley Road is classified as a Major Collector under the Roadway Functional Classification within the Transportation Element.

Beaver Valley Road is identified on the Freight and Goods Transportation System Map within the Transportation Element as a T3 Tonnage Class (up to 4,000 annual tons) which is one of the highest classifications in the county.

Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, subsection III states: “consideration should be given to diversification of the economic base to provide opportunities for economic growth in all communities on the county-wide basis to ensure a healthy stable economic base.”

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan’s goals and policies.

The Comprehensive Plan recognizes the county’s long-standing rural economic base, including agriculture, tourism, and small-scale rural commercial activities. The Plan notes that many rural areas have transitioned toward “vineyards, wineries, smaller-scale agricultural production, and agricultural and recreational tourism” over the last two decades.

Expansion of the Rural Commercial designation allows appropriately scaled commercial uses that directly serve rural residents and tourists. This supports the Plan’s emphasis on maintaining and diversifying the rural economy while providing services compatible with rural character. A Rural Commercial designation provides a mechanism for limited commercial activity that fits within this established rural pattern, aligning with the Rural Element’s purpose of encouraging local services while avoiding sprawl.

The proposed map amendment to Rural Commercial is consistent with the Chelan County Comprehensive Plan because it:

- Promotes rural economic vitality,
- Supports rural-appropriate commercial activity,
- Aligns with GMA-based planning principles,
- Conforms to County map amendment criteria, and
- Advances the Comprehensive Plan's long-term vision for rural communities.

The following goals and policies are directly supported by the proposed map amendment

Land Use Element; Industrial and Commercial Development

"Rural industrial land uses are common throughout the County, including orchard processing and packaging facilities and mining. Rural commercial areas provide areas for necessary services and/or recreational support in isolated regions of the County. Both rural commercial and industrial are appropriate for Chelan County's unique land uses and provide rural employment opportunities. When appropriate with the area these types of uses are vital to residents and visitors."

Rural Element

Goal RE 4: Encourage rural economic development consistent with the goals and policies of the Chelan County Comprehensive Plan and the Growth Management Act.

Rationale: The comprehensive plan provides for a range of rural economic activities including: rural agriculture, forestry, and mineral resource industries as well as a range of rural development opportunities consistent with the Growth Management Act.

Policy RE 4.1: Permit rural development of small scale recreational, tourist, and resort uses that rely on a rural location and setting, including commercial facilities to serve such uses, provided they do not include new residential development and are otherwise consistent with other goals and policies of this plan.

Rationale: These uses are appropriate in rural areas when it can be demonstrated that they are compatible with the goals and policies of the comprehensive plan. Public services and public facilities shall be limited to those necessary to serve the recreational or tourist use and shall be provided in a manner that does not permit low density sprawl.

Policy RE 4.2: Additional commercial centers or activities may be considered in existing rural activity centers, villages, hamlets, or crossroad developments in the rural area during the yearly amendment process for the comprehensive plan when consistent with RCW 36.70A.070(5) and the goals and policies of the comprehensive plan.

Rationale: Limited commercial development may be appropriate in some rural areas to meet the needs of residents and visitors.

Economic Development Element

Goal ED 1: Encourage efforts to diversify the existing economic base to focus on long-term sustainable economic development throughout the County.

Rationale: The diversification of the economic base through sustainable economic development can help provide expanded job opportunities as well as a healthy, stable and growing economy. Diversification will reduce negative impacts during shifts in industries.

Policy ED 1.1: Seek to attract businesses and industries that complement and build upon existing business and industry.

Rationale: Building upon relationships with existing business and industries can diversify the economic base and strengthen positions for existing businesses and industries.

Policy ED 1.2: Incentivize development that creates local re-investment funds and provides jobs in the local community.

Rationale: Diversification and expansion of the County's economic base will expand job opportunities and bring additional resources for the growth and development of the County.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

The Comprehensive Plan emphasizes supporting rural character, facilitating rural-appropriate commercial and residential uses, and accommodating long-standing economic activities such as agriculture, tourism, and small-scale commercial enterprises. The proposed amendment aligns with the Comprehensive Plan's intent by supporting rural-appropriate development compatible with surrounding land uses and the County's economic and cultural landscape.

The Comprehensive Plan's land use elements articulate that Chelan County's rural environment is characterized by "residential rural living; forest practices, rural industrial activities, mining, and small-town settlements," with commercial uses generally allowed when they support or complement these patterns. The proposed designation supports uses of a rural scale and intensity that fit within the established pattern of rural commercial services in Plain ensuring that future development remains consistent with rural service levels and avoids urban-level impacts

Future commercial development will be designed and intended to serve the rural population of Plain and Lake Wenatchee. There is a logical outer boundary to define the limits of the commercial area established by Beaver Valley Road passing through Plain. Locating commercial zones on both sides of the road (instead of commercial on one side and residential on the other) is a clearly identifiable and contained boundary as specified by the General LAMIRD Criteria. It is not intended to draw visitors from farther reaches such as Leavenworth or Wenatchee which is consistent with the goal and policies for LAMIRDs and Rural Commercial designation and siting criteria summarized below.

General LAMIRD Criteria

Type 1 LAMIRD- commercial, industrial, residential, or mixed-use. Type 1 LAMIRDs are described as rural development consisting of existing and potential infill of commercial, industrial, residential, or mixed use, whether characterized as shoreline developments, villages, hamlets, rural activity centers, or crossroads developments. These LAMIRDs must be principally designed to serve the existing and projected rural population. It is also important that these designations are consistent with the character of the existing uses, particularly in terms of building size, scale, use or intensity. Changes in use from vacant land or some previous use may be allowed, provided the new use complies with these requirements.

Rural Commercial Designation/Siting Criteria

The Rural Commercial designation is considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act where it is applied to existing mixed use areas.

Purpose: To provide for a range of commercial uses to meet the needs of local residents, and small scale tourist or recreational uses including commercial facilities to serve those recreational or tourist uses within the rural areas to meet the needs of local residents and visitors. This designation will provide the opportunity for the development, redevelopment and infill of commercial uses in existing rural commercial developments, mixed use areas or intensely developed residential areas consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan.

5. A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, of if not, what changes to these elements would be required.

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

The RC zone expressly relies on on-site or rural-scaled utilities. Minimum lot size in RC is determined by Chelan-Douglas Health District standards for public or community water and on-site sewage disposal, not by urban utility assumptions. Setbacks, height, and coverage standards are also calibrated to a rural context. This standards framework avoids the need for urban capital facility extensions and ensures the scale and intensity of commercial activity remains consistent with rural infrastructure.

Because RC relies on health-district–governed water/septic capacity and site design that must comply with County development standards and critical areas regulations, the map amendment does not create a need for unplanned capital expansions. Any future development would be reviewed against the Comprehensive Plan and implementing codes (e.g., development standards, stormwater, and critical areas overlays), ensuring that facility adequacy and concurrency are maintained at the rural level of service contemplated by the Plan.

Re-designating to RC in Plain concentrates commercial trips and access where the Transportation Element already recognizes travel demand (Plain/Chiwawa/Beaver Valley

corridors) and where future spot investments are prioritized by the Public Works Department to improve safety, maintenance, and connectivity. This reduces trip dispersion across rural roads and makes it easier to plan for and fund targeted safety and access upgrades.

The Transportation Element includes specific mapping within its 20-year program, along with functional classifications and collision analyses for the Leavenworth–Peshastin–Plain area. By acknowledging Plain as a travel node and identifying corridor-level projects, the plan anticipates incremental improvements that can serve localized commercial activity typical of RC (e.g., lodging, retail, eating/drinking establishments scaled to rural standards). This shows that transportation planning assumptions already accommodate the level and pattern of trips expected from an expanded Rural Commercial designation in Plain

The RC district includes parking ratios, setbacks, and site design expectations that channel vehicle movements and parking on-site, avoiding spillover onto Beaver Valley Road as is the current case for commercial parking. Maximum building height, rural setbacks, and landscaping requirements further support safe ingress/egress and context-sensitive site design. These standards work in tandem with the County's roadway functional classifications and safety goals to maintain an adequate level of service and to minimize conflicts on state and county routes serving Plain.

6. For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.

Surrounding properties are used for commercial purposes and large gatherings that are commercial in nature. A Hardware store, restaurant, grocery store and gas station are located immediately across the road from the subject property. Customers of those businesses commonly park vehicles on both sides of Beaver Valley Road during high demand in the winter and summer. Demand for Nordic ski rentals and groomed trails—both available in Plain—is high. In the winter months the adjacent properties are used for public Nordic skiing including groomed trails and parking available for pass holders managed through Plain Valley Ski Trails. In the summer months, parking along the road is even more over-capacity on weekends for the popular Plan Valley Farmers Market. The properties across the road from the commercial zone host several large gatherings each summer which bring thousands of tourists to Plain for the Northwest Overland Rally and Touratech Rally. The adjacent properties are routinely used as a fire camp in the summer months which results in the establishment of a temporary city providing lodging, bathing facilities, food service and logistics for hundreds of employees.

Plain Cellars Winery and Tasting Room is located nearby which serves food and beverages and hosts weekly live music events.

The proposed change would make the land more compatible with surrounding land uses based on density and existing development. The proposed designation is more appropriate because it is within a logical outer boundary of existing commercial uses with access to transportation infrastructure. The amendment would formalize the land use that is already occurring and provide for onsite parking and utilities that would alleviate congestion that is currently occurring on the roadway.

Commercial activity in Plain has always been shaped by its geography, early settlement patterns, and changing economic conditions. The region began with logging, trapping, and

small-scale agriculture, then slowly transitioned toward tourism and outdoor-recreation–based commerce. The community opened the Plain Post Office in 1913, serving as one of the valley's first civic and commercial hubs.

7. Will the proposed map amendment affect lands designated as resource lands of long term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?

Neither the subject property nor the adjacent properties have been designated as resource lands of long-term commercial significance. The subject property have not been designated as critical areas. No impact to resource lands or critical areas is anticipated.

8. Explain how the proposed amendment would affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The existing designation, RR5, provides low-density rural housing opportunities. Converting a small, discrete parcel from RR5 to RC does not materially alter the countywide or subarea supply of rural residential land because:

- Chelan County's Comprehensive Plan allocates residential growth primarily to Urban Growth Areas (UGAs) and designated rural residential lands outside urban areas. RR5 constitutes a very large portion of rural lands, and the loss of two parcel totaling less than seven acres will have a negligible effect on overall land capacity for rural housing.

- The County's Land Use designations and associated maps cover thousands of acres of RR20, RR10, RR5, and RR2.5 outside Plain. A single reclassification does not meaningfully diminish the county's ability to meet expected rural residential demand identified in the Plan's land-capacity analysis.

Thus, the amendment does not constrain residential growth over the 20-year planning period because the rural residential land base remains abundant and widely distributed.

The Comprehensive Plan identifies the Plain–Lake Wenatchee Study Area as a recreation-supported rural community where residents and visitors rely on localized services. The Plan's rural vision statements emphasize:

- Allowing localized commercial services to support community needs while maintaining rural character.
- Clustering commercial activity in suitable centers to avoid strip development and rural sprawl.

The existing RC lands in the Plain area are limited. Adding to the RC land available provides:

- Capacity for small-scale commercial services that the Plan anticipates (e.g., small markets, outfitters, lodging, food service, or recreation-related retail;
- Support for the area's tourism economy, which is an explicit rural development objective.

Shifting a single parcel from RR5 to RC therefore enhances the mix of land uses needed to support long-term rural economic and service needs without oversupplying commercial land.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The Comprehensive Plan recognizes the Plain–Lake Wenatchee area as a rural community where residents and visitors depend on localized access to basic goods, services, and visitor-support amenities. The Plan's vision for this study area emphasizes maintaining the rural lifestyle while allowing localized services that meet community needs. Concentrating commercial uses in appropriate locations—rather than dispersing them across large-lot residential areas—advances that policy direction. Allowing an RC designation helps ensure the public can access essential rural-scaled commercial services without long travel distances, improving convenience, economic vitality, and community resilience such as has been the need resulting from the State Highway 2 closures and damage to Chumstick Highway in December 2025.

The RC zoning district is specifically designed for commercial activity in rural settings without requiring urban utilities. These requirements protect public health by preventing contamination risks, maintaining proper waste disposal, and ensuring safe driveway spacing and circulation—all of which would become more challenging if similar commercial activity were scattered throughout RR5-zoned lands.

The Comprehensive Plan emphasizes the importance of supporting a balanced rural economy, including recreation-based and agricultural tourism sectors that rely on small-scale rural commercial activity.

An expanded RC zone allows community-serving businesses—such as small markets, outfitters, lodging, food service, or recreation-related retail—to operate in a manner that:

- Supports local employment;
- Provides goods/services to both residents and visitors, and;
- Reduces unnecessary long-distance trips to larger urban centers (which reduces traffic, fuel consumption, and emissions).

This contributes directly to the general welfare by enabling a functioning, sustainable rural community.

The Plan and zoning code both emphasize orderly, predictable development patterns. RC is one of the rural designations specifically created for commercial activities, whereas RR5 is intended for low-density rural residential use. The proposed change:

- Directs commercial activity into a zone where it is already occurring;
- Minimizes land-use conflicts between homes and businesses, and;
- Maintains compatibility with the broader Plain community's rural character.

This reduces nuisances, protects property values, and improves long-term community compatibility—key elements of the public's welfare.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 4.94 acres from to Rural Residential/Resource 5 (RR 5) to Rural Commercial (RC).

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: RR5 used for fire camps public cross country skiing and offroad rally events
   South: RR5 Residential
   East: RR 5 Open space, hay harming and offroad rally events
   West: RC commercial uses including grocery store, fuel sales, hardware store, restaurant farmers market, short term rentals and mini storage
4. What is the current use of the property? Residential, industrial metal fabrication, agricultural including agricultural support
5. Sanitation Disposal: ❑ N/A ☒ Septic Permit ❑ Sewer District: _____
6. Water Source: ❑ N/A ☒ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____
7. Irrigation Water:
   ❑ N/A ❑ Yes (Private) ☒ Yes (Public) Irrigation District/Purveyor: Wenatchee Chiwawa Irrigation District
8. Fire District: Lake Wenatchee Fire and Rescue Former #4 & #9 School District: Cascade
9. Power Service: CCPUD
10. Are there critical areas or critical area buffers on the property?
    ❑ Airport Overlay: _____
    ❑ Aquifer Recharge Area (see attached)
    ❑ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ❑ Alluvial Fan (250') ❑ Known Historic Hazardous Area (250') ❑ Slopes > 40% (250')
    ❑ Erosive soils (on-site) ❑ Landslide ❑ Snow Avalanche (500')
    ❑ Habitat/Riparian Area, protected species/area: _____
    ❑ Streams / Waterbodies: _____ ❑Shoreline Environment Designation: _____
    ❑ Drainage or Seasonal Stream: _____ ❑ Wetland, if so what category: _____
    ❑ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ❑ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ❑ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    Yes

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

    Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ❑ Yes, please list:

    _____

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted**.***

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

gw RW 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

gw RW 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

gw RW 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

gw RW 4. Additional permit applications and approvals may be necessary to conduct specific activities.

gw RW 5. Application fees are non-refundable, except when approve by the Board.

gw RW 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

gw RW 7. Chelan County is hereby given consent to enter the property(ies) listed above.

gw RW 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

gw RW 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

gw RW 10. I certify that this application has been made with the consent of the lawful property owner(s).

gw RW 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

gw RW 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 4.94 acres from to Rural Residential/Resource 5 (RR 5) to Rural Commercial (RC).

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: RR5 used for fire camps public cross country skiing and offroad rally events
   South: RR5 Residential
   East: RR 5 Open space, hay harming and offroad rally events
   West: RC commercial uses including grocery store, fuel sales, hardware store, restaurant farmers market, short term rentals and mini storage
4. What is the current use of the property? Residential, industrial metal fabrication, agricultural including agricultural support
5. Sanitation Disposal: ❑ N/A ☒ Septic Permit ❑ Sewer District: _____
6. Water Source: ❑ N/A ☒ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____
7. Irrigation Water:
   ❑ N/A ❑ Yes (Private) ☒ Yes (Public) Irrigation District/Purveyor: Wenatchee Chiwawa Irrigation District
8. Fire District: Lake Wenatchee Fire and Rescue Former #4 & #9 School District: Cascade
9. Power Service: CCPUD
10. Are there critical areas or critical area buffers on the property?
    ❑ Airport Overlay: _____
    ❑ Aquifer Recharge Area (see attached)
    ❑ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ❑ Alluvial Fan (250') ❑ Known Historic Hazardous Area (250') ❑ Slopes > 40% (250')
    ❑ Erosive soils (on-site) ❑ Landslide ❑ Snow Avalanche (500')
    ❑ Habitat/Riparian Area, protected species/area: _____
    ❑ Streams / Waterbodies: _____ ❑Shoreline Environment Designation: _____
    ❑ Drainage or Seasonal Stream: _____ ❑ Wetland, if so what category: _____
    ❑ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ❑ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ❑ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    Yes

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

    Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ❑ Yes, please list:

    _____

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted**.***

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

gw RW 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

gw RW 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

gw RW 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

gw RW 4. Additional permit applications and approvals may be necessary to conduct specific activities.

gw RW 5. Application fees are non-refundable, except when approve by the Board.

gw RW 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

gw RW 7. Chelan County is hereby given consent to enter the property(ies) listed above.

gw RW 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

gw RW 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

gw RW 10. I certify that this application has been made with the consent of the lawful property owner(s).

gw RW 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

gw RW 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

SEPA[1] Environmental Checklist

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

[1] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/Checklist-guidance

A.Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**

   G&B Properties East LLC Comprehensive Plan Map Amendment and Rezone

2. **Name of applicant:**

   G&B Properties East LLC; Grahame Watson

3. **Address and phone number of applicant and contact person:**

   Grahame Watson; G&B Properties East LLC
   18623 Beaver Valley Road
   Plain, WA 98826
   509-670-3796

   Agent:
   Ryan Walker
   Pacific Engineering and Design, PLLC
   200 South Columbia St, Suite 300
   Wenatchee, WA 98801
   5409-630-7917
   ryanw@pacificengineering.net

4. **Date checklist prepared:**

   January 2026

5. **Agency requesting checklist:**

   Chelan County

6. **Proposed timing of schedule (including phasing, if applicable):**

   The application will follow the Chelan County process for Comprehensive Plan Map Amendments.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   Rural commercial uses such as a public market may be proposed in the future.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   Stream Typing (Pacific Engineering 2025)

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

Comprehensive Plan Map Amendment and Zoning Map Amendment.

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 4.94 acres from to Rural Residential/Resource 5 (RR 5) to Rural Commercial (RC).

The zoning and comprehensive plan designations are proposed to be changed to align the property with the rural commercial nature of Plain. The adjacent property to the west is zoned Rural Commercial, which is the zone that the subject property is proposed to be changed to.

Beaver Valley Road runs north/south between the commercial zone and the subject property. The road has become the de facto main street of Plain as the community has grown and demand for commercial uses has expanded. Because the subject property is immediately across the street from the commercial core of Plain the more appropriate zoning is for them to also be zoned commercial based on the nature of the existing development district uses and a logical outer boundary.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 18625 Beaver Valley Road in Plain, WA, within Section 13, T 26N, R 17E.W.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. General description of the site:

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. What is the steepest slope on the site (approximate percent slope)?

5%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Soil mapped for the property on the USGS soil survey website (https://websoilsurvey.nrcs.usda.gov) is Chiwawa gravelly fine sandy loam, 0-3 percent slopes (CmA); Wintoner silt loam, 0-3 percent slopes (WnA); and Wintoner silt loam, 3 to 8 percent slopes (WnB). CmA is prime farmland; WnA is prime farmland if irrigated and WnB is farmland of statewide importance.

None of the soil will be removed.

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling, excavation or grading is proposed.

f. Could erosion occur because of clearing, construction, or use? If so, generally describe.

No.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

There will be no change in the impervious surface.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any.

None.

2. Air

Find help answering air questions[4]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air

None.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None.

3. Water

Find help answering water questions[5]

a. Surface:

Find help answering surface water questions[6]

1. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

No. The DNR stream typing map shows a type N stream but it has been determined to not be present.

2. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None.

4. Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.

No.

5. Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6. Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

No.

b. Ground:

Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No.

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   No waste material will be discharged.

c. Water Runoff (including stormwater):

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   There will be no change in stormwater runoff.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None.

4. Plants

Find help answering plants questions

a. Check the types of vegetation found on the site:

☒ **deciduous tree: alder, maple, aspen, other**

☒ **evergreen tree: fir, cedar, pine, other**

☒ **shrubs**

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

☒ **grass**

☐ **pasture**

☐ **crop or grain**

☐ **orchards, vineyards, or other permanent crops.**

☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

☐ **water plants: water lily, eelgrass, milfoil, other**

☐ **other types of vegetation**

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions[8]

a. List any birds and other animals that have been observed on or near the site or are known to be on or near the site.

Examples include:

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

None.

e. **List any invasive animal species known to be on or near the site.**

None known.

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

The plan amendment does not have energy needs.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

No.

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

None.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

No.

1. **Describe any known or possible contamination at the site from present or past uses.**

   None known.

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

   None known.

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

   None known.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

4. **Describe special emergency services that might be required.**

   None known.

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   Beaver Valley Road is adjacent to the property to the west. It is a primary route between Leavenworth and Plain. It is the alternate state highway route when State Route 2 is closed in Tumwater Canyon which causes vehicle noise.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   The comprehensive plan map amendment will not generate noise.

3. **Proposed measures to reduce or control noise impacts, if any:**

   None.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

The current use of the site is residential and agricultural. The adjacent properties to the west are used for commercial purposes. Properties to the north, east and south are used for residential and agricultural purposes. Additionally, the properties to the north and east host several large gatherings each summer which bring thousands of tourists to Plain for the Northwest Overland Rally (https://overlandadventurerallies.com/nwor/) and Touratech Rally (https://www.touratechrally.com/). The adjacent properties are routinely used as a fire camp in the summer months which results in the establishment of a temporary city providing lodging, bathing facilities, food service and logistics for hundreds of employees. In the winter months the adjacent properties are used for public Nordic skiing including groomed trails and parking available for pass holders managed through Plain Valley Ski Trails (https://www.skiplain.com/)

The surrounding area is currently used for commercial purposes and events and therefore the proposal will not affect existing land uses.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

Yes. The property has been used as a hay farm including growing, harvesting and storage of agricultural products.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

   No.

c. Describe any structures on the site.

Parcel no. 261713720007: Two hay storage structures, 4,608 sq ft steel frame storage building, 2,160 sq ft storage building, two agricultural buildings.

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

Rural Residential/Resource 5.

f. What is the current comprehensive plan designation of the site?

Rural Residential/Resource 5.

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No.

i. Approximately how many people would reside or work in the completed project?

None.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

None proposed.

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.

None proposed.

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None proposed.

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

   None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

   None.

c. **Proposed measures to reduce or control housing impacts, if any:**

   None proposed.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

   No structures proposed.

b. **What views in the immediate vicinity would be altered or obstructed?**

   No.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

   None proposed.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

   None.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

   No.

c. **What existing off-site sources of light or glare may affect your proposal?**

   None.

d. **Proposed measures to reduce or control light and glare impacts, if any:**

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing

[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

None proposed.

12. Recreation

Find help answering recreation questions

a. What designated and informal recreational opportunities are in the immediate vicinity?

Hiking, bicycling, Nordic skiing and rafting occur in the vicinity.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None proposed.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

According to the DAHP WISAARD online mapping tool, the Wenatchee Chiwawa Irrigation canal located to the east is an eligible historic feature. The Burgess homestead and sawmill are located to the north.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The DAHP WISAARD online mapping tool was used.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation

Find help with answering transportation questions[16]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Beaver Valley Road fronts the property on the west and south sides. No new access is proposed.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No. The nearest transit stop is in Leavenworth.

c. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

d. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

e. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

None.

f. Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

g. Proposed measures to reduce or control transportation impacts, if any:

None proposed.

15. Public services

Find help answering public service questions[17]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation
[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities

Find help answering utilities questions[18]

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

x Grahame Watson

Type name of signee: Grahame Watson

Position and agency/organization: Owner

Date submitted: 1/28/2026

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

   The proposal may result in construction of a new onsite septic system in the future. Future construction could increase storm water runoff and emissions during construction.

   - **Proposed measures to avoid or reduce such increases are:**

     All future development will comply with local state and federal regulations including critical areas, storm water management and onsite septic requirements.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature
[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

Future development would not affect plants, animals, fish or marine life. The property is currently intensively used for agriculture, farm machinery and are adjacent to commercial uses which receive hundreds of customers per day.

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

  Compliance with Chelan County Critical area regulations at the time of development.

3. How would the proposal be likely to deplete energy or natural resources?

The proposal would not deplete energy or natural resources. Plain is served by Chelan County PUD which provides abundant clean, renewable energy.

- **Proposed measures to protect or conserve energy and natural resources are:**

  Future development is likely to use low energy lighting such as LEDs and will comply with the energy code in effect at the time of building.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

Future use of the property may reduce hay farming on approximately 2.4 acres of prime farmland.

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

  Compliance with Chelan County Critical area regulations at the time of development.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

The property is not located in the shoreline zone and are not regulated by the Shoreline Management Act or Chelan County Shoreline Master Program.

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

  Future development of the property would meet all county regulations for land use.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Future commercial uses could increase trips to the Plain community thereby adding more vehicle trips to area roads and the potential for more emergency service needs. Future customers are likely to be residents or guests from the Plain and Lake Wenatchee area who would otherwise need to travel to Leavenworth. Therefore, the future commercial use of the property may reduce the length of vehicular trips and decease traffic in Tumwater Canyon and Chumstick Highway.

- **Proposed measures to reduce or respond to such demand(s) are:**

  Compliance with Chelan County Code at the time of development. Future development would include construction of a cistern to provide onsite fire flow.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

The proposal will not conflict with any laws for the protection of the environment.

TECHNICAL MEMORANDUM

January 28, 2026

TO: Chelan County Planning Commission
316 Washington Street Suite 301
Wenatchee, WA 98801

FROM: Ryan Walker, Environmental Department Manager
Pacific Engineering & Design P.L.L.C.

SUBJECT: G&B Properties East LLC Application for Comprehensive Plan Map Amendment

Chelan County Code 14.14.050 Application for Comprehensive Plan Map Amendment Review Criteria.

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 4.94 acres from to Rural Residential/Resource 5 (RR 5) to Rural Commercial (RC). The property is located on Beaver Valley Road in Plan, within Section 03, T 26N, R 17E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 36.

The zoning and comprehensive plan designations are proposed to be changed to align the property with the rural commercial nature of Plain. The adjacent properties to the west are zoned Rural Commercial, which is the zone that the subject property is proposed to be changed to.

Beaver Valley Road runs north/south between the commercial zone and the subject property. The road has become the de facto main street of Plain as the community has grown and demand for commercial uses has expanded. Because the subject property is immediately across the street from the commercial core of Plain the more appropriate zoning is to also be zoned commercial based on the nature of the existing development district uses and a logical outer boundary.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

Growth Management Act Goals

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An

additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for commercial use, while the demand for rural commercial services in the Plain and greater Lake Wenatchee area is high.

The high demand and low inventory of commercial property is causing Plain to burst at its seams. During the winter, vehicles are parked on both sides of Beaver Valley Road to visit the hardware store, restaurant, grocery store and gas station. Demand for Nordic ski rentals and groomed trails—both available in Plain—is a significant driving factor. In the winter months the adjacent properties are used for public Nordic skiing including groomed trails and parking available for pass holders managed through Plain Valley Ski Trails (https://www.skiplain.com/). In the summer months, parking along the road is even more over-capacity on weekends for the popular Plan Valley Farmers Market. The properties across the road from the commercial zone host several large gatherings each summer which bring thousands of tourists to Plain for the Northwest Overland Rally (https://overlandadventurerallies.com/nwor/) and Touratech Rally (https://www.touratechrally.com/). The adjacent properties are routinely used as a fire camp in the summer months which results in the establishment of a temporary city providing lodging, bathing facilities, food service and logistics for hundreds of employees.

Plain Cellars Winery and Tasting Room is located nearby which serves food and beverages and hosts weekly live music events (https://www.plaincellars.com/).

RCW 36.70A.020(1) encourages urban growth. The property is not located in an urban growth area but are located in the epicenter of commercial property in the Plain and Lake Wenatchee area. Encouraging growth adjacent to existing commercial uses concentrates that use in an appropriate setting.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land that would be concentrated in a commercial area. The best use for this land is allowing commercial growth from within to expand to a logical boundary while preserving open space and critical areas outside the commercial core.

RCW 36.70A.020(3) encourages reducing greenhouse gas emissions from transportation and minimizing per capita vehicle miles travelled. Future increases in commercial services would be intended to serve residents or guests from the Plain and Lake Wenatchee area who would otherwise need to travel to Leavenworth. Therefore, the future commercial use of the property may reduce the length of vehicular trips and decease traffic in Tumwater Canyon and Chumstick Highway resulting in a reduction in emissions and miles travelled.

RCW 36.70A.020(5) encourages economic development throughout the state that is consistent with adopted comprehensive plans, promotes economic opportunity for all citizens of this state including recruitment of new businesses and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

Approval of this rezone encourages rural economic development by allowing business expansion and new recruitment that is consistent with the local context. Rural-based economies

enhance the state's desirability and quality of life. In order to continue to meet the goal, expanded commercial uses need to maintain the visual and social character of the rural community which can be achieved through approval of this application to align the zoning districts on both sides of Beaver Valley Road.

RCW 36.70A.020(11) emphasizes public participation and coordination. This application will be publicized per CCC Title 14 including posting a public notice on the site, mailing to nearby property owners and publishing in the Wenatchee World newspaper. The Planning Commission and Chelan County Commissioner meetings will be publicized and encourage public participation. The residents of Plain should determine its future.

RCW 36.70A.020(14) urges to consider climate change and resiliency by mitigating the effects of a changing climate; supporting reductions in greenhouse gas emissions and per capita vehicle miles traveled. Providing opportunity for expanded local commercial services reduces the need for residents to drive long distances (e.g., to Leavenworth or Wenatchee), which aligns with not only this GMA goal but also the county's new 2026 Climate Resilience Sub-Element aimed at reducing environmental impacts.

County Wide Planning Policies

Policy 4: The proposal is consistent with the policies for county-wide transportation facilities and strategies, through compliance with the Transportation Element discussed below. Beaver Valley Road is classified as a Major Collector under the Roadway Functional Classification within the Transportation Element.

Beaver Valley Road is identified on the Freight and Goods Transportation System Map within the Transportation Element as a T3 Tonnage Class (up to 4,000 annual tons) which is one of the highest classifications in the county.

Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, subsection III states: “consideration should be given to diversification of the economic base to provide opportunities for economic growth in all communities on the county-wide basis to ensure a healthy stable economic base.”

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan’s goals and policies.

The Comprehensive Plan recognizes the county’s long-standing rural economic base, including agriculture, tourism, and small-scale rural commercial activities. The Plan notes that many rural areas have transitioned toward “vineyards, wineries, smaller-scale agricultural production, and agricultural and recreational tourism” over the last two decades.

Expansion of the Rural Commercial designation allows appropriately scaled commercial uses that directly serve rural residents and tourists. This supports the Plan’s emphasis on maintaining and diversifying the rural economy while providing services compatible with rural character. A Rural Commercial designation provides a mechanism for limited commercial activity that fits within this established rural pattern, aligning with the Rural Element’s purpose of encouraging local services while avoiding sprawl.

The proposed map amendment to Rural Commercial is consistent with the Chelan County Comprehensive Plan because it:

- Promotes rural economic vitality,
- Supports rural-appropriate commercial activity,
- Aligns with GMA-based planning principles,
- Conforms to County map amendment criteria, and
- Advances the Comprehensive Plan's long-term vision for rural communities.

The following goals and policies are directly supported by the proposed map amendment

Land Use Element; Industrial and Commercial Development

"Rural industrial land uses are common throughout the County, including orchard processing and packaging facilities and mining. Rural commercial areas provide areas for necessary services and/or recreational support in isolated regions of the County. Both rural commercial and industrial are appropriate for Chelan County's unique land uses and provide rural employment opportunities. When appropriate with the area these types of uses are vital to residents and visitors."

Rural Element

Goal RE 4: Encourage rural economic development consistent with the goals and policies of the Chelan County Comprehensive Plan and the Growth Management Act.

Rationale: The comprehensive plan provides for a range of rural economic activities including: rural agriculture, forestry, and mineral resource industries as well as a range of rural development opportunities consistent with the Growth Management Act.

Policy RE 4.1: Permit rural development of small scale recreational, tourist, and resort uses that rely on a rural location and setting, including commercial facilities to serve such uses, provided they do not include new residential development and are otherwise consistent with other goals and policies of this plan.

Rationale: These uses are appropriate in rural areas when it can be demonstrated that they are compatible with the goals and policies of the comprehensive plan. Public services and public facilities shall be limited to those necessary to serve the recreational or tourist use and shall be provided in a manner that does not permit low density sprawl.

Policy RE 4.2: Additional commercial centers or activities may be considered in existing rural activity centers, villages, hamlets, or crossroad developments in the rural area during the yearly amendment process for the comprehensive plan when consistent with RCW 36.70A.070(5) and the goals and policies of the comprehensive plan.

Rationale: Limited commercial development may be appropriate in some rural areas to meet the needs of residents and visitors.

Economic Development Element

Goal ED 1: Encourage efforts to diversify the existing economic base to focus on long-term sustainable economic development throughout the County.

Rationale: The diversification of the economic base through sustainable economic development can help provide expanded job opportunities as well as a healthy, stable and growing economy. Diversification will reduce negative impacts during shifts in industries.

Policy ED 1.1: Seek to attract businesses and industries that complement and build upon existing business and industry.

Rationale: Building upon relationships with existing business and industries can diversify the economic base and strengthen positions for existing businesses and industries.

Policy ED 1.2: Incentivize development that creates local re-investment funds and provides jobs in the local community.

Rationale: Diversification and expansion of the County's economic base will expand job opportunities and bring additional resources for the growth and development of the County.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

The Comprehensive Plan emphasizes supporting rural character, facilitating rural-appropriate commercial and residential uses, and accommodating long-standing economic activities such as agriculture, tourism, and small-scale commercial enterprises. The proposed amendment aligns with the Comprehensive Plan's intent by supporting rural-appropriate development compatible with surrounding land uses and the County's economic and cultural landscape.

The Comprehensive Plan's land use elements articulate that Chelan County's rural environment is characterized by "residential rural living; forest practices, rural industrial activities, mining, and small-town settlements," with commercial uses generally allowed when they support or complement these patterns. The proposed designation supports uses of a rural scale and intensity that fit within the established pattern of rural commercial services in Plain ensuring that future development remains consistent with rural service levels and avoids urban-level impacts

Future commercial development will be designed and intended to serve the rural population of Plain and Lake Wenatchee. There is a logical outer boundary to define the limits of the commercial area established by Beaver Valley Road passing through Plain. Locating commercial zones on both sides of the road (instead of commercial on one side and residential on the other) is a clearly identifiable and contained boundary as specified by the General LAMIRD Criteria. It is not intended to draw visitors from farther reaches such as Leavenworth or Wenatchee which is consistent with the goal and policies for LAMIRDs and Rural Commercial designation and siting criteria summarized below.

General LAMIRD Criteria

Type 1 LAMIRD- commercial, industrial, residential, or mixed-use. Type 1 LAMIRDs are described as rural development consisting of existing and potential infill of commercial, industrial, residential, or mixed use, whether characterized as shoreline developments, villages, hamlets, rural activity centers, or crossroads developments. These LAMIRDs must be principally designed to serve the existing and projected rural population. It is also important that these designations are consistent with the character of the existing uses, particularly in terms of building size, scale, use or intensity. Changes in use from vacant land or some previous use may be allowed, provided the new use complies with these requirements.

Rural Commercial Designation/Siting Criteria

The Rural Commercial designation is considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act where it is applied to existing mixed use areas.

Purpose: To provide for a range of commercial uses to meet the needs of local residents, and small scale tourist or recreational uses including commercial facilities to serve those recreational or tourist uses within the rural areas to meet the needs of local residents and visitors. This designation will provide the opportunity for the development, redevelopment and infill of commercial uses in existing rural commercial developments, mixed use areas or intensely developed residential areas consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan.

5. A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, of if not, what changes to these elements would be required.

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

The RC zone expressly relies on on-site or rural-scaled utilities. Minimum lot size in RC is determined by Chelan-Douglas Health District standards for public or community water and on-site sewage disposal, not by urban utility assumptions. Setbacks, height, and coverage standards are also calibrated to a rural context. This standards framework avoids the need for urban capital facility extensions and ensures the scale and intensity of commercial activity remains consistent with rural infrastructure.

Because RC relies on health-district–governed water/septic capacity and site design that must comply with County development standards and critical areas regulations, the map amendment does not create a need for unplanned capital expansions. Any future development would be reviewed against the Comprehensive Plan and implementing codes (e.g., development standards, stormwater, and critical areas overlays), ensuring that facility adequacy and concurrency are maintained at the rural level of service contemplated by the Plan.

Re-designating to RC in Plain concentrates commercial trips and access where the Transportation Element already recognizes travel demand (Plain/Chiwawa/Beaver Valley

corridors) and where future spot investments are prioritized by the Public Works Department to improve safety, maintenance, and connectivity. This reduces trip dispersion across rural roads and makes it easier to plan for and fund targeted safety and access upgrades.

The Transportation Element includes specific mapping within its 20-year program, along with functional classifications and collision analyses for the Leavenworth–Peshastin–Plain area. By acknowledging Plain as a travel node and identifying corridor-level projects, the plan anticipates incremental improvements that can serve localized commercial activity typical of RC (e.g., lodging, retail, eating/drinking establishments scaled to rural standards). This shows that transportation planning assumptions already accommodate the level and pattern of trips expected from an expanded Rural Commercial designation in Plain

The RC district includes parking ratios, setbacks, and site design expectations that channel vehicle movements and parking on-site, avoiding spillover onto Beaver Valley Road as is the current case for commercial parking. Maximum building height, rural setbacks, and landscaping requirements further support safe ingress/egress and context-sensitive site design. These standards work in tandem with the County's roadway functional classifications and safety goals to maintain an adequate level of service and to minimize conflicts on state and county routes serving Plain.

6. For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.

Surrounding properties are used for commercial purposes and large gatherings that are commercial in nature. A Hardware store, restaurant, grocery store and gas station are located immediately across the road from the subject property. Customers of those businesses commonly park vehicles on both sides of Beaver Valley Road during high demand in the winter and summer. Demand for Nordic ski rentals and groomed trails—both available in Plain—is high. In the winter months the adjacent properties are used for public Nordic skiing including groomed trails and parking available for pass holders managed through Plain Valley Ski Trails. In the summer months, parking along the road is even more over-capacity on weekends for the popular Plan Valley Farmers Market. The properties across the road from the commercial zone host several large gatherings each summer which bring thousands of tourists to Plain for the Northwest Overland Rally and Touratech Rally. The adjacent properties are routinely used as a fire camp in the summer months which results in the establishment of a temporary city providing lodging, bathing facilities, food service and logistics for hundreds of employees.

Plain Cellars Winery and Tasting Room is located nearby which serves food and beverages and hosts weekly live music events.

The proposed change would make the land more compatible with surrounding land uses based on density and existing development. The proposed designation is more appropriate because it is within a logical outer boundary of existing commercial uses with access to transportation infrastructure. The amendment would formalize the land use that is already occurring and provide for onsite parking and utilities that would alleviate congestion that is currently occurring on the roadway.

Commercial activity in Plain has always been shaped by its geography, early settlement patterns, and changing economic conditions. The region began with logging, trapping, and

small-scale agriculture, then slowly transitioned toward tourism and outdoor-recreation–based commerce. The community opened the Plain Post Office in 1913, serving as one of the valley's first civic and commercial hubs.

7. Will the proposed map amendment affect lands designated as resource lands of long term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?

Neither the subject property nor the adjacent properties have been designated as resource lands of long-term commercial significance. The subject property have not been designated as critical areas. No impact to resource lands or critical areas is anticipated.

8. Explain how the proposed amendment would affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The existing designation, RR5, provides low-density rural housing opportunities. Converting a small, discrete parcel from RR5 to RC does not materially alter the countywide or subarea supply of rural residential land because:

- Chelan County's Comprehensive Plan allocates residential growth primarily to Urban Growth Areas (UGAs) and designated rural residential lands outside urban areas. RR5 constitutes a very large portion of rural lands, and the loss of two parcel totaling less than seven acres will have a negligible effect on overall land capacity for rural housing.

- The County's Land Use designations and associated maps cover thousands of acres of RR20, RR10, RR5, and RR2.5 outside Plain. A single reclassification does not meaningfully diminish the county's ability to meet expected rural residential demand identified in the Plan's land-capacity analysis.

Thus, the amendment does not constrain residential growth over the 20-year planning period because the rural residential land base remains abundant and widely distributed.

The Comprehensive Plan identifies the Plain–Lake Wenatchee Study Area as a recreation-supported rural community where residents and visitors rely on localized services. The Plan's rural vision statements emphasize:

- Allowing localized commercial services to support community needs while maintaining rural character.
- Clustering commercial activity in suitable centers to avoid strip development and rural sprawl.

The existing RC lands in the Plain area are limited. Adding to the RC land available provides:

- Capacity for small-scale commercial services that the Plan anticipates (e.g., small markets, outfitters, lodging, food service, or recreation-related retail;
- Support for the area's tourism economy, which is an explicit rural development objective.

Shifting a single parcel from RR5 to RC therefore enhances the mix of land uses needed to support long-term rural economic and service needs without oversupplying commercial land.

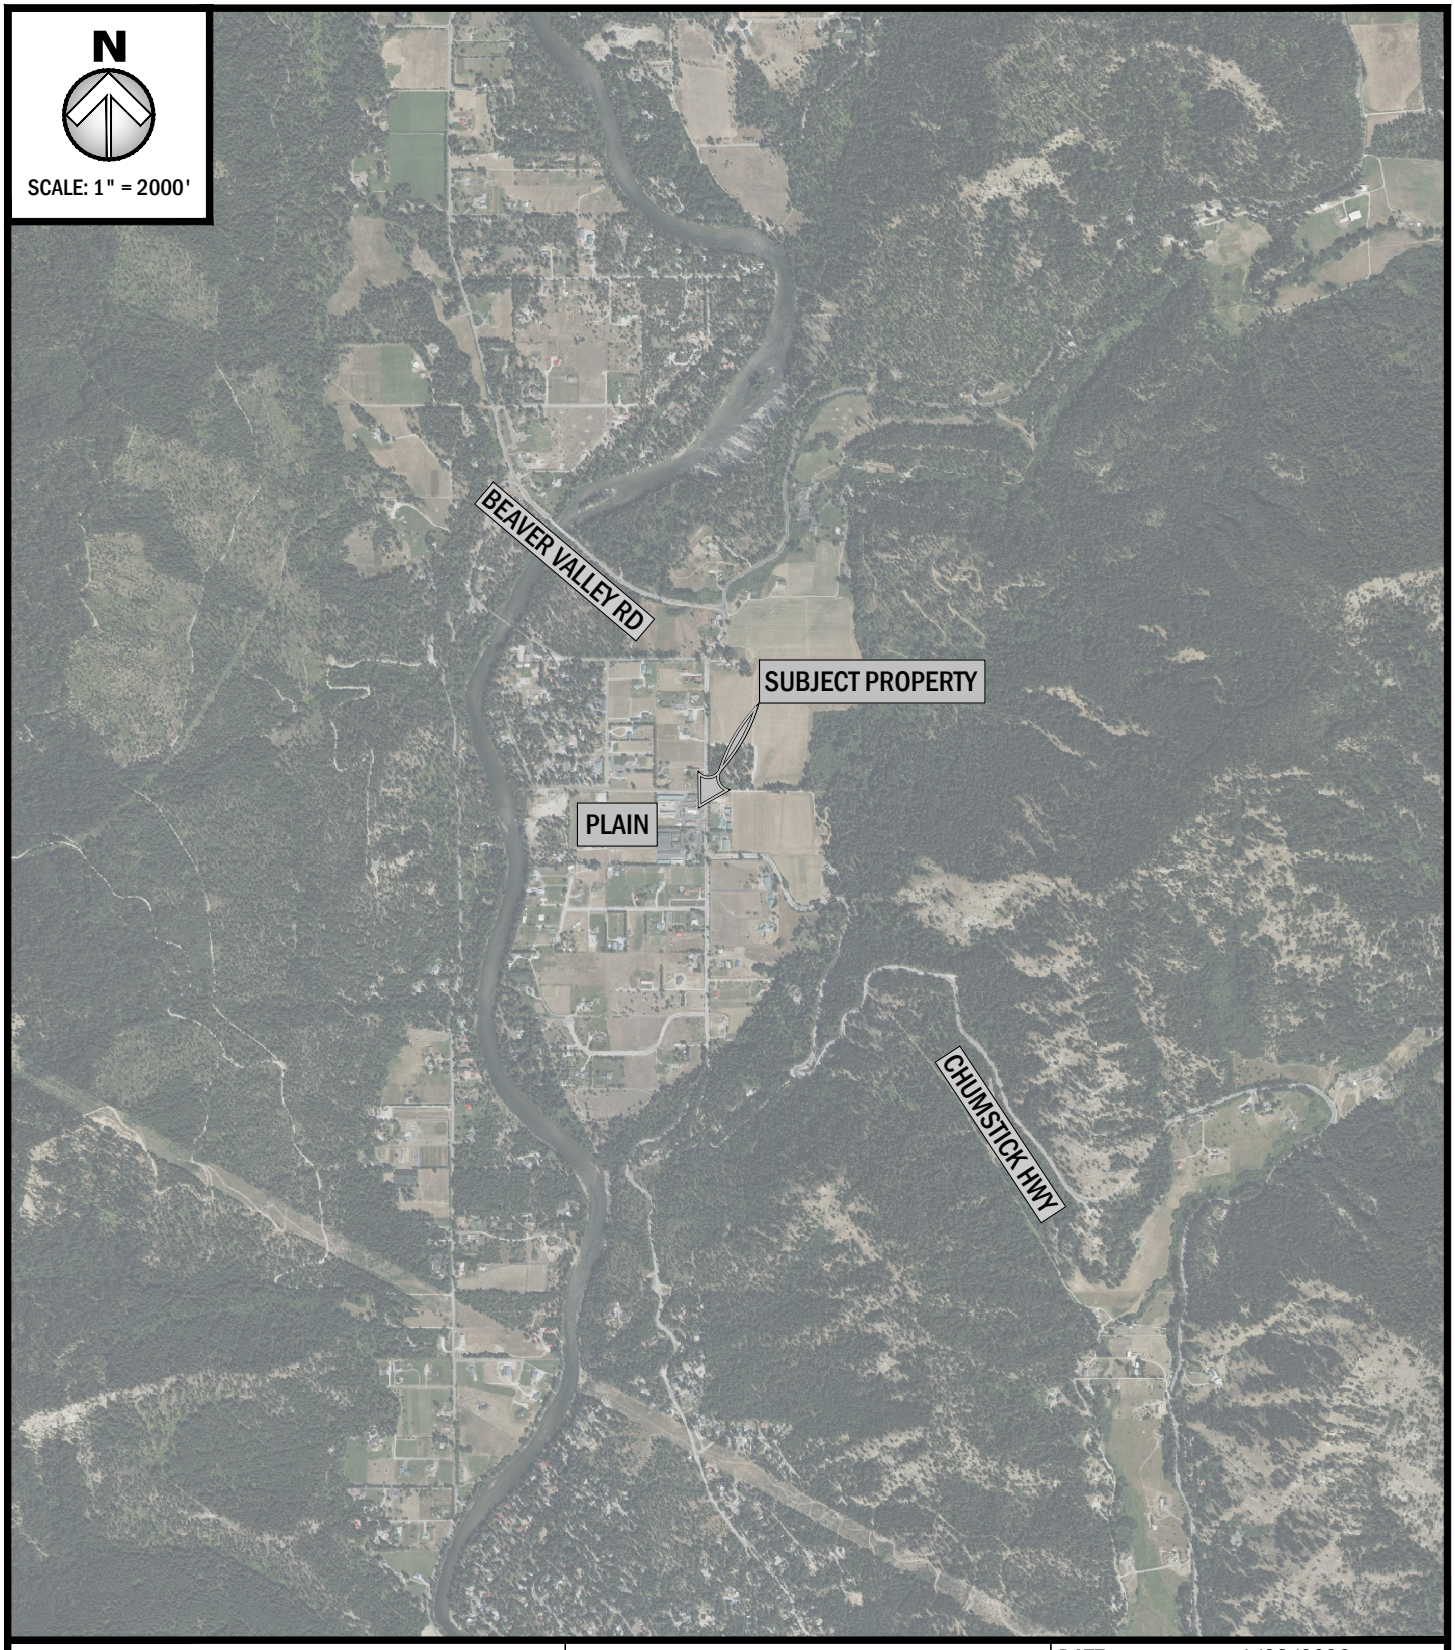
9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The Comprehensive Plan recognizes the Plain–Lake Wenatchee area as a rural community where residents and visitors depend on localized access to basic goods, services, and visitor-support amenities. The Plan's vision for this study area emphasizes maintaining the rural lifestyle while allowing localized services that meet community needs. Concentrating commercial uses in appropriate locations—rather than dispersing them across large-lot residential areas—advances that policy direction. Allowing an RC designation helps ensure the public can access essential rural-scaled commercial services without long travel distances, improving convenience, economic vitality, and community resilience such as has been the need resulting from the State Highway 2 closures and damage to Chumstick Highway in December 2025.

The RC zoning district is specifically designed for commercial activity in rural settings without requiring urban utilities. These requirements protect public health by preventing contamination risks, maintaining proper waste disposal, and ensuring safe driveway spacing and circulation—all of which would become more challenging if similar commercial activity were scattered throughout RR5-zoned lands.

The Comprehensive Plan emphasizes the importance of supporting a balanced rural economy, including recreation-based and agricultural tourism sectors that rely on small-scale rural commercial activity.

An expanded RC zone allows community-serving businesses—such as small markets, outfitters, lodging, food service, or recreation-related retail—to operate in a manner that:

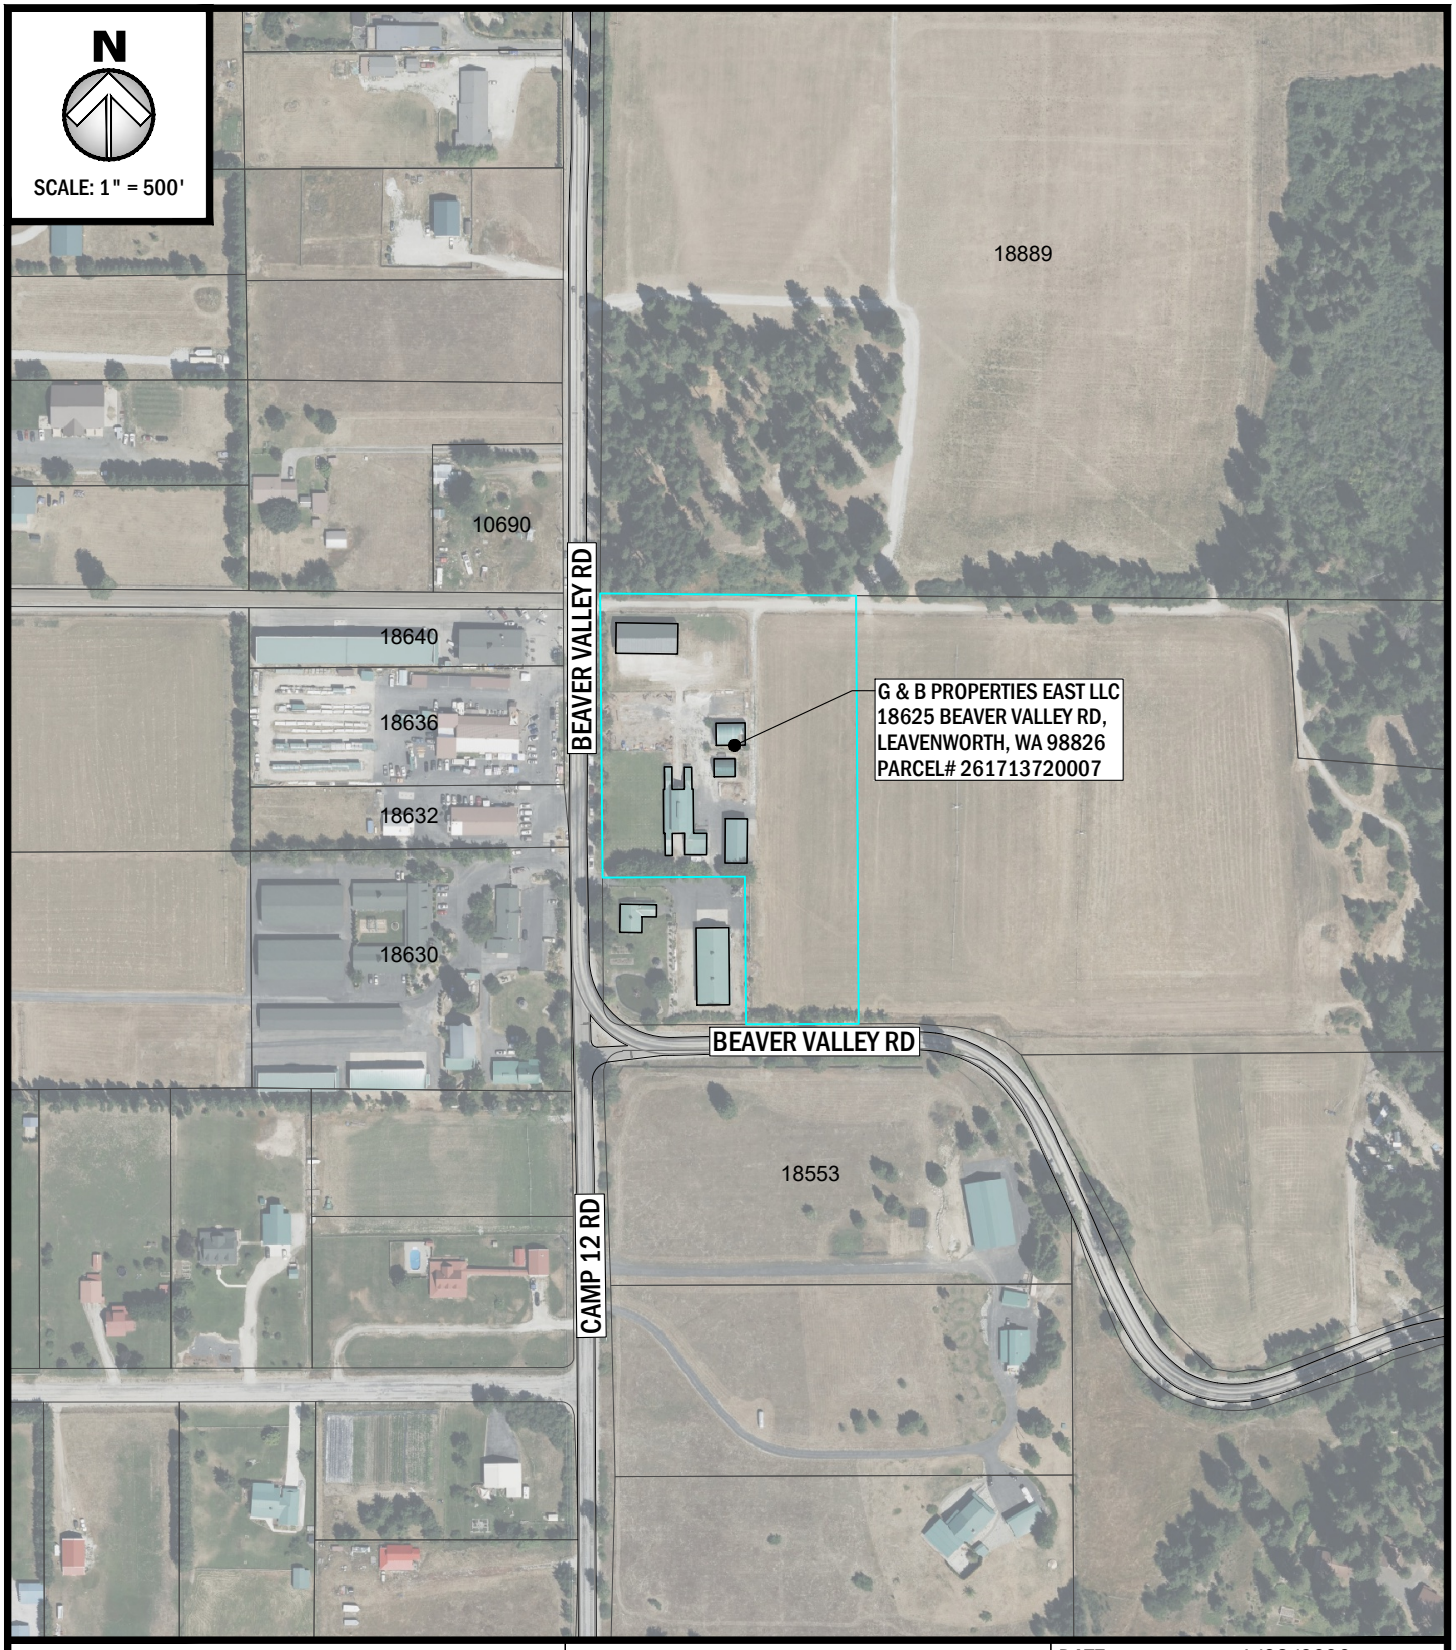


- Supports local employment;
- Provides goods/services to both residents and visitors, and;
- Reduces unnecessary long-distance trips to larger urban centers (which reduces traffic, fuel consumption, and emissions).

This contributes directly to the general welfare by enabling a functioning, sustainable rural community.

The Plan and zoning code both emphasize orderly, predictable development patterns. RC is one of the rural designations specifically created for commercial activities, whereas RR5 is intended for low-density rural residential use. The proposed change:

- Directs commercial activity into a zone where it is already occurring;
- Minimizes land-use conflicts between homes and businesses, and;
- Maintains compatibility with the broader Plain community's rural character.



This reduces nuisances, protects property values, and improves long-term community compatibility—key elements of the public's welfare.

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-signif icance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

Subject: Notice of Application for CPA 26-026 G&B Properties East LLC - Chelan County Dept. of Community Development
Attachments: CPA 26-026 NOA.pdf; CPA 26-026 - Affidavit of Posting NOA.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding G&B Properties East LLC's property, File# CPA 26-026. This notice should be posted on the subject property by February 19th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days, starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application, please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.
Thank you,

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impacts of these proposals.**

CPA 26-007 Heart for Homes - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Industrial (RI) to Rural Commercial (RC). 85 Chestnut St., Chelan Falls, WA 98817 also known as Assessor's Parcel No.: 27-23-32-515-096.

CPA 26-026 G&B Properties East LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 acres (RR5) to Rural Commercial (RC). 18625 Beaver Valley Road, Plain, WA 98826 also known as Assessor's Parcel No.: 26-17-13-720-007.

On February 19, 2026, these applications were noticed to the public, and no action will be taken on these projects until the agency comment period ends March 5, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Public Review and Comment Period: PUBLIC COMMENT ON THIS PROPOSAL IS ENCOURAGED and no action will be taken on the project until the Agency comment period ends on **March 5, 2026**. Agencies, tribes, and the public are encouraged to review and comment on the proposed project. Public comments will be accepted at any time prior to the close of the public record. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, original signature, and should be as specific as possible. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision and appeal the decision as provided by law. Written comments must be submitted to the Department of Community Development, 316 Washington St., Suite 301 Wenatchee, WA 98801; Attention: Susan Dretke or email susan.dretke@co.chelan.wa.us for additional information or to review application materials.

The complete case file on this matter is available for review online at https://co-chelan-wa.smartgovcommunity.com/PublicNotice/PublicNoticeHome; or during normal business hours at the offices of the Chelan County Community Development Department located at 316 Washington St., Suite 301 Wenatchee, WA 98801 Monday-Friday between the hours of 8:00 A.M. and 5:00 P.M. Please contact the on-call planner at (509) 667-6224 to arrange an inspection of the file.

DETERMINATION OF APPLICATION STATUS

Pursuant to Title 14, Development Permit Procedures & Administration, Section 14.08.030, Determination of Completeness. (CCBOR Resolution No. 2004-16, as amended)

Project Description: The proposal is a request to amend the current comprehensive plan map designation from Rural Industrial (RI) to Rural Commercial (RC).

File Number:	CPA 26-007
Related Files:	BP250717
Parcel Address:	85 Chestnut St., Chelan Falls, WA 98817
Parcel Zoning	Rural Industrial (RI)
Applicant/Owner:	Heart for Homes LLC
Mailing Address:	190 QuetilQuasoon Rd, Manson, WA 98831
Date Submitted:	1/12/26
Date Complete:	2/2/26

Upon Initial Review, The Above Referenced Application is Found To Be: COMPLETE

The required components of an application are present and are judged by the review authority to be technically accurate and contain sufficient information necessary to allow the processing of the application. All submittal fees have been paid.

Your application has been determined to be complete as of the date of this letter. Pursuant to Chelan County Code Section 14.08.030(5), a Determination of Completeness shall not preclude the department for requesting additional information or studies if the need for more information becomes apparent during processing of the proposed development.

Type: CPA 26-007

CODE REQUIREMENTS

The proposal/project shall conform to all applicable requirements of the International Fire Code and Chelan County Code administered by the Chelan County Fire Marshal.

FIRE FLOW FOR BUILDINGS

The minimum fire flow and flow duration requirements for one and two-family dwellings having a fire-flow calculation area which does not exceed three thousand six hundred square feet shall be seven hundred fifty gallons per minute. Fire flow and flow duration for dwellings having a fire-flow calculation area in excess of three thousand six hundred square feet shall not be less than that specified in Table B105.1(1) of the IFC, except that reduction in required fire flow of fifty percent, as approved, is allowed when the building is provided with an approved automatic sprinkler system.

FIRE FLOW MODIFICATIONS

The Fire Marshal may modify Fire-flow requirements downward by applying fire protection credits for isolated buildings or a group of buildings in rural areas or small communities where the development of full fire-flow requirements is impractical. Applicant is encouraged to contact this office to ascertain how the attached fire protection credits options apply to their project. A note on the face of the final short plat shall state: **"Without the installation of a fire hydrant capable of delivering the required fire flow and within the required distance to the lots in question, the applicant may choose one or any combination of alternatives using the installation of automatic fire sprinklers and/or fire protection credits as approved by the Fire Marshal."**

FIRE HYDRANTS

Fire hydrants serving single family or duplex dwellings shall have a maximum lateral spacing of 600 feet with no lot or parcel in excess of 300 feet from a fire hydrant when serving lots less than 43,560 square feet (one acre).

Fire hydrants serving single family or duplex dwellings shall have a maximum lateral spacing of 1000 feet with no lot or parcel in excess of 500 feet from a fire hydrant when serving lots greater than 43,560 square feet (one acre).

All fire hydrants shall be accessible to the fire department by roadways or accesses meeting the requirements of Chapter 15.30, Road Standards, and meet the requirements of 3.04.080 International Fire Code amended, Section 507.5.7, Fire Hydrant Installation and maintenance requirements.

BUILDINGS IN THE WILDLAND URBAN INTERFACE

Class A roofing/noncombustible roof covering, as defined in the International Building Code, shall be used in all areas of Chelan County. A note on the face of the final mylar shall state that **"All buildings that require a building permit within this short plat shall have Class A roofing materials."**

ADDRESS SIGNS

A note on the face of the final mylar shall state that **"New homes shall have approved address numbers, building numbers or approved building identification placed in a position that is plainly legible and visible from the street or road fronting the property."** The design of the proposed sign shall be submitted to the Fire District and/or Fire Marshal for approval prior to installation.

WILDLAND URBAN INTERFACE

A note on the face of the final mylar shall state that **"All buildings within this plat that require a building permit shall comply with the provisions of the Wildland-Urban Interface Code as adopted by Chelan County at the time the building permit is submitted".**

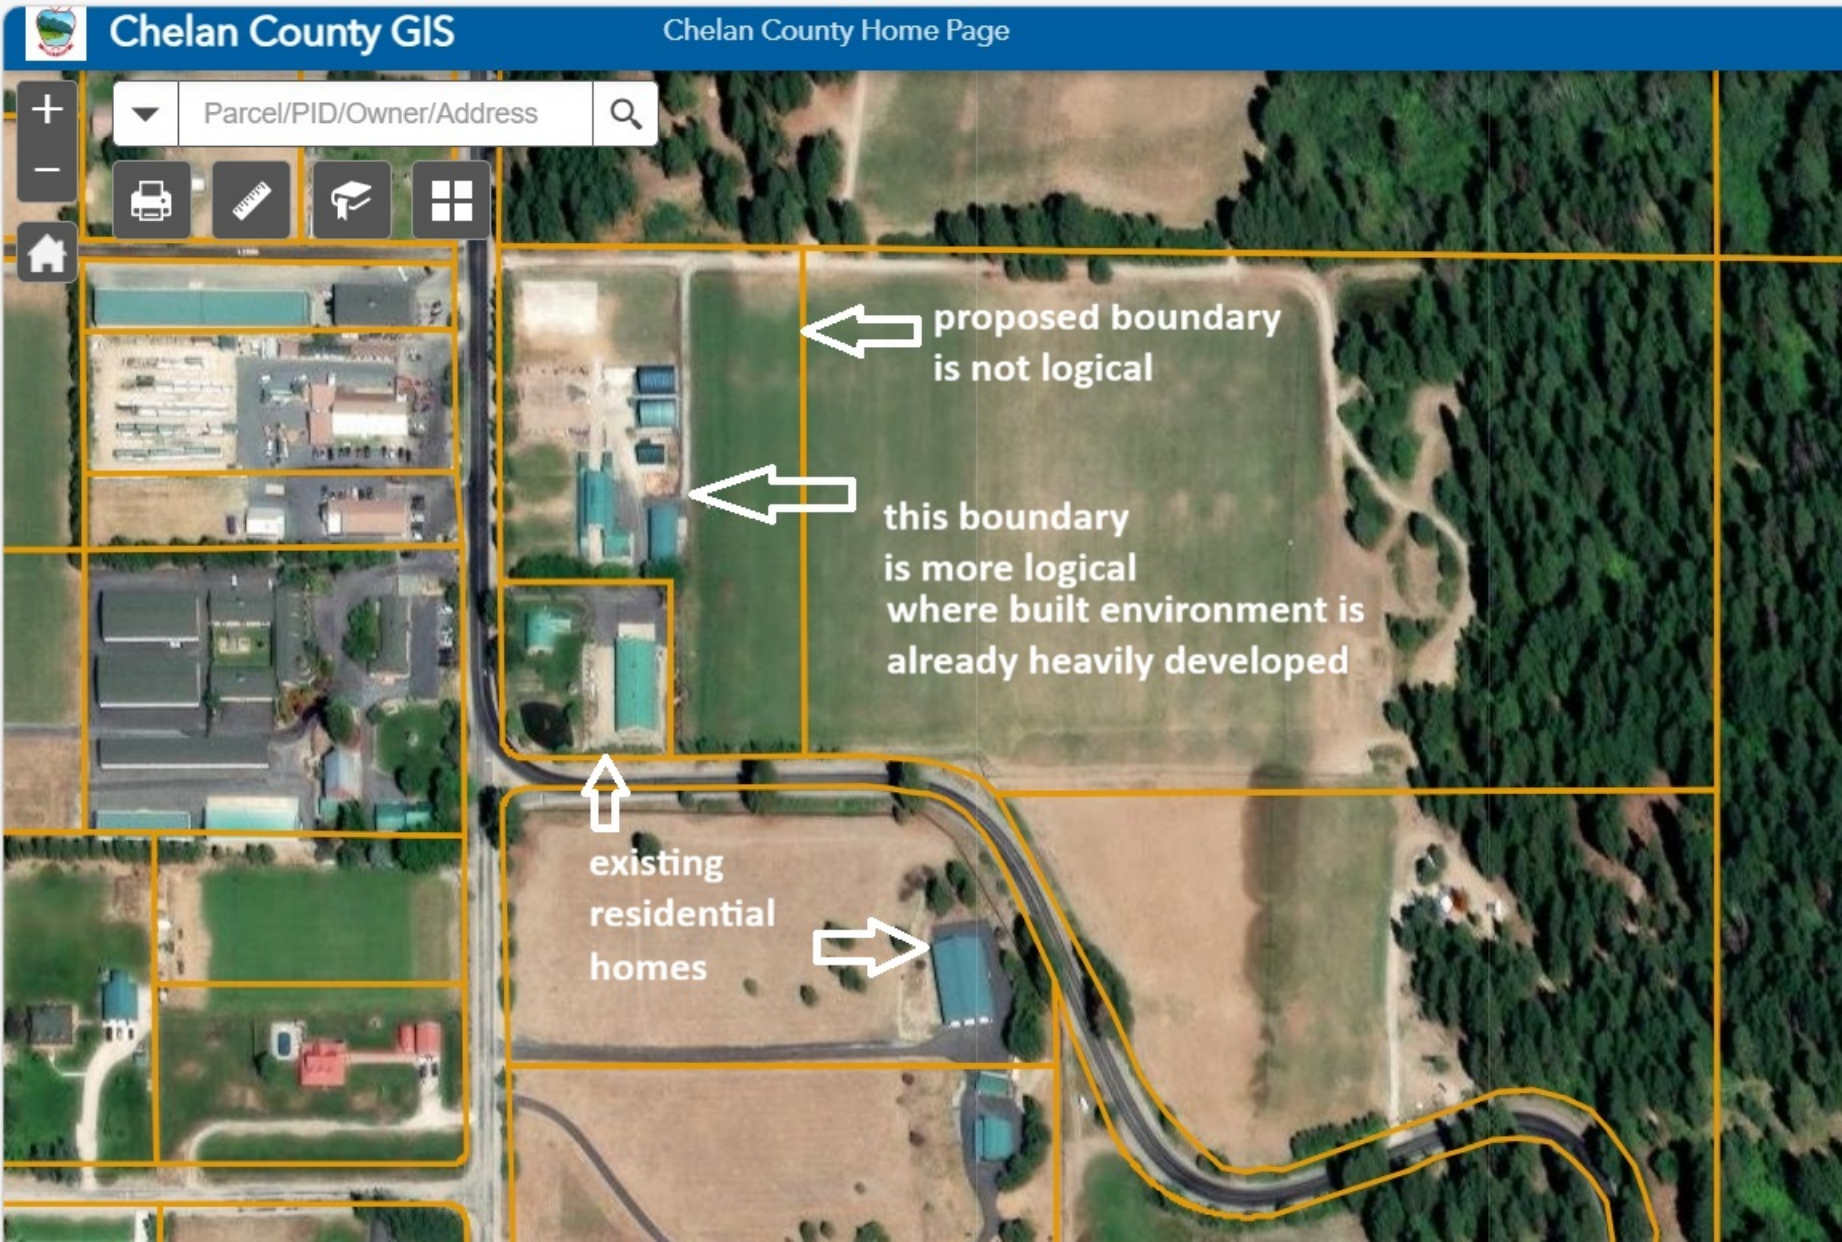
Subject: Public comment regarding CPA 26-026, Chelan County Comprehensive Map amendment application for Tax Parcel #261713720007

The subject Comp Plan amendment requests rezoning Tax Parcel #261713720007 from the existing RR5 designation to RC. The application discusses in great detail the appropriateness of the rezone due to this parcel's adjacency to the existing RC zoning across the "main street" of Plain. I support the RC designation for a portion of the parcel, the already heavily developed portion adjacent to the "main street" area, as it seems to fit the rezone criteria.

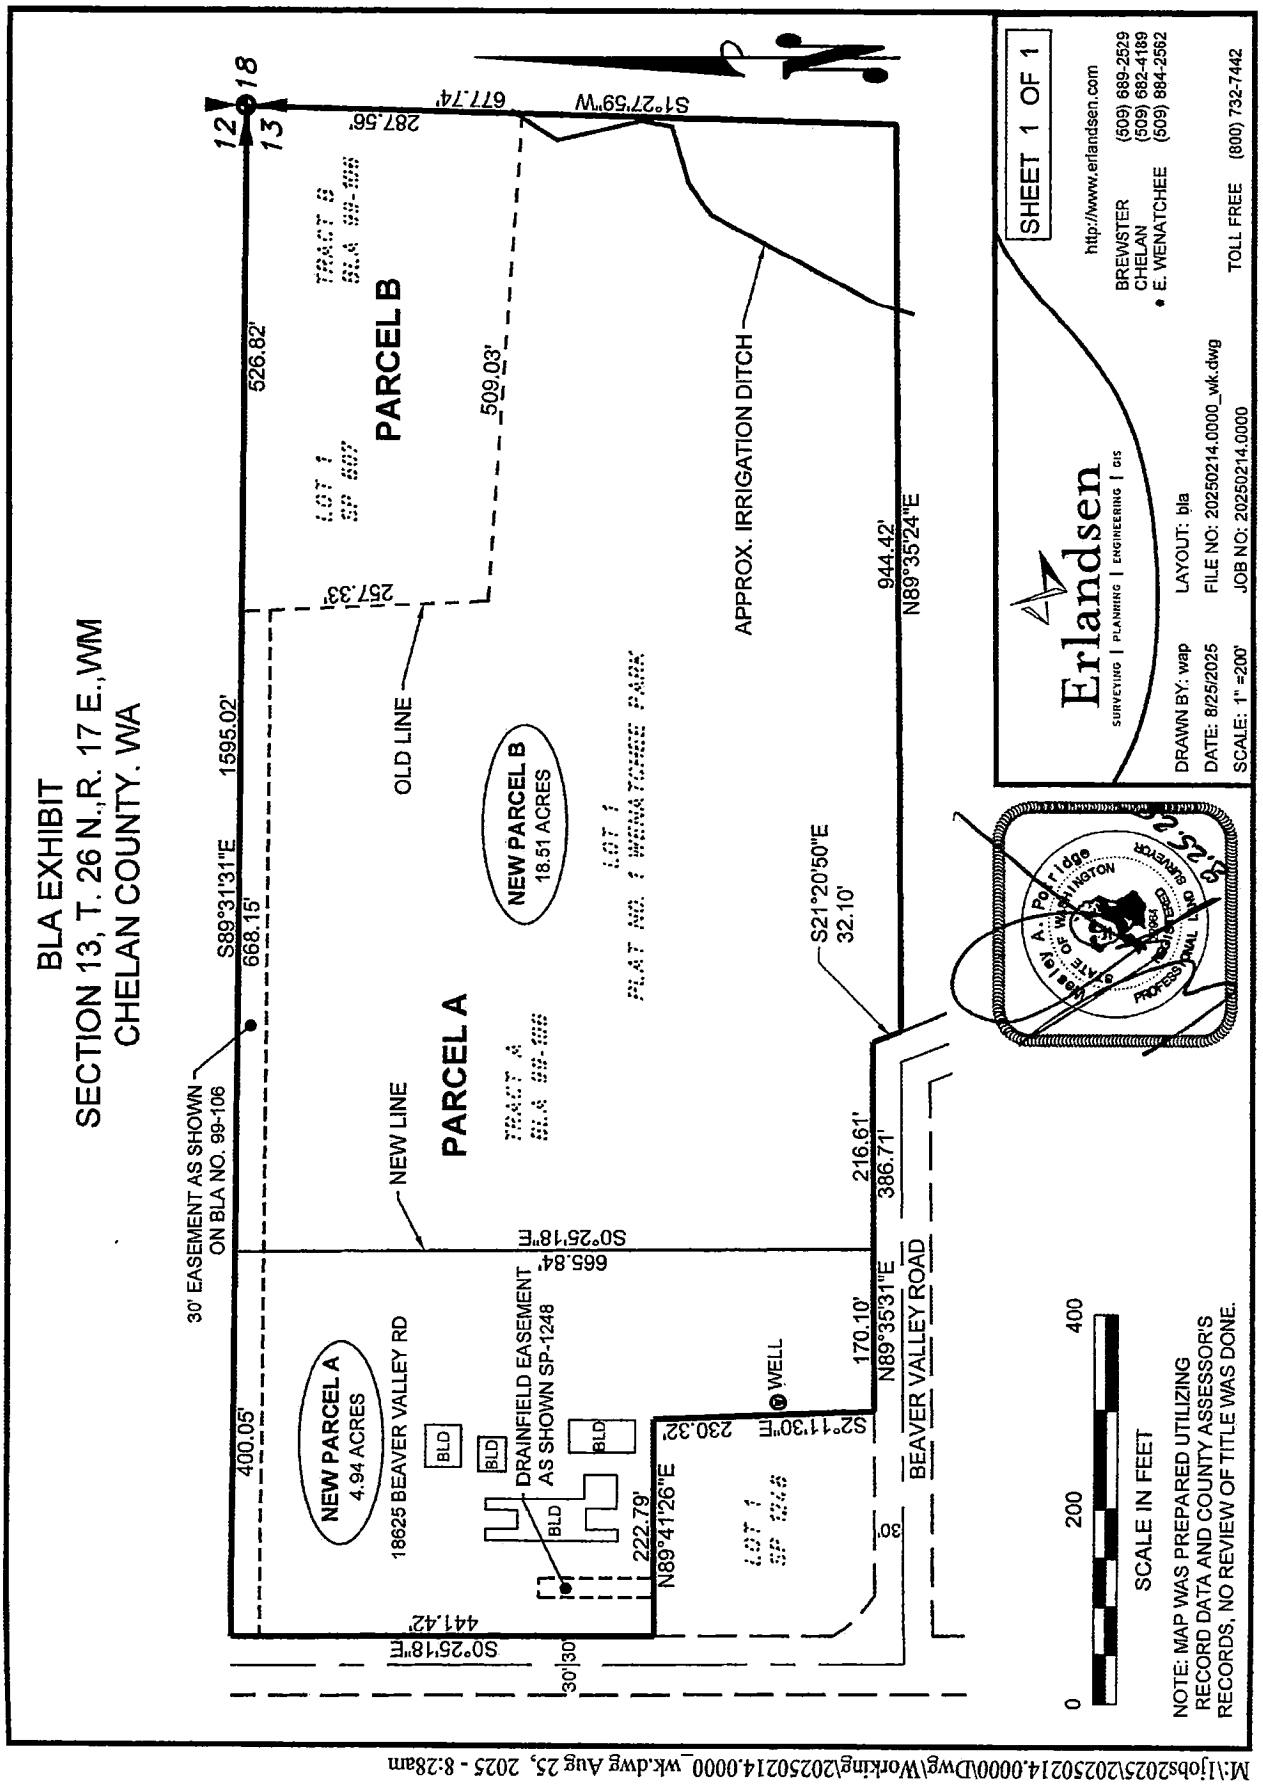
Criteria for RC rezone, taken from Chelan County Compressive Plan, Chapter 3.VII.E on Page 59:

E. RURAL COMMERCIAL (RC):

(in part, emphasis added)



These areas must be clearly identifiable as existing rural commercial developments, mixed use areas or intensely developed residential developments; *where a logical boundary can be delineated and set by the built environment*. Such a boundary shall not permit or encourage new rural commercial development outside of these boundaries.



The remaining portion of the parcel is undeveloped, and also abuts Beaver Valley Road after it turns from running north-south, to east-west. The character of the road changes from "main street" back to a "country road." This portion of the road does NOT support commercial development because it becomes sloped and curvy, having limited sight distances, and increased vehicle speeds. This portion of the road can become quite slippery and hazardous; we observe cars in the ditch throughout the winter. It would be hazardous to locate any driveways here.

Recently, in November of 2025, the subject property (Tax Parcel #261713720007) underwent a Boundary Line Adjustment (BLA), apparently in preparation for this rezoning application. While the new lot lines meet the criteria for a BLA, they do NOT meet the criteria for a re-zone to RC. As shown on the attached maps, the new property boundary lines do NOT provide a "logical boundary" for a zoning map change, as it greatly exceeds the built environment, and would encourage new commercial development in a current pasture immediately adjacent to existing residential homes. The boundary also seems illogical, in that commercial zoning would completely surround one existing residence.

I believe the rezone should only be granted if the boundary line is limited to only the existing heavily developed portion of the property, and not the entire 4.94 acre parcel. If this requires another BLA, this should not be onerous on the applicant, because they just went through this process. (It is unclear to me the rationale for the

BLA generated a parcel which is just below the RR5 minimum lot size of 5 acres, but I suspect there might be one)

Good afternoon,

Commerce's attached response to this proposed rezone under 60-day notice (RCW 36.70A.106) brought this project to my attention. It doesn't appear that we received the SEPA consultation notice in our agency mailbox, so I'm providing you with information related to the proposal at a later stage than the requested March deadline.

I note that Commerce has expressed significant concerns about this proposal. In case it ultimately moves ahead, please be aware of potential utilities improvements that would be associated with future development. The SEPA checklist for the current proposal notes only a single-party well & on-site (septic) system serving the site. *Not* in terms of the rezoning proposal itself, but if future commercial use(s) are developed on the site, it seems probable this subsequent development would trigger a new Group A public water system & potentially improvements to the existing septic system. WAC 246-290-020 provides information about public system thresholds. Any new/additional water rights for a new system would need to be allocated by Ecology.

There are already several Group A & B sources in the Plain area whose wellhead protection areas (WHPA) are shown below. The creation of an additional system would, in turn, apply another WHPA overlapping others in the vicinity. Because of this, it appears that such development would also require compliance with Chapter 11.82 CCC.

Source: https://experience.arcgis.com/experience/9dc3fd45206d450f828ebd7ed9cdf7be

If this project is approved and proceeds into commercial development, we'd be happy to provide more targeted consultation on necessary improvements. Thank you for your consideration.

Re: Proposed Changes to Chelan County's 60-day Notice of Intent to Adopt Amendment--2026-S-11534

Dear Ms. Walter:

Thank you for the opportunity to comment on the proposed changes to Chelan County's comprehensive plan. We appreciate your coordination with our agency as you work to achieve the community's vision consistent with the goals and requirements of the Growth Management Act (GMA). We encourage you and your community to consider the following as you present these amendments to your appointed and elected officials.

The Department of Commerce has significant concerns about this amendment as proposed, which, if adopted, is a clear violation of Washington State's Growth Management Act (GMA). This amendment proposes to change the land use designation for 4.94 acres at 18625 Beaver Valley Road in Plain, WA from Rural Residential Resource 5 (RR5) to Rural Commercial (RC).

The GMA was amended in 1997 to provide flexibility in comprehensive plans for economic development while maintaining rural character. The amendments allowed counties to identify LAMIRDs, which are areas of higher intensity commercial, industrial, residential, or mixed-use development.[1] LAMIRDs are characterized as shoreline development, villages, hamlets, rural activity centers, or crossroads developments.

The GMA identifies three types of LAMIRDS. Type I contains existing commercial, industrial, residential, and mixed uses as described in RCW 36.70A.070(5)(d). GMA laws pertaining to LAMIRDS address the need to reduce low-density urban sprawl in rural areas, a main goal of the GMA.

When designating LAMIRDs, counties must "adopt measures to minimize and contain the existing areas or uses of areas of more intensive rural development."[2] The law is very specific

[1] RCW 36.70A.070(5)(d)
[2] RCW 36.70A.070(5)(d)(iv)

in limiting LAMIRDs to the existing development patterns on the landscape **as they existed on July 1, 1990**.[3] This is primarily determined by the built environment at that time. A core function of LAMIRDS is a logical outer boundary that does not allow for expansion of low-density rural sprawl.

In addition, these rules are clearly stated in the Chelan County Comprehensive Plan Land Use Chapter, Section IV, Designations/Siting Criteria – Rural, E. Rural Commercial (RC):

> "This designation is considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act where it is applied to existing mixed use areas."
>
> "Purpose: These areas must be clearly identifiable as rural commercial developments, mixed use areas or intensely developed residential developments where a logical boundary can be delineated and set by the built environment. **Such a boundary shall not permit or encourage new rural commercial development outside of these boundaries."**

And Section V. Limited Areas of More Intensive Rural Development (LAMIRD), Intent of the Chelan Comprehensive Plan:

> "LAMIRDS are not intended by the Legislature to be mini-UGAs, suburbs or areas for significant development. LAMIRDS are rural; they are contained and compact, and, with minor exceptions, were built before July 1, 1990."

The other two types of LAMIRDS) can be created new. Type II allows for the creation of **small-scale recreational or tourist uses.**[4] Type III allows development of isolated cottage industries and isolated small-scale businesses that are **not** principally designed to serve the existing and projected rural population.[5]

To reiterate, new Type I LAMIRDS are not allowed under the GMA, and this comprehensive plan amendment, if adopted, would clearly violate rural planning provisions in 36.70A.070(5) as well as the Chelan County Comprehensive Plan. The Washington State Department of Commerce, Growth Management Services, therefore advises Chelan County to **deny** this comprehensive plan amendment.

Effective Date

The effective date for decisions to create or expand a limited area of more intensive rural development, according to RCW 36.70A.067, must not go into effect until 60 days after notice of the decision has been published, or in cases where a petition has been filed with the hearings board, when the case has been resolved. The Dept. of Commerce interprets RCW 36.70A.067 as publication in the newspaper. Please see RCW 65.15.160, Publication of Ordinances for more information.

Thank you again for the opportunity to comment. If you have any questions or need technical assistance, please contact me at joanne.wright@commerce.wa.gov or (509) 601-0385.

RE: G & B Properties East LLC (CPA 26-006) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 5 acres (RR5) to Rural Commercial (RC). The subject property is located at 18625 Beaver Valley Rd., Plain WA 98826 (county tax parcel: 261713720007)

As proposed, I have no objections to further approval of this project.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 4.94 acres from to Rural Residential/Resource 5 (RR 5) to Rural Commercial (RC).

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: RR5 used for fire camps public cross country skiing and offroad rally events
   South: RR5 Residential
   East: RR 5 Open space, hay harming and offroad rally events
   West: RC commercial uses including grocery store, fuel sales, hardware store, restaurant farmers market, short term rentals and mini storage
4. What is the current use of the property? Residential, industrial metal fabrication, agricultural including agricultural support
5. Sanitation Disposal: ❑ N/A ☒ Septic Permit ❑ Sewer District: _____
6. Water Source: ❑ N/A ☒ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted**.***

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

gw RW 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

gw RW 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

gw RW 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

gw RW 4. Additional permit applications and approvals may be necessary to conduct specific activities.

gw RW 5. Application fees are non-refundable, except when approve by the Board.

gw RW 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

gw RW 7. Chelan County is hereby given consent to enter the property(ies) listed above.

gw RW 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

gw RW 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

gw RW 10. I certify that this application has been made with the consent of the lawful property owner(s).

gw RW 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

gw RW 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

SEPA[1] Environmental Checklist

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

A.Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**

   G&B Properties East LLC Comprehensive Plan Map Amendment and Rezone

2. **Name of applicant:**

   G&B Properties East LLC; Grahame Watson

3. **Address and phone number of applicant and contact person:**

   Grahame Watson; G&B Properties East LLC
   18623 Beaver Valley Road
   Plain, WA 98826
   509-670-3796

   Agent:
   Ryan Walker
   Pacific Engineering and Design, PLLC
   200 South Columbia St, Suite 300
   Wenatchee, WA 98801
   5409-630-7917
   ryanw@pacificengineering.net

4. **Date checklist prepared:**

   January 2026

5. **Agency requesting checklist:**

   Chelan County

6. **Proposed timing of schedule (including phasing, if applicable):**

   The application will follow the Chelan County process for Comprehensive Plan Map Amendments.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   Rural commercial uses such as a public market may be proposed in the future.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   Stream Typing (Pacific Engineering 2025)

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

Comprehensive Plan Map Amendment and Zoning Map Amendment.

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 4.94 acres from to Rural Residential/Resource 5 (RR 5) to Rural Commercial (RC).

The zoning and comprehensive plan designations are proposed to be changed to align the property with the rural commercial nature of Plain. The adjacent property to the west is zoned Rural Commercial, which is the zone that the subject property is proposed to be changed to.

Beaver Valley Road runs north/south between the commercial zone and the subject property. The road has become the de facto main street of Plain as the community has grown and demand for commercial uses has expanded. Because the subject property is immediately across the street from the commercial core of Plain the more appropriate zoning is for them to also be zoned commercial based on the nature of the existing development district uses and a logical outer boundary.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 18625 Beaver Valley Road in Plain, WA, within Section 13, T 26N, R 17E.W.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. General description of the site:

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. What is the steepest slope on the site (approximate percent slope)?

5%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Soil mapped for the property on the USGS soil survey website (https://websoilsurvey.nrcs.usda.gov) is Chiwawa gravelly fine sandy loam, 0-3 percent slopes (CmA); Wintoner silt loam, 0-3 percent slopes (WnA); and Wintoner silt loam, 3 to 8 percent slopes (WnB). CmA is prime farmland; WnA is prime farmland if irrigated and WnB is farmland of statewide importance.

None of the soil will be removed.

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling, excavation or grading is proposed.

f. Could erosion occur because of clearing, construction, or use? If so, generally describe.

No.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

There will be no change in the impervious surface.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any.

None.

2. Air

Find help answering air questions[4]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air

None.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None.

3. Water

Find help answering water questions[5]

a. Surface:

Find help answering surface water questions[6]

1. Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

No. The DNR stream typing map shows a type N stream but it has been determined to not be present.

2. Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3. Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None.

4. Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.

No.

5. Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6. Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

No.

b. Ground:

Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No.

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   No waste material will be discharged.

c. Water Runoff (including stormwater):

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   There will be no change in stormwater runoff.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None.

4. Plants

Find help answering plants questions

a. Check the types of vegetation found on the site:

☒ **deciduous tree: alder, maple, aspen, other**

☒ **evergreen tree: fir, cedar, pine, other**

☒ **shrubs**

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

☒ **grass**

☐ **pasture**

☐ **crop or grain**

☐ **orchards, vineyards, or other permanent crops.**

☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

☐ **water plants: water lily, eelgrass, milfoil, other**

☐ **other types of vegetation**

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions[8]

a. List any birds and other animals that have been observed on or near the site or are known to be on or near the site.

Examples include:

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

None.

e. **List any invasive animal species known to be on or near the site.**

None known.

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

The plan amendment does not have energy needs.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

No.

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

None.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

No.

1. **Describe any known or possible contamination at the site from present or past uses.**

   None known.

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

   None known.

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

   None known.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

4. **Describe special emergency services that might be required.**

   None known.

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   Beaver Valley Road is adjacent to the property to the west. It is a primary route between Leavenworth and Plain. It is the alternate state highway route when State Route 2 is closed in Tumwater Canyon which causes vehicle noise.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   The comprehensive plan map amendment will not generate noise.

3. **Proposed measures to reduce or control noise impacts, if any:**

   None.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

The current use of the site is residential and agricultural. The adjacent properties to the west are used for commercial purposes. Properties to the north, east and south are used for residential and agricultural purposes. Additionally, the properties to the north and east host several large gatherings each summer which bring thousands of tourists to Plain for the Northwest Overland Rally (https://overlandadventurerallies.com/nwor/) and Touratech Rally (https://www.touratechrally.com/). The adjacent properties are routinely used as a fire camp in the summer months which results in the establishment of a temporary city providing lodging, bathing facilities, food service and logistics for hundreds of employees. In the winter months the adjacent properties are used for public Nordic skiing including groomed trails and parking available for pass holders managed through Plain Valley Ski Trails (https://www.skiplain.com/)

The surrounding area is currently used for commercial purposes and events and therefore the proposal will not affect existing land uses.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

Yes. The property has been used as a hay farm including growing, harvesting and storage of agricultural products.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

   No.

c. Describe any structures on the site.

Parcel no. 261713720007: Two hay storage structures, 4,608 sq ft steel frame storage building, 2,160 sq ft storage building, two agricultural buildings.

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

Rural Residential/Resource 5.

f. What is the current comprehensive plan designation of the site?

Rural Residential/Resource 5.

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No.

i. Approximately how many people would reside or work in the completed project?

None.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

None proposed.

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.

None proposed.

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None proposed.

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

   None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

   None.

c. **Proposed measures to reduce or control housing impacts, if any:**

   None proposed.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

   No structures proposed.

b. **What views in the immediate vicinity would be altered or obstructed?**

   No.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

   None proposed.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

   None.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

   No.

c. **What existing off-site sources of light or glare may affect your proposal?**

   None.

d. **Proposed measures to reduce or control light and glare impacts, if any:**

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing
[13] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics
[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

None proposed.

12. Recreation

Find help answering recreation questions

a. What designated and informal recreational opportunities are in the immediate vicinity?

Hiking, bicycling, Nordic skiing and rafting occur in the vicinity.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None proposed.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

According to the DAHP WISAARD online mapping tool, the Wenatchee Chiwawa Irrigation canal located to the east is an eligible historic feature. The Burgess homestead and sawmill are located to the north.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The DAHP WISAARD online mapping tool was used.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

14. Transportation

Find help with answering transportation questions[16]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Beaver Valley Road fronts the property on the west and south sides. No new access is proposed.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

No. The nearest transit stop is in Leavenworth.

c. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

d. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

e. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

None.

f. Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

g. Proposed measures to reduce or control transportation impacts, if any:

None proposed.

15. Public services

Find help answering public service questions[17]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation
[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities

Find help answering utilities questions[18]

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

x Grahame Watson

Type name of signee: Grahame Watson

Position and agency/organization: Owner

Date submitted: 1/28/2026

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

   The proposal may result in construction of a new onsite septic system in the future. Future construction could increase storm water runoff and emissions during construction.

   - **Proposed measures to avoid or reduce such increases are:**

     All future development will comply with local state and federal regulations including critical areas, storm water management and onsite septic requirements.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature
[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

Future development would not affect plants, animals, fish or marine life. The property is currently intensively used for agriculture, farm machinery and are adjacent to commercial uses which receive hundreds of customers per day.

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

  Compliance with Chelan County Critical area regulations at the time of development.

3. How would the proposal be likely to deplete energy or natural resources?

The proposal would not deplete energy or natural resources. Plain is served by Chelan County PUD which provides abundant clean, renewable energy.

- **Proposed measures to protect or conserve energy and natural resources are:**

  Future development is likely to use low energy lighting such as LEDs and will comply with the energy code in effect at the time of building.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

Future use of the property may reduce hay farming on approximately 2.4 acres of prime farmland.

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

  Compliance with Chelan County Critical area regulations at the time of development.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

The property is not located in the shoreline zone and are not regulated by the Shoreline Management Act or Chelan County Shoreline Master Program.

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

  Future development of the property would meet all county regulations for land use.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Future commercial uses could increase trips to the Plain community thereby adding more vehicle trips to area roads and the potential for more emergency service needs. Future customers are likely to be residents or guests from the Plain and Lake Wenatchee area who would otherwise need to travel to Leavenworth. Therefore, the future commercial use of the property may reduce the length of vehicular trips and decease traffic in Tumwater Canyon and Chumstick Highway.

- **Proposed measures to reduce or respond to such demand(s) are:**

  Compliance with Chelan County Code at the time of development. Future development would include construction of a cistern to provide onsite fire flow.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

The proposal will not conflict with any laws for the protection of the environment.

TECHNICAL MEMORANDUM

January 28, 2026

TO: Chelan County Planning Commission
316 Washington Street Suite 301
Wenatchee, WA 98801

FROM: Ryan Walker, Environmental Department Manager
Pacific Engineering & Design P.L.L.C.

SUBJECT: G&B Properties East LLC Application for Comprehensive Plan Map Amendment

Chelan County Code 14.14.050 Application for Comprehensive Plan Map Amendment Review Criteria.

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 4.94 acres from to Rural Residential/Resource 5 (RR 5) to Rural Commercial (RC). The property is located on Beaver Valley Road in Plan, within Section 03, T 26N, R 17E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 36.

The zoning and comprehensive plan designations are proposed to be changed to align the property with the rural commercial nature of Plain. The adjacent properties to the west are zoned Rural Commercial, which is the zone that the subject property is proposed to be changed to.

Beaver Valley Road runs north/south between the commercial zone and the subject property. The road has become the de facto main street of Plain as the community has grown and demand for commercial uses has expanded. Because the subject property is immediately across the street from the commercial core of Plain the more appropriate zoning is to also be zoned commercial based on the nature of the existing development district uses and a logical outer boundary.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

Growth Management Act Goals

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An

additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for commercial use, while the demand for rural commercial services in the Plain and greater Lake Wenatchee area is high.

The high demand and low inventory of commercial property is causing Plain to burst at its seams. During the winter, vehicles are parked on both sides of Beaver Valley Road to visit the hardware store, restaurant, grocery store and gas station. Demand for Nordic ski rentals and groomed trails—both available in Plain—is a significant driving factor. In the winter months the adjacent properties are used for public Nordic skiing including groomed trails and parking available for pass holders managed through Plain Valley Ski Trails (https://www.skiplain.com/). In the summer months, parking along the road is even more over-capacity on weekends for the popular Plan Valley Farmers Market. The properties across the road from the commercial zone host several large gatherings each summer which bring thousands of tourists to Plain for the Northwest Overland Rally (https://overlandadventurerallies.com/nwor/) and Touratech Rally (https://www.touratechrally.com/). The adjacent properties are routinely used as a fire camp in the summer months which results in the establishment of a temporary city providing lodging, bathing facilities, food service and logistics for hundreds of employees.

Plain Cellars Winery and Tasting Room is located nearby which serves food and beverages and hosts weekly live music events (https://www.plaincellars.com/).

RCW 36.70A.020(1) encourages urban growth. The property is not located in an urban growth area but are located in the epicenter of commercial property in the Plain and Lake Wenatchee area. Encouraging growth adjacent to existing commercial uses concentrates that use in an appropriate setting.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land that would be concentrated in a commercial area. The best use for this land is allowing commercial growth from within to expand to a logical boundary while preserving open space and critical areas outside the commercial core.

RCW 36.70A.020(3) encourages reducing greenhouse gas emissions from transportation and minimizing per capita vehicle miles travelled. Future increases in commercial services would be intended to serve residents or guests from the Plain and Lake Wenatchee area who would otherwise need to travel to Leavenworth. Therefore, the future commercial use of the property may reduce the length of vehicular trips and decease traffic in Tumwater Canyon and Chumstick Highway resulting in a reduction in emissions and miles travelled.

RCW 36.70A.020(5) encourages economic development throughout the state that is consistent with adopted comprehensive plans, promotes economic opportunity for all citizens of this state including recruitment of new businesses and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

Approval of this rezone encourages rural economic development by allowing business expansion and new recruitment that is consistent with the local context. Rural-based economies

enhance the state's desirability and quality of life. In order to continue to meet the goal, expanded commercial uses need to maintain the visual and social character of the rural community which can be achieved through approval of this application to align the zoning districts on both sides of Beaver Valley Road.

RCW 36.70A.020(11) emphasizes public participation and coordination. This application will be publicized per CCC Title 14 including posting a public notice on the site, mailing to nearby property owners and publishing in the Wenatchee World newspaper. The Planning Commission and Chelan County Commissioner meetings will be publicized and encourage public participation. The residents of Plain should determine its future.

RCW 36.70A.020(14) urges to consider climate change and resiliency by mitigating the effects of a changing climate; supporting reductions in greenhouse gas emissions and per capita vehicle miles traveled. Providing opportunity for expanded local commercial services reduces the need for residents to drive long distances (e.g., to Leavenworth or Wenatchee), which aligns with not only this GMA goal but also the county's new 2026 Climate Resilience Sub-Element aimed at reducing environmental impacts.

County Wide Planning Policies

Policy 4: The proposal is consistent with the policies for county-wide transportation facilities and strategies, through compliance with the Transportation Element discussed below. Beaver Valley Road is classified as a Major Collector under the Roadway Functional Classification within the Transportation Element.

Beaver Valley Road is identified on the Freight and Goods Transportation System Map within the Transportation Element as a T3 Tonnage Class (up to 4,000 annual tons) which is one of the highest classifications in the county.

Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, subsection III states: “consideration should be given to diversification of the economic base to provide opportunities for economic growth in all communities on the county-wide basis to ensure a healthy stable economic base.”

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan’s goals and policies.

The Comprehensive Plan recognizes the county’s long-standing rural economic base, including agriculture, tourism, and small-scale rural commercial activities. The Plan notes that many rural areas have transitioned toward “vineyards, wineries, smaller-scale agricultural production, and agricultural and recreational tourism” over the last two decades.

Expansion of the Rural Commercial designation allows appropriately scaled commercial uses that directly serve rural residents and tourists. This supports the Plan’s emphasis on maintaining and diversifying the rural economy while providing services compatible with rural character. A Rural Commercial designation provides a mechanism for limited commercial activity that fits within this established rural pattern, aligning with the Rural Element’s purpose of encouraging local services while avoiding sprawl.

The proposed map amendment to Rural Commercial is consistent with the Chelan County Comprehensive Plan because it:

- Promotes rural economic vitality,
- Supports rural-appropriate commercial activity,
- Aligns with GMA-based planning principles,
- Conforms to County map amendment criteria, and
- Advances the Comprehensive Plan's long-term vision for rural communities.

The following goals and policies are directly supported by the proposed map amendment

Land Use Element; Industrial and Commercial Development

"Rural industrial land uses are common throughout the County, including orchard processing and packaging facilities and mining. Rural commercial areas provide areas for necessary services and/or recreational support in isolated regions of the County. Both rural commercial and industrial are appropriate for Chelan County's unique land uses and provide rural employment opportunities. When appropriate with the area these types of uses are vital to residents and visitors."

Rural Element

Goal RE 4: Encourage rural economic development consistent with the goals and policies of the Chelan County Comprehensive Plan and the Growth Management Act.

Rationale: The comprehensive plan provides for a range of rural economic activities including: rural agriculture, forestry, and mineral resource industries as well as a range of rural development opportunities consistent with the Growth Management Act.

Policy RE 4.1: Permit rural development of small scale recreational, tourist, and resort uses that rely on a rural location and setting, including commercial facilities to serve such uses, provided they do not include new residential development and are otherwise consistent with other goals and policies of this plan.

Rationale: These uses are appropriate in rural areas when it can be demonstrated that they are compatible with the goals and policies of the comprehensive plan. Public services and public facilities shall be limited to those necessary to serve the recreational or tourist use and shall be provided in a manner that does not permit low density sprawl.

Policy RE 4.2: Additional commercial centers or activities may be considered in existing rural activity centers, villages, hamlets, or crossroad developments in the rural area during the yearly amendment process for the comprehensive plan when consistent with RCW 36.70A.070(5) and the goals and policies of the comprehensive plan.

Rationale: Limited commercial development may be appropriate in some rural areas to meet the needs of residents and visitors.

Economic Development Element

Goal ED 1: Encourage efforts to diversify the existing economic base to focus on long-term sustainable economic development throughout the County.

Rationale: The diversification of the economic base through sustainable economic development can help provide expanded job opportunities as well as a healthy, stable and growing economy. Diversification will reduce negative impacts during shifts in industries.

Policy ED 1.1: Seek to attract businesses and industries that complement and build upon existing business and industry.

Rationale: Building upon relationships with existing business and industries can diversify the economic base and strengthen positions for existing businesses and industries.

Policy ED 1.2: Incentivize development that creates local re-investment funds and provides jobs in the local community.

Rationale: Diversification and expansion of the County's economic base will expand job opportunities and bring additional resources for the growth and development of the County.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

The Comprehensive Plan emphasizes supporting rural character, facilitating rural-appropriate commercial and residential uses, and accommodating long-standing economic activities such as agriculture, tourism, and small-scale commercial enterprises. The proposed amendment aligns with the Comprehensive Plan's intent by supporting rural-appropriate development compatible with surrounding land uses and the County's economic and cultural landscape.

The Comprehensive Plan's land use elements articulate that Chelan County's rural environment is characterized by "residential rural living; forest practices, rural industrial activities, mining, and small-town settlements," with commercial uses generally allowed when they support or complement these patterns. The proposed designation supports uses of a rural scale and intensity that fit within the established pattern of rural commercial services in Plain ensuring that future development remains consistent with rural service levels and avoids urban-level impacts

Future commercial development will be designed and intended to serve the rural population of Plain and Lake Wenatchee. There is a logical outer boundary to define the limits of the commercial area established by Beaver Valley Road passing through Plain. Locating commercial zones on both sides of the road (instead of commercial on one side and residential on the other) is a clearly identifiable and contained boundary as specified by the General LAMIRD Criteria. It is not intended to draw visitors from farther reaches such as Leavenworth or Wenatchee which is consistent with the goal and policies for LAMIRDs and Rural Commercial designation and siting criteria summarized below.

General LAMIRD Criteria

Type 1 LAMIRD- commercial, industrial, residential, or mixed-use. Type 1 LAMIRDs are described as rural development consisting of existing and potential infill of commercial, industrial, residential, or mixed use, whether characterized as shoreline developments, villages, hamlets, rural activity centers, or crossroads developments. These LAMIRDs must be principally designed to serve the existing and projected rural population. It is also important that these designations are consistent with the character of the existing uses, particularly in terms of building size, scale, use or intensity. Changes in use from vacant land or some previous use may be allowed, provided the new use complies with these requirements.

Rural Commercial Designation/Siting Criteria

The Rural Commercial designation is considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act where it is applied to existing mixed use areas.

Purpose: To provide for a range of commercial uses to meet the needs of local residents, and small scale tourist or recreational uses including commercial facilities to serve those recreational or tourist uses within the rural areas to meet the needs of local residents and visitors. This designation will provide the opportunity for the development, redevelopment and infill of commercial uses in existing rural commercial developments, mixed use areas or intensely developed residential areas consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan.

5. A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, of if not, what changes to these elements would be required.

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

The RC zone expressly relies on on-site or rural-scaled utilities. Minimum lot size in RC is determined by Chelan-Douglas Health District standards for public or community water and on-site sewage disposal, not by urban utility assumptions. Setbacks, height, and coverage standards are also calibrated to a rural context. This standards framework avoids the need for urban capital facility extensions and ensures the scale and intensity of commercial activity remains consistent with rural infrastructure.

Because RC relies on health-district–governed water/septic capacity and site design that must comply with County development standards and critical areas regulations, the map amendment does not create a need for unplanned capital expansions. Any future development would be reviewed against the Comprehensive Plan and implementing codes (e.g., development standards, stormwater, and critical areas overlays), ensuring that facility adequacy and concurrency are maintained at the rural level of service contemplated by the Plan.

Re-designating to RC in Plain concentrates commercial trips and access where the Transportation Element already recognizes travel demand (Plain/Chiwawa/Beaver Valley

corridors) and where future spot investments are prioritized by the Public Works Department to improve safety, maintenance, and connectivity. This reduces trip dispersion across rural roads and makes it easier to plan for and fund targeted safety and access upgrades.

The Transportation Element includes specific mapping within its 20-year program, along with functional classifications and collision analyses for the Leavenworth–Peshastin–Plain area. By acknowledging Plain as a travel node and identifying corridor-level projects, the plan anticipates incremental improvements that can serve localized commercial activity typical of RC (e.g., lodging, retail, eating/drinking establishments scaled to rural standards). This shows that transportation planning assumptions already accommodate the level and pattern of trips expected from an expanded Rural Commercial designation in Plain

The RC district includes parking ratios, setbacks, and site design expectations that channel vehicle movements and parking on-site, avoiding spillover onto Beaver Valley Road as is the current case for commercial parking. Maximum building height, rural setbacks, and landscaping requirements further support safe ingress/egress and context-sensitive site design. These standards work in tandem with the County's roadway functional classifications and safety goals to maintain an adequate level of service and to minimize conflicts on state and county routes serving Plain.

6. For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.

Surrounding properties are used for commercial purposes and large gatherings that are commercial in nature. A Hardware store, restaurant, grocery store and gas station are located immediately across the road from the subject property. Customers of those businesses commonly park vehicles on both sides of Beaver Valley Road during high demand in the winter and summer. Demand for Nordic ski rentals and groomed trails—both available in Plain—is high. In the winter months the adjacent properties are used for public Nordic skiing including groomed trails and parking available for pass holders managed through Plain Valley Ski Trails. In the summer months, parking along the road is even more over-capacity on weekends for the popular Plan Valley Farmers Market. The properties across the road from the commercial zone host several large gatherings each summer which bring thousands of tourists to Plain for the Northwest Overland Rally and Touratech Rally. The adjacent properties are routinely used as a fire camp in the summer months which results in the establishment of a temporary city providing lodging, bathing facilities, food service and logistics for hundreds of employees.

Plain Cellars Winery and Tasting Room is located nearby which serves food and beverages and hosts weekly live music events.

The proposed change would make the land more compatible with surrounding land uses based on density and existing development. The proposed designation is more appropriate because it is within a logical outer boundary of existing commercial uses with access to transportation infrastructure. The amendment would formalize the land use that is already occurring and provide for onsite parking and utilities that would alleviate congestion that is currently occurring on the roadway.

Commercial activity in Plain has always been shaped by its geography, early settlement patterns, and changing economic conditions. The region began with logging, trapping, and

small-scale agriculture, then slowly transitioned toward tourism and outdoor-recreation–based commerce. The community opened the Plain Post Office in 1913, serving as one of the valley's first civic and commercial hubs.

7. Will the proposed map amendment affect lands designated as resource lands of long term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?

Neither the subject property nor the adjacent properties have been designated as resource lands of long-term commercial significance. The subject property have not been designated as critical areas. No impact to resource lands or critical areas is anticipated.

8. Explain how the proposed amendment would affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The existing designation, RR5, provides low-density rural housing opportunities. Converting a small, discrete parcel from RR5 to RC does not materially alter the countywide or subarea supply of rural residential land because:

- Chelan County's Comprehensive Plan allocates residential growth primarily to Urban Growth Areas (UGAs) and designated rural residential lands outside urban areas. RR5 constitutes a very large portion of rural lands, and the loss of two parcel totaling less than seven acres will have a negligible effect on overall land capacity for rural housing.

- The County's Land Use designations and associated maps cover thousands of acres of RR20, RR10, RR5, and RR2.5 outside Plain. A single reclassification does not meaningfully diminish the county's ability to meet expected rural residential demand identified in the Plan's land-capacity analysis.

Thus, the amendment does not constrain residential growth over the 20-year planning period because the rural residential land base remains abundant and widely distributed.

The Comprehensive Plan identifies the Plain–Lake Wenatchee Study Area as a recreation-supported rural community where residents and visitors rely on localized services. The Plan's rural vision statements emphasize:

- Allowing localized commercial services to support community needs while maintaining rural character.
- Clustering commercial activity in suitable centers to avoid strip development and rural sprawl.

The existing RC lands in the Plain area are limited. Adding to the RC land available provides:

- Capacity for small-scale commercial services that the Plan anticipates (e.g., small markets, outfitters, lodging, food service, or recreation-related retail;
- Support for the area's tourism economy, which is an explicit rural development objective.

Shifting a single parcel from RR5 to RC therefore enhances the mix of land uses needed to support long-term rural economic and service needs without oversupplying commercial land.

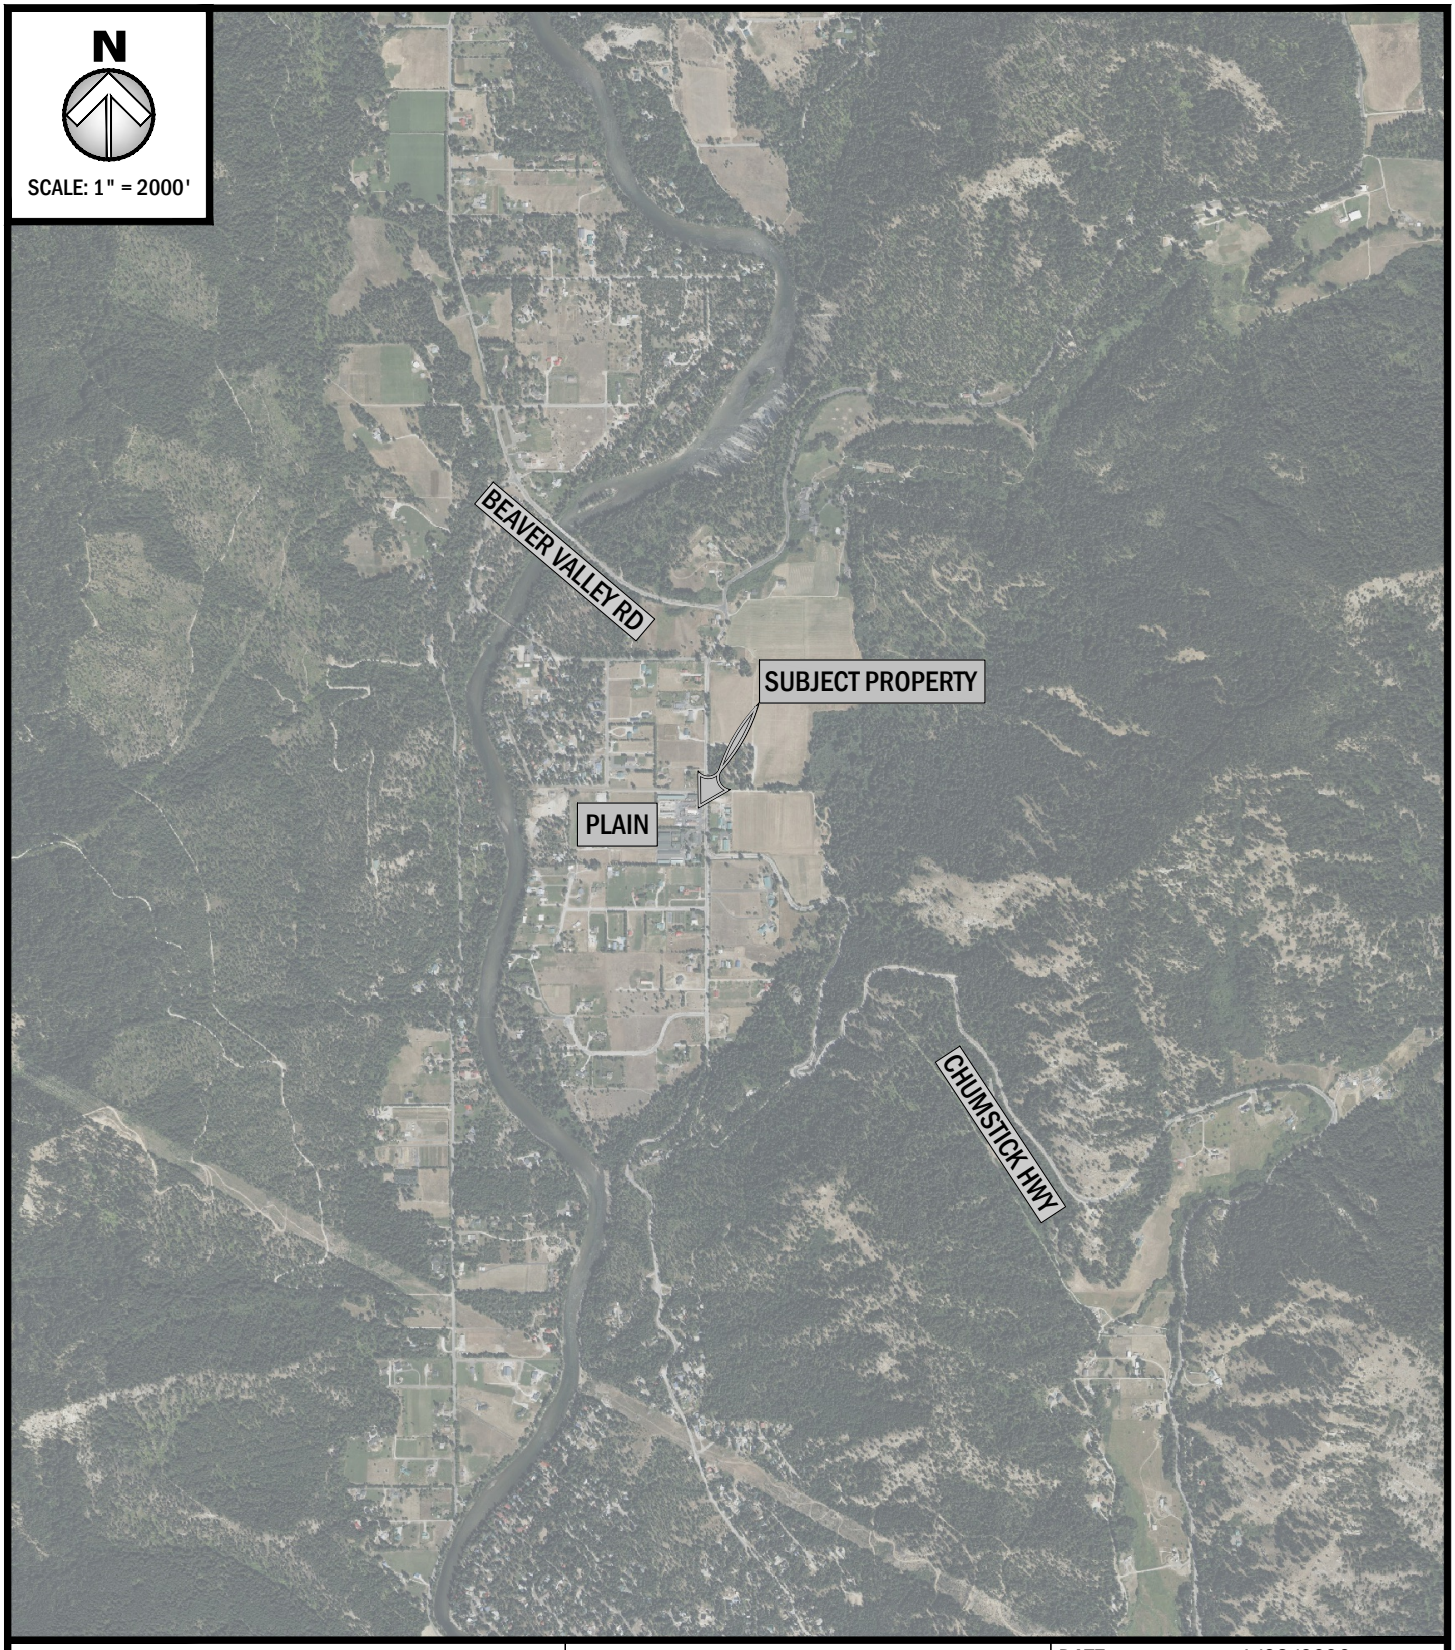
9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The Comprehensive Plan recognizes the Plain–Lake Wenatchee area as a rural community where residents and visitors depend on localized access to basic goods, services, and visitor-support amenities. The Plan's vision for this study area emphasizes maintaining the rural lifestyle while allowing localized services that meet community needs. Concentrating commercial uses in appropriate locations—rather than dispersing them across large-lot residential areas—advances that policy direction. Allowing an RC designation helps ensure the public can access essential rural-scaled commercial services without long travel distances, improving convenience, economic vitality, and community resilience such as has been the need resulting from the State Highway 2 closures and damage to Chumstick Highway in December 2025.

The RC zoning district is specifically designed for commercial activity in rural settings without requiring urban utilities. These requirements protect public health by preventing contamination risks, maintaining proper waste disposal, and ensuring safe driveway spacing and circulation—all of which would become more challenging if similar commercial activity were scattered throughout RR5-zoned lands.

The Comprehensive Plan emphasizes the importance of supporting a balanced rural economy, including recreation-based and agricultural tourism sectors that rely on small-scale rural commercial activity.

An expanded RC zone allows community-serving businesses—such as small markets, outfitters, lodging, food service, or recreation-related retail—to operate in a manner that:

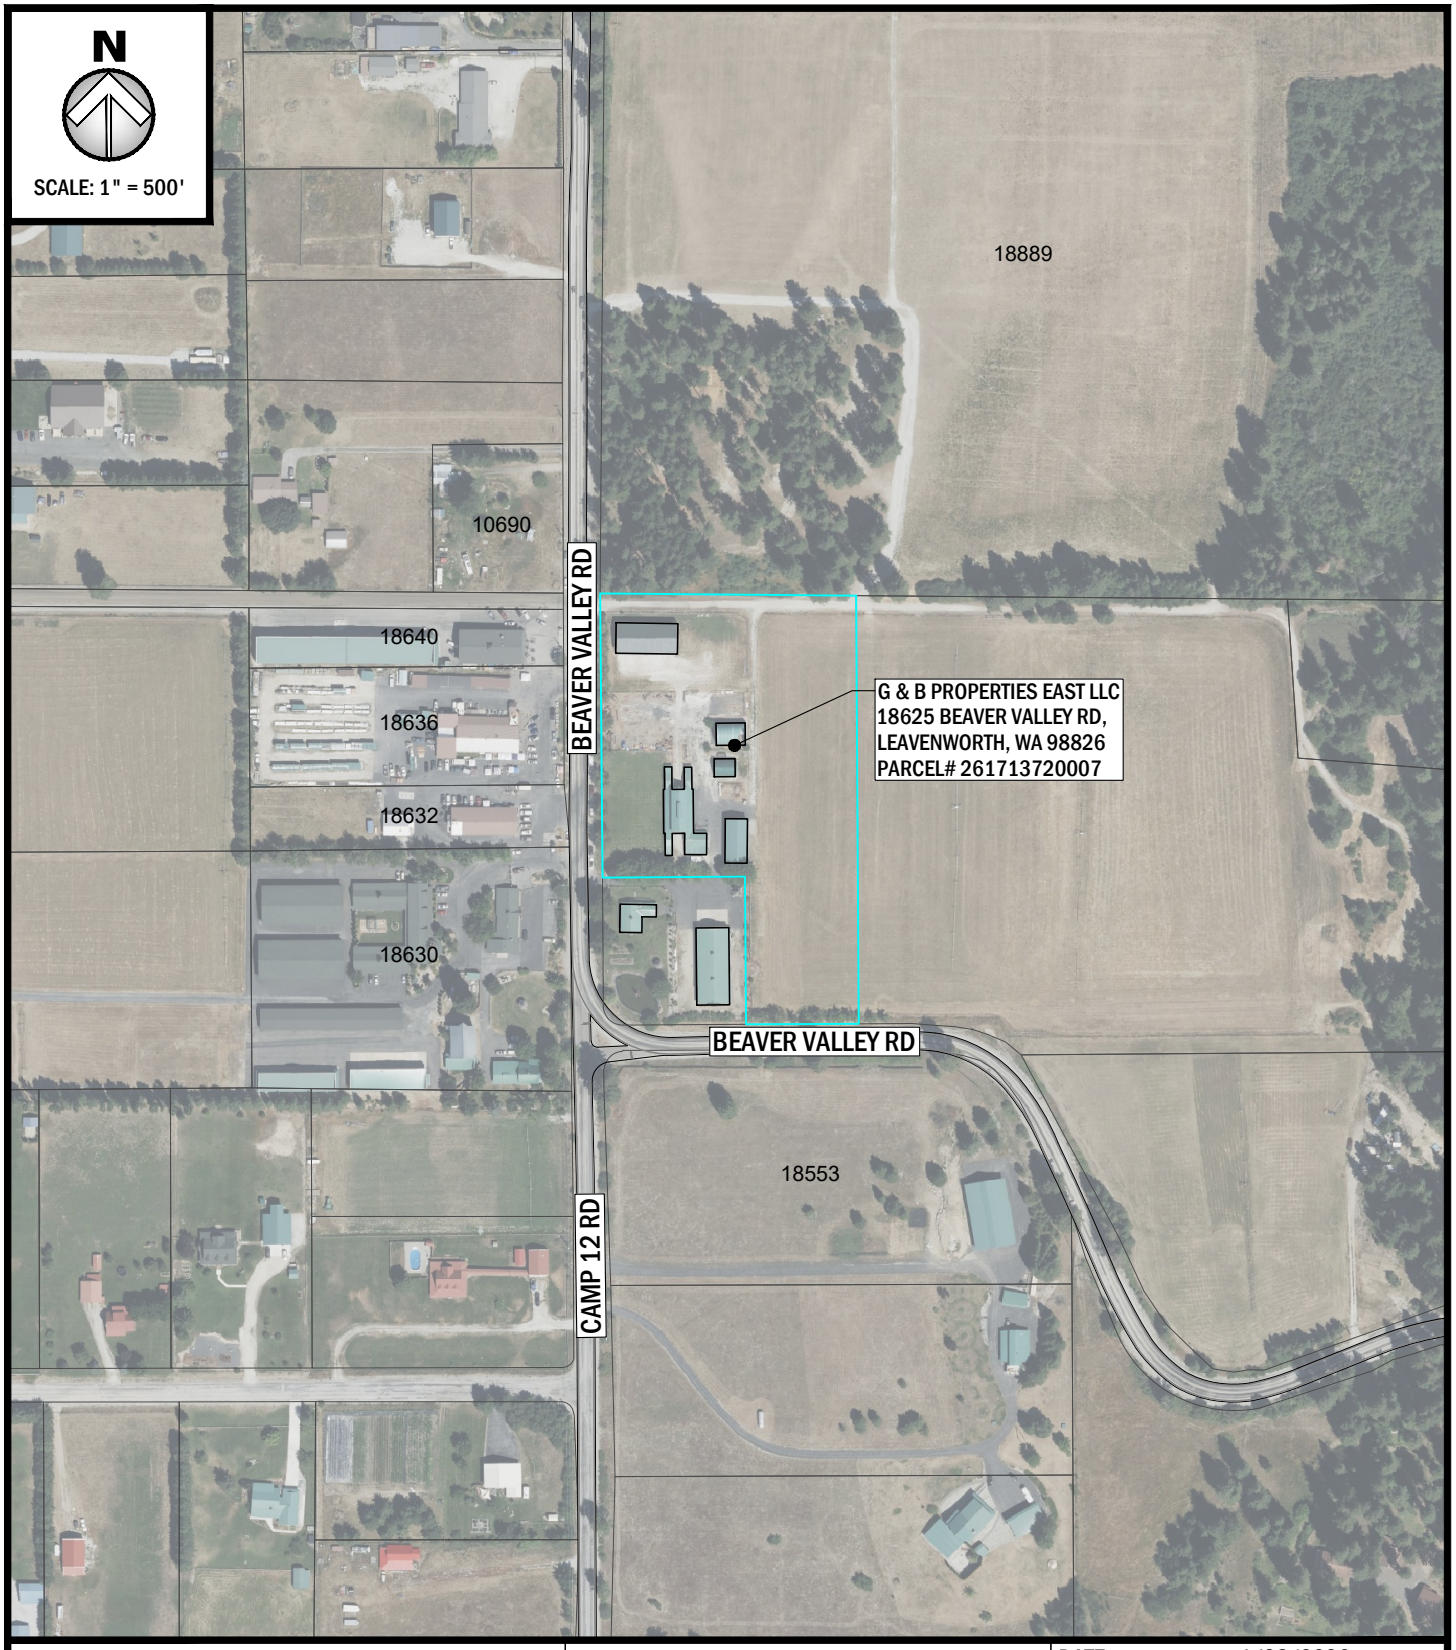


- Supports local employment;
- Provides goods/services to both residents and visitors, and;
- Reduces unnecessary long-distance trips to larger urban centers (which reduces traffic, fuel consumption, and emissions).

This contributes directly to the general welfare by enabling a functioning, sustainable rural community.

The Plan and zoning code both emphasize orderly, predictable development patterns. RC is one of the rural designations specifically created for commercial activities, whereas RR5 is intended for low-density rural residential use. The proposed change:

- Directs commercial activity into a zone where it is already occurring;
- Minimizes land-use conflicts between homes and businesses, and;
- Maintains compatibility with the broader Plain community's rural character.



This reduces nuisances, protects property values, and improves long-term community compatibility—key elements of the public's welfare.

1. Easement for electric transmission and/or distribution line in favor of Chelan County Electric Cooperative, Auditor's File No. 657709.

2. Terms, covenants and provisions of the private easement described and delineated on said short plat.

3. Restrictions contained on said short plat as follows: Private access and utilities easement (not maintained by Chelan County).

4. Easements and restrictions apparent upon the premises as of the date hereof.

CHELAN COUNTY
DEPARTMENT OF COMMUNITY DEVELOPMENT
316 WASHINGTON STREET, SUITE 301
WENATCHEE, WA 98801
(509) 667-6225

TO: Chelan County Board of County Commissioners
FROM: Chelan County Community Development
HEARING DATE: November 10, 2026
FILE NUMBER: CPA 26-041 Campbell

RECOMMENDED MOTION

The Chelan County Planning Commission, at their duly advertised public hearing on September 23, 2026 made a motion to recommend approval (Attachment 1) of CPA 26-041 Campbell requested comprehensive plan map amendment from Rural Residential/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5).

GENERAL INFORMATION

Applicant	Patricia and Christopher Campbell
Planning Commission Notice of Hearing Published	September 12, 2026
Planning Commission Hearing	September 23, 2026
Board of County Commissioners Hearing	November 10, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance was issued under WAC 107-11-340 on April 30, 2026. The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The decision was made after a review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

The Chelan Douglas Health District commented that they have no objections to the approval of this project.
The Colville Tribe's Department of History and Archaeology indicated they look forward to reviewing future building plans should the amendment be approved.

Public Comment:

A neighboring property commented on this proposal as well as the adjoining proposal filed under CPA 26-048 expressing support for both projects.

60-Day Notice
Sent to Department of Commerce July 20, 2026.

PROJECT DESCRIPTION – CPA 26-041 Campbell
The applicant is requesting a comprehensive plan map amendment to change the designation of a 5.14-acre property from Rural Residential/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5). The property is located at 24 Hugo Road, Chelan, WA 98816 and is currently developed with 1,600 sf double wide mobile home. The parcel is also known as Assessor's Parcel Number 27-23-03-330-175.

COMPREHENSIVE PLAN

Chelan County conducts an annual review of development regulation text amendments for compliance with the adopted Comprehensive Plan. The Comprehensive Plan represents the long-term vision for future land uses and development. For the county-initiated text amendments, the merits of the requested change must be demonstrated as being consistent with adopted goals and policies.
The following Comprehensive Plan goals and policies are relevant to the proposal:

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Policy RE 2.2: Rural development should not preclude use of rural lands for agriculture and timber production and should avoid or mitigate impacts on existing agriculture or timber operations.

Policy RE 2.6: To achieve a variety of rural densities and uses, allow for development clustering, density transfer, design guidelines, conservation easements, and other innovative techniques to accommodate growth consistent with rural character.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

REVIEW CRITERIA
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 2) Reduce Sprawl, 3) Transportation, and 4) Housing. The Growth Management Act (GMA) encourages the provision of a variety of housing densities in order to accommodate projected growth while maintaining the rural character.

The requested map amendment to RR2.5 would allow the site to be divided to provide housing at densities equal to the property to the northeast currently zoned RR2.5 and developed as 2-2.5 acre lots.

Conclusion: The proposal would be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area.

Conclusion: The proposal would be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the purpose of the RR2.5 zoning is "To maintain the range of rural development opportunities consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan. These areas can provide buffering or transitions between existing rural developments and areas of higher or lower densities…" The two lots north of the subject property are both zoned RR2.5 and are 2.5 acres in size. Extending the RR2.5 zoning to the subject 5-acre parcel could result in similar development.

Conclusion: Additional 2.5 acre lots would be consistent with providing a variety of densities while maintaining the rural character of the area.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel has frontage along both Hugo Road and US Hwy 97A and would at most, contribute 2 additional single-family residence to Hugo Road.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are all zoned Rural Residential/Resource at varying densities. Land uses in the vicinity of the parcel are developed with single family residence or are under cultivation as orchards.

Conclusion: The designation of the site from RR5 to RR2.5 would not adversely affect the surrounding area as the site, at most, could only be developed with 2 additional lots, assuming an alternative subdivision method such as rural cluster, were used.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: Although a portion of the site has been used for agriculture, that area consists of less than half of the total lot area.

Conclusion: The amendment would not adversely affect resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to potentially develop one, at most two additional lots depending on the method of subdivision used.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and it would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental

Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.

5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026, (Attachment 3), pursuant to RCW 36.70A.106.
6. A request for a Comprehensive Plan Map Amendment was submitted by Erin Burgess (agent) on behalf of Patricia and Christopher Campbell to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) to Rural Residential 2.5 (RR2.5). The subject property is located at 24 Hugo Road, Chelan, WA 98816 and further identified by Assessor Parcel No: 27-23-03-330-175.
    a. The location and characteristics are consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 2.5 as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

RECOMMENDED MOTION

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

A. Re-designation of the site from Rural Residential/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5) would comply with applicable Chelan County goals and policies pursuant to the findings of fact and conclusions of law cited below.

SEPA Determination	April 30, 2026

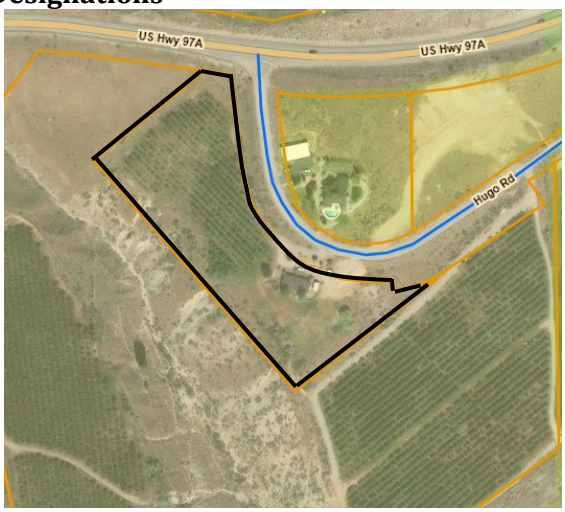
SEPA Environmental Review

A Determination of Non-Significance (DNS) was issued under WAC 197-11-340(2) for CPA 26-026 on April 30, 2026 (Attachment 1). The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030 (2)(c). The decision was made after review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

The Chelan Douglas Health District commented that they have no objections to the approval of this project.

The Colville Tribe's Department of History and Archaeology indicated they look forward to reviewing future building plans should the amendment be approved.



Public Comment:

A neighboring property commented on this proposal as well as the adjoining proposal filed under CPA 26-048 expressing support for both projects.

PROJECT DESCRIPTION – CPA 26-041 Campbell

Proposal: The applicant is requesting a comprehensive plan map amendment to change the designation of a 5.14-acre property from Rural Residential/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5). The property is located at 24 Hugo Road, Chelan, WA 98816 and is currently developed with 1,600 sf double wide mobile home. The parcel is also known as Assessor's Parcel Number 27-23-03-330-175.

Chelan County Land Use Designations

Density: The existing Rural Residential/Resource 5 (RR5) zone allows 1 dwelling unit per five acres. The site is 5.14 acres. Re-designating the site would potentially allow 2 additional lots depending on method of subdivision.

Comprehensive Plan

Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan policies are relevant to the proposed request:

> **Goal LU 1:** Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.
>
> **Goal RE 2:** Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Policy RE 2.2: Rural development should not preclude use of rural lands for agriculture and timber production and should avoid or mitigate impacts on existing agriculture or timber operations.

Policy RE 2.6: To achieve a variety of rural densities and uses, allow for development clustering, density transfer, design guidelines, conservation easements, and other innovative techniques to accommodate growth consistent with rural character.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

Review Criteria

The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 2) Reduce Sprawl, 3) Transportation, and 4) Housing. The Growth Management Act (GMA) encourages the provision of a variety of housing densities in order to accommodate projected growth while maintaining the rural character.

The requested map amendment to RR2.5 would allow the site to be divided to provide housing at densities equal to the property to the northeast currently zoned RR2.5 and developed as 2- 2.5 acre lots.

Conclusion: The proposal would be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area.

Conclusion: The proposal would be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the purpose of the RR2.5 zoning is "To maintain the range of rural development opportunities consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan. These areas can provide buffering or transitions between existing rural developments and areas of higher or lower densities…" The two lots north of the subject property are both zoned RR2.5 and are 2.5

acres in size. Extending the RR2.5 zoning to the subject 5-acre parcel could result in similar development.

Conclusion: Additional 2.5 acre lots would be consistent with providing a variety of densities while maintaining the rural character of the area.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel has frontage along both Hugo Road and US Hwy 97A and would at most, contribute 2 additional single-family residence to Hugo Road.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are all zoned Rural Residential/Resource at varying densities. Land uses in the vicinity of the parcel are developed with single family residence or are under cultivation as orchards.

Conclusion: The designation of the site from RR5 to RR2.5 would not adversely affect the surrounding area as the site, at most, could only be developed with 2 additional lots, assuming an alternative subdivision method such as rural cluster, were used.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: Although a portion of the site has been used for agriculture, that area consists of less than half of the total lot area.

Conclusion: The amendment would not adversely affect resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to potentially develop one, at most two additional lots depending on the method of subdivision used.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and it would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026, (Attachment 3), pursuant to RCW 36.70A.106.
6. A request for a Comprehensive Plan Map Amendment was submitted by Erin Burgess (agent) on behalf of Patricia and Christopher Campbell to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) to Rural Residential 2.5 (RR2.5). The subject property is located at 24 Hugo Road, Chelan, WA 98816 and further identified by Assessor Parcel No: 27-23-03-330-175.
    a. The location and characteristics are consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 2.5 as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

STAFF Finding

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

The Comprehensive Plan Amendment to change the subject property's land use designation from Rural Residential/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5), given file number CPA 2026-041, based upon the findings of fact and conclusions of law contained would comply with relevant adopted county goals and policies.

Hello Susan,

This consultation is in response to CPA 26-041 Campbell, SEPA Determination of Non-significance. This land use change allows an additional dwelling unit to be constructed with the ratio of 1 residence per 2.5 acres. If and when there is a planned development we look forward to reviewing those future plans.

On behalf of Amelia Stanger, Interim Tribal Historic Preservation Officer.

Memorandum

To: Susan Dretke, Chelan County

From: Richmond Petty, REHS

Date: 03/13/26

RE: Campbell (CPA 26-041) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5). The subject property is located at 24 Hugo Rd., Chelan, WA 98816 (county tax parcel: 272303330175)

As proposed, I have no objections to further approval of this project.

- Existing permitted septic system 906-4C3B-0309 and new Group B Water System (Nielsen WS – AE511) serves lot.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

Fr Thomas Nielsen, Adjacent Land Owner Thomas Nielsen

Re Project File #'s CPA 26-048 and CPA 26-041

Date March 14, 2026

The purpose of this memorandum is to write in support of the proposed applications for a Comprehensive Plan Amendment to change the two subject properties zoning to Rural Residential 2.5 (RR2.5). With continued population growth in the greater Chelan area, there is a need for more affordable housing. The RR2.5 designation will maintain the rural nature of the area, but allow more families to live in the area.

I am the owner of two parcels of land adjacent to the proposed parcels and whole heartedly support their application. My properties are located at 25 Hugo Road and 109 Hugo Road. I welcome new neighbors!

Washington State Department of Commerce

COUNTY OF CHELAN)

Jessica Thompson, being first duly sworn, deposes and says: That at all times mentioned herein she was, and now is, a citizen of the United States, a resident of the State of Washington, and over the age of 21 years.

I declare under the penalty of perjury under the laws of the State of Washington that the foregoing is true and correct.

That on 3/4/2026, I personally mailed true and correct copies of the hereto attached:

- ☐ Notice of Shoreline Application
- ☑ Notice of Application
- ☐ Other _____

to all property owners within 800 feet (excluding 60 feet of Street rights of way pursuant to Section 14.08.060 (1)(B), Chelan County Code) of the project boundary in accordance with the records of property ownership of the Chelan County Assessor and any other interested parties. A copy of the mailing list is attached to this affidavit.

Signature _____ Date 3/4/26

ACKNOWLEDGEMENT

This is to certify that on 4th day of March, 20 26

Jessica Thompson to me known to be the person who executed the foregoing Affidavit of Mailing and acknowledged to me that she signed the same as her free and voluntary act. WITNESS my hand and official seal the day and year last above written.

Notary Public in and for the State of Washington,
residing in Douglas County

Subject: Notice of Application for CPA 26-041 Campbell - Chelan County Dept. of Community Development
Attachments: CPA 26-041 NOA.pdf; CPA 26-041 - Affidavit of posting.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Patricia and Christopher Campbell's property, File# CPA 26-041. This notice should be posted on the *subject property by March 5th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days,* starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.

Thank you,

Greetings,

Chelan County has a **Comprehensive Plan Amendment** application in which we are requesting comments from agencies and special districts. Attached are all the materials for your review and the Notice of Application. Please respond by **5:00 pm on March 19, 2026.**

Project File No.: CPA 26-041
Project Location: 24 Hugo Road, Chelan, WA 98816
Parcel Number: 27-23-03-330-175
Applicant/Owner: Patricia and Christopher Campbell
Application Date: February 11, 2026
Determination of Complete: February 24, 2026
Notice of Application Date: March 5, 2026

Proposed Project Description: An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5).

Existing Environmental Documents: State Environmental Policy Act (SEPA) Checklist

Permits Required: None

Application Materials: Attached to this email or may be found on the Chelan County Public Notice Portal: https://co-chelan-wa.smartgovcommunity.com/PublicNotice/PublicNoticeSearch

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-041 Campbell - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5). 24 Hugo Road, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-330-175.

CPA 26-048 HMJD Collins, LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residentia l/Resource 2.5 (RR2.5). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-430-050.

CPA 26-054 Hellickson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 25-18-32-330-200.

CPA 26-060 McMahon - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). 7948 East Leavenworth Rd., Leavenworth, WA 98826 also identified as Assessor's Parcel No.: 24-17-23-510-480.

On March 5, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 19, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Sincerely,

Susan Dretke 2/24/26

Chelan County Code 14.14.050

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of parcel no. 272303330175 at 5.14 acres from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5). The property is located east of Chelan, within Section 03, T 27N, R 23E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 18. Parcel no 272303330175 is adjacent to 168 acres zoned RR 2.5 to the east of the subject property and, in addition to 54 acres zoned RR 2.5 occurring northwest of the subject property directly north of US Highway 97A.

The zoning and comprehensive plan designations are proposed to be changed to align the property with more appropriate zoning based on the property locations adjacent to Highway 97A, Hugo Road, existing residential use and adjacent zoning. The total area proposed to be rezoned is 5.14 acres.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, shrub steppe, and shoreline. This leaves a very small overall percentage of Chelan County available for residential use, while the demand for housing remains high. This lack of inventory is driving the price of residential property which negatively affects affordability of housing for those who live and work in Chelan County.

RCW 36.70A.020(1) encourages urban growth. The subject property is not located in an urban growth area but rather located near the Chelan UGA and adjacent to the same zoning district as that which is proposed.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development. The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land. The best use for this land is allowing the density to increase in the developable areas while preserving the open space and critical areas.

RCW 36.70A.020(4) encourages the promotion of a variety of residential densities and housing types. Given the fact that only 12% of Chelan County is in private ownership, residential development will continue, whether it be as a standard subdivision

encouraging inefficient use of land with large lots, or the use of innovative development through clusters and planned developments, encouraging more manageable lots sizes and open space preservation.

The proposal is also consistent with the county-wide planning policies:

Policy 4: The proposal is consistent with the policies for county-wide transportation facilities and strategies, through an integrated transportation system and is within the current capacity. The property is located adjacent to U.S. Highway 97A and a county road (Hugo Road), and the proposal would not result in heavy traffic through residential neighborhoods or otherwise result in traffic congestion or impacts on inadequate streets or roads.

Policy 5: The proposal is consistent with the county-wide policies for housing by directly addressing land available for housing options, encouraging the productive development of the property for housing, and permitting new housing in an area that already is adjacent to RR 2.5 zoning.

Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, one of the factors is "[t]he availability of housing to support economic growth." The proposal would encourage the development of the property as additional housing that would support economic growth in the Chelan area and directly respond to the need for more housing in the area. More inventory has a positive effect on housing costs for buyers.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

Land Use Element; Residential Development

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County.

Policy LU 1.1: Promote improved neighborhood character and compatibility through unified design and site requirements for both site-built homes and manufactured and modular housing.

Rationale: The placement of should take into consideration compatibility with the character of existing and future residential areas.

Increasing the density of residential lots in this area would promote a future division of land that can be developed with a unified design and allow lots sizes which could accommodate housing that would be affordable for the area workforce or reduce competition for existing housing.

Policy LU 1.2: Protect residential neighborhoods from impacts associated with incompatible land uses through application of development standards and permit conditioning.

Rationale: Incompatible land uses located in close proximity to residential neighborhoods may create adverse impacts which could lead to a reduction of the high quality of life for the County residents.

The proposed RR 2.5 zoning is the same as the adjacent property to the east and will allow for residential development which is compatible with the existing residential uses in the area.

Policy LU 1.3: Develop innovative regulatory strategies that create developer incentives to provide affordable housing to low- and moderate-income households.

Rationale: This can be accomplished through the use of innovative techniques including but not limited to density bonuses, performance zoning, zero lot line development, and cluster subdivisions. Incentives may help facilitate the construction of low- and moderate-income housing.

The proposed RR 2.5 zoning will allow lot sizes that are in accordance with the Chelan-Douglas Health District standards for water and sewer disposal. This density allows the creation of more residential inventory which serves to reduce land prices based on supply and demand.

Policy LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

Rationale: Many parcels of land are available within existing residential developments that can accommodate further development. Infill within these areas will allow public facilities and services to be provided in a more efficient manner.

The proposed rezone is adjacent to a large area zoned RR 2.5 with appropriate lot sizes. The subject property can accommodate further development that is consistent with adjacent land uses and lot sizes.

Housing Element

Goal H 2: Promote a variety of residential densities and housing types.

Policy H 2.1: Promote a diversity of housing unit types and densities to meet the needs of all existing and future residents of the County, including both site-built and manufactured and modular homes.

Rationale: An adequate supply of appropriately zoned land will ensure that the GMA plan does not artificially create inflation in housing prices by restricting competition in the land market.

The approval of this application will lead to increasing the supply of appropriately zoned land that will ensure that inflation in housing prices is not artificially created.

4. **A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.**

Rural Element

Designations/Siting Criteria – Rural Residential 2.5

Density: One (1) dwelling unit per 2.5 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. **Geographical and Geological Characteristics. The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be immediately adjacent to existing residential or rural developments. The area may be adjacent to urban growth areas.**

2. **Natural Resources. The area has limited resource management potential. The area may be adjacent to resource lands.**

3. **Public Services. Uses do not require extension or provision of urban levels of services. Rural governmental services and infrastructure are typically available, planned and or funded for.**

4. **Existing Land Uses. Single family residences, agricultural uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are currently 2.5 acres or greater in size but typically less than 5 acres.**

The property meets the designation and siting criteria for RR 2.5 and is more appropriate than the current zoning. The property is closely associated with natural amenities found in Chelan County due to the location in the greater Chelan recreational area. The property is not designated as a resource land of long-term significance. Rural governmental services are available and planned for. Existing land uses in the area include seasonal and year-round residences, tourist and recreational activities, agriculture, and other rural development. There are many properties in the area that are zoned RR 2.5.

5. **A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, or if not, what changes to these elements would be required.**

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

6. **For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.**

The property to the north is zoned RR 5 but is separated from the subject property by Highway 97A. The property to the south and west is zoned RR5. The properties to the east have the same zoning as that which is proposed - RR 2.5, and like the subject property is bordered by U.S. Highway 97A to the north. The proposed designation is more appropriate because the property is bounded on two sides by highways/roads and is in a location with existing access to a county road (Hugo Road), with sufficient right of way for future development.

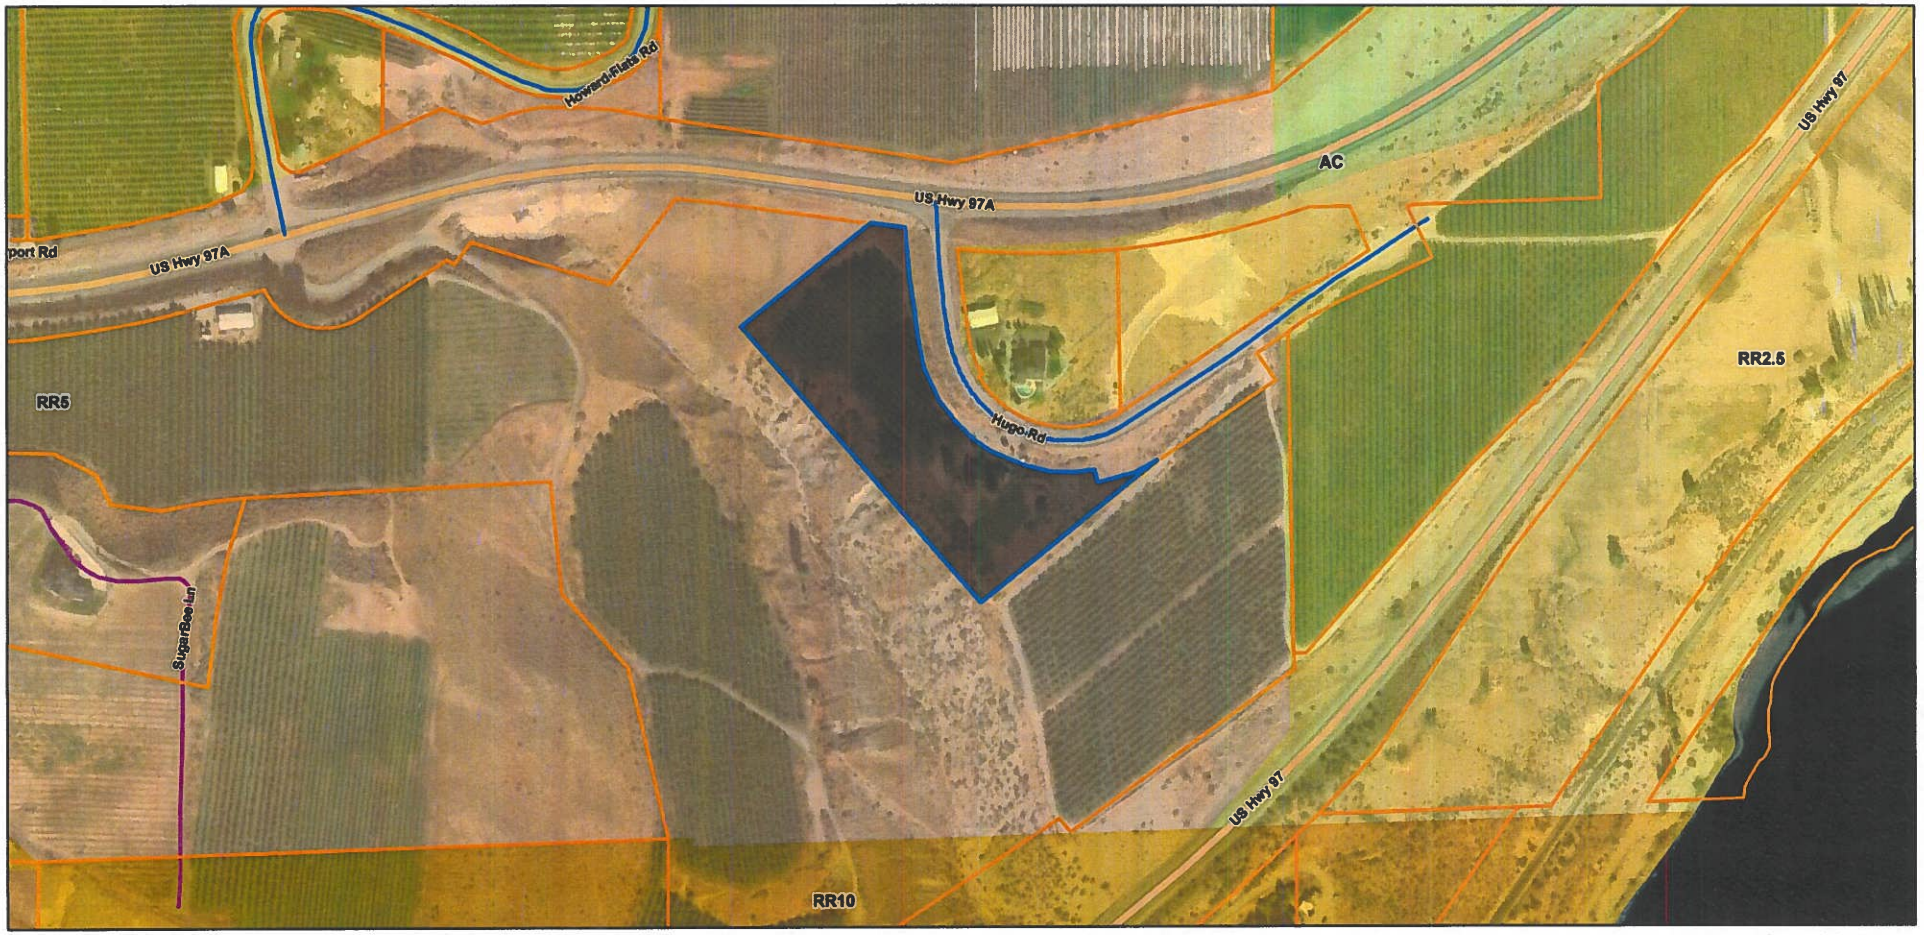
The proposed amendment is a more appropriate zoning for the subject parcel due to the consistent nature of alignment with previously mentioned goals of the RCW 36.70A.020 and Chelan County Planning Policies.

7. **Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?**

The proposed text amendment would not affect lands designated as resource lands of long-term commercial significance and/or critical areas. The subject property is not adjacent to Commercial Forest or Agricultural Lands. The property has been evaluated for the presence of streams and/or wetlands and there are none on the property. Any critical areas that may be present on the subject property would be adequately protected by conditions of approval contained in any future land use approvals. All required protections to critical areas such the submission of geotechnical reports would be complied with as necessary in order maintain a high level of environmental quality in Chelan County.

8. **How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.**

The proposed amendment would make a certain amount of land available for higher density development to accommodate future growth in the rural, unincorporated areas of Chelan County. Moderately priced rural properties are very desirable, and the demand



is high for residential building lots. The price of land is increasing rapidly because the demand is high, and the supply is extremely low.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The increased number of lots available for residential development will contribute to stabilizing the housing market, which at present is unattainable for many lifelong Chelan area residents. The value of the property will also increase the residential property taxes for Chelan County, which in turn, will increase the funding for governmental services.

STATUTORY WARRANTY DEED

THE GRANTOR(S) **HMJD-Collins LLC, a Washington Limited Liability Company**

for and in consideration of **Ten Dollars ($10.00) and other good and valuable consideration,** in hand paid, conveys, and warrants to **Hugo 24 Enterprises LLC, a Washington Limited Liability Company** the following described real estate, situated in the County of Chelan, State of Washington:

That portion of the Southeast quarter of the Southwest quarter of Section 3, Township 27 North, Range 23 East Willamette Meridian, Chelan County, Washington, more particularly as follows:

Beginning at the intersection point of the Southerly Right of Way of US Highway 97A and the Southerly Right of Way of Hugo Road, said point being perpendicular to and 70.00 feet distant from Highway Engineers Station (H.E.S.) 202+96.29, centerline survey, SR 97, Co. Road 506 to Azwell Vicinity;
Thence along the Southwesterly Right of Way off said Hugh Road, South 7°52'02" East for a distance of 241.33 feet;
Thence along a tangent curve to the left having a radius of 320.00 feet with a delta angle of 92°48'36" for an arc length of 518.35 feet;
Thence South 10°40'38" East for a distance of 30.00 feet;
Thence along a non-tangent curve to the left having a radius of 350.00 feet with a delta angle of 24°11'25" for an arc length of 147.77 feet;
Thence leaving said Right of Way, South 50°48'03" West for a distance of 490.00 feet;
Thence North 41°46'32" West for a distance of 772.95 feet;
Thence North 50°48'03" East for a distance of 355.00 feet, more or less, to the Southerly Right of Way of US Highway 97A;
Thence along said Right of Way, South 82°52'02" East for a distance of 70.00 feet to the Point of Beginning

Also known as Parcel A of Boundary Line Adjustment 2024-231 under Auditor's File No. 2594830

TOGETHER WITH THAT certain 2006 FTWD Manufactured Home, Model OAK GROVE, VIN ALB0305780R

Subject to All encumbrances, rights, restrictions, reservations, covenants and easements, apparent or of record.

And Subject to those items specifically set forth on Exhibit "A"

Exhibit "A"

. This land is included in the Upper Columbia Irrigation District, formally known as the Greater Wenatchee Reclamation District and is subject to the laws and regulations of the United States and the State of Washington applicable to the project and is liable for further assessments, if any, levied by the district, and subject to easements for lateral ditches and pipelines used in connection with the district's irrigation system.

. Right of the public to make necessary slopes for cuts or fills upon the land herein described in the reasonable original grading of streets, avenues, alleys and roads, as dedicated in the plat.

. Roadway Easement being 20 feet wide as disclosed on Chelan County Assessor's Map.

. RESERVATIONS contained in Chelan County Superior Court recorded as Case No. 25992.

. Notice of Appropriation of Water as imposed by instrument recorded on April 16, 1902 as document #9015826.

. EASEMENTS and the terms and conditions thereof affecting a portion of said premises for Electric Transmission and Distribution Line recorded on April 16, 1924 as document #120006, on March 23, 1928 as document #164108, on April 27, 1962 as document #593129, on January 7, 1964 as document #615796.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Right of Way recorded on December 12, 1947 as document #402273.

. AGREEMENT regarding Roadway and the terms and conditions thereof recorded on February 13, 1957 as document #517530.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Electric Transmission and Distribution Line recorded on April 25, 1969 as document #689957.

. Warranty Deed as imposed by instrument recorded on June 16, 1970 as document #700894.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Electric Transmission and Distribution Line recorded on May 27, 1971 as document #709486.

. Quit Claim Deed as imposed by instrument recorded on May 29, 1979 as document #800398.

. Quit Claim Deed as imposed by instrument recorded on June 12, 1979 as document #800997.

. Release of Damages as imposed by instrument recorded on January 19, 1984 as document #8401190033, on June 14, 1984 as document #8406140053.

. AGREEMENT regarding Joint Right of Use and the terms and conditions thereof recorded on July 9, 1984 as document #8407090001.

. Quit Claim Deed as imposed by instrument recorded on November 29, 1984 as document #8411290021.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Irrigation Pipeline recorded on December 9, 1987 as document #8712090044.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Water Pipeline recorded on September 22, 1988 as document #8809220002.

. EASEMENTS and the terms and conditions thereof affecting a portion of said premises for Avigation recorded on April 16, 1993 as document #9304160078, as document #9304160079, as document #9304160080.

. AGREEMENT regarding Limited Avigation Agreement and the terms and conditions thereof recorded on April 16, 1993 as document #9304160080.

. Terms and conditions as disclosed by survey recorded on April 29, 1997 as document #2004701. Affects said premises and other property

. AGREEMENT regarding Fencing Agreement and the terms and conditions thereof recorded on October 16, 1998 as document #2038603.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Declaration of Easements recorded on August 22, 2003 as document #2152961.

Said document was amended on September 22, 2003 as document #2155715.

. Covenants, conditions and restrictions and easements contained in Grover Collins Orchard Short Plat No. 2009-015:
Recorded: on December 1, 2009 as document #2315271

. Terms and conditions as disclosed by survey recorded on December 24, 2009 as document #2316587. Affects said premises and other property

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Overhead and/or Underground Utility recorded on March 4, 2010 as document #2320027.

. Terms and provisions of agreement concerning Boundary Line Adjustment No. 2015-098 recorded on July 14, 2015 as document #2421460.

. Terms and provisions of agreement concerning Boundary Line Adjustment 2020-103 recorded on November 17, 2020 as document #2529918.

. AGREEMENT regarding Shared Well Agreement and the terms and conditions thereof recorded on December 31, 2020 as document #2533366.

. AGREEMENT regarding Shared Well Agreement and the terms and conditions thereof recorded on June 16, 2022 as document #2568910.

. Terms and provisions of agreement concerning Certificate of Exemption recorded on April 29, 2024 as document #2593543.

. Terms and provisions of agreement concerning Boundary Line Adjustment 2024-231 recorded on June 3, 2024 as document #2594830.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

CC 7. Chelan County is hereby given consent to enter the property(ies) listed above.

CC 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

CC 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

CC 10. I certify that this application has been made with the consent of the lawful property owner(s).

CC 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

CC 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

COMPREHENSIVE PLAN AMENDMENT SUPPLEMENTAL INFORMATION

This packet is designed to assist you in preparing your application for a Comprehensive Plan Amendment. The following information is required at the time of submittal. Applications will be accepted **January 2 through March 1** of each calendar year. Additional information may be required. ***An incomplete application will not be processed.***

- ✓ A completed General Land Use Application, pursuant to CCC, Section 14.14.050(A) and (B).
- ✓ A completed SEPA Checklist (State Environmental Policy Act), pursuant to CCC, Section 14.14.050(D).
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (C), a detailed narrative which includes the following:
  - i. A detailed statement of what is proposed to be changed and why. Identify the specific comprehensive land use designation map and zoning map that would be amended; and,
  - ii. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (Chapter 36.70A RCW as amended) and any applicable County-wide planning policies; and,
  - iii. A statement of how the amendment complies with or supports the comprehensive plan's goals and policies; and,
  - iv. A detailed statement on how the land use designation amendment complies with comprehensive plan land use designation/siting criteria; and,
  - v. A statement of how the amendment is consistent with and supported by the capital facility element and the transportation element of the comprehensive plan, or if not, what changes to these elements would be required; and,
  - vi. For land use designation amendments, identify the land uses surrounding the affected property and describe how the proposed change would affect the surrounding land uses. Describe why the proposed amendment is more appropriate than the existing land use designation; and,
  - vii. Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas; and,
  - viii. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and
  - ix. Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare; and
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (E), The applicable processing fee for comprehensive plan amendments and SEPA review as determined by the county's adopted fee schedule, as amended, except that amendment requests by the cities shall not require the collection of said fees.
- ✓ Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following:
  1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:
     - A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,
     - B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

E. The amendment does not adversely affect the surrounding land uses; and,

F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

✓**RCW 36.70A.020 Planning goals.**

The following goals are adopted to guide the development and adoption of comprehensive plans and development regulations of those counties and cities that are required or choose to plan under RCW 36.70A.040. The following goals are not listed in order of priority and shall be used exclusively for the purpose of guiding the development of comprehensive plans and development regulations:

(1) Urban growth. Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.

(2) Reduce sprawl. Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

(3) Transportation. Encourage efficient multimodal transportation systems that are based on regional priorities and coordinated with county and city comprehensive plans.

(4) Housing. Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

(5) Economic development. Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

(6) Property rights. Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.

(7) Permits. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.

(8) Natural resource industries. Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.

(9) Open space and recreation. Retain open space, enhance recreational opportunities, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.

(10) Environment. Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.

(11) Citizen participation and coordination. Encourage the involvement of citizens in the planning process and ensure coordination between communities and jurisdictions to reconcile conflicts.

(12) Public facilities and services. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.

(13) Historic preservation. Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. Name of proposed project, if applicable:

N/A

2. Name of applicant:

Patricia Campbell

3. Address and phone number of applicant and contact person:

	Agent
Patricia Campbell	Erin Burgess
P.O. Box 2131	151 South Worthen Street, Suite 101
Kingston, WA 99346	Wenatchee, WA 98801
(206) 300-1177	509-640-3283

4. Date checklist prepared:

December 2025

5. Agency requesting checklist:

Chelan County

6. Proposed timing or schedule (including phasing, if applicable):

Timing and schedule would be consistent with the guidelines established in Chelan County Code Title 14—Development procedures.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

Unknown.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

None known.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 5.14 acres (parcel 272303330175) from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5).

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 24 Hugo Road, adjacent to U.S. Highway 97A, east of Chelan, within Section 03, T 27N, R 23E.W.M. Parcel no. 272303330175.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

- Pogue gravelly fine sandy loam (PrE), 25 to 45 percent
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

None onsite.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. ***Plants*** [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
_____pasture
_____crop or grain
__x__ Orchards, vineyards or other permanent crops.
_____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
_____water plants: water lily, eelgrass, milfoil, other
_____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. *Environmental Health* [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) **Describe special emergency services that might be required.**

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. *Land and Shoreline Use* [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is residential and agricultural. Adjacent properties are in residential and agricultural use.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

1,596 sq ft residence.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

RR 5

g. What is the current comprehensive plan designation of the site?

RR 5

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. Has any part of the site been classified as a critical area by the city or county? If so, specify.

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Presumptive Shrubsteppe habitat range.

j. Approximately how many people would reside or work in the completed project?

N/A

k. Approximately how many people would the completed project displace?

N/A.

l. Proposed measures to avoid or reduce displacement impacts, if any:

None.

m. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Application for a Comprehensive plan map amendment and zone change.

n. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None.

9. Housing [help]

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

None.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None.

c. Proposed measures to reduce or control housing impacts, if any:

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The site is accessed from Hugo Road. U.S. Highway 97A borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) **Circle utilities currently available at the site:**
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Patricia Campbell

Name of signee ~~Pamela~~ Patricia Campbell

Position and Agency/Organization owner

Date Submitted: 12-10-25

D. Supplemental sheet for nonproject actions [HELP]

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

The proposal would not include any discharges to water of toxic or hazardous substances of any kind. Because discharges to water are not proposed and toxic or hazardous substances are not part of the proposal, the proposal would not cause an increase in discharge to water or production, storage or release of toxic or hazardous substances.

Proposed measures to avoid or reduce such increases are:

Since no increases are anticipated, no measures to avoid or reduce them are proposed.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

The proposal does not include any components that are likely to affect plants, animals, fish or marine life. Since the proposal is simply to change the comprehensive plan map and zoning designation, there would be no impact to the above-mentioned resources.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

The proposal would be in compliance with all local, state and federal regulations regarding the above-mentioned resources. Compliance with all applicable regulations would satisfactorily protect and conserve them.

3. How would the proposal be likely to deplete energy or natural resources?

The proposal would not use any energy or natural resources thus it would not deplete them.

Proposed measures to protect or conserve energy and natural resources are:

Since there would be no impacts to energy or natural resources, no measures to protect or conserve them are proposed.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic cultural sites, wetlands, floodplains, or prime farmlands?

The proposal would not be likely to use or affect environmentally sensitive areas or areas designated for governmental protection because none are present on the property.

Proposed measures to protect such resources or to avoid or reduce impacts are:

Since there would be no impact to such resources, no measures to protect them are proposed. Subsequent future actions would be subject to regulations protective of such habitats.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

The proposal would be likely to affect land use by changing the zoning map designation. Such a change would be compatible with any existing plans since the property is adjacent to existing property with the same zoning designation. The proposal would not affect shoreline use since it is not adjacent to a shoreline.

Proposed measures to avoid or reduce shoreline and land use impacts are:

Since there would be no negative impact to shoreline and/or land use, no measures are proposed to avoid or reduce them.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

The proposal would not be likely to increase demands on transportation or public services and utilities.

Proposed measures to reduce or respond to such demand(s) are:

Since there would be no increased demands on transportation or public services and utilities, no measures are proposed to reduce such demands.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

The proposal would not conflict with local, state or federal laws regarding the protection of the environment.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

CC 7. Chelan County is hereby given consent to enter the property(ies) listed above.

CC 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

CC 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

CC 10. I certify that this application has been made with the consent of the lawful property owner(s).

CC 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

CC 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

COMPREHENSIVE PLAN AMENDMENT SUPPLEMENTAL INFORMATION

This packet is designed to assist you in preparing your application for a Comprehensive Plan Amendment. The following information is required at the time of submittal. Applications will be accepted **January 2 through March 1** of each calendar year. Additional information may be required. ***An incomplete application will not be processed.***

- ✓ A completed General Land Use Application, pursuant to CCC, Section 14.14.050(A) and (B).
- ✓ A completed SEPA Checklist (State Environmental Policy Act), pursuant to CCC, Section 14.14.050(D).
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (C), a detailed narrative which includes the following:
  - i. A detailed statement of what is proposed to be changed and why. Identify the specific comprehensive land use designation map and zoning map that would be amended; and,
  - ii. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (Chapter 36.70A RCW as amended) and any applicable County-wide planning policies; and,
  - iii. A statement of how the amendment complies with or supports the comprehensive plan's goals and policies; and,
  - iv. A detailed statement on how the land use designation amendment complies with comprehensive plan land use designation/siting criteria; and,
  - v. A statement of how the amendment is consistent with and supported by the capital facility element and the transportation element of the comprehensive plan, or if not, what changes to these elements would be required; and,
  - vi. For land use designation amendments, identify the land uses surrounding the affected property and describe how the proposed change would affect the surrounding land uses. Describe why the proposed amendment is more appropriate than the existing land use designation; and,
  - vii. Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas; and,
  - viii. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and
  - ix. Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare; and
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (E), The applicable processing fee for comprehensive plan amendments and SEPA review as determined by the county's adopted fee schedule, as amended, except that amendment requests by the cities shall not require the collection of said fees.
- ✓ Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following:
  1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:
     - A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,
     - B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

E. The amendment does not adversely affect the surrounding land uses; and,

F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

✓**RCW 36.70A.020 Planning goals.**

The following goals are adopted to guide the development and adoption of comprehensive plans and development regulations of those counties and cities that are required or choose to plan under RCW 36.70A.040. The following goals are not listed in order of priority and shall be used exclusively for the purpose of guiding the development of comprehensive plans and development regulations:

(1) Urban growth. Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.

(2) Reduce sprawl. Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

(3) Transportation. Encourage efficient multimodal transportation systems that are based on regional priorities and coordinated with county and city comprehensive plans.

(4) Housing. Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

(5) Economic development. Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

(6) Property rights. Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.

(7) Permits. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.

(8) Natural resource industries. Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.

(9) Open space and recreation. Retain open space, enhance recreational opportunities, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.

(10) Environment. Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.

(11) Citizen participation and coordination. Encourage the involvement of citizens in the planning process and ensure coordination between communities and jurisdictions to reconcile conflicts.

(12) Public facilities and services. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.

(13) Historic preservation. Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.

Chelan County Code 14.14.050

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of parcel no. 272303330175 at 5.14 acres from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5). The property is located east of Chelan, within Section 03, T 27N, R 23E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 18. Parcel no 272303330175 is adjacent to 168 acres zoned RR 2.5 to the east of the subject property and, in addition to 54 acres zoned RR 2.5 occurring northwest of the subject property directly north of US Highway 97A.

The zoning and comprehensive plan designations are proposed to be changed to align the property with more appropriate zoning based on the property locations adjacent to Highway 97A, Hugo Road, existing residential use and adjacent zoning. The total area proposed to be rezoned is 5.14 acres.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, shrub steppe, and shoreline. This leaves a very small overall percentage of Chelan County available for residential use, while the demand for housing remains high. This lack of inventory is driving the price of residential property which negatively affects affordability of housing for those who live and work in Chelan County.

RCW 36.70A.020(1) encourages urban growth. The subject property is not located in an urban growth area but rather located near the Chelan UGA and adjacent to the same zoning district as that which is proposed.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development. The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land. The best use for this land is allowing the density to increase in the developable areas while preserving the open space and critical areas.

RCW 36.70A.020(4) encourages the promotion of a variety of residential densities and housing types. Given the fact that only 12% of Chelan County is in private ownership, residential development will continue, whether it be as a standard subdivision

encouraging inefficient use of land with large lots, or the use of innovative development through clusters and planned developments, encouraging more manageable lots sizes and open space preservation.

The proposal is also consistent with the county-wide planning policies:

Policy 4: The proposal is consistent with the policies for county-wide transportation facilities and strategies, through an integrated transportation system and is within the current capacity. The property is located adjacent to U.S. Highway 97A and a county road (Hugo Road), and the proposal would not result in heavy traffic through residential neighborhoods or otherwise result in traffic congestion or impacts on inadequate streets or roads.

Policy 5: The proposal is consistent with the county-wide policies for housing by directly addressing land available for housing options, encouraging the productive development of the property for housing, and permitting new housing in an area that already is adjacent to RR 2.5 zoning.

Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, one of the factors is "[t]he availability of housing to support economic growth." The proposal would encourage the development of the property as additional housing that would support economic growth in the Chelan area and directly respond to the need for more housing in the area. More inventory has a positive effect on housing costs for buyers.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

Land Use Element; Residential Development

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County.

Policy LU 1.1: Promote improved neighborhood character and compatibility through unified design and site requirements for both site-built homes and manufactured and modular housing.

Rationale: The placement of should take into consideration compatibility with the character of existing and future residential areas.

Increasing the density of residential lots in this area would promote a future division of land that can be developed with a unified design and allow lots sizes which could accommodate housing that would be affordable for the area workforce or reduce competition for existing housing.

Policy LU 1.2: Protect residential neighborhoods from impacts associated with incompatible land uses through application of development standards and permit conditioning.

Rationale: Incompatible land uses located in close proximity to residential neighborhoods may create adverse impacts which could lead to a reduction of the high quality of life for the County residents.

The proposed RR 2.5 zoning is the same as the adjacent property to the east and will allow for residential development which is compatible with the existing residential uses in the area.

Policy LU 1.3: Develop innovative regulatory strategies that create developer incentives to provide affordable housing to low- and moderate-income households.

Rationale: This can be accomplished through the use of innovative techniques including but not limited to density bonuses, performance zoning, zero lot line development, and cluster subdivisions. Incentives may help facilitate the construction of low- and moderate-income housing.

The proposed RR 2.5 zoning will allow lot sizes that are in accordance with the Chelan-Douglas Health District standards for water and sewer disposal. This density allows the creation of more residential inventory which serves to reduce land prices based on supply and demand.

Policy LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

Rationale: Many parcels of land are available within existing residential developments that can accommodate further development. Infill within these areas will allow public facilities and services to be provided in a more efficient manner.

The proposed rezone is adjacent to a large area zoned RR 2.5 with appropriate lot sizes. The subject property can accommodate further development that is consistent with adjacent land uses and lot sizes.

Housing Element

Goal H 2: Promote a variety of residential densities and housing types.

Policy H 2.1: Promote a diversity of housing unit types and densities to meet the needs of all existing and future residents of the County, including both site-built and manufactured and modular homes.

Rationale: An adequate supply of appropriately zoned land will ensure that the GMA plan does not artificially create inflation in housing prices by restricting competition in the land market.

The approval of this application will lead to increasing the supply of appropriately zoned land that will ensure that inflation in housing prices is not artificially created.

4. **A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.**

Rural Element

Designations/Siting Criteria – Rural Residential 2.5

Density: One (1) dwelling unit per 2.5 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. **Geographical and Geological Characteristics. The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be immediately adjacent to existing residential or rural developments. The area may be adjacent to urban growth areas.**

2. **Natural Resources. The area has limited resource management potential. The area may be adjacent to resource lands.**

3. **Public Services. Uses do not require extension or provision of urban levels of services. Rural governmental services and infrastructure are typically available, planned and or funded for.**

4. **Existing Land Uses. Single family residences, agricultural uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are currently 2.5 acres or greater in size but typically less than 5 acres.**

The property meets the designation and siting criteria for RR 2.5 and is more appropriate than the current zoning. The property is closely associated with natural amenities found in Chelan County due to the location in the greater Chelan recreational area. The property is not designated as a resource land of long-term significance. Rural governmental services are available and planned for. Existing land uses in the area include seasonal and year-round residences, tourist and recreational activities, agriculture, and other rural development. There are many properties in the area that are zoned RR 2.5.

5. **A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, or if not, what changes to these elements would be required.**

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

6. **For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.**

The property to the north is zoned RR 5 but is separated from the subject property by Highway 97A. The property to the south and west is zoned RR5. The properties to the east have the same zoning as that which is proposed - RR 2.5, and like the subject property is bordered by U.S. Highway 97A to the north. The proposed designation is more appropriate because the property is bounded on two sides by highways/roads and is in a location with existing access to a county road (Hugo Road), with sufficient right of way for future development.

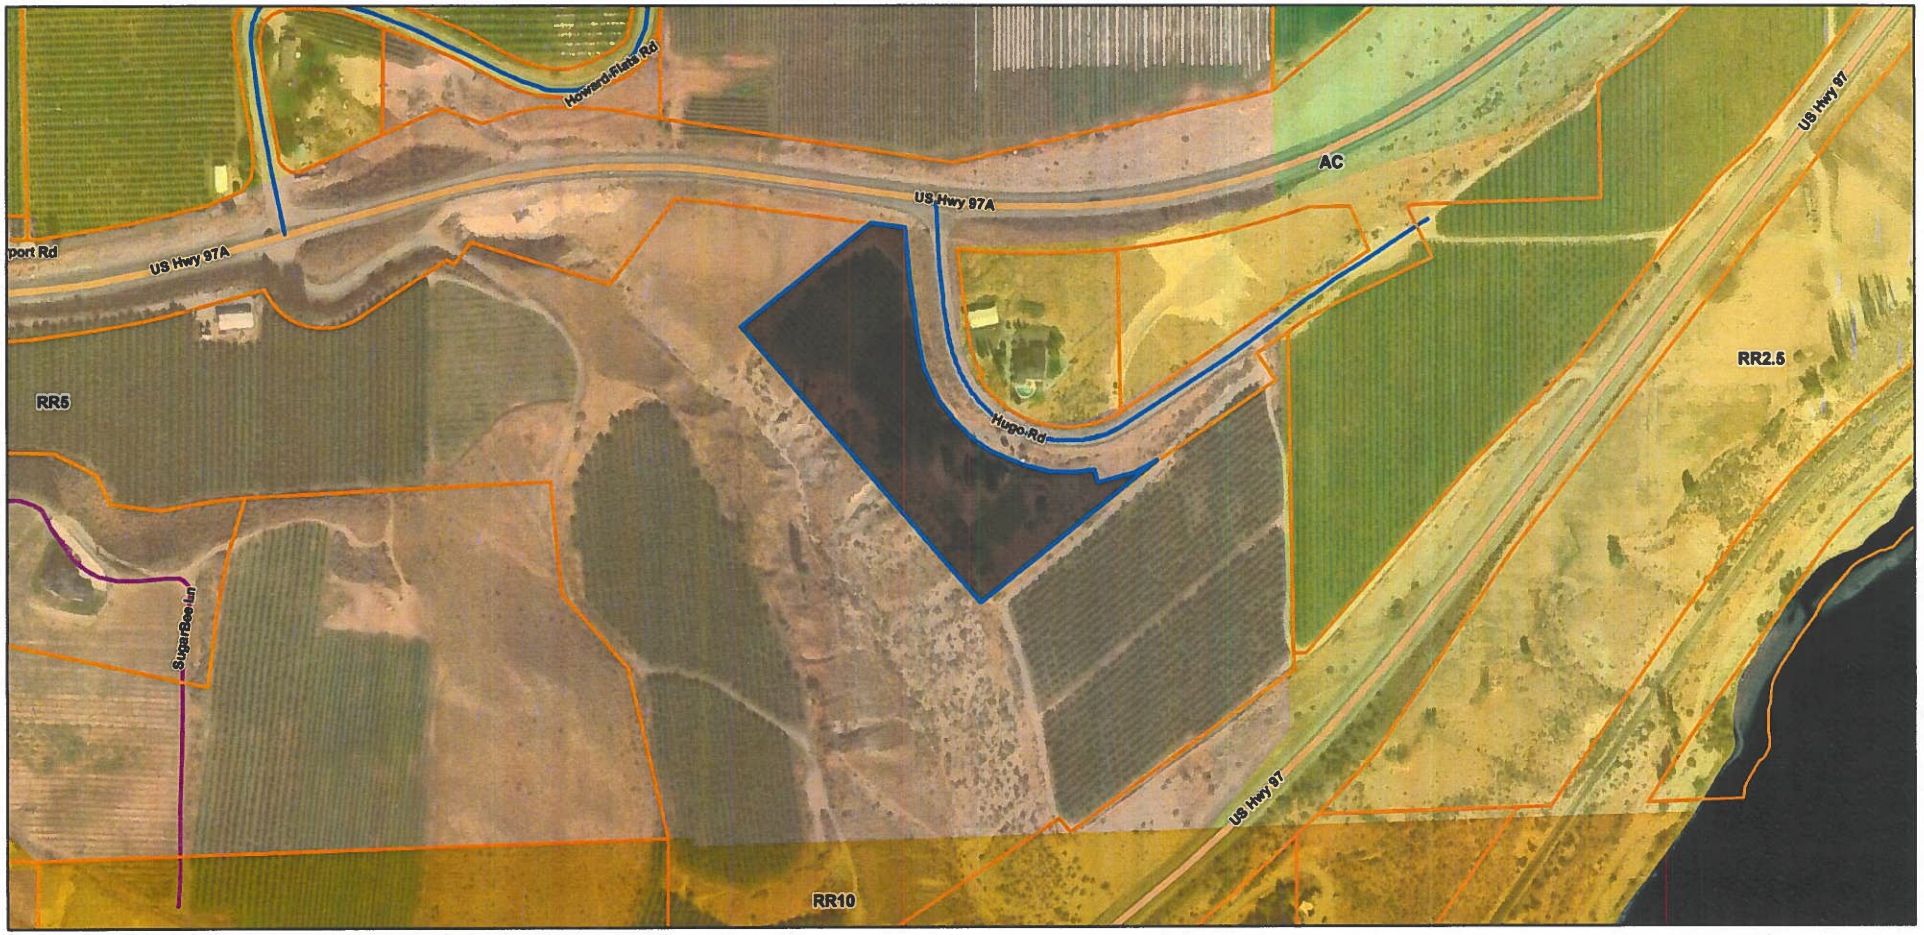
The proposed amendment is a more appropriate zoning for the subject parcel due to the consistent nature of alignment with previously mentioned goals of the RCW 36.70A.020 and Chelan County Planning Policies.

7. **Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?**

The proposed text amendment would not affect lands designated as resource lands of long-term commercial significance and/or critical areas. The subject property is not adjacent to Commercial Forest or Agricultural Lands. The property has been evaluated for the presence of streams and/or wetlands and there are none on the property. Any critical areas that may be present on the subject property would be adequately protected by conditions of approval contained in any future land use approvals. All required protections to critical areas such the submission of geotechnical reports would be complied with as necessary in order maintain a high level of environmental quality in Chelan County.

8. **How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.**

The proposed amendment would make a certain amount of land available for higher density development to accommodate future growth in the rural, unincorporated areas of Chelan County. Moderately priced rural properties are very desirable, and the demand



is high for residential building lots. The price of land is increasing rapidly because the demand is high, and the supply is extremely low.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The increased number of lots available for residential development will contribute to stabilizing the housing market, which at present is unattainable for many lifelong Chelan area residents. The value of the property will also increase the residential property taxes for Chelan County, which in turn, will increase the funding for governmental services.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. Name of proposed project, if applicable:

N/A

2. Name of applicant:

Patricia Campbell

3. Address and phone number of applicant and contact person:

	Agent
Patricia Campbell	Erin Burgess
P.O. Box 2131	151 South Worthen Street, Suite 101
Kingston, WA 99346	Wenatchee, WA 98801
(206) 300-1177	509-640-3283

4. Date checklist prepared:

December 2025

5. Agency requesting checklist:

Chelan County

6. Proposed timing or schedule (including phasing, if applicable):

Timing and schedule would be consistent with the guidelines established in Chelan County Code Title 14—Development procedures.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

Unknown.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

None known.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 5.14 acres (parcel 272303330175) from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5).

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 24 Hugo Road, adjacent to U.S. Highway 97A, east of Chelan, within Section 03, T 27N, R 23E.W.M. Parcel no. 272303330175.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

- Pogue gravelly fine sandy loam (PrE), 25 to 45 percent
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

None onsite.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. Plants [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
____pasture
____crop or grain
__x__ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. *Environmental Health* [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) Describe special emergency services that might be required.

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is residential and agricultural. Adjacent properties are in residential and agricultural use.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

1,596 sq ft residence.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

RR 5

g. What is the current comprehensive plan designation of the site?

RR 5

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. **Has any part of the site been classified as a critical area by the city or county? If so, specify.**

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Presumptive Shrubsteppe habitat range.

j. **Approximately how many people would reside or work in the completed project?**

N/A

k. **Approximately how many people would the completed project displace?**

N/A.

l. **Proposed measures to avoid or reduce displacement impacts, if any:**

None.

m. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:**

Application for a Comprehensive plan map amendment and zone change.

n. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None.

9. Housing [help]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The site is accessed from Hugo Road. U.S. Highway 97A borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Patricia Campbell

Name of signee Patricia ~~Pamela~~ Campbell

Position and Agency/Organization owner

Date Submitted: 12-10-25

D. Supplemental sheet for nonproject actions [HELP]

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

The proposal would not include any discharges to water of toxic or hazardous substances of any kind. Because discharges to water are not proposed and toxic or hazardous substances are not part of the proposal, the proposal would not cause an increase in discharge to water or production, storage or release of toxic or hazardous substances.

Proposed measures to avoid or reduce such increases are:

Since no increases are anticipated, no measures to avoid or reduce them are proposed.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

The proposal does not include any components that are likely to affect plants, animals, fish or marine life. Since the proposal is simply to change the comprehensive plan map and zoning designation, there would be no impact to the above-mentioned resources.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

The proposal would be in compliance with all local, state and federal regulations regarding the above-mentioned resources. Compliance with all applicable regulations would satisfactorily protect and conserve them.

3. How would the proposal be likely to deplete energy or natural resources?

The proposal would not use any energy or natural resources thus it would not deplete them.

Proposed measures to protect or conserve energy and natural resources are:

Since there would be no impacts to energy or natural resources, no measures to protect or conserve them are proposed.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic cultural sites, wetlands, floodplains, or prime farmlands?

The proposal would not be likely to use or affect environmentally sensitive areas or areas designated for governmental protection because none are present on the property.

Proposed measures to protect such resources or to avoid or reduce impacts are:

Since there would be no impact to such resources, no measures to protect them are proposed. Subsequent future actions would be subject to regulations protective of such habitats.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

The proposal would be likely to affect land use by changing the zoning map designation. Such a change would be compatible with any existing plans since the property is adjacent to existing property with the same zoning designation. The proposal would not affect shoreline use since it is not adjacent to a shoreline.

Proposed measures to avoid or reduce shoreline and land use impacts are:

Since there would be no negative impact to shoreline and/or land use, no measures are proposed to avoid or reduce them.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

The proposal would not be likely to increase demands on transportation or public services and utilities.

Proposed measures to reduce or respond to such demand(s) are:

Since there would be no increased demands on transportation or public services and utilities, no measures are proposed to reduce such demands.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

The proposal would not conflict with local, state or federal laws regarding the protection of the environment.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. Name of proposed project, if applicable:

N/A

2. Name of applicant:

Patricia Campbell

3. Address and phone number of applicant and contact person:

	Agent
Patricia Campbell	Erin Burgess
P.O. Box 2131	151 South Worthen Street, Suite 101
Kingston, WA 99346	Wenatchee, WA 98801
(206) 300-1177	509-640-3283

4. Date checklist prepared:

December 2025

5. Agency requesting checklist:

Chelan County

6. Proposed timing or schedule (including phasing, if applicable):

Timing and schedule would be consistent with the guidelines established in Chelan County Code Title 14—Development procedures.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

Unknown.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

None known.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 5.14 acres (parcel 272303330175) from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5).

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 24 Hugo Road, adjacent to U.S. Highway 97A, east of Chelan, within Section 03, T 27N, R 23E.W.M. Parcel no. 272303330175.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

- Pogue gravelly fine sandy loam (PrE), 25 to 45 percent
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

None onsite.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. Plants [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
____pasture
____crop or grain
__x__ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. *Environmental Health* [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) Describe special emergency services that might be required.

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is residential and agricultural. Adjacent properties are in residential and agricultural use.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

1,596 sq ft residence.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

RR 5

g. What is the current comprehensive plan designation of the site?

RR 5

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. **Has any part of the site been classified as a critical area by the city or county? If so, specify.**

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Presumptive Shrubsteppe habitat range.

j. **Approximately how many people would reside or work in the completed project?**

N/A

k. **Approximately how many people would the completed project displace?**

N/A.

l. **Proposed measures to avoid or reduce displacement impacts, if any:**

None.

m. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:**

Application for a Comprehensive plan map amendment and zone change.

n. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None.

9. Housing [help]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The site is accessed from Hugo Road. U.S. Highway 97A borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

GENERAL LAND USE APPLICATION FORM

Parcel Number (APN): 272303330175 Lot Size: 5.14 (Acres)
Parcel Address: 24 Hugo Rd. City/Zip Code: Chelan 98816
Property Owner(s): Patricia Campbell / Christopher Campbell Zoning: RR5
Mailing Address: PO Box 2131
City/State/Zip Code: Kingston, WA 98346
Phone: 206-300-1177 E-mail: pinewoodcottages@msn.com

Applicant/Agent (if different than owner): Erin Burgess
Company and Mailing Address: Farallon Consulting, LLC DBA Grette Associates, PO Box 94147
City/State/Zip: Seattle, WA 98124 Phone: (509) 640-3289
E-mail: eburgess@farallonconsulting.com
For multiple owners, applicants, or agents, provide additional sheets.

This General Land Use Application Form shall be completed unless specified below. Additional information and supplemental forms may be required. Please review all applicable statutes and regulations pertaining to the proposed development and provide information, documents, studies, and reports (such as a Traffic Impact Study or environmental forms) demonstrating compliance with all statutory and regulatory requirements and other applicable criteria.

Application For: (Check all that apply)

- ☐ Administrative Modification
- ☐ Administrative Determination
- ☐ Administrative Interpretation
- ☐ Binding Site Plan
- ☑ Comprehensive Plan Map Amendment
- ☐ Comprehensive Plan Text Amendment
- ☐ Conditional Use Permit
- ☐ Forest Practice/Conversion
- ☐ Open Space: Public Benefit Rating System
- ☐ Major Subdivision
- ☐ Master Planned Development
- ☐ Planned Development
- ☐ Plat Alteration or Vacation
- ☐ Short Plat
- ☐ Variance (zoning or critical areas)
- ☐ Zoning Change-Text Amendment/ Map Amendment
- ☐ Critical Area Determination
- ☐ Other: _____

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

CC 7. Chelan County is hereby given consent to enter the property(ies) listed above.

CC 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

CC 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

CC 10. I certify that this application has been made with the consent of the lawful property owner(s).

CC 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

CC 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

COMPREHENSIVE PLAN AMENDMENT SUPPLEMENTAL INFORMATION

This packet is designed to assist you in preparing your application for a Comprehensive Plan Amendment. The following information is required at the time of submittal. Applications will be accepted **January 2 through March 1** of each calendar year. Additional information may be required. ***An incomplete application will not be processed.***

- ✓ A completed General Land Use Application, pursuant to CCC, Section 14.14.050(A) and (B).
- ✓ A completed SEPA Checklist (State Environmental Policy Act), pursuant to CCC, Section 14.14.050(D).
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (C), a detailed narrative which includes the following:
  - i. A detailed statement of what is proposed to be changed and why. Identify the specific comprehensive land use designation map and zoning map that would be amended; and,
  - ii. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (Chapter 36.70A RCW as amended) and any applicable County-wide planning policies; and,
  - iii. A statement of how the amendment complies with or supports the comprehensive plan's goals and policies; and,
  - iv. A detailed statement on how the land use designation amendment complies with comprehensive plan land use designation/siting criteria; and,
  - v. A statement of how the amendment is consistent with and supported by the capital facility element and the transportation element of the comprehensive plan, or if not, what changes to these elements would be required; and,
  - vi. For land use designation amendments, identify the land uses surrounding the affected property and describe how the proposed change would affect the surrounding land uses. Describe why the proposed amendment is more appropriate than the existing land use designation; and,
  - vii. Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas; and,
  - viii. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and
  - ix. Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare; and
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (E), The applicable processing fee for comprehensive plan amendments and SEPA review as determined by the county's adopted fee schedule, as amended, except that amendment requests by the cities shall not require the collection of said fees.
- ✓ Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following:
  1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:
     - A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,
     - B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

E. The amendment does not adversely affect the surrounding land uses; and,

F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

✓**RCW 36.70A.020 Planning goals.**

The following goals are adopted to guide the development and adoption of comprehensive plans and development regulations of those counties and cities that are required or choose to plan under RCW 36.70A.040. The following goals are not listed in order of priority and shall be used exclusively for the purpose of guiding the development of comprehensive plans and development regulations:

(1) Urban growth. Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.

(2) Reduce sprawl. Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

(3) Transportation. Encourage efficient multimodal transportation systems that are based on regional priorities and coordinated with county and city comprehensive plans.

(4) Housing. Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

(5) Economic development. Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

(6) Property rights. Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.

(7) Permits. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.

(8) Natural resource industries. Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.

(9) Open space and recreation. Retain open space, enhance recreational opportunities, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.

(10) Environment. Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.

(11) Citizen participation and coordination. Encourage the involvement of citizens in the planning process and ensure coordination between communities and jurisdictions to reconcile conflicts.

(12) Public facilities and services. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.

(13) Historic preservation. Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.

Chelan County Code 14.14.050

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of parcel no. 272303330175 at 5.14 acres from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5). The property is located east of Chelan, within Section 03, T 27N, R 23E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 18. Parcel no 272303330175 is adjacent to 168 acres zoned RR 2.5 to the east of the subject property and, in addition to 54 acres zoned RR 2.5 occurring northwest of the subject property directly north of US Highway 97A.

The zoning and comprehensive plan designations are proposed to be changed to align the property with more appropriate zoning based on the property locations adjacent to Highway 97A, Hugo Road, existing residential use and adjacent zoning. The total area proposed to be rezoned is 5.14 acres.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, shrub steppe, and shoreline. This leaves a very small overall percentage of Chelan County available for residential use, while the demand for housing remains high. This lack of inventory is driving the price of residential property which negatively affects affordability of housing for those who live and work in Chelan County.

RCW 36.70A.020(1) encourages urban growth. The subject property is not located in an urban growth area but rather located near the Chelan UGA and adjacent to the same zoning district as that which is proposed.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development. The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land. The best use for this land is allowing the density to increase in the developable areas while preserving the open space and critical areas.

RCW 36.70A.020(4) encourages the promotion of a variety of residential densities and housing types. Given the fact that only 12% of Chelan County is in private ownership, residential development will continue, whether it be as a standard subdivision

encouraging inefficient use of land with large lots, or the use of innovative development through clusters and planned developments, encouraging more manageable lots sizes and open space preservation.

The proposal is also consistent with the county-wide planning policies:

Policy 4: The proposal is consistent with the policies for county-wide transportation facilities and strategies, through an integrated transportation system and is within the current capacity. The property is located adjacent to U.S. Highway 97A and a county road (Hugo Road), and the proposal would not result in heavy traffic through residential neighborhoods or otherwise result in traffic congestion or impacts on inadequate streets or roads.

Policy 5: The proposal is consistent with the county-wide policies for housing by directly addressing land available for housing options, encouraging the productive development of the property for housing, and permitting new housing in an area that already is adjacent to RR 2.5 zoning.

Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, one of the factors is "[t]he availability of housing to support economic growth." The proposal would encourage the development of the property as additional housing that would support economic growth in the Chelan area and directly respond to the need for more housing in the area. More inventory has a positive effect on housing costs for buyers.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

Land Use Element; Residential Development

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County.

Policy LU 1.1: Promote improved neighborhood character and compatibility through unified design and site requirements for both site-built homes and manufactured and modular housing.

Rationale: The placement of should take into consideration compatibility with the character of existing and future residential areas.

Increasing the density of residential lots in this area would promote a future division of land that can be developed with a unified design and allow lots sizes which could accommodate housing that would be affordable for the area workforce or reduce competition for existing housing.

Policy LU 1.2: Protect residential neighborhoods from impacts associated with incompatible land uses through application of development standards and permit conditioning.

Rationale: Incompatible land uses located in close proximity to residential neighborhoods may create adverse impacts which could lead to a reduction of the high quality of life for the County residents.

The proposed RR 2.5 zoning is the same as the adjacent property to the east and will allow for residential development which is compatible with the existing residential uses in the area.

Policy LU 1.3: Develop innovative regulatory strategies that create developer incentives to provide affordable housing to low- and moderate-income households.

Rationale: This can be accomplished through the use of innovative techniques including but not limited to density bonuses, performance zoning, zero lot line development, and cluster subdivisions. Incentives may help facilitate the construction of low- and moderate-income housing.

The proposed RR 2.5 zoning will allow lot sizes that are in accordance with the Chelan-Douglas Health District standards for water and sewer disposal. This density allows the creation of more residential inventory which serves to reduce land prices based on supply and demand.

Policy LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

Rationale: Many parcels of land are available within existing residential developments that can accommodate further development. Infill within these areas will allow public facilities and services to be provided in a more efficient manner.

The proposed rezone is adjacent to a large area zoned RR 2.5 with appropriate lot sizes. The subject property can accommodate further development that is consistent with adjacent land uses and lot sizes.

Housing Element

Goal H 2: Promote a variety of residential densities and housing types.

Policy H 2.1: Promote a diversity of housing unit types and densities to meet the needs of all existing and future residents of the County, including both site-built and manufactured and modular homes.

Rationale: An adequate supply of appropriately zoned land will ensure that the GMA plan does not artificially create inflation in housing prices by restricting competition in the land market.

The approval of this application will lead to increasing the supply of appropriately zoned land that will ensure that inflation in housing prices is not artificially created.

4. **A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.**

Rural Element

Designations/Siting Criteria – Rural Residential 2.5

Density: One (1) dwelling unit per 2.5 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. **Geographical and Geological Characteristics. The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be immediately adjacent to existing residential or rural developments. The area may be adjacent to urban growth areas.**

2. **Natural Resources. The area has limited resource management potential. The area may be adjacent to resource lands.**

3. **Public Services. Uses do not require extension or provision of urban levels of services. Rural governmental services and infrastructure are typically available, planned and or funded for.**

4. **Existing Land Uses. Single family residences, agricultural uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are currently 2.5 acres or greater in size but typically less than 5 acres.**

The property meets the designation and siting criteria for RR 2.5 and is more appropriate than the current zoning. The property is closely associated with natural amenities found in Chelan County due to the location in the greater Chelan recreational area. The property is not designated as a resource land of long-term significance. Rural governmental services are available and planned for. Existing land uses in the area include seasonal and year-round residences, tourist and recreational activities, agriculture, and other rural development. There are many properties in the area that are zoned RR 2.5.

5. **A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, or if not, what changes to these elements would be required.**

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

6. **For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.**

The property to the north is zoned RR 5 but is separated from the subject property by Highway 97A. The property to the south and west is zoned RR5. The properties to the east have the same zoning as that which is proposed - RR 2.5, and like the subject property is bordered by U.S. Highway 97A to the north. The proposed designation is more appropriate because the property is bounded on two sides by highways/roads and is in a location with existing access to a county road (Hugo Road), with sufficient right of way for future development.

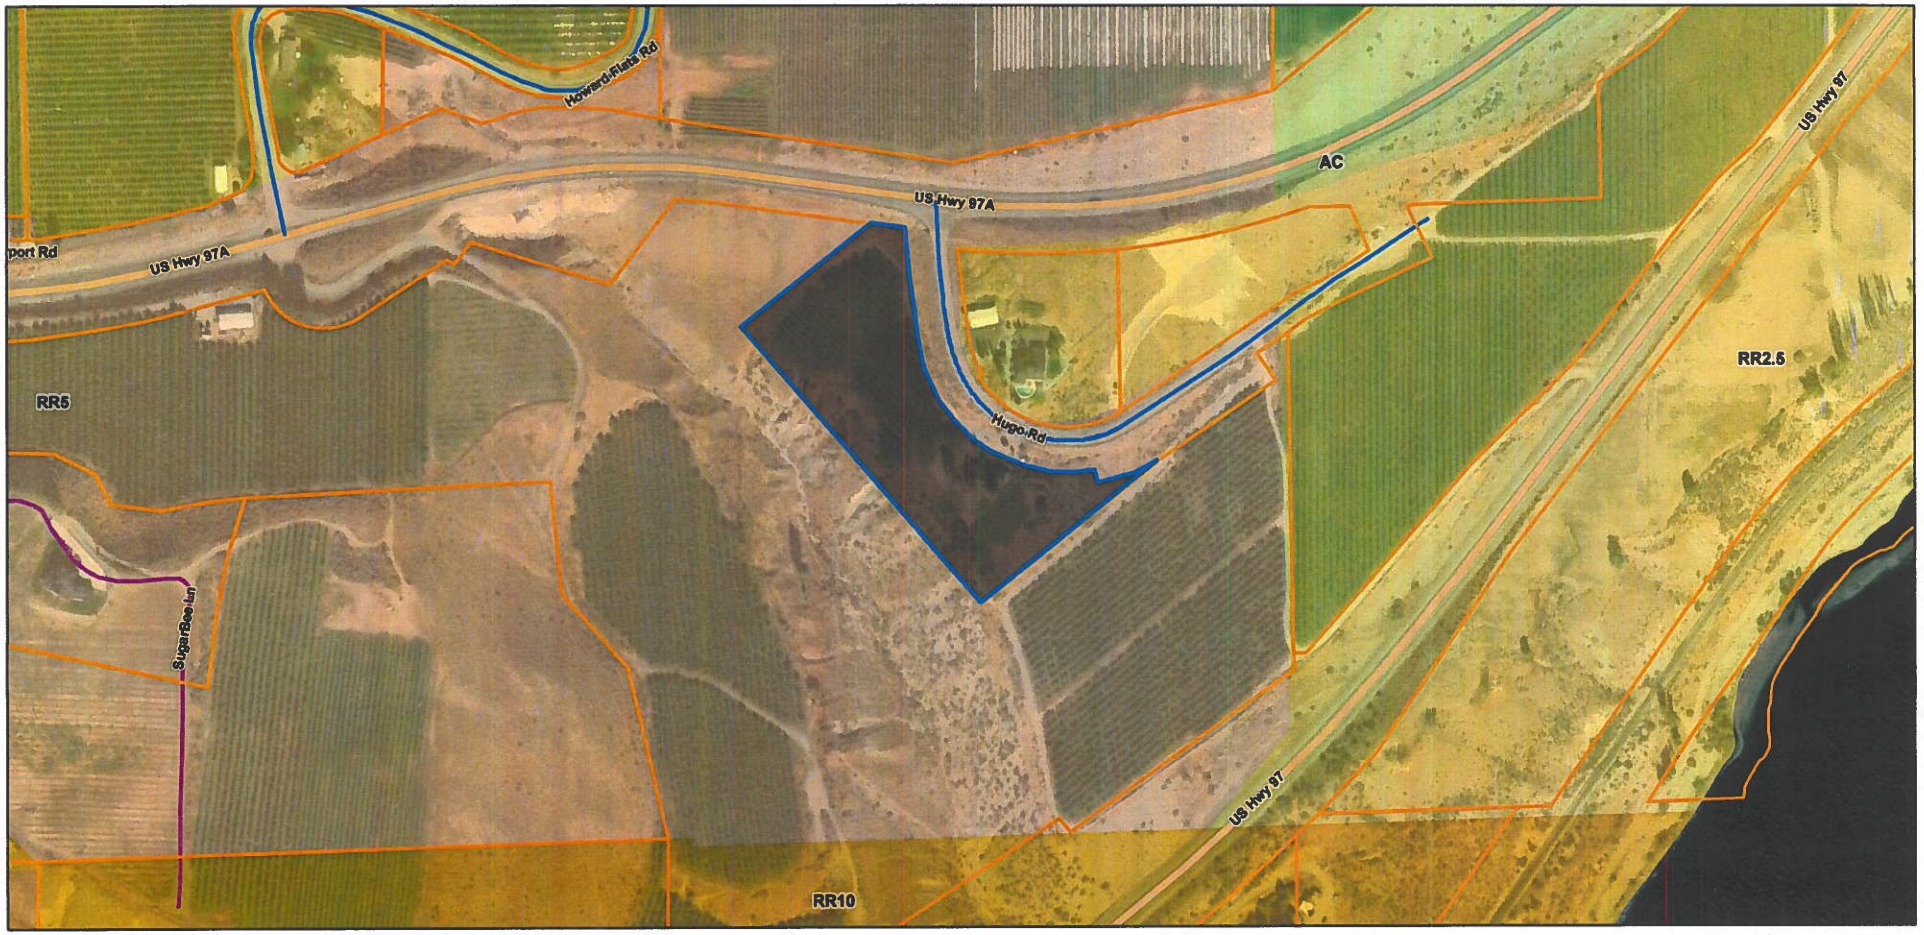
The proposed amendment is a more appropriate zoning for the subject parcel due to the consistent nature of alignment with previously mentioned goals of the RCW 36.70A.020 and Chelan County Planning Policies.

7. **Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?**

The proposed text amendment would not affect lands designated as resource lands of long-term commercial significance and/or critical areas. The subject property is not adjacent to Commercial Forest or Agricultural Lands. The property has been evaluated for the presence of streams and/or wetlands and there are none on the property. Any critical areas that may be present on the subject property would be adequately protected by conditions of approval contained in any future land use approvals. All required protections to critical areas such the submission of geotechnical reports would be complied with as necessary in order maintain a high level of environmental quality in Chelan County.

8. **How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.**

The proposed amendment would make a certain amount of land available for higher density development to accommodate future growth in the rural, unincorporated areas of Chelan County. Moderately priced rural properties are very desirable, and the demand



is high for residential building lots. The price of land is increasing rapidly because the demand is high, and the supply is extremely low.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The increased number of lots available for residential development will contribute to stabilizing the housing market, which at present is unattainable for many lifelong Chelan area residents. The value of the property will also increase the residential property taxes for Chelan County, which in turn, will increase the funding for governmental services.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. Name of proposed project, if applicable:

N/A

2. Name of applicant:

Patricia Campbell

3. Address and phone number of applicant and contact person:

	Agent
Patricia Campbell	Erin Burgess
P.O. Box 2131	151 South Worthen Street, Suite 101
Kingston, WA 99346	Wenatchee, WA 98801
(206) 300-1177	509-640-3283

4. Date checklist prepared:

December 2025

5. Agency requesting checklist:

Chelan County

6. Proposed timing or schedule (including phasing, if applicable):

Timing and schedule would be consistent with the guidelines established in Chelan County Code Title 14—Development procedures.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

Unknown.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

None known.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 5.14 acres (parcel 272303330175) from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5).

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 24 Hugo Road, adjacent to U.S. Highway 97A, east of Chelan, within Section 03, T 27N, R 23E.W.M. Parcel no. 272303330175.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

- Pogue gravelly fine sandy loam (PrE), 25 to 45 percent
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

None onsite.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. Plants [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
____pasture
____crop or grain
__x__ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. *Environmental Health* [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) Describe special emergency services that might be required.

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is residential and agricultural. Adjacent properties are in residential and agricultural use.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

1,596 sq ft residence.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

RR 5

g. What is the current comprehensive plan designation of the site?

RR 5

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. **Has any part of the site been classified as a critical area by the city or county? If so, specify.**

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Presumptive Shrubsteppe habitat range.

j. **Approximately how many people would reside or work in the completed project?**

N/A

k. **Approximately how many people would the completed project displace?**

N/A.

l. **Proposed measures to avoid or reduce displacement impacts, if any:**

None.

m. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:**

Application for a Comprehensive plan map amendment and zone change.

n. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None.

9. Housing [help]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The site is accessed from Hugo Road. U.S. Highway 97A borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Attachments: CPA 26-041 NOA.pdf; CPA 26-041 - Affidavit of posting.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Patricia and Christopher Campbell's property, File# CPA 26-041. This notice should be posted on the *subject property by March 5th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days,* starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.

Thank you,

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-041 Campbell - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5). 24 Hugo Road, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-330-175.

CPA 26-048 HMJD Collins, LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-430-050.

CPA 26-054 Hellickson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). Unassigned, Chelan. WA 98816 also identified as Assessor's Parcel No.: 25-18-32-330-200.

CPA 26-060 McMahon - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). 7948 East Leavenworth Rd., Leavenworth, WA 98826 also identified as Assessor's Parcel No.: 24-17-23-510-480.

On March 5, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 19, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Date: March 5, 2026

Notice of Application Date:	March 5, 2026

Proposed Project Description: An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5).

Existing Environmental Documents: State Environmental Policy Act (SEPA) Checklist

Permits Required: None

Public Review and Comment Period: PUBLIC COMMENT ON THIS PROPOSAL IS ENCOURAGED and no action will be taken on the project until the Agency comment period ends on **March 19, 2026**. Agencies, tribes, and the public are encouraged to review and comment on the proposed project. Public comments will be accepted at any time prior to the close of the public record. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, original signature, and should be as specific as possible. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision and appeal the decision as provided by law. Written comments must be submitted to the Department of Community Development, 316 Washington St., Suite 301 Wenatchee, WA 98801; Attention: Susan Dretke or email susan.dretke@co.chelan.wa.us for additional information or to review application materials.

The complete case file on this matter is available for review online at https://co-chelan-wa.smartgovcommunity.com/PublicNotice/PublicNoticeHome; or during normal business hours at the offices of the Chelan County Community Development Department located at 316 Washington St., Suite 301 Wenatchee, WA 98801 Monday-Friday between the hours of 8:00 A.M. and 5:00 P.M. Please contact the on-call planner at (509) 667-6224 to arrange an inspection of the file.

DETERMINATION OF APPLICATION STATUS

Pursuant to Title 14, Development Permit Procedures & Administration, Section 14.08.030, Determination of Completeness. (CCBOR Resolution No. 2004-16, as amended)

Project Description: The proposal is a request to amend the current comprehensive plan map designation from Rural Residential/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5).

File Number:	CPA 26-041
Related Files:	None
Parcel Address:	24 Hugo Rd., Chelan, WA 98816
Parcel Zoning	Rural Residential/Resource 5 (RR5)
Applicant/Owner:	Patricia and Christopher Campbell
Mailing Address:	PO Box 2131, Kingston, WA98346
Date Submitted:	2/11/26
Date Complete:	2/24/26

Upon Initial Review, The Above Referenced Application is Found To Be: COMPLETE

The required components of an application are present and are judged by the review authority to be technically accurate and contain sufficient information necessary to allow the processing of the application. All submittal fees have been paid.

Your application has been determined to be complete as of the date of this letter. Pursuant to Chelan County Code Section 14.08.030(5), a Determination of Completeness shall not preclude the department for requesting additional information or studies if the need for more information becomes apparent during processing of the proposed development.

Memorandum

To: Susan Dretke, Chelan County

From: Richmond Petty, REHS

Date: 03/13/26

RE: Campbell (CPA 26-041) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5). The subject property is located at 24 Hugo Rd., Chelan, WA 98816 (county tax parcel: 272303330175)

As proposed, I have no objections to further approval of this project.

- Existing permitted septic system 906-4C3B-0309 and new Group B Water System (Nielsen WS – AE511) serves lot.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Susan,

This consultation is in response to CPA 26-041 Campbell, SEPA Determination of Non-significance. This land use change allows an additional dwelling unit to be constructed with the ratio of 1 residence per 2.5 acres. If and when there is a planned development we look forward to reviewing those future plans.

On behalf of Amelia Stanger, Interim Tribal Historic Preservation Officer.

Fr Thomas Nielsen, Adjacent Land Owner Thomas Nielsen

Re Project File #'s CPA 26-048 and CPA 26-041

Date March 14, 2026

The purpose of this memorandum is to write in support of the proposed applications for a Comprehensive Plan Amendment to change the two subject properties zoning to Rural Residential 2.5 (RR2.5). With continued population growth in the greater Chelan area, there is a need for more affordable housing. The RR2.5 designation will maintain the rural nature of the area, but allow more families to live in the area.

I am the owner of two parcels of land adjacent to the proposed parcels and whole heartedly support their application. My properties are located at 25 Hugo Road and 109 Hugo Road. I welcome new neighbors!

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

CC 7. Chelan County is hereby given consent to enter the property(ies) listed above.

CC 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

CC 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

CC 10. I certify that this application has been made with the consent of the lawful property owner(s).

CC 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

CC 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

COMPREHENSIVE PLAN AMENDMENT SUPPLEMENTAL INFORMATION

This packet is designed to assist you in preparing your application for a Comprehensive Plan Amendment. The following information is required at the time of submittal. Applications will be accepted **January 2 through March 1** of each calendar year. Additional information may be required. ***An incomplete application will not be processed.***

- ✓ A completed General Land Use Application, pursuant to CCC, Section 14.14.050(A) and (B).
- ✓ A completed SEPA Checklist (State Environmental Policy Act), pursuant to CCC, Section 14.14.050(D).
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (C), a detailed narrative which includes the following:
  - i. A detailed statement of what is proposed to be changed and why. Identify the specific comprehensive land use designation map and zoning map that would be amended; and,
  - ii. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (Chapter 36.70A RCW as amended) and any applicable County-wide planning policies; and,
  - iii. A statement of how the amendment complies with or supports the comprehensive plan's goals and policies; and,
  - iv. A detailed statement on how the land use designation amendment complies with comprehensive plan land use designation/siting criteria; and,
  - v. A statement of how the amendment is consistent with and supported by the capital facility element and the transportation element of the comprehensive plan, or if not, what changes to these elements would be required; and,
  - vi. For land use designation amendments, identify the land uses surrounding the affected property and describe how the proposed change would affect the surrounding land uses. Describe why the proposed amendment is more appropriate than the existing land use designation; and,
  - vii. Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas; and,
  - viii. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and
  - ix. Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare; and
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (E), The applicable processing fee for comprehensive plan amendments and SEPA review as determined by the county's adopted fee schedule, as amended, except that amendment requests by the cities shall not require the collection of said fees.
- ✓ Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following:
  1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:
     - A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,
     - B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

E. The amendment does not adversely affect the surrounding land uses; and,

F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

✓**RCW 36.70A.020 Planning goals.**

The following goals are adopted to guide the development and adoption of comprehensive plans and development regulations of those counties and cities that are required or choose to plan under RCW 36.70A.040. The following goals are not listed in order of priority and shall be used exclusively for the purpose of guiding the development of comprehensive plans and development regulations:

(1) Urban growth. Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.

(2) Reduce sprawl. Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

(3) Transportation. Encourage efficient multimodal transportation systems that are based on regional priorities and coordinated with county and city comprehensive plans.

(4) Housing. Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

(5) Economic development. Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

(6) Property rights. Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.

(7) Permits. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.

(8) Natural resource industries. Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.

(9) Open space and recreation. Retain open space, enhance recreational opportunities, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.

(10) Environment. Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.

(11) Citizen participation and coordination. Encourage the involvement of citizens in the planning process and ensure coordination between communities and jurisdictions to reconcile conflicts.

(12) Public facilities and services. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.

(13) Historic preservation. Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.

Chelan County Code 14.14.050

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of parcel no. 272303330175 at 5.14 acres from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5). The property is located east of Chelan, within Section 03, T 27N, R 23E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 18. Parcel no 272303330175 is adjacent to 168 acres zoned RR 2.5 to the east of the subject property and, in addition to 54 acres zoned RR 2.5 occurring northwest of the subject property directly north of US Highway 97A.

The zoning and comprehensive plan designations are proposed to be changed to align the property with more appropriate zoning based on the property locations adjacent to Highway 97A, Hugo Road, existing residential use and adjacent zoning. The total area proposed to be rezoned is 5.14 acres.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, shrub steppe, and shoreline. This leaves a very small overall percentage of Chelan County available for residential use, while the demand for housing remains high. This lack of inventory is driving the price of residential property which negatively affects affordability of housing for those who live and work in Chelan County.

RCW 36.70A.020(1) encourages urban growth. The subject property is not located in an urban growth area but rather located near the Chelan UGA and adjacent to the same zoning district as that which is proposed.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development. The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land. The best use for this land is allowing the density to increase in the developable areas while preserving the open space and critical areas.

RCW 36.70A.020(4) encourages the promotion of a variety of residential densities and housing types. Given the fact that only 12% of Chelan County is in private ownership, residential development will continue, whether it be as a standard subdivision

encouraging inefficient use of land with large lots, or the use of innovative development through clusters and planned developments, encouraging more manageable lots sizes and open space preservation.

The proposal is also consistent with the county-wide planning policies:

Policy 4: The proposal is consistent with the policies for county-wide transportation facilities and strategies, through an integrated transportation system and is within the current capacity. The property is located adjacent to U.S. Highway 97A and a county road (Hugo Road), and the proposal would not result in heavy traffic through residential neighborhoods or otherwise result in traffic congestion or impacts on inadequate streets or roads.

Policy 5: The proposal is consistent with the county-wide policies for housing by directly addressing land available for housing options, encouraging the productive development of the property for housing, and permitting new housing in an area that already is adjacent to RR 2.5 zoning.

Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, one of the factors is "[t]he availability of housing to support economic growth." The proposal would encourage the development of the property as additional housing that would support economic growth in the Chelan area and directly respond to the need for more housing in the area. More inventory has a positive effect on housing costs for buyers.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

Land Use Element; Residential Development

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County.

Policy LU 1.1: Promote improved neighborhood character and compatibility through unified design and site requirements for both site-built homes and manufactured and modular housing.

Rationale: The placement of should take into consideration compatibility with the character of existing and future residential areas.

Increasing the density of residential lots in this area would promote a future division of land that can be developed with a unified design and allow lots sizes which could accommodate housing that would be affordable for the area workforce or reduce competition for existing housing.

Policy LU 1.2: Protect residential neighborhoods from impacts associated with incompatible land uses through application of development standards and permit conditioning.

Rationale: Incompatible land uses located in close proximity to residential neighborhoods may create adverse impacts which could lead to a reduction of the high quality of life for the County residents.

The proposed RR 2.5 zoning is the same as the adjacent property to the east and will allow for residential development which is compatible with the existing residential uses in the area.

Policy LU 1.3: Develop innovative regulatory strategies that create developer incentives to provide affordable housing to low- and moderate-income households.

Rationale: This can be accomplished through the use of innovative techniques including but not limited to density bonuses, performance zoning, zero lot line development, and cluster subdivisions. Incentives may help facilitate the construction of low- and moderate-income housing.

The proposed RR 2.5 zoning will allow lot sizes that are in accordance with the Chelan-Douglas Health District standards for water and sewer disposal. This density allows the creation of more residential inventory which serves to reduce land prices based on supply and demand.

Policy LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

Rationale: Many parcels of land are available within existing residential developments that can accommodate further development. Infill within these areas will allow public facilities and services to be provided in a more efficient manner.

The proposed rezone is adjacent to a large area zoned RR 2.5 with appropriate lot sizes. The subject property can accommodate further development that is consistent with adjacent land uses and lot sizes.

Housing Element

Goal H 2: Promote a variety of residential densities and housing types.

Policy H 2.1: Promote a diversity of housing unit types and densities to meet the needs of all existing and future residents of the County, including both site-built and manufactured and modular homes.

Rationale: An adequate supply of appropriately zoned land will ensure that the GMA plan does not artificially create inflation in housing prices by restricting competition in the land market.

The approval of this application will lead to increasing the supply of appropriately zoned land that will ensure that inflation in housing prices is not artificially created.

4. **A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.**

Rural Element

Designations/Siting Criteria – Rural Residential 2.5

Density: One (1) dwelling unit per 2.5 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. **Geographical and Geological Characteristics. The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be immediately adjacent to existing residential or rural developments. The area may be adjacent to urban growth areas.**

2. **Natural Resources. The area has limited resource management potential. The area may be adjacent to resource lands.**

3. **Public Services. Uses do not require extension or provision of urban levels of services. Rural governmental services and infrastructure are typically available, planned and or funded for.**

4. **Existing Land Uses. Single family residences, agricultural uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are currently 2.5 acres or greater in size but typically less than 5 acres.**

The property meets the designation and siting criteria for RR 2.5 and is more appropriate than the current zoning. The property is closely associated with natural amenities found in Chelan County due to the location in the greater Chelan recreational area. The property is not designated as a resource land of long-term significance. Rural governmental services are available and planned for. Existing land uses in the area include seasonal and year-round residences, tourist and recreational activities, agriculture, and other rural development. There are many properties in the area that are zoned RR 2.5.

5. **A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, or if not, what changes to these elements would be required.**

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

6. **For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.**

The property to the north is zoned RR 5 but is separated from the subject property by Highway 97A. The property to the south and west is zoned RR5. The properties to the east have the same zoning as that which is proposed - RR 2.5, and like the subject property is bordered by U.S. Highway 97A to the north. The proposed designation is more appropriate because the property is bounded on two sides by highways/roads and is in a location with existing access to a county road (Hugo Road), with sufficient right of way for future development.

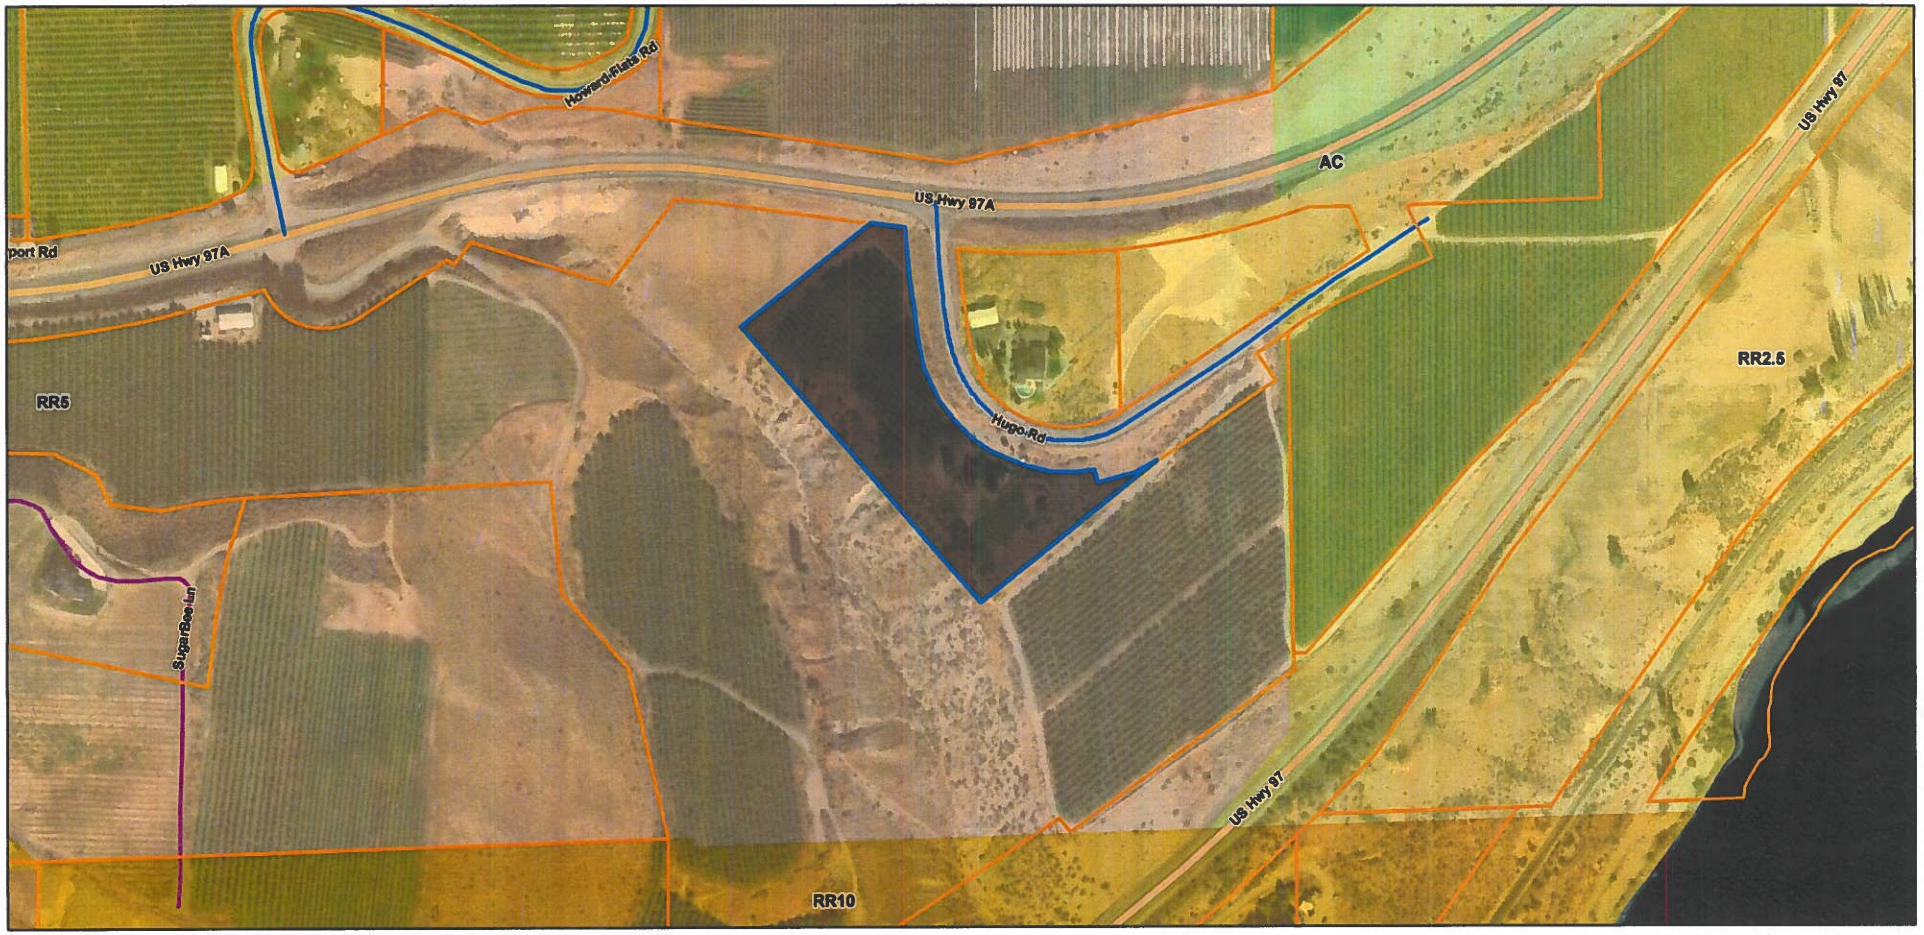
The proposed amendment is a more appropriate zoning for the subject parcel due to the consistent nature of alignment with previously mentioned goals of the RCW 36.70A.020 and Chelan County Planning Policies.

7. **Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?**

The proposed text amendment would not affect lands designated as resource lands of long-term commercial significance and/or critical areas. The subject property is not adjacent to Commercial Forest or Agricultural Lands. The property has been evaluated for the presence of streams and/or wetlands and there are none on the property. Any critical areas that may be present on the subject property would be adequately protected by conditions of approval contained in any future land use approvals. All required protections to critical areas such the submission of geotechnical reports would be complied with as necessary in order maintain a high level of environmental quality in Chelan County.

8. **How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.**

The proposed amendment would make a certain amount of land available for higher density development to accommodate future growth in the rural, unincorporated areas of Chelan County. Moderately priced rural properties are very desirable, and the demand



is high for residential building lots. The price of land is increasing rapidly because the demand is high, and the supply is extremely low.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The increased number of lots available for residential development will contribute to stabilizing the housing market, which at present is unattainable for many lifelong Chelan area residents. The value of the property will also increase the residential property taxes for Chelan County, which in turn, will increase the funding for governmental services.

STATUTORY WARRANTY DEED

THE GRANTOR(S) **HMJD-Collins LLC, a Washington Limited Liability Company**

for and in consideration of **Ten Dollars ($10.00) and other good and valuable consideration,** in hand paid, conveys, and warrants to **Hugo 24 Enterprises LLC, a Washington Limited Liability Company** the following described real estate, situated in the County of Chelan, State of Washington:

That portion of the Southeast quarter of the Southwest quarter of Section 3, Township 27 North, Range 23 East Willamette Meridian, Chelan County, Washington, more particularly as follows:

Beginning at the intersection point of the Southerly Right of Way of US Highway 97A and the Southerly Right of Way of Hugo Road, said point being perpendicular to and 70.00 feet distant from Highway Engineers Station (H.E.S.) 202+96.29, centerline survey, SR 97, Co. Road 506 to Azwell Vicinity;
Thence along the Southwesterly Right of Way off said Hugh Road, South 7°52'02" East for a distance of 241.33 feet;
Thence along a tangent curve to the left having a radius of 320.00 feet with a delta angle of 92°48'36" for an arc length of 518.35 feet;
Thence South 10°40'38" East for a distance of 30.00 feet;
Thence along a non-tangent curve to the left having a radius of 350.00 feet with a delta angle of 24°11'25" for an arc length of 147.77 feet;
Thence leaving said Right of Way, South 50°48'03" West for a distance of 490.00 feet;
Thence North 41°46'32" West for a distance of 772.95 feet;
Thence North 50°48'03" East for a distance of 355.00 feet, more or less, to the Southerly Right of Way of US Highway 97A;
Thence along said Right of Way, South 82°52'02" East for a distance of 70.00 feet to the Point of Beginning

Also known as Parcel A of Boundary Line Adjustment 2024-231 under Auditor's File No. 2594830

TOGETHER WITH THAT certain 2006 FTWD Manufactured Home, Model OAK GROVE, VIN ALB0305780R

Subject to All encumbrances, rights, restrictions, reservations, covenants and easements, apparent or of record.

And Subject to those items specifically set forth on Exhibit "A"

Exhibit "A"

. This land is included in the Upper Columbia Irrigation District, formally known as the Greater Wenatchee Reclamation District and is subject to the laws and regulations of the United States and the State of Washington applicable to the project and is liable for further assessments, if any, levied by the district, and subject to easements for lateral ditches and pipelines used in connection with the district's irrigation system.

. Right of the public to make necessary slopes for cuts or fills upon the land herein described in the reasonable original grading of streets, avenues, alleys and roads, as dedicated in the plat.

. Roadway Easement being 20 feet wide as disclosed on Chelan County Assessor's Map.

. RESERVATIONS contained in Chelan County Superior Court recorded as Case No. 25992.

. Notice of Appropriation of Water as imposed by instrument recorded on April 16, 1902 as document #9015826.

. EASEMENTS and the terms and conditions thereof affecting a portion of said premises for Electric Transmission and Distribution Line recorded on April 16, 1924 as document #120006, on March 23, 1928 as document #164108, on April 27, 1962 as document #593129, on January 7, 1964 as document #615796.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Right of Way recorded on December 12, 1947 as document #402273.

. AGREEMENT regarding Roadway and the terms and conditions thereof recorded on February 13, 1957 as document #517530.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Electric Transmission and Distribution Line recorded on April 25, 1969 as document #689957.

. Warranty Deed as imposed by instrument recorded on June 16, 1970 as document #700894.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Electric Transmission and Distribution Line recorded on May 27, 1971 as document #709486.

. Quit Claim Deed as imposed by instrument recorded on May 29, 1979 as document #800398.

. Quit Claim Deed as imposed by instrument recorded on June 12, 1979 as document #800997.

. Release of Damages as imposed by instrument recorded on January 19, 1984 as document #8401190033, on June 14, 1984 as document #8406140053.

. AGREEMENT regarding Joint Right of Use and the terms and conditions thereof recorded on July 9, 1984 as document #8407090001.

. Quit Claim Deed as imposed by instrument recorded on November 29, 1984 as document #8411290021.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Irrigation Pipeline recorded on December 9, 1987 as document #8712090044.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Water Pipeline recorded on September 22, 1988 as document #8809220002.

. EASEMENTS and the terms and conditions thereof affecting a portion of said premises for Avigation recorded on April 16, 1993 as document #9304160078, as document #9304160079, as document #9304160080.

. AGREEMENT regarding Limited Avigation Agreement and the terms and conditions thereof recorded on April 16, 1993 as document #9304160080.

. Terms and conditions as disclosed by survey recorded on April 29, 1997 as document #2004701. Affects said premises and other property

. AGREEMENT regarding Fencing Agreement and the terms and conditions thereof recorded on October 16, 1998 as document #2038603.

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Declaration of Easements recorded on August 22, 2003 as document #2152961.

Said document was amended on September 22, 2003 as document #2155715.

. Covenants, conditions and restrictions and easements contained in Grover Collins Orchard Short Plat No. 2009-015:
Recorded: on December 1, 2009 as document #2315271

. Terms and conditions as disclosed by survey recorded on December 24, 2009 as document #2316587. Affects said premises and other property

. EASEMENT and the terms and conditions thereof affecting a portion of said premises for Overhead and/or Underground Utility recorded on March 4, 2010 as document #2320027.

. Terms and provisions of agreement concerning Boundary Line Adjustment No. 2015-098 recorded on July 14, 2015 as document #2421460.

. Terms and provisions of agreement concerning Boundary Line Adjustment 2020-103 recorded on November 17, 2020 as document #2529918.

. AGREEMENT regarding Shared Well Agreement and the terms and conditions thereof recorded on December 31, 2020 as document #2533366.

. AGREEMENT regarding Shared Well Agreement and the terms and conditions thereof recorded on June 16, 2022 as document #2568910.

. Terms and provisions of agreement concerning Certificate of Exemption recorded on April 29, 2024 as document #2593543.

. Terms and provisions of agreement concerning Boundary Line Adjustment 2024-231 recorded on June 3, 2024 as document #2594830.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. Name of proposed project, if applicable:

N/A

2. Name of applicant:

Patricia Campbell

3. Address and phone number of applicant and contact person:

	Agent
Patricia Campbell	Erin Burgess
P.O. Box 2131	151 South Worthen Street, Suite 101
Kingston, WA 99346	Wenatchee, WA 98801
(206) 300-1177	509-640-3283

4. Date checklist prepared:

December 2025

5. Agency requesting checklist:

Chelan County

6. Proposed timing or schedule (including phasing, if applicable):

Timing and schedule would be consistent with the guidelines established in Chelan County Code Title 14—Development procedures.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

Unknown.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

None known.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 5.14 acres (parcel 272303330175) from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5).

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 24 Hugo Road, adjacent to U.S. Highway 97A, east of Chelan, within Section 03, T 27N, R 23E.W.M. Parcel no. 272303330175.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

- Pogue gravelly fine sandy loam (PrE), 25 to 45 percent
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

None onsite.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. Plants [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
____pasture
____crop or grain
__x__ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. *Environmental Health* [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) Describe special emergency services that might be required.

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is residential and agricultural. Adjacent properties are in residential and agricultural use.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

1,596 sq ft residence.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

RR 5

g. What is the current comprehensive plan designation of the site?

RR 5

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. **Has any part of the site been classified as a critical area by the city or county? If so, specify.**

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Presumptive Shrubsteppe habitat range.

j. **Approximately how many people would reside or work in the completed project?**

N/A

k. **Approximately how many people would the completed project displace?**

N/A.

l. **Proposed measures to avoid or reduce displacement impacts, if any:**

None.

m. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:**

Application for a Comprehensive plan map amendment and zone change.

n. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None.

9. Housing [help]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The site is accessed from Hugo Road. U.S. Highway 97A borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Patricia Campbell

Position and Agency/Organization owner

Date Submitted: 12-10-25

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. Name of proposed project, if applicable:

N/A

2. Name of applicant:

Patricia Campbell

3. Address and phone number of applicant and contact person:

	Agent
Patricia Campbell	Erin Burgess
P.O. Box 2131	151 South Worthen Street, Suite 101
Kingston, WA 99346	Wenatchee, WA 98801
(206) 300-1177	509-640-3283

4. Date checklist prepared:

December 2025

5. Agency requesting checklist:

Chelan County

6. Proposed timing or schedule (including phasing, if applicable):

Timing and schedule would be consistent with the guidelines established in Chelan County Code Title 14—Development procedures.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

Unknown.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

None known.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 5.14 acres (parcel 272303330175) from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5).

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 24 Hugo Road, adjacent to U.S. Highway 97A, east of Chelan, within Section 03, T 27N, R 23E.W.M. Parcel no. 272303330175.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

- Pogue gravelly fine sandy loam (PrE), 25 to 45 percent
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

None onsite.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. ***Plants*** [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
_____pasture
_____crop or grain
__x__ Orchards, vineyards or other permanent crops.
_____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
_____water plants: water lily, eelgrass, milfoil, other
_____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. *Environmental Health* [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) **Describe special emergency services that might be required.**

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. *Land and Shoreline Use* [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is residential and agricultural. Adjacent properties are in residential and agricultural use.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

1,596 sq ft residence.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

RR 5

g. What is the current comprehensive plan designation of the site?

RR 5

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. Has any part of the site been classified as a critical area by the city or county? If so, specify.

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Presumptive Shrubsteppe habitat range.

j. Approximately how many people would reside or work in the completed project?

N/A

k. Approximately how many people would the completed project displace?

N/A.

l. Proposed measures to avoid or reduce displacement impacts, if any:

None.

m. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Application for a Comprehensive plan map amendment and zone change.

n. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None.

9. Housing [help]

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

None.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None.

c. Proposed measures to reduce or control housing impacts, if any:

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The site is accessed from Hugo Road. U.S. Highway 97A borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) **Circle utilities currently available at the site:**
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Patricia Campbell

Name of signee ~~Pamela~~ Patricia Campbell

Position and Agency/Organization owner

Date Submitted: 12-10-25

D. Supplemental sheet for nonproject actions [HELP]

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

The proposal would not include any discharges to water of toxic or hazardous substances of any kind. Because discharges to water are not proposed and toxic or hazardous substances are not part of the proposal, the proposal would not cause an increase in discharge to water or production, storage or release of toxic or hazardous substances.

Proposed measures to avoid or reduce such increases are:

Since no increases are anticipated, no measures to avoid or reduce them are proposed.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

The proposal does not include any components that are likely to affect plants, animals, fish or marine life. Since the proposal is simply to change the comprehensive plan map and zoning designation, there would be no impact to the above-mentioned resources.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

The proposal would be in compliance with all local, state and federal regulations regarding the above-mentioned resources. Compliance with all applicable regulations would satisfactorily protect and conserve them.

3. How would the proposal be likely to deplete energy or natural resources?

The proposal would not use any energy or natural resources thus it would not deplete them.

Proposed measures to protect or conserve energy and natural resources are:

Since there would be no impacts to energy or natural resources, no measures to protect or conserve them are proposed.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic cultural sites, wetlands, floodplains, or prime farmlands?

The proposal would not be likely to use or affect environmentally sensitive areas or areas designated for governmental protection because none are present on the property.

Proposed measures to protect such resources or to avoid or reduce impacts are:

Since there would be no impact to such resources, no measures to protect them are proposed. Subsequent future actions would be subject to regulations protective of such habitats.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

The proposal would be likely to affect land use by changing the zoning map designation. Such a change would be compatible with any existing plans since the property is adjacent to existing property with the same zoning designation. The proposal would not affect shoreline use since it is not adjacent to a shoreline.

Proposed measures to avoid or reduce shoreline and land use impacts are:

Since there would be no negative impact to shoreline and/or land use, no measures are proposed to avoid or reduce them.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

The proposal would not be likely to increase demands on transportation or public services and utilities.

Proposed measures to reduce or respond to such demand(s) are:

Since there would be no increased demands on transportation or public services and utilities, no measures are proposed to reduce such demands.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

The proposal would not conflict with local, state or federal laws regarding the protection of the environment.

CHELAN COUNTY
DEPARTMENT OF COMMUNITY DEVELOPMENT
316 WASHINGTON STREET, SUITE 301
WENATCHEE, WA 98801
(509) 667-6225

TO: Chelan County Board of County Commissioners
FROM: Chelan County Community Development
HEARING DATE: November 10, 2026
FILE NUMBER: CPA 26-048 HMJD-Collins, LLC

RECOMMENDED MOTION
The Chelan County Planning Commission, at their duly advertised public hearing on September 23, 2026 made a motion to recommend approval (Attachment 1) of CPA 26-048 HMJD-Collins, LLC requested comprehensive plan map amendment from Rural Residential/Resource 10 (RR10) and Rural Residential/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5).

GENERAL INFORMATION

Applicant	HMJD-Collins, LLC
Planning Commission Notice of Hearing Published	September 12, 2026
Planning Commission Hearing	September 23, 2026
Board of County Commissioners Hearing	November 10, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review
A Determination of Non-Significance was issued under WAC 107-11-340 on April 30, 2026. The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The decision was made after a review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:
The Chelan Douglas Health District submitted comments indicating they have no objection to the approval of this proposal.
The Colville Tribe submitted comments that they looked forward to reviewing development applications should the proposal be approved.

Public Comment:
A neighboring property commented on this proposal as well as the adjoining proposal filed under CPA 26-041 expressing support for both projects.

60-Day Notice
Sent to Department of Commerce July 20, 2026.

PROJECT DESCRIPTION – CPA 26-046 HMJD-Collins, LLC
The applicant is requesting a comprehensive plan map amendment to change the designation of the 46.44-acre property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The property is located off Hwy 97A northeast of the City of Chelan and south of the Lake Chelan Airport. The site is currently in active agricultural use as a cherry orchard. The parcel is also known as Assessor's Parcel Number 27-23-03-430-050.

COMPREHENSIVE PLAN

Chelan County conducts an annual review of development regulation text amendments for compliance with the adopted Comprehensive Plan. The Comprehensive Plan represents the long-term vision for future land uses and development. For the county-initiated text amendments, the merits of the requested change must be demonstrated as being consistent with adopted goals and policies.

The following Comprehensive Plan goals and policies are relevant to the proposal:

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Policy RE 2.2: Rural development should not preclude use of rural lands for agriculture and timber production and should avoid or mitigate impacts on existing agriculture or timber operations.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

GOAL AL 1: Support the viability of agriculture and encourage the continued use of rural and resource lands for agriculturally related land uses.

REVIEW CRITERIA
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 8) Natural resource industries. Requirements of the GMA that allow more intense development in rural areas include a provision that these areas serve primarily the existing and projected rural population, generally to ensure rural sprawl does not occur where inappropriate.

The requested map amendment to RR2.5 could provide the opportunity for the site to be divided into approximately 20-30 lots depending upon the method used to develop the property (i.e., rural cluster subdivision, planned development). Approximately half the site is used for agricultural purposes in the form of cherry orchards. The rest of the property contains steep slopes in an identified erosion hazard area.

Conclusion: The amendment to the comprehensive plan map could result in development out of character with the surrounding area of low densities and agricultural uses and would not be consistent with the goals of the GMA.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would allow a variety of densities for housing. Development of the site into housing would remove approximately 24 acres of the 44.6 acres of the parcel from agricultural production.

Conclusion: The proposal would not be consistent with the GMA goals and with County-wide Planning Policies, specifically Policy RE.2.2.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The subject property is located in an area of existing rural residential/resource designations ranging from RR2.5 to RR10. Properties to the north of 97A are designated RR2.5, Airport (within the City of Chelan UGA) and Commercial Agricultural

Conclusion: Re-designation of this site to Rural Residential 2.5 would comply with the siting criteria, but would not comply with mandates to protect resource protection.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The extent of the northern property boundary is adjacent to the US Hwy 97A right-of-way. Any future development of the site would be required to work with the Washington State Dept. of Transportation for access requirements.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation elements.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are primarily zoned rural residential, however, most properties are being used for commercial agricultural production as tree fruit orchards.

Conclusion: The amendment could allow for the infringement of residential uses in an area of heavy agricultural use which could adversely surrounding land uses.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: A majority of the property in the vicinity of the site are used for commercial agricultural purposes. Additionally, the immediate area surrounding the site contains critical areas in the form of geological hazard areas.

Conclusion: The amendment could potentially adversely affect resource lands and critical areas.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: If approved, the amendment could result in the buildable areas of the site to be developed at 2-4 times the existing density.

Conclusion: The proposed amendment would not have an adverse impact on projected growth.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment increases the existing allowable density for residential development approximately double what is currently allowed. The surrounding areas already designated RR2.5 have not been developed for residential purposes.

Conclusion: The proposed amendment is not necessary for the public health, safety and welfare.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental

Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.

5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026, pursuant to RCW 36.70A.106.
6. A request for a Comprehensive Plan Map Amendment was submitted by Erin Burgess (agent) on behalf of HMJD-Collins, LLC to change the land use designation for the subject property from Rural Residential/Resource 5 and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The subject property is located off US Hwy 97A, northeast of the City of Chelan and further identified by Assessor Parcel No: 27-23-03-430-050.
7. The location and characteristics are not consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 2.5 as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would not be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would not comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would adversely affect the surrounding land uses.
4. The amendment would adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are not consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

2026 Comprehensive Plan Map Amendment
Staff Report

TO:	Chelan County Planning Commission
FROM:	Chelan County Community Development
HEARING DATE:	September 23, 2026
FILE NUMBER:	CPA 26-046 HMJD-Collins, LLC

RECOMMENDED MOTION

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

A. Re-designation of the site from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential 2.5 (RR2.5) would not comply with applicable Chelan County goals and policies pursuant to the findings of fact and conclusions of law cited below.

GENERAL INFORMATION

Planning Commission Workshop	August 26, 2026
Notice of Application to Surrounding Properties	March 4, 2026
Planning Commission Notice of Hearing Published	September 12, 2026
Planning Commission Hearing	September 23, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

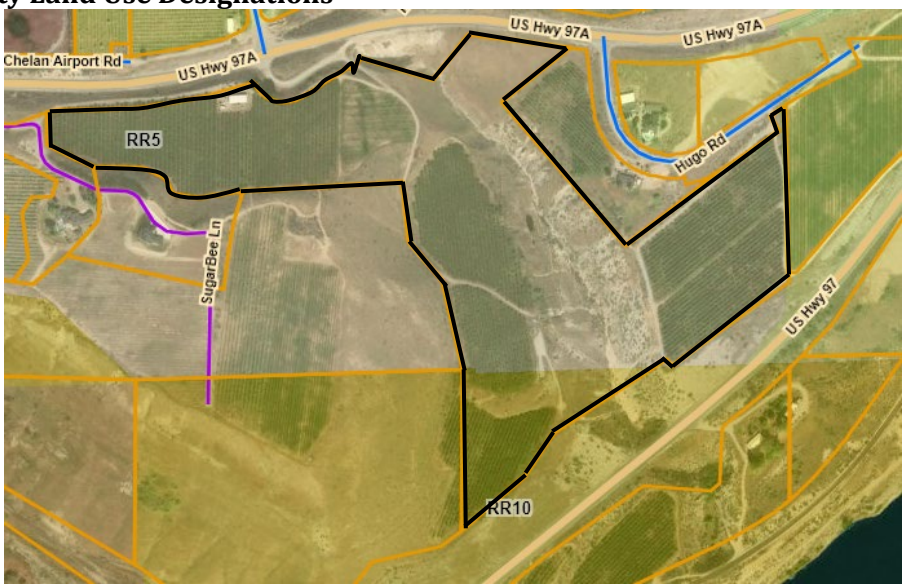
SEPA Environmental Review

A Determination of Non-Significance (DNS) was issued under WAC 197-11-340(2) for CPA 26-007 on April 30, 2026 (Attachment 1). The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030 (2)(c). The decision was made after review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

The Chelan Douglas Health District submitted comments indicating they have no objection to the approval of this proposal.

The Colville Tribe submitted comments that they looked forward to reviewing development applications should the proposal be approved.



Public Comment:

Comments were received from a neighboring property owner in support of both this application and the adjacent application known as CPA 26-041.

PROJECT DESCRIPTION – CPA 26-046 HMJD-Collins, LLC

Proposal: The applicant is requesting a comprehensive plan map amendment to change the designation of the 46.44-acre property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The property is located off Hwy 97A northeast of the City of Chelan and south of the Lake Chelan Airport. The site is currently in active agricultural use as a cherry orchard. The parcel is also known as Assessor's Parcel Number 27-23-03-430-050.

Chelan County Land Use Designations

Density: The existing Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) zoning allow one dwelling unit per five acres and one dwelling unit per 10 acres. The proposed Rural Residential/Resource 2.5 (RR2.5) designation would allow the development of more than twice the existing density dependent on which form of subdivision was used.

Comprehensive Plan
Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan policies are relevant to the proposed request:

> **Goal LU 1:** Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.
>
> **Goal RE 2:** Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.
>
> **Policy RE 2.2:** Rural development should not preclude use of rural lands for agriculture and timber production and should avoid or mitigate impacts on existing agriculture or timber operations.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

GOAL AL 1: Support the viability of agriculture and encourage the continued use of rural and resource lands for agriculturally related land uses

Review Criteria

The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 8) Natural resource industries. Requirements of the GMA that allow more intense development in rural areas include a provision that these areas serve primarily the existing and projected rural population, generally to ensure rural sprawl does not occur where inappropriate.

The requested map amendment to RR2.5 could provide the opportunity for the site to be divided into approximately 20-30 lots depending upon the method used to develop the property (i.e., rural cluster subdivision, planned development). Approximately half the site is used for agricultural purposes in the form of cherry orchards. The rest of the property contains steep slopes in an identified erosion hazard area.

Conclusion: The amendment to the comprehensive plan map could result in development out of character with the surrounding area of low densities and agricultural uses and would not be consistent with the goals of the GMA.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would allow a variety of densities for housing. Development of the site into housing would remove approximately 24 acres of the 44.6 acres of the parcel from agricultural production.

Conclusion: The proposal would not be consistent with the GMA goals and with County-wide Planning Policies, specifically Policy RE.2.2.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The subject property is located in an area of existing rural residential/resource designations ranging from RR2.5 to RR10. Properties to the north of 97A are designated RR2.5, Airport (within the City of Chelan UGA) and Commercial Agricultural

Conclusion: Re-designation of this site to Rural Residential 2.5 would comply with the siting criteria, but would not comply with mandates to protect resource protection.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The extent of the northern property boundary is adjacent to the US Hwy 97A right-of-way. Any future development of the site would be required to work with the Washington State Dept. of Transportation for access requirements.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation elements.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are primarily zoned rural residential, however, most properties are being used for commercial agricultural production as tree fruit orchards.

Conclusion: The amendment could allow for the infringement of residential uses in an area of heavy agricultural use which could adversely surrounding land uses.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: A majority of the property in the vicinity of the site are used for commercial agricultural purposes. Additionally, the immediate area surrounding the site contains critical areas in the form of geological hazard areas.

Conclusion: The amendment could potentially adversely affect resource lands and critical areas.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: If approved, the amendment could result in the buildable areas of the site to be developed at 2-4 times the existing density.

Conclusion: The proposed amendment would not have an adverse impact on projected growth.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment increases the existing allowable density for residential development approximately double what is currently allowed. The surrounding areas already designated RR2.5 have not been developed for residential purposes.

Conclusion: The proposed amendment is not necessary for the public health, safety and welfare.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.

2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026 (Attachment 3), pursuant to RCW 36.70A.106.
6. A request for a Comprehensive Plan Map Amendment was submitted by Erin Burgess (agent) on behalf of HMJD-Collins, LLC to change the land use designation for the subject property from Rural Residential/Resource 5 and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The subject property is located off US Hwy 97A, northeast of the City of Chelan and further identified by Assessor Parcel No: 27-23-03-430-050.
    a. The location and characteristics are not consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 2.5 as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would not be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would not comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would adversely affect the surrounding land uses.
4. The amendment would adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are not consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

STAFF Finding

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

The Comprehensive Plan Amendment to change the subject property's land use designation from Rural Residential/Resource 5 and Rural Residential/Resource 10 to Rural Residential/Resource given file number CPA 2026-046, based upon the findings of fact and conclusions of law contained would not comply with relevant with adopted county goals and policies.

Memorandum

To: Susan Dretke, Chelan County

From: Richmond Petty, REHS

Date: 03/12/26

RE: HMJD-COLLINS LLC (CPA 26-048) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The subject property is located at Unassigned., Chelan, WA 98816 (county tax parcel: 272303430050)

As proposed, I have no objections to further approval of this project.

- No permitted septic system or approved domestic water source records on file.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

To Susan Dretke, Chelan Department of Community Development

Fr Thomas Nielsen, Adjacent Land Owner Thomas Nielsen

Re Project File #'s CPA 26-048 and CPA 26-041

Date March 14, 2026

The purpose of this memorandum is to write in support of the proposed applications for a Comprehensive Plan Amendment to change the two subject properties zoning to Rural Residential 2.5 (RR2.5). With continued population growth in the greater Chelan area, there is a need for more affordable housing. The RR2.5 designation will maintain the rural nature of the area, but allow more families to live in the area.

I am the owner of two parcels of land adjacent to the proposed parcels and whole heartedly support their application. My properties are located at 25 Hugo Road and 109 Hugo Road. I welcome new neighbors!

Hello Susan,

This consultation is in response to CPA 26-048 HMJD-Collins, LLC, SEPA Determination of Non-significance. This land use change allows an additional dwelling unit to be constructed with the ratio of 1 residence per 2.5 acres. If and when there is a planned development we look forward to reviewing those future plans.

On behalf of Amelia Stanger, Interim Tribal Historic Preservation Officer.

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-significance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

CPA 26-063 Sanderson- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential Resource 5 (RR5). **Site Address:** 172 Whitetail Way Chelan, WA 98816; **Parcel Numbers:** 28-22-34-410-100

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-041 Campbell - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5). 24 Hugo Road, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-330-175.

CPA 26-048 HMJD Collins, LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residentia l/Resource 2.5 (RR2.5). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-430-050.

CPA 26-054 Hellickson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 25-18-32-330-200.

CPA 26-060 McMahon - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). 7948 East Leavenworth Rd., Leavenworth, WA 98826 also identified as Assessor's Parcel No.: 24-17-23-510-480.

On March 5, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 19, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Date: March 5, 2026

Sincerely,

Susan Dretke 2/24/26

Chelan County Code 14.14.050

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of parcel no. 272303430050 at 46.44 acres from Rural Residential/Resource 5 (RR 5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located east of Chelan, within Section 03, T 27N, R 23E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 18. Parcel no 272303430050 is adjacent to 168 acres zoned RR 2.5 to the east of the subject property, in addition to 54 acres zoned RR 2.5 occurring north of the subject property directly north of US Highway 97A.

The zoning and comprehensive plan designations are proposed to be changed to align the property with more appropriate zoning based on the property locations adjacent to Highway 97A, US Highway 97, existing residential use and adjacent zoning. The total area proposed to be rezoned is 46.44 acres.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for residential use, while the demand for housing remains high. This lack of inventory is driving the price of residential property which negatively affects affordability of housing for those who live and work in Chelan County.

RCW 36.70A.020(1) encourages urban growth. The subject property is not located in an urban growth area but rather located near the Chelan UGA and is located adjacent to the same zoning district as that which is proposed.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development. The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land. The best use for this land is allowing the density to increase in the developable areas while preserving the open space and critical areas.

RCW 36.70A.020(4) encourages the promotion of a variety of residential densities and housing types. Given the fact that only 12% of Chelan County is in private ownership, residential development will continue, whether it be as a standard subdivision

Policy LU 1.2: Protect residential neighborhoods from impacts associated with incompatible land uses through application of development standards and permit conditioning.

Rationale: Incompatible land uses located in close proximity to residential neighborhoods may create adverse impacts which could lead to a reduction of the high quality of life for the County residents.

The proposed RR 2.5 zoning is the same as surrounding properties to the east and will allow for residential development which is compatible with the existing residential uses in the area.

Policy LU 1.3: Develop innovative regulatory strategies that create developer incentives to provide affordable housing to low- and moderate-income households.

Rationale: This can be accomplished through the use of innovative techniques including but not limited to density bonuses, performance zoning, zero lot line development, and cluster subdivisions. Incentives may help facilitate the construction of low- and moderate-income housing.

The proposed RR 2.5 zoning will allow lot sizes that are in accordance with the Chelan-Douglas Health District standards for water and sewer disposal. This density allows the creation of more residential inventory which serves to reduce land prices based on supply and demand.

Policy LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

Rationale: Many parcels of land are available within existing residential developments that can accommodate further development. Infill within these areas will allow public facilities and services to be provided in a more efficient manner.

The proposed rezone is adjacent to a large area zoned RR 2.5 with appropriate lot sizes. The subject property can accommodate further development that is consistent with adjacent land uses and lot sizes.

Housing Element

Goal H 2: Promote a variety of residential densities and housing types.

Policy H 2.1: Promote a diversity of housing unity types and densities to meet the needs of all existing and future residents of the County, including both site-built and manufactured and modular homes.

Rationale: An adequate supply of appropriately zoned land will ensure that the GMA plan does not artificially create inflation in housing prices by restricting competition in the land market.

The approval of this application will lead to increasing the supply of appropriately zoned land that will ensure that inflation in housing prices is not artificially created.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

Rural Element

Designations/Siting Criteria – Rural Residential 2.5

Density: One (1) dwelling unit per 2.5 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. **Geographical and Geological Characteristics. The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be immediately adjacent to existing residential or rural developments. The area may be adjacent to urban growth areas.**

2. **Natural Resources. The area has limited resource management potential. The area may be adjacent to resource lands.**

3. **Public Services. Uses do not require extension or provision of urban levels of services. Rural governmental services and infrastructure are typically available, planned and or funded for.**

4. **Existing Land Uses. Single family residences, agricultural uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are currently 2.5 acres or greater in size but typically less than 5 acres.**

The property meets the designation and siting criteria for RR 2.5 and is more appropriate than the current zoning. The property is closely associated with natural amenities found in Chelan County due to the location in the greater Chelan recreational area. The property is not designated as a resource land of long-term significance. Rural governmental services are available and planned for. Existing land uses in the area include seasonal and year-round residences, tourist and recreational activities, agriculture, and other rural development. There are many properties in the area that are zoned RR 2.5.

5. **A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, or if not, what changes to these elements would be required.**

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

6. **For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.**

The property to the north of parcel no. 272303430050 is zoned RR 2.5 but is separated from the subject property by Highway 97A. Properties to the west are zoned RR5, and properties to the south are zoned RR 10 and are separated from the subject property by US Highway 97. The adjacent property to the east has the same zoning as that which is proposed - RR 2.5, and like the subject property is bordered by U.S. Highway 97A to the north and U.S. Highway 97 to the south. The proposed designation is more appropriate because the property is bounded on two sides by highways/roads and is in a location with existing access to a county road (Hugo Road), with sufficient right of way for future development. In addition, the subject property has existing access by a private road (Sugar Bee Lane). The proposed amendment is more appropriate than the existing land use designation because it offers the current and future residents of the County an opportunity for a greater variety of residential densities and housing unit types, supporting an adequate supply of appropriately zoned land in the County to accommodate a variety of future housing needs.

The proposed amendment is a more appropriate zoning for the subject parcel due to the consistent nature of alignment with previously mentioned goals of the RCW 36.70A.020 and Chelan County Planning Policies.

7. **Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?**

The proposed amendment would not affect lands designated as resource lands of long-term commercial significance. The subject property is not adjacent to Commercial Forests. The property has been evaluated for the presence of streams and/or wetlands, with the only indication of a stream is the "u" or "unknown" stream type which does not exhibit any surface water at the time of the application. There are no known wetlands present on the subject property. Any critical areas that may be present on the subject property would be adequately protected by conditions of approval contained in any future land use approvals. All required protections to critical areas such the submission of geotechnical reports would be complied with as necessary in order maintain a high level of environmental quality in Chelan County.

8. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The proposed amendment would make a certain amount of land available for higher density development to accommodate future growth in the rural, unincorporated areas of Chelan County. Moderately priced rural properties are very desirable, and the demand is high for residential building lots. The price of land is increasing rapidly because the demand is high, and the supply is extremely low.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The increased number of lots available for residential development will contribute to stabilizing the housing market, which at present is unattainable for many lifelong Chelan area residents. The value of the property will also increase the residential property taxes for Chelan County, which in turn, will increase the funding for governmental services.

Legal Description

Property Id No. 63068 APN 272303330175

A portion of the Southwest quarter of Section 3, a portion of the Southeast quarter of Section 4, and a portion of Government Lot 3 in Section 10, Township 27 North, Range 23 East, W.M., Chelan County, Washington, more particularly described as follows:

All of that property described in Deed Volume 802, Page 1953, Chelan County Records, recorded under Auditor's File No. 8301030005.

Also, the part of the property described in Volume 718, Page 1946, Chelan County Records, recorded under Auditor's File No. 737611 which is located in Government Lot 3 in Section 10, Township 27N, Range 23 E.W.M., Chelan County, Washington.

Together with a portion of Parcel "A", Chelan County Boundary Line Adjustment No. 2015-098, recorded under Auditor's File No. 2421460, which lies north of the following described line:

Commencing at the Southwest corner of the Southeast quarter of the Southwest quarter of said Section 3, also being the Southeast corner of said Parcel "A"; thence with the east line of said Parcel "A" the following three calls, N13°37'39"W 371.07 feet; thence N42°21'09"W 211.56 feet; thence N06°00'09"W 240.05 feet to the Point of Beginning;

Thence S86°16'59"W 649.28 feet to the Northeast corner of Parcel "C", Chelan County Boundary Line Adjustment No. 2015-098, recorded under Auditor's File No. 2421460 and the end of this description.

Also known as Parcel B BLA 2020-103 recorded under Chelan County Auditor's File No. 2529918.

Property Id No. 63067 APN 272304420075

See Attached

Parcel 1:

The South half of the Northeast quarter of the Southwest quarter and the Southwest quarter of the Northwest quarter of the Southeast quarter and the Northeast quarter of the Northwest quarter of the Southeast quarter. Section 3, Township 27 North. Range 23, E.W.M., Chelan County, Washington, that part of the following described 2 tracts lying Northerly of existing County road:

Tract 1: Government Lot 6 in Section 3, Township 27 North, Range 23, E. W.M., Chelan County, Washington; and

Parcel 2:

The Northwest quarter of the Northwest quarter of the Southeast quarter of Section 3, Township 27 North, Range 23 E.W.M., Chelan County, Washington.

Property ID No 46320 APN 272303310150

Parcel 1:

That part of the Northwest quarter of the Northwest quarter and that part of Government Lot 3, Section 10, Township 27 North, Range 23 East, W.M. described as: BEGINNING AT A POINT opposition Highway Engineer's Station (hereinafter referred to as HES) 585+00 on the SR 151 Line Survey of SR 151, Beebe Bridge to Hugo Vic., and 350 feet Northwesterly therefrom; thence Northeasterly parallel with said SR 151 Line Survey to a point opposite HES 590+00 thereon; thence Northeasterly to a point opposite HES 594+50 on said SR 151 Line Survey and 305 feet Northwesterly therefrom; thence Southwesterly to a point opposite HES 592+50 on said SR 151 Line Survey and 245 feet Northwesterly therefrom; thence Southwesterly to a point opposite HES 588+00 on said SR 151 Line Survey and 230 feet Northwesterly therefrom; thence Southwesterly to the POINT OF BEGINNING.

Parcel 2:

That part of Southwest quarter of the Southwest quarter of Section 3 and that part of Government Lot 3 in Section 10, Township 27 North, Range 23 East, W.M., described as:

BEGINNING AT A POINT opposite Highway Engineer's Station (hereinafter referred to as HES) 606+00 on the SR 151 Line Survey of SR 151, Beebe Bridge to Hugo Vic., and 140 feet Northwesterly therefrom; thence Southwesterly to a point opposite of HES 600+00 on Said SR 151 Line Survey and 250 feet Northwesterly therefrom; thence Southeasterly to a point opposite said HES and 214 feet Northwesterly therefrom; thence Northeasterly to the POINT OF BEGINNING.

See attached

Tract 2: Part of the Northwest quarter of the Southeast quarter and part of the Government Lot 5 of Section 3, Township 27 North, Range 23, E. W.M., described as follows:

Commencing at the Northeast comer of said Northwest quarter of the Southeast quarter and running thence South 01°43'15" East along the Easterly boundary thereof for a distance of 391.0 feet to a point on the South boundary of Hugo Road and the True Point of Beginning of this description. Thence South 44 °14'15" West along said South boundary for a distance of 259.0 feet; thence South 01°43'15" East along the West boundary of an established orchard road for a distance of 1000.0 feet; thence continuing South 01°43'15" East to the State Shore Lauds on the right bank of the Columbia River; thence Northeasterly along said state Shore Lands boundary to a point on the East boundary of Government Lot 5; thence North 01°43'15" West along the East boundary of Government Lot 5 and the Northwest quarter of the Southeast quarter to the Point of Beginning.

EXCEPT THEREFROM that portion conveyed to Chelan County June 9, 1966 by deed recorded under Auditor's File No. 652247 described as follows:

A parcel of land for public road right of way being the West 30 feet of the North 400 feet of the Southwest quarter of the Northeast quarter of the Southwest quarter of Section 3, Township 27 North, Range 23, E.W.M. AND EXCEPT THEREFROM that portion conveyed to Bernard Finnigan and E.M. Finnigan, husband and wife November 10, 1970 by Quit Claim Deed recorded under Auditor's File No. 704896 described as follows: Part of the Northwest quarter of the Southeast quarter and pan of the Government Lot 5 of Section 3, Township 27 North, Range 23. E.W.M., described as follows:

Commencing at the Northeast corner of said Northwest quarter of the Southeast quarter and running thence South 01°43'15" East along the Easterly boundary thereof for a distance of 391.0 feet to a point on the South boundary of Hugo Road and the True Point of Beginning; thence South 44°14'15" West along said South boundary for a distance of 259.0 feet; thence South 01°43'15" East along the West boundary of an established orchard road for a distance of 1000.0 feet; thence continuing South 01°43'15" East to the State Shore Lands on the right bank of the Columbia River; thence Northeasterly along said State Shore Lands boundary to a point on the East boundary of Government Lot 5; thence North 01°43'15" West along the East boundary of Government Lot 5 and the Northwest quarter of the Southeast quarter to the Point of Beginning.

EXCEPTING THEREFROM the rights of way of the Great Northern Railway.

AND EXCEPTING that part of the above described tract lying Northerly of the existing County Road.

AND ALSO EXCEPTING THEREFROM right-of-way for U.S. Highway SR 97.

See attached

Exhibit "A" (Corrected Legals)

Parcel A:

Parcel B as delineated on Boundary Line Adjustment No. 2020-103, Chelan County, Washington, recorded on November 17, 2020 under Recording No. 2529918.

Parcel B:

The South half of the Northeast Quarter of the Southwest Quarter of Section 3, Township 27 North, Range 23, East of the Willamette Meridian, Chelan County, Washington.

Except therefrom that portion conveyed to Chelan County by Deed recorded under Auditor's File No. 652247 described as follows:

A parcel of land for public road right of way being the West 30 feet of the North 400 feet of the Southwest Quarter of the Northeast Quarter of the Southwest Quarter of Section 3, Township 27 North, Range 23, East of the Willamette Meridian.

Also excepting therefrom Right of Way for US Highway SR 97.

Parcel C:

That portion of the Northwest Quarter of the Southeast Quarter of Section 4, Township 27 North, Range 23, East of the Willamette Meridian, Chelan County, Washington, lying Easterly of Apple Acres Road (Formerly State Hwy No. 10) and that portion of the Southwest Quarter of the Southeast Quarter of Section 4 lying Easterly of Apple Acres Road (Formerly State Hwy 10) and Northerly of State Highway 97A.

Except those portions thereof conveyed to City of Chelan by instrument recorded under Auditor's File No. 9304160082, in Volume 0991, Pages 1905-1907, Chelan County, Washington.

The above captioned description may be incorrect, because the application for Title Insurance contained only an address and/or Parcel No. Prior to closing, all parties to the transaction must verify the legal description. If further changes are necessary, notify the Company well before closing so that those changes can be reviewed. Closing instructions must indicate that the legal description has been reviewed and approved by all parties.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

RR 5 (272303430050) to RR 2.5 and RR10 8AB

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: US Hwy 97A, agriculture
   South: US Hwy 97, agriculture
   East: residential and agriculture
   West: residential and undeveloped open space
4. What is the current use of the property? Residential and Agriculture
5. Sanitation Disposal: ☑ N/A ☐ Septic Permit ☐ Sewer District: _____
6. Water Source: ☑ N/A ☐ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☑ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: Number 7 School District: Chelan
9. Power Service: Chelan PUD
10. Are there critical areas or critical area buffers on the property?
    ☐ Airport Overlay: N/A
    ☐ Aquifer Recharge Area (see attached)
    ☐ Floodplain / Floodway N/A
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☑ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☑ Habitat/Riparian Area, protected species/area: WDFW PHS indicates subject parcel occurs within Chelan County Shrubsteppe habitat range.
    ☐ Streams / Waterbodies: N/A ☐ Shoreline Environment Designation: N/A
    ☑ Drainage or Seasonal Stream: "U" or "unknown" classified water body ☐ Wetland, if so what category: N/A
    ☐ Cultural or Archeological: N/A
11. Will landfill be required? ☑ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No.
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    Unknown at time of application.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled **"IS NOT"** above, proceed to Sub-Section III of this form.

If you circled **"IS"** above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ☐ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ☐ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ☐ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ☐ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ☐ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ☐ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ☐ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ☐ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ☐ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ☐ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ☐ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. HG — All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. HG — This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. HG — False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. HG — Additional permit applications and approvals may be necessary to conduct specific activities.
5. HG — Application fees are non-refundable, except when approve by the Board.
6. HG — In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

HG EAB 7. Chelan County is hereby given consent to enter the property(ies) listed above.

HG EAB 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

HG EAB 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

HG EAB 10. I certify that this application has been made with the consent of the lawful property owner(s).

HG EAB 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

HG EAB 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

TELEPHONE: (509) 667-6225

COMPREHENSIVE PLAN AMENDMENT SUPPLEMENTAL INFORMATION

This packet is designed to assist you in preparing your application for a Comprehensive Plan Amendment. The following information is required at the time of submittal. Applications will be accepted **January 2 through March 1** of each calendar year. Additional information may be required. ***An incomplete application will not be processed.***

- ✓ A completed General Land Use Application, pursuant to CCC, Section 14.14.050(A) and (B).
- ✓ A completed SEPA Checklist (State Environmental Policy Act), pursuant to CCC, Section 14.14.050(D).
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (C), a detailed narrative which includes the following:
  - i. A detailed statement of what is proposed to be changed and why. Identify the specific comprehensive land use designation map and zoning map that would be amended; and,
  - ii. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (Chapter 36.70A RCW as amended) and any applicable County-wide planning policies; and,
  - iii. A statement of how the amendment complies with or supports the comprehensive plan's goals and policies; and,
  - iv. A detailed statement on how the land use designation amendment complies with comprehensive plan land use designation/siting criteria; and,
  - v. A statement of how the amendment is consistent with and supported by the capital facility element and the transportation element of the comprehensive plan, or if not, what changes to these elements would be required; and,
  - vi. For land use designation amendments, identify the land uses surrounding the affected property and describe how the proposed change would affect the surrounding land uses. Describe why the proposed amendment is more appropriate than the existing land use designation; and,
  - vii. Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas; and,
  - viii. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and
  - ix. Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare; and
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (E), The applicable processing fee for comprehensive plan amendments and SEPA review as determined by the county's adopted fee schedule, as amended, except that amendment requests by the cities shall not require the collection of said fees.
- ✓ Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following:
  1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:
     - A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,
     - B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

E. The amendment does not adversely affect the surrounding land uses; and,

F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

✓RCW 36.70A.020 Planning goals.

The following goals are adopted to guide the development and adoption of comprehensive plans and development regulations of those counties and cities that are required or choose to plan under RCW 36.70A.040. The following goals are not listed in order of priority and shall be used exclusively for the purpose of guiding the development of comprehensive plans and development regulations:

(1) Urban growth. Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.

(2) Reduce sprawl. Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

(3) Transportation. Encourage efficient multimodal transportation systems that are based on regional priorities and coordinated with county and city comprehensive plans.

(4) Housing. Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

(5) Economic development. Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

(6) Property rights. Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.

(7) Permits. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.

(8) Natural resource industries. Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.

(9) Open space and recreation. Retain open space, enhance recreational opportunities, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.

(10) Environment. Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.

(11) Citizen participation and coordination. Encourage the involvement of citizens in the planning process and ensure coordination between communities and jurisdictions to reconcile conflicts.

(12) Public facilities and services. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.

(13) Historic preservation. Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.

Chelan County Code 14.14.050

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of parcel no. 272303430050 at 46.44 acres from Rural Residential/Resource 5 (RR 5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located east of Chelan, within Section 03, T 27N, R 23E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 18. Parcel no 272303430050 is adjacent to 168 acres zoned RR 2.5 to the east of the subject property, in addition to 54 acres zoned RR 2.5 occurring north of the subject property directly north of US Highway 97A.

The zoning and comprehensive plan designations are proposed to be changed to align the property with more appropriate zoning based on the property locations adjacent to Highway 97A, US Highway 97, existing residential use and adjacent zoning. The total area proposed to be rezoned is 46.44 acres.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for residential use, while the demand for housing remains high. This lack of inventory is driving the price of residential property which negatively affects affordability of housing for those who live and work in Chelan County.

RCW 36.70A.020(1) encourages urban growth. The subject property is not located in an urban growth area but rather located near the Chelan UGA and is located adjacent to the same zoning district as that which is proposed.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development. The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land. The best use for this land is allowing the density to increase in the developable areas while preserving the open space and critical areas.

RCW 36.70A.020(4) encourages the promotion of a variety of residential densities and housing types. Given the fact that only 12% of Chelan County is in private ownership, residential development will continue, whether it be as a standard subdivision

Policy LU 1.2: Protect residential neighborhoods from impacts associated with incompatible land uses through application of development standards and permit conditioning.

Rationale: Incompatible land uses located in close proximity to residential neighborhoods may create adverse impacts which could lead to a reduction of the high quality of life for the County residents.

The proposed RR 2.5 zoning is the same as surrounding properties to the east and will allow for residential development which is compatible with the existing residential uses in the area.

Policy LU 1.3: Develop innovative regulatory strategies that create developer incentives to provide affordable housing to low- and moderate-income households.

Rationale: This can be accomplished through the use of innovative techniques including but not limited to density bonuses, performance zoning, zero lot line development, and cluster subdivisions. Incentives may help facilitate the construction of low- and moderate-income housing.

The proposed RR 2.5 zoning will allow lot sizes that are in accordance with the Chelan-Douglas Health District standards for water and sewer disposal. This density allows the creation of more residential inventory which serves to reduce land prices based on supply and demand.

Policy LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

Rationale: Many parcels of land are available within existing residential developments that can accommodate further development. Infill within these areas will allow public facilities and services to be provided in a more efficient manner.

The proposed rezone is adjacent to a large area zoned RR 2.5 with appropriate lot sizes. The subject property can accommodate further development that is consistent with adjacent land uses and lot sizes.

Housing Element

Goal H 2: Promote a variety of residential densities and housing types.

Policy H 2.1: Promote a diversity of housing unity types and densities to meet the needs of all existing and future residents of the County, including both site-built and manufactured and modular homes.

Rationale: An adequate supply of appropriately zoned land will ensure that the GMA plan does not artificially create inflation in housing prices by restricting competition in the land market.

The approval of this application will lead to increasing the supply of appropriately zoned land that will ensure that inflation in housing prices is not artificially created.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

Rural Element

Designations/Siting Criteria – Rural Residential 2.5

Density: One (1) dwelling unit per 2.5 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. **Geographical and Geological Characteristics. The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be immediately adjacent to existing residential or rural developments. The area may be adjacent to urban growth areas.**

2. **Natural Resources. The area has limited resource management potential. The area may be adjacent to resource lands.**

3. **Public Services. Uses do not require extension or provision of urban levels of services. Rural governmental services and infrastructure are typically available, planned and or funded for.**

4. **Existing Land Uses. Single family residences, agricultural uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are currently 2.5 acres or greater in size but typically less than 5 acres.**

The property meets the designation and siting criteria for RR 2.5 and is more appropriate than the current zoning. The property is closely associated with natural amenities found in Chelan County due to the location in the greater Chelan recreational area. The property is not designated as a resource land of long-term significance. Rural governmental services are available and planned for. Existing land uses in the area include seasonal and year-round residences, tourist and recreational activities, agriculture, and other rural development. There are many properties in the area that are zoned RR 2.5.

5. **A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, or if not, what changes to these elements would be required.**

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

6. **For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.**

The property to the north of parcel no. 272303430050 is zoned RR 2.5 but is separated from the subject property by Highway 97A. Properties to the west are zoned RR5, and properties to the south are zoned RR 10 and are separated from the subject property by US Highway 97. The adjacent property to the east has the same zoning as that which is proposed - RR 2.5, and like the subject property is bordered by U.S. Highway 97A to the north and U.S. Highway 97 to the south. The proposed designation is more appropriate because the property is bounded on two sides by highways/roads and is in a location with existing access to a county road (Hugo Road), with sufficient right of way for future development. In addition, the subject property has existing access by a private road (Sugar Bee Lane). The proposed amendment is more appropriate than the existing land use designation because it offers the current and future residents of the County an opportunity for a greater variety of residential densities and housing unit types, supporting an adequate supply of appropriately zoned land in the County to accommodate a variety of future housing needs.

The proposed amendment is a more appropriate zoning for the subject parcel due to the consistent nature of alignment with previously mentioned goals of the RCW 36.70A.020 and Chelan County Planning Policies.

7. **Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?**

The proposed amendment would not affect lands designated as resource lands of long-term commercial significance. The subject property is not adjacent to Commercial Forests. The property has been evaluated for the presence of streams and/or wetlands, with the only indication of a stream is the "u" or "unknown" stream type which does not exhibit any surface water at the time of the application. There are no known wetlands present on the subject property. Any critical areas that may be present on the subject property would be adequately protected by conditions of approval contained in any future land use approvals. All required protections to critical areas such the submission of geotechnical reports would be complied with as necessary in order maintain a high level of environmental quality in Chelan County.

8. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The proposed amendment would make a certain amount of land available for higher density development to accommodate future growth in the rural, unincorporated areas of Chelan County. Moderately priced rural properties are very desirable, and the demand is high for residential building lots. The price of land is increasing rapidly because the demand is high, and the supply is extremely low.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The increased number of lots available for residential development will contribute to stabilizing the housing market, which at present is unattainable for many lifelong Chelan area residents. The value of the property will also increase the residential property taxes for Chelan County, which in turn, will increase the funding for governmental services.

CHELAN COUNTY

DEPARTMENT OF COMMUNITY DEVELOPMENT

316 WASHINGTON STREET, SUITE 301, WENATCHEE, WA 98801
TELEPHONE: (509) 667-6225

GENERAL LAND USE APPLICATION FORM

Parcel Number (APN): 272303430050 Lot Size: 46.44 acres
Parcel Address: UNASSIGNED City/Zip Code: Chelan 98816
Property Owner(s): HMJD-COLLINS LLC Zoning: RR5 and RR10 SAB
Mailing Address: PO Box 9
City/State/Zip Code: Brewster, WA 98812
Phone: (509) 733-2404 E-mail: hawkins@gebbersfarms.com

Applicant/Agent (if different than owner): Erin Burgess
Company and Mailing Address: Farallon Consulting, LLC DBA Grette Associates, PO Box 94147
City/State/Zip: Seattle, WA 98124 Phone: (509) 640-3289
E-mail: erinb@gretteassociates.com
For multiple owners, applicants, or agents, provide additional sheets.

This General Land Use Application Form shall be completed unless specified below. Additional information and supplemental forms may be required. Please review all applicable statutes and regulations pertaining to the proposed development and provide information, documents, studies, and reports (such as a Traffic Impact Study or environmental forms) demonstrating compliance with all statutory and regulatory requirements and other applicable criteria.

Application For: (Check all that apply)

- ☐ Administrative Modification
- ☐ Administrative Determination
- ☐ Administrative Interpretation
- ☐ Binding Site Plan
- ☑ Comprehensive Plan Map Amendment
- ☐ Comprehensive Plan Text Amendment
- ☐ Conditional Use Permit
- ☐ Forest Practice/Conversion
- ☐ Open Space: Public Benefit Rating System
- ☐ Major Subdivision
- ☐ Master Planned Development
- ☐ Planned Development
- ☐ Plat Alteration or Vacation
- ☐ Short Plat
- ☐ Variance (zoning or critical areas)
- ☐ Zoning Change-Text Amendment/ Map Amendment
- ☐ Critical Area Determination
- ☐ Other: _____

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

RR 5 (272303430050) to RR 2.5 and RR10 8AB

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: US Hwy 97A, agriculture
   South: US Hwy 97, agriculture
   East: residential and agriculture
   West: residential and undeveloped open space
4. What is the current use of the property? Residential and Agriculture
5. Sanitation Disposal: ☑ N/A ☐ Septic Permit ☐ Sewer District: _____
6. Water Source: ☑ N/A ☐ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☑ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: Number 7 School District: Chelan
9. Power Service: Chelan PUD
10. Are there critical areas or critical area buffers on the property?
    ☐ Airport Overlay: N/A
    ☐ Aquifer Recharge Area (see attached)
    ☐ Floodplain / Floodway N/A
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☑ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☑ Habitat/Riparian Area, protected species/area: WDFW PHS indicates subject parcel occurs within Chelan County Shrubsteppe habitat range.
    ☐ Streams / Waterbodies: N/A ☐ Shoreline Environment Designation: N/A
    ☑ Drainage or Seasonal Stream: "U" or "unknown" classified water body ☐ Wetland, if so what category: N/A
    ☐ Cultural or Archeological: N/A
11. Will landfill be required? ☑ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No.
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    Unknown at time of application.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled **"IS NOT"** above, proceed to Sub-Section III of this form.

If you circled **"IS"** above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ☐ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ☐ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ☐ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ☐ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ☐ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ☐ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ☐ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ☐ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ☐ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ☐ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ☐ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. HG — All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. HG — This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. HG — False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. HG — Additional permit applications and approvals may be necessary to conduct specific activities.
5. HG — Application fees are non-refundable, except when approve by the Board.
6. HG — In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

HG EAB 7. Chelan County is hereby given consent to enter the property(ies) listed above.

HG EAB 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

HG EAB 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

HG EAB 10. I certify that this application has been made with the consent of the lawful property owner(s).

HG EAB 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

HG EAB 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

COMPREHENSIVE PLAN AMENDMENT SUPPLEMENTAL INFORMATION

This packet is designed to assist you in preparing your application for a Comprehensive Plan Amendment. The following information is required at the time of submittal. Applications will be accepted **January 2 through March 1** of each calendar year. Additional information may be required. ***An incomplete application will not be processed.***

- ✓ A completed General Land Use Application, pursuant to CCC, Section 14.14.050(A) and (B).
- ✓ A completed SEPA Checklist (State Environmental Policy Act), pursuant to CCC, Section 14.14.050(D).
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (C), a detailed narrative which includes the following:
  - i. A detailed statement of what is proposed to be changed and why. Identify the specific comprehensive land use designation map and zoning map that would be amended; and,
  - ii. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (Chapter 36.70A RCW as amended) and any applicable County-wide planning policies; and,
  - iii. A statement of how the amendment complies with or supports the comprehensive plan's goals and policies; and,
  - iv. A detailed statement on how the land use designation amendment complies with comprehensive plan land use designation/siting criteria; and,
  - v. A statement of how the amendment is consistent with and supported by the capital facility element and the transportation element of the comprehensive plan, or if not, what changes to these elements would be required; and,
  - vi. For land use designation amendments, identify the land uses surrounding the affected property and describe how the proposed change would affect the surrounding land uses. Describe why the proposed amendment is more appropriate than the existing land use designation; and,
  - vii. Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas; and,
  - viii. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and
  - ix. Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare; and
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (E), The applicable processing fee for comprehensive plan amendments and SEPA review as determined by the county's adopted fee schedule, as amended, except that amendment requests by the cities shall not require the collection of said fees.
- ✓ Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following:
  1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:
     - A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,
     - B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

E. The amendment does not adversely affect the surrounding land uses; and,

F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

✓RCW 36.70A.020 Planning goals.

The following goals are adopted to guide the development and adoption of comprehensive plans and development regulations of those counties and cities that are required or choose to plan under RCW 36.70A.040. The following goals are not listed in order of priority and shall be used exclusively for the purpose of guiding the development of comprehensive plans and development regulations:

(1) Urban growth. Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.

(2) Reduce sprawl. Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

(3) Transportation. Encourage efficient multimodal transportation systems that are based on regional priorities and coordinated with county and city comprehensive plans.

(4) Housing. Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

(5) Economic development. Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

(6) Property rights. Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.

(7) Permits. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.

(8) Natural resource industries. Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.

(9) Open space and recreation. Retain open space, enhance recreational opportunities, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.

(10) Environment. Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.

(11) Citizen participation and coordination. Encourage the involvement of citizens in the planning process and ensure coordination between communities and jurisdictions to reconcile conflicts.

(12) Public facilities and services. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.

(13) Historic preservation. Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. **Name of proposed project, if applicable:**

   N/A

2. **Name of applicant:**

Hawkins Gebbers/HMJD Collins

3. **Address and phone number of applicant and contact person:**

	Agent
Hawkins Gebbers	Erin Burgess
P.O. Box 9	151 South Worthen Street, Suite 101
Brewster, WA 98812	Wenatchee, WA 98801
(509) 733-2404	509-640-3283

4. **Date checklist prepared:**

November 2025

5. **Agency requesting checklist:**

Chelan County

6. **Proposed timing or schedule (including phasing, if applicable):**

Timing and schedule would be consistent the guidelines established in Chelan County Code Title 14—Development procedures.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

Don't know.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

None known.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)**

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 47 acres (parcel 272303430050) from to Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5). to and Rural Residential/Resource 10 (RRD)

12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.**

The property is located adjacent to U.S. Highway 97A (parcel no. 272303430050) and east of Chelan, within Section 03, T 27N, R 23E.W.M.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Parcel no. 272303430050 –

- Cashmont sandy loam (CcB), 3 to 8 percent slopes
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- Pogue find sandy loam (PoB), 3 to 8 percent slopes
- Pogue gravelly fine sandy loam (PrE), 25 to 45% slopes.
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river

it flows into.

According to Washington Department of Natural Resources Forest Practices Application Mapping Tool (FPAMT), there is an "unknown" or "U" classified water body which runs through the subject property. Utilizing Google Earth historical imagery there is no indication of standing water or flow water present.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if

applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. Plants [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
____pasture
____crop or grain
__x__ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. Environmental Health [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) Describe special emergency services that might be required.

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use on subject parcel is agricultural. Adjacent properties are in residential and agricultural use. The proposal will not affect current uses on nearby or adjacent properties.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

272303430050 - pole garage/bldg.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

272303430050 – RR 5 and RRID EAB

g. What is the current comprehensive plan designation of the site?

272303430050 – RR 5 and RRID EAB

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. Has any part of the site been classified as a critical area by the city or county? If so, specify.

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Shrubsteppe habitat range.

j. Approximately how many people would reside or work in the completed project?

N/A

k. Approximately how many people would the completed project displace?

N/A.

l. Proposed measures to avoid or reduce displacement impacts, if any:

None.

m. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Application for a Comprehensive plan map amendment and zone change.

n. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None.

9. Housing [help]

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or lowincome housing.

None.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None.

c. Proposed measures to reduce or control housing impacts, if any:

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Parcel no. 272303430050 is accessed from U.S. Highway 97A-borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Yes. Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Hawkins Gebbers (Feb 17, 2026 12:17:23 PST)

Name of signee Hawkins Gebbers

Position and Agency/Organization Owner, manager

Date Submitted: 02/17/2026

D. Supplemental sheet for nonproject actions [HELP]

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

The proposal would not be likely to increase emissions to air or production of noise. Although the rezoning of the property may lead to its development which could impact air and noise emissions, the current zoning of the property would likewise permit its development thus there would be no increases resulting from the proposal.

The proposal would not include any discharges to water of toxic or hazardous substances of any kind. Because discharges to water are not proposed and toxic or hazardous substances are not part of the proposal, the proposal would not cause an increase in discharge to water or production, storage or release of toxic or hazardous substances.

Proposed measures to avoid or reduce such increases are:

Since no increases are anticipated, no measures to avoid or reduce them are proposed.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

The proposal does not include any components that would be likely to affect plants, animal, fish or marine life. Since the proposal is simply to change the comprehensive plan map and zoning designation, there would be no impact to the above mentioned resources.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

The proposal would be in compliance with all local, state and federal regulations regarding the above mentioned resources. Compliance with all applicable regulations would satisfactorily protect and conserve them.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not use any energy or natural resources thus it would not deplete them.

Proposed measures to protect or conserve energy and natural resources are:

Since there would be no impacts to energy or natural resources, no measures to protect or conserve them are proposed.

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic cultural sites, wetlands, floodplains, or prime farmlands?**

The proposal would not be likely to use or affect environmentally sensitive areas or areas designated for governmental protection because none are present on the property.

Proposed measures to protect such resources or to avoid or reduce impacts are:

Since there would be no impact to such resources, no measures to protect them are proposed.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

The proposal would be likely to affect land use by changing the zoning map designation. Such a change would not be incompatible with existing plans since the property is adjacent to existing property with the same zoning designation. The proposal would not affect shoreline use since it is not adjacent to a shoreline.

Proposed measures to avoid or reduce shoreline and land use impacts are:

Since there would be no negative impact to shoreline and/or land use, no measures are proposed to avoid or reduce them.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

The proposal would not be likely to increase demands on transportation or public services and utilities.

Proposed measures to reduce or respond to such demand(s) are:

Since there would be no increased demands on transportation or public services and utilities, no measures are proposed to reduce such demands.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal would not conflict with local, state or federal laws regarding the protection of the environment.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. **Name of proposed project, if applicable:**

   N/A

2. **Name of applicant:**

Hawkins Gebbers/HMJD Collins

3. **Address and phone number of applicant and contact person:**

	Agent
Hawkins Gebbers	Erin Burgess
P.O. Box 9	151 South Worthen Street, Suite 101
Brewster, WA 98812	Wenatchee, WA 98801
(509) 733-2404	509-640-3283

4. **Date checklist prepared:**

November 2025

5. **Agency requesting checklist:**

Chelan County

6. **Proposed timing or schedule (including phasing, if applicable):**

Timing and schedule would be consistent the guidelines established in Chelan County Code Title 14—Development procedures.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

Don't know.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

None known.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)**

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 47 acres (parcel 272303430050) from to Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5). to and Rural Residential/Resource 10 (RRD)

12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.**

The property is located adjacent to U.S. Highway 97A (parcel no. 272303430050) and east of Chelan, within Section 03, T 27N, R 23E.W.M.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Parcel no. 272303430050 –

- Cashmont sandy loam (CcB), 3 to 8 percent slopes
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- Pogue find sandy loam (PoB), 3 to 8 percent slopes
- Pogue gravelly fine sandy loam (PrE), 25 to 45% slopes.
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river

it flows into.

According to Washington Department of Natural Resources Forest Practices Application Mapping Tool (FPAMT), there is an "unknown" or "U" classified water body which runs through the subject property. Utilizing Google Earth historical imagery there is no indication of standing water or flow water present.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if

applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. Plants [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
____pasture
____crop or grain
__x__ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. Environmental Health [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) Describe special emergency services that might be required.

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use on subject parcel is agricultural. Adjacent properties are in residential and agricultural use. The proposal will not affect current uses on nearby or adjacent properties.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

272303430050 - pole garage/bldg.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

272303430050 – RR 5 and RRID EAB

g. What is the current comprehensive plan designation of the site?

272303430050 – RR 5 and RRID EAB

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. Has any part of the site been classified as a critical area by the city or county? If so, specify.

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Shrubsteppe habitat range.

j. Approximately how many people would reside or work in the completed project?

N/A

k. Approximately how many people would the completed project displace?

N/A.

l. Proposed measures to avoid or reduce displacement impacts, if any:

None.

m. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Application for a Comprehensive plan map amendment and zone change.

n. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None.

9. Housing [help]

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or lowincome housing.

None.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None.

c. Proposed measures to reduce or control housing impacts, if any:

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Parcel no. 272303430050 is accessed from U.S. Highway 97A-borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Yes. Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Hawkins Gebbers (Feb 17, 2026 12:17:23 PST)

Name of signee Hawkins Gebbers

Position and Agency/Organization Owner, manager

Date Submitted: 02/17/2026

D. Supplemental sheet for nonproject actions [HELP]

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

The proposal would not be likely to increase emissions to air or production of noise. Although the rezoning of the property may lead to its development which could impact air and noise emissions, the current zoning of the property would likewise permit its development thus there would be no increases resulting from the proposal.

The proposal would not include any discharges to water of toxic or hazardous substances of any kind. Because discharges to water are not proposed and toxic or hazardous substances are not part of the proposal, the proposal would not cause an increase in discharge to water or production, storage or release of toxic or hazardous substances.

Proposed measures to avoid or reduce such increases are:

Since no increases are anticipated, no measures to avoid or reduce them are proposed.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

The proposal does not include any components that would be likely to affect plants, animal, fish or marine life. Since the proposal is simply to change the comprehensive plan map and zoning designation, there would be no impact to the above mentioned resources.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

The proposal would be in compliance with all local, state and federal regulations regarding the above mentioned resources. Compliance with all applicable regulations would satisfactorily protect and conserve them.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not use any energy or natural resources thus it would not deplete them.

Proposed measures to protect or conserve energy and natural resources are:

Since there would be no impacts to energy or natural resources, no measures to protect or conserve them are proposed.

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic cultural sites, wetlands, floodplains, or prime farmlands?**

The proposal would not be likely to use or affect environmentally sensitive areas or areas designated for governmental protection because none are present on the property.

Proposed measures to protect such resources or to avoid or reduce impacts are:

Since there would be no impact to such resources, no measures to protect them are proposed.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

The proposal would be likely to affect land use by changing the zoning map designation. Such a change would not be incompatible with existing plans since the property is adjacent to existing property with the same zoning designation. The proposal would not affect shoreline use since it is not adjacent to a shoreline.

Proposed measures to avoid or reduce shoreline and land use impacts are:

Since there would be no negative impact to shoreline and/or land use, no measures are proposed to avoid or reduce them.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

The proposal would not be likely to increase demands on transportation or public services and utilities.

Proposed measures to reduce or respond to such demand(s) are:

Since there would be no increased demands on transportation or public services and utilities, no measures are proposed to reduce such demands.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal would not conflict with local, state or federal laws regarding the protection of the environment.

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-significance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

CPA 26-063 Sanderson- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential Resource 5 (RR5). **Site Address:** 172 Whitetail Way Chelan, WA 98816; **Parcel Numbers:** 28-22-34-410-100

Subject: Notice of Application for CPA 26-048 HDMJ-Collins, LLC - Chelan County Dept. of Community Development
Attachments: CPA 26-048 NOA.pdf; CPA 26-048 - Affidavit of posting.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding HMJD-Collins, LLC's property, File# CPA 26-048. This notice should be posted on the *subject property by March 5th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days,* starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.

Thank you,

Jessica Thompson

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-041 Campbell - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5). 24 Hugo Road, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-330-175.

CPA 26-048 HMJD Collins, LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residentia l/Resource 2.5 (RR2.5). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-430-050.

CPA 26-054 Hellickson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 25-18-32-330-200.

CPA 26-060 McMahon - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). 7948 East Leavenworth Rd., Leavenworth, WA 98826 also identified as Assessor's Parcel No.: 24-17-23-510-480.

On March 5, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 19, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

To Susan Dretke, Chelan Department of Community Development

Fr Thomas Nielsen, Adjacent Land Owner Thomas Nielsen

Re Project File #'s CPA 26-048 and CPA 26-041

Date March 14, 2026

The purpose of this memorandum is to write in support of the proposed applications for a Comprehensive Plan Amendment to change the two subject properties zoning to Rural Residential 2.5 (RR2.5). With continued population growth in the greater Chelan area, there is a need for more affordable housing. The RR2.5 designation will maintain the rural nature of the area, but allow more families to live in the area.

I am the owner of two parcels of land adjacent to the proposed parcels and whole heartedly support their application. My properties are located at 25 Hugo Road and 109 Hugo Road. I welcome new neighbors!

Chelan-Douglas Health District
200 Valley Mall Parkway, East Wenatchee, WA 98802

Memorandum

To: Susan Dretke, Chelan County

From: Richmond Petty, REHS

Date: 03/12/26

RE: HMJD-COLLINS LLC (CPA 26-048) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The subject property is located at Unassigned., Chelan, WA 98816 (county tax parcel: 272303430050)

As proposed, I have no objections to further approval of this project.

- No permitted septic system or approved domestic water source records on file.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

Hello Susan,

This consultation is in response to CPA 26-048 HMJD-Collins, LLC, SEPA Determination of Non-significance. This land use change allows an additional dwelling unit to be constructed with the ratio of 1 residence per 2.5 acres. If and when there is a planned development we look forward to reviewing those future plans.

On behalf of Amelia Stanger, Interim Tribal Historic Preservation Officer.

Parcel 2:

That part of Southwest quarter of the Southwest quarter of Section 3 and that part of Government Lot 3 in Section 10, Township 27 North, Range 23 East, W.M., described as:

BEGINNING AT A POINT opposite Highway Engineer's Station (hereinafter referred to as HES) 606+00 on the SR 151 Line Survey of SR 151, Beebe Bridge to Hugo Vic., and 140 feet Northwesterly therefrom; thence Southwesterly to a point opposite of HES 600+00 on Said SR 151 Line Survey and 250 feet Northwesterly therefrom; thence Southeasterly to a point opposite said HES and 214 feet Northwesterly therefrom; thence Northeasterly to the POINT OF BEGINNING.

See attached

Tract 2: Part of the Northwest quarter of the Southeast quarter and part of the Government Lot 5 of Section 3, Township 27 North, Range 23, E. W.M., described as follows:

Commencing at the Northeast comer of said Northwest quarter of the Southeast quarter and running thence South 01°43'15" East along the Easterly boundary thereof for a distance of 391.0 feet to a point on the South boundary of Hugo Road and the True Point of Beginning of this description. Thence South 44 °14'15" West along said South boundary for a distance of 259.0 feet; thence South 01°43'15" East along the West boundary of an established orchard road for a distance of 1000.0 feet; thence continuing South 01°43'15" East to the State Shore Lauds on the right bank of the Columbia River; thence Northeasterly along said state Shore Lands boundary to a point on the East boundary of Government Lot 5; thence North 01°43'15" West along the East boundary of Government Lot 5 and the Northwest quarter of the Southeast quarter to the Point of Beginning.

EXCEPT THEREFROM that portion conveyed to Chelan County June 9, 1966 by deed recorded under Auditor's File No. 652247 described as follows:

A parcel of land for public road right of way being the West 30 feet of the North 400 feet of the Southwest quarter of the Northeast quarter of the Southwest quarter of Section 3, Township 27 North, Range 23, E.W.M. AND EXCEPT THEREFROM that portion conveyed to Bernard Finnigan and E.M. Finnigan, husband and wife November 10, 1970 by Quit Claim Deed recorded under Auditor's File No. 704896 described as follows: Part of the Northwest quarter of the Southeast quarter and pan of the Government Lot 5 of Section 3, Township 27 North, Range 23. E.W.M., described as follows:

Commencing at the Northeast corner of said Northwest quarter of the Southeast quarter and running thence South 01°43'15" East along the Easterly boundary thereof for a distance of 391.0 feet to a point on the South boundary of Hugo Road and the True Point of Beginning; thence South 44°14'15" West along said South boundary for a distance of 259.0 feet; thence South 01°43'15" East along the West boundary of an established orchard road for a distance of 1000.0 feet; thence continuing South 01°43'15" East to the State Shore Lands on the right bank of the Columbia River; thence Northeasterly along said State Shore Lands boundary to a point on the East boundary of Government Lot 5; thence North 01°43'15" West along the East boundary of Government Lot 5 and the Northwest quarter of the Southeast quarter to the Point of Beginning.

EXCEPTING THEREFROM the rights of way of the Great Northern Railway.

AND EXCEPTING that part of the above described tract lying Northerly of the existing County Road.

AND ALSO EXCEPTING THEREFROM right-of-way for U.S. Highway SR 97.

See attached

Exhibit "A" (Corrected Legals)

Parcel A:

Parcel B as delineated on Boundary Line Adjustment No. 2020-103, Chelan County, Washington, recorded on November 17, 2020 under Recording No. 2529918.

Parcel B:

The South half of the Northeast Quarter of the Southwest Quarter of Section 3, Township 27 North, Range 23, East of the Willamette Meridian, Chelan County, Washington.

Except therefrom that portion conveyed to Chelan County by Deed recorded under Auditor's File No. 652247 described as follows:

A parcel of land for public road right of way being the West 30 feet of the North 400 feet of the Southwest Quarter of the Northeast Quarter of the Southwest Quarter of Section 3, Township 27 North, Range 23, East of the Willamette Meridian.

Also excepting therefrom Right of Way for US Highway SR 97.

Parcel C:

That portion of the Northwest Quarter of the Southeast Quarter of Section 4, Township 27 North, Range 23, East of the Willamette Meridian, Chelan County, Washington, lying Easterly of Apple Acres Road (Formerly State Hwy No. 10) and that portion of the Southwest Quarter of the Southeast Quarter of Section 4 lying Easterly of Apple Acres Road (Formerly State Hwy 10) and Northerly of State Highway 97A.

Except those portions thereof conveyed to City of Chelan by instrument recorded under Auditor's File No. 9304160082, in Volume 0991, Pages 1905-1907, Chelan County, Washington.

The above captioned description may be incorrect, because the application for Title Insurance contained only an address and/or Parcel No. Prior to closing, all parties to the transaction must verify the legal description. If further changes are necessary, notify the Company well before closing so that those changes can be reviewed. Closing instructions must indicate that the legal description has been reviewed and approved by all parties.

Parcel No.: 27 23 03 330 175 27 23 03 310 150 27 23 04 420 075 27 23 03 330 150

Chelan County Code 14.14.050

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of parcel no. 272303430050 at 46.44 acres from Rural Residential/Resource 5 (RR 5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located east of Chelan, within Section 03, T 27N, R 23E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 18. Parcel no 272303430050 is adjacent to 168 acres zoned RR 2.5 to the east of the subject property, in addition to 54 acres zoned RR 2.5 occurring north of the subject property directly north of US Highway 97A.

The zoning and comprehensive plan designations are proposed to be changed to align the property with more appropriate zoning based on the property locations adjacent to Highway 97A, US Highway 97, existing residential use and adjacent zoning. The total area proposed to be rezoned is 46.44 acres.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for residential use, while the demand for housing remains high. This lack of inventory is driving the price of residential property which negatively affects affordability of housing for those who live and work in Chelan County.

RCW 36.70A.020(1) encourages urban growth. The subject property is not located in an urban growth area but rather located near the Chelan UGA and is located adjacent to the same zoning district as that which is proposed.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development. The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land. The best use for this land is allowing the density to increase in the developable areas while preserving the open space and critical areas.

RCW 36.70A.020(4) encourages the promotion of a variety of residential densities and housing types. Given the fact that only 12% of Chelan County is in private ownership, residential development will continue, whether it be as a standard subdivision

Policy LU 1.2: Protect residential neighborhoods from impacts associated with incompatible land uses through application of development standards and permit conditioning.

Rationale: Incompatible land uses located in close proximity to residential neighborhoods may create adverse impacts which could lead to a reduction of the high quality of life for the County residents.

The proposed RR 2.5 zoning is the same as surrounding properties to the east and will allow for residential development which is compatible with the existing residential uses in the area.

Policy LU 1.3: Develop innovative regulatory strategies that create developer incentives to provide affordable housing to low- and moderate-income households.

Rationale: This can be accomplished through the use of innovative techniques including but not limited to density bonuses, performance zoning, zero lot line development, and cluster subdivisions. Incentives may help facilitate the construction of low- and moderate-income housing.

The proposed RR 2.5 zoning will allow lot sizes that are in accordance with the Chelan-Douglas Health District standards for water and sewer disposal. This density allows the creation of more residential inventory which serves to reduce land prices based on supply and demand.

Policy LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

Rationale: Many parcels of land are available within existing residential developments that can accommodate further development. Infill within these areas will allow public facilities and services to be provided in a more efficient manner.

The proposed rezone is adjacent to a large area zoned RR 2.5 with appropriate lot sizes. The subject property can accommodate further development that is consistent with adjacent land uses and lot sizes.

Housing Element

Goal H 2: Promote a variety of residential densities and housing types.

Policy H 2.1: Promote a diversity of housing unity types and densities to meet the needs of all existing and future residents of the County, including both site-built and manufactured and modular homes.

Rationale: An adequate supply of appropriately zoned land will ensure that the GMA plan does not artificially create inflation in housing prices by restricting competition in the land market.

The approval of this application will lead to increasing the supply of appropriately zoned land that will ensure that inflation in housing prices is not artificially created.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

Rural Element

Designations/Siting Criteria – Rural Residential 2.5

Density: One (1) dwelling unit per 2.5 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. **Geographical and Geological Characteristics. The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be immediately adjacent to existing residential or rural developments. The area may be adjacent to urban growth areas.**

2. **Natural Resources. The area has limited resource management potential. The area may be adjacent to resource lands.**

3. **Public Services. Uses do not require extension or provision of urban levels of services. Rural governmental services and infrastructure are typically available, planned and or funded for.**

4. **Existing Land Uses. Single family residences, agricultural uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are currently 2.5 acres or greater in size but typically less than 5 acres.**

The property meets the designation and siting criteria for RR 2.5 and is more appropriate than the current zoning. The property is closely associated with natural amenities found in Chelan County due to the location in the greater Chelan recreational area. The property is not designated as a resource land of long-term significance. Rural governmental services are available and planned for. Existing land uses in the area include seasonal and year-round residences, tourist and recreational activities, agriculture, and other rural development. There are many properties in the area that are zoned RR 2.5.

5. **A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, or if not, what changes to these elements would be required.**

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

6. **For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.**

The property to the north of parcel no. 272303430050 is zoned RR 2.5 but is separated from the subject property by Highway 97A. Properties to the west are zoned RR5, and properties to the south are zoned RR 10 and are separated from the subject property by US Highway 97. The adjacent property to the east has the same zoning as that which is proposed - RR 2.5, and like the subject property is bordered by U.S. Highway 97A to the north and U.S. Highway 97 to the south. The proposed designation is more appropriate because the property is bounded on two sides by highways/roads and is in a location with existing access to a county road (Hugo Road), with sufficient right of way for future development. In addition, the subject property has existing access by a private road (Sugar Bee Lane). The proposed amendment is more appropriate than the existing land use designation because it offers the current and future residents of the County an opportunity for a greater variety of residential densities and housing unit types, supporting an adequate supply of appropriately zoned land in the County to accommodate a variety of future housing needs.

The proposed amendment is a more appropriate zoning for the subject parcel due to the consistent nature of alignment with previously mentioned goals of the RCW 36.70A.020 and Chelan County Planning Policies.

7. **Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?**

The proposed amendment would not affect lands designated as resource lands of long-term commercial significance. The subject property is not adjacent to Commercial Forests. The property has been evaluated for the presence of streams and/or wetlands, with the only indication of a stream is the "u" or "unknown" stream type which does not exhibit any surface water at the time of the application. There are no known wetlands present on the subject property. Any critical areas that may be present on the subject property would be adequately protected by conditions of approval contained in any future land use approvals. All required protections to critical areas such the submission of geotechnical reports would be complied with as necessary in order maintain a high level of environmental quality in Chelan County.

8. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The proposed amendment would make a certain amount of land available for higher density development to accommodate future growth in the rural, unincorporated areas of Chelan County. Moderately priced rural properties are very desirable, and the demand is high for residential building lots. The price of land is increasing rapidly because the demand is high, and the supply is extremely low.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The increased number of lots available for residential development will contribute to stabilizing the housing market, which at present is unattainable for many lifelong Chelan area residents. The value of the property will also increase the residential property taxes for Chelan County, which in turn, will increase the funding for governmental services.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

RR 5 (272303430050) to RR 2.5 and RR10 8AB

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: US Hwy 97A, agriculture
   South: US Hwy 97, agriculture
   East: residential and agriculture
   West: residential and undeveloped open space
4. What is the current use of the property? Residential and Agriculture
5. Sanitation Disposal: ☑ N/A ☐ Septic Permit ☐ Sewer District: _____
6. Water Source: ☑ N/A ☐ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☑ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: Number 7 School District: Chelan
9. Power Service: Chelan PUD
10. Are there critical areas or critical area buffers on the property?
    ☐ Airport Overlay: N/A
    ☐ Aquifer Recharge Area (see attached)
    ☐ Floodplain / Floodway N/A
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☑ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☑ Habitat/Riparian Area, protected species/area: WDFW PHS indicates subject parcel occurs within Chelan County Shrubsteppe habitat range.
    ☐ Streams / Waterbodies: N/A ☐ Shoreline Environment Designation: N/A
    ☑ Drainage or Seasonal Stream: "U" or "unknown" classified water body ☐ Wetland, if so what category: N/A
    ☐ Cultural or Archeological: N/A
11. Will landfill be required? ☑ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No.
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    Unknown at time of application.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled **"IS NOT"** above, proceed to Sub-Section III of this form.

If you circled **"IS"** above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ☐ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ☐ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ☐ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ☐ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ☐ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ☐ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ☐ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ☐ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ☐ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ☐ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ☐ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. HG — All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. HG — This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. HG — False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. HG — Additional permit applications and approvals may be necessary to conduct specific activities.
5. HG — Application fees are non-refundable, except when approve by the Board.
6. HG — In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

HG EAB 7. Chelan County is hereby given consent to enter the property(ies) listed above.

HG EAB 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

HG EAB 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

HG EAB 10. I certify that this application has been made with the consent of the lawful property owner(s).

HG EAB 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

HG EAB 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

COMPREHENSIVE PLAN AMENDMENT SUPPLEMENTAL INFORMATION

This packet is designed to assist you in preparing your application for a Comprehensive Plan Amendment. The following information is required at the time of submittal. Applications will be accepted **January 2 through March 1** of each calendar year. Additional information may be required. ***An incomplete application will not be processed.***

- ✓ A completed General Land Use Application, pursuant to CCC, Section 14.14.050(A) and (B).
- ✓ A completed SEPA Checklist (State Environmental Policy Act), pursuant to CCC, Section 14.14.050(D).
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (C), a detailed narrative which includes the following:
  - i. A detailed statement of what is proposed to be changed and why. Identify the specific comprehensive land use designation map and zoning map that would be amended; and,
  - ii. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (Chapter 36.70A RCW as amended) and any applicable County-wide planning policies; and,
  - iii. A statement of how the amendment complies with or supports the comprehensive plan's goals and policies; and,
  - iv. A detailed statement on how the land use designation amendment complies with comprehensive plan land use designation/siting criteria; and,
  - v. A statement of how the amendment is consistent with and supported by the capital facility element and the transportation element of the comprehensive plan, or if not, what changes to these elements would be required; and,
  - vi. For land use designation amendments, identify the land uses surrounding the affected property and describe how the proposed change would affect the surrounding land uses. Describe why the proposed amendment is more appropriate than the existing land use designation; and,
  - vii. Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas; and,
  - viii. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and
  - ix. Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare; and
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (E), The applicable processing fee for comprehensive plan amendments and SEPA review as determined by the county's adopted fee schedule, as amended, except that amendment requests by the cities shall not require the collection of said fees.
- ✓ Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following:
  1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:
     - A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,
     - B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

E. The amendment does not adversely affect the surrounding land uses; and,

F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

✓RCW 36.70A.020 Planning goals.

The following goals are adopted to guide the development and adoption of comprehensive plans and development regulations of those counties and cities that are required or choose to plan under RCW 36.70A.040. The following goals are not listed in order of priority and shall be used exclusively for the purpose of guiding the development of comprehensive plans and development regulations:

(1) Urban growth. Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.

(2) Reduce sprawl. Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

(3) Transportation. Encourage efficient multimodal transportation systems that are based on regional priorities and coordinated with county and city comprehensive plans.

(4) Housing. Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

(5) Economic development. Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

(6) Property rights. Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.

(7) Permits. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.

(8) Natural resource industries. Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.

(9) Open space and recreation. Retain open space, enhance recreational opportunities, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.

(10) Environment. Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.

(11) Citizen participation and coordination. Encourage the involvement of citizens in the planning process and ensure coordination between communities and jurisdictions to reconcile conflicts.

(12) Public facilities and services. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.

(13) Historic preservation. Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. **Name of proposed project, if applicable:**

   N/A

2. **Name of applicant:**

Hawkins Gebbers/HMJD Collins

3. **Address and phone number of applicant and contact person:**

	Agent
Hawkins Gebbers	Erin Burgess
P.O. Box 9	151 South Worthen Street, Suite 101
Brewster, WA 98812	Wenatchee, WA 98801
(509) 733-2404	509-640-3283

4. **Date checklist prepared:**

November 2025

5. **Agency requesting checklist:**

Chelan County

6. **Proposed timing or schedule (including phasing, if applicable):**

Timing and schedule would be consistent the guidelines established in Chelan County Code Title 14—Development procedures.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

Don't know.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

None known.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)**

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 47 acres (parcel 272303430050) from to Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5). to and Rural Residential/Resource 10 (RRD)

12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.**

The property is located adjacent to U.S. Highway 97A (parcel no. 272303430050) and east of Chelan, within Section 03, T 27N, R 23E.W.M.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Parcel no. 272303430050 –

- Cashmont sandy loam (CcB), 3 to 8 percent slopes
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- Pogue find sandy loam (PoB), 3 to 8 percent slopes
- Pogue gravelly fine sandy loam (PrE), 25 to 45% slopes.
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river

it flows into.

According to Washington Department of Natural Resources Forest Practices Application Mapping Tool (FPAMT), there is an "unknown" or "U" classified water body which runs through the subject property. Utilizing Google Earth historical imagery there is no indication of standing water or flow water present.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if

applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. Plants [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
____pasture
____crop or grain
__x__ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. Environmental Health [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) Describe special emergency services that might be required.

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use on subject parcel is agricultural. Adjacent properties are in residential and agricultural use. The proposal will not affect current uses on nearby or adjacent properties.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

272303430050 - pole garage/bldg.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

272303430050 – RR 5 and RRID EAB

g. What is the current comprehensive plan designation of the site?

272303430050 – RR 5 and RRID EAB

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. Has any part of the site been classified as a critical area by the city or county? If so, specify.

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Shrubsteppe habitat range.

j. Approximately how many people would reside or work in the completed project?

N/A

k. Approximately how many people would the completed project displace?

N/A.

l. Proposed measures to avoid or reduce displacement impacts, if any:

None.

m. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Application for a Comprehensive plan map amendment and zone change.

n. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None.

9. Housing [help]

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or lowincome housing.

None.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None.

c. Proposed measures to reduce or control housing impacts, if any:

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Parcel no. 272303430050 is accessed from U.S. Highway 97A-borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Yes. Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Hawkins Gebbers (Feb 17, 2026 12:17:23 PST)

Name of signee Hawkins Gebbers

Position and Agency/Organization Owner, manager

Date Submitted: 02/17/2026

D. Supplemental sheet for nonproject actions [HELP]

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

The proposal would not be likely to increase emissions to air or production of noise. Although the rezoning of the property may lead to its development which could impact air and noise emissions, the current zoning of the property would likewise permit its development thus there would be no increases resulting from the proposal.

The proposal would not include any discharges to water of toxic or hazardous substances of any kind. Because discharges to water are not proposed and toxic or hazardous substances are not part of the proposal, the proposal would not cause an increase in discharge to water or production, storage or release of toxic or hazardous substances.

Proposed measures to avoid or reduce such increases are:

Since no increases are anticipated, no measures to avoid or reduce them are proposed.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

The proposal does not include any components that would be likely to affect plants, animal, fish or marine life. Since the proposal is simply to change the comprehensive plan map and zoning designation, there would be no impact to the above mentioned resources.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

The proposal would be in compliance with all local, state and federal regulations regarding the above mentioned resources. Compliance with all applicable regulations would satisfactorily protect and conserve them.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not use any energy or natural resources thus it would not deplete them.

Proposed measures to protect or conserve energy and natural resources are:

Since there would be no impacts to energy or natural resources, no measures to protect or conserve them are proposed.

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic cultural sites, wetlands, floodplains, or prime farmlands?**

The proposal would not be likely to use or affect environmentally sensitive areas or areas designated for governmental protection because none are present on the property.

Proposed measures to protect such resources or to avoid or reduce impacts are:

Since there would be no impact to such resources, no measures to protect them are proposed.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

The proposal would be likely to affect land use by changing the zoning map designation. Such a change would not be incompatible with existing plans since the property is adjacent to existing property with the same zoning designation. The proposal would not affect shoreline use since it is not adjacent to a shoreline.

Proposed measures to avoid or reduce shoreline and land use impacts are:

Since there would be no negative impact to shoreline and/or land use, no measures are proposed to avoid or reduce them.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

The proposal would not be likely to increase demands on transportation or public services and utilities.

Proposed measures to reduce or respond to such demand(s) are:

Since there would be no increased demands on transportation or public services and utilities, no measures are proposed to reduce such demands.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal would not conflict with local, state or federal laws regarding the protection of the environment.

Chelan County Code 14.14.050

1. A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of parcel no. 272303430050 at 46.44 acres from Rural Residential/Resource 5 (RR 5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located east of Chelan, within Section 03, T 27N, R 23E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 18. Parcel no 272303430050 is adjacent to 168 acres zoned RR 2.5 to the east of the subject property, in addition to 54 acres zoned RR 2.5 occurring north of the subject property directly north of US Highway 97A.

The zoning and comprehensive plan designations are proposed to be changed to align the property with more appropriate zoning based on the property locations adjacent to Highway 97A, US Highway 97, existing residential use and adjacent zoning. The total area proposed to be rezoned is 46.44 acres.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for residential use, while the demand for housing remains high. This lack of inventory is driving the price of residential property which negatively affects affordability of housing for those who live and work in Chelan County.

RCW 36.70A.020(1) encourages urban growth. The subject property is not located in an urban growth area but rather located near the Chelan UGA and is located adjacent to the same zoning district as that which is proposed.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development. The subject property for this zone change and comp plan map amendment request would not be converted to sprawling, low density development but rather a well-planned efficient use of available land. The best use for this land is allowing the density to increase in the developable areas while preserving the open space and critical areas.

RCW 36.70A.020(4) encourages the promotion of a variety of residential densities and housing types. Given the fact that only 12% of Chelan County is in private ownership, residential development will continue, whether it be as a standard subdivision

Policy LU 1.2: Protect residential neighborhoods from impacts associated with incompatible land uses through application of development standards and permit conditioning.

Rationale: Incompatible land uses located in close proximity to residential neighborhoods may create adverse impacts which could lead to a reduction of the high quality of life for the County residents.

The proposed RR 2.5 zoning is the same as surrounding properties to the east and will allow for residential development which is compatible with the existing residential uses in the area.

Policy LU 1.3: Develop innovative regulatory strategies that create developer incentives to provide affordable housing to low- and moderate-income households.

Rationale: This can be accomplished through the use of innovative techniques including but not limited to density bonuses, performance zoning, zero lot line development, and cluster subdivisions. Incentives may help facilitate the construction of low- and moderate-income housing.

The proposed RR 2.5 zoning will allow lot sizes that are in accordance with the Chelan-Douglas Health District standards for water and sewer disposal. This density allows the creation of more residential inventory which serves to reduce land prices based on supply and demand.

Policy LU 1.5: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

Rationale: Many parcels of land are available within existing residential developments that can accommodate further development. Infill within these areas will allow public facilities and services to be provided in a more efficient manner.

The proposed rezone is adjacent to a large area zoned RR 2.5 with appropriate lot sizes. The subject property can accommodate further development that is consistent with adjacent land uses and lot sizes.

Housing Element

Goal H 2: Promote a variety of residential densities and housing types.

Policy H 2.1: Promote a diversity of housing unity types and densities to meet the needs of all existing and future residents of the County, including both site-built and manufactured and modular homes.

Rationale: An adequate supply of appropriately zoned land will ensure that the GMA plan does not artificially create inflation in housing prices by restricting competition in the land market.

The approval of this application will lead to increasing the supply of appropriately zoned land that will ensure that inflation in housing prices is not artificially created.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

Rural Element

Designations/Siting Criteria – Rural Residential 2.5

Density: One (1) dwelling unit per 2.5 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. **Geographical and Geological Characteristics. The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be immediately adjacent to existing residential or rural developments. The area may be adjacent to urban growth areas.**

2. **Natural Resources. The area has limited resource management potential. The area may be adjacent to resource lands.**

3. **Public Services. Uses do not require extension or provision of urban levels of services. Rural governmental services and infrastructure are typically available, planned and or funded for.**

4. **Existing Land Uses. Single family residences, agricultural uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are currently 2.5 acres or greater in size but typically less than 5 acres.**

The property meets the designation and siting criteria for RR 2.5 and is more appropriate than the current zoning. The property is closely associated with natural amenities found in Chelan County due to the location in the greater Chelan recreational area. The property is not designated as a resource land of long-term significance. Rural governmental services are available and planned for. Existing land uses in the area include seasonal and year-round residences, tourist and recreational activities, agriculture, and other rural development. There are many properties in the area that are zoned RR 2.5.

5. **A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, or if not, what changes to these elements would be required.**

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

6. **For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.**

The property to the north of parcel no. 272303430050 is zoned RR 2.5 but is separated from the subject property by Highway 97A. Properties to the west are zoned RR5, and properties to the south are zoned RR 10 and are separated from the subject property by US Highway 97. The adjacent property to the east has the same zoning as that which is proposed - RR 2.5, and like the subject property is bordered by U.S. Highway 97A to the north and U.S. Highway 97 to the south. The proposed designation is more appropriate because the property is bounded on two sides by highways/roads and is in a location with existing access to a county road (Hugo Road), with sufficient right of way for future development. In addition, the subject property has existing access by a private road (Sugar Bee Lane). The proposed amendment is more appropriate than the existing land use designation because it offers the current and future residents of the County an opportunity for a greater variety of residential densities and housing unit types, supporting an adequate supply of appropriately zoned land in the County to accommodate a variety of future housing needs.

The proposed amendment is a more appropriate zoning for the subject parcel due to the consistent nature of alignment with previously mentioned goals of the RCW 36.70A.020 and Chelan County Planning Policies.

7. **Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?**

The proposed amendment would not affect lands designated as resource lands of long-term commercial significance. The subject property is not adjacent to Commercial Forests. The property has been evaluated for the presence of streams and/or wetlands, with the only indication of a stream is the "u" or "unknown" stream type which does not exhibit any surface water at the time of the application. There are no known wetlands present on the subject property. Any critical areas that may be present on the subject property would be adequately protected by conditions of approval contained in any future land use approvals. All required protections to critical areas such the submission of geotechnical reports would be complied with as necessary in order maintain a high level of environmental quality in Chelan County.

8. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The proposed amendment would make a certain amount of land available for higher density development to accommodate future growth in the rural, unincorporated areas of Chelan County. Moderately priced rural properties are very desirable, and the demand is high for residential building lots. The price of land is increasing rapidly because the demand is high, and the supply is extremely low.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The increased number of lots available for residential development will contribute to stabilizing the housing market, which at present is unattainable for many lifelong Chelan area residents. The value of the property will also increase the residential property taxes for Chelan County, which in turn, will increase the funding for governmental services.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

RR 5 (272303430050) to RR 2.5 and RR10 8AB

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: US Hwy 97A, agriculture
   South: US Hwy 97, agriculture
   East: residential and agriculture
   West: residential and undeveloped open space
4. What is the current use of the property? Residential and Agriculture
5. Sanitation Disposal: ☑ N/A ☐ Septic Permit ☐ Sewer District: _____
6. Water Source: ☑ N/A ☐ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☑ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: Number 7 School District: Chelan
9. Power Service: Chelan PUD
10. Are there critical areas or critical area buffers on the property?
    ☐ Airport Overlay: N/A
    ☐ Aquifer Recharge Area (see attached)
    ☐ Floodplain / Floodway N/A
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☑ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☑ Habitat/Riparian Area, protected species/area: WDFW PHS indicates subject parcel occurs within Chelan County Shrubsteppe habitat range.
    ☐ Streams / Waterbodies: N/A ☐ Shoreline Environment Designation: N/A
    ☑ Drainage or Seasonal Stream: "U" or "unknown" classified water body ☐ Wetland, if so what category: N/A
    ☐ Cultural or Archeological: N/A
11. Will landfill be required? ☑ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No.
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    Unknown at time of application.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled **"IS NOT"** above, proceed to Sub-Section III of this form.

If you circled **"IS"** above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☑ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ☐ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ☐ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ☐ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ☐ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ☐ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ☐ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ☐ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ☐ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ☐ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ☐ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ☐ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. HG — All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. HG — This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. HG — False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. HG — Additional permit applications and approvals may be necessary to conduct specific activities.
5. HG — Application fees are non-refundable, except when approve by the Board.
6. HG — In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

HG EAB 7. Chelan County is hereby given consent to enter the property(ies) listed above.

HG EAB 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

HG EAB 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

HG EAB 10. I certify that this application has been made with the consent of the lawful property owner(s).

HG EAB 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

HG EAB 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

COMPREHENSIVE PLAN AMENDMENT SUPPLEMENTAL INFORMATION

This packet is designed to assist you in preparing your application for a Comprehensive Plan Amendment. The following information is required at the time of submittal. Applications will be accepted **January 2 through March 1** of each calendar year. Additional information may be required. ***An incomplete application will not be processed.***

- ✓ A completed General Land Use Application, pursuant to CCC, Section 14.14.050(A) and (B).
- ✓ A completed SEPA Checklist (State Environmental Policy Act), pursuant to CCC, Section 14.14.050(D).
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (C), a detailed narrative which includes the following:
  - i. A detailed statement of what is proposed to be changed and why. Identify the specific comprehensive land use designation map and zoning map that would be amended; and,
  - ii. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (Chapter 36.70A RCW as amended) and any applicable County-wide planning policies; and,
  - iii. A statement of how the amendment complies with or supports the comprehensive plan's goals and policies; and,
  - iv. A detailed statement on how the land use designation amendment complies with comprehensive plan land use designation/siting criteria; and,
  - v. A statement of how the amendment is consistent with and supported by the capital facility element and the transportation element of the comprehensive plan, or if not, what changes to these elements would be required; and,
  - vi. For land use designation amendments, identify the land uses surrounding the affected property and describe how the proposed change would affect the surrounding land uses. Describe why the proposed amendment is more appropriate than the existing land use designation; and,
  - vii. Will the proposed amendment affect lands designated as resource lands of long-term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas; and,
  - viii. How would the proposed amendment affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and
  - ix. Explain how the proposed change would serve the interests of not only the applicant, but the public as a whole, including health, safety or welfare; and
- ✓ Pursuant to Chelan County Code, Section 14.14.050 (E), The applicable processing fee for comprehensive plan amendments and SEPA review as determined by the county's adopted fee schedule, as amended, except that amendment requests by the cities shall not require the collection of said fees.
- ✓ Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following:
  1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:
     - A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,
     - B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

E. The amendment does not adversely affect the surrounding land uses; and,

F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

✓RCW 36.70A.020 Planning goals.

The following goals are adopted to guide the development and adoption of comprehensive plans and development regulations of those counties and cities that are required or choose to plan under RCW 36.70A.040. The following goals are not listed in order of priority and shall be used exclusively for the purpose of guiding the development of comprehensive plans and development regulations:

(1) Urban growth. Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.

(2) Reduce sprawl. Reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

(3) Transportation. Encourage efficient multimodal transportation systems that are based on regional priorities and coordinated with county and city comprehensive plans.

(4) Housing. Plan for and accommodate housing affordable to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

(5) Economic development. Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

(6) Property rights. Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.

(7) Permits. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.

(8) Natural resource industries. Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forestlands and productive agricultural lands, and discourage incompatible uses.

(9) Open space and recreation. Retain open space, enhance recreational opportunities, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks and recreation facilities.

(10) Environment. Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.

(11) Citizen participation and coordination. Encourage the involvement of citizens in the planning process and ensure coordination between communities and jurisdictions to reconcile conflicts.

(12) Public facilities and services. Ensure that those public facilities and services necessary to support development shall be adequate to serve the development at the time the development is available for occupancy and use without decreasing current service levels below locally established minimum standards.

(13) Historic preservation. Identify and encourage the preservation of lands, sites, and structures, that have historical or archaeological significance.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background [HELP]

1. **Name of proposed project, if applicable:**

   N/A

2. **Name of applicant:**

Hawkins Gebbers/HMJD Collins

3. **Address and phone number of applicant and contact person:**

	Agent
Hawkins Gebbers	Erin Burgess
P.O. Box 9	151 South Worthen Street, Suite 101
Brewster, WA 98812	Wenatchee, WA 98801
(509) 733-2404	509-640-3283

4. **Date checklist prepared:**

November 2025

5. **Agency requesting checklist:**

Chelan County

6. **Proposed timing or schedule (including phasing, if applicable):**

Timing and schedule would be consistent the guidelines established in Chelan County Code Title 14—Development procedures.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

Don't know.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

None known.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

Comprehensive Plan Map Amendment (Chelan County)
Zone Change (Chelan County)

11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)**

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 47 acres (parcel 272303430050) from to Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR 2.5). to and Rural Residential/Resource 10 (RRD)

12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.**

The property is located adjacent to U.S. Highway 97A (parcel no. 272303430050) and east of Chelan, within Section 03, T 27N, R 23E.W.M.

B. Environmental Elements [HELP]

1. *Earth* [help]

a. **General description of the site:**

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _____

b. **What is the steepest slope on the site (approximate percent slope)?**

15 to 45 percent.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Parcel no. 272303430050 –

- Cashmont sandy loam (CcB), 3 to 8 percent slopes
- Cashmont gravelly sandy loam (CdD), 15 to 25 percent slopes
- Pogue find sandy loam (PoB), 3 to 8 percent slopes
- Pogue gravelly fine sandy loam (PrE), 25 to 45% slopes.
- There are no agricultural soils of long-term significance.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

No surface indications. The property is mapped as potentially having erosive soils.

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No filling or grading is proposed.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No clearing or construction is proposed.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There would be no new impervious surfaces as a result of this proposal.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

None proposed.

2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

There would be no new emissions to the air.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None proposed.

3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river

it flows into.

According to Washington Department of Natural Resources Forest Practices Application Mapping Tool (FPAMT), there is an "unknown" or "U" classified water body which runs through the subject property. Utilizing Google Earth historical imagery there is no indication of standing water or flow water present.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

No.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

None proposed.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe yje type of waste and anticipated volume of discharge.

No.

b. Ground Water: [help]

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if

applicable), or the number of animals or humans the system(s) are expected to serve.

None proposed.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

2) Could waste materials enter ground or surface waters? If so, generally describe.

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None proposed.

4. Plants [help]

Check the types of vegetation found on the site:

__x__deciduous tree: alder, maple, aspen, other
__x__evergreen tree: fir, cedar, pine, other
__x__shrubs
__x__grass
____pasture
____crop or grain
__x__ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None proposed.

c. List threatened and endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

None proposed.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals [help]

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Examples include:

birds: hawk, heron, eagle, songbirds, other:
mammals: deer, bear, elk, beaver, other:
fish: bass, salmon, trout, herring, shellfish, other _____

b. List any threatened and endangered species known to be on or near the site.

None known.

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

None proposed.

e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and Natural Resources [help]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. Environmental Health [help]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

1) Describe any known or possible contamination at the site from present or past uses.

None known.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None known.

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

N/A

4) Describe special emergency services that might be required.

None.

5) Proposed measures to reduce or control environmental health hazards, if any:

None proposed.

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A.

3) Proposed measures to reduce or control noise impacts, if any:

None proposed.

8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use on subject parcel is agricultural. Adjacent properties are in residential and agricultural use. The proposal will not affect current uses on nearby or adjacent properties.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No.

c. Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No.

d. Describe any structures on the site.

272303430050 - pole garage/bldg.

e. Will any structures be demolished? If so, what?

No.

f. What is the current zoning classification of the site?

272303430050 – RR 5 and RRID EAB

g. What is the current comprehensive plan designation of the site?

272303430050 – RR 5 and RRID EAB

h. If applicable, what is the current shoreline master program designation of the site?

N/A.

i. Has any part of the site been classified as a critical area by the city or county? If so, specify.

The Washington Department of Fish and Wildlife (WDFW) Priority Habitats and Species (PHS) online map resource indicates the subject parcel occurs within Chelan County Shrubsteppe habitat range.

j. Approximately how many people would reside or work in the completed project?

N/A

k. Approximately how many people would the completed project displace?

N/A.

l. Proposed measures to avoid or reduce displacement impacts, if any:

None.

m. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Application for a Comprehensive plan map amendment and zone change.

n. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None.

9. Housing [help]

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or lowincome housing.

None.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None.

c. Proposed measures to reduce or control housing impacts, if any:

None.

10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A.

b. What views in the immediate vicinity would be altered or obstructed?

N/A.

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A.

11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

N/A.

b. Could light or glare from the finished project be a safety hazard or interfere with views?

N/A.

c. What existing off-site sources of light or glare may affect your proposal?

None.

d. Proposed measures to reduce or control light and glare impacts, if any:

None.

12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Informal recreational opportunities in the immediate vicinity include watersports, fishing, hiking, camping, snowmobiling and hunting.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None.

13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

No.

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

No.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The tribes and DAHP will be notified during the county public notice period.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

None proposed.

14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Parcel no. 272303430050 is accessed from U.S. Highway 97A-borders the property on the north.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Yes. Link Transit serves Chelan.

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

N/A.

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

No.

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

N/A.

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

h. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any.

None proposed.

16. Utilities [help]

1) Circle utilities currently available at the site:
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

a. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

None proposed.

C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Hawkins Gebbers (Feb 17, 2026 12:17:23 PST)

Name of signee Hawkins Gebbers

Position and Agency/Organization Owner, manager

Date Submitted: 02/17/2026

D. Supplemental sheet for nonproject actions [HELP]

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

The proposal would not be likely to increase emissions to air or production of noise. Although the rezoning of the property may lead to its development which could impact air and noise emissions, the current zoning of the property would likewise permit its development thus there would be no increases resulting from the proposal.

The proposal would not include any discharges to water of toxic or hazardous substances of any kind. Because discharges to water are not proposed and toxic or hazardous substances are not part of the proposal, the proposal would not cause an increase in discharge to water or production, storage or release of toxic or hazardous substances.

Proposed measures to avoid or reduce such increases are:

Since no increases are anticipated, no measures to avoid or reduce them are proposed.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

The proposal does not include any components that would be likely to affect plants, animal, fish or marine life. Since the proposal is simply to change the comprehensive plan map and zoning designation, there would be no impact to the above mentioned resources.

Proposed measures to protect or conserve plants, animals, fish, or marine life are:

The proposal would be in compliance with all local, state and federal regulations regarding the above mentioned resources. Compliance with all applicable regulations would satisfactorily protect and conserve them.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not use any energy or natural resources thus it would not deplete them.

Proposed measures to protect or conserve energy and natural resources are:

Since there would be no impacts to energy or natural resources, no measures to protect or conserve them are proposed.

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic cultural sites, wetlands, floodplains, or prime farmlands?**

The proposal would not be likely to use or affect environmentally sensitive areas or areas designated for governmental protection because none are present on the property.

Proposed measures to protect such resources or to avoid or reduce impacts are:

Since there would be no impact to such resources, no measures to protect them are proposed.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

The proposal would be likely to affect land use by changing the zoning map designation. Such a change would not be incompatible with existing plans since the property is adjacent to existing property with the same zoning designation. The proposal would not affect shoreline use since it is not adjacent to a shoreline.

Proposed measures to avoid or reduce shoreline and land use impacts are:

Since there would be no negative impact to shoreline and/or land use, no measures are proposed to avoid or reduce them.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

The proposal would not be likely to increase demands on transportation or public services and utilities.

Proposed measures to reduce or respond to such demand(s) are:

Since there would be no increased demands on transportation or public services and utilities, no measures are proposed to reduce such demands.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal would not conflict with local, state or federal laws regarding the protection of the environment.

TO: Chelan County Board of County Commissioners
FROM: Chelan County Community Development
HEARING DATE: November 10, 2026
FILE NUMBER: CPA 26-054 Hellickson

RECOMMENDED MOTION

The Chelan County Planning Commission, at their duly advertised public hearing on September 23, 2026 made a motion to recommend approval (Attachment 1) of CPA 26-054 Hellickson requested comprehensive plan map amendment from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). However, the motion failed to pass and as no alternative motion being made, the application is moving forward without a formal recommendation from the Planning Commission.

GENERAL INFORMATION

Applicant	Michael Hellickson
Planning Commission Notice of Hearing Published	October 3, 2026
Planning Commission Hearing	October 14, 2026
Board of County Commissioners Hearing	November 10, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance was issued under WAC 107-11-340 on April 30, 2026. The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The decision was made after a review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

In comments dated March 12, 2026, the Chelan Douglas Health District indicated they have no objections to approval of the proposal.

Chelan County Fire Marshal's office indicated no comments on the proposal.

The Washington State Department of Commerce recommends denying the application due to its violation of GMA rules which state that in order to de-designate resource lands a

comprehensive evaluation of all lands in this designation should be conducted and not on a case by case basis.

Public Comment:
A number of public comments have been received from neighboring property owners whose concerns have been summarized below. The full text of these comments can be found in Attachment 2.

Johnson, Brooke – Opposes proposal, concerned that smaller lots and increased density would occur affecting property values, due to change in the rural feel of the area. Stevens Canyon served by limited road infrastructure and water availability and septic capacity also concerns.

Harris, Sheila – Concerns regarding the potential approval address the private road with no recorded road maintenance agreement serving the area, increase in traffic with additional possible development. Water availability is also a concern. Safety concerns regarding wildfire and access into and out of the area.

Fishburne, John – No objection to approval of application, however has concerns regarding availability of water for domestic use and fire control.

Koblenz, Brian and Lisa – Opposes approval of the application due to the potential increase in development which would be a detriment to the community.

Johnson, Gavin – Opposes project, wants a Determination of Significance issued or at least a wildlife survey that the WDFW has had an opportunity to review and comment. Would like to see the applicant be required to demonstrate the need for the proposed designation in light of current housing inventory.

Larson, Ron – Expressed concerns regarding the possibility of future development on the property.

60-Day Notice
Sent to Department of Commerce July 20, 2026.

PROJECT DESCRIPTION – CPA 26-054 Hellickson
The applicant is requesting a comprehensive plan map amendment to change the designation of the 22-acre property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). The property is developed with one single family residence taking access off Stevens Canyon Road, a private road serving additional single-family residences to the north and south as well as the preliminarily approved 5-lot rural cluster subdivision adjacent to the west. The site is also known as parcel number 25-18-32-330-200.

COMPREHENSIVE PLAN

Chelan County conducts an annual review of development regulation text amendments for compliance with the adopted Comprehensive Plan. The Comprehensive Plan represents the long-term vision for future land uses and development. For the county-initiated text amendments, the merits of the requested change must be demonstrated as being consistent with adopted goals and policies.

The following Comprehensive Plan goals and policies are relevant to the proposal:

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Policy RE 2.2: Rural development should not preclude use of rural lands for agriculture and timber production and should avoid or mitigate impacts on existing agriculture or timber operations.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

Goal FL 1: Conserve forest lands of long-term commercial significance. Encourage sustainable timber production in rural and resource lands as a viable, permanent land use and a significant economic activity within the community.

Policy FL 1.2: Promote multiple uses of forest resource lands where such uses do not eliminate or limit commercial forest resource management.

Policy FL 1.4: Classify and designate forest resource lands based on the criteria and procedures established in WAC 365-190-040, and 060 with special consideration given to the determination of whether forest resource lands considered for designation are viable as long term commercial significant
forest resource lands.

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Policy RE 2.2: Rural development should not preclude use of rural lands for agriculture and timber production and should avoid or mitigate impacts on existing agriculture or timber operations.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

GOAL AL 1: Support the viability of agriculture and encourage the continued use of rural and resource lands for agriculturally related land uses.

REVIEW CRITERIA

The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 2) Reduce Sprawl, 3) Transportation, 4) Housing, and 8) Natural Resources. The Growth Management Act (GMA) encourages the provision of a variety of densities in order to accommodate projected growth while maintaining the rural character. The GMA also encourages the retention of commercial resource designated lands.

The requested map amendment to RR10 would provide for the site to be divided into one additional lot. The Chelan County Comprehensive Plan locational guidelines for the RR10 designation include "Natural Resources. The area may have agricultural or forest land practice of both small scale and/or commercial significance. The area may also be adjacent to designated resource lands". Properties bordering the site to the north and east are also designated Commercial Forest (FC).

Conclusion: The proposal would not be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies as it would result in the removal of important resource lands.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area, however, it would also result in the reduction of natural resource lands.

Conclusion: The proposal would not be consistent with the GMA goals and with County-wide Planning Policies regarding the protection and preservation of resource lands.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the purpose of the RR10 designation is "To allow for rural development, forestry and agricultural uses consistent with the rural character and rural development provisions outlined in the goals and policies of the comprehensive plan. These areas can function as areas of transition between resource lands and areas of more intense rural or urban development. These areas also provide opportunities for protecting sensitive environmental areas and creating open space typical of a rural setting." Properties adjacent to the west and south of the subject parcel are designated and zoned RR10, however, the property is adjacent to FC designated property to the north and east.

Conclusion: The amendment would comply with comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel has frontage along Stevens Canyon Road, a private road serving properties both northeast and southwest of the subject property.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are either zoned FC (north and east) or RR10 (west and south). There are a number of 1.5 acre lots to the south of the subject property developed with single family residences.

Conclusion: The designation of the site from FC to RR10 has the potential would not adversely affect the surrounding area.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The RR10 designation is considered compatible with small-scale forestry operations if the property owner wishes to conduct such activities on the parcel.

Conclusion: The amendment would not adversely affect resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to potentially develop one additional lot, however it could impact commercial forest practices.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities, however a number of neighboring residents submitted comments regarding concerns for the potential additional traffic on the public and private road system serving the neighborhood. Concerns were also raised regarding the availability of potable water for additional users and the potential impact to wildlife.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026, pursuant to RCW 36.70A.106.
6. The location and characteristics are not consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 2.5 as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would not be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would not comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would adversely affect the surrounding land uses.
4. The amendment would adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are not consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

2026 Comprehensive Plan Map Amendment
Staff Report

TO:	Chelan County Planning Commission
FROM:	Chelan County Community Development
HEARING DATE:	October 14, 2026
FILE NUMBER:	CPA 26-054 Hellickson

RECOMMENDED MOTION

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

A. Re-designation of the site from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10) would not comply with applicable Chelan County goals and policies pursuant to the findings of fact and conclusions of law cited below.

GENERAL INFORMATION

Planning Commission Workshop	August 26, 2026
Notice of Application to Surrounding Properties	March 4, 2026
Planning Commission Notice of Hearing Published	October 3, 2026
Planning Commission Hearing on	October 14, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance (DNS) was issued under WAC 197-11-340(2) for CPA 26-026 on April 30, 2026 (Attachment 1). The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030 (2)(c). The decision was made after review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

In comments dated March 12, 2026, the Chelan Douglas Health District indicated they have no objections to approval of the proposal. (Attachment 2)

Chelan County Fire Marshal's office indicated no comments on the proposal.

The Washington State Department of Commerce recommends denying the application due to its violation of GMA rules which state that in order to de-designate resource lands a comprehensive evaluation of all lands in this designation should be conducted and not on a case by case basis.

Public Comments:

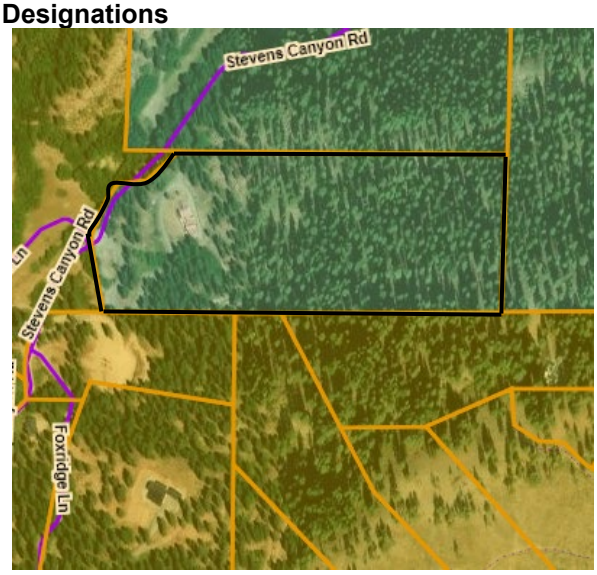
A number of public comments have been received from neighboring property owners whose concerns have been summarized below. The full text of these comments can be found in Attachment 2.

Johnson, Brooke – Opposes proposal, concerned that smaller lots and increased density would occur affecting property values, due to change in the rural feel of the area. Stevens Canyon served by limited road infrastructure and water availability and septic capacity also concerns.

Harris, Sheila – Concerns regarding the potential approval address the private road with no recorded road maintenance agreement serving the area, increase in traffic with additional possible development. Water availability is also a concern. Safety concerns regarding wildfire and access into and out of the area.

Fishburne, John – No objection to approval of application, however has concerns regarding availability of water for domestic use and fire control.

Koblenz, Brian and Lisa – Opposes approval of the application due to the potential increase in development which would be a detriment to the community.



Johnson, Gavin – Opposes project, wants a Determination of Significance issued or at least a wildlife survey that the WDFW has had an opportunity to review and comment. Would like to see the applicant be required to demonstrate the need for the proposed designation in light of current housing inventory.

Larson, Ron – Expressed concerns regarding the possibility of future development on the property.

PROJECT DESCRIPTION – CPA 26-054 Hellickson

Proposal: The applicant is requesting a comprehensive plan map amendment to change the designation of the 22-acre property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). The property is developed with one single family residence taking access off Stevens Canyon Road, a private road serving additional single-family residences to the north and south as well as the preliminarily approved 5-lot rural cluster subdivision adjacent to the west. The site is also known as parcel number 25-18-32-330-200.

Chelan County Land Use Designations

Density: The existing Commercial Forest (FC) zoning allows one dwelling unit per twenty acres. The proposed designation of Rural Residential/Resource 10 (RR10) would allow one dwelling unit per 10 acres,

which if approved, could result in at least one additional lot. The proposal would also remove the commercial forest designation which is considered a resource designation.

Comprehensive Plan
Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan policies are relevant to the proposed request:

> **Goal LU 1:** Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.
>
> **Goal RE 2:** Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.
>
> **Policy RE 2.2:** Rural development should not preclude use of rural lands for agriculture and timber production and should avoid or mitigate impacts on existing agriculture or timber operations.
>
> **Goal H 1:** Encourage the availability of affordable housing to all economic segments of the population of the county.
>
> **Goal H 2:** Promote a variety of residential densities and housing types.
>
> **Goal FL 1**: Conserve forest lands of long term commercial significance. Encourage sustainable timber production in rural and resource lands as a viable, permanent land use and a significant economic activity within the community.
>
> **Policy FL 1.2**: Promote multiple uses of forest resource lands where such uses do not eliminate or limit commercial forest resource management.
>
> **Policy FL 1.4:** Classify and designate forest resource lands based on the criteria and procedures established in WAC 365-190-040, and 060 with special consideration given to the determination of whether forest resource lands considered for designation are viable as long term commercial significant
> forest resource lands.

Review Criteria
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 2) Reduce Sprawl, 3) Transportation, 4) Housing, and 8) Natural Resources. The Growth Management Act (GMA) encourages the provision of a variety of densities

in order to accommodate projected growth while maintaining the rural character. The GMA also encourages the retention of commercial resource designated lands.

The requested map amendment to RR10 would provide for the site to be divided into one additional lot. The Chelan County Comprehensive Plan locational guidelines for the RR10 designation include "Natural Resources. The area may have agricultural or forest land practice of both small scale and/or commercial significance. The area may also be adjacent to designated resource lands". Properties bordering the site to the north and east are also designated Commercial Forest (FC).

Conclusion: The proposal would not be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies as it would result in the removal of important resource lands.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area, however, it would also result in the reduction of natural resource lands.

Conclusion: The proposal would not be consistent with the GMA goals and with County-wide Planning Policies regarding the protection and preservation of resource lands.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the purpose of the RR10 designation is "To allow for rural development, forestry and agricultural uses consistent with the rural character and rural development provisions outlined in the goals and policies of the comprehensive plan. These areas can function as areas of transition between resource lands and areas of more intense rural or urban development. These areas also provide opportunities for protecting sensitive environmental areas and creating open space typical of a rural setting." Properties adjacent to the west and south of the subject parcel are designated and zoned RR10, however, the property is adjacent to FC designated property to the north and east.

Conclusion: The amendment would comply with comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel has frontage along Stevens Canyon Road, a private road serving properties both northeast and southwest of the subject property.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are either zoned FC (north and east) or RR10 (west and south). There are a number of 1.5 acre lots to the south of the subject property developed with single family residences.

Conclusion: The designation of the site from FC to RR10 has the potential would not adversely affect the surrounding area.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The RR10 designation is considered compatible with small-scale forestry operations if the property owner wishes to conduct such activities on the parcel.

Conclusion: The amendment would not adversely affect resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to potentially develop one additional lot, however it could impact commercial forest practices.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities, however a number of neighboring residents submitted comments regarding concerns for the potential additional traffic on the public and private road system serving the neighborhood. Concerns were also raised regarding the availability of potable water for additional users and the potential impact to wildlife.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026, (Attachment 3), pursuant to RCW 36.70A.106.
6. The location and characteristics of the site which is the subject this request for a Comprehensive Plan Map Amendment are consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 10 (RR10) as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

STAFF Finding

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendment to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

The Comprehensive Plan Amendment to change the subject property's land use designation from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10), given file number CPA 2026-054, based upon the findings of fact and conclusions of law contained would not comply with relevant adopted county goals and policies.

SEPA NOTICE ISSUANCE OF DETERMINATION OF NON-SIGNIFICANCE (DNS)

Project Description: An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10).

File Number:	CPA 26-054
Parcel Numbers:	25-18-32-330-200
Site Address:	10705 Fox Rd. Leavenworth, WA 98826
Owner:	Michael Hellickson, PO Box 7617, Bonney Lake, WA 98391
Agent:	Ryan Walker, Pacific Engineering and Design, 200 S. Columbia St Ste 300 Wenatchee, WA 98801
Lead Agency:	CHELAN COUNTY

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public upon request.

This Determination of Non-Significance is issued under WAC 197-11-340, DNS. The lead agency will not act on this proposal for fourteen (14) days from the date of publication. Comments must be submitted by May 14, 2026 for consideration.

Susan,

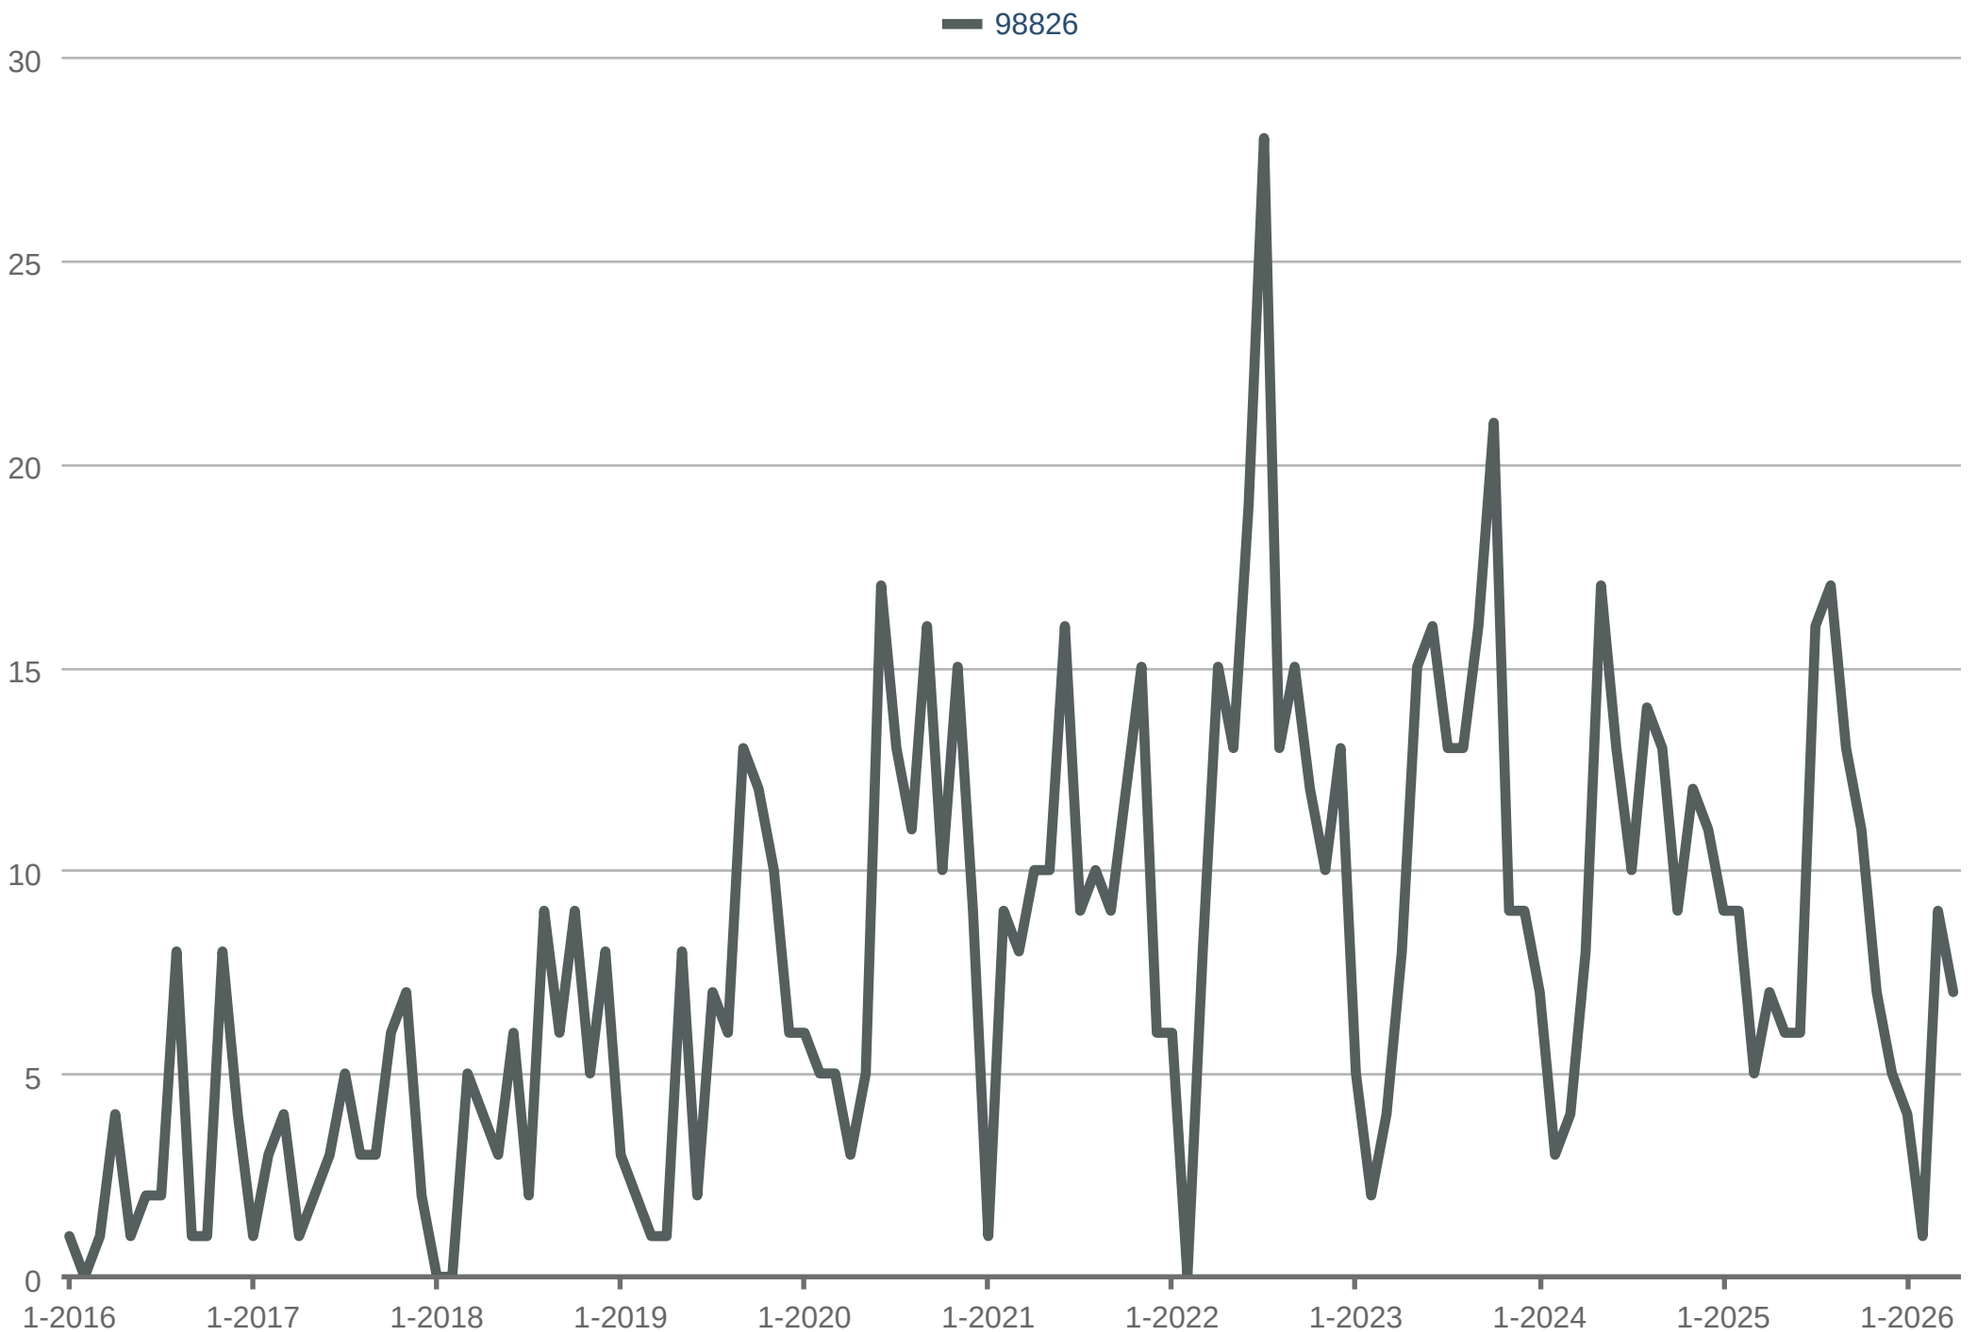
I am writing on behalf of my wife and I who are neighbors of the applicant and have owned our property for more than 20 years.

We appreciate that you "ENCOURAGE PUBLIC COMMENT" (emphasis yours), but the placement of the sign for the proposed land use action is such that we are the only full-time residents who would see it. Of the remaining three owners who live north and east of the applicant, only one will drive by that sign between the time it is posted and the end of the public comment and no other people have rights to that private road. Those neighbors most impacted live south and west of the applicant and are unlikely to be aware of the application. I have taken the liberty of communicating the link to the Land Use Action application to some of those most impacted.

When we made our purchase decision, our property and all of the properties around it (including the applicants) were zoned FC which carries a 20 acre minimum for development. We were happy to know that our privacy would be respected and the housing density would be minimized through this wildlife corridor. Unfortunately, through various mechanisms, a number of the properties south and west of the applicant have been rezoned to smaller minimum lot sizes and each of them has since had additional houses built with future plans for even more construction.

The applicant states that he has "no plans for future activity connected to this proposal", but the applicant is a real estate professional and it would be disingenuous to believe that an RR-10 zoning will not lead to additional development. Otherwise, the applicant should be satisfied with creating an RR-20 designation of which we are fully supportive. The applicant already has the right to build an additional ADU to their property; rezoning RR-10 paves the way to two houses and two ADUs. We certainly understand how the rezoning benefits the applicant, but we see it only as a detriment to the community.

It would be unfortunate if the county treats the technique of leveraging FC zoning as an effective trojan horse strategy to facilitate updating the zoning to RR-10.



Sincerely,
Brian and Lisa Koblenz

Susan,

I'm writing on behalf of my wife and myself, current owners of 25 Foxridge Ln. It's come to my attention via multiple neighbors that Mr. Hellickson is attempting to rezone his property to increase density up Stevens Canyon. We firmly stand against this proposal, and stand with our neighbors' opinions that more density is not the answer. Ski Hill has been rezoned to higher density allowance, hundreds of apartments have been built in the last decade, and demand is not what it used to be. I own a real estate brokerage with an office downtown Leavenworth, so I'm personally aware of the trends, and demand is low, much lower than it was a few years ago.

He may claim to have "no future plans," but heed with caution. This is a man who lost his entire brokerage's license in 2011 due to MANY unethical practices. His actions and intentions are unaligned. What he's proposing is not necessary and will only burden everyone else involved. I hope the county listens and can prove to the people it serves that money is not the only factor that drives county policy/preservation. I look forward to a thoughtful investigation into this matter. Thank you for your time and consideration.

Best,

Gavin & Brooke Johnson

Dear Susan Dretke,

I am writing to submit formal public comment in opposition to the proposed change in land use designation for Mr. Hellickson's parcel in Leavenworth from Commerical Forest Land to Rural Residential 10 (RR10). I am a resident of the area and a real estate broker actively working in the Leavenworth market, and I have substantive concerns regarding both the environmental implications of this proposal and the demonstrated need that would justify it under the Growth Management Act.

I. Lack of Demonstrated Need

Washington's Growth Management Act requires that changes to land use designations and any expansion of development capacity be supported by a documented, demonstrated need based on current population and market conditions. The current data for the Leavenworth market (ZIP 98826) does not support an argument that additional rural residential capacity is needed. According to Northwest Multiple Listing Service data pulled May 5, 2026:

• Months Supply of Inventory currently sits at approximately 12 months — among the highest readings recorded over the past decade and roughly double what is generally considered a balanced market (4–6 months). The only comparable readings in the past ten years occurred in late 2025, indicating a sustained oversupply rather than a short-term anomaly.

• Closed sales activity has fallen to a range of approximately 1–9 transactions per month in recent months, well below the 13–21 monthly closings typical of 2020 through 2024. Recent activity is at or near the lowest levels observed since 2018.

In parallel, the Leavenworth area has very recently absorbed significant new housing capacity that has not yet worked through the market, including 368 newly constructed and available apartment units near town (with over 200 units still available for rent) and a rezone to RL-8 throughout all of lower Ski Hill that has been rezoned for residential subdivision into a substantial number of additional future homes. Together, these developments represent a meaningful pipeline of new supply already entitled and, in some cases, already delivered.

Given these conditions: historically high inventory, sharply reduced sales velocity, and a sizable pipeline of recently approved and recently delivered units; there is no defensible market basis for further expanding rural residential development capacity at this time. Adding capacity in a market already showing clear signs of oversupply does not advance the GMA's purposes; it works against them.

II. Environmental and Wildlife Concerns

The parcel in question lies within the Stevens Canyon corridor, which functions as an important wildlife migration and habitat area. I have been in contact with the Washington Department of Fish and Wildlife regarding this proposal. WDFW has reviewed the parcel and indicated that it has concerns about the proposal due to the presence of important wildlife resources and habitat in the area, including documented or potential occurrence of golden eagle, northern spotted owl, and sharp-tailed snake. WDFW has further indicated that a thorough wildlife survey will likely be needed to determine whether these species are present and that they look forward to a detailed review should the project advance to the Notice of Application and Environmental Review stage.

Notably, WDFW stated that this proposal is the first they have seen of it, which they noted is consistent with the County's typical practice of soliciting agency comment after the threshold determination has been made. I would respectfully request that the County engage WDFW substantively before issuing any threshold determination on this proposal, given the species and habitat concerns identified, rather than after the fact. Reliance on a Determination of Nonsignificance in the absence of a wildlife survey, when a state resource agency has already flagged species-level concerns, would not appear to satisfy SEPA's requirement that the County consider all reasonably available environmental information.

III. Cumulative Impacts

I would also ask that the County consider the cumulative impact of this proposal in combination with the apartment construction, the recent rezoning of lower Ski Hill, and other recently approved development in the Leavenworth area. SEPA requires consideration of cumulative effects, and reviewing this rezone in isolation, particularly when its stated justification is general future development potential rather than a specific project, risks understating its true contribution to habitat fragmentation and pressure on the Stevens Canyon corridor.

IV. Request

For the reasons above, I respectfully request that the County:

1. Issue a Determination of Significance, or at minimum decline to issue a Determination of Nonsignificance, until a wildlife survey has been completed and WDFW has had the opportunity to formally review and comment;
2. Require the applicant to demonstrate need for the proposed designation change consistent with GMA requirements, in light of current inventory, sales, and pipeline data for the Leavenworth market; and
3. Deny the proposed change from AC to RR10 absent a clear showing of both demonstrated need and adequate environmental review.

Thank you for your time and for the opportunity to comment. I have provided the underlying NWMLS data referenced above, and am happy to discuss any of these points further. Please confirm receipt of this comment for the record.

Respectfully,

Gavin Johnson

Re: Proposed application for a Comprehensive Plan Map Amendment, file No. CPA 26-054

Comment:

In regards to the application for the proposed Comprehensive Plan Map Amendment, I don't find any objection, but my concern is that within the consideration of said amendment, Chelan County and the Chelan/Douglas County Health Department require proof of adequate domestic water volume for the maximum number of potential living structures without impacting the water table for wells below, and for a minimum of water in reserve for fire control. The area proposed is dense forest and on mountain hillside and the road for fire equipment access is difficult.

Thank you for the opportunity to comment on this application.

Respectfully submitted,

John W. Fishburne

Re Notice of Application File # CPA 26-05, Michael Hellickson

We have questions and comments regarding the above Notice of Application .

This property is accessed by a private road that has no recorded Road Maintenance Agreement. Access is important to us as we live at the bottom of the road, and it runs through our immediate property. Changing the land use designation leads us to speculate that this adjustment would allow for more homes and ADUs. The applicant has told me in our initial introduction that he would like to build homes for his children. How many homes may be accessed off a private road before being required to bring it up to County standards? We are concerned that any further widening through our property will cause the embankment to slough and avalanche our house below.

The road already has 2 STRs which leads to an increase in traffic through our easement of up to 8 cars per day. Another major concern is ongoing construction. We have had up to 16 dumptrucks per day pass through, along with concrete, heavy equipment, and contractor vehicles—all within 40 feet of our home. Little did we know how intense the usage would be when we purchased our parcel. In addition, as there is no maintenance agreement, dust is unmitigated.

Water is a major concern of the entire neighborhood. Our property has 4 wells, serving 16 homes or lots. These wells have run dry in the past, from overuse up the canyon, and when there were fewer users than now. What measures has the County put in place to protect existing wells and users? What health measures are in place to ensure increasing density above community wells will keep runoff of septic drainfields from funneling to our shared aquifer?

In addition, this is a Wildland Urban Interface with no County Fire support required on the private road. It has only one egress route, unless a neighboring driveway is used. Fox Road has only one ingress/egress route with more than 40 homes existing already. There are places on Fox Road where only one car at a time may pass.

The existing fire hydrants on Fox Road are supported by the well system in our property. Without adequate water, the neighborhood fire risk increases.

Of course, we cannot speculate on the applicant's intentions, but the County can parse out the ultimate development goals of any application, as part of comprehensive planning. It's up to the County to protect the existing residential quality of life by addressing increasing density and decreasing resources, before they become problems.

We appreciate being notified of the application notice by mail. We received it March 10. Thank you for noting our comments and questions.

Best regards,

Sheila Harris and Alan Chilcoat

Dear Susan,

My name is Brooke Johnson, and I am a property owner at 25 Foxridge Lane. I'm writing to express my opposition to the proposed rezoning request submitted by Mr. Hellickson for property located up Stevens Canyon.

Like many of my neighbors, my family chose to purchase property in this area because of the existing zoning and the larger lot sizes that provide space, privacy, and a lower-density rural character. We paid a premium for that setting and for the "elbow room" that properties in this area currently offer.

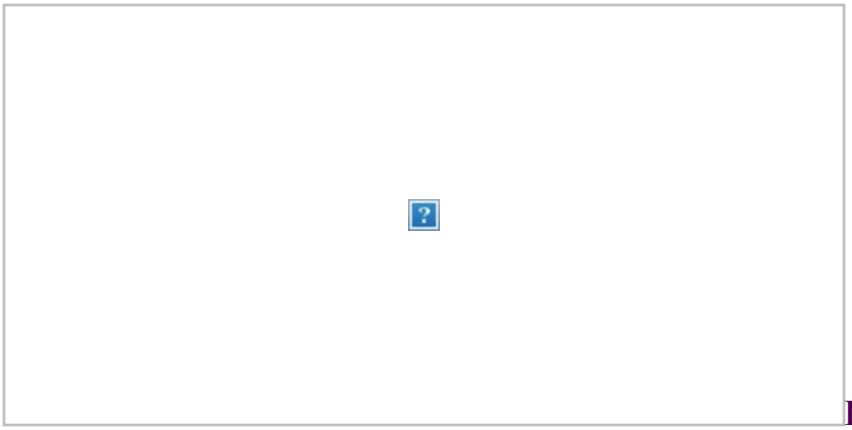
If the zoning is changed to allow for significantly smaller lots and increased density, it fundamentally alters the expectations that current property owners relied upon when making what is often the largest investment of their lives. One of the defining attributes of Stevens Canyon properties is the space and rural feel created by larger lot sizes. If those conditions change, it diminishes a key factor that supports our property values. Being unable to sell our property in the future with those same qualities would place existing homeowners at a clear disadvantage.

There are also practical concerns that come with increasing density in this area. Stevens Canyon is served by limited road infrastructure, and additional development would increase traffic on roads that were not designed for higher volumes. In the event of wildfire, which is a real and ongoing concern in our region, evacuation safety and emergency access should be carefully considered before allowing additional density.

Water availability and septic capacity are also important considerations in rural areas like ours. Increased density could place additional strain on systems that were originally planned for much lower levels of development.

I also encourage the county to carefully evaluate the long-term intentions behind this rezoning request. While it may be stated that there are no immediate development plans, zoning changes often shape what becomes possible in the future. Because of the significant and lasting impacts that increased density could have on Stevens Canyon, I believe it is important for the county to proceed with caution and fully consider how this change could affect existing residents and the broader community over time.

Finally, approving a rezoning like this could set a precedent for similar requests in the future, which could gradually transform the character of Stevens Canyon in ways that current residents never anticipated when they chose to live here.



For these reasons, I respectfully ask that the county carefully consider the long-term impacts

this rezoning could have on existing residents, infrastructure, property values, and the rural character of this area before making any decision.

Thank you for your time and for considering the perspectives of local residents.

Sincerely,
Brooke Johnson

From: Richmond Petty, REHS

Date: 03/12/26

RE: Hellickson (CPA 26-054) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). The subject property is located at 10705 Fox Rd., Leavenworth, WA 98826 (county tax parcel: 251832330200)

As proposed, I have no objections to further approval of this project.

- Active Septic Repair permit issued (OSS-REPAIR-25-0055) and private water review approved in 2006 for well (APG157).

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

Hello Susan,
I need help understanding this rezone request. The notice indicates the proposal is to change the zoning for this Parcel to Rural Residential/Resource 10 from Commercial Forest. There is currently a large residence on this property. Is this proposal just to make the zoning consistent with the facts on the ground or is this laying the groundwork for future subdivision? I suspect I'm missing something. Please clarify. We own the residence on 10412 Fox Rd and are interested in any potential impacts to traffic.
Thanks!
Ron Larson

Subject: Additional comment period for a SEPA Determination regarding CPA 26-054- Hellickson - Chelan County Dept. of Community Development
Attachments: CPA 26-054 - Hellickson - SEPA - DNS.pdf

Good afternoon,

Please see the attached SEPA Determination of Non-significance regarding Michael Hellickson's application, File# CPA 26-054. This is a notification of a decision that was made regarding the application. The comment period ends on May 14, 2026.

If you have any questions pertaining to this application please feel free to contact the Chelan County Planner associated with this file, Susan Dretke, at 509-667-6225 or susan.dretke@co.chelan.wa.us.

Have a great week!

Cheers,

Ashley Fernandez
Noticing Clerk

Subject: Notice of Application for CPA 26-054 Hellickson - Chelan County Dept. of Community Development
Attachments: CPA 26-054 NOA.pdf; CPA 26-054 - Affidavit of posting.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Michael Hellickson's property, File# CPA 26-054. This notice should be posted on the *subject property by March 5th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days,* starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.

Thank you,

Jessica Thompson

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-041 Campbell - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5). 24 Hugo Road, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-330-175.

CPA 26-048 HMJD Collins, LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-430-050.

CPA 26-054 Hellickson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). Unassigned, Chelan. WA 98816 also identified as Assessor's Parcel No.: 25-18-32-330-200.

CPA 26-060 McMahon - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). 7948 East Leavenworth Rd., Leavenworth, WA 98826 also identified as Assessor's Parcel No.: 24-17-23-510-480.

On March 5, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 19, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Date Submitted:	2/24/26
Date Complete:	2/25/26

Upon Initial Review, The Above Referenced Application is Found To Be: COMPLETE

The required components of an application are present and are judged by the review authority to be technically accurate and contain sufficient information necessary to allow the processing of the application. All submittal fees have been paid.

Your application has been determined to be complete as of the date of this letter. Pursuant to Chelan County Code Section 14.08.030(5), a Determination of Completeness shall not preclude the department for requesting additional information or studies if the need for more information becomes apparent during processing of the proposed development.

LEGAL DESCRIPTION

EXHIBIT "A"

The South half of the Southwest quarter of the Southwest quarter of Section 32, Township 25 North, Range 18, E.W.M., Chelan County, Washington,

EXCEPT that portion described as follows:

Beginning at the Northwest corner of said South half; thence South 89°48'06" East 195.08 feet, along the North line thereof; thence South 37°44'20" West 180.06 feet; thence South 47°53'02" West 113.79 feet; thence along a curve to the left with a radius of 300.00 feet, a length of 13.77 feet to a point on the West line of said South half; thence North 2°23'12" East 229,05 feet to the Point of Beginning,

TOGETHER WITH that portion of the Southeast quarter of Section 31, Township 25 North, Range 18, E.W.M., described as follows:

Beginning at the Southeast corner of said Southeast quarter; thence South 89°48'10" West 50,00 feet, along the South line of said Southeast quarter; thence North 10°57'22" West 259.24 feet; thence along a non-tangent curve to the left with a radius of 100.00 feet, a length 82.60 feet the chord bearing North 34°05'06" East 62.90 feet; thence North 15°45'17" East 20.48 feet; thence along a curve to the right with a radius of 300.00 feet a length of 154.46 feet to the East line of said Southeast quarter; thence South 2°23'12" West 458.16 feet to the Point of Beginning.

SEPA[1] Environmental Checklist

RECEIVED
FEB 24 2026
CHELAN COUNTY
Community Development

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

[1] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/Checklist-guidance

A.Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**

   Hellickson Comprehensive Plan Map Amendment and Rezone

2. **Name of applicant:**

   Michael Hellickson

3. **Address and phone number of applicant and contact person:**

   Michael Hellickson (Applicant)
   PO Box 7617
   Bonney Lake, WA 98391
   206-300-6453
   michael@hellickson.com

   Ryan Walker (Agent)
   Pacific Engineering and Design, PLLC
   200 South Columbia St, Suite 300
   Wenatchee, WA 98801
   5409-630-7917
   ryanw@pacificengineering.net

4. **Date checklist prepared:**

   February 2026

5. **Agency requesting checklist:**

   Chelan County

6. **Proposed timing of schedule (including phasing, if applicable):**

   The application will follow the Chelan County process for Comprehensive Plan Map Amendments.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   No.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   None.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

   No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

    Comprehensive Plan Map Amendment and Zoning Map Amendment.

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 22.0 acres from Commercial Forest (FC) to Rural Residential/Resource 10 (RR 10). The property is located at 10705 Fox Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 39.

The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential use. The adjacent properties to the west and south are zoned RR 10, which is the zone that the subject property is proposed to be changed to. Further, the property to the west has been approved for a cluster subdivision with lot sizes less than one acre.

Chelan County's land-use history includes longstanding patterns of rural residential living, small-scale agriculture, and mixed rural uses - not just forest production. Rural residential use is already occurring on the subject property and nearby. Changing from FC to RR10 is consistent with these established patterns when the land is no longer primarily suited for long-term commercial forest production and instead better matches rural residential use. The economic vitality of commercial forestry has decreased, most significantly on small parcels where the scale of merchantable timber costs more to harvest than it produces in revenue.

Because RR 10 is part of the Rural Residential/Resource zoning designations, it fits within the GMA's requirement to maintain rural character while still accommodating:

- Rural housing needs (1 unit per 10 acres),
- Low-density development compatible with natural landscapes, and
- Land uses that do not require full urban services.

Thus, rezoning to RR10 is consistent with the Comprehensive Plan's rural element.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 10705 Fox Road, Leavenworth, WA, within Section 32, T 25N, R 18E.W.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**

~60%

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Soil mapped for the property on the USGS soil survey website (https://websoilsurvey.nrcs.usda.gov) is Cle Elum loam, 30 to 60 percent slopes (80) which is listed as not prime farmland.

None of the soil will be removed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

According to the Chelan County online GIS mapping tool, the subject property contains erosive soils, but does not contain known geologically hazardous areas of landslide potential.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**

No filling, excavation or grading is proposed.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**

No.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There will be no change in impervious surfaces.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

None.

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

None.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No.

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**

None.

3. Water

Find help answering water questions[5]

a. **Surface:**

Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

   The DNR stream typing map shows a type N stream but a stream typing has not been completed.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

   No.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

   None.

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air
[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

   No.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

   No.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

   No.

b. **Ground:**
Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No.

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   No waste material will be discharged.

c. **Water Runoff (including stormwater):**

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   There will be no change in stormwater runoff.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None.

4. Plants

Find help answering plants questions

a. Check the types of vegetation found on the site:

☒ **deciduous tree: alder, maple, aspen, other**

☒ **evergreen tree: fir, cedar, pine, other**

☒ **shrubs**

☒ **grass**

☐ **pasture**

☐ **crop or grain**

☐ **orchards, vineyards, or other permanent crops.**

☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

☐ **water plants: water lily, eelgrass, milfoil, other**

☐ **other types of vegetation**

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened and endangered species known to be on or near the site.

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Showy Stickseed (*Hackelia venusta*) – Endangered
- Wenatchee Mountains Checkermallow (*Sidalcea oregana var. calva*) – Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site as no development is proposed.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include:

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. **List any threatened and endangered species known to be on or near the site.**

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Canada Lynx (*Lynx canadensis*) - Threatened
- Gray Wolf (*Canis lupus*) - Endangered
- North American Wolverine (*Gulo gulo luscus*) – Threatened
- Mt. Rainier White-tailed Ptarmigan (*Lagopus leucura rainierensis*) – Threatened
- Northern Spotted Owl (*Strix occidentalis caruina*) - Threatened
- Yellow-billed Cuckoo (*Coccyzus americanus*) -Threatened
- Bull Trout (*Salvelinus confluentus*) - Threatened
- Monarch Butterfly (*Danaus Plexippus*) – Proposed Threatened
- Suckley's Cuckoo Bumble Bee (*Bombus suckleyi*) – Proposed Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

c. **Is the site part of a migration route? If so, explain.**

No.

d. **Proposed measures to preserve or enhance wildlife, if any.**

None.

e. **List any invasive animal species known to be on or near the site.**

None known.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

   The plan amendment does not have energy needs.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

   No.

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

   None.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

   No.

   1. **Describe any known or possible contamination at the site from present or past uses.**

      None known.

   2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

      None known.

   3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

      None known.

   4. **Describe special emergency services that might be required.**

      None known.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   None.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   The comprehensive plan map amendment will not generate noise.

3. **Proposed measures to reduce or control noise impacts, if any:**

   None.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

   The subject property is currently used for residential purposes. Although it is zoned Commercial Forest (FC), rural residential use is already occurring on the site.

   Adjacent properties to the west and south are zoned Rural Residential/Resource 10 (RR10) and are developed or planned for residential use. The property to the west has been approved for a cluster subdivision with lot sizes less than one acre. The adjacent property to the north is used for residential purposes, while the property to the east is undeveloped.

   The surrounding parcels reflect the current residential land use of the Project Site and surrounding area, rather than active commercial forestry. Given that rural residential use is already occurring on the subject property and on adjacent lands, the proposed rezone from FC to RR10 would align the zoning with existing land use patterns. The proposal would not introduce new urban or intensive commercial activities and will not adversely affect current land uses on nearby or adjacent properties.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

The site has not been used as working farm or forest land. The property is not in a forest land tax designation.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

   No.

c. Describe any structures on the site.

One (1) single-family residence is present on the Project Site.

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

Commercial Forest Lands (FC).

f. What is the current comprehensive plan designation of the site?

Commercial Forest Lands (FC).

g. If applicable, what is the current shoreline master program designation of the site?

N/A.

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Yes, the Project Site is mapped by the WDFW PHS online mapping tool as containing potential shrubsteppe habitat, common sharp-tailed snake (*Contia tenuis*), northern spotted owl (*Strix occidentalis*), and golden eagle (*Aquila chrysaetos*) habitat. All Priority habitats are considered critical areas by Chelan County Code (CCC) 11.78.010(2). A potential type N stream is mapped on the property. However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

i. Approximately how many people would reside or work in the completed project?

None.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

None proposed.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**

None proposed.

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None proposed.

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None proposed.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

No structures proposed.

b. **What views in the immediate vicinity would be altered or obstructed?**

No.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

None proposed.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

---

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing
[13] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics
[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

None.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

No.

c. **What existing off-site sources of light or glare may affect your proposal?**

None.

d. **Proposed measures to reduce or control light and glare impacts, if any:**

None proposed.

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?**

Hiking, bicycling, and horseback riding occur in the vicinity.

b. **Would the proposed project displace any existing recreational uses? If so, describe.**

No.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**

None proposed.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

No.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.**

According to the DAHP WISAARD online mapping tool, a GLO trail is located approximately 0.4 miles to the west of the subject parcel. No other GLO features are located within the project vicinity.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.**

The DAHP WISAARD online mapping tool was used.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.**

None proposed.

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**

Stevens Canyon Road (County road) fronts the property on the west side. No new access is proposed.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?**

No. The nearest transit stop is in Leavenworth, approximately 2.5 miles to the southwest.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**

No.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**

No.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

None.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation

No.

g. **Proposed measures to reduce or control transportation impacts, if any:**

None proposed.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

No.

b. **Proposed measures to reduce or control direct impacts on public services, if any.**

None proposed.

16. Utilities

Find help answering utilities questions[18]

a. **Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:**

b. **Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.**

None proposed.

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

The proposal may result in construction of a new onsite septic system in the future. Future construction could increase storm water runoff and emissions during construction.

- **Proposed measures to avoid or reduce such increases are:**

  All future development will comply with local state and federal regulations including critical areas, storm water management and onsite septic requirements.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

Any future site development would be low intensity land uses, with one dwelling unit per 10 acres. Single-family residential development could result in the removal of vegetation on the Project Site. As the site contains critical areas per the WDFW PHS online mapping tool, future environmental review would be necessary.

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

  Compliance with Chelan County Critical area regulations at the time of development.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not deplete energy or natural resources. Leavenworth is served by Chelan County PUD which provides abundant clean, renewable energy.

- **Proposed measures to protect or conserve energy and natural resources are:**

  Future development is likely to use low energy lighting such as LEDs and will comply with the energy code in effect at the time of building.

[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

As the site contains critical areas per the WDFW PHS online mapping tool, future environmental review would be necessary before development could occur. Single-family residential development could result in the removal of vegetation on the Project Site.

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

  Compliance with Chelan County Critical area regulations at the time of development.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

The property is not located in the shoreline zone and is not regulated by the Shoreline Management Act or Chelan County Shoreline Master Program.

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

  Future development of the property would meet all county regulations for land use.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

   Future residential development could result in a slight increase in vehicle trips and the potential for more emergency service needs. Additional residences may generate more daily trips to and from the site, including commuter, school, and service-related travel.

   However, the anticipated increase in demand is expected to be minimal and consistent with rural residential development patterns in the surrounding area as the subject property is adjacent to parcels already zoned RR 10. The property is located in an area already characterized by residential uses at similar or smaller lot sizes, and existing transportation infrastructure and public services currently serve comparable development in the vicinity. Residential development due to the rezone would be more consistent with the surrounding rural density pattern.

   - **Proposed measures to reduce or respond to such demand(s) are:**

     Compliance with Chelan County Code at the time of development.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal will not conflict with any laws for the protection of the environment.

Applicant/Agent (if different than owner): Ryan Walker
Company and Mailing Address: Pacific Engineering and Design / 200 South Columbia St, Suite 300
City/State/Zip: Wenatchee, WA. 98801 Phone: 509-630-7917
E-mail: ryanw@pacificengineering.net
For multiple owners, applicants, or agents, provide additional sheets.

This General Land Use Application Form shall be completed unless specified below. Additional information and supplemental forms may be required. Please review all applicable statutes and regulations pertaining to the proposed development and provide information, documents, studies, and reports (such as a Traffic Impact Study or environmental forms) demonstrating compliance with all statutory and regulatory requirements and other applicable criteria.

Application For: (Check all that apply)

- ☐ Administrative Modification
- ☐ Administrative Determination
- ☐ Administrative Interpretation
- ☐ Binding Site Plan
- ☒ Comprehensive Plan Map Amendment
- ☐ Comprehensive Plan Text Amendment
- ☐ Conditional Use Permit
- ☐ Forest Practice/Conversion
- ☐ Open Space: Public Benefit Rating System
- ☐ Major Subdivision
- ☐ Master Planned Development
- ☐ Planned Development
- ☐ Plat Alteration or Vacation
- ☐ Short Plat
- ☐ Variance (zoning or critical areas)
- ☐ Zoning Change-Text Amendment/ Map Amendment
- ☐ Critical Area Determination
- ☐ Other: _____

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

    Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 22 acres from Commercial Forest (FC) to Rural Residential/Resource 10 (RR 10).

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: FC in residential use
   South: RR 10 in residential use
   East: FC undeveloped
   West: RR10 in residential use
4. What is the current use of the property? Residential
5. Sanitation Disposal: ❑ N/A ☒ Septic Permit ❑ Sewer District: _____
6. Water Source: ❑ N/A ☒ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____
7. Irrigation Water:
   ☒ N/A ❑ Yes (Private) ❑ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: CCFD #3 School District: Cascade
9. Power Service: CCPUD
10. Are there critical areas or critical area buffers on the property?
    ❑ Airport Overlay: _____
    ❑ Aquifer Recharge Area (see attached)
    ❑ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ❑ Alluvial Fan (250') ❑ Known Historic Hazardous Area (250') ❑ Slopes > 40% (250')
    ☒ Erosive soils (on-site) ❑ Landslide ❑ Snow Avalanche (500')
    ❑ Habitat/Riparian Area, protected species/area: _____
    ❑ Streams / Waterbodies: _____ ❑Shoreline Environment Designation: _____
    ☒ Drainage or Seasonal Stream: _____ ❑ Wetland, if so what category: _____
    ❑ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ❑ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ❑ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there (**IS NOT**) or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

File(s) No. _____

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

File(s) No. _____

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

SUBJECT: Michael Hellickson Application for Comprehensive Plan Map Amendment

Chelan County Code 14.14.050 Application for Comprehensive Plan Map Amendment Review Criteria.

1. **A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.**

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 22.0 acres from Commercial Forest (FC) to Rural Residential/Resource 10 (RR 10). The property is located at 10705 Fox Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 39.

The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential use. The adjacent properties to the west and south are zoned RR 10, which is the zone that the subject property is proposed to be changed to. Further, the property to the west has been approved for a cluster subdivision with lot sizes less than one acre.

Chelan County's land-use history includes longstanding patterns of rural residential living, small-scale agriculture, and mixed rural uses—not just forest production. Rural residential use is already occurring on the subject property and nearby. Changing from FC to RR 10 is consistent with these established patterns when the land is no longer primarily suited for long-term commercial forest production and instead better matches rural residential use. The economic vitality of commercial forestry has decreased, most significantly on small parcels where the scale of merchantable timber costs more to harvest than it produces in revenue.

Because RR 10 is part of the Rural Residential/Resource zoning designations, it fits within the GMA's requirement to maintain rural character while still accommodating:

- Rural housing needs (1 unit per 10 acres),
- Low-density development compatible with natural landscapes, and
- Land uses that do not require full urban services.

Thus, rezoning to RR 10 is consistent with the Comprehensive Plan's rural element.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

Growth Management Act Goals

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for rural residential use, while the demand for residential properties in the Leavenworth area is high.

RCW 36.70A.020(1) encourages urban growth. The property is not located in an urban growth area.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

RR 10 maintains very low rural density (1 unit per 10 acres), which avoids suburban sprawl. When FC-designated land is no longer viable as commercial forestland, RR 10 provides a controlled, low-impact rural development path without fragmenting the landscape.
The County Comprehensive Plan notes that parts of the county have transitioned over time to a mix of rural residential and small-scale agricultural/recreational uses, reflecting organic rural development rather than sprawl.

RCW 36.70A.020(4) Aims to plan for housing, including accommodating housing affordable to all economic segments of the population of this state and promotes a variety of residential densities and housing types. RR 10 provides rural housing opportunities at very low densities, helping the county offer a spectrum of housing choices—from urban to rural—consistent with the GMA.

RR 10 zoning accommodates rural households without demanding urban services, consistent with GMA rural planning.

RCW 36.70A.020(5) encourages economic development throughout the state that is consistent with adopted comprehensive plans, promotes economic opportunity for all citizens of this state including recruitment of new businesses and encourages growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

When land is no longer suited to economically viable commercial forestry, maintaining it in FC zoning no longer supports natural resource industries. Transitioning to RR 10 can support small-scale agricultural, home-based, or recreation-oriented rural uses, which the County Comprehensive Plan recognizes as emerging rural economic sectors.

RCW 36.70A.020(8) emphasizes natural resource industries. The parcel no longer meets criteria for productive forestland, therefore re-designating it does not undermine forestry

resource goals. It avoids conflicts where residential expectations and industrial forestry activities would clash, thereby protecting truly productive forestlands elsewhere.

RCW 36.70A.020(9) urges to retain open space and green space, enhance recreational opportunities, enhance fish and wildlife habitat, increase access to natural resource lands. RR 10's very low density preserves large parcels, maintains rural open space character, and protects environmental features—including wildlife habitat recognized in Chelan County's diverse landscapes. The subject property is already developed with one single family residence which limits the potential for new residences to only one thereby continuing to provide important attributes associated with open space.

RCW 36.70A.020(10) notes the importance to protect and enhance the environment and enhance the state's high quality of life, including air and water quality, and the availability of water. RR 10's low density reduces impacts compared to more intense zoning. Large lots help preserve vegetation, maintain infiltration, and reduce impervious surfaces

The proposal is consistent with applicable county-wide planning policies because it aligns zoning with actual land suitability, helps differentiate real resource lands from transitional rural lands, honors countywide rural character and environmental objectives, and implements the County's Comprehensive Plan vision.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

The Comprehensive Plan documents Chelan County's historic and ongoing mixture of uses in rural areas, including rural residential living, forest practices, agriculture, and recreation-supported rural development. The Plan notes that over the last twenty years, portions of the county have transitioned toward vineyards, wineries, smaller-scale agriculture, and recreational tourism, reflecting a diversified rural economy and land-use pattern.

RR 10 is designed specifically for rural residential and resource-compatible uses on large lots. When a parcel is no longer suited for commercial forestry, RR 10 better matches the actual rural conditions and emerging land-use trends documented in the Comprehensive Plan.

RR 10's 1-unit-per-10-acre density is consistent with rural development patterns envisioned in the Rural Element. By maintaining large parcels, RR 10 preserves open space, visual character, and natural landscapes, supporting the Comprehensive Plan's rural goals.

The Resource Element of the Comprehensive Plan emphasizes that land designated as resource land should reflect its actual long-term viability for commercial timber, agriculture, or mineral extraction. When lands—because of location, soils, slope, fragmentation, or surrounding non-forest uses—are not truly productive forestlands, they are more appropriately placed in a rural residential designation.

The Housing Element of the Comprehensive Plan identifies a need to plan for a range of housing types and densities, including low-density rural housing that fits Chelan County's settlement patterns. RR 10 provides low-density rural housing opportunities, consistent with the Housing Element's direction to maintain rural living options while balancing environmental and infrastructure constraints. The proposed amendment broadens the county's available rural residential land base without promoting sprawl because RR 10 remains a large-lot designation.

Chelan County's planning framework acknowledges the county's diverse natural landscapes—including shrub-steppe, ponderosa forest, wetlands, and alpine meadows—and emphasizes maintaining these habitats as part of rural character and ecosystem function. RR 10 supports these values because large lots (10 acres+) preserve open space, wildlife habitat, and natural features and maintains environmental integrity more effectively than more intense residential zoning would.

The following goals and policies are directly supported by the proposed map amendment

Land Use Element

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County

GOAL LU 11: Preserve open space for the enjoyment of County residents and visitors.

Rationale: Open space is a valuable resource for the enjoyment of residents and visitors. The retention of open space helps to maintain the natural beauty and rural character of the County.

Rural Element

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Rationale: Residents who choose to live in the rural areas need to realize that their lifestyle has an impact on the natural environment and efforts need to be made to find and maintain a balance between human activity and the natural environment.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Rationale: There is value in rural lands that have in the economic vitality, rural lifestyles, and healthy environments.

Goal RE 3: Develop at densities such that demands will not be created for urban levels of public services and facilities in rural areas.

Goal Rationale: Development in rural areas should not be at densities which require urban levels of service. Development at lower densities will also help protect the rural quality of life.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

The Comprehensive Plan recognizes Chelan County's historically rural development pattern, including rural residential living alongside resource uses. RR 10 implements this rural form by allowing very low-density residential and resource-compatible uses that maintain open space and rural character.

The Land Use Element directs that designations should reflect actual land suitability and long-term function. Where parcels are not contributing to long-term commercial forestry—due to location, site constraints, parcelization, or surrounding rural residential uses—an RR 10 designation provides a more accurate policy fit than FC, while still preserving a low-intensity rural pattern.

Chelan County Code Title 11 expressly states that zoning districts implement the Comprehensive Plan's goals, policies, and land use designations. RR10's district intent is to allow rural development and resource uses consistent with the Plan's rural provisions and to function as a transition between resource lands and areas of more intense rural/urban development—exactly the role needed where FC is no longer appropriate.

The Resource Element seeks to protect genuine resource lands while accurately designating lands according to their long-term commercial significance. Where a site does not meet the attributes for long-term commercial forestry, reclassifying to RR 10 avoids "over-designation" as FC and prevents incompatibilities between industrial forestry and rural residential use.

Relocating non-viable FC lands into RR 10 reduces friction between rural residents and industrial forestry operations and thereby helps conserve truly productive forestlands elsewhere, consistent with the Plan's resource protection intent. Where the subject site is not suited to long-term commercial forestry, remaining in FC conflicts with FC's stated purpose; RR 10 aligns with the Plan-implementing intent statements.

The following are the locational guidelines for the RR 10 zone which the application complies with.

1. Geographical and Geological Characteristics. The area is predominantly rural in character. Soil characteristics, steep slopes or other physical constraints to development may be present. Significant areas of undeveloped open space may exist.
2. Natural Resources. The area may have agricultural or forest land practices of both small scale and/or commercial significance. The area may also be adjacent to designated resource lands.
3. Public Services. Uses do not require the extension or provision of urban level services. These areas are rural in character and may have access or limited access to rural governmental services and infrastructure. These areas may have the potential to be provided with rural governmental services within the 20 year planning period.
4. Existing Land Uses. Dispersed single family residences, farms or forest management activities and other rural development may be present. Predominant parcel sizes are 10 acres or larger.

5. A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, of if not, what changes to these elements would be required.

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

The Capital Facilities Element specifies that capital facilities—such as sewer, water systems, fire protection, and other infrastructure—must be planned and sized according to the intensity of expected development. RR 10 is a low-density rural land-use designation which is specifically intended not to require extension of urban services. RR 10 development patterns are consistent with rural infrastructure expectations and do not place urban-level demands on capital facilities. Because FC and RR 10 are both rural designations, but RR 10 remains low-intensity, the amendment does not create new burdens on capital facilities beyond what the Capital Facilities Element anticipates for rural areas.

The Transportation Element acknowledges that rural transportation networks are designed for low-volume, low-intensity traffic loads. RR 10 development generates significantly fewer trips than urban or suburban designations, and its density is fully compatible with roadway design and capacity expectations for rural areas. By contrast, FC uses—such as timber harvest activities—may require intermittent heavy trucking. RR 10 reduces peak industrial haul traffic and results in a more predictable, low-impact traffic pattern consistent with the Transportation Element's rural mobility standards

The Transportation Element calls for ensuring adequate access, maintaining safety, and avoiding transportation impacts that exceed the capabilities of rural roads. Because RR 10 densities produce minimal increases in traffic, the amendment will not trigger demands for roadway widening, turn lanes, or major upgrades. Thus, the map amendment is consistent with the Transportation Element's goal of maintaining an efficient transportation network without unwarranted capital improvements.

6. For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.

The surrounding land uses are primarily residential. The adjacent property to the north is developed with a residence and accessory dwelling unit. Properties to the west and south are zoned RR 10. The change in the map designation would be indistinguishable from surrounding land uses.

RR 10 Is more appropriate than FC because it reflects actual land suitability because the parcel is not truly "commercial forest land" based on FC's intended purpose.

Chelan County's zoning code defines Commercial Forest Lands (FC) as areas intended for the long-term conservation of commercial forest uses, preserving land that is of long-term commercial significance for timber production and related activities. If a parcel is surrounded by rural residential uses and lacks physical or economic viability for long-term forestry, then it no longer meets FC's intended purpose.

RR 10 is more appropriate because it is explicitly designed as a rural residential/resource zone that accommodates low-density rural housing, small-scale agriculture, forestry at a

non-industrial scale and open space preservation. It is also intended to function as a transition between resource lands and more intensively developed rural areas. Therefore, if the property is not functioning as productive commercial forest, RR 10 is the accurate, policy-supported classification.

RR 10 reduces land-use conflicts that occur when non-forest uses sit within FC zones. Because FC zoning is intended for industrial-scale forestry, it anticipates heavy equipment use, timber haul routes and intensive forest management activity. RR 10 is specifically intended to provide a rural environment with compatible uses—open space, low-density homes, small-scale agriculture, and rural quietude—reducing these conflicts and aligning with the Comprehensive Plan's rural compatibility goals.

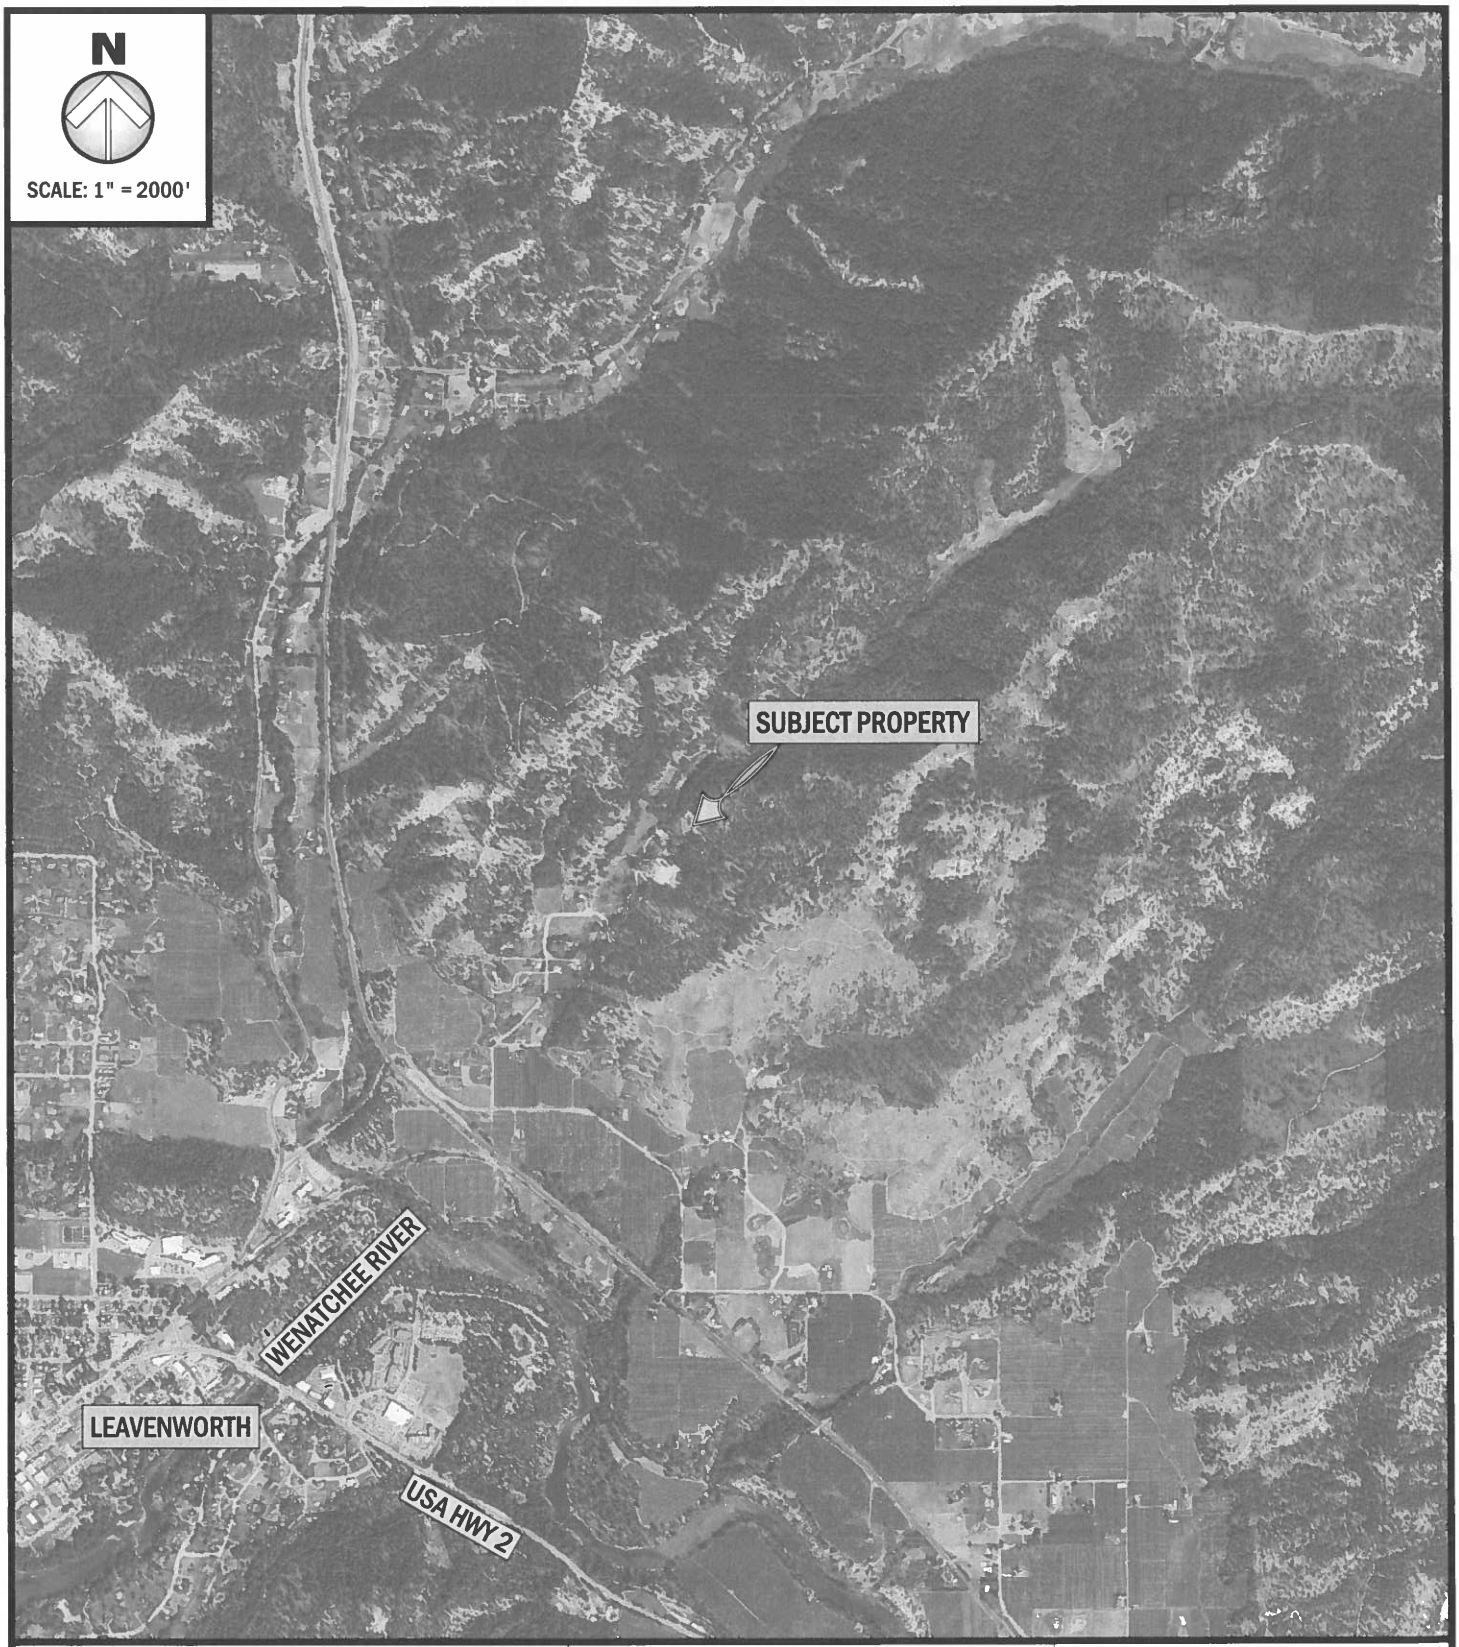
7. Will the proposed map amendment affect lands designated as resource lands of long term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?

The parcel is designated as Commercial Forestland; however, is no longer economically viable for commercial timber harvest, the amendment corrects a mis-designation. The Comprehensive Plan requires that resource lands be designated based on actual long-term viability and commercial significance. The Resource Element provides that resource designations must be accurate and protect real resource lands, rather than misclassify marginal or unsuitable land.

Critical areas are located on the property but the change to RR 10 does not remove, diminish, or alter critical area protections. The zoning code makes clear that critical area overlay regulations apply in addition to the base zone. The map amendment does not change buffer requirements, development limitations, habitat protections, geologic hazard restrictions or wetland rules. Given RR 10's low intensity, the amendment reduces potential disturbance to critical areas by reducing possibilities for heavy equipment operations, haul routes or new forest management roads.

8. Explain how the proposed amendment would affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The proposed amendment increases the supply of rural residential land in a manner consistent With the Comprehensive Plan. RR 10 is one of Chelan County's rural zoning districts intended to support rural housing, small-scale agriculture, open space, and transitional rural land uses. By reclassifying land from FC to RR 10, the County slightly increases the amount of land available for very low-density rural housing. This helps the County meet its obligation under the GMA to provide a variety of rural densities and housing types across the 20-year planning horizon.



The proposed amendment does not reduce the supply of land needed for urban-level growth. The Comprehensive Plan specifies that urban growth should occur inside Urban Growth Areas. Rural zones—including both FC and RR 10—are not part of the County's urban growth capacity.

The proposed amendment does not reduce land available for future city expansions, for residential subdivisions, or for higher-density development. The property will remain outside the Leavenworth UGA and cannot be urbanized, extended with sewer, or converted to higher-density development unless the UGA is expanded through a formal process. Thus, the amendment does not materially affect the county's 20-year urban growth land supply.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The proposed change would provide the applicant with a designation suitable for reasonable rural use of the property. The public will gain predictable, low-density rural development that does not strain facilities or alter rural character. The County maintains consistency with its long-range planning vision. This strengthens both the welfare of the community and the stability of the County's planning framework.

The Comprehensive Plan's Capital Facilities Element emphasizes avoiding unnecessary expenditures by ensuring that land uses do not require new, costly infrastructure beyond rural service levels. RR 10 does not require urban sewer service, municipal water expansion, urban roads or major capital facility upgrades. This benefits the public by minimizing long-term public financial obligations. It benefits the applicant by providing a clear understanding of service expectations and ensuring their land use aligns with available infrastructure.

SEPA[1] Environmental Checklist

RECEIVED
FEB 24 2026
CHELAN COUNTY
Community Development

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

4. **Date checklist prepared:**

   February 2026

5. **Agency requesting checklist:**

   Chelan County

6. **Proposed timing of schedule (including phasing, if applicable):**

   The application will follow the Chelan County process for Comprehensive Plan Map Amendments.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   No.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   None.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

   No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

    Comprehensive Plan Map Amendment and Zoning Map Amendment.

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 22.0 acres from Commercial Forest (FC) to Rural Residential/Resource 10 (RR 10). The property is located at 10705 Fox Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 39.

The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential use. The adjacent properties to the west and south are zoned RR 10, which is the zone that the subject property is proposed to be changed to. Further, the property to the west has been approved for a cluster subdivision with lot sizes less than one acre.

Chelan County's land-use history includes longstanding patterns of rural residential living, small-scale agriculture, and mixed rural uses - not just forest production. Rural residential use is already occurring on the subject property and nearby. Changing from FC to RR10 is consistent with these established patterns when the land is no longer primarily suited for long-term commercial forest production and instead better matches rural residential use. The economic vitality of commercial forestry has decreased, most significantly on small parcels where the scale of merchantable timber costs more to harvest than it produces in revenue.

Because RR 10 is part of the Rural Residential/Resource zoning designations, it fits within the GMA's requirement to maintain rural character while still accommodating:

- Rural housing needs (1 unit per 10 acres),
- Low-density development compatible with natural landscapes, and
- Land uses that do not require full urban services.

Thus, rezoning to RR10 is consistent with the Comprehensive Plan's rural element.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 10705 Fox Road, Leavenworth, WA, within Section 32, T 25N, R 18E.W.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**

~60%

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Soil mapped for the property on the USGS soil survey website (https://websoilsurvey.nrcs.usda.gov) is Cle Elum loam, 30 to 60 percent slopes (80) which is listed as not prime farmland.

None of the soil will be removed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

According to the Chelan County online GIS mapping tool, the subject property contains erosive soils, but does not contain known geologically hazardous areas of landslide potential.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**

No filling, excavation or grading is proposed.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**

No.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There will be no change in impervious surfaces.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

None.

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

None.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No.

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**

None.

3. Water

Find help answering water questions[5]

a. **Surface:**

Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

   The DNR stream typing map shows a type N stream but a stream typing has not been completed.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

   No.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

   None.

[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

   No.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

   No.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

   No.

b. **Ground:**
Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No.

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   No waste material will be discharged.

c. **Water Runoff (including stormwater):**

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   There will be no change in stormwater runoff.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None.

4. Plants

Find help answering plants questions

a. Check the types of vegetation found on the site:

☒ **deciduous tree: alder, maple, aspen, other**

☒ **evergreen tree: fir, cedar, pine, other**

☒ **shrubs**

☒ **grass**

☐ **pasture**

☐ **crop or grain**

☐ **orchards, vineyards, or other permanent crops.**

☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

☐ **water plants: water lily, eelgrass, milfoil, other**

☐ **other types of vegetation**

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened and endangered species known to be on or near the site.

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Showy Stickseed (*Hackelia venusta*) – Endangered
- Wenatchee Mountains Checkermallow (*Sidalcea oregana var. calva*) – Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site as no development is proposed.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include:

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. **List any threatened and endangered species known to be on or near the site.**

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Canada Lynx (*Lynx canadensis*) - Threatened
- Gray Wolf (*Canis lupus*) - Endangered
- North American Wolverine (*Gulo gulo luscus*) – Threatened
- Mt. Rainier White-tailed Ptarmigan (*Lagopus leucura rainierensis*) – Threatened
- Northern Spotted Owl (*Strix occidentalis caruina*) - Threatened
- Yellow-billed Cuckoo (*Coccyzus americanus*) -Threatened
- Bull Trout (*Salvelinus confluentus*) - Threatened
- Monarch Butterfly (*Danaus Plexippus*) – Proposed Threatened
- Suckley's Cuckoo Bumble Bee (*Bombus suckleyi*) – Proposed Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

c. **Is the site part of a migration route? If so, explain.**

No.

d. **Proposed measures to preserve or enhance wildlife, if any.**

None.

e. **List any invasive animal species known to be on or near the site.**

None known.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

   The plan amendment does not have energy needs.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

   No.

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

   None.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

   No.

   1. **Describe any known or possible contamination at the site from present or past uses.**

      None known.

   2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

      None known.

   3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

      None known.

   4. **Describe special emergency services that might be required.**

      None known.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   None.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   The comprehensive plan map amendment will not generate noise.

3. **Proposed measures to reduce or control noise impacts, if any:**

   None.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

   The subject property is currently used for residential purposes. Although it is zoned Commercial Forest (FC), rural residential use is already occurring on the site.

   Adjacent properties to the west and south are zoned Rural Residential/Resource 10 (RR10) and are developed or planned for residential use. The property to the west has been approved for a cluster subdivision with lot sizes less than one acre. The adjacent property to the north is used for residential purposes, while the property to the east is undeveloped.

   The surrounding parcels reflect the current residential land use of the Project Site and surrounding area, rather than active commercial forestry. Given that rural residential use is already occurring on the subject property and on adjacent lands, the proposed rezone from FC to RR10 would align the zoning with existing land use patterns. The proposal would not introduce new urban or intensive commercial activities and will not adversely affect current land uses on nearby or adjacent properties.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

The site has not been used as working farm or forest land. The property is not in a forest land tax designation.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

   No.

c. Describe any structures on the site.

One (1) single-family residence is present on the Project Site.

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

Commercial Forest Lands (FC).

f. What is the current comprehensive plan designation of the site?

Commercial Forest Lands (FC).

g. If applicable, what is the current shoreline master program designation of the site?

N/A.

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Yes, the Project Site is mapped by the WDFW PHS online mapping tool as containing potential shrubsteppe habitat, common sharp-tailed snake (*Contia tenuis*), northern spotted owl (*Strix occidentalis*), and golden eagle (*Aquila chrysaetos*) habitat. All Priority habitats are considered critical areas by Chelan County Code (CCC) 11.78.010(2). A potential type N stream is mapped on the property. However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

i. Approximately how many people would reside or work in the completed project?

None.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

None proposed.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**

None proposed.

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None proposed.

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None proposed.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

No structures proposed.

b. **What views in the immediate vicinity would be altered or obstructed?**

No.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

None proposed.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

---

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing
[13] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics
[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

None.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

No.

c. **What existing off-site sources of light or glare may affect your proposal?**

None.

d. **Proposed measures to reduce or control light and glare impacts, if any:**

None proposed.

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?**

Hiking, bicycling, and horseback riding occur in the vicinity.

b. **Would the proposed project displace any existing recreational uses? If so, describe.**

No.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**

None proposed.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

No.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.**

According to the DAHP WISAARD online mapping tool, a GLO trail is located approximately 0.4 miles to the west of the subject parcel. No other GLO features are located within the project vicinity.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.**

The DAHP WISAARD online mapping tool was used.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.**

None proposed.

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**

Stevens Canyon Road (County road) fronts the property on the west side. No new access is proposed.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?**

No. The nearest transit stop is in Leavenworth, approximately 2.5 miles to the southwest.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**

No.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**

No.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

None.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation

No.

g. **Proposed measures to reduce or control transportation impacts, if any:**

None proposed.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

No.

b. **Proposed measures to reduce or control direct impacts on public services, if any.**

None proposed.

16. Utilities

Find help answering utilities questions[18]

a. **Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:**

b. **Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.**

None proposed.

[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

The proposal may result in construction of a new onsite septic system in the future. Future construction could increase storm water runoff and emissions during construction.

- **Proposed measures to avoid or reduce such increases are:**

  All future development will comply with local state and federal regulations including critical areas, storm water management and onsite septic requirements.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

Any future site development would be low intensity land uses, with one dwelling unit per 10 acres. Single-family residential development could result in the removal of vegetation on the Project Site. As the site contains critical areas per the WDFW PHS online mapping tool, future environmental review would be necessary.

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

  Compliance with Chelan County Critical area regulations at the time of development.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not deplete energy or natural resources. Leavenworth is served by Chelan County PUD which provides abundant clean, renewable energy.

- **Proposed measures to protect or conserve energy and natural resources are:**

  Future development is likely to use low energy lighting such as LEDs and will comply with the energy code in effect at the time of building.

[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

As the site contains critical areas per the WDFW PHS online mapping tool, future environmental review would be necessary before development could occur. Single-family residential development could result in the removal of vegetation on the Project Site.

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

  Compliance with Chelan County Critical area regulations at the time of development.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

The property is not located in the shoreline zone and is not regulated by the Shoreline Management Act or Chelan County Shoreline Master Program.

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

  Future development of the property would meet all county regulations for land use.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

   Future residential development could result in a slight increase in vehicle trips and the potential for more emergency service needs. Additional residences may generate more daily trips to and from the site, including commuter, school, and service-related travel.

   However, the anticipated increase in demand is expected to be minimal and consistent with rural residential development patterns in the surrounding area as the subject property is adjacent to parcels already zoned RR 10. The property is located in an area already characterized by residential uses at similar or smaller lot sizes, and existing transportation infrastructure and public services currently serve comparable development in the vicinity. Residential development due to the rezone would be more consistent with the surrounding rural density pattern.

   - **Proposed measures to reduce or respond to such demand(s) are:**

     Compliance with Chelan County Code at the time of development.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal will not conflict with any laws for the protection of the environment.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

    Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 22 acres from Commercial Forest (FC) to Rural Residential/Resource 10 (RR 10).

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: FC in residential use
   South: RR 10 in residential use
   East: FC undeveloped
   West: RR10 in residential use
4. What is the current use of the property? Residential
5. Sanitation Disposal: ❑ N/A ☒ Septic Permit ❑ Sewer District: _____
6. Water Source: ❑ N/A ☒ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____
7. Irrigation Water:
   ☒ N/A ❑ Yes (Private) ❑ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: CCFD #3 School District: Cascade
9. Power Service: CCPUD
10. Are there critical areas or critical area buffers on the property?
    ❑ Airport Overlay: _____
    ❑ Aquifer Recharge Area (see attached)
    ❑ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ❑ Alluvial Fan (250') ❑ Known Historic Hazardous Area (250') ❑ Slopes > 40% (250')
    ☒ Erosive soils (on-site) ❑ Landslide ❑ Snow Avalanche (500')
    ❑ Habitat/Riparian Area, protected species/area: _____
    ❑ Streams / Waterbodies: _____ ❑Shoreline Environment Designation: _____
    ☒ Drainage or Seasonal Stream: _____ ❑ Wetland, if so what category: _____
    ❑ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ❑ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ❑ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there (**IS NOT**) or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

File(s) No. _____

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

File(s) No. _____

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

DS MH RW

7. Chelan County is hereby given consent to enter the property(ies) listed above.

DS MH RW

8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

DS MH RW

9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

DS MH RW

10. I certify that this application has been made with the consent of the lawful property owner(s).

DS MH RW

11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

SUBJECT: Michael Hellickson Application for Comprehensive Plan Map Amendment

Chelan County Code 14.14.050 Application for Comprehensive Plan Map Amendment Review Criteria.

1. **A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.**

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 22.0 acres from Commercial Forest (FC) to Rural Residential/Resource 10 (RR 10). The property is located at 10705 Fox Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 39.

The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential use. The adjacent properties to the west and south are zoned RR 10, which is the zone that the subject property is proposed to be changed to. Further, the property to the west has been approved for a cluster subdivision with lot sizes less than one acre.

Chelan County's land-use history includes longstanding patterns of rural residential living, small-scale agriculture, and mixed rural uses—not just forest production. Rural residential use is already occurring on the subject property and nearby. Changing from FC to RR 10 is consistent with these established patterns when the land is no longer primarily suited for long-term commercial forest production and instead better matches rural residential use. The economic vitality of commercial forestry has decreased, most significantly on small parcels where the scale of merchantable timber costs more to harvest than it produces in revenue.

Because RR 10 is part of the Rural Residential/Resource zoning designations, it fits within the GMA's requirement to maintain rural character while still accommodating:

- Rural housing needs (1 unit per 10 acres),
- Low-density development compatible with natural landscapes, and
- Land uses that do not require full urban services.

Thus, rezoning to RR 10 is consistent with the Comprehensive Plan's rural element.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

Growth Management Act Goals

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for rural residential use, while the demand for residential properties in the Leavenworth area is high.

RCW 36.70A.020(1) encourages urban growth. The property is not located in an urban growth area.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

RR 10 maintains very low rural density (1 unit per 10 acres), which avoids suburban sprawl. When FC-designated land is no longer viable as commercial forestland, RR 10 provides a controlled, low-impact rural development path without fragmenting the landscape.
The County Comprehensive Plan notes that parts of the county have transitioned over time to a mix of rural residential and small-scale agricultural/recreational uses, reflecting organic rural development rather than sprawl.

RCW 36.70A.020(4) Aims to plan for housing, including accommodating housing affordable to all economic segments of the population of this state and promotes a variety of residential densities and housing types. RR 10 provides rural housing opportunities at very low densities, helping the county offer a spectrum of housing choices—from urban to rural—consistent with the GMA.

RR 10 zoning accommodates rural households without demanding urban services, consistent with GMA rural planning.

RCW 36.70A.020(5) encourages economic development throughout the state that is consistent with adopted comprehensive plans, promotes economic opportunity for all citizens of this state including recruitment of new businesses and encourages growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

When land is no longer suited to economically viable commercial forestry, maintaining it in FC zoning no longer supports natural resource industries. Transitioning to RR 10 can support small-scale agricultural, home-based, or recreation-oriented rural uses, which the County Comprehensive Plan recognizes as emerging rural economic sectors.

RCW 36.70A.020(8) emphasizes natural resource industries. The parcel no longer meets criteria for productive forestland, therefore re-designating it does not undermine forestry

resource goals. It avoids conflicts where residential expectations and industrial forestry activities would clash, thereby protecting truly productive forestlands elsewhere.

RCW 36.70A.020(9) urges to retain open space and green space, enhance recreational opportunities, enhance fish and wildlife habitat, increase access to natural resource lands. RR 10's very low density preserves large parcels, maintains rural open space character, and protects environmental features—including wildlife habitat recognized in Chelan County's diverse landscapes. The subject property is already developed with one single family residence which limits the potential for new residences to only one thereby continuing to provide important attributes associated with open space.

RCW 36.70A.020(10) notes the importance to protect and enhance the environment and enhance the state's high quality of life, including air and water quality, and the availability of water. RR 10's low density reduces impacts compared to more intense zoning. Large lots help preserve vegetation, maintain infiltration, and reduce impervious surfaces

The proposal is consistent with applicable county-wide planning policies because it aligns zoning with actual land suitability, helps differentiate real resource lands from transitional rural lands, honors countywide rural character and environmental objectives, and implements the County's Comprehensive Plan vision.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

The Comprehensive Plan documents Chelan County's historic and ongoing mixture of uses in rural areas, including rural residential living, forest practices, agriculture, and recreation-supported rural development. The Plan notes that over the last twenty years, portions of the county have transitioned toward vineyards, wineries, smaller-scale agriculture, and recreational tourism, reflecting a diversified rural economy and land-use pattern.

RR 10 is designed specifically for rural residential and resource-compatible uses on large lots. When a parcel is no longer suited for commercial forestry, RR 10 better matches the actual rural conditions and emerging land-use trends documented in the Comprehensive Plan.

RR 10's 1-unit-per-10-acre density is consistent with rural development patterns envisioned in the Rural Element. By maintaining large parcels, RR 10 preserves open space, visual character, and natural landscapes, supporting the Comprehensive Plan's rural goals.

The Resource Element of the Comprehensive Plan emphasizes that land designated as resource land should reflect its actual long-term viability for commercial timber, agriculture, or mineral extraction. When lands—because of location, soils, slope, fragmentation, or surrounding non-forest uses—are not truly productive forestlands, they are more appropriately placed in a rural residential designation.

The Housing Element of the Comprehensive Plan identifies a need to plan for a range of housing types and densities, including low-density rural housing that fits Chelan County's settlement patterns. RR 10 provides low-density rural housing opportunities, consistent with the Housing Element's direction to maintain rural living options while balancing environmental and infrastructure constraints. The proposed amendment broadens the county's available rural residential land base without promoting sprawl because RR 10 remains a large-lot designation.

Chelan County's planning framework acknowledges the county's diverse natural landscapes—including shrub-steppe, ponderosa forest, wetlands, and alpine meadows—and emphasizes maintaining these habitats as part of rural character and ecosystem function. RR 10 supports these values because large lots (10 acres+) preserve open space, wildlife habitat, and natural features and maintains environmental integrity more effectively than more intense residential zoning would.

The following goals and policies are directly supported by the proposed map amendment

Land Use Element

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County

GOAL LU 11: Preserve open space for the enjoyment of County residents and visitors.

Rationale: Open space is a valuable resource for the enjoyment of residents and visitors. The retention of open space helps to maintain the natural beauty and rural character of the County.

Rural Element

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Rationale: Residents who choose to live in the rural areas need to realize that their lifestyle has an impact on the natural environment and efforts need to be made to find and maintain a balance between human activity and the natural environment.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Rationale: There is value in rural lands that have in the economic vitality, rural lifestyles, and healthy environments.

Goal RE 3: Develop at densities such that demands will not be created for urban levels of public services and facilities in rural areas.

Goal Rationale: Development in rural areas should not be at densities which require urban levels of service. Development at lower densities will also help protect the rural quality of life.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

The Comprehensive Plan recognizes Chelan County's historically rural development pattern, including rural residential living alongside resource uses. RR 10 implements this rural form by allowing very low-density residential and resource-compatible uses that maintain open space and rural character.

The Land Use Element directs that designations should reflect actual land suitability and long-term function. Where parcels are not contributing to long-term commercial forestry—due to location, site constraints, parcelization, or surrounding rural residential uses—an RR 10 designation provides a more accurate policy fit than FC, while still preserving a low-intensity rural pattern.

Chelan County Code Title 11 expressly states that zoning districts implement the Comprehensive Plan's goals, policies, and land use designations. RR10's district intent is to allow rural development and resource uses consistent with the Plan's rural provisions and to function as a transition between resource lands and areas of more intense rural/urban development—exactly the role needed where FC is no longer appropriate.

The Resource Element seeks to protect genuine resource lands while accurately designating lands according to their long-term commercial significance. Where a site does not meet the attributes for long-term commercial forestry, reclassifying to RR 10 avoids "over-designation" as FC and prevents incompatibilities between industrial forestry and rural residential use.

Relocating non-viable FC lands into RR 10 reduces friction between rural residents and industrial forestry operations and thereby helps conserve truly productive forestlands elsewhere, consistent with the Plan's resource protection intent. Where the subject site is not suited to long-term commercial forestry, remaining in FC conflicts with FC's stated purpose; RR 10 aligns with the Plan-implementing intent statements.

The following are the locational guidelines for the RR 10 zone which the application complies with.

1. Geographical and Geological Characteristics. The area is predominantly rural in character. Soil characteristics, steep slopes or other physical constraints to development may be present. Significant areas of undeveloped open space may exist.
2. Natural Resources. The area may have agricultural or forest land practices of both small scale and/or commercial significance. The area may also be adjacent to designated resource lands.
3. Public Services. Uses do not require the extension or provision of urban level services. These areas are rural in character and may have access or limited access to rural governmental services and infrastructure. These areas may have the potential to be provided with rural governmental services within the 20 year planning period.
4. Existing Land Uses. Dispersed single family residences, farms or forest management activities and other rural development may be present. Predominant parcel sizes are 10 acres or larger.

5. A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, of if not, what changes to these elements would be required.

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

The Capital Facilities Element specifies that capital facilities—such as sewer, water systems, fire protection, and other infrastructure—must be planned and sized according to the intensity of expected development. RR 10 is a low-density rural land-use designation which is specifically intended not to require extension of urban services. RR 10 development patterns are consistent with rural infrastructure expectations and do not place urban-level demands on capital facilities. Because FC and RR 10 are both rural designations, but RR 10 remains low-intensity, the amendment does not create new burdens on capital facilities beyond what the Capital Facilities Element anticipates for rural areas.

The Transportation Element acknowledges that rural transportation networks are designed for low-volume, low-intensity traffic loads. RR 10 development generates significantly fewer trips than urban or suburban designations, and its density is fully compatible with roadway design and capacity expectations for rural areas. By contrast, FC uses—such as timber harvest activities—may require intermittent heavy trucking. RR 10 reduces peak industrial haul traffic and results in a more predictable, low-impact traffic pattern consistent with the Transportation Element's rural mobility standards

The Transportation Element calls for ensuring adequate access, maintaining safety, and avoiding transportation impacts that exceed the capabilities of rural roads. Because RR 10 densities produce minimal increases in traffic, the amendment will not trigger demands for roadway widening, turn lanes, or major upgrades. Thus, the map amendment is consistent with the Transportation Element's goal of maintaining an efficient transportation network without unwarranted capital improvements.

6. For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.

The surrounding land uses are primarily residential. The adjacent property to the north is developed with a residence and accessory dwelling unit. Properties to the west and south are zoned RR 10. The change in the map designation would be indistinguishable from surrounding land uses.

RR 10 Is more appropriate than FC because it reflects actual land suitability because the parcel is not truly "commercial forest land" based on FC's intended purpose.

Chelan County's zoning code defines Commercial Forest Lands (FC) as areas intended for the long-term conservation of commercial forest uses, preserving land that is of long-term commercial significance for timber production and related activities. If a parcel is surrounded by rural residential uses and lacks physical or economic viability for long-term forestry, then it no longer meets FC's intended purpose.

RR 10 is more appropriate because it is explicitly designed as a rural residential/resource zone that accommodates low-density rural housing, small-scale agriculture, forestry at a

non-industrial scale and open space preservation. It is also intended to function as a transition between resource lands and more intensively developed rural areas. Therefore, if the property is not functioning as productive commercial forest, RR 10 is the accurate, policy-supported classification.
