RR 10 reduces land-use conflicts that occur when non-forest uses sit within FC zones. Because FC zoning is intended for industrial-scale forestry, it anticipates heavy equipment use, timber haul routes and intensive forest management activity. RR 10 is specifically intended to provide a rural environment with compatible uses—open space, low-density homes, small-scale agriculture, and rural quietude—reducing these conflicts and aligning with the Comprehensive Plan's rural compatibility goals.

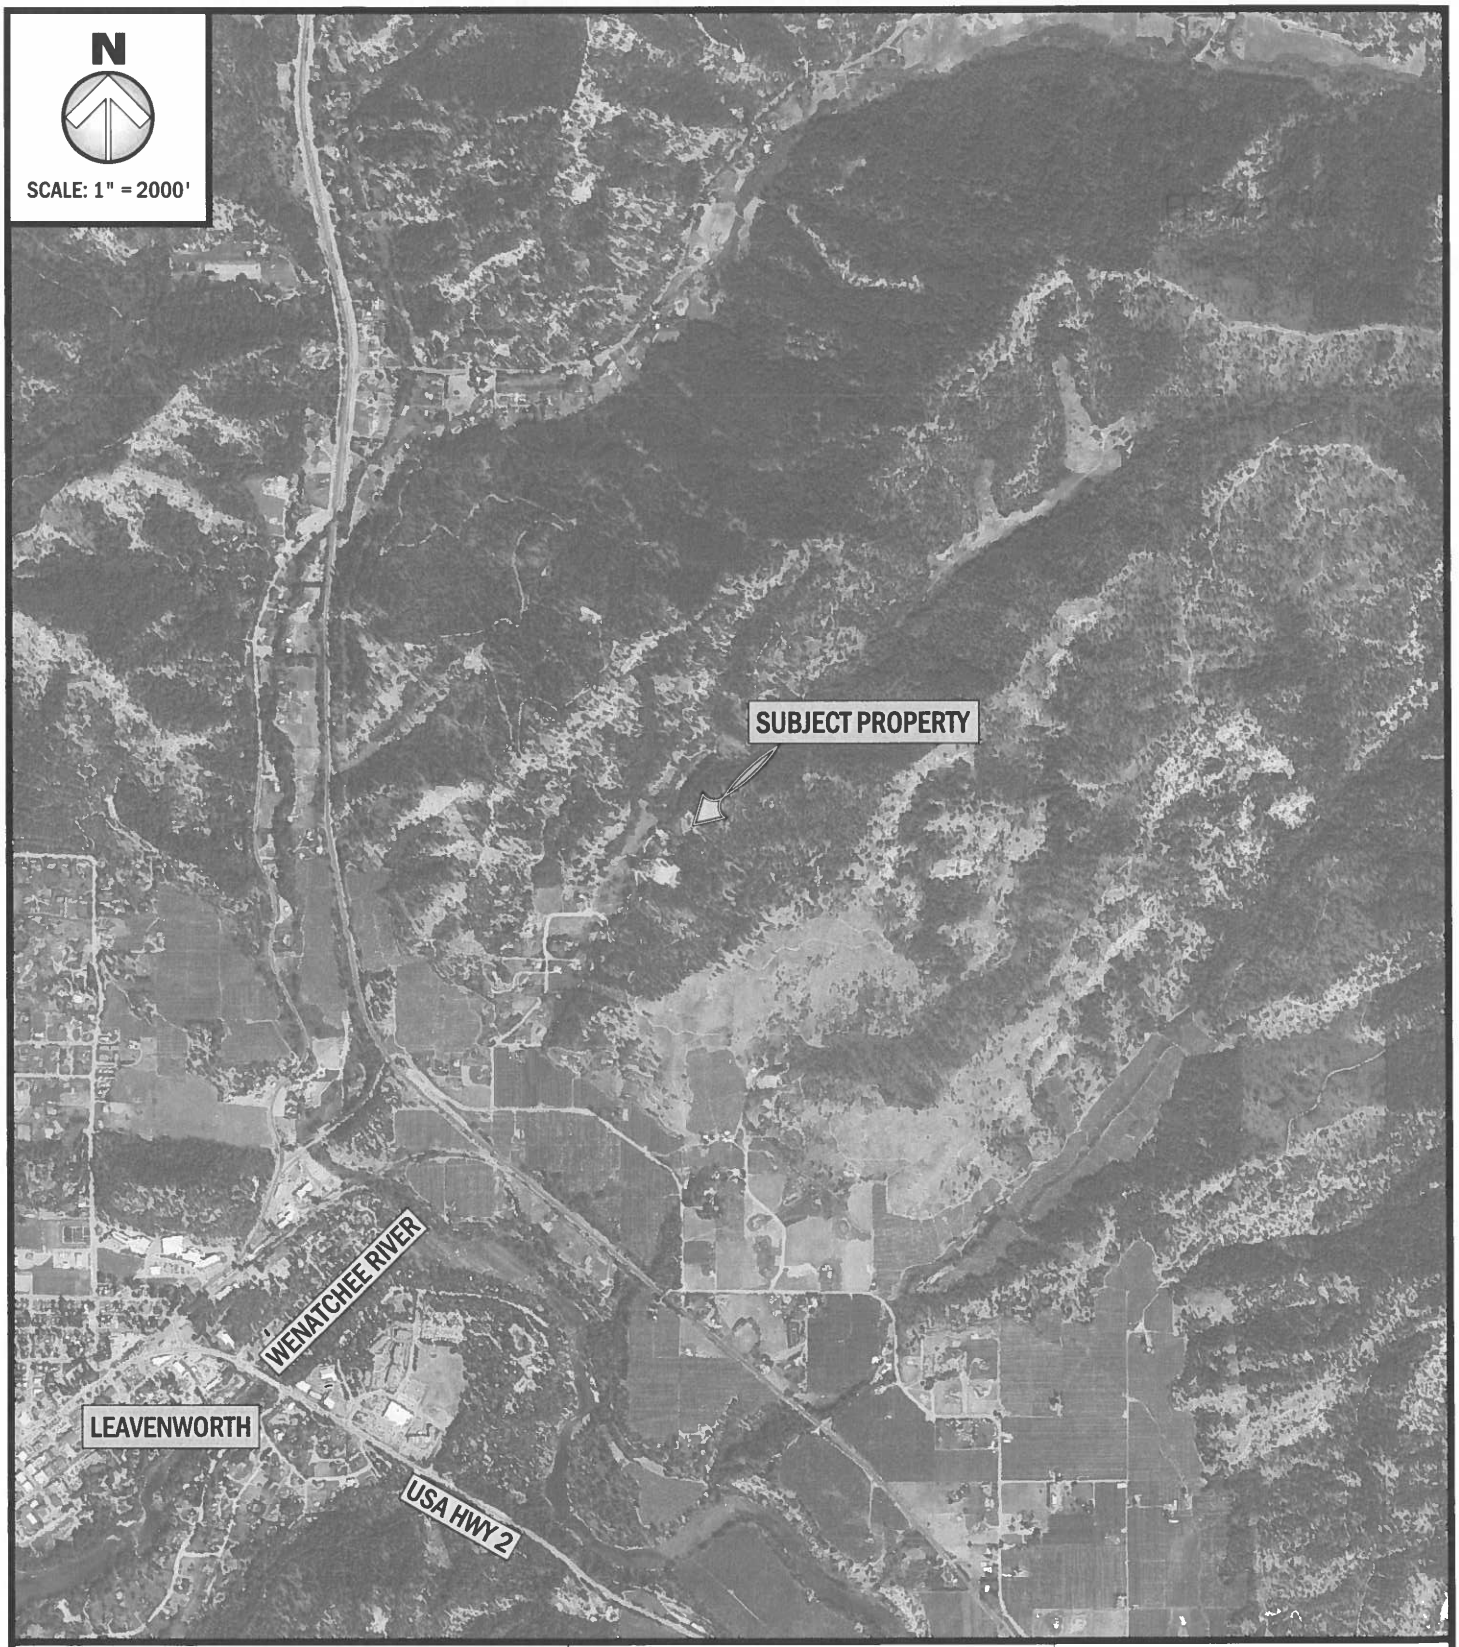
7. Will the proposed map amendment affect lands designated as resource lands of long term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?

The parcel is designated as Commercial Forestland; however, is no longer economically viable for commercial timber harvest, the amendment corrects a mis-designation. The Comprehensive Plan requires that resource lands be designated based on actual long-term viability and commercial significance. The Resource Element provides that resource designations must be accurate and protect real resource lands, rather than misclassify marginal or unsuitable land.

Critical areas are located on the property but the change to RR 10 does not remove, diminish, or alter critical area protections. The zoning code makes clear that critical area overlay regulations apply in addition to the base zone. The map amendment does not change buffer requirements, development limitations, habitat protections, geologic hazard restrictions or wetland rules. Given RR 10's low intensity, the amendment reduces potential disturbance to critical areas by reducing possibilities for heavy equipment operations, haul routes or new forest management roads.

8. Explain how the proposed amendment would affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The proposed amendment increases the supply of rural residential land in a manner consistent With the Comprehensive Plan. RR 10 is one of Chelan County's rural zoning districts intended to support rural housing, small-scale agriculture, open space, and transitional rural land uses. By reclassifying land from FC to RR 10, the County slightly increases the amount of land available for very low-density rural housing. This helps the County meet its obligation under the GMA to provide a variety of rural densities and housing types across the 20-year planning horizon.



The proposed amendment does not reduce the supply of land needed for urban-level growth. The Comprehensive Plan specifies that urban growth should occur inside Urban Growth Areas. Rural zones—including both FC and RR 10—are not part of the County's urban growth capacity.

The proposed amendment does not reduce land available for future city expansions, for residential subdivisions, or for higher-density development. The property will remain outside the Leavenworth UGA and cannot be urbanized, extended with sewer, or converted to higher-density development unless the UGA is expanded through a formal process. Thus, the amendment does not materially affect the county's 20-year urban growth land supply.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The proposed change would provide the applicant with a designation suitable for reasonable rural use of the property. The public will gain predictable, low-density rural development that does not strain facilities or alter rural character. The County maintains consistency with its long-range planning vision. This strengthens both the welfare of the community and the stability of the County's planning framework.

The Comprehensive Plan's Capital Facilities Element emphasizes avoiding unnecessary expenditures by ensuring that land uses do not require new, costly infrastructure beyond rural service levels. RR 10 does not require urban sewer service, municipal water expansion, urban roads or major capital facility upgrades. This benefits the public by minimizing long-term public financial obligations. It benefits the applicant by providing a clear understanding of service expectations and ensuring their land use aligns with available infrastructure.

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-signif icance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

Subject: Notice of Application for CPA 26-054 Hellickson - Chelan County Dept. of Community Development
Attachments: CPA 26-054 NOA.pdf; CPA 26-054 - Affidavit of posting.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Michael Hellickson's property, File# CPA 26-054. This notice should be posted on the *subject property by March 5th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days,* starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.

Thank you,

Jessica Thompson

Greetings,
Chelan County has a **Comprehensive Plan Amendment** application in which we are requesting comments from agencies and special districts. Attached are all the materials for your review and the Notice of Application. Please respond by **5:00 pm on March 19, 2026.**

Project File No.:	CPA 26-054
Project Location:	Unassigned, Chelan, WA 98816
Parcel Number:	25-18-32-330-200
Applicant/Owner:	Michael Hellickson
Application Date:	February 24, 2026
Determination of Complete:	February 25, 2026
Notice of Application Date:	March 5, 2026

Proposed Project Description: An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10).

Existing Environmental Documents: State Environmental Policy Act (SEPA) Checklist

Permits Required: None

Application Materials: Attached to this email or may be found on the Chelan County Public Notice Portal: https://co-chelan-wa.smartgovcommunity.com/PublicNotice/PublicNoticeSearch

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-041 Campbell - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5). 24 Hugo Road, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-330-175.

CPA 26-048 HMJD Collins, LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-430-050.

CPA 26-054 Hellickson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). Unassigned, Chelan. WA 98816 also identified as Assessor's Parcel No.: 25-18-32-330-200.

CPA 26-060 McMahon - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). 7948 East Leavenworth Rd., Leavenworth, WA 98826 also identified as Assessor's Parcel No.: 24-17-23-510-480.

On March 5, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 19, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Dear Susan Dretke,

I am writing to submit formal public comment in opposition to the proposed change in land use designation for Mr. Hellickson's parcel in Leavenworth from Commerical Forest Land to Rural Residential 10 (RR10). I am a resident of the area and a real estate broker actively working in the Leavenworth market, and I have substantive concerns regarding both the environmental implications of this proposal and the demonstrated need that would justify it under the Growth Management Act.

I. Lack of Demonstrated Need

Washington's Growth Management Act requires that changes to land use designations and any expansion of development capacity be supported by a documented, demonstrated need based on current population and market conditions. The current data for the Leavenworth market (ZIP 98826) does not support an argument that additional rural residential capacity is needed. According to Northwest Multiple Listing Service data pulled May 5, 2026:

• Months Supply of Inventory currently sits at approximately 12 months — among the highest readings recorded over the past decade and roughly double what is generally considered a balanced market (4–6 months). The only comparable readings in the past ten years occurred in late 2025, indicating a sustained oversupply rather than a short-term anomaly.

• Closed sales activity has fallen to a range of approximately 1–9 transactions per month in recent months, well below the 13–21 monthly closings typical of 2020 through 2024. Recent activity is at or near the lowest levels observed since 2018.

In parallel, the Leavenworth area has very recently absorbed significant new housing capacity that has not yet worked through the market, including 368 newly constructed and available apartment units near town (with over 200 units still available for rent) and a rezone to RL-8 throughout all of lower Ski Hill that has been rezoned for residential subdivision into a substantial number of additional future homes. Together, these developments represent a meaningful pipeline of new supply already entitled and, in some cases, already delivered.

Given these conditions: historically high inventory, sharply reduced sales velocity, and a sizable pipeline of recently approved and recently delivered units; there is no defensible market basis for further expanding rural residential development capacity at this time. Adding capacity in a market already showing clear signs of oversupply does not advance the GMA's purposes; it works against them.

II. Environmental and Wildlife Concerns

The parcel in question lies within the Stevens Canyon corridor, which functions as an important wildlife migration and habitat area. I have been in contact with the Washington Department of Fish and Wildlife regarding this proposal. WDFW has reviewed the parcel and indicated that it has concerns about the proposal due to the presence of important wildlife resources and habitat in the area, including documented or potential occurrence of golden eagle, northern spotted owl, and sharp-tailed snake. WDFW has further indicated that a thorough wildlife survey will likely be needed to determine whether these species are present and that they look forward to a detailed review should the project advance to the Notice of Application and Environmental Review stage.

Notably, WDFW stated that this proposal is the first they have seen of it, which they noted is consistent with the County's typical practice of soliciting agency comment after the threshold determination has been made. I would respectfully request that the County engage WDFW substantively before issuing any threshold determination on this proposal, given the species and habitat concerns identified, rather than after the fact. Reliance on a Determination of Nonsignificance in the absence of a wildlife survey, when a state resource agency has already flagged species-level concerns, would not appear to satisfy SEPA's requirement that the County consider all reasonably available environmental information.

III. Cumulative Impacts

I would also ask that the County consider the cumulative impact of this proposal in combination with the apartment construction, the recent rezoning of lower Ski Hill, and other recently approved development in the Leavenworth area. SEPA requires consideration of cumulative effects, and reviewing this rezone in isolation, particularly when its stated justification is general future development potential rather than a specific project, risks understating its true contribution to habitat fragmentation and pressure on the Stevens Canyon corridor.

IV. Request

For the reasons above, I respectfully request that the County:

1. Issue a Determination of Significance, or at minimum decline to issue a Determination of Nonsignificance, until a wildlife survey has been completed and WDFW has had the opportunity to formally review and comment;
2. Require the applicant to demonstrate need for the proposed designation change consistent with GMA requirements, in light of current inventory, sales, and pipeline data for the Leavenworth market; and
3. Deny the proposed change from AC to RR10 absent a clear showing of both demonstrated need and adequate environmental review.

Thank you for your time and for the opportunity to comment. I have provided the underlying NWMLS data referenced above, and am happy to discuss any of these points further. Please confirm receipt of this comment for the record.

Respectfully,

Gavin Johnson
(509)264-6960

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Susan,

My name is Brooke Johnson, and I am a property owner at 25 Foxridge Lane. I'm writing to express my opposition to the proposed rezoning request submitted by Mr. Hellickson for property located up Stevens Canyon.

Like many of my neighbors, my family chose to purchase property in this area because of the existing zoning and the larger lot sizes that provide space, privacy, and a lower-density rural character. We paid a premium for that setting and for the "elbow room" that properties in this area currently offer.

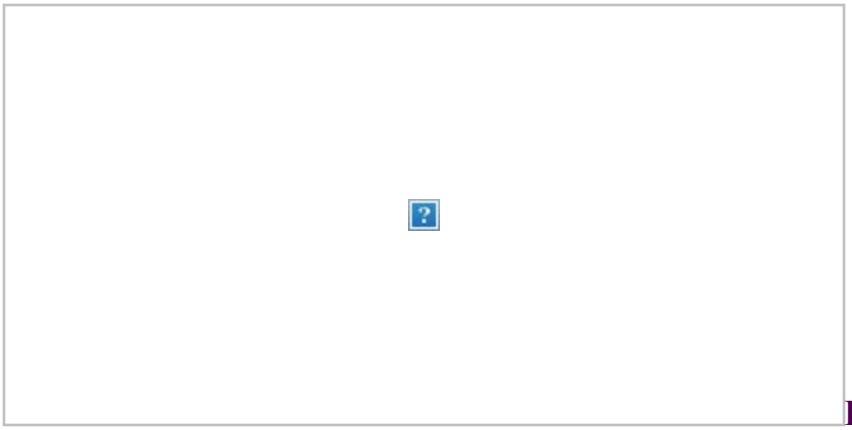
If the zoning is changed to allow for significantly smaller lots and increased density, it fundamentally alters the expectations that current property owners relied upon when making what is often the largest investment of their lives. One of the defining attributes of Stevens Canyon properties is the space and rural feel created by larger lot sizes. If those conditions change, it diminishes a key factor that supports our property values. Being unable to sell our property in the future with those same qualities would place existing homeowners at a clear disadvantage.

There are also practical concerns that come with increasing density in this area. Stevens Canyon is served by limited road infrastructure, and additional development would increase traffic on roads that were not designed for higher volumes. In the event of wildfire, which is a real and ongoing concern in our region, evacuation safety and emergency access should be carefully considered before allowing additional density.

Water availability and septic capacity are also important considerations in rural areas like ours. Increased density could place additional strain on systems that were originally planned for much lower levels of development.

I also encourage the county to carefully evaluate the long-term intentions behind this rezoning request. While it may be stated that there are no immediate development plans, zoning changes often shape what becomes possible in the future. Because of the significant and lasting impacts that increased density could have on Stevens Canyon, I believe it is important for the county to proceed with caution and fully consider how this change could affect existing residents and the broader community over time.

Finally, approving a rezoning like this could set a precedent for similar requests in the future, which could gradually transform the character of Stevens Canyon in ways that current residents never anticipated when they chose to live here.



For these reasons, I respectfully ask that the county carefully consider the long-term impacts

this rezoning could have on existing residents, infrastructure, property values, and the rural character of this area before making any decision.

Thank you for your time and for considering the perspectives of local residents.

Sincerely,
Brooke Johnson

Re Notice of Application File # CPA 26-05, Michael Hellickson

We have questions and comments regarding the above Notice of Application .

This property is accessed by a private road that has no recorded Road Maintenance Agreement. Access is important to us as we live at the bottom of the road, and it runs through our immediate property. Changing the land use designation leads us to speculate that this adjustment would allow for more homes and ADUs. The applicant has told me in our initial introduction that he would like to build homes for his children. How many homes may be accessed off a private road before being required to bring it up to County standards? We are concerned that any further widening through our property will cause the embankment to slough and avalanche our house below.

The road already has 2 STRs which leads to an increase in traffic through our easement of up to 8 cars per day. Another major concern is ongoing construction. We have had up to 16 dumptrucks per day pass through, along with concrete, heavy equipment, and contractor vehicles—all within 40 feet of our home. Little did we know how intense the usage would be when we purchased our parcel. In addition, as there is no maintenance agreement, dust is unmitigated.

Water is a major concern of the entire neighborhood. Our property has 4 wells, serving 16 homes or lots. These wells have run dry in the past, from overuse up the canyon, and when there were fewer users than now. What measures has the County put in place to protect existing wells and users? What health measures are in place to ensure increasing density above community wells will keep runoff of septic drainfields from funneling to our shared aquifer?

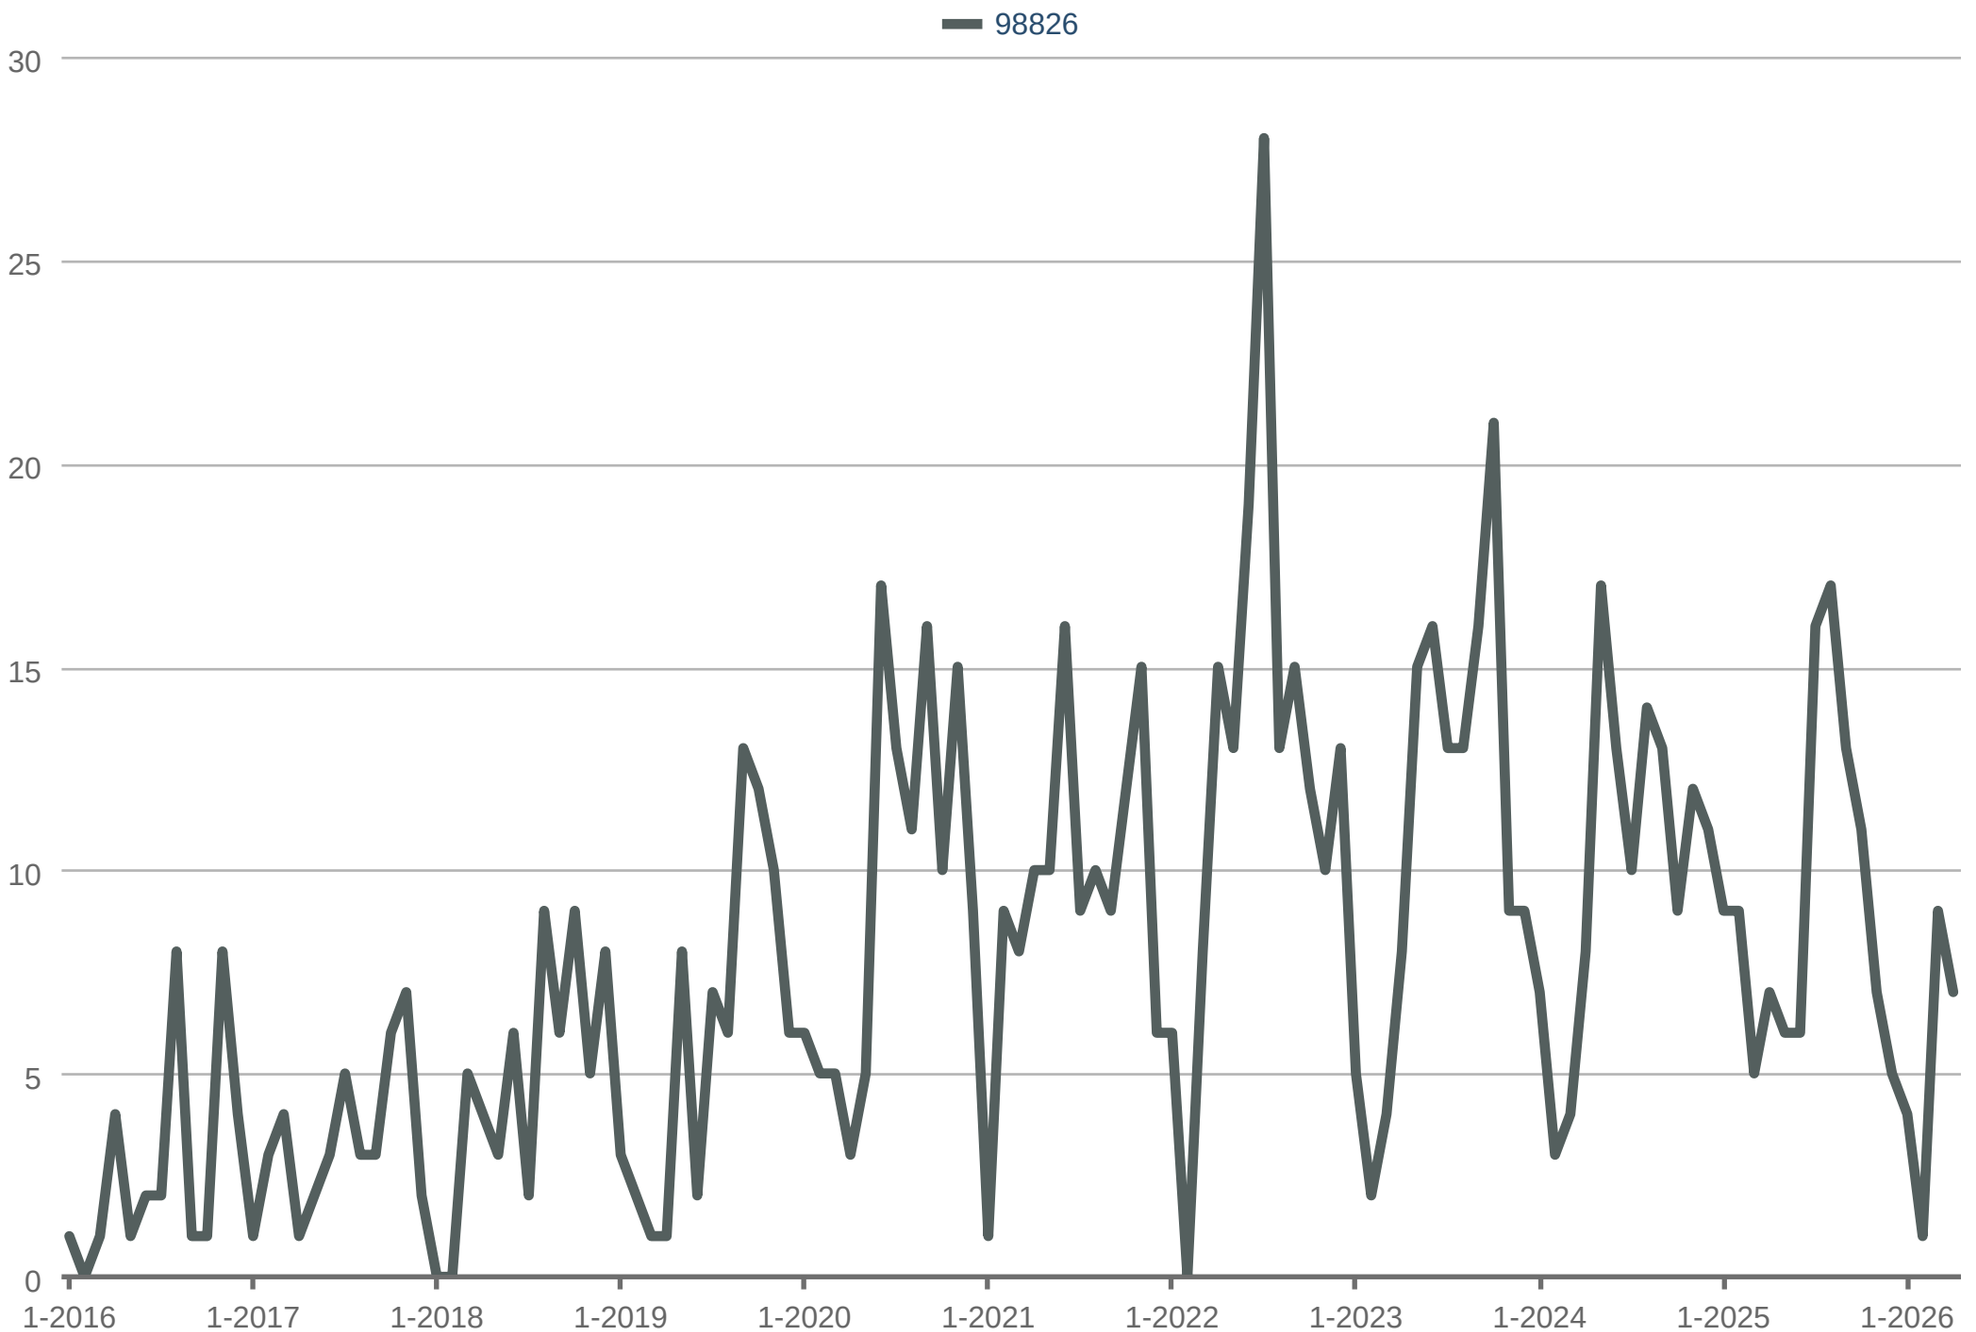
In addition, this is a Wildland Urban Interface with no County Fire support required on the private road. It has only one egress route, unless a neighboring driveway is used. Fox Road has only one ingress/egress route with more than 40 homes existing already. There are places on Fox Road where only one car at a time may pass.

The existing fire hydrants on Fox Road are supported by the well system in our property. Without adequate water, the neighborhood fire risk increases.

Of course, we cannot speculate on the applicant's intentions, but the County can parse out the ultimate development goals of any application, as part of comprehensive planning. It's up to the County to protect the existing residential quality of life by addressing increasing density and decreasing resources, before they become problems.

We appreciate being notified of the application notice by mail. We received it March 10. Thank you for noting our comments and questions.

Best regards,



Sheila Harris and Alan Chilcoat

Memorandum

To: Susan Dretke, Chelan County

From: Richmond Petty, REHS

Date: 03/12/26

RE: Hellickson (CPA 26-054) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). The subject property is located at 10705 Fox Rd., Leavenworth, WA 98826 (county tax parcel: 251832330200)

As proposed, I have no objections to further approval of this project.

- Active Septic Repair permit issued (OSS-REPAIR-25-0055) and private water review approved in 2006 for well (APG157).

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

Re: Proposed application for a Comprehensive Plan Map Amendment, file No. CPA 26-054

Comment:

In regards to the application for the proposed Comprehensive Plan Map Amendment, I don't find any objection, but my concern is that within the consideration of said amendment, Chelan County and the Chelan/Douglas County Health Department require proof of adequate domestic water volume for the maximum number of potential living structures without impacting the water table for wells below, and for a minimum of water in reserve for fire control. The area proposed is dense forest and on mountain hillside and the road for fire equipment access is difficult.

Thank you for the opportunity to comment on this application.

Respectfully submitted,

John W. Fishburne

Hello Susan,
I need help understanding this rezone request. The notice indicates the proposal is to change the zoning for this Parcel to Rural Residential/Resource 10 from Commercial Forest. There is currently a large residence on this property. Is this proposal just to make the zoning consistent with the facts on the ground or is this laying the groundwork for future subdivision? I suspect I'm missing something. Please clarify. We own the residence on 10412 Fox Rd and are interested in any potential impacts to traffic.
Thanks!
Ron Larson

Susan,

I am writing on behalf of my wife and I who are neighbors of the applicant and have owned our property for more than 20 years.

We appreciate that you "ENCOURAGE PUBLIC COMMENT" (emphasis yours), but the placement of the sign for the proposed land use action is such that we are the only full-time residents who would see it. Of the remaining three owners who live north and east of the applicant, only one will drive by that sign between the time it is posted and the end of the public comment and no other people have rights to that private road. Those neighbors most impacted live south and west of the applicant and are unlikely to be aware of the application. I have taken the liberty of communicating the link to the Land Use Action application to some of those most impacted.

When we made our purchase decision, our property and all of the properties around it (including the applicants) were zoned FC which carries a 20 acre minimum for development. We were happy to know that our privacy would be respected and the housing density would be minimized through this wildlife corridor. Unfortunately, through various mechanisms, a number of the properties south and west of the applicant have been rezoned to smaller minimum lot sizes and each of them has since had additional houses built with future plans for even more construction.

The applicant states that he has "no plans for future activity connected to this proposal", but the applicant is a real estate professional and it would be disingenuous to believe that an RR-10 zoning will not lead to additional development. Otherwise, the applicant should be satisfied with creating an RR-20 designation of which we are fully supportive. The applicant already has the right to build an additional ADU to their property; rezoning RR-10 paves the way to two houses and two ADUs. We certainly understand how the rezoning benefits the applicant, but we see it only as a detriment to the community.

It would be unfortunate if the county treats the technique of leveraging FC zoning as an effective trojan horse strategy to facilitate updating the zoning to RR-10.

Sincerely,
Brian and Lisa Koblenz

Susan,

I'm writing on behalf of my wife and myself, current owners of 25 Foxridge Ln. It's come to my attention via multiple neighbors that Mr. Hellickson is attempting to rezone his property to increase density up Stevens Canyon. We firmly stand against this proposal, and stand with our neighbors' opinions that more density is not the answer. Ski Hill has been rezoned to higher density allowance, hundreds of apartments have been built in the last decade, and demand is not what it used to be. I own a real estate brokerage with an office downtown Leavenworth, so I'm personally aware of the trends, and demand is low, much lower than it was a few years ago.

He may claim to have "no future plans," but heed with caution. This is a man who lost his entire brokerage's license in 2011 due to MANY unethical practices. His actions and intentions are unaligned. What he's proposing is not necessary and will only burden everyone else involved. I hope the county listens and can prove to the people it serves that money is not the only factor that drives county policy/preservation. I look forward to a thoughtful investigation into this matter. Thank you for your time and consideration.

Best,

Gavin & Brooke Johnson

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

    Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 22 acres from Commercial Forest (FC) to Rural Residential/Resource 10 (RR 10).

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: FC in residential use
   South: RR 10 in residential use
   East: FC undeveloped
   West: RR10 in residential use
4. What is the current use of the property? Residential
5. Sanitation Disposal: ❑ N/A ☒ Septic Permit ❑ Sewer District: _____
6. Water Source: ❑ N/A ☒ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____
7. Irrigation Water:
   ☒ N/A ❑ Yes (Private) ❑ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: CCFD #3 School District: Cascade
9. Power Service: CCPUD
10. Are there critical areas or critical area buffers on the property?
    ❑ Airport Overlay: _____
    ❑ Aquifer Recharge Area (see attached)
    ❑ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ❑ Alluvial Fan (250') ❑ Known Historic Hazardous Area (250') ❑ Slopes > 40% (250')
    ☒ Erosive soils (on-site) ❑ Landslide ❑ Snow Avalanche (500')
    ❑ Habitat/Riparian Area, protected species/area: _____
    ❑ Streams / Waterbodies: _____ ❑Shoreline Environment Designation: _____
    ☒ Drainage or Seasonal Stream: _____ ❑ Wetland, if so what category: _____
    ❑ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ❑ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ❑ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there (**IS NOT**) or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

File(s) No. _____

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

File(s) No. _____

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

DS MH RW

7. Chelan County is hereby given consent to enter the property(ies) listed above.

DS MH RW

8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

DS MH RW

9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

DS MH RW

10. I certify that this application has been made with the consent of the lawful property owner(s).

DS MH RW

11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

SEPA[1] Environmental Checklist

RECEIVED
FEB 24 2026
CHELAN COUNTY
Community Development

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

   Wenatchee, WA 98801
   5409-630-7917
   ryanw@pacificengineering.net

4. **Date checklist prepared:**

   February 2026

5. **Agency requesting checklist:**

   Chelan County

6. **Proposed timing of schedule (including phasing, if applicable):**

   The application will follow the Chelan County process for Comprehensive Plan Map Amendments.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   No.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   None.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

   No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

    Comprehensive Plan Map Amendment and Zoning Map Amendment.

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 22.0 acres from Commercial Forest (FC) to Rural Residential/Resource 10 (RR 10). The property is located at 10705 Fox Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 39.

The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential use. The adjacent properties to the west and south are zoned RR 10, which is the zone that the subject property is proposed to be changed to. Further, the property to the west has been approved for a cluster subdivision with lot sizes less than one acre.

Chelan County's land-use history includes longstanding patterns of rural residential living, small-scale agriculture, and mixed rural uses - not just forest production. Rural residential use is already occurring on the subject property and nearby. Changing from FC to RR10 is consistent with these established patterns when the land is no longer primarily suited for long-term commercial forest production and instead better matches rural residential use. The economic vitality of commercial forestry has decreased, most significantly on small parcels where the scale of merchantable timber costs more to harvest than it produces in revenue.

Because RR 10 is part of the Rural Residential/Resource zoning designations, it fits within the GMA's requirement to maintain rural character while still accommodating:

- Rural housing needs (1 unit per 10 acres),
- Low-density development compatible with natural landscapes, and
- Land uses that do not require full urban services.

Thus, rezoning to RR10 is consistent with the Comprehensive Plan's rural element.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The property is located at 10705 Fox Road, Leavenworth, WA, within Section 32, T 25N, R 18E.W.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**

~60%

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Soil mapped for the property on the USGS soil survey website (https://websoilsurvey.nrcs.usda.gov) is Cle Elum loam, 30 to 60 percent slopes (80) which is listed as not prime farmland.

None of the soil will be removed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

According to the Chelan County online GIS mapping tool, the subject property contains erosive soils, but does not contain known geologically hazardous areas of landslide potential.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**

No filling, excavation or grading is proposed.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**

No.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There will be no change in impervious surfaces.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

None.

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

None.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No.

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**

None.

3. Water

Find help answering water questions[5]

a. **Surface:**

Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

   The DNR stream typing map shows a type N stream but a stream typing has not been completed.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

   No.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

   None.

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air
[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

   No.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

   No.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

   No.

b. **Ground:**
Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No.

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   No waste material will be discharged.

c. **Water Runoff (including stormwater):**

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   There will be no change in stormwater runoff.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None.

4. Plants

Find help answering plants questions

a. Check the types of vegetation found on the site:

☒ **deciduous tree: alder, maple, aspen, other**

☒ **evergreen tree: fir, cedar, pine, other**

☒ **shrubs**

☒ **grass**

☐ **pasture**

☐ **crop or grain**

☐ **orchards, vineyards, or other permanent crops.**

☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

☐ **water plants: water lily, eelgrass, milfoil, other**

☐ **other types of vegetation**

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened and endangered species known to be on or near the site.

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Showy Stickseed (*Hackelia venusta*) – Endangered
- Wenatchee Mountains Checkermallow (*Sidalcea oregana var. calva*) – Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site as no development is proposed.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include:

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. **List any threatened and endangered species known to be on or near the site.**

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Canada Lynx (*Lynx canadensis*) - Threatened
- Gray Wolf (*Canis lupus*) - Endangered
- North American Wolverine (*Gulo gulo luscus*) – Threatened
- Mt. Rainier White-tailed Ptarmigan (*Lagopus leucura rainierensis*) – Threatened
- Northern Spotted Owl (*Strix occidentalis caruina*) - Threatened
- Yellow-billed Cuckoo (*Coccyzus americanus*) -Threatened
- Bull Trout (*Salvelinus confluentus*) - Threatened
- Monarch Butterfly (*Danaus Plexippus*) – Proposed Threatened
- Suckley's Cuckoo Bumble Bee (*Bombus suckleyi*) – Proposed Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

c. **Is the site part of a migration route? If so, explain.**

No.

d. **Proposed measures to preserve or enhance wildlife, if any.**

None.

e. **List any invasive animal species known to be on or near the site.**

None known.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

   The plan amendment does not have energy needs.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

   No.

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

   None.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

   No.

   1. **Describe any known or possible contamination at the site from present or past uses.**

      None known.

   2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

      None known.

   3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

      None known.

   4. **Describe special emergency services that might be required.**

      None known.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   None.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   The comprehensive plan map amendment will not generate noise.

3. **Proposed measures to reduce or control noise impacts, if any:**

   None.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

   The subject property is currently used for residential purposes. Although it is zoned Commercial Forest (FC), rural residential use is already occurring on the site.

   Adjacent properties to the west and south are zoned Rural Residential/Resource 10 (RR10) and are developed or planned for residential use. The property to the west has been approved for a cluster subdivision with lot sizes less than one acre. The adjacent property to the north is used for residential purposes, while the property to the east is undeveloped.

   The surrounding parcels reflect the current residential land use of the Project Site and surrounding area, rather than active commercial forestry. Given that rural residential use is already occurring on the subject property and on adjacent lands, the proposed rezone from FC to RR10 would align the zoning with existing land use patterns. The proposal would not introduce new urban or intensive commercial activities and will not adversely affect current land uses on nearby or adjacent properties.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

The site has not been used as working farm or forest land. The property is not in a forest land tax designation.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

   No.

c. Describe any structures on the site.

One (1) single-family residence is present on the Project Site.

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

Commercial Forest Lands (FC).

f. What is the current comprehensive plan designation of the site?

Commercial Forest Lands (FC).

g. If applicable, what is the current shoreline master program designation of the site?

N/A.

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Yes, the Project Site is mapped by the WDFW PHS online mapping tool as containing potential shrubsteppe habitat, common sharp-tailed snake (*Contia tenuis*), northern spotted owl (*Strix occidentalis*), and golden eagle (*Aquila chrysaetos*) habitat. All Priority habitats are considered critical areas by Chelan County Code (CCC) 11.78.010(2). A potential type N stream is mapped on the property. However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

i. Approximately how many people would reside or work in the completed project?

None.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

None proposed.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**

None proposed.

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None proposed.

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None proposed.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

No structures proposed.

b. **What views in the immediate vicinity would be altered or obstructed?**

No.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

None proposed.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

---

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing
[13] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics
[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

None.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

No.

c. **What existing off-site sources of light or glare may affect your proposal?**

None.

d. **Proposed measures to reduce or control light and glare impacts, if any:**

None proposed.

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?**

Hiking, bicycling, and horseback riding occur in the vicinity.

b. **Would the proposed project displace any existing recreational uses? If so, describe.**

No.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**

None proposed.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

No.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.**

According to the DAHP WISAARD online mapping tool, a GLO trail is located approximately 0.4 miles to the west of the subject parcel. No other GLO features are located within the project vicinity.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.**

The DAHP WISAARD online mapping tool was used.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.**

None proposed.

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**

Stevens Canyon Road (County road) fronts the property on the west side. No new access is proposed.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?**

No. The nearest transit stop is in Leavenworth, approximately 2.5 miles to the southwest.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**

No.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**

No.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

None.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation

No.

g. **Proposed measures to reduce or control transportation impacts, if any:**

None proposed.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

No.

b. **Proposed measures to reduce or control direct impacts on public services, if any.**

None proposed.

16. Utilities

Find help answering utilities questions[18]

a. **Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:**

b. **Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.**

None proposed.

[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

The proposal may result in construction of a new onsite septic system in the future. Future construction could increase storm water runoff and emissions during construction.

- **Proposed measures to avoid or reduce such increases are:**

  All future development will comply with local state and federal regulations including critical areas, storm water management and onsite septic requirements.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

Any future site development would be low intensity land uses, with one dwelling unit per 10 acres. Single-family residential development could result in the removal of vegetation on the Project Site. As the site contains critical areas per the WDFW PHS online mapping tool, future environmental review would be necessary.

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

  Compliance with Chelan County Critical area regulations at the time of development.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not deplete energy or natural resources. Leavenworth is served by Chelan County PUD which provides abundant clean, renewable energy.

- **Proposed measures to protect or conserve energy and natural resources are:**

  Future development is likely to use low energy lighting such as LEDs and will comply with the energy code in effect at the time of building.

[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

As the site contains critical areas per the WDFW PHS online mapping tool, future environmental review would be necessary before development could occur. Single-family residential development could result in the removal of vegetation on the Project Site.

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

  Compliance with Chelan County Critical area regulations at the time of development.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

The property is not located in the shoreline zone and is not regulated by the Shoreline Management Act or Chelan County Shoreline Master Program.

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

  Future development of the property would meet all county regulations for land use.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

   Future residential development could result in a slight increase in vehicle trips and the potential for more emergency service needs. Additional residences may generate more daily trips to and from the site, including commuter, school, and service-related travel.

   However, the anticipated increase in demand is expected to be minimal and consistent with rural residential development patterns in the surrounding area as the subject property is adjacent to parcels already zoned RR 10. The property is located in an area already characterized by residential uses at similar or smaller lot sizes, and existing transportation infrastructure and public services currently serve comparable development in the vicinity. Residential development due to the rezone would be more consistent with the surrounding rural density pattern.

   - **Proposed measures to reduce or respond to such demand(s) are:**

     Compliance with Chelan County Code at the time of development.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal will not conflict with any laws for the protection of the environment.

SUBJECT: Michael Hellickson Application for Comprehensive Plan Map Amendment

Chelan County Code 14.14.050 Application for Comprehensive Plan Map Amendment Review Criteria.

1. **A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.**

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 22.0 acres from Commercial Forest (FC) to Rural Residential/Resource 10 (RR 10). The property is located at 10705 Fox Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 39.

The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential use. The adjacent properties to the west and south are zoned RR 10, which is the zone that the subject property is proposed to be changed to. Further, the property to the west has been approved for a cluster subdivision with lot sizes less than one acre.

Chelan County's land-use history includes longstanding patterns of rural residential living, small-scale agriculture, and mixed rural uses—not just forest production. Rural residential use is already occurring on the subject property and nearby. Changing from FC to RR 10 is consistent with these established patterns when the land is no longer primarily suited for long-term commercial forest production and instead better matches rural residential use. The economic vitality of commercial forestry has decreased, most significantly on small parcels where the scale of merchantable timber costs more to harvest than it produces in revenue.

Because RR 10 is part of the Rural Residential/Resource zoning designations, it fits within the GMA's requirement to maintain rural character while still accommodating:

- Rural housing needs (1 unit per 10 acres),
- Low-density development compatible with natural landscapes, and
- Land uses that do not require full urban services.

Thus, rezoning to RR 10 is consistent with the Comprehensive Plan's rural element.

2. Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.

Growth Management Act Goals

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for rural residential use, while the demand for residential properties in the Leavenworth area is high.

RCW 36.70A.020(1) encourages urban growth. The property is not located in an urban growth area.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

RR 10 maintains very low rural density (1 unit per 10 acres), which avoids suburban sprawl. When FC-designated land is no longer viable as commercial forestland, RR 10 provides a controlled, low-impact rural development path without fragmenting the landscape.
The County Comprehensive Plan notes that parts of the county have transitioned over time to a mix of rural residential and small-scale agricultural/recreational uses, reflecting organic rural development rather than sprawl.

RCW 36.70A.020(4) Aims to plan for housing, including accommodating housing affordable to all economic segments of the population of this state and promotes a variety of residential densities and housing types. RR 10 provides rural housing opportunities at very low densities, helping the county offer a spectrum of housing choices—from urban to rural—consistent with the GMA.

RR 10 zoning accommodates rural households without demanding urban services, consistent with GMA rural planning.

RCW 36.70A.020(5) encourages economic development throughout the state that is consistent with adopted comprehensive plans, promotes economic opportunity for all citizens of this state including recruitment of new businesses and encourages growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

When land is no longer suited to economically viable commercial forestry, maintaining it in FC zoning no longer supports natural resource industries. Transitioning to RR 10 can support small-scale agricultural, home-based, or recreation-oriented rural uses, which the County Comprehensive Plan recognizes as emerging rural economic sectors.

RCW 36.70A.020(8) emphasizes natural resource industries. The parcel no longer meets criteria for productive forestland, therefore re-designating it does not undermine forestry

resource goals. It avoids conflicts where residential expectations and industrial forestry activities would clash, thereby protecting truly productive forestlands elsewhere.

RCW 36.70A.020(9) urges to retain open space and green space, enhance recreational opportunities, enhance fish and wildlife habitat, increase access to natural resource lands. RR 10's very low density preserves large parcels, maintains rural open space character, and protects environmental features—including wildlife habitat recognized in Chelan County's diverse landscapes. The subject property is already developed with one single family residence which limits the potential for new residences to only one thereby continuing to provide important attributes associated with open space.

RCW 36.70A.020(10) notes the importance to protect and enhance the environment and enhance the state's high quality of life, including air and water quality, and the availability of water. RR 10's low density reduces impacts compared to more intense zoning. Large lots help preserve vegetation, maintain infiltration, and reduce impervious surfaces

The proposal is consistent with applicable county-wide planning policies because it aligns zoning with actual land suitability, helps differentiate real resource lands from transitional rural lands, honors countywide rural character and environmental objectives, and implements the County's Comprehensive Plan vision.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

The Comprehensive Plan documents Chelan County's historic and ongoing mixture of uses in rural areas, including rural residential living, forest practices, agriculture, and recreation-supported rural development. The Plan notes that over the last twenty years, portions of the county have transitioned toward vineyards, wineries, smaller-scale agriculture, and recreational tourism, reflecting a diversified rural economy and land-use pattern.

RR 10 is designed specifically for rural residential and resource-compatible uses on large lots. When a parcel is no longer suited for commercial forestry, RR 10 better matches the actual rural conditions and emerging land-use trends documented in the Comprehensive Plan.

RR 10's 1-unit-per-10-acre density is consistent with rural development patterns envisioned in the Rural Element. By maintaining large parcels, RR 10 preserves open space, visual character, and natural landscapes, supporting the Comprehensive Plan's rural goals.

The Resource Element of the Comprehensive Plan emphasizes that land designated as resource land should reflect its actual long-term viability for commercial timber, agriculture, or mineral extraction. When lands—because of location, soils, slope, fragmentation, or surrounding non-forest uses—are not truly productive forestlands, they are more appropriately placed in a rural residential designation.

The Housing Element of the Comprehensive Plan identifies a need to plan for a range of housing types and densities, including low-density rural housing that fits Chelan County's settlement patterns. RR 10 provides low-density rural housing opportunities, consistent with the Housing Element's direction to maintain rural living options while balancing environmental and infrastructure constraints. The proposed amendment broadens the county's available rural residential land base without promoting sprawl because RR 10 remains a large-lot designation.

Chelan County's planning framework acknowledges the county's diverse natural landscapes—including shrub-steppe, ponderosa forest, wetlands, and alpine meadows—and emphasizes maintaining these habitats as part of rural character and ecosystem function. RR 10 supports these values because large lots (10 acres+) preserve open space, wildlife habitat, and natural features and maintains environmental integrity more effectively than more intense residential zoning would.

The following goals and policies are directly supported by the proposed map amendment

Land Use Element

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County

GOAL LU 11: Preserve open space for the enjoyment of County residents and visitors.

Rationale: Open space is a valuable resource for the enjoyment of residents and visitors. The retention of open space helps to maintain the natural beauty and rural character of the County.

Rural Element

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Rationale: Residents who choose to live in the rural areas need to realize that their lifestyle has an impact on the natural environment and efforts need to be made to find and maintain a balance between human activity and the natural environment.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Rationale: There is value in rural lands that have in the economic vitality, rural lifestyles, and healthy environments.

Goal RE 3: Develop at densities such that demands will not be created for urban levels of public services and facilities in rural areas.

Goal Rationale: Development in rural areas should not be at densities which require urban levels of service. Development at lower densities will also help protect the rural quality of life.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

The Comprehensive Plan recognizes Chelan County's historically rural development pattern, including rural residential living alongside resource uses. RR 10 implements this rural form by allowing very low-density residential and resource-compatible uses that maintain open space and rural character.

The Land Use Element directs that designations should reflect actual land suitability and long-term function. Where parcels are not contributing to long-term commercial forestry—due to location, site constraints, parcelization, or surrounding rural residential uses—an RR 10 designation provides a more accurate policy fit than FC, while still preserving a low-intensity rural pattern.

Chelan County Code Title 11 expressly states that zoning districts implement the Comprehensive Plan's goals, policies, and land use designations. RR10's district intent is to allow rural development and resource uses consistent with the Plan's rural provisions and to function as a transition between resource lands and areas of more intense rural/urban development—exactly the role needed where FC is no longer appropriate.

The Resource Element seeks to protect genuine resource lands while accurately designating lands according to their long-term commercial significance. Where a site does not meet the attributes for long-term commercial forestry, reclassifying to RR 10 avoids "over-designation" as FC and prevents incompatibilities between industrial forestry and rural residential use.

Relocating non-viable FC lands into RR 10 reduces friction between rural residents and industrial forestry operations and thereby helps conserve truly productive forestlands elsewhere, consistent with the Plan's resource protection intent. Where the subject site is not suited to long-term commercial forestry, remaining in FC conflicts with FC's stated purpose; RR 10 aligns with the Plan-implementing intent statements.

The following are the locational guidelines for the RR 10 zone which the application complies with.

1. Geographical and Geological Characteristics. The area is predominantly rural in character. Soil characteristics, steep slopes or other physical constraints to development may be present. Significant areas of undeveloped open space may exist.
2. Natural Resources. The area may have agricultural or forest land practices of both small scale and/or commercial significance. The area may also be adjacent to designated resource lands.
3. Public Services. Uses do not require the extension or provision of urban level services. These areas are rural in character and may have access or limited access to rural governmental services and infrastructure. These areas may have the potential to be provided with rural governmental services within the 20 year planning period.
4. Existing Land Uses. Dispersed single family residences, farms or forest management activities and other rural development may be present. Predominant parcel sizes are 10 acres or larger.

5. A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, of if not, what changes to these elements would be required.

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

The Capital Facilities Element specifies that capital facilities—such as sewer, water systems, fire protection, and other infrastructure—must be planned and sized according to the intensity of expected development. RR 10 is a low-density rural land-use designation which is specifically intended not to require extension of urban services. RR 10 development patterns are consistent with rural infrastructure expectations and do not place urban-level demands on capital facilities. Because FC and RR 10 are both rural designations, but RR 10 remains low-intensity, the amendment does not create new burdens on capital facilities beyond what the Capital Facilities Element anticipates for rural areas.

The Transportation Element acknowledges that rural transportation networks are designed for low-volume, low-intensity traffic loads. RR 10 development generates significantly fewer trips than urban or suburban designations, and its density is fully compatible with roadway design and capacity expectations for rural areas. By contrast, FC uses—such as timber harvest activities—may require intermittent heavy trucking. RR 10 reduces peak industrial haul traffic and results in a more predictable, low-impact traffic pattern consistent with the Transportation Element's rural mobility standards

The Transportation Element calls for ensuring adequate access, maintaining safety, and avoiding transportation impacts that exceed the capabilities of rural roads. Because RR 10 densities produce minimal increases in traffic, the amendment will not trigger demands for roadway widening, turn lanes, or major upgrades. Thus, the map amendment is consistent with the Transportation Element's goal of maintaining an efficient transportation network without unwarranted capital improvements.

6. For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.

The surrounding land uses are primarily residential. The adjacent property to the north is developed with a residence and accessory dwelling unit. Properties to the west and south are zoned RR 10. The change in the map designation would be indistinguishable from surrounding land uses.

RR 10 Is more appropriate than FC because it reflects actual land suitability because the parcel is not truly "commercial forest land" based on FC's intended purpose.

Chelan County's zoning code defines Commercial Forest Lands (FC) as areas intended for the long-term conservation of commercial forest uses, preserving land that is of long-term commercial significance for timber production and related activities. If a parcel is surrounded by rural residential uses and lacks physical or economic viability for long-term forestry, then it no longer meets FC's intended purpose.

RR 10 is more appropriate because it is explicitly designed as a rural residential/resource zone that accommodates low-density rural housing, small-scale agriculture, forestry at a

non-industrial scale and open space preservation. It is also intended to function as a transition between resource lands and more intensively developed rural areas. Therefore, if the property is not functioning as productive commercial forest, RR 10 is the accurate, policy-supported classification.

RR 10 reduces land-use conflicts that occur when non-forest uses sit within FC zones. Because FC zoning is intended for industrial-scale forestry, it anticipates heavy equipment use, timber haul routes and intensive forest management activity. RR 10 is specifically intended to provide a rural environment with compatible uses—open space, low-density homes, small-scale agriculture, and rural quietude—reducing these conflicts and aligning with the Comprehensive Plan's rural compatibility goals.

7. Will the proposed map amendment affect lands designated as resource lands of long term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?

The parcel is designated as Commercial Forestland; however, is no longer economically viable for commercial timber harvest, the amendment corrects a mis-designation. The Comprehensive Plan requires that resource lands be designated based on actual long-term viability and commercial significance. The Resource Element provides that resource designations must be accurate and protect real resource lands, rather than misclassify marginal or unsuitable land.

Critical areas are located on the property but the change to RR 10 does not remove, diminish, or alter critical area protections. The zoning code makes clear that critical area overlay regulations apply in addition to the base zone. The map amendment does not change buffer requirements, development limitations, habitat protections, geologic hazard restrictions or wetland rules. Given RR 10's low intensity, the amendment reduces potential disturbance to critical areas by reducing possibilities for heavy equipment operations, haul routes or new forest management roads.

8. Explain how the proposed amendment would affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The proposed amendment increases the supply of rural residential land in a manner consistent With the Comprehensive Plan. RR 10 is one of Chelan County's rural zoning districts intended to support rural housing, small-scale agriculture, open space, and transitional rural land uses. By reclassifying land from FC to RR 10, the County slightly increases the amount of land available for very low-density rural housing. This helps the County meet its obligation under the GMA to provide a variety of rural densities and housing types across the 20-year planning horizon.

The proposed amendment does not reduce the supply of land needed for urban-level growth. The Comprehensive Plan specifies that urban growth should occur inside Urban Growth Areas. Rural zones—including both FC and RR 10—are not part of the County's urban growth capacity.

The proposed amendment does not reduce land available for future city expansions, for residential subdivisions, or for higher-density development. The property will remain outside the Leavenworth UGA and cannot be urbanized, extended with sewer, or converted to higher-density development unless the UGA is expanded through a formal process. Thus, the amendment does not materially affect the county's 20-year urban growth land supply.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The proposed change would provide the applicant with a designation suitable for reasonable rural use of the property. The public will gain predictable, low-density rural development that does not strain facilities or alter rural character. The County maintains consistency with its long-range planning vision. This strengthens both the welfare of the community and the stability of the County's planning framework.

The Comprehensive Plan's Capital Facilities Element emphasizes avoiding unnecessary expenditures by ensuring that land uses do not require new, costly infrastructure beyond rural service levels. RR 10 does not require urban sewer service, municipal water expansion, urban roads or major capital facility upgrades. This benefits the public by minimizing long-term public financial obligations. It benefits the applicant by providing a clear understanding of service expectations and ensuring their land use aligns with available infrastructure.

CHELAN COUNTY
DEPARTMENT OF COMMUNITY DEVELOPMENT
316 WASHINGTON STREET, SUITE 301
WENATCHEE, WA 98801
(509) 667-6225

TO: Chelan County Board of County Commissioners
FROM: Chelan County Community Development
HEARING DATE: November 10, 2026
FILE NUMBER: CPA 26-060 McMahon

RECOMMENDED MOTION

The Chelan County Planning Commission, at their duly advertised public hearing on September 23, 2026 made a motion to recommend approval (Attachment 1) of CPA 26-063 requested comprehensive plan map amendment from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). However, the Planning Commission vote was 4 to 4 leading to the failure of the motion and going forward to the Board of County Commissioners with no formal recommendation.

GENERAL INFORMATION

Applicant	Dwayne McMahon
Planning Commission Notice of Hearing Published	October 3, 2026
Planning Commission Hearing	October 14, 2026
Board of County Commissioners Hearing	November 10, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance was issued under WAC 107-11-340 on April 30, 2026. The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The decision was made after a review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

The Chelan Douglas Health District submitted comments indicating they have no objection to the approval of this proposal.

City of Leavenworth provided the following comments: “Page 2 of the application form indicates that the water source for this property is/will be a single private well; however, the City of Leavenworth currently provides service to the residence on this property. If the purpose of the proposed map amendment is to allow for additional units on this property, the owner should be

aware that consideration for the projection of water use for properties within the city is a priority and paramount prior to granting water outside of the city. Granting water connections outside of the city UGA is not a right, and the intent is to ensure water is available to the citizens of Leavenworth. The city does not guarantee any availability of public water for future development of this lot."

Public Comment:
The Icicle Creek Watershed Council, a community-based organization, provided comments March 18 and May 13, 2026 relaying their concerns regarding potential impacts of increased residential density and development within the Icicle Creek floodplain. These concerns focus on impacts to floodplain function, watershed resilience, habitat, and long-term community flood risk due to the majority of the subject parcel being located in said floodplain.

Comments were received from a number of citizens. Their comments have been summarized below; the full text of each comment letter can be found in Attachment 2.

Bruce Williams:
Opposes the approval of the designation based on the following

- Proposal is inconsistent with the Growth Management Act as well as the purposes of the Chelan County Frequently Flooded Overlay District.
- The proposal is inconsistent with the policies for the Rural Element in the comprehensive plan
- The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek which are RR-10
- The change in zoning would allow the parcel to be subdivided, increasing the density of development in the floodplain
- The increase in density would degrade opportunities for improving salmon habitat and would exacerbate flooding in the area
- The proposal has the potential to be an important precedent that could affect the entire lower icicle
- The subject parcel was inundated by flood in 2025, 2006, 1995, 1990 and partially underwater during lesser flooding periods

In addition to the above concerns, Mr. Williams provide a link to a Reach Assessment commissioned by the Yakama Nation which encouraged preservation and protection of the floodplain.

Mara and Brian Boham:

- Do not support the designation change due to location in floodplain
- Concerned regarding displacement of floodwaters onto adjacent property if site should be developed under RR2.5 zoning
- Would set a precedent putting pressure on neighboring properties

Christine and Jeffrey Parsons:
Object to the comprehensive plan map amendment due to the following:

- Location in the floodplain

- Future development under the proposed designation could result in a “rise” to the floodplain with the potential to impact neighboring properties
- The area is not safe for fill and development due to past flooding incidents
- Could impact salmon habitat

Residents Coalition of Chelan County RC_3:
Indicated their group has significant concerns due to the following reasons:

- The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek which are RR-10
- The change in zoning would allow the parcel to be subdivided, increasing the density of development in the floodplain
- The increase in density would degrade opportunities for improving salmon habitat and would exacerbate flooding in the area
- The proposal has the potential to be an important precedent that could affect the entire lower Icicle

The subject parcel was inundated by flood in both 2025 and 2006.

60-Day Notice
Sent to Department of Commerce July 20, 2026.

PROJECT DESCRIPTION – CPA 26-060 McMahon
The applicant is requesting a comprehensive plan map amendment to change the designation of a 5-acre parcel from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The property is developed with one single family residence taking access off East Leavenworth Road. The site is also known as parcel number 241723510480.

COMPREHENSIVE PLAN

Chelan County conducts an annual review of development regulation text amendments for compliance with the adopted Comprehensive Plan. The Comprehensive Plan represents the long-term vision for future land uses and development. For the county-initiated text amendments, the merits of the requested change must be demonstrated as being consistent with adopted goals and policies.
The following Comprehensive Plan goals and policies are relevant to the proposal:

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

GOAL CL 1: Identify and protect critical areas from adverse environmental impacts while providing for reasonable use of private property

Policy CL 1.3: Classify, designate and protect all critical areas, including frequently flooded areas, wetlands, fish and wildlife habitat conservation areas, aquifer recharge areas and geologically hazardous areas using best available science, pursuant to RCW 36.70A.172 and WAC 365-190.

Policy CL 1.4: Regulate development in floodplains to protect property and mitigate the loss of floodplain storage capacity.

Policy CL 1.5: Discourage development on unstable soils or steep slopes and in areas susceptible to landslide, flood, or avalanche.

Policy CL 1.14: In designating and protecting critical areas, the County shall use best available science to develop policies and development regulations. The County should also give special consideration to conservation or protection measures necessary to preserve or enhance anadromous fisheries.

Policy CL 1.16: The goals and policies of the Chelan County Shoreline Master Program, as amended, are considered an element of the comprehensive plan, and are included by reference as if fully set forth
herein.

Policy CL 1.17: Support ongoing watershed planning efforts.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

Chelan County Shoreline Master Program Flood Hazard Prevention Goals and Objectives

Goal FLOOD-1. Recognize the hydrologic functions of floodplains, and protect frequently flooded areas.

Objective FLOOD-1.1. Avoid or mitigate land use practices that may impede the flow of floodwater or cause danger to life or property. Mitigate the loss of floodplain storage capacity to avoid greater impact of flooding downstream.

Objective FLOOD-1.2. Implement the 100-year floodplain designations of the Federal Emergency Management Agency and the National Flood Insurance Program.

Objective FLOOD-1.5. Coordinate shoreline jurisdiction flood hazard prevention policies and regulations with Growth Management Act provisions to protect critical areas including frequently flooded areas.

REVIEW CRITERIA
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 2) Reduce Sprawl, 4) Housing, and 5) Economic Development, 9) Open Space and Recreation and 14) Climate Change and Resiliency. The Growth Management Act (GMA) encourages the provision of a variety of densities in order to accommodate projected growth while maintaining the rural character.

The requested map amendment to RR 2.5 would provide for the site to be divided into one additional lot. The parcel is also located within the floodplain of the Icicle Creek and the existing residence on the site is located in the southwest corner of the property which is the only part of the lot that is not in the floodplain. Amending the designation of the site could result in additional development in the floodplain.

Conclusion: The proposal would not be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies as it could result in additional development in the floodplain.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area, however, it would be in direct conflict with goals and objectives which support the preservation of natural functions of critical areas.

Conclusion: The proposal would not be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the purpose of the RR 2.5 designation is intended to act as a buffer or transition area between higher and lower densities. Properties west of the site are designated RR2.5. Most, if not all properties north, east and southeast of the site are designated RR10 and are located wholly or partially within the floodplain.

Conclusion: The amendment would not comply with comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel has frontage along East Leavenworth Road.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are developed with single family residences with exception of a fish hatchery due south across East Leavenworth Road.

Conclusion: The designation of the site from RR10 to RR2.5 could adversely affect the surrounding area by the introduction of additional development within a floodplain.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The RR2.5 designation is intended to be located in areas with limited resource management potential. The subject site is located in the floodplain of Icicle Creek which is a significant resource in the area and management of the floodplain could be hindered by additional development.

Conclusion: The amendment could adversely affect designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to potentially develop one additional lot.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities. However, the interests of the public would not be served by the possibility of additional development in the floodplain.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area. The proposal would not serve the public health, safety and welfare.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.

4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026, pursuant to RCW 36.70A.106.
6. The location and characteristics are not consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 2.5 as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would not be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would not comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would adversely affect the surrounding land uses.
4. The amendment would adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are not consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

2026 Comprehensive Plan Map Amendment
Staff Report

TO:	Chelan County Planning Commission
FROM:	Chelan County Community Development
HEARING DATE:	October 14, 2026
FILE NUMBER:	CPA 26-060 McMahon

RECOMMENDED MOTION

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

A. Re-designation of the site from Rural Resource/Residential 10 (RR10) to Rural Residential 2.5 (RR2.5) would not comply with applicable Chelan County goals and policies pursuant to the findings of fact and conclusions of law cited below.

GENERAL INFORMATION

Planning Commission Workshop	August 26, 2026
Notice of Application to Surrounding Properties	March 5, 2026
Planning Commission Notice of Hearing Published	October 3, 3026
Planning Commission Hearing	October 14, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance (DNS) was issued under WAC 197-11-340(2) for CPA 26-007 on April 30, 2026 (Attachment 1). The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030 (2)(c). The decision was made after review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

The Chelan Douglas Health District submitted comments indicating they have no objection to the approval of this proposal.

City of Leavenworth provided the following comments: “Page 2 of the application form indicates that the water source for this property is/will be a single private well; however, the City of Leavenworth currently provides service to the residence on this property. If the purpose of the proposed map amendment is to

allow for additional units on this property, the owner should be aware that consideration for the projection of water use for properties within the city is a priority and paramount prior to granting water outside of the city. Granting water connections outside of the city UGA is not a right, and the intent is to ensure water is available to the citizens of Leavenworth. The city does not guarantee any availability of public water for future development of this lot."

The Icicle Creek Watershed Council, a community-based organization, provided comments March 18 and May 13, 2026 relaying their concerns regarding potential impacts of increased residential density and development within the Icicle Creek floodplain. These concerns focus on impacts to floodplain function, watershed resilience, habitat, and long term community flood risk due to the majority of the subject parcel being located in said floodplain.

Public Comment:

Comments were received from a number of citizens. Their comments have been summarized below; the full text of each comment letter can be found in Attachment 2.

Bruce Williams:
Opposes the approval of the designation based on the following

- Proposal is inconsistent with the Growth Management Act as well as the purposes of the Chelan County Frequently Flooded Overlay District.
- The proposal is inconsistent with the policies for the Rural Element in the comprehensive plan
- The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek which are RR-10
- The change in zoning would allow the parcel to be subdivided, increasing the density of development in the floodplain
- The increase in density would degrade opportunities for improving salmon habitat and would exacerbate flooding in the area
- The proposal has the potential to be an important precedent that could affect the entire lower icicle
- The subject parcel was inundated by flood in 2025, 2006, 1995, 1990 and partially underwater during lesser flooding periods

In addition to the above concerns, Mr. Williams provide a link to a Reach Assessment commissioned by the Yakama Nation which encouraged preservation and protection of the floodplain.

Mara and Brian Boham:

- Do not support the designation change due to location in floodplain
- Concerned regarding displacement of floodwaters onto adjacent property if site should be developed under RR2.5 zoning
- Would set a precedent putting pressure on neighboring properties

Christine and Jeffrey Parsons:
Object to the comprehensive plan map amendment due to the following:

- Location in the floodplain
- Future development under the proposed designation could result in a "rise" to the floodplain with the potential to impact neighboring properties
- The area is not safe for fill and development due to past flooding incidents
- Could impact salmon habitat

Residents Coalition of Chelan County RC_3:
Indicated their group has significant concerns due to the following reasons:

- The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek which are RR-10
- The change in zoning would allow the parcel to be subdivided, increasing the density of development in the floodplain

- The increase in density would degrade opportunities for improving salmon habitat and would exacerbate flooding in the area
- The proposal has the potential to be an important precedent that could affect the entire lower Icicle
- The subject parcel was inundated by flood in both 2025 and 2006.

PROJECT DESCRIPTION – CPA 26-060 McMahon

Proposal: The applicant is requesting a comprehensive plan map amendment to change the designation of a 5-acre parcel from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The property is developed with one single family residence taking access off East Leavenworth Road. The site is also known as parcel number 241723510480.

Chelan County Land Use Designations

Density: The existing Rural Residential/Resource 10 (RR10) zoning allow one dwelling unit per 10 acres. The proposed Rural Residential/Resource 2.5 (RR2.5) designation would allow the development of 1 additional lot.

Comprehensive Plan
Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan and Shoreline Master Program goals, policies and objectives are relevant to the proposed request:

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

GOAL CL 1: Identify and protect critical areas from adverse environmental impacts while providing for reasonable use of private property

Policy CL 1.3: Classify, designate and protect all critical areas, including frequently flooded areas, wetlands, fish and wildlife habitat conservation areas, aquifer recharge areas and geologically hazardous areas using best available science, pursuant to RCW 36.70A.172 and WAC 365-190.

Policy CL 1.4: Regulate development in floodplains to protect property and mitigate the loss of floodplain storage capacity.

Policy CL 1.5: Discourage development on unstable soils or steep slopes and in areas susceptible to landslide, flood, or avalanche.

Policy CL 1.14: In designating and protecting critical areas, the County shall use best available science to develop policies and development regulations. The County should also give special consideration to conservation or protection measures necessary to preserve or enhance anadromous fisheries.

Policy CL 1.16: The goals and policies of the Chelan County Shoreline Master Program, as amended, are considered an element of the comprehensive plan, and are included by reference as if fully set forth herein.

Policy CL 1.17: Support ongoing watershed planning efforts.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

Chelan County Shoreline Master Program Flood Hazard Prevention Goals and Objectives

Goal FLOOD-1. Recognize the hydrologic functions of floodplains, and protect frequently flooded areas.

Objective FLOOD-1.1. Avoid or mitigate land use practices that may impede the flow of floodwater or cause danger to life or property. Mitigate the loss of floodplain storage capacity to avoid greater impact of flooding downstream.

Objective FLOOD-1.2. Implement the 100-year floodplain designations of the Federal Emergency Management Agency and the National Flood Insurance Program.

Objective FLOOD-1.5. Coordinate shoreline jurisdiction flood hazard prevention policies and regulations with Growth Management Act provisions to protect critical areas including frequently flooded areas.

Review Criteria
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 2) Reduce Sprawl, 4) Housing, and 5) Economic Development, 9) Open Space and Recreation and 14) Climate Change and Resiliency. The Growth Management Act (GMA) encourages the provision of a variety of densities in order to accommodate projected growth while maintaining the rural character.

The requested map amendment to RR 2.5 would provide for the site to be divided into one additional lot. The parcel is also located within the floodplain of the Icicle Creek and the existing residence on the site is located in the southwest corner of the property which is the only part of the lot that is not in the floodplain. Amending the designation of the site could result in additional development in the floodplain.

Conclusion: The proposal would not be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies as it could result in additional development in the floodplain.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area, however, it would be in direct conflict with goals and objectives which support the preservation of natural functions of critical areas.

Conclusion: The proposal would not be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the purpose of the RR 2.5 designation is intended to act as a buffer or transition area between higher and lower densities. Properties west of the site are designated RR2.5. Most, if not all properties north, east and southeast of the site are designated RR10 and are located wholly or partially within the floodplain.

Conclusion: The amendment would not comply with comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel has frontage along East Leavenworth Road.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are developed with single family residences with exception of a fish hatchery due south across East Leavenworth Road.

Conclusion: The designation of the site from RR10 to RR2.5 could adversely affect the surrounding area by the introduction of additional development within a floodplain.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The RR2.5 designation is intended to be located in areas with limited resource management potential. The subject site is located in the floodplain of Icicle Creek which is a significant resource in the area and management of the floodplain could be hindered by additional development.

Conclusion: The amendment could adversely affect designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to potentially develop one additional lot.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities. However, the interests of the public would not be served by the possibility of additional development in the floodplain.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area. The proposal would not serve the public health, safety and welfare.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 30, 2026 (Attachment 3), pursuant to RCW 36.70A.106.
6. The location and characteristics of the site proposed for re-designation are not consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 2.5 as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would not be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would not comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would adversely affect the surrounding land uses.
4. The amendment would adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendment is not consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

STAFF Finding

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

The proposed Comprehensive Plan Map Amendment Rural Residential/Resource 2.5 (RR2.5) given file number CPA 2026-046, based upon the findings of fact and conclusions of law contained would not comply with relevant with adopted county goals and policies.

Hi Susan,

Two things:

1. In my comment I referred to the draft of the Reach Assessment commissioned by the Yakama Nation.
    1. It has now been finalized and is at: https://yakamafish-nsn.gov/sites/default/files/projects/Icicle%20RA%20-%20Main%20Report%20February%202026%20Final%20-%20Reduced.pdf
    2. The final version continues to say, regarding the reach near the McMahon property, "There are also some important conservation measures to consider for this reach. Because of the high fish use and restoration potential of these reaches, any undeveloped parcels within riparian zones or floodplains in this reach should be viewed as high priority for protection, including the large inside meander bend between RM 1.6 and 2.1 (river-right), and other undeveloped parcels."
2. This past week I neighbor saw the land use sign and asked me what I knew about it. She was very concerned about the proposed change and asked me if she could still comment. I told her I think she has to wait until the issue goes to the Planning Commission. Is that correct?

Thanks.

Bruce

Hi Susan,

Thank you for the notice of this that I received yesterday. (I am a neighbor.) I understand that I can comment on this until March 19.

I have two related questions:

1. What is the process for this application after March 19? (Who reviews and/or decides whether to approve? Approximate timing? etc)
2. Will there be other opportunities for public comment after March 19? (I have neighbors who are out of town and may not be able to comment before then.)

Thanks!

Subject: We oppose re-zoning McMahon lot (7948 E. Leavenworth Rd)
Date: Tuesday, March 17, 2026 10:18:37 PM
Attachments: image.png

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

To: Susan Dretke, susan.dretke@co.chelan.wa.us

We write to oppose the proposal to re-zone 7948 East Leavenworth Rd from RR10 to RR2.5.
This property, while not riverfront itself, is definitely part of the flood plain of the Icicle River.
All the properties in the flood plain of the Icicle River are currently zoned RR10. That should not be changed.
Rezoning would set a bad precedent, since others along the river could also apply for smaller minimum lot size-- in a domino effect.
For the sake of salmon and more, we need to preserve the riparian character of the entire Icicle River flood plain.
As recently as December 10, 2025 the McMahon property was all flooded except for their house-- see attached drone photo, with the property outlined in red.
The river needs to be able to flood in times of heavy rain; flooding would make subdividing into two lots catastrophic. Even if subsequent owners were to bring in lots of fill dirt to raise the elevation of a proposed house on the floodplain, that should not be legal; it only shoves flooding off onto other neighbors.
Neighboring properties are RR2.5, but they are not in the official flood plain. The buffer zone of the McMahon property needs to stay at RR10 zoning. No other lots in the flood plain are zoned RR2.5. Let's keep it that way.
Please do not grant the re-zoning request.
Sincerely,
--Barbara Rossing and Lauren Johnson, 7785 E. Leavenworth Rd

RE: CPA 26-060

Dear Ms. Dretke,

I strongly oppose the Comprehensive Plan Map Amendment proposed in CPA-26-060 for the following reasons:

- The proposal is inconsistent with the Washington Growth Management Act and the purposes of the Chelan County Frequently Flooded Overlay District.
- The proposal is inconsistent with the policies for the Rural Element in the Chelan County Comprehensive Plan.
- The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek which are RR-10.
- The change in zoning would allow the parcel to be subdivided, increasing the density of development in the floodplain.
- The increase in density would degrade opportunities for improving salmon habitat and would exacerbate flooding in the area.
- The proposal has the potential to be an important precedent that could affect the entire lower Icicle.
- The subject parcel was inundated by flood in both 2025, 2006, 1995 and 1990 and partially underwater during lesser flooding periods.

I live near the subject property and have personal knowledge of that property and how it was inundated in December 2025 and in 2006. I also have personal knowledge of how the December 2025 flood affected many houses in this neighborhood and caused E. Leavenworth Road to be closed. I am also familiar with the salmon and other wildlife that live in Icicle Creek.

Washington's Growth Management Act

The Growth Management Act (GMA) requires all counties to adopt development regulations that protect critical areas, and floodplains are explicitly designated as "frequently flooded areas" — one of the five statutory types of critical areas under RCW 36.70A.030. A rezone that increases density in a floodplain may be challenged before the **Eastern Washington Growth**

Management Hearings Board as inconsistent with GMA requirements. This is not hypothetical — the Growth Management Hearings Board previously overturned a Chelan County decision to rezone land near Leavenworth and Peshastin for 2.5-acre lots, finding a clear inconsistency between the reclassification and the planning goals and policies of the County Comprehensive Plan.

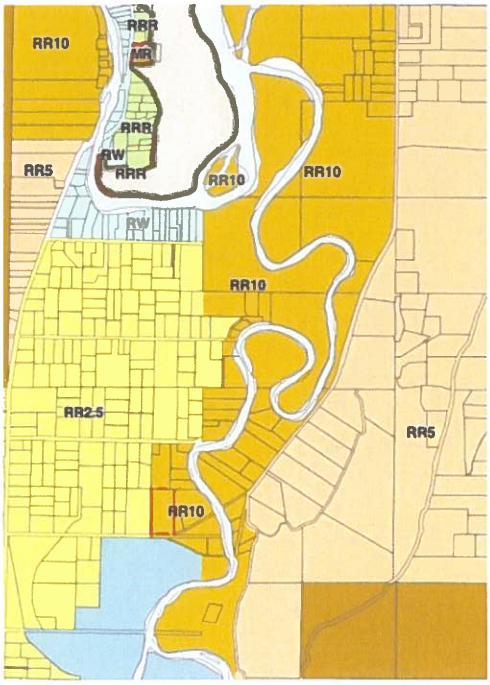
Conflict with the Frequently Flooded Areas Overlay District (FFOD)

Chelan County's own zoning code establishes the Frequently Flooded Areas Overlay District specifically to protect the important hydrologic functions of the county's 100-year floodplains — including floodways and floodway fringe areas — in order to protect human health and safety and minimize damage to property. Rezoning to smaller lots actively works against this stated purpose by intensifying development density in exactly the areas the FFOD was designed to protect.

Inconsistency with Chelan County Comprehensive Plan Goals

The County's own Comprehensive Plan contains policies protecting critical areas and rural character. Here are some of the policies:

- "Policy RE 1.1: Rural development shall avoid and mitigate impacts to critical areas, which have value as wildlife habitat and open space."
- "Policy RE 2.4: Encourage the preservation and protection of unique, rare and fragile natural features, scenic vistas, unstable bluffs, and culturally significant features."

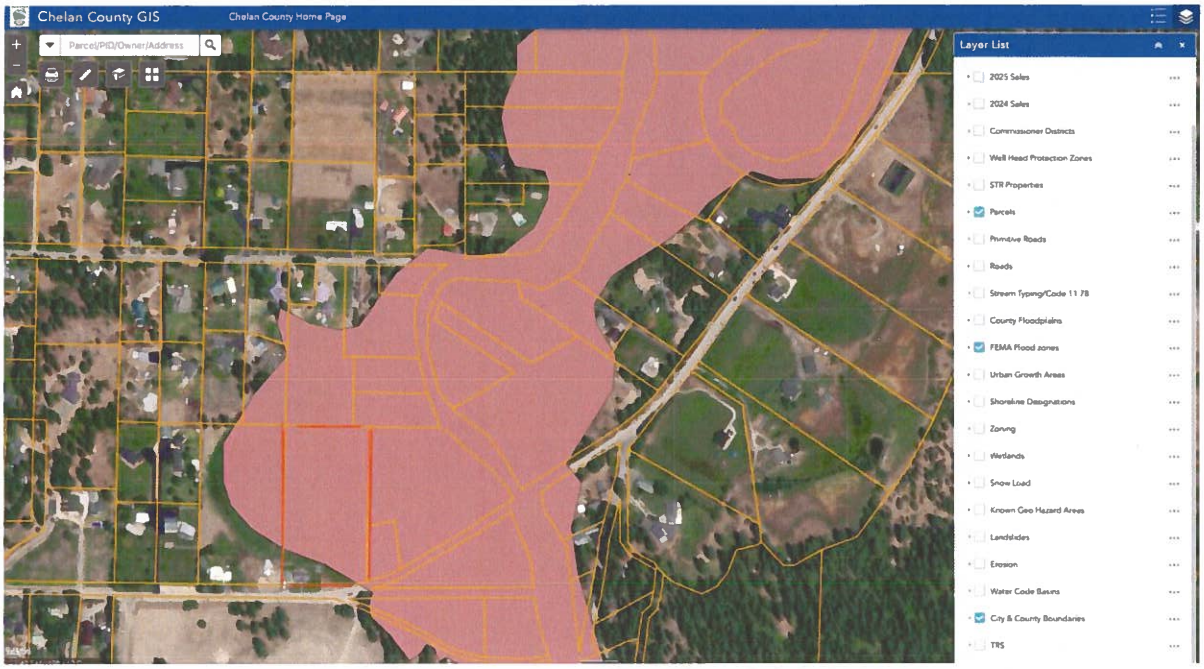


These policies are reflected in the differences between RR10 and RR 2.5 zoning.

- RR10: "These areas also provide opportunities for protecting sensitive environmental areas and creating open space typical of a rural setting."
- RR2.5: "The area has limited resource management potential."

A rezone creating greater density in a floodplain would need to demonstrate consistency with those policies — a difficult bar to clear, as the Riverstone Ranch decision showed.

Comprehensive Plan and Zoning Along the Icicle Creek

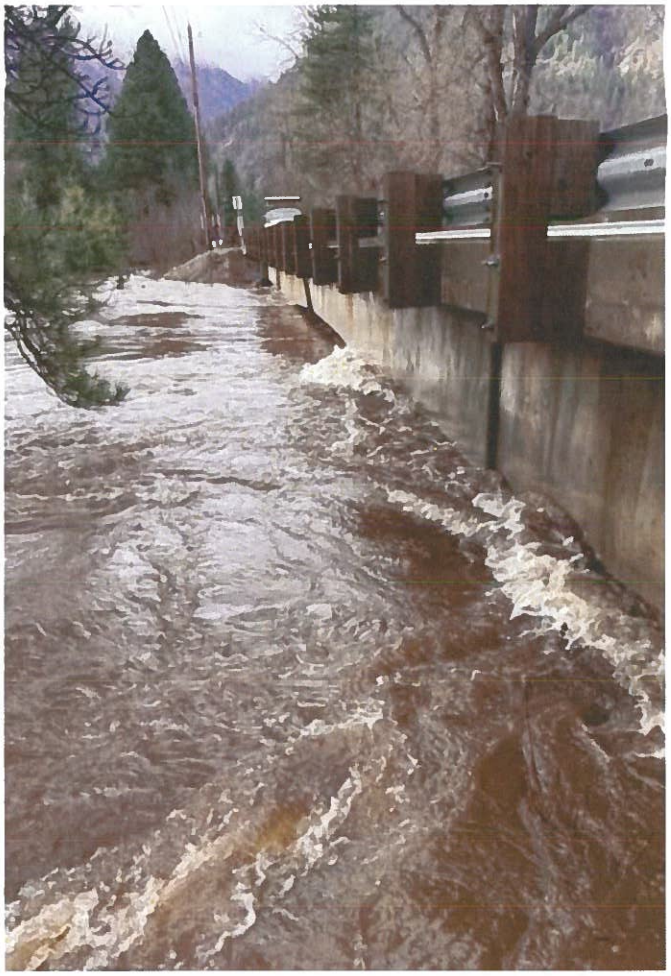


The current zoning along Icicle Creek for the properties in the riparian areas and the floodplain is RR-10. Here is a map of the zoning in the area. The subject parcel is outlined in red.

- Note that there are some large parcels along the Icicle that are currently zoned RR10. Keeping them zoned that way, and not allowing a precedent of changing the zoning to allow higher density, will be important to protecting the habitat and mitigating flood risk along the Icicle.
- The parcels to the west of the subject property are on a bench that is higher in elevation and out of the floodplain. The RR2.5 zoning makes sense for those areas. (The parcel immediately to the left is partly in and partly out of the floodplain).

Floodplain

- Wetlands, streams, and floodplains help with flood attenuation, improve water quality, recharge the water table, and are a food chain support for flora and fauna. More development means more fill, grading, and impervious cover, which reduces the floodplain's capacity to absorb and attenuate floods — increasing flood peaks for downstream properties.
- The Chelan County GIS map shows that the subject property, outlined faintly in red, is almost entirely in the floodplain. Only a small piece of it, where the existing house is located, is above the floodplain.



- This also demonstrates that the RR10 zoning closely follows the floodplain. Changing the zoning of the subject property would be inconsistent with this approach.
- The properties to the west of the subject property that are zoned RR2.5 are mostly or entirely out of the floodplain.

<u>Actual flooding</u>

- The picture below from December 2025 shows that the subject property was almost completely inundated by flooding. Only the area immediately around the existing house, out of the floodplain, stayed above the floodwaters. Some of the fences were completely underwater.

- The property was also inundated in 2006 and commonly believed to have been inundated in 1990 and 1995.
- This demonstrates that although the subject property isn't immediately adjacent to the normal course of the Icicle, it is part of the Icicle system in high water.
- In December 2025 the Icicle also flooded the crawl spaces of numerous houses. It reached the bottom of the county's East Leavenworth Road bridge as seen in the picture below.

- If the flood had been a little higher, it could have caused much more damage to houses and county infrastructure.
- It is important that the county not allow development that potentially increases flood risk.

Salmon and Fish Habitat Impacts

- Floodplains provide vital habitat for salmon and other important species, and local governments have responsibility under the Endangered Species Act to prevent harm to listed fish and other species commonly inhabiting floodplains. The Wenatchee River and Icicle Creek drainages in Chelan County are critical salmon corridors. Increased lot density means more impervious surfaces, septic systems, and riparian disturbance — all direct threats to listed species.
- The Yakama Nation is working on a Reach Assessment of the Icicle. *https://interfluve.filecamp.com/s/o/hfsR5BoNYEUAYwCR*
- The purpose of the Reach Assessment "is to document aquatic habitat conditions and hydrologic, geomorphic, and ecological processes in the lower Icicle Creek basin and to

present a comprehensive reach-based restoration strategy to address habitat limiting factors for salmon, steelhead, and bull trout. "

- The Yakama Nation is already working to re-introduce coho salmon to the Icicle. With the recommendations of the Reach Assessment, there is a potential to significantly improve salmon habitat.
- In addition to salmon, the Icicle is currently home to river otter, beaver and other wildlife. With protection, it can be a vibrant riparian community.
- In the section about the stretch of the river nearest to the subject property, the Reach Assessment states, "There are also some important conservation measures to consider for this reach. Because of the high fish use and restoration potential of these reaches, any undeveloped parcels within riparian zones or floodplains in this reach should be viewed as high priority for protection." (emphasis added)
- This is consistent with the features of RR10 zoning listed above: "opportunities for protecting sensitive environmental areas.'
- Maintaining the current zoning, and not allowing additional subdivisions and development in the floodplain, supports this "high priority" from the Reach Assessment.

Conclusion

- The current zoning of the subject property is consistent with a county policy of zoning riparian and floodplain parcels along the Icicle in RR10. The current zoning is consistent with protecting habitat along the Icicle. It is also consistent with preventing further development from exacerbating future floods. This zoning should be maintained.
- If the zoning of this floodplain property were changed to RR2.5, other large landowners are likely to ask for similar treatment. This could lead to more habitat damage and exacerbated flooding.

Thank you for considering this.

RE: Comments on Comprehensive Plan Amendment CPA-26-060

Dear Ms. Dretke,

The Icicle Creek Watershed Council (ICWC) appreciates the opportunity to provide comments on the proposed Comprehensive Plan Amendment (CPA-26-060). Based on concerns related to floodplain function, protection of critical areas, and consistency with the Chelan County Comprehensive Plan and Washington State's Growth Management Act, ICWC recommends maintaining the current zoning designation for the parcel identified in CPA-26-060.

ICWC is a community-based organization dedicated to protecting and restoring the ecological integrity of the Icicle Creek watershed through collaboration with residents, land managers, and public agencies. From this watershed stewardship perspective, ICWC is concerned about the potential impacts of increased residential density and development that could result from the proposed zoning change within the Icicle Creek floodplain.

The property is almost entirely within the Icicle Creek floodplain (Figure 1, page 3) and has been documented underwater during recent high-water events, including two floods in the early 1990s, one in 2006, and most recently in 2025 (Figure 2, page 3). These events demonstrate that much of the parcel functions as part of the active floodplain during high flows.

Under Washington State's Growth Management Act (RCW 36.70A), counties and cities are required to designate and protect "frequently flooded areas" as critical areas and adopt development regulations that protect their ecological and hydrologic functions. Floodplains are recognized not only as areas subject to flooding, but as areas that provide essential ecological functions such as floodwater storage, groundwater recharge, and fish and wildlife habitat.

Allowing additional subdivision or development within this floodplain could place future property owners at increased risk during high-water events and, more importantly, may affect the natural processes that allow floodplains to store and convey floodwaters. The stated purpose in the application is residential development. The only land out of the floodplain is occupied by the existing home, so any new development will have to occur in the floodplain. Floodplains along Icicle Creek provide important space for water to spread out during high flows, helping reduce downstream flooding while supporting riparian areas and fisheries that depend on a healthy river system.

Recognizing the importance of these natural functions, Chelan County's Comprehensive Plan places strong emphasis on protecting natural systems and limiting development impacts in rural areas. The Rural Element establishes goals to maintain a balance between human uses and the natural environment and to protect natural environmental features that support wildlife habitat, open space, and outdoor recreation. It further states that rural development should avoid and mitigate impacts to critical areas and reduce the inappropriate conversion of undeveloped land into sprawling or more intensive development patterns.

Allowing increased residential density within an active floodplain is inconsistent with these policies because floodplains function as critical environmental features that support habitat, natural hydrologic processes, and open space within the rural landscape.

Changing the zoning to allow higher density development within the floodplain could also set a precedent for similar requests along the Icicle Creek corridor, where many parcels remain zoned to reflect floodplain conditions and the importance of maintaining natural floodplain function.

Importantly, the current Rural Residential 10 (RR10) zoning designation aligns with the mapped floodplain along the lower Icicle Creek corridor, reflecting a broader planning approach to limit development in areas subject to flooding and to protect associated ecological functions. Allowing increased density on this parcel would represent a departure from this established pattern and could undermine the consistency of the County's zoning framework in managing floodplain areas.

Maintaining the current zoning framework helps preserve floodplain function, protect vital habitat, and reduce the potential for increased flood impacts along Icicle Creek.

For these reasons, ICWC recommends that the parcel remain under its current zoning designation. Thank you for the opportunity to provide comments.

Sincerely,

Sharon Lunz

Sharon Lunz
Icicle Creek Watershed Council Chair

See the following page for supporting figures, including the FEMA floodplain map and recent flood imagery for the subject parcel.

Floodplain Context and Site Conditions

Figure 2. Icicle Creek Flooding at Subject Parcel (2025 High-Water Event)

Mara and Brian Bohman
7840 E. Leavenworth Rd.
Leavenworth, WA 98826

March 17, 2026

Dear Ms. Dretke,

Thank you for the opportunity to comment on the proposed amendment to the Comprehensive Plan Map for parcel 24-17-23-510-480 from RR10 to RR2.5.

Considering the fact that this parcel is located in the floodplain for Icicle Creek, we do not support this down zoning. The below photo from the December 2025 flood illustrated this clearly, as well as historic records (subject property outlined in red).

Our property lies just outside of this zone, shown in the upper right. Allowing for development of this parcel, assumes fill for elevated driveways and structure pads. The water during a flooding event would have to go somewhere, and would likely put pressure on property that currently sits outside of this flood zone.

Allowing for this zoning change would set a precedent for future downzoning in the floodplain of which would continue to put pressure on neighboring properties.

We urge Chelan County to maintain the current zoning of RR10 for the subject property.

Thank you for your attention to this.
Sincerely,

Mara and Brian Bohman

Icicle Creek Watershed Council

Icicle Creek Watershed Council
May 13, 2026

Chelan County Department of Community Development
Attn: Susan Dretke

RE: Comments on Comprehensive Plan Amendment CPA-26-060

Dear Ms. Dretke,

The Icicle Creek Watershed Council (ICWC) appreciates the opportunity to provide these follow-up comments regarding the Determination of Non-Significance (DNS) associated with Comprehensive Plan Amendment CPA-26-060.

As noted in our March 18, 2026 comment letter, ICWC remains concerned about the potential impacts of increased residential density and development within the Icicle Creek floodplain, including impacts to floodplain function, watershed resilience, habitat, and long-term community flood risk.

While we understand that more detailed environmental review may occur during future zoning, subdivision, and permitting stages, ICWC remains concerned that once planning designations are changed and legal lots are created, opportunities to meaningfully prevent environmental impacts become increasingly limited.

For this reason, we believe it is important to consider not only the impacts of a future individual structure, but also whether increased residential density within the floodplain is appropriate in the first place. The proposed Comprehensive Plan amendment creates the pathway for additional development intensity within the floodplain, and we believe those broader implications warrant careful consideration during this stage of the SEPA process.

We respectfully request additional clarification regarding the anticipated environmental review process and future opportunities for community input as this proposal moves through potential zoning, subdivision, and permitting stages.

Thank you again for your time and consideration.

Sincerely,

The Icicle Creek Watershed Council

RE: Comments on Comprehensive Plan Amendment CPA-26-060

Dear Ms. Dretke,

The Icicle Creek Watershed Council (ICWC) appreciates the opportunity to provide comments on the proposed Comprehensive Plan Amendment (CPA-26-060). Based on concerns related to floodplain function, protection of critical areas, and consistency with the Chelan County Comprehensive Plan and Washington State's Growth Management Act, ICWC recommends maintaining the current zoning designation for the parcel identified in CPA-26-060.

ICWC is a community-based organization dedicated to protecting and restoring the ecological integrity of the Icicle Creek watershed through collaboration with residents, land managers, and public agencies. From this watershed stewardship perspective, ICWC is concerned about the potential impacts of increased residential density and development that could result from the proposed zoning change within the Icicle Creek floodplain.

The property is almost entirely within the Icicle Creek floodplain (Figure 1, page 3) and has been documented underwater during recent high-water events, including two floods in the early 1990s, one in 2006, and most recently in 2025 (Figure 2, page 3). These events demonstrate that much of the parcel functions as part of the active floodplain during high flows.

Under Washington State's Growth Management Act (RCW 36.70A), counties and cities are required to designate and protect "frequently flooded areas" as critical areas and adopt development regulations that protect their ecological and hydrologic functions. Floodplains are recognized not only as areas subject to flooding, but as areas that provide essential ecological functions such as floodwater storage, groundwater recharge, and fish and wildlife habitat.

Allowing additional subdivision or development within this floodplain could place future property owners at increased risk during high-water events and, more importantly, may affect the natural processes that allow floodplains to store and convey floodwaters. The stated purpose in the application is residential development. The only land out of the floodplain is occupied by the existing home, so any new development will have to occur in the floodplain. Floodplains along Icicle Creek provide important space for water to spread out during high flows, helping reduce downstream flooding while supporting riparian areas and fisheries that depend on a healthy river system.

Recognizing the importance of these natural functions, Chelan County's Comprehensive Plan places strong emphasis on protecting natural systems and limiting development impacts in rural areas. The Rural Element establishes goals to maintain a balance between human uses and the natural environment and to protect natural environmental features that support wildlife habitat, open space, and outdoor recreation. It further states that rural development should avoid and mitigate impacts to critical areas and reduce the inappropriate conversion of undeveloped land into sprawling or more intensive development patterns.

Allowing increased residential density within an active floodplain is inconsistent with these policies because floodplains function as critical environmental features that support habitat, natural hydrologic processes, and open space within the rural landscape.

Changing the zoning to allow higher density development within the floodplain could also set a precedent for similar requests along the Icicle Creek corridor, where many parcels remain zoned to reflect floodplain conditions and the importance of maintaining natural floodplain function.

Importantly, the current Rural Residential 10 (RR10) zoning designation aligns with the mapped floodplain along the lower Icicle Creek corridor, reflecting a broader planning approach to limit development in areas subject to flooding and to protect associated ecological functions. Allowing increased density on this parcel would represent a departure from this established pattern and could undermine the consistency of the County's zoning framework in managing floodplain areas.

Maintaining the current zoning framework helps preserve floodplain function, protect vital habitat, and reduce the potential for increased flood impacts along Icicle Creek.

For these reasons, ICWC recommends that the parcel remain under its current zoning designation. Thank you for the opportunity to provide comments.

Sincerely,

Sharon Lunz

Sharon Lunz
Icicle Creek Watershed Council Chair

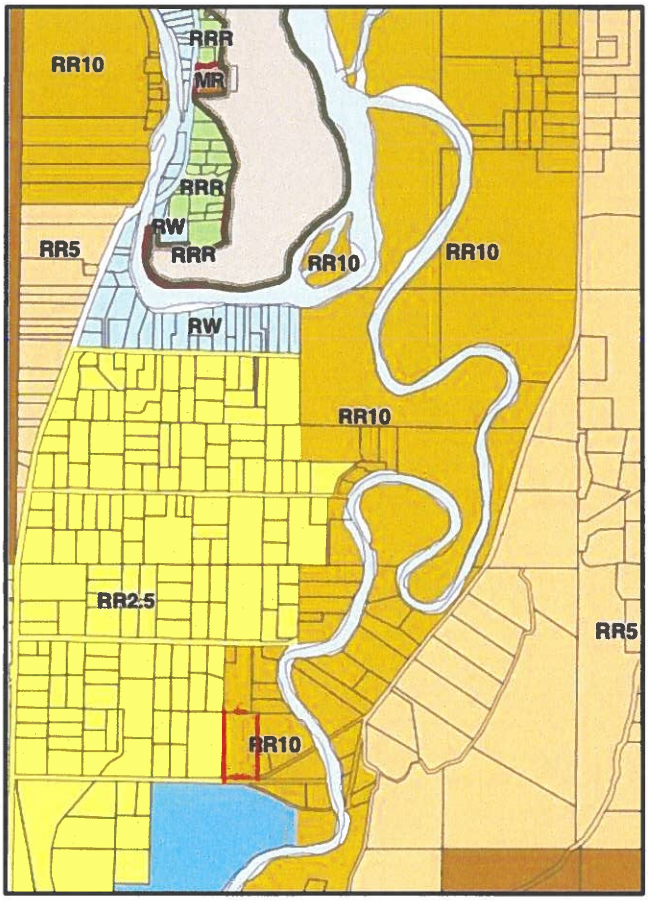
Attention: Susan Dretke

RE: CPA 26-060

Dear Ms. Dretke,

The Board of Directors of the Residents Coalition of Chelan County has significant concerns about the Comprehensive Plan Map Amendment proposed in CPA-26-060. Our reasoning is explained below.

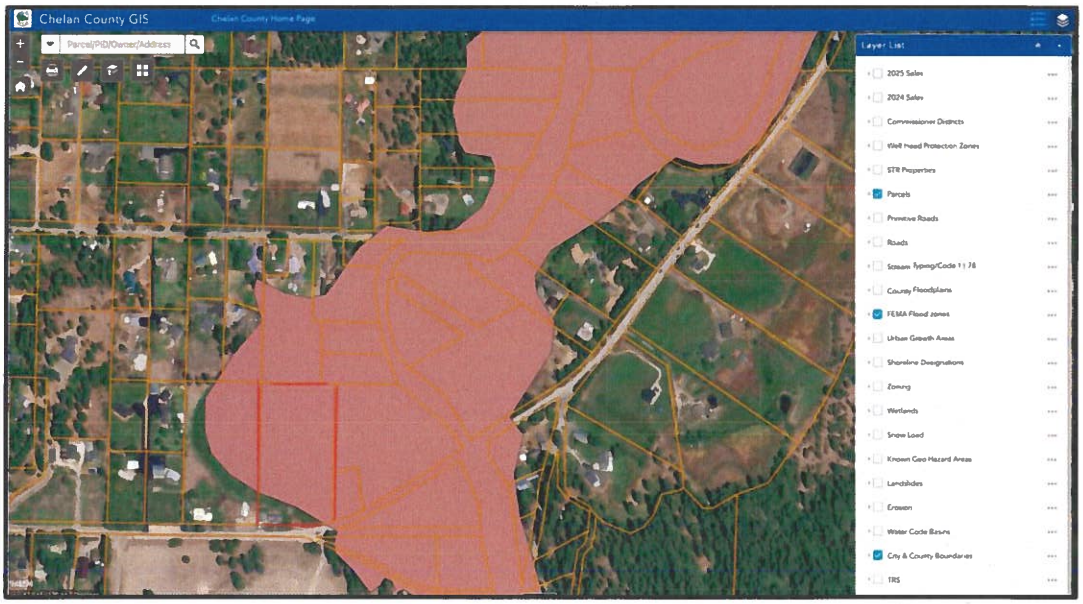


- The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek which are RR-10.
- The change in zoning would allow the parcel to be subdivided, increasing the density of development in the floodplain.
- The increase in density would degrade opportunities for improving salmon habitat and would exacerbate flooding in the area.
- The proposal has the potential to be an important precedent that could affect the entire lower Icicle.
- The subject parcel was inundated by flood in both 2025 and 2006.

<u>The Residents Coalition of Chelan County (RC_3)</u>

- The mission of the Residents Coalition of Chelan County is: "to work with residents to ensure that future growth and development in Chelan County preserves and enhances the qualities that residents value the most—rural character, a strong sense of community, and a healthy and beautiful natural environment." See generally, https://coalitionofchelancounty.org
- We believe that maintaining the existing zoning in the floodplain of Icicle Creek is important to our mission.

Comprehensive Plan and Zoning Along the Icicle Creek



- The current zoning along Icicle Creek for the properties in the riparian areas and the floodplain is RR-10. Here is a map of the zoning in the area. The subject parcel is outlined in red.

- Note that there are some large parcels along the Icicle that are currently zoned RR10. Keeping them zoned that way, and not allowing a precedent of changing the zoning to allow higher density, will be important to protecting the habitat and mitigating flood risk along the Icicle.
- The parcels to the west of the subject property are on a bench that is higher in elevation and out of the floodplain. The RR2.5 zoning makes sense for those areas. (The parcel immediately to the left is partly in and partly out of the floodplain).

Floodplain

- The Chelan County GIS map shows that the subject property, outlined faintly in red, is almost entirely in the floodplain. Only a small piece of it, where the existing house is located, is above the floodplain.

- This also demonstrates that the RR10 zoning closely follows the floodplain. Changing the zoning of the subject property would be inconsistent with this approach.
- The properties to the west of the subject property are mostly or entirely out of the floodplain.

<u>Actual flooding</u>

- The picture below from December 2025 shows that the subject property was almost completely inundated by flooding. Only the area immediately around the house, out of the floodplain, stayed above the floodwaters. Some of the fences were completely underwater.

- The property was also inundated in 2006 and reportedly also in 1990 and 1995.
- This demonstrates that although the subject property isn't immediately adjacent to the normal course of the Icicle, it is part of the Icicle system in high water.

Yakama Nation Reach Assessment (draft)

- The Yakama Nation is working on a Reach Assessment of the Icicle.[1]
- The purpose of the Reach Assessment "is to document aquatic habitat conditions and hydrologic, geomorphic, and ecological processes in the lower Icicle Creek basin and to present a comprehensive reach-based restoration strategy to address habitat limiting factors for salmon, steelhead, and bull trout. "
- In the section about the stretch of the river nearest to the subject property, it states, "There are also some important conservation measures to consider for this reach. Because of the high fish use and restoration potential of these reaches, any undeveloped parcels within riparian zones or floodplains in this reach should be viewed as high priority for protection." (emphasis added)
- Maintaining the current zoning, and not allowing additional subdivisions and development in the floodplain, supports this "high priority" from the Reach Assessment.

Conclusion

- The current zoning of the subject property is consistent with a county policy of zoning riparian and floodplain parcels along the Icicle in RR10. The current zoning is consistent with protecting habitat along the Icicle. It is also consistent with preventing further development from exacerbating future floods. This zoning should be maintained.
- If the zoning of this floodplain property were changed to RR2.5, other large landowners are likely to ask for similar treatment. This could lead to more habitat damage and exacerbated flooding.

For the above reasons RC_3 opposes the proposed comprehensive plan amendment. Thank you for considering our comments.

Attention: Susan Dretke

RE: Project File No.: CPA 26-060, Comprehensive Plan Map Amendment for
Dwayne McMahon, 7948 East Leavenworth Rd, Leavenworth, WA. 98826

We are writing to object to the Comprehensive Plan Map Amendment to change parcel # 24-17-23-510-480 from Rural Residential/Resource (RR) 10 to RR 2.5 acres because it is likely to increase the risk of flooding to neighboring properties.

The property is currently agricultural and is within a regulatory floodplain and must be classified as a frequently flooded critical area based on the latest FEMA maps (attached) and recent evidence of flooding. The ten acres serve functionally as an infiltration zone, important for conveying floodwaters away from built structures.

This area is located within the one percent chance of flooding and a special flood hazard area, as defined by the Federal Emergency Management Agency (FEMA) and the National Flood Insurance Program (NFIP), known as the "special flood hazard area" or zone (WAC 365-190-110 (1)). The preliminary flood hazard zone map issued by FEMA on 4/30/2025 designate this property as "AE", for a High Flood Hazard zone. The ten acres is within a Regulatory Floodway (Chelan County Code (CCC), Chapter 11.84). This property is necessary to contain and discharge the base flood flow at buildout.

If subdivided and developed into potentially four building lots, the fill necessary to develop building sites and road access would impact adjoining properties by increasing the risk of flooding to these properties and impact the "No Rise" standards within the County's development code (CCC, section 3.20.300, Regulatory Floodway). In addition, the potential for public health impacts from infiltration from floodwaters into utilities, such as septic and water supply pollution would likely occur. Avoidance of these impacts is an imperative and cannot be adequately mitigated.

Beginning on December 11, 2025, virtually the entire subject property plus adjoining properties were inundated by flood waters (see photos) from the Icicle River, clearly demonstrating that this area is not safe for fill and development. As well, the property should not be granted a Reasonable Use Exception and cannot comply with all criteria necessary to allow development to occur. The proposal will result in a net loss of frequently flooded area functions and values, consistent with the best available science (Washington Administrative Code 365-195).

Preliminary Issue Date	4/30/2025
Flood Zone	AE
Estimated Static BFE	Not Available
Estimated Flood Depth	Not Available
Vertical Datum	Not Available

Hazard Level — Flood Hazard Zone

High Flood Hazard — **AE, A, AH, AO, VE and V Zones.** Properties in these flood zones have a 1% chance of flooding each year. This represents a 26% chance of flooding over the life of a 30-year mortgage.

Moderate Flood Hazard — **Shaded Zone X.** Properties in the moderate flood risk areas also have a chance of flooding from storm events that have a less than 1% chance of occurring each year. Moderate flood risk indicates an area that may be protected flood risk reduction due to a flood control system or an area that is prone to flooding during a 0.2% annual chance storm event. These areas may have been indicated as areas of shallow flooding by your community.

Unshaded Zone X. Properties on higher ground and away from local flooding sources have a reduced flood risk when compared to the Moderate and High Flood Risk categories. Structures in these areas may be affected by larger storm events in excess of the 0.2% annual chance storm event.

Low Flood Hazard — Insurance Note: High Risk Areas are called "Special Flood Hazard Areas" and flood insurance is mandatory for federally backed mortgage holders. Properties in Moderate and Low Flood Risk areas may purchase flood insurance at a lower-cost rate, known as Preferred Risk Policies. See your list of insurance agents or visit https://www.fema.gov/national-flood-insurance-program for more information.

Disclaimer: This report is for informational purposes only and is not authorized for official use. The positional accuracy may be compromised in some areas. Thanks for the link. I tried before but it didn't work. The proposal states that no development is being proposed, but by changing the zoning to 2.5 acres, future development of two residential properties could occur. I stated four potential lots, obviously I was assuming a ten-acre site. As this is a flooded area, future buildings would violate the zero rise policies and Frequently flooding policies based on the FEMA map designation from 2025 and evidence of flooding. The property is used exclusively for agriculture now.

Memorandum

To: Susan Dretke, Chelan County

From: Richmond Petty, REHS

Date: 03/12/26

RE: McMahon (CPA 26-060) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The subject property is located at 7948 East Leavenworth Rd., Leavenworth, WA (county tax parcel: 241723510480)

As proposed, I have no objections to further approval of this project.

- Existing home has permitted septic system (86-0330) and connection to City of Leavenworth for water source.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

Good morning,

On behalf of the City of Leavenworth, I am providing the following comments on project CPA 26-06

1. Page 2 of the application form indicates that the water source for this property is/will be single private well; however, the City of Leavenworth currently provides service to the residence on this property. If the purpose of the proposed map amendment is to allow for additional units on this property, the owner should be aware that consideration for the protection of water use for properties *within* the city is a priority and paramount prior to granting water outside of the city. Granting water connections outside of the city UGA is a not a right, and the intent is to ensure water is available to the citizens of Leavenworth. The city does not guarantee any availability of public water for future development of this lot.

Thank you for the opportunity to review and comment on this proposal.

Respectfully

Maggie Boles, AICP (she/her/hers)
Community Development Director

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-significance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

Subject: Notice of Application for CPA 26-060 McMahon - Chelan County Dept. of Community Development
Attachments: CPA 26-060 NOA.pdf; CPA 26-060 - Affidavit of posting.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Dwayne McMahon's property, File# CPA 26-060. This notice should be posted on the *subject property by March 5th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days,* starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.

Thank you,

Jessica Thompson

Subject: Request for Comments – CPA 26-060 McMahon - Chelan County Dept. of Community Development
Attachments: CPA 26-060 NOA.pdf; CPA 26-060 - Application Materials.pdf

Greetings,
Chelan County has a **Comprehensive Plan Amendment** application in which we are requesting comments from agencies and special districts. Attached are all the materials for your review and the Notice of Application. Please respond by **5:00 pm on March 19, 2026.**

Project File No.: CPA 26-060

Project Location: 7948 East Leavenworth Rd, Leavenworth, WA 98826

Parcel Number: 24-17-23-510-480

Applicant/Owner: Dwayne McMahon

Application Date: February 25, 2026

Determination of Complete: February 25, 2026

Notice of Application Date: March 5, 2026

Proposed Project Description: An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5).

Existing Environmental Documents: State Environmental Policy Act (SEPA) Checklist

Permits Required: None

Application Materials: Attached to this email or may be found on the Chelan County Public Notice Portal: https://co-chelan-wa.smartgovcommunity.com/PublicNotice/PublicNoticeSearch

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-041 Campbell - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5). 24 Hugo Road, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-330-175.

CPA 26-048 HMJD Collins, LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-430-050.

CPA 26-054 Hellickson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). Unassigned, Chelan. WA 98816 also identified as Assessor's Parcel No.: 25-18-32-330-200.

CPA 26-060 McMahon - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). 7948 East Leavenworth Rd., Leavenworth, WA 98826 also identified as Assessor's Parcel No.: 24-17-23-510-480.

On March 5, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 19, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Date: March 5, 2026

DETERMINATION OF APPLICATION STATUS

Pursuant to Title 14, Development Permit Procedures & Administration, Section 14.08.030, Determination of Completeness. (CCBOR Resolution No. 2004-16, as amended)

Project Description: The proposal is a request to amend the current comprehensive plan map designation from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5).

File Number:	CPA 26-060
Related Files:	None
Parcel Address:	7948 East Leavenworth, Leavenworth, WA 98826
Parcel Zoning	Rural Residential/Resource 10 (RR10)
Applicant/Owner:	Dwayne McMahon
Mailing Address:	729 Gellatly St, Wenatchee, WA 98801
Date Submitted:	2/25/26
Date Complete:	2/25/26

Upon Initial Review, The Above Referenced Application is Found To Be: COMPLETE

The required components of an application are present and are judged by the review authority to be technically accurate and contain sufficient information necessary to allow the processing of the application. All submittal fees have been paid.

Your application has been determined to be complete as of the date of this letter. Pursuant to Chelan County Code Section 14.08.030(5), a Determination of Completeness shall not preclude the department for requesting additional information or studies if the need for more information becomes apparent during processing of the proposed development.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 5 acres from Rural Residential/Resource 10 (RR 10) to Rural Residential/Resource 2.5 (RR 2.5).

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: Residential
   South: East Leavenworth Road/Public Park
   East: Residential
   West: Residential
4. What is the current use of the property? Residential
5. Sanitation Disposal: ☐ N/A ☒ Septic Permit ☐ Sewer District: _____
6. Water Source: ☐ N/A ☒ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☒ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: CCFD #3 School District: Cascade
9. Power Service: CCPUD
10. Are there critical areas or critical area buffers on the property?
    ☐ Airport Overlay: _____
    ☐ Aquifer Recharge Area (see attached)
    ☒ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☒ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☐ Habitat/Riparian Area, protected species/area: _____
    ☐ Streams / Waterbodies: _____ ☐Shoreline Environment Designation: _____
    ☐ Drainage or Seasonal Stream: _____ ☐ Wetland, if so what category: _____
    ☐ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

File(s) No. _____

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

7. Chelan County is hereby given consent to enter the property(ies) listed above.
8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.
9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.
10. I certify that this application has been made with the consent of the lawful property owner(s).
11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.
12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

SEPA[1] Environmental Checklist

RECEIVED
FEB 25 2026
CHELAN COUNTY
Community Development

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

[1] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/Checklist-guidance

A.Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**

   McMahon Comprehensive Plan Map Amendment and Rezone

2. **Name of applicant:**

   Dwayne McMahon

3. **Address and phone number of applicant and contact person:**

   Dwayne McMahon (Applicant)
   729 Gellatly Street
   Wenatchee, WA 98801
   509-679-8649

   Ryan Walker (Agent)
   Pacific Engineering and Design, PLLC
   200 South Columbia St, Suite 300
   Wenatchee, WA 98801
   509-630-7917
   ryanw@pacificengineering.net

4. **Date checklist prepared:**

   February 2026

5. **Agency requesting checklist:**

   Chelan County

6. **Proposed timing of schedule (including phasing, if applicable):**

   The application will follow the Chelan County process for Comprehensive Plan Map Amendments.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   Single-family residential development.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   None.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

   No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

    Comprehensive Plan Map Amendment and Zoning Map Amendment.

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)**

    This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 5.0 acres from Rural Residential/Resource 10 (RR 10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located at 7948 East Leavenworth Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

    The official Chelan County Zoning and Comprehensive Plan map is no. 53.

    The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential lot sizes. The adjacent property to the west is zoned RR 2.5, which is the zone that the subject property is proposed to be changed to. The subject property is only five acres in size—half of the minimum lot size for RR 10. There are no residential properties over 10 acres in size anywhere in the vicinity of the subject property. Most residential properties in the area are one-acre in size. The revision to RR 2.5 will help create a more consistent rural density pattern.

12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.**

    The property is located at 7948 East Leavenworth Road, Leavenworth, WA, within Section 32, T 25N, R 18E.W.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**

5%

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Soil mapped for the property on the USGS soil survey website (https://websoilsurvey.nrcs.usda.gov) is Leavenworth fine sandy loam, 0-3 percent slopes (Lh) and Leavenworth loamy sand, 0-3 percent slopes (Le). Both soil types are listed as prime farmland if irrigated.

None of the soil will be removed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

According to the Chelan County GIS online mapping tool, the subject properties do not contain geologically hazardous soils.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**

No filling, excavation or grading is proposed.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**

No.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There will be no change in impervious surfaces.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

None.

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

None.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No.

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**

None.

3. Water

Find help answering water questions[5]

a. **Surface:**

Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

   Icicle River is located approximately 300 feet to the east of the property. The DNR stream typing map does not indicate other surface water bodies, and the NWI wetlands mapper does not indicate the presence of wetlands on the subject property. A Wetland Determination will be performed by Pacific Engineering in spring 2026 to investigate the property for wetlands.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

   No.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

   None.

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

   No.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

   Yes, the subject property is mapped within the FEMA mapped 100-year floodplain.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

   No.

---

[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water

[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

b. Ground:

Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No.

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   No waste material will be discharged.

c. Water Runoff (including stormwater):

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   There will be no change in stormwater runoff.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

4. Plants

Find help answering plants questions

a. Check the types of vegetation found on the site:

☐ **deciduous tree: alder, maple, aspen, other**

☐ **evergreen tree: fir, cedar, pine, other**

☐ **shrubs**

☒ **grass**

☐ **pasture**

☐ **crop or grain**

☐ **orchards, vineyards, or other permanent crops.**

☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

☐ **water plants: water lily, eelgrass, milfoil, other**

☐ **other types of vegetation**

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened and endangered species known to be on or near the site.

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Showy Stickseed (*Hackelia venusta*) – Endangered
- Wenatchee Mountains Checkermallow (*Sidalcea oregana var. calva*) – Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site as no development is proposed.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include:

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. **List any threatened and endangered species known to be on or near the site.**

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Canada Lynx (*Lynx canadensis*) - Threatened
- Gray Wolf (*Canis lupus*) - Endangered
- North American Wolverine (*Gulo gulo luscus*) – Threatened
- Mt. Rainier White-tailed Ptarmigan (*Lagopus leucura rainierensis*) – Threatened
- Northern Spotted Owl (*Strix occidentalis caruina*) - Threatened
- Yellow-billed Cuckoo (*Coccyzus americanus*) -Threatened
- Bull Trout (*Salvelinus confluentus*) - Threatened
- Monarch Butterfly (*Danaus Plexippus*) – Proposed Threatened
- Suckley's Cuckoo Bumble Bee (*Bombus suckleyi*) – Proposed Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

c. **Is the site part of a migration route? If so, explain.**

No.

d. **Proposed measures to preserve or enhance wildlife, if any.**

None.

e. **List any invasive animal species known to be on or near the site.**

None known.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

   The plan amendment does not have energy needs.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

   No.

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

   None.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

   No.

   1. **Describe any known or possible contamination at the site from present or past uses.**

      None known.

   2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

      None known.

   3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

      None known.

   4. **Describe special emergency services that might be required.**

      None known.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   East Leavenworth Road is adjacent to the property to the south. It is a primary bypass route between Leavenworth and Icicle Road. The roadway is heavily traveled, particularly during the summer months due to recreational access, which causes vehicle noise.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   The comprehensive plan map amendment will not generate noise.

3. **Proposed measures to reduce or control noise impacts, if any:**

   None.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

   The current use of the site is residential and agricultural. The adjacent property to the west is used for residential and agricultural purposes. Properties to the north and east are used for residential purposes.

   To the south, the property is owned by the United States Fish and Wildlife Service and operated as the Leavenworth Fish Hatchery. This parcel also includes Cascade Discovery School, which provides educational programming for high school students, as well as a public boat launch that allows commercial river recreation shuttle services for tubing, kayaking, and stand-up paddleboarding on Icicle Creek. In addition, the property contains public trails that provide access for horseback riding, winter snowshoe tours, cross-country skiing, and fish viewing. The area is heavily utilized by the public, particularly during the summer months, resulting in increased recreational activity and traffic.

   The surrounding area is currently used for residential, agricultural, and commercial purposes and therefore the proposal will not affect existing land uses.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

Yes. The property has been used as a hay farm including growing and harvesting of agricultural products.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

   No.

c. Describe any structures on the site.

A single-family residence and detached garage are present on the Project Site.

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

Rural Residential/Resource 10 (RR10).

f. What is the current comprehensive plan designation of the site?

Rural Residential/Resource 10 (RR10).

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Yes, the Project Site is mapped by the WDFW PHS online mapping tool as containing potential shrubsteppe habitat, caves or cave rich areas, and potential grizzly bear (*Ursus arctos*), little brown bat (*Myotis lucifugus*), northern spotted owl (*Strix occidentalis*), Yuma myotis (*Myotis yumanensis*), and golden eagle (*Aquila chrysaetos*) habitat. All Priority habitats are considered critical areas by Chelan County Code (CCC) 11.78.010(2). The property is partially in the 100-year floodplain which is classified as a critical area. However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

i. Approximately how many people would reside or work in the completed project?

None.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

None proposed.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**

None proposed.

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None proposed.

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None proposed.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

No structures proposed.

b. **What views in the immediate vicinity would be altered or obstructed?**

No.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

None proposed.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

---

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing
[13] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics
[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

None.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

No.

c. **What existing off-site sources of light or glare may affect your proposal?**

None.

d. **Proposed measures to reduce or control light and glare impacts, if any:**

None proposed.

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?**

Hiking, bicycling, horseback riding, winter snowshoe tours, cross-country skiing, fish viewing, and rafting occur in the vicinity.

b. **Would the proposed project displace any existing recreational uses? If so, describe.**

No.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**

None proposed.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

No.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.**

According to the DAHP WISAARD online mapping tool, a GLO trail is located approximately 0.5 miles to the northeast of the subject parcel. No other GLO features are located within the project vicinity.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.**

The DAHP WISAARD online mapping tool was used.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.**

None proposed.

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**

East Leavenworth Road fronts the property on the south side. No new access is proposed.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?**

No. The nearest transit stop is in Leavenworth, approximately 3.5 miles to the north.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**

No.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**

No.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

None.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

No.

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation

g. **Proposed measures to reduce or control transportation impacts, if any:**

None proposed.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

No.

b. **Proposed measures to reduce or control direct impacts on public services, if any.**

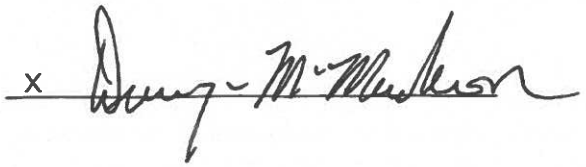
None proposed.

16. Utilities

Find help answering utilities questions[18]

a. **Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:**

b. **Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.**



None proposed.

[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services
[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

x 

Type name of signee: Dwayne McMahon

Position and agency/organization:

Date submitted:

[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

The proposal may result in construction of a new onsite septic systems in the future. Future construction could increase storm water runoff and emissions during construction.

- **Proposed measures to avoid or reduce such increases are:**

  All future development will comply with local state and federal regulations including critical areas, storm water management and onsite septic requirements.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

Future development would not affect plants, animals, fish or marine life. The property is currently intensively used for agricultural purposes and is adjacent to commercial uses from the Leavenworth Fish Hatchery and the Icicle Creek public boat launch, which results in increased recreational activity and traffic.

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

  Compliance with Chelan County Critical area regulations at the time of development.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not deplete energy or natural resources. Leavenworth is served by Chelan County PUD which provides abundant clean, renewable energy.

- **Proposed measures to protect or conserve energy and natural resources are:**

  Future development is likely to use low energy lighting such as LEDs and will comply with the energy code in effect at the time of building.

[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

Future use of the property may occur with the 100-year floodplain.

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

  Compliance with Chelan County Critical area and Flood Hazard regulations at the time of development.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

The property is not located in the shoreline zone and is not regulated by the Shoreline Management Act or Chelan County Shoreline Master Program.

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

  Future development of the property would meet all county regulations for land use.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

Future residential development could result in a slight increase in vehicle trips and the potential for more emergency service needs. Additional residences may generate more daily trips to and from the site, including commuter, school, and service-related travel.

However, the anticipated increase in demand is expected to be minimal and consistent with rural residential development patterns in the surrounding area. The subject property is currently only five acres in size and therefore already half of the minimum lot size for RR 10. The property is located in an area already characterized by residential uses at similar or smaller lot sizes, and existing transportation infrastructure and public services currently serve comparable development in the vicinity. Residential development due to the rezone would be more consistent with the surrounding rural density pattern.

- **Proposed measures to reduce or respond to such demand(s) are:**

  Compliance with Chelan County Code at the time of development.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal will not conflict with any laws for the protection of the environment.

Evelyn L. Arnold, Auditor, Chelan County, WA. AFN # 2311164 Recorded 09/10/2009 at 02:50 PM, D Page: 1 of 2 Filing Instrument $63.00

SEPA[1] Environmental Checklist

RECEIVED
FEB 25 2026
CHELAN COUNTY
Community Development

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

[1] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/Checklist-guidance

A.Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**

   McMahon Comprehensive Plan Map Amendment and Rezone

2. **Name of applicant:**

   Dwayne McMahon

3. **Address and phone number of applicant and contact person:**

   Dwayne McMahon (Applicant)
   729 Gellatly Street
   Wenatchee, WA 98801
   509-679-8649

   Ryan Walker (Agent)
   Pacific Engineering and Design, PLLC
   200 South Columbia St, Suite 300
   Wenatchee, WA 98801
   509-630-7917
   ryanw@pacificengineering.net

4. **Date checklist prepared:**

   February 2026

5. **Agency requesting checklist:**

   Chelan County

6. **Proposed timing of schedule (including phasing, if applicable):**

   The application will follow the Chelan County process for Comprehensive Plan Map Amendments.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   Single-family residential development.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   None.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

   No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

    Comprehensive Plan Map Amendment and Zoning Map Amendment.

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)**

    This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 5.0 acres from Rural Residential/Resource 10 (RR 10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located at 7948 East Leavenworth Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

    The official Chelan County Zoning and Comprehensive Plan map is no. 53.

    The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential lot sizes. The adjacent property to the west is zoned RR 2.5, which is the zone that the subject property is proposed to be changed to. The subject property is only five acres in size—half of the minimum lot size for RR 10. There are no residential properties over 10 acres in size anywhere in the vicinity of the subject property. Most residential properties in the area are one-acre in size. The revision to RR 2.5 will help create a more consistent rural density pattern.

12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.**

    The property is located at 7948 East Leavenworth Road, Leavenworth, WA, within Section 32, T 25N, R 18E.W.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**

5%

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Soil mapped for the property on the USGS soil survey website (https://websoilsurvey.nrcs.usda.gov) is Leavenworth fine sandy loam, 0-3 percent slopes (Lh) and Leavenworth loamy sand, 0-3 percent slopes (Le). Both soil types are listed as prime farmland if irrigated.

None of the soil will be removed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

According to the Chelan County GIS online mapping tool, the subject properties do not contain geologically hazardous soils.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**

No filling, excavation or grading is proposed.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**

No.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There will be no change in impervious surfaces.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

None.

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

None.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No.

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**

None.

3. Water

Find help answering water questions[5]

a. **Surface:**

Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

   Icicle River is located approximately 300 feet to the east of the property. The DNR stream typing map does not indicate other surface water bodies, and the NWI wetlands mapper does not indicate the presence of wetlands on the subject property. A Wetland Determination will be performed by Pacific Engineering in spring 2026 to investigate the property for wetlands.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

   No.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

   None.

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

   No.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

   Yes, the subject property is mapped within the FEMA mapped 100-year floodplain.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

   No.

---

[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water

[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

b. Ground:

Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No.

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   No waste material will be discharged.

c. Water Runoff (including stormwater):

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   There will be no change in stormwater runoff.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

4. Plants

Find help answering plants questions

a. Check the types of vegetation found on the site:

☐ **deciduous tree: alder, maple, aspen, other**

☐ **evergreen tree: fir, cedar, pine, other**

☐ **shrubs**

☒ **grass**

☐ **pasture**

☐ **crop or grain**

☐ **orchards, vineyards, or other permanent crops.**

☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

☐ **water plants: water lily, eelgrass, milfoil, other**

☐ **other types of vegetation**

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened and endangered species known to be on or near the site.

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Showy Stickseed (*Hackelia venusta*) – Endangered
- Wenatchee Mountains Checkermallow (*Sidalcea oregana var. calva*) – Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site as no development is proposed.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include:

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. **List any threatened and endangered species known to be on or near the site.**

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Canada Lynx (*Lynx canadensis*) - Threatened
- Gray Wolf (*Canis lupus*) - Endangered
- North American Wolverine (*Gulo gulo luscus*) – Threatened
- Mt. Rainier White-tailed Ptarmigan (*Lagopus leucura rainierensis*) – Threatened
- Northern Spotted Owl (*Strix occidentalis caruina*) - Threatened
- Yellow-billed Cuckoo (*Coccyzus americanus*) -Threatened
- Bull Trout (*Salvelinus confluentus*) - Threatened
- Monarch Butterfly (*Danaus Plexippus*) – Proposed Threatened
- Suckley's Cuckoo Bumble Bee (*Bombus suckleyi*) – Proposed Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

c. **Is the site part of a migration route? If so, explain.**

No.

d. **Proposed measures to preserve or enhance wildlife, if any.**

None.

e. **List any invasive animal species known to be on or near the site.**

None known.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

   The plan amendment does not have energy needs.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

   No.

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

   None.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

   No.

   1. **Describe any known or possible contamination at the site from present or past uses.**

      None known.

   2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

      None known.

   3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

      None known.

   4. **Describe special emergency services that might be required.**

      None known.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   East Leavenworth Road is adjacent to the property to the south. It is a primary bypass route between Leavenworth and Icicle Road. The roadway is heavily traveled, particularly during the summer months due to recreational access, which causes vehicle noise.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   The comprehensive plan map amendment will not generate noise.

3. **Proposed measures to reduce or control noise impacts, if any:**

   None.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

   The current use of the site is residential and agricultural. The adjacent property to the west is used for residential and agricultural purposes. Properties to the north and east are used for residential purposes.

   To the south, the property is owned by the United States Fish and Wildlife Service and operated as the Leavenworth Fish Hatchery. This parcel also includes Cascade Discovery School, which provides educational programming for high school students, as well as a public boat launch that allows commercial river recreation shuttle services for tubing, kayaking, and stand-up paddleboarding on Icicle Creek. In addition, the property contains public trails that provide access for horseback riding, winter snowshoe tours, cross-country skiing, and fish viewing. The area is heavily utilized by the public, particularly during the summer months, resulting in increased recreational activity and traffic.

   The surrounding area is currently used for residential, agricultural, and commercial purposes and therefore the proposal will not affect existing land uses.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

Yes. The property has been used as a hay farm including growing and harvesting of agricultural products.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

   No.

c. Describe any structures on the site.

A single-family residence and detached garage are present on the Project Site.

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

Rural Residential/Resource 10 (RR10).

f. What is the current comprehensive plan designation of the site?

Rural Residential/Resource 10 (RR10).

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Yes, the Project Site is mapped by the WDFW PHS online mapping tool as containing potential shrubsteppe habitat, caves or cave rich areas, and potential grizzly bear (*Ursus arctos*), little brown bat (*Myotis lucifugus*), northern spotted owl (*Strix occidentalis*), Yuma myotis (*Myotis yumanensis*), and golden eagle (*Aquila chrysaetos*) habitat. All Priority habitats are considered critical areas by Chelan County Code (CCC) 11.78.010(2). The property is partially in the 100-year floodplain which is classified as a critical area. However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

i. Approximately how many people would reside or work in the completed project?

None.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

None proposed.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**

None proposed.

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None proposed.

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None proposed.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

No structures proposed.

b. **What views in the immediate vicinity would be altered or obstructed?**

No.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

None proposed.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

---

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing
[13] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics
[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

None.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

No.

c. **What existing off-site sources of light or glare may affect your proposal?**

None.

d. **Proposed measures to reduce or control light and glare impacts, if any:**

None proposed.

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?**

Hiking, bicycling, horseback riding, winter snowshoe tours, cross-country skiing, fish viewing, and rafting occur in the vicinity.

b. **Would the proposed project displace any existing recreational uses? If so, describe.**

No.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**

None proposed.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

No.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.**

According to the DAHP WISAARD online mapping tool, a GLO trail is located approximately 0.5 miles to the northeast of the subject parcel. No other GLO features are located within the project vicinity.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.**

The DAHP WISAARD online mapping tool was used.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.**

None proposed.

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**

East Leavenworth Road fronts the property on the south side. No new access is proposed.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?**

No. The nearest transit stop is in Leavenworth, approximately 3.5 miles to the north.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**

No.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**

No.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

None.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

No.

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation

g. **Proposed measures to reduce or control transportation impacts, if any:**

None proposed.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

No.

b. **Proposed measures to reduce or control direct impacts on public services, if any.**

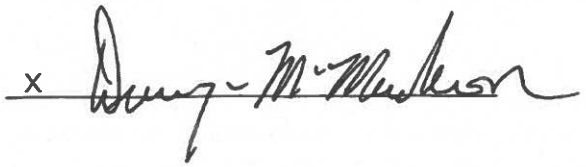
None proposed.

16. Utilities

Find help answering utilities questions[18]

a. **Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:**

b. **Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.**



None proposed.

[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services
[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

x 

Type name of signee: Dwayne McMahon

Position and agency/organization:

Date submitted:

[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

The proposal may result in construction of a new onsite septic systems in the future. Future construction could increase storm water runoff and emissions during construction.

- **Proposed measures to avoid or reduce such increases are:**

  All future development will comply with local state and federal regulations including critical areas, storm water management and onsite septic requirements.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

Future development would not affect plants, animals, fish or marine life. The property is currently intensively used for agricultural purposes and is adjacent to commercial uses from the Leavenworth Fish Hatchery and the Icicle Creek public boat launch, which results in increased recreational activity and traffic.

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

  Compliance with Chelan County Critical area regulations at the time of development.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not deplete energy or natural resources. Leavenworth is served by Chelan County PUD which provides abundant clean, renewable energy.

- **Proposed measures to protect or conserve energy and natural resources are:**

  Future development is likely to use low energy lighting such as LEDs and will comply with the energy code in effect at the time of building.

[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

Future use of the property may occur with the 100-year floodplain.

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

  Compliance with Chelan County Critical area and Flood Hazard regulations at the time of development.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

The property is not located in the shoreline zone and is not regulated by the Shoreline Management Act or Chelan County Shoreline Master Program.

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

  Future development of the property would meet all county regulations for land use.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

Future residential development could result in a slight increase in vehicle trips and the potential for more emergency service needs. Additional residences may generate more daily trips to and from the site, including commuter, school, and service-related travel.

However, the anticipated increase in demand is expected to be minimal and consistent with rural residential development patterns in the surrounding area. The subject property is currently only five acres in size and therefore already half of the minimum lot size for RR 10. The property is located in an area already characterized by residential uses at similar or smaller lot sizes, and existing transportation infrastructure and public services currently serve comparable development in the vicinity. Residential development due to the rezone would be more consistent with the surrounding rural density pattern.

- **Proposed measures to reduce or respond to such demand(s) are:**

  Compliance with Chelan County Code at the time of development.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal will not conflict with any laws for the protection of the environment.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

This proposal is to change the zoning and comprehensive plan land use designation map and zoning map of approximately 5 acres from Rural Residential/Resource 10 (RR 10) to Rural Residential/Resource 2.5 (RR 2.5).

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: Residential
   South: East Leavenworth Road/Public Park
   East: Residential
   West: Residential
4. What is the current use of the property? Residential
5. Sanitation Disposal: ☐ N/A ☒ Septic Permit ☐ Sewer District: _____
6. Water Source: ☐ N/A ☒ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☒ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: CCFD #3 School District: Cascade
9. Power Service: CCPUD
10. Are there critical areas or critical area buffers on the property?
    ☐ Airport Overlay: _____
    ☐ Aquifer Recharge Area (see attached)
    ☒ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☒ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☐ Habitat/Riparian Area, protected species/area: _____
    ☐ Streams / Waterbodies: _____ ☐Shoreline Environment Designation: _____
    ☐ Drainage or Seasonal Stream: _____ ☐ Wetland, if so what category: _____
    ☐ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

File(s) No. _____

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

7. Chelan County is hereby given consent to enter the property(ies) listed above.
8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.
9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.
10. I certify that this application has been made with the consent of the lawful property owner(s).
11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.
12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

PACIFIC ENGINEERING

RECEIVED
FEB 25 2026
CHELAN COUNTY
Community Development

TO: Chelan County Planning Commission
316 Washington Street Suite 301
Wenatchee, WA 98801

FROM: Ryan Walker, Environmental Department Manager
Pacific Engineering & Design P.L.L.C.

SUBJECT: Dwayne McMahon Application for Comprehensive Plan Map Amendment

Chelan County Code 14.14.050 Application for Comprehensive Plan Map Amendment Review Criteria.

1. **A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.**

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 5.0 acres from Rural Residential/Resource 10 (RR 10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located at 7948 East Leavenworth Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 53.

The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential lot sizes. The adjacent property to the west is zoned RR 2.5, which is the zone that the subject property is proposed to be changed to. The subject property is only five acres in size—half of the minimum lot size for RR 10. There are no residential properties over 10 acres in size anywhere in the vicinity of the subject property. Most residential properties in the area are one-acre in size. The revision to RR 2.5 will help create a more consistent rural density pattern.

2. **Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.**

Growth Management Act Goals

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for rural residential use, while the demand for residential properties in the Leavenworth area is high.

RCW 36.70A.020(1) encourages urban growth. The property is not located in an urban growth area.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

RR 2.5 maintains low rural density (1 unit per 2.5 acres), which avoids suburban sprawl. This density is lower than the majority of nearby parcels many of which have a residential density of one unit per one acre.

RCW 36.70A.020(4) Aims to plan for housing, including accommodating housing affordable to all economic segments of the population of this state and promotes a variety of residential densities and housing types. RR 2.5 provides rural housing opportunities at low densities, helping the county offer a spectrum of housing choices—from urban to rural—consistent with the GMA.

RR 2.5 zoning accommodates rural households without demanding urban services, consistent with GMA rural planning.

County-Wide Planning Policy 5: The proposal is consistent with the county-wide policies for housing by directly addressing land available for housing options, encouraging the productive development of the Property for housing, and permitting new housing in an area that already is adjacent to RR 2.5 zoning and smaller lot sizes. The proximity of the property to public transportation and non-motorized commuting routes enhances the opportunity for providing future housing for a diversity of income levels. Leavenworth serves as a major employment center for the tourism industry.

County-Wide Planning Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, one of the factors is "[t]he availability of housing to support economic growth." The proposal would encourage the development of the property as additional housing that would support economic growth in the Leavenworth area and directly respond to the need for more housing county wide. More housing inventory has a positive effect on housing costs for buyers when it can be developed in a reasonable regulatory environment.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

The Comprehensive Plan includes a Rural Element that provides policy direction for managing development in rural areas while preserving rural character. The Plan acknowledges that the County must provide for *varied rural densities* in order to satisfy Growth Management Act requirements, so long as rural character and resource lands are protected. The Comprehensive Plan states that Chelan County's rural areas are intended to accommodate residential uses at a variety of densities through designated rural land-use categories.

The RR 2.5 designation is an existing, long-established rural category in Chelan County, reflected in the countywide zoning. This demonstrates that 2.5-acre minimum densities are considered appropriate within the broader rural landscape under the Comprehensive Plan. Changing the subject parcel to RR 2.5 aligns the property with recognized rural density patterns and supports the Plan's direction to offer a range of rural residential options within the rural area while preserving the rural lifestyle and preventing suburban development.

The Comprehensive Plan's Land Use Element emphasizes the need for coordinated and orderly development across the county's rural areas. As the Plan explains, Chelan County's land-use designations are meant to create consistency, clarity, and predictability in rural land development. By aligning the parcel with surrounding or nearby densities—especially where RR 2.5 designations already exist—the amendment strengthens internal consistency within the land-use framework and reduces zoning irregularities.

The Housing Element of the Comprehensive Plan identifies a need to plan for a range of housing types and densities, including low-density rural housing that fits Chelan County's settlement patterns. RR 2.5 provides low-density rural housing opportunities, consistent with the Housing Element's direction to maintain rural living options while balancing environmental and infrastructure constraints. The proposed amendment broadens the county's available rural residential land base without promoting sprawl because RR 2.5 is not an urban lot size.

The following goals and policies are directly supported by the proposed map amendment

Land Use Element

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County

Rural Element

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Rationale: Residents who choose to live in the rural areas need to realize that their lifestyle has an impact on the natural environment and efforts need to be made to find and maintain a balance between human activity and the natural environment.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Rationale: There is value in rural lands that have in the economic vitality, rural lifestyles, and healthy environments.

Goal RE 3: Develop at densities such that demands will not be created for urban levels of public services and facilities in rural areas.

Goal Rationale: Development in rural areas should not be at densities which require urban levels of service. Development at lower densities will also help protect the rural quality of life.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

RR 2.5 is an existing rural designation recognized in Chelan County's land-use framework and zoning districts, demonstrating that this density category fits within the intended spectrum of rural land uses. Adjusting the designation to RR 2.5 is consistent with the Plan's intent to apply appropriate rural densities based on surrounding patterns, environmental constraints, and the character of the rural area.

The Rural Element of the Comprehensive Plan supports a range of rural residential densities, allowing the county to designate appropriate rural land-use patterns. The Plan acknowledges that rural areas are expected to contain different levels of density as part of local development patterns and planning history.

The RR 2.5 designation offers a recognized rural density that maintains rural character while accommodating moderate development. Because the subject parcel is located adjacent to the RR 2.5 zone and many parcels smaller than 2.5 acres, the amendment promotes a logical extension of existing rural density patterns.

The locational guidelines in the Comprehensive Plan specify that predominant parcel sizes for RR 2.5 are currently 2.5 acres or greater in size but typically less than 5 acres which matches the characteristics of the area and subject property.

5. A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, of if not, what changes to these elements would be required.

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

The Capital Facilities Element specifies that capital facilities—such as sewer, water systems, fire protection, and other infrastructure—must be planned and sized according to the intensity of expected development. RR 2.5 is a low-density rural land-use designation which is specifically intended not to require extension of urban services. RR 2.5 development patterns are consistent with rural infrastructure expectations and do not place urban-level demands on capital facilities. Because RR 10 and RR 2.5 are both rural designations, the amendment does not create new burdens on capital facilities beyond what the Capital Facilities Element anticipates for rural areas.

Transportation Element planning is tied to rural land-use densities, and RR 2.5 remains a rural classification that generates low traffic volumes compatible with rural road networks. Since rural areas are expected to carry lower traffic demands rely on County-maintained rural roads, both RR 10 and RR 2.5 densities fall well within rural transportation capacity assumptions embedded in the Comprehensive Plan.

The Transportation Element calls for ensuring adequate access, maintaining safety, and avoiding transportation impacts that exceed the capabilities of rural roads. Because RR 2.5 densities produce minimal increases in traffic, it will not trigger demands for roadway widening,

turn lanes, or major upgrades. Thus, the map amendment is consistent with the Transportation Element's goal of maintaining an efficient transportation network without unwarranted capital improvements.

6. For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.

The surrounding land uses are entirely residential. The adjacent properties on all sides are developed with single family residences. The change in the map designation would be indistinguishable from surrounding land uses.

RR 10 is generally intended for areas where land characteristics or resource protections justify large minimum lot sizes. For example, RR 10 and RR 20 are applied in areas containing commercial forest lands, steep slopes, or other resource functions. The zoning map identifies RR 10 alongside forest and resource land zones in some regions.

The Comprehensive Plan describes rural areas as places where a variety of rural residential densities are appropriate, provided they support rural character and avoid urban-scale infrastructure. The Rural Element allows and anticipates rural density categories like RR 2.5. RR 2.5 still preserves rural character while providing flexibility consistent with the Comprehensive Plan's rural housing policies. RR 10 is not required to preserve rural character unless justified by environmental or resource constraints

RR 2.5 fits rural roadway and rural service planning assumptions used by the County. RR 10 may underutilize areas where existing or planned rural facilities can already support moderate rural densities.

An RR 10 designation is only necessary when extremely low rural densities are warranted due to environmental constraints, resource protections, or lack of surrounding development. Where these conditions do not exist—and where the surrounding landscape includes RR 2.5 designations—the more suitable land-use classification is RR 2.5.

7. Will the proposed map amendment affect lands designated as resource lands of long term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?

No. There are no designated resource lands in the area.

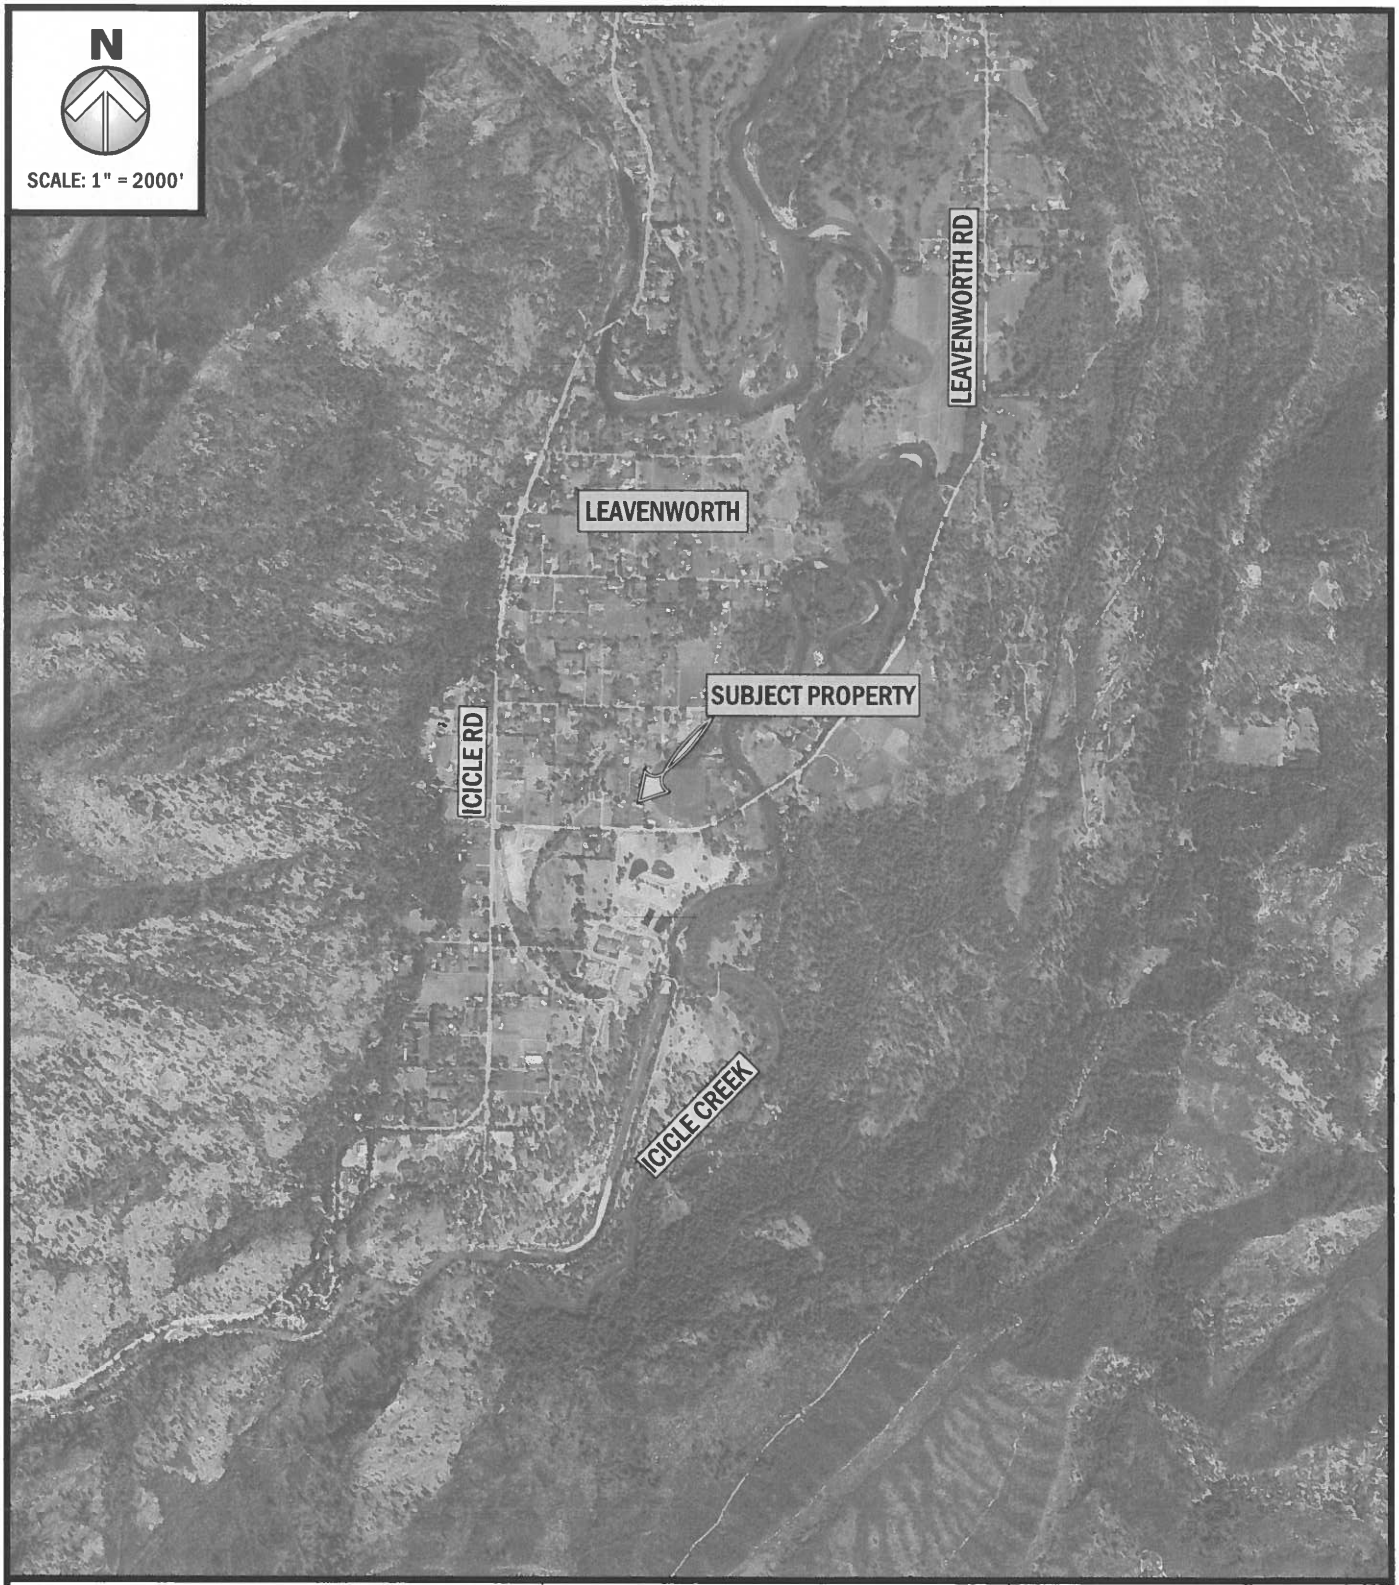
8. Explain how the proposed amendment would affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The Comprehensive Plan establishes a long-term framework for managing land supply to accommodate projected growth while preserving rural character and resource lands. The proposed map amendment affects the distribution and availability of land for different rural uses across the 20-year planning period in several important ways. The Comprehensive Plan emphasizes a need to provide a range of rural densities to meet long-term housing needs and comply with the Growth Management Act. The Plan's Housing and Land Use elements identify that rural areas must accommodate a share of future population growth using established rural

residential designations such as RR 2.5. Because RR 2.5 is a recognized rural designation used throughout the county, converting underutilized RR 10 land into RR 2.5 increases the supply of land eligible for modest rural residential development at densities consistent with the Comprehensive Plan.

The proposed amendment does *not* reduce the supply of land needed for urban-level growth. The Comprehensive Plan specifies that urban growth should occur inside Urban Growth Areas. Rural zones—including both RR 10 and RR 2.5—are not part of the County's urban growth capacity.

The proposed amendment does not reduce land available for future city expansions, for residential subdivisions, or for higher-density development. The property will remain outside the Leavenworth UGA and cannot be urbanized, extended with sewer, or converted to higher-density development unless the UGA is expanded through a formal process. Thus, the amendment does not materially affect the county's 20-year urban growth land supply.



9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The proposed change would provide the applicant a designation suitable for reasonable rural use of the property. The public will gain predictable, low-density rural development that does not strain facilities or alter rural character. The County maintains consistency with its long-range planning vision. This strengthens both the welfare of the community and the stability of the County's planning framework.

The Comprehensive Plan's Capital Facilities Element emphasizes avoiding unnecessary expenditures by ensuring that land uses do not require new, costly infrastructure beyond rural service levels. RR 2.5 does not require urban sewer service, municipal water expansion, urban roads or major capital facility upgrades. This benefits the public by minimizing long-term public financial obligations. It benefits the applicant by providing a clear understanding of service expectations and ensuring their land use aligns with available infrastructure.

The Housing Element of the Comprehensive Plan requires the County to plan for varied rural housing choices. It recognizes that rural areas must accommodate part of future population growth while maintaining rural character. RR 2.5 offers rural-scale housing opportunities without urbanization. By updating outdated or misapplied RR 10 designations, the amendment helps maintain an accurate inventory of rural land available to accommodate long-term population needs. This helps meet long-term housing demand without encroaching on resource or urban growth areas and reduces pressure on agricultural and forest lands by providing appropriate rural housing capacity.

Rural residential development at appropriate densities contributes to the local economy through construction, small service industries, and community vitality. The Comprehensive Plan emphasizes balanced economic development and rural quality of life. RR 2.5 supports steady but controlled growth—avoiding the artificially low capacity created by RR 10 in non-resource areas. Public benefits include supporting steady economic activity without overwhelming rural infrastructure, maintaining stable property values by aligning the zoning with realistic land use potential and strengthens community cohesion by accommodating modest population growth

SUBJECT: Dwayne McMahon Application for Comprehensive Plan Map Amendment

Chelan County Code 14.14.050 Application for Comprehensive Plan Map Amendment Review Criteria.

1. **A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.**

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 5.0 acres from Rural Residential/Resource 10 (RR 10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located at 7948 East Leavenworth Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 53.

The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential lot sizes. The adjacent property to the west is zoned RR 2.5, which is the zone that the subject property is proposed to be changed to. The subject property is only five acres in size—half of the minimum lot size for RR 10. There are no residential properties over 10 acres in size anywhere in the vicinity of the subject property. Most residential properties in the area are one-acre in size. The revision to RR 2.5 will help create a more consistent rural density pattern.

2. **Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.**

Growth Management Act Goals

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for rural residential use, while the demand for residential properties in the Leavenworth area is high.

RCW 36.70A.020(1) encourages urban growth. The property is not located in an urban growth area.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

RR 2.5 maintains low rural density (1 unit per 2.5 acres), which avoids suburban sprawl. This density is lower than the majority of nearby parcels many of which have a residential density of one unit per one acre.

RCW 36.70A.020(4) Aims to plan for housing, including accommodating housing affordable to all economic segments of the population of this state and promotes a variety of residential densities and housing types. RR 2.5 provides rural housing opportunities at low densities, helping the county offer a spectrum of housing choices—from urban to rural—consistent with the GMA.

RR 2.5 zoning accommodates rural households without demanding urban services, consistent with GMA rural planning.

County-Wide Planning Policy 5: The proposal is consistent with the county-wide policies for housing by directly addressing land available for housing options, encouraging the productive development of the Property for housing, and permitting new housing in an area that already is adjacent to RR 2.5 zoning and smaller lot sizes. The proximity of the property to public transportation and non-motorized commuting routes enhances the opportunity for providing future housing for a diversity of income levels. Leavenworth serves as a major employment center for the tourism industry.

County-Wide Planning Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, one of the factors is "[t]he availability of housing to support economic growth." The proposal would encourage the development of the property as additional housing that would support economic growth in the Leavenworth area and directly respond to the need for more housing county wide. More housing inventory has a positive effect on housing costs for buyers when it can be developed in a reasonable regulatory environment.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

The Comprehensive Plan includes a Rural Element that provides policy direction for managing development in rural areas while preserving rural character. The Plan acknowledges that the County must provide for *varied rural densities* in order to satisfy Growth Management Act requirements, so long as rural character and resource lands are protected. The Comprehensive Plan states that Chelan County's rural areas are intended to accommodate residential uses at a variety of densities through designated rural land-use categories.

The RR 2.5 designation is an existing, long-established rural category in Chelan County, reflected in the countywide zoning. This demonstrates that 2.5-acre minimum densities are considered appropriate within the broader rural landscape under the Comprehensive Plan. Changing the subject parcel to RR 2.5 aligns the property with recognized rural density patterns and supports the Plan's direction to offer a range of rural residential options within the rural area while preserving the rural lifestyle and preventing suburban development.

The Comprehensive Plan's Land Use Element emphasizes the need for coordinated and orderly development across the county's rural areas. As the Plan explains, Chelan County's land-use designations are meant to create consistency, clarity, and predictability in rural land development. By aligning the parcel with surrounding or nearby densities—especially where RR 2.5 designations already exist—the amendment strengthens internal consistency within the land-use framework and reduces zoning irregularities.

The Housing Element of the Comprehensive Plan identifies a need to plan for a range of housing types and densities, including low-density rural housing that fits Chelan County's settlement patterns. RR 2.5 provides low-density rural housing opportunities, consistent with the Housing Element's direction to maintain rural living options while balancing environmental and infrastructure constraints. The proposed amendment broadens the county's available rural residential land base without promoting sprawl because RR 2.5 is not an urban lot size.

The following goals and policies are directly supported by the proposed map amendment

Land Use Element

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County

Rural Element

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Rationale: Residents who choose to live in the rural areas need to realize that their lifestyle has an impact on the natural environment and efforts need to be made to find and maintain a balance between human activity and the natural environment.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Rationale: There is value in rural lands that have in the economic vitality, rural lifestyles, and healthy environments.

Goal RE 3: Develop at densities such that demands will not be created for urban levels of public services and facilities in rural areas.

Goal Rationale: Development in rural areas should not be at densities which require urban levels of service. Development at lower densities will also help protect the rural quality of life.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

RR 2.5 is an existing rural designation recognized in Chelan County's land-use framework and zoning districts, demonstrating that this density category fits within the intended spectrum of rural land uses. Adjusting the designation to RR 2.5 is consistent with the Plan's intent to apply appropriate rural densities based on surrounding patterns, environmental constraints, and the character of the rural area.

The Rural Element of the Comprehensive Plan supports a range of rural residential densities, allowing the county to designate appropriate rural land-use patterns. The Plan acknowledges that rural areas are expected to contain different levels of density as part of local development patterns and planning history.

The RR 2.5 designation offers a recognized rural density that maintains rural character while accommodating moderate development. Because the subject parcel is located adjacent to the RR 2.5 zone and many parcels smaller than 2.5 acres, the amendment promotes a logical extension of existing rural density patterns.

The locational guidelines in the Comprehensive Plan specify that predominant parcel sizes for RR 2.5 are currently 2.5 acres or greater in size but typically less than 5 acres which matches the characteristics of the area and subject property.

5. A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, of if not, what changes to these elements would be required.

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

The Capital Facilities Element specifies that capital facilities—such as sewer, water systems, fire protection, and other infrastructure—must be planned and sized according to the intensity of expected development. RR 2.5 is a low-density rural land-use designation which is specifically intended not to require extension of urban services. RR 2.5 development patterns are consistent with rural infrastructure expectations and do not place urban-level demands on capital facilities. Because RR 10 and RR 2.5 are both rural designations, the amendment does not create new burdens on capital facilities beyond what the Capital Facilities Element anticipates for rural areas.

Transportation Element planning is tied to rural land-use densities, and RR 2.5 remains a rural classification that generates low traffic volumes compatible with rural road networks. Since rural areas are expected to carry lower traffic demands rely on County-maintained rural roads, both RR 10 and RR 2.5 densities fall well within rural transportation capacity assumptions embedded in the Comprehensive Plan.

The Transportation Element calls for ensuring adequate access, maintaining safety, and avoiding transportation impacts that exceed the capabilities of rural roads. Because RR 2.5 densities produce minimal increases in traffic, it will not trigger demands for roadway widening,

turn lanes, or major upgrades. Thus, the map amendment is consistent with the Transportation Element's goal of maintaining an efficient transportation network without unwarranted capital improvements.

6. For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.

The surrounding land uses are entirely residential. The adjacent properties on all sides are developed with single family residences. The change in the map designation would be indistinguishable from surrounding land uses.

RR 10 is generally intended for areas where land characteristics or resource protections justify large minimum lot sizes. For example, RR 10 and RR 20 are applied in areas containing commercial forest lands, steep slopes, or other resource functions. The zoning map identifies RR 10 alongside forest and resource land zones in some regions.

The Comprehensive Plan describes rural areas as places where a variety of rural residential densities are appropriate, provided they support rural character and avoid urban-scale infrastructure. The Rural Element allows and anticipates rural density categories like RR 2.5. RR 2.5 still preserves rural character while providing flexibility consistent with the Comprehensive Plan's rural housing policies. RR 10 is not required to preserve rural character unless justified by environmental or resource constraints

RR 2.5 fits rural roadway and rural service planning assumptions used by the County. RR 10 may underutilize areas where existing or planned rural facilities can already support moderate rural densities.

An RR 10 designation is only necessary when extremely low rural densities are warranted due to environmental constraints, resource protections, or lack of surrounding development. Where these conditions do not exist—and where the surrounding landscape includes RR 2.5 designations—the more suitable land-use classification is RR 2.5.

7. Will the proposed map amendment affect lands designated as resource lands of long term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?

No. There are no designated resource lands in the area.

8. Explain how the proposed amendment would affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The Comprehensive Plan establishes a long-term framework for managing land supply to accommodate projected growth while preserving rural character and resource lands. The proposed map amendment affects the distribution and availability of land for different rural uses across the 20-year planning period in several important ways. The Comprehensive Plan emphasizes a need to provide a range of rural densities to meet long-term housing needs and comply with the Growth Management Act. The Plan's Housing and Land Use elements identify that rural areas must accommodate a share of future population growth using established rural

residential designations such as RR 2.5. Because RR 2.5 is a recognized rural designation used throughout the county, converting underutilized RR 10 land into RR 2.5 increases the supply of land eligible for modest rural residential development at densities consistent with the Comprehensive Plan.

The proposed amendment does *not* reduce the supply of land needed for urban-level growth. The Comprehensive Plan specifies that urban growth should occur inside Urban Growth Areas. Rural zones—including both RR 10 and RR 2.5—are not part of the County's urban growth capacity.

The proposed amendment does not reduce land available for future city expansions, for residential subdivisions, or for higher-density development. The property will remain outside the Leavenworth UGA and cannot be urbanized, extended with sewer, or converted to higher-density development unless the UGA is expanded through a formal process. Thus, the amendment does not materially affect the county's 20-year urban growth land supply.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The proposed change would provide the applicant a designation suitable for reasonable rural use of the property. The public will gain predictable, low-density rural development that does not strain facilities or alter rural character. The County maintains consistency with its long-range planning vision. This strengthens both the welfare of the community and the stability of the County's planning framework.

The Comprehensive Plan's Capital Facilities Element emphasizes avoiding unnecessary expenditures by ensuring that land uses do not require new, costly infrastructure beyond rural service levels. RR 2.5 does not require urban sewer service, municipal water expansion, urban roads or major capital facility upgrades. This benefits the public by minimizing long-term public financial obligations. It benefits the applicant by providing a clear understanding of service expectations and ensuring their land use aligns with available infrastructure.

The Housing Element of the Comprehensive Plan requires the County to plan for varied rural housing choices. It recognizes that rural areas must accommodate part of future population growth while maintaining rural character. RR 2.5 offers rural-scale housing opportunities without urbanization. By updating outdated or misapplied RR 10 designations, the amendment helps maintain an accurate inventory of rural land available to accommodate long-term population needs. This helps meet long-term housing demand without encroaching on resource or urban growth areas and reduces pressure on agricultural and forest lands by providing appropriate rural housing capacity.

Rural residential development at appropriate densities contributes to the local economy through construction, small service industries, and community vitality. The Comprehensive Plan emphasizes balanced economic development and rural quality of life. RR 2.5 supports steady but controlled growth—avoiding the artificially low capacity created by RR 10 in non-resource areas. Public benefits include supporting steady economic activity without overwhelming rural infrastructure, maintaining stable property values by aligning the zoning with realistic land use potential and strengthens community cohesion by accommodating modest population growth

Chelan County, Washington Preliminary Floodplains (as of April 30, 2025)

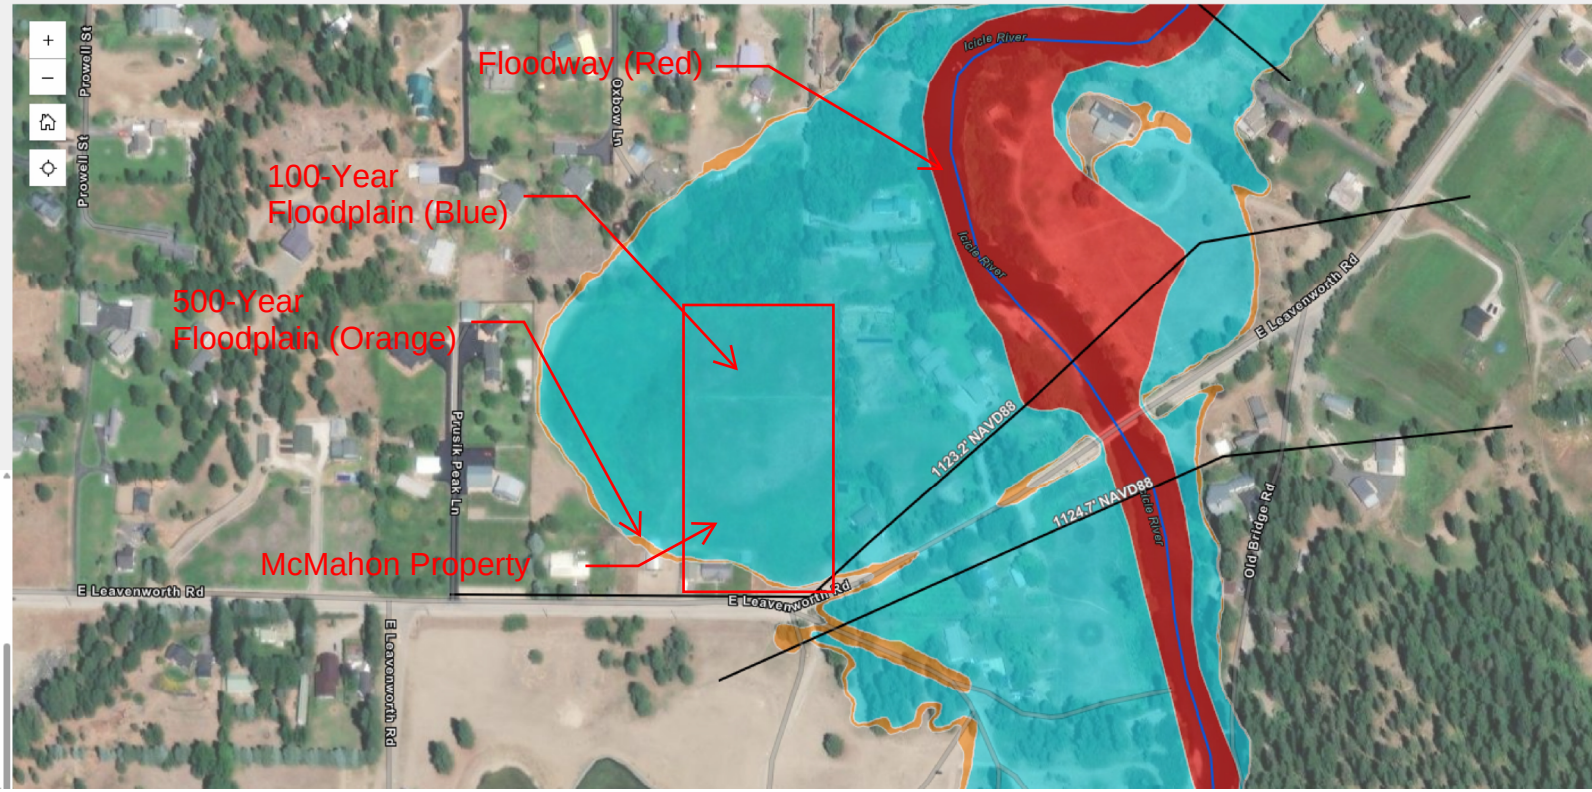
RiskMAP
Increasing Resilience Toget

Discovery | Effective Floodplains | Scope (Flood Study) | Flood Risk Products | **Preliminary Floodplains** | Preliminary Floodplain Assessment

- Zone AH | 1% Annual Chance Flood Event

Area of Moderate Flood Risk

- Zone X (1% Depth less than 1 Foot) | 1% Annual Chance Flood Event
- Zone X (0.2% Annual Chance) | 0.2% Annual Chance Flood Event



Map Tips

- Flood elevations (1% Annual Chance flood event) are available when zooming into an area of interest.
- Flood risk and zone (e.g. A, AE) designations are available by point-and-clicking a flood hazard area of interest.
- To compare between effective and preliminary floodplains, click the maps on the bottom left corner.

Next Steps

Following distribution of Preliminary products, a Consultation Coordination Officer's (CCO) meeting is hosted for community officials.

At this meeting, FEMA reviews the study progress to date, options for public outreach, due process opportunities, and map adoption.

- Area of High Flood Risk (Floodway) (1% Annual Chance)
- Area of High Flood Risk (1% Annual Chance)
- Area of Moderate Flood Risk (0.2% Annual Chance)
- Area of Moderate Flood Risk (1% Depth less than 1 Foot)
- Area of Moderate Flood Risk (Area with Reduced Flood Risk due to Levee)
- Area Not Included
- Area of Low or Unmapped Flood Risk

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-significance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

Subject: Notice of Application for CPA 26-060 McMahon - Chelan County Dept. of Community Development
Attachments: CPA 26-060 NOA.pdf; CPA 26-060 - Affidavit of posting.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Dwayne McMahon's property, File# CPA 26-060. This notice should be posted on the *subject property by March 5th, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days,* starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, **Susan Dretke**, at 509-667-6225 or **Susan.Dretke@co.chelan.wa.us**.

Thank you,

Jessica Thompson

Subject: Request for Comments – CPA 26-060 McMahon - Chelan County Dept. of Community Development
Attachments: CPA 26-060 NOA.pdf; CPA 26-060 - Application Materials.pdf

Greetings,
Chelan County has a **Comprehensive Plan Amendment** application in which we are requesting comments from agencies and special districts. Attached are all the materials for your review and the Notice of Application. Please respond by **5:00 pm on March 19, 2026.**

Project File No.: CPA 26-060

Project Location: 7948 East Leavenworth Rd, Leavenworth, WA 98826

Parcel Number: 24-17-23-510-480

Applicant/Owner: Dwayne McMahon

Application Date: February 25, 2026

Determination of Complete: February 25, 2026

Notice of Application Date: March 5, 2026

Proposed Project Description: An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5).

Existing Environmental Documents: State Environmental Policy Act (SEPA) Checklist

Permits Required: None

Application Materials: Attached to this email or may be found on the Chelan County Public Notice Portal: https://co-chelan-wa.smartgovcommunity.com/PublicNotice/PublicNoticeSearch

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-041 Campbell - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR 5) to Rural Residential/Resource 2.5 (RR2.5). 24 Hugo Road, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-330-175.

CPA 26-048 HMJD Collins, LLC - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). Unassigned, Chelan, WA 98816 also identified as Assessor's Parcel No.: 27-23-03-430-050.

CPA 26-054 Hellickson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). Unassigned, Chelan. WA 98816 also identified as Assessor's Parcel No.: 25-18-32-330-200.

CPA 26-060 McMahon - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). 7948 East Leavenworth Rd., Leavenworth, WA 98826 also identified as Assessor's Parcel No.: 24-17-23-510-480.

On March 5, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 19, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Attn: Susan Dretke

RE: Comments on Comprehensive Plan Amendment CPA-26-060

Dear Ms. Dretke,

The Icicle Creek Watershed Council (ICWC) appreciates the opportunity to provide these follow-up comments regarding the Determination of Non-Significance (DNS) associated with Comprehensive Plan Amendment CPA-26-060.

As noted in our March 18, 2026 comment letter, ICWC remains concerned about the potential impacts of increased residential density and development within the Icicle Creek floodplain, including impacts to floodplain function, watershed resilience, habitat, and long-term community flood risk.

While we understand that more detailed environmental review may occur during future zoning, subdivision, and permitting stages, ICWC remains concerned that once planning designations are changed and legal lots are created, opportunities to meaningfully prevent environmental impacts become increasingly limited.

For this reason, we believe it is important to consider not only the impacts of a future individual structure, but also whether increased residential density within the floodplain is appropriate in the first place. The proposed Comprehensive Plan amendment creates the pathway for additional development intensity within the floodplain, and we believe those broader implications warrant careful consideration during this stage of the SEPA process.

We respectfully request additional clarification regarding the anticipated environmental review process and future opportunities for community input as this proposal moves through potential zoning, subdivision, and permitting stages.

Thank you again for your time and consideration.

Sincerely,

The Icicle Creek Watershed Council

RE: Comments on Comprehensive Plan Amendment CPA-26-060

Dear Ms. Dretke,

The Icicle Creek Watershed Council (ICWC) appreciates the opportunity to provide comments on the proposed Comprehensive Plan Amendment (CPA-26-060). Based on concerns related to floodplain function, protection of critical areas, and consistency with the Chelan County Comprehensive Plan and Washington State's Growth Management Act, ICWC recommends maintaining the current zoning designation for the parcel identified in CPA-26-060.

ICWC is a community-based organization dedicated to protecting and restoring the ecological integrity of the Icicle Creek watershed through collaboration with residents, land managers, and public agencies. From this watershed stewardship perspective, ICWC is concerned about the potential impacts of increased residential density and development that could result from the proposed zoning change within the Icicle Creek floodplain.

The property is almost entirely within the Icicle Creek floodplain (Figure 1, page 3) and has been documented underwater during recent high-water events, including two floods in the early 1990s, one in 2006, and most recently in 2025 (Figure 2, page 3). These events demonstrate that much of the parcel functions as part of the active floodplain during high flows.

Under Washington State's Growth Management Act (RCW 36.70A), counties and cities are required to designate and protect "frequently flooded areas" as critical areas and adopt development regulations that protect their ecological and hydrologic functions. Floodplains are recognized not only as areas subject to flooding, but as areas that provide essential ecological functions such as floodwater storage, groundwater recharge, and fish and wildlife habitat.

Allowing additional subdivision or development within this floodplain could place future property owners at increased risk during high-water events and, more importantly, may affect the natural processes that allow floodplains to store and convey floodwaters. The stated purpose in the application is residential development. The only land out of the floodplain is occupied by the existing home, so any new development will have to occur in the floodplain. Floodplains along Icicle Creek provide important space for water to spread out during high flows, helping reduce downstream flooding while supporting riparian areas and fisheries that depend on a healthy river system.

Recognizing the importance of these natural functions, Chelan County's Comprehensive Plan places strong emphasis on protecting natural systems and limiting development impacts in rural areas. The Rural Element establishes goals to maintain a balance between human uses and the natural environment and to protect natural environmental features that support wildlife habitat, open space, and outdoor recreation. It further states that rural development should avoid and mitigate impacts to critical areas and reduce the inappropriate conversion of undeveloped land into sprawling or more intensive development patterns.

Allowing increased residential density within an active floodplain is inconsistent with these policies because floodplains function as critical environmental features that support habitat, natural hydrologic processes, and open space within the rural landscape.

Changing the zoning to allow higher density development within the floodplain could also set a precedent for similar requests along the Icicle Creek corridor, where many parcels remain zoned to reflect floodplain conditions and the importance of maintaining natural floodplain function.

Importantly, the current Rural Residential 10 (RR10) zoning designation aligns with the mapped floodplain along the lower Icicle Creek corridor, reflecting a broader planning approach to limit development in areas subject to flooding and to protect associated ecological functions. Allowing increased density on this parcel would represent a departure from this established pattern and could undermine the consistency of the County's zoning framework in managing floodplain areas.

Maintaining the current zoning framework helps preserve floodplain function, protect vital habitat, and reduce the potential for increased flood impacts along Icicle Creek.

For these reasons, ICWC recommends that the parcel remain under its current zoning designation. Thank you for the opportunity to provide comments.

Sincerely,

Sharon Lunz

Hi Susan,

Two things:

1. In my comment I referred to the draft of the Reach Assessment commissioned by the Yakama Nation.
    1. It has now been finalized and is at: https://yakamafish-nsn.gov/sites/default/files/projects/Icicle%20RA%20-%20Main%20Report%20February%202026%20Final%20-%20Reduced.pdf
    2. The final version continues to say, regarding the reach near the McMahon property, "There are also some important conservation measures to consider for this reach. Because of the high fish use and restoration potential of these reaches, any undeveloped parcels within riparian zones or floodplains in this reach should be viewed as high priority for protection, including the large inside meander bend between RM 1.6 and 2.1 (river-right), and other undeveloped parcels."
2. This past week I neighbor saw the land use sign and asked me what I knew about it. She was very concerned about the proposed change and asked me if she could still comment. I told her I think she has to wait until the issue goes to the Planning Commission. Is that correct?

Thanks.

Bruce

> 1. After the comment period ends, the county may either request additional information of the applicant or issue an environmental determination for the proposal which would include an additional comment period. A public hearing will then be scheduled before the Chelan County Planning Commission before going before the Chelan County Board of Commissioners. Comprehensive Plan Amendments are only allowed to be processed one time per year so typically action isn't taken until closer to the end of the year. Both the Planning Commission and County Commissioner hearings are public.

Hi Susan,

Thank you for the notice of this that I received yesterday. (I am a neighbor.) I understand that I can comment on this until March 19.

I have two related questions:

1. What is the process for this application after March 19? (Who reviews and/or decides whether to approve? Approximate timing? etc)
2. Will there be other opportunities for public comment after March 19? (I have neighbors who are out of town and may not be able to comment before then.)

Thanks!

RE: CPA 26-060

Dear Ms. Dretke,

I strongly oppose the Comprehensive Plan Map Amendment proposed in CPA-26-060 for the following reasons:

- The proposal is inconsistent with the Washington Growth Management Act and the purposes of the Chelan County Frequently Flooded Overlay District.
- The proposal is inconsistent with the policies for the Rural Element in the Chelan County Comprehensive Plan.
- The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek which are RR-10.
- The change in zoning would allow the parcel to be subdivided, increasing the density of development in the floodplain.
- The increase in density would degrade opportunities for improving salmon habitat and would exacerbate flooding in the area.
- The proposal has the potential to be an important precedent that could affect the entire lower Icicle.
- The subject parcel was inundated by flood in both 2025, 2006, 1995 and 1990 and partially underwater during lesser flooding periods.

I live near the subject property and have personal knowledge of that property and how it was inundated in December 2025 and in 2006. I also have personal knowledge of how the December 2025 flood affected many houses in this neighborhood and caused E. Leavenworth Road to be closed. I am also familiar with the salmon and other wildlife that live in Icicle Creek.

Washington's Growth Management Act

The Growth Management Act (GMA) requires all counties to adopt development regulations that protect critical areas, and floodplains are explicitly designated as "frequently flooded areas" — one of the five statutory types of critical areas under RCW 36.70A.030. A rezone that increases density in a floodplain may be challenged before the **Eastern Washington Growth**

Management Hearings Board as inconsistent with GMA requirements. This is not hypothetical — the Growth Management Hearings Board previously overturned a Chelan County decision to rezone land near Leavenworth and Peshastin for 2.5-acre lots, finding a clear inconsistency between the reclassification and the planning goals and policies of the County Comprehensive Plan.

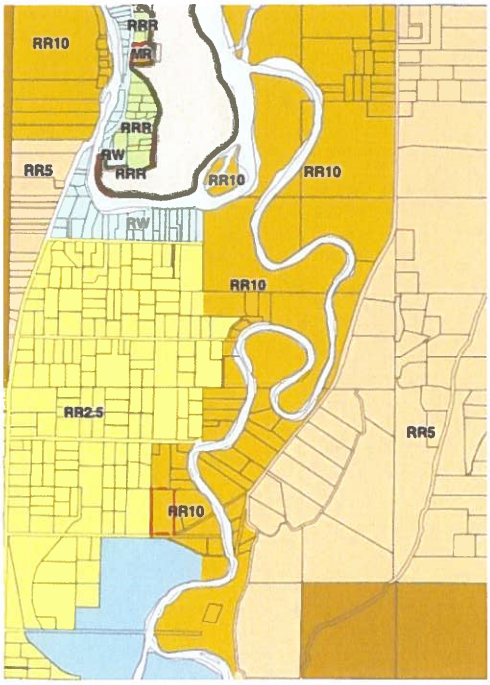
Conflict with the Frequently Flooded Areas Overlay District (FFOD)

Chelan County's own zoning code establishes the Frequently Flooded Areas Overlay District specifically to protect the important hydrologic functions of the county's 100-year floodplains — including floodways and floodway fringe areas — in order to protect human health and safety and minimize damage to property. Rezoning to smaller lots actively works against this stated purpose by intensifying development density in exactly the areas the FFOD was designed to protect.

Inconsistency with Chelan County Comprehensive Plan Goals

The County's own Comprehensive Plan contains policies protecting critical areas and rural character. Here are some of the policies:

- "Policy RE 1.1: Rural development shall avoid and mitigate impacts to critical areas, which have value as wildlife habitat and open space."
- "Policy RE 2.4: Encourage the preservation and protection of unique, rare and fragile natural features, scenic vistas, unstable bluffs, and culturally significant features."

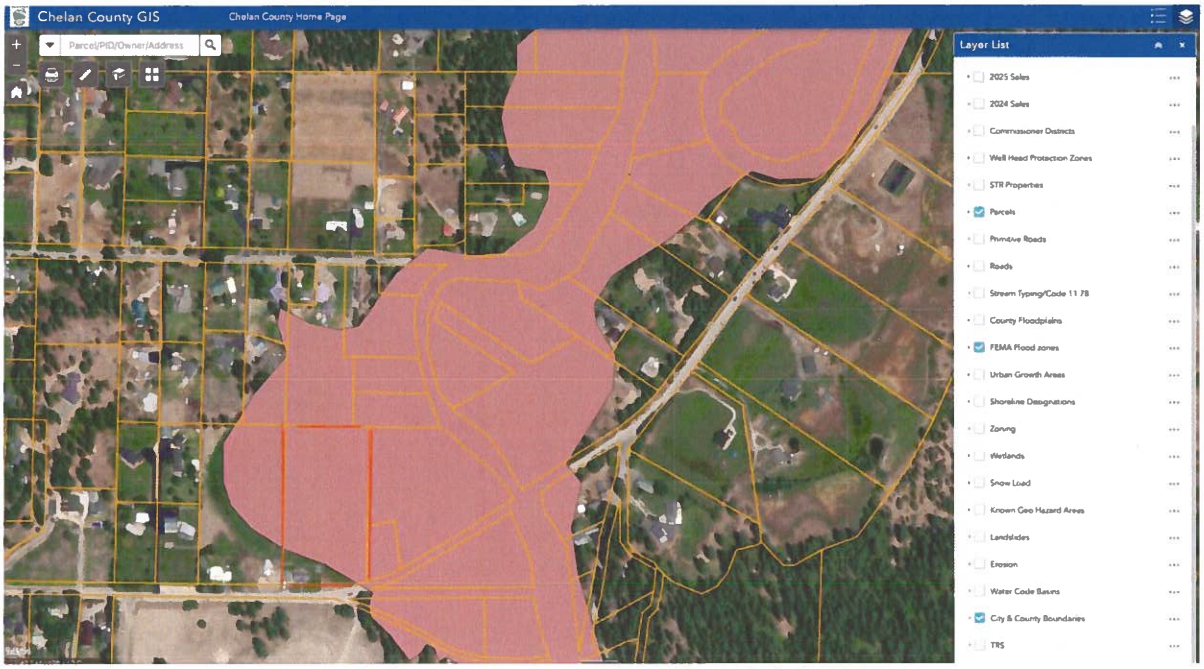


These policies are reflected in the differences between RR10 and RR 2.5 zoning.

- RR10: "These areas also provide opportunities for protecting sensitive environmental areas and creating open space typical of a rural setting."
- RR2.5: "The area has limited resource management potential."

A rezone creating greater density in a floodplain would need to demonstrate consistency with those policies — a difficult bar to clear, as the Riverstone Ranch decision showed.

Comprehensive Plan and Zoning Along the Icicle Creek

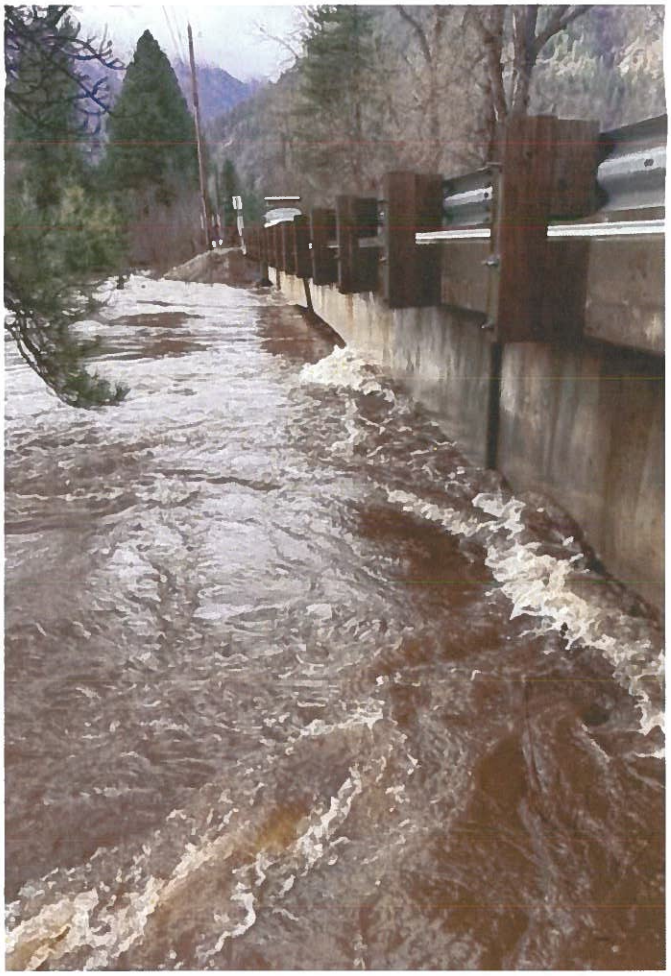


The current zoning along Icicle Creek for the properties in the riparian areas and the floodplain is RR-10. Here is a map of the zoning in the area. The subject parcel is outlined in red.

- Note that there are some large parcels along the Icicle that are currently zoned RR10. Keeping them zoned that way, and not allowing a precedent of changing the zoning to allow higher density, will be important to protecting the habitat and mitigating flood risk along the Icicle.
- The parcels to the west of the subject property are on a bench that is higher in elevation and out of the floodplain. The RR2.5 zoning makes sense for those areas. (The parcel immediately to the left is partly in and partly out of the floodplain).

Floodplain

- Wetlands, streams, and floodplains help with flood attenuation, improve water quality, recharge the water table, and are a food chain support for flora and fauna. More development means more fill, grading, and impervious cover, which reduces the floodplain's capacity to absorb and attenuate floods — increasing flood peaks for downstream properties.
- The Chelan County GIS map shows that the subject property, outlined faintly in red, is almost entirely in the floodplain. Only a small piece of it, where the existing house is located, is above the floodplain.



- This also demonstrates that the RR10 zoning closely follows the floodplain. Changing the zoning of the subject property would be inconsistent with this approach.
- The properties to the west of the subject property that are zoned RR2.5 are mostly or entirely out of the floodplain.

<u>Actual flooding</u>

- The picture below from December 2025 shows that the subject property was almost completely inundated by flooding. Only the area immediately around the existing house, out of the floodplain, stayed above the floodwaters. Some of the fences were completely underwater.

- The property was also inundated in 2006 and commonly believed to have been inundated in 1990 and 1995.
- This demonstrates that although the subject property isn't immediately adjacent to the normal course of the Icicle, it is part of the Icicle system in high water.
- In December 2025 the Icicle also flooded the crawl spaces of numerous houses. It reached the bottom of the county's East Leavenworth Road bridge as seen in the picture below.

- If the flood had been a little higher, it could have caused much more damage to houses and county infrastructure.
- It is important that the county not allow development that potentially increases flood risk.

Salmon and Fish Habitat Impacts

- Floodplains provide vital habitat for salmon and other important species, and local governments have responsibility under the Endangered Species Act to prevent harm to listed fish and other species commonly inhabiting floodplains. The Wenatchee River and Icicle Creek drainages in Chelan County are critical salmon corridors. Increased lot density means more impervious surfaces, septic systems, and riparian disturbance — all direct threats to listed species.
- The Yakama Nation is working on a Reach Assessment of the Icicle. *https://interfluve.filecamp.com/s/o/hfsR5BoNYEUAYwCR*
- The purpose of the Reach Assessment "is to document aquatic habitat conditions and hydrologic, geomorphic, and ecological processes in the lower Icicle Creek basin and to

present a comprehensive reach-based restoration strategy to address habitat limiting factors for salmon, steelhead, and bull trout. "

- The Yakama Nation is already working to re-introduce coho salmon to the Icicle. With the recommendations of the Reach Assessment, there is a potential to significantly improve salmon habitat.
- In addition to salmon, the Icicle is currently home to river otter, beaver and other wildlife. With protection, it can be a vibrant riparian community.
- In the section about the stretch of the river nearest to the subject property, the Reach Assessment states, "There are also some important conservation measures to consider for this reach. Because of the high fish use and restoration potential of these reaches, any undeveloped parcels within riparian zones or floodplains in this reach should be viewed as high priority for protection." (emphasis added)
- This is consistent with the features of RR10 zoning listed above: "opportunities for protecting sensitive environmental areas.'
- Maintaining the current zoning, and not allowing additional subdivisions and development in the floodplain, supports this "high priority" from the Reach Assessment.

Conclusion

- The current zoning of the subject property is consistent with a county policy of zoning riparian and floodplain parcels along the Icicle in RR10. The current zoning is consistent with protecting habitat along the Icicle. It is also consistent with preventing further development from exacerbating future floods. This zoning should be maintained.
- If the zoning of this floodplain property were changed to RR2.5, other large landowners are likely to ask for similar treatment. This could lead to more habitat damage and exacerbated flooding.

Thank you for considering this.

Planning Commissioners

RE: CPA 26-060 McMahon

Dear Ms. Dretke, Ms. Warren, and Planning Commissioners,

I am writing again to express my opposition to Comprehensive Plan Map Amendment proposed in CPA 26-060

I am a resident living near the subject property. I have been a property owner here for more than twenty-five years and I am writing based on my personal observations and experience.

First, I want to thank the staff of the Chelan County Department of Community Development for their thorough analysis and thoughtful conclusions about this proposal, including the multiple ways in which this proposal conflicts with county goals and policies. As a resident and a taxpayer, it is gratifying to observe high quality work from our county employees and their commitment to honor county goals and policies.

I ask that the Planning Commission show the same commitment, accept the conclusions from the Department of Community Development and recommend the Board of Commissioners reject this proposal.

Out of respect for the Planning Commission time and workload, I won't repeat everything from the staff report or my earlier letter which is in the meeting packet.

Instead, to the extent that a picture tells a thousand words, there are two pictures that illustrate some of the problems with this proposal.

The first is a photo taking of the neighborhood during the flooding last December.

Aside from a small piece of land where the existing house sits, the entire property was under several feet of water. During the flooding, the subject property was an important part of the flood current and an important area to absorb floodwaters, rather than forcing the floodwaters into the normal channel, which would have increased the current of the floodwaters and increased the flooding of other properties.

It is important to note that this was not an isolated occurrence. I recall seeing this property flooded multiple times since 2001. It is commonly known that the flooding was even deeper in 1990 and 1995.

A second important image is the Chelan County GIS map. It shows that the subject property, outlined faintly in red, is almost entirely in the floodplain.

Only a small piece of the subject property, where the existing house is located, is

above the floodplain.

- These two photos demonstrate that the mapping of the floodplain closely matches actual flooding.

- This is not rocket science. The subject property and part of the property immediately to the west are in an old oxbow, where the river used to flow. When the river is high, it again uses its old channel.

- This photo also demonstrates that the RR10 zoning closely follows the floodplain.

- In contrast, the properties to the west of the subject property are out of the oxbow and are 10-15 feet higher than the subject property. They are out of the floodplain. It is entirely reasonable that they are zoned RR2.5.

- Changing the zoning for the subject property is inappropriate.

Thank you for considering this information and the information in the rest of your packet. Please recommend to the County Commissioners that they deny this proposal.

To: Susan Dretke, susan.dretke@co.chelan.wa.us

We write to oppose the proposal to re-zone 7948 East Leavenworth Rd from RR10 to RR2.5.
This property, while not riverfront itself, is definitely part of the flood plain of the Icicle River.
All the properties in the flood plain of the Icicle River are currently zoned RR10. That should not be changed.
Rezoning would set a bad precedent, since others along the river could also apply for smaller minimum lot size-- in a domino effect.
For the sake of salmon and more, we need to preserve the riparian character of the entire Icicle River flood plain.
As recently as December 10, 2025 the McMahon property was all flooded except for their house-- see attached drone photo, with the property outlined in red.
The river needs to be able to flood in times of heavy rain; flooding would make subdividing into two lots catastrophic. Even if subsequent owners were to bring in lots of fill dirt to raise the elevation of a proposed house on the floodplain, that should not be legal; it only shoves flooding off onto other neighbors.
Neighboring properties are RR2.5, but they are not in the official flood plain. The buffer zone of the McMahon property needs to stay at RR10 zoning. No other lots in the flood plain are zoned RR2.5. Let's keep it that way.
Please do not grant the re-zoning request.
Sincerely,
--Barbara Rossing and Lauren Johnson, 7785 E. Leavenworth Rd

RESIDENTS COALITION
of Chelan County

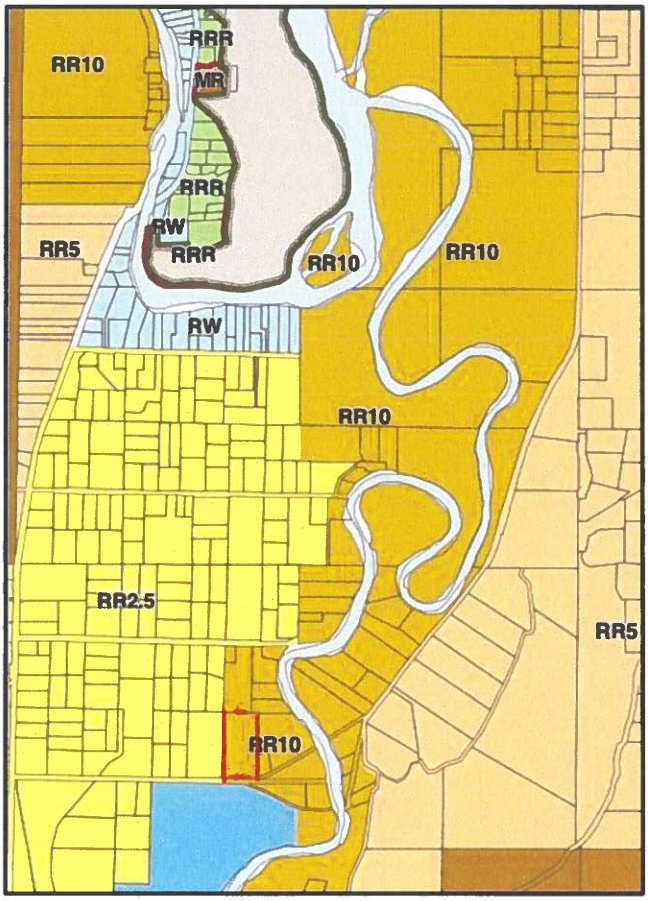
March 13, 2026

Department of Community Development
316 Washington Street, Suite 301
Wenatchee WA 98801
Attention: Susan Dretke

RE: CPA 26-060

Dear Ms. Dretke,

The Board of Directors of the Residents Coalition of Chelan County has significant concerns about the Comprehensive Plan Map Amendment proposed in CPA-26-060. Our reasoning is explained below.

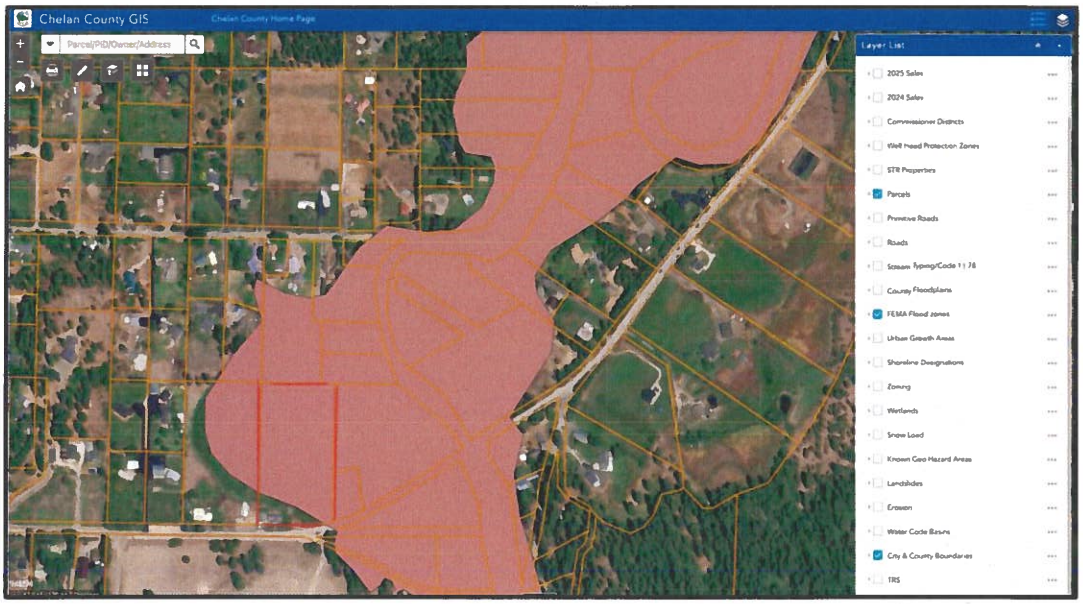


- The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek which are RR-10.
- The change in zoning would allow the parcel to be subdivided, increasing the density of development in the floodplain.
- The increase in density would degrade opportunities for improving salmon habitat and would exacerbate flooding in the area.
- The proposal has the potential to be an important precedent that could affect the entire lower Icicle.
- The subject parcel was inundated by flood in both 2025 and 2006.

<u>The Residents Coalition of Chelan County (RC_3)</u>

- The mission of the Residents Coalition of Chelan County is: "to work with residents to ensure that future growth and development in Chelan County preserves and enhances the qualities that residents value the most—rural character, a strong sense of community, and a healthy and beautiful natural environment." See generally, https://coalitionofchelancounty.org
- We believe that maintaining the existing zoning in the floodplain of Icicle Creek is important to our mission.

Comprehensive Plan and Zoning Along the Icicle Creek



- The current zoning along Icicle Creek for the properties in the riparian areas and the floodplain is RR-10. Here is a map of the zoning in the area. The subject parcel is outlined in red.

- Note that there are some large parcels along the Icicle that are currently zoned RR10. Keeping them zoned that way, and not allowing a precedent of changing the zoning to allow higher density, will be important to protecting the habitat and mitigating flood risk along the Icicle.
- The parcels to the west of the subject property are on a bench that is higher in elevation and out of the floodplain. The RR2.5 zoning makes sense for those areas. (The parcel immediately to the left is partly in and partly out of the floodplain).

Floodplain

- The Chelan County GIS map shows that the subject property, outlined faintly in red, is almost entirely in the floodplain. Only a small piece of it, where the existing house is located, is above the floodplain.

- This also demonstrates that the RR10 zoning closely follows the floodplain. Changing the zoning of the subject property would be inconsistent with this approach.
- The properties to the west of the subject property are mostly or entirely out of the floodplain.

<u>Actual flooding</u>

- The picture below from December 2025 shows that the subject property was almost completely inundated by flooding. Only the area immediately around the house, out of the floodplain, stayed above the floodwaters. Some of the fences were completely underwater.

- The property was also inundated in 2006 and reportedly also in 1990 and 1995.
- This demonstrates that although the subject property isn't immediately adjacent to the normal course of the Icicle, it is part of the Icicle system in high water.

Yakama Nation Reach Assessment (draft)

- The Yakama Nation is working on a Reach Assessment of the Icicle.[1]
- The purpose of the Reach Assessment "is to document aquatic habitat conditions and hydrologic, geomorphic, and ecological processes in the lower Icicle Creek basin and to present a comprehensive reach-based restoration strategy to address habitat limiting factors for salmon, steelhead, and bull trout. "
- In the section about the stretch of the river nearest to the subject property, it states, "There are also some important conservation measures to consider for this reach. Because of the high fish use and restoration potential of these reaches, any undeveloped parcels within riparian zones or floodplains in this reach should be viewed as high priority for protection." (emphasis added)
- Maintaining the current zoning, and not allowing additional subdivisions and development in the floodplain, supports this "high priority" from the Reach Assessment.

Conclusion

- The current zoning of the subject property is consistent with a county policy of zoning riparian and floodplain parcels along the Icicle in RR10. The current zoning is consistent with protecting habitat along the Icicle. It is also consistent with preventing further development from exacerbating future floods. This zoning should be maintained.
- If the zoning of this floodplain property were changed to RR2.5, other large landowners are likely to ask for similar treatment. This could lead to more habitat damage and exacerbated flooding.

For the above reasons RC_3 opposes the proposed comprehensive plan amendment. Thank you for considering our comments.

of Chelan County

October 8, 2026

Chelan County Community Development
Attn: Planning Commission Comments
316 Washington St., Suite 301
Wenatchee, WA 98801
Submitted via email

Attention:
Susan Dretke, Department of Community Development
Cherié Warren, Chair, Planning Commission
Planning Commissioners

RE: CPA 26-060 McMahon

Dear Ms. Dretke, Ms. Warren, and Planning Commissioners,

The Board of Directors of the Residents Coalition of Chelan County (RC3) continue to have significant concerns about the Comprehensive Plan Map Amendment proposed in CPA 26-060.

We have had the opportunity to review the staff report and appreciate the diligence with which they investigated this issue. We are in concordance with their findings and conclusions that "…re-designation of the site from Rural Resource/Residential 10 (RR10) to Rural Residential 2.5 (RR2.5) would not comply with applicable Chelan County goals and policies". We hope that the Planning Commission will recommend to the Board of County Commissioners that this petition for zoning changes be denied.

The following is a summary of our concerns (from our initial communication) and salient findings from the staff report for your review.

<u>RC3's concerns</u>

- The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek which are zoned RR-10.
- The change in zoning would allow the parcel to be subdivided, increasing the density of development in the floodplain.

- The increase in density would degrade opportunities for improving salmon habitat and would exacerbate flooding in the area.
- The proposal has the potential to be an important precedent that could negatively affect the entire lower Icicle Creek area.
- The subject parcel was inundated by the flood of 2025 and 2006

Salient findings from the staff report

"Findings of fact"

- Amending the designation of the site could result in additional development in the floodplain. The proposal would, therefore, not be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies. .
- The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area; however, it would be in direct conflict with goals and objectives which support the preservation of natural functions of critical areas (emphasis is ours). Thereby being inconsistent with the GMA goals and with County-wide Planning Policies.
- The designation of the site from RR10 to RR2.5 could adversely affect the surrounding area by the introduction of additional development within a floodplain.
- The RR2.5 designation is intended to be located in areas with limited resource management potential. The subject site is located in the floodplain of Icicle Creek which is a significant resource in the area and management of the floodplain could be hindered by additional development. The amendment could therefore adversely affect designated critical areas in ways that cannot be mitigated.
- The interests of the public (public health, safety and welfare) would not be served by the possibility of additional development in the floodplain

"Findings of law"

- The amendment to the Chelan County Comprehensive Plan would not be consistent with the Requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
- The amendment would not comply with the Comprehensive Plan designation/siting criteria.
- The amendment would adversely affect the surrounding land uses.
- The amendment would adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

This letter is respectfully submitted with hope that the Planning Commission will recommend denial of the amendment to the Board of County Commissioners.

Thanks for the link. I tried before but it didn't work. The proposal states that no development is being proposed, but by changing the zoning to 2.5 acres, future development of two residential properties could occur. I stated four potential lots, obviously I was assuming a ten-acre site. As this is a flooded area, future buildings would violate the zero rise policies and Frequently flooding policies based on the FEMA map designation from 2025 and evidence of flooding. The property is used exclusively for agriculture now.

Please see attached comment letter regarding Project File No.: CPA 26-060. We live adjacent to this property.

March 16, 2026

Chelan County Department of Community Development
316 Washington Street, Suite 301
Wenatchee, WA 98801
Attention: Susan Dretke

RE: Project File No.: CPA 26-060, Comprehensive Plan Map Amendment for
Dwayne McMahon, 7948 East Leavenworth Rd, Leavenworth, WA. 98826

We are writing to object to the Comprehensive Plan Map Amendment to change parcel # 24-17-23-510-480 from Rural Residential/Resource (RR) 10 to RR 2.5 acres because it is likely to increase the risk of flooding to neighboring properties and impact salmon habitat. The proposal is inconsistent with the zoning for the rest of the riparian and floodplain areas near Icicle Creek, which are RR-10.

The property is currently agricultural and is within a regulatory floodplain and must be classified as a frequently flooded critical area based on the latest FEMA maps (attached) and historical evidence of flooding. The ten acres serve functionally as an infiltration zone, important for conveying floodwaters away from built structures.

This area is located within the one percent chance of flooding and a special flood hazard area, as defined by the Federal Emergency Management Agency (FEMA) and the National Flood Insurance Program (NFIP), known as the "special flood hazard area" or zone (WAC 365-190-110 (1)). The preliminary flood hazard zone map issued by FEMA on 4/30/2025 designate this property as "AE", for a High Flood Hazard zone. The property is within a Regulatory Floodway (Chelan County Code (CCC), Chapter 11.84). This property is necessary to contain and discharge the base flood flow at buildout.

If subdivided and developed, the fill necessary to develop a building site and road access would impact adjoining properties by increasing the risk of flooding to these properties and impact the "No Rise" standards within the County's development code (CCC, section 3.20.300, Regulatory Floodway). In addition, the potential for public health impacts from infiltration from floodwaters into utilities, such as septic and water supply pollution would likely occur. Avoidance of these impacts is an imperative and cannot be adequately mitigated.

The property was flooded in both 2006 and on December 11, 2025. Virtually the entire subject property plus adjoining properties were inundated by flood waters (see photos) from the Icicle River, clearly demonstrating that this area is not safe for fill and development. As well, the property should <u>not</u> be granted a Reasonable Use Exception and cannot comply with all criteria necessary to allow development to occur. The proposal will result in a net loss of frequently flooded area functions and values, consistent with the best available science (Washington Administrative Code 365-195).

Christine and Jeffrey Parsons, 50 Oxbow Lane, Leavenworth, WA. 98826

Hazard Level | **Flood Hazard Zone**

High Flood Hazard — **A, A, AH, AO, VE and V Zones.** Properties in these flood zones have a 1% chance of flooding each year. This represents a 26% chance of flooding over the life of a 30-year mortgage.

Moderate Flood Hazard — **Shaded Zone X.** Properties in the moderate flood risk areas also have a chance of flooding from storm events that have a less than 1% chance of occurring each year. Moderate flood risk indicates an area that may be provided flood risk reduction due to a flood control system or an area that is prone to flooding during a 0.2% annual chance storm event. These areas may have been indicated as areas of shallow flooding by your community.

Unshaded Zone X. Properties on higher ground and away from local flooding sources have a reduced flood risk when compared to the Moderate and High Flood Risk categories. Structures in these areas may be affected by larger storm events, or events of the 0.2% annual chance storm event.

Low Flood Hazard — Insurance Note: High Risk Areas are called 'Special Flood Hazard Areas' and flood insurance is mandatory for federally backed mortgage holders. Properties in Moderate and Low Flood Risk areas may purchase flood insurance at a lower cost rate, known as Preferred Risk Policies. See your local insurance agent or visit https://www.fema.gov/national-flood-insurance-program for more information.

Disclaimer: This report is for informational purposes only and is not authorized for official use. The positional accuracy may be compromised in some areas. Please contact your local floodplain administrator for more information or go to msc.fema.gov to view an official copy of the Flood Insurance Rate Maps.

RE: Project File No.: CPA 26-060, Comprehensive Plan Map Amendment for
Dwayne McMahon, 7948 East Leavenworth Rd, Leavenworth, WA. 98826

We are writing to object to the Comprehensive Plan Map Amendment to change parcel # 24-17-23-510-480 from Rural Residential/Resource (RR) 10 to RR 2.5 acres because it is likely to increase the risk of flooding to neighboring properties.

The property is currently agricultural and is within a regulatory floodplain and must be classified as a frequently flooded critical area based on the latest FEMA maps (attached) and recent evidence of flooding. The ten acres serve functionally as an infiltration zone, important for conveying floodwaters away from built structures.

This area is located within the one percent chance of flooding and a special flood hazard area, as defined by the Federal Emergency Management Agency (FEMA) and the National Flood Insurance Program (NFIP), known as the "special flood hazard area" or zone (WAC 365-190-110 (1)). The preliminary flood hazard zone map issued by FEMA on 4/30/2025 designate this property as "AE", for a High Flood Hazard zone. The ten acres is within a Regulatory Floodway (Chelan County Code (CCC), Chapter 11.84). This property is necessary to contain and discharge the base flood flow at buildout.

If subdivided and developed into potentially four building lots, the fill necessary to develop building sites and road access would impact adjoining properties by increasing the risk of flooding to these properties and impact the "No Rise" standards within the County's development code (CCC, section 3.20.300, Regulatory Floodway). In addition, the potential for public health impacts from infiltration from floodwaters into utilities, such as septic and water supply pollution would likely occur. Avoidance of these impacts is an imperative and cannot be adequately mitigated.

Beginning on December 11, 2025, virtually the entire subject property plus adjoining properties were inundated by flood waters (see photos) from the Icicle River, clearly demonstrating that this area is not safe for fill and development. As well, the property should not be granted a Reasonable Use Exception and cannot comply with all criteria necessary to allow development to occur. The proposal will result in a net loss of frequently flooded area functions and values, consistent with the best available science (Washington Administrative Code 365-195).

Hazard Level — Flood Hazard Zone

High Flood Hazard — **AE, A, AH, AO, VE and V Zones.** Properties in these flood zones have a 1% chance of flooding each year. This represents a 26% chance of flooding over the life of a 30-year mortgage.

Moderate Flood Hazard — **Shaded Zone X.** Properties in the moderate flood risk areas also have a chance of flooding from storm events that have a less than 1% chance of occurring each year. Moderate flood risk indicates an area that may be protected flood risk reduction due to a flood control system or an area that is prone to flooding during a 0.2% annual chance storm event. These areas may have been indicated as areas of shallow flooding by your community.

Unshaded Zone X. Properties on higher ground and away from local flooding sources have a reduced flood risk when compared to the Moderate and High Flood Risk categories. Structures in these areas may be affected by larger storm events in excess of the 0.2% annual chance storm event.

Low Flood Hazard — Insurance Note: High Risk Areas are called "Special Flood Hazard Areas" and flood insurance is mandatory for federally backed mortgage holders. Properties in Moderate and Low Flood Risk areas may purchase flood insurance at a lower-cost rate, known as Preferred Risk Policies. See your list of insurance agents or visit https://www.fema.gov/national-flood-insurance-program for more information.

Disclaimer: This report is for informational purposes only and is not authorized for official use. The positional accuracy may be compromised in some areas. Please contact your local floodplain administrator for more information or go to msc.fema.gov to view an official copy of the Flood Insurance Rate Maps.

Chelan County Department of Community Development
Attn: Susan Dretke

RE: Comments on Comprehensive Plan Amendment CPA-26-060

Dear Ms. Dretke,

The Icicle Creek Watershed Council (ICWC) appreciates the opportunity to provide comments on the proposed Comprehensive Plan Amendment (CPA-26-060). Based on concerns related to floodplain function, protection of critical areas, and consistency with the Chelan County Comprehensive Plan and Washington State's Growth Management Act, ICWC recommends maintaining the current zoning designation for the parcel identified in CPA-26-060.

ICWC is a community-based organization dedicated to protecting and restoring the ecological integrity of the Icicle Creek watershed through collaboration with residents, land managers, and public agencies. From this watershed stewardship perspective, ICWC is concerned about the potential impacts of increased residential density and development that could result from the proposed zoning change within the Icicle Creek floodplain.

The property is almost entirely within the Icicle Creek floodplain (Figure 1, page 3) and has been documented underwater during recent high-water events, including two floods in the early 1990s, one in 2006, and most recently in 2025 (Figure 2, page 3). These events demonstrate that much of the parcel functions as part of the active floodplain during high flows.

Under Washington State's Growth Management Act (RCW 36.70A), counties and cities are required to designate and protect "frequently flooded areas" as critical areas and adopt development regulations that protect their ecological and hydrologic functions. Floodplains are recognized not only as areas subject to flooding, but as areas that provide essential ecological functions such as floodwater storage, groundwater recharge, and fish and wildlife habitat.

Allowing additional subdivision or development within this floodplain could place future property owners at increased risk during high-water events and, more importantly, may affect the natural processes that allow floodplains to store and convey floodwaters. The stated purpose in the application is residential development. The only land out of the floodplain is occupied by the existing home, so any new development will have to occur in the floodplain. Floodplains along Icicle Creek provide important space for water to spread out during high flows, helping reduce downstream flooding while supporting riparian areas and fisheries that depend on a healthy river system.

Recognizing the importance of these natural functions, Chelan County's Comprehensive Plan places strong emphasis on protecting natural systems and limiting development impacts in rural areas. The Rural Element establishes goals to maintain a balance between human uses and the natural environment and to protect natural environmental features that support wildlife habitat, open space, and outdoor recreation. It further states that rural development should avoid and mitigate impacts to critical areas and reduce the inappropriate conversion of undeveloped land into sprawling or more intensive development patterns.

Allowing increased residential density within an active floodplain is inconsistent with these policies because floodplains function as critical environmental features that support habitat, natural hydrologic processes, and open space within the rural landscape.

Changing the zoning to allow higher density development within the floodplain could also set a precedent for similar requests along the Icicle Creek corridor, where many parcels remain zoned to reflect floodplain conditions and the importance of maintaining natural floodplain function.

Importantly, the current Rural Residential 10 (RR10) zoning designation aligns with the mapped floodplain along the lower Icicle Creek corridor, reflecting a broader planning approach to limit development in areas subject to flooding and to protect associated ecological functions. Allowing increased density on this parcel would represent a departure from this established pattern and could undermine the consistency of the County's zoning framework in managing floodplain areas.

Maintaining the current zoning framework helps preserve floodplain function, protect vital habitat, and reduce the potential for increased flood impacts along Icicle Creek.

For these reasons, ICWC recommends that the parcel remain under its current zoning designation. Thank you for the opportunity to provide comments.

Sincerely,

Sharon Lunz

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning,

On behalf of the City of Leavenworth, I am providing the following comments on project CPA 26-06

1. Page 2 of the application form indicates that the water source for this property is/will be single private well; however, the City of Leavenworth currently provides service to the residence on this property. If the purpose of the proposed map amendment is to allow for additional units on this property, the owner should be aware that consideration for the protection of water use for properties *within* the city is a priority and paramount prior to granting water outside of the city. Granting water connections outside of the city UGA is a not a right, and the intent is to ensure water is available to the citizens of Leavenworth. The city does not guarantee any availability of public water for future development of this lot.

Thank you for the opportunity to review and comment on this proposal.

Respectfully

Memorandum

To: Susan Dretke, Chelan County

From: Richmond Petty, REHS

Date: 03/12/26

RE: McMahon (CPA 26-060) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 2.5 (RR2.5). The subject property is located at 7948 East Leavenworth Rd., Leavenworth, WA (county tax parcel: 241723510480)

As proposed, I have no objections to further approval of this project.

- Existing home has permitted septic system (86-0330) and connection to City of Leavenworth for water source.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

Chelan County Community Development
Attn: Planning Commission Comments
316 Washington St., Suite 301
Wenatchee, WA 98801
Submitted via email

Attention:
Susan Dretke, Department of Community Development
Cherié Warren, Chair, Planning Commission

Planning Commissioners

RE: CPA 26-060 McMahon

Dear Ms. Dretke, Ms. Warren, and Planning Commissioners,

I wrote a letter earlier to express my opposition to the Comprehensive Plan Map Amendment proposed in CPA 26-060 and I am still opposed.

I am a resident living next door to the subject property. We have been property owners here for more than twenty-five years and I am writing based on my personal observations and experience.

As my husband also wrote, I want to thank the staff of the Chelan County Department of Community Development for their thorough analysis and thoughtful conclusions about this proposal, including the multiple ways in which this proposal conflicts with county goals and policies. As a resident and a taxpayer, it is gratifying to observe high quality work from our county employees and their commitment to honor county goals and policies.

Can the Planning Commission show the same commitment, accept the conclusions from the Department of Community Development and recommend the Board of Commissioners reject this proposal? I hope so.

Out of respect for the Planning Commission time and workload, I will not repeat the comments in my earlier letter which hopefully is in the meeting packet. During the flood in December 2025, we were able to kayak on our neighbor property, even over their wood fences which are over 4 feet, as well as the next neighbors. The only items not under water were the houses that were on the edge of E Leavenworth Rd. In past floods, a small lake would form in the lower part of the property and exist for a couple of months due to the low elevation in that part of the property. This was delightful due to the proliferation of croaking frogs, but would not be a place where a house should be built.

The first is a photo taking of the neighborhood during the flooding last December and a map of the floodplain. Thank you for your consideration and

for the information from the rest of your packet.
Sincerely, Gro Buer

Only a small piece of the subject property, where the existing house is located, is above the floodplain.

- These two photos demonstrate that the mapping of the floodplain closely matches actual flooding.

- This is not rocket science. The subject property and part of the property immediately to the west are in an old oxbow, where the river used to flow. When the river is high, it again uses its old channel.

- This photo also demonstrates that the RR10 zoning closely follows the floodplain.

- In contrast, the properties to the west of the subject property are out of the oxbow and are 10-15 feet higher than the subject property. They are out of the floodplain. It is entirely reasonable that they are zoned RR2.5.

- Changing the zoning for the subject property is inappropriate.

Gro Buer

Mara and Brian Bohman
7840 E. Leavenworth Rd.
Leavenworth, WA 98826

March 17, 2026

Dear Ms. Dretke,

Thank you for the opportunity to comment on the proposed amendment to the Comprehensive Plan Map for parcel 24-17-23-510-480 from RR10 to RR2.5.

Considering the fact that this parcel is located in the floodplain for Icicle Creek, we do not support this down zoning. The below photo from the December 2025 flood illustrated this clearly, as well as historic records (subject property outlined in red).

Our property lies just outside of this zone, shown in the upper right. Allowing for development of this parcel, assumes fill for elevated driveways and structure pads. The water during a flooding event would have to go somewhere, and would likely put pressure on property that currently sits outside of this flood zone.

Allowing for this zoning change would set a precedent for future downzoning in the floodplain of which would continue to put pressure on neighboring properties.

We urge Chelan County to maintain the current zoning of RR10 for the subject property.

Thank you for your attention to this.
Sincerely,

Mara and Brian Bohman

    ☐ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

Unknown

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

File(s) No. _____

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.
2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.
3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.
4. Additional permit applications and approvals may be necessary to conduct specific activities.
5. Application fees are non-refundable, except when approve by the Board.
6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

7. Chelan County is hereby given consent to enter the property(ies) listed above.
8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.
9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.
10. I certify that this application has been made with the consent of the lawful property owner(s).
11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.
12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

TESS L WATKINS NOTARY PUBLIC STATE OF WASHINGTON COMMISSION EXPIRES JAN 24 2011

SEPA[1] Environmental Checklist

RECEIVED
FEB 25 2026
CHELAN COUNTY
Community Development

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

[1] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/Checklist-guidance

A.Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**

   McMahon Comprehensive Plan Map Amendment and Rezone

2. **Name of applicant:**

   Dwayne McMahon

3. **Address and phone number of applicant and contact person:**

   Dwayne McMahon (Applicant)
   729 Gellatly Street
   Wenatchee, WA 98801
   509-679-8649

   Ryan Walker (Agent)
   Pacific Engineering and Design, PLLC
   200 South Columbia St, Suite 300
   Wenatchee, WA 98801
   509-630-7917
   ryanw@pacificengineering.net

4. **Date checklist prepared:**

   February 2026

5. **Agency requesting checklist:**

   Chelan County

6. **Proposed timing of schedule (including phasing, if applicable):**

   The application will follow the Chelan County process for Comprehensive Plan Map Amendments.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   Single-family residential development.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.**

   None.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

   No.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

    Comprehensive Plan Map Amendment and Zoning Map Amendment.

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)**

    This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 5.0 acres from Rural Residential/Resource 10 (RR 10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located at 7948 East Leavenworth Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

    The official Chelan County Zoning and Comprehensive Plan map is no. 53.

    The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential lot sizes. The adjacent property to the west is zoned RR 2.5, which is the zone that the subject property is proposed to be changed to. The subject property is only five acres in size—half of the minimum lot size for RR 10. There are no residential properties over 10 acres in size anywhere in the vicinity of the subject property. Most residential properties in the area are one-acre in size. The revision to RR 2.5 will help create a more consistent rural density pattern.

12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.**

    The property is located at 7948 East Leavenworth Road, Leavenworth, WA, within Section 32, T 25N, R 18E.W.M.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**

5%

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.**

Soil mapped for the property on the USGS soil survey website (https://websoilsurvey.nrcs.usda.gov) is Leavenworth fine sandy loam, 0-3 percent slopes (Lh) and Leavenworth loamy sand, 0-3 percent slopes (Le). Both soil types are listed as prime farmland if irrigated.

None of the soil will be removed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.**

According to the Chelan County GIS online mapping tool, the subject properties do not contain geologically hazardous soils.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**

No filling, excavation or grading is proposed.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**

No.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

There will be no change in impervious surfaces.

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**

None.

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**

None.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

No.

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**

None.

3. Water

Find help answering water questions[5]

a. **Surface:**

Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.**

   Icicle River is located approximately 300 feet to the east of the property. The DNR stream typing map does not indicate other surface water bodies, and the NWI wetlands mapper does not indicate the presence of wetlands on the subject property. A Wetland Determination will be performed by Pacific Engineering in spring 2026 to investigate the property for wetlands.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**

   No.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**

   None.

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**

   No.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

   Yes, the subject property is mapped within the FEMA mapped 100-year floodplain.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**

   No.

---

[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water

[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

b. Ground:

Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**

   No.

2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

   No waste material will be discharged.

c. Water Runoff (including stormwater):

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

   There will be no change in stormwater runoff.

2. **Could waste materials enter ground or surface waters? If so, generally describe.**

   No.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.**

   No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

4. Plants

Find help answering plants questions

a. Check the types of vegetation found on the site:

☐ **deciduous tree: alder, maple, aspen, other**

☐ **evergreen tree: fir, cedar, pine, other**

☐ **shrubs**

☒ **grass**

☐ **pasture**

☐ **crop or grain**

☐ **orchards, vineyards, or other permanent crops.**

☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**

☐ **water plants: water lily, eelgrass, milfoil, other**

☐ **other types of vegetation**

b. What kind and amount of vegetation will be removed or altered?

None.

c. List threatened and endangered species known to be on or near the site.

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Showy Stickseed (*Hackelia venusta*) – Endangered
- Wenatchee Mountains Checkermallow (*Sidalcea oregana var. calva*) – Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site as no development is proposed.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.

None.

e. List all noxious weeds and invasive species known to be on or near the site.

None known.

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include:

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:**

b. **List any threatened and endangered species known to be on or near the site.**

According to the USFWS IPaC online mapping tool the following species may be located within the vicinity of the proposed project:

- Canada Lynx (*Lynx canadensis*) - Threatened
- Gray Wolf (*Canis lupus*) - Endangered
- North American Wolverine (*Gulo gulo luscus*) – Threatened
- Mt. Rainier White-tailed Ptarmigan (*Lagopus leucura rainierensis*) – Threatened
- Northern Spotted Owl (*Strix occidentalis caruina*) - Threatened
- Yellow-billed Cuckoo (*Coccyzus americanus*) -Threatened
- Bull Trout (*Salvelinus confluentus*) - Threatened
- Monarch Butterfly (*Danaus Plexippus*) – Proposed Threatened
- Suckley's Cuckoo Bumble Bee (*Bombus suckleyi*) – Proposed Endangered

However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

c. **Is the site part of a migration route? If so, explain.**

No.

d. **Proposed measures to preserve or enhance wildlife, if any.**

None.

e. **List any invasive animal species known to be on or near the site.**

None known.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. **What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.**

   The plan amendment does not have energy needs.

b. **Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.**

   No.

c. **What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.**

   None.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.**

   No.

   1. **Describe any known or possible contamination at the site from present or past uses.**

      None known.

   2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**

      None known.

   3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.**

      None known.

   4. **Describe special emergency services that might be required.**

      None known.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

5. **Proposed measures to reduce or control environmental health hazards, if any.**

   None.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?**

   East Leavenworth Road is adjacent to the property to the south. It is a primary bypass route between Leavenworth and Icicle Road. The roadway is heavily traveled, particularly during the summer months due to recreational access, which causes vehicle noise.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**

   The comprehensive plan map amendment will not generate noise.

3. **Proposed measures to reduce or control noise impacts, if any:**

   None.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**

   The current use of the site is residential and agricultural. The adjacent property to the west is used for residential and agricultural purposes. Properties to the north and east are used for residential purposes.

   To the south, the property is owned by the United States Fish and Wildlife Service and operated as the Leavenworth Fish Hatchery. This parcel also includes Cascade Discovery School, which provides educational programming for high school students, as well as a public boat launch that allows commercial river recreation shuttle services for tubing, kayaking, and stand-up paddleboarding on Icicle Creek. In addition, the property contains public trails that provide access for horseback riding, winter snowshoe tours, cross-country skiing, and fish viewing. The area is heavily utilized by the public, particularly during the summer months, resulting in increased recreational activity and traffic.

   The surrounding area is currently used for residential, agricultural, and commercial purposes and therefore the proposal will not affect existing land uses.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

Yes. The property has been used as a hay farm including growing and harvesting of agricultural products.

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**

   No.

c. Describe any structures on the site.

A single-family residence and detached garage are present on the Project Site.

d. Will any structures be demolished? If so, what?

No.

e. What is the current zoning classification of the site?

Rural Residential/Resource 10 (RR10).

f. What is the current comprehensive plan designation of the site?

Rural Residential/Resource 10 (RR10).

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Yes, the Project Site is mapped by the WDFW PHS online mapping tool as containing potential shrubsteppe habitat, caves or cave rich areas, and potential grizzly bear (*Ursus arctos*), little brown bat (*Myotis lucifugus*), northern spotted owl (*Strix occidentalis*), Yuma myotis (*Myotis yumanensis*), and golden eagle (*Aquila chrysaetos*) habitat. All Priority habitats are considered critical areas by Chelan County Code (CCC) 11.78.010(2). The property is partially in the 100-year floodplain which is classified as a critical area. However, the comprehensive plan map amendment will not result in direct impacts to the Project Site or affect access or habitat use by the above listed species.

i. Approximately how many people would reside or work in the completed project?

None.

j. Approximately how many people would the completed project displace?

None.

k. Proposed measures to avoid or reduce displacement impacts, if any.

None proposed.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**

None proposed.

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**

None proposed.

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**

None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**

None.

c. **Proposed measures to reduce or control housing impacts, if any:**

None proposed.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

No structures proposed.

b. **What views in the immediate vicinity would be altered or obstructed?**

No.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**

None proposed.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

---

[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

None.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?**

No.

c. **What existing off-site sources of light or glare may affect your proposal?**

None.

d. **Proposed measures to reduce or control light and glare impacts, if any:**

None proposed.

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?**

Hiking, bicycling, horseback riding, winter snowshoe tours, cross-country skiing, fish viewing, and rafting occur in the vicinity.

b. **Would the proposed project displace any existing recreational uses? If so, describe.**

No.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**

None proposed.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.**

No.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.**

According to the DAHP WISAARD online mapping tool, a GLO trail is located approximately 0.5 miles to the northeast of the subject parcel. No other GLO features are located within the project vicinity.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.**

The DAHP WISAARD online mapping tool was used.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.**

None proposed.

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**

East Leavenworth Road fronts the property on the south side. No new access is proposed.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?**

No. The nearest transit stop is in Leavenworth, approximately 3.5 miles to the north.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**

No.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**

No.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**

None.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**

No.

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation

g. **Proposed measures to reduce or control transportation impacts, if any:**

None proposed.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.**

No.

b. **Proposed measures to reduce or control direct impacts on public services, if any.**

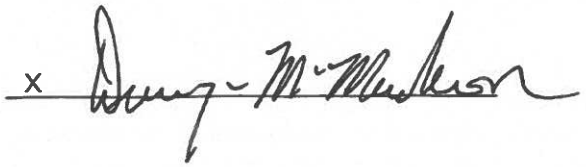
None proposed.

16. Utilities

Find help answering utilities questions[18]

a. **Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:**

b. **Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.**



None proposed.

[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services
[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

The proposal may result in construction of a new onsite septic systems in the future. Future construction could increase storm water runoff and emissions during construction.

- **Proposed measures to avoid or reduce such increases are:**

  All future development will comply with local state and federal regulations including critical areas, storm water management and onsite septic requirements.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**

Future development would not affect plants, animals, fish or marine life. The property is currently intensively used for agricultural purposes and is adjacent to commercial uses from the Leavenworth Fish Hatchery and the Icicle Creek public boat launch, which results in increased recreational activity and traffic.

- **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**

  Compliance with Chelan County Critical area regulations at the time of development.

3. **How would the proposal be likely to deplete energy or natural resources?**

The proposal would not deplete energy or natural resources. Leavenworth is served by Chelan County PUD which provides abundant clean, renewable energy.

- **Proposed measures to protect or conserve energy and natural resources are:**

  Future development is likely to use low energy lighting such as LEDs and will comply with the energy code in effect at the time of building.

[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**

Future use of the property may occur with the 100-year floodplain.

- **Proposed measures to protect such resources or to avoid or reduce impacts are:**

  Compliance with Chelan County Critical area and Flood Hazard regulations at the time of development.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**

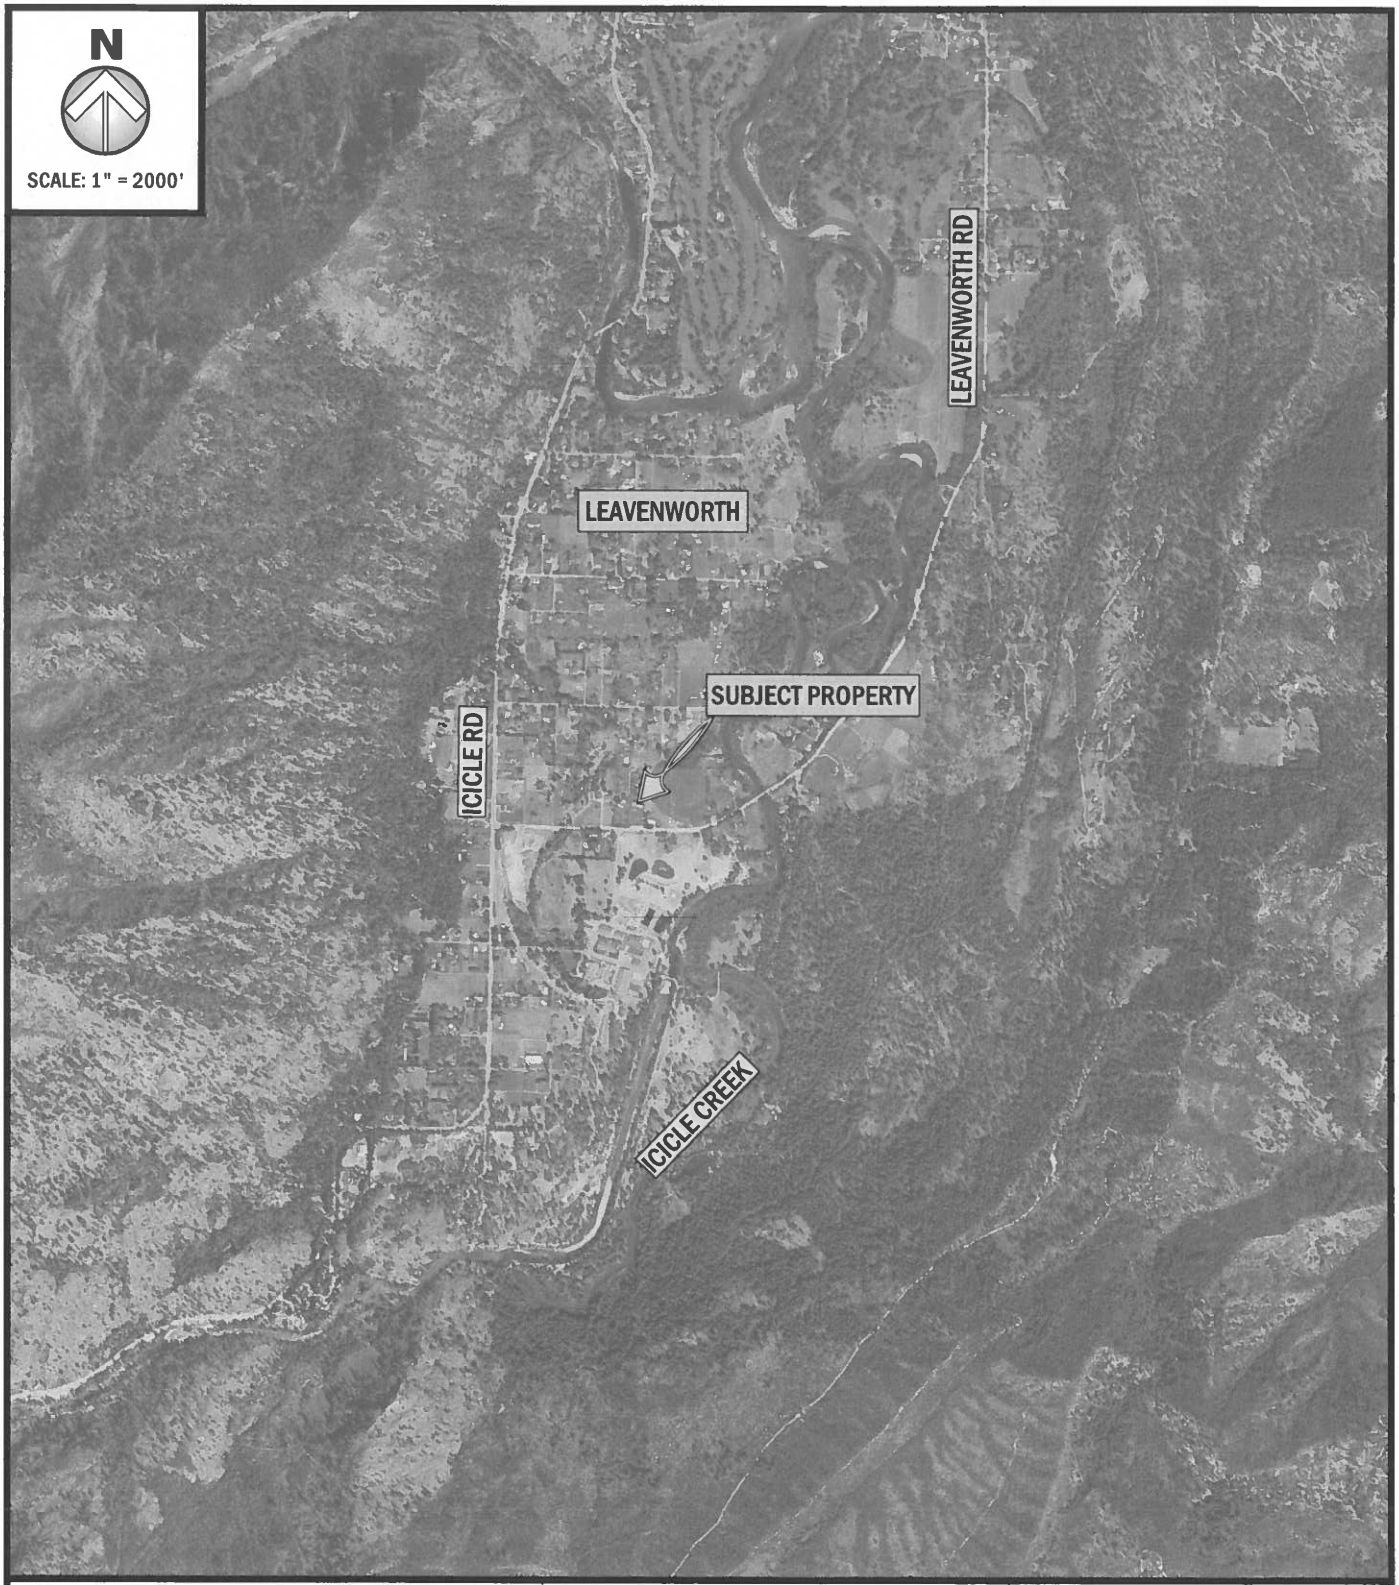
The property is not located in the shoreline zone and is not regulated by the Shoreline Management Act or Chelan County Shoreline Master Program.

- **Proposed measures to avoid or reduce shoreline and land use impacts are:**

  Future development of the property would meet all county regulations for land use.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?**

Future residential development could result in a slight increase in vehicle trips and the potential for more emergency service needs. Additional residences may generate more daily trips to and from the site, including commuter, school, and service-related travel.



However, the anticipated increase in demand is expected to be minimal and consistent with rural residential development patterns in the surrounding area. The subject property is currently only five acres in size and therefore already half of the minimum lot size for RR 10. The property is located in an area already characterized by residential uses at similar or smaller lot sizes, and existing transportation infrastructure and public services currently serve comparable development in the vicinity. Residential development due to the rezone would be more consistent with the surrounding rural density pattern.

- **Proposed measures to reduce or respond to such demand(s) are:**

  Compliance with Chelan County Code at the time of development.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal will not conflict with any laws for the protection of the environment.

SUBJECT: Dwayne McMahon Application for Comprehensive Plan Map Amendment

Chelan County Code 14.14.050 Application for Comprehensive Plan Map Amendment Review Criteria.

1. **A detailed statement of what is proposed to be changed and why. Identify the specific Comprehensive Plan Land Use Designation map number and Zoning map number that would be amended.**

This proposal is to change the zoning and comprehensive plan land use designation and zoning map of approximately 5.0 acres from Rural Residential/Resource 10 (RR 10) to Rural Residential/Resource 2.5 (RR 2.5). The property is located at 7948 East Leavenworth Road, Leavenworth, within Section 32, T 25N, R 18E.W.M.

The official Chelan County Zoning and Comprehensive Plan map is no. 53.

The zoning and comprehensive plan designations are proposed to be changed to align the property with nearby zoning and existing residential lot sizes. The adjacent property to the west is zoned RR 2.5, which is the zone that the subject property is proposed to be changed to. The subject property is only five acres in size—half of the minimum lot size for RR 10. There are no residential properties over 10 acres in size anywhere in the vicinity of the subject property. Most residential properties in the area are one-acre in size. The revision to RR 2.5 will help create a more consistent rural density pattern.

2. **Explain how the proposed amendment is consistent with the goals of the Washington State Growth Management Act (RCW 36.70A.020 as amended) and any applicable County Wide Planning Policies.**

Growth Management Act Goals

RCW 36.70A specifies 15 Planning Goals for the State of Washington. When reviewing compatibility with these stated goals, it is important to acknowledge the unique circumstances in Chelan County. Eighty-eight percent (88%) of Chelan County is in public ownership, either state or federal. That leaves twelve percent (12%) of the County in private ownership. Of the property remaining in private ownership, approximately 10% is reserved for roads and utilities. An additional reduction is taken for those areas in private ownership, but encumbered by protected critical areas, such as steep slopes, wetlands, riparian areas, flood plain, and shoreline. This leaves a very small overall percentage of Chelan County available for rural residential use, while the demand for residential properties in the Leavenworth area is high.

RCW 36.70A.020(1) encourages urban growth. The property is not located in an urban growth area.

RCW 36.70A.020(2) aims to reduce the inappropriate conversion of undeveloped land into sprawling, low-density development.

RR 2.5 maintains low rural density (1 unit per 2.5 acres), which avoids suburban sprawl. This density is lower than the majority of nearby parcels many of which have a residential density of one unit per one acre.

RCW 36.70A.020(4) Aims to plan for housing, including accommodating housing affordable to all economic segments of the population of this state and promotes a variety of residential densities and housing types. RR 2.5 provides rural housing opportunities at low densities, helping the county offer a spectrum of housing choices—from urban to rural—consistent with the GMA.

RR 2.5 zoning accommodates rural households without demanding urban services, consistent with GMA rural planning.

County-Wide Planning Policy 5: The proposal is consistent with the county-wide policies for housing by directly addressing land available for housing options, encouraging the productive development of the Property for housing, and permitting new housing in an area that already is adjacent to RR 2.5 zoning and smaller lot sizes. The proximity of the property to public transportation and non-motorized commuting routes enhances the opportunity for providing future housing for a diversity of income levels. Leavenworth serves as a major employment center for the tourism industry.

County-Wide Planning Policy 7: The proposal is consistent with the county-wide policies for economic development and employment. Specifically, one of the factors is "[t]he availability of housing to support economic growth." The proposal would encourage the development of the property as additional housing that would support economic growth in the Leavenworth area and directly respond to the need for more housing county wide. More housing inventory has a positive effect on housing costs for buyers when it can be developed in a reasonable regulatory environment.

3. A statement of how the proposed map amendment complies with or supports the Chelan County Comprehensive Plan's goals and policies.

The Comprehensive Plan includes a Rural Element that provides policy direction for managing development in rural areas while preserving rural character. The Plan acknowledges that the County must provide for *varied rural densities* in order to satisfy Growth Management Act requirements, so long as rural character and resource lands are protected. The Comprehensive Plan states that Chelan County's rural areas are intended to accommodate residential uses at a variety of densities through designated rural land-use categories.

The RR 2.5 designation is an existing, long-established rural category in Chelan County, reflected in the countywide zoning. This demonstrates that 2.5-acre minimum densities are considered appropriate within the broader rural landscape under the Comprehensive Plan. Changing the subject parcel to RR 2.5 aligns the property with recognized rural density patterns and supports the Plan's direction to offer a range of rural residential options within the rural area while preserving the rural lifestyle and preventing suburban development.

The Comprehensive Plan's Land Use Element emphasizes the need for coordinated and orderly development across the county's rural areas. As the Plan explains, Chelan County's land-use designations are meant to create consistency, clarity, and predictability in rural land development. By aligning the parcel with surrounding or nearby densities—especially where RR 2.5 designations already exist—the amendment strengthens internal consistency within the land-use framework and reduces zoning irregularities.

The Housing Element of the Comprehensive Plan identifies a need to plan for a range of housing types and densities, including low-density rural housing that fits Chelan County's settlement patterns. RR 2.5 provides low-density rural housing opportunities, consistent with the Housing Element's direction to maintain rural living options while balancing environmental and infrastructure constraints. The proposed amendment broadens the county's available rural residential land base without promoting sprawl because RR 2.5 is not an urban lot size.

The following goals and policies are directly supported by the proposed map amendment

Land Use Element

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County

Rural Element

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Rationale: Residents who choose to live in the rural areas need to realize that their lifestyle has an impact on the natural environment and efforts need to be made to find and maintain a balance between human activity and the natural environment.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Rationale: There is value in rural lands that have in the economic vitality, rural lifestyles, and healthy environments.

Goal RE 3: Develop at densities such that demands will not be created for urban levels of public services and facilities in rural areas.

Goal Rationale: Development in rural areas should not be at densities which require urban levels of service. Development at lower densities will also help protect the rural quality of life.

4. A detailed statement on how the land use designation amendment complies with the Chelan County Comprehensive Plan land use designation/siting criteria.

RR 2.5 is an existing rural designation recognized in Chelan County's land-use framework and zoning districts, demonstrating that this density category fits within the intended spectrum of rural land uses. Adjusting the designation to RR 2.5 is consistent with the Plan's intent to apply appropriate rural densities based on surrounding patterns, environmental constraints, and the character of the rural area.

The Rural Element of the Comprehensive Plan supports a range of rural residential densities, allowing the county to designate appropriate rural land-use patterns. The Plan acknowledges that rural areas are expected to contain different levels of density as part of local development patterns and planning history.

The RR 2.5 designation offers a recognized rural density that maintains rural character while accommodating moderate development. Because the subject parcel is located adjacent to the RR 2.5 zone and many parcels smaller than 2.5 acres, the amendment promotes a logical extension of existing rural density patterns.

The locational guidelines in the Comprehensive Plan specify that predominant parcel sizes for RR 2.5 are currently 2.5 acres or greater in size but typically less than 5 acres which matches the characteristics of the area and subject property.

5. A detailed statement of how the amendment is consistent with and supported by the Capital Facilities Element and the Transportation Element of the Comprehensive Plan, of if not, what changes to these elements would be required.

Both the Capital Facilities and Transportation elements of the Comprehensive plan speak more to goals and objectives for agencies of jurisdiction when development is proposed. At the time any additional development is proposed, application(s) will have to be in compliance with the concurrency requirements of GMA and the Chelan County comp plan goals and objectives for all elements of the comp plan.

The Capital Facilities Element specifies that capital facilities—such as sewer, water systems, fire protection, and other infrastructure—must be planned and sized according to the intensity of expected development. RR 2.5 is a low-density rural land-use designation which is specifically intended not to require extension of urban services. RR 2.5 development patterns are consistent with rural infrastructure expectations and do not place urban-level demands on capital facilities. Because RR 10 and RR 2.5 are both rural designations, the amendment does not create new burdens on capital facilities beyond what the Capital Facilities Element anticipates for rural areas.

Transportation Element planning is tied to rural land-use densities, and RR 2.5 remains a rural classification that generates low traffic volumes compatible with rural road networks. Since rural areas are expected to carry lower traffic demands rely on County-maintained rural roads, both RR 10 and RR 2.5 densities fall well within rural transportation capacity assumptions embedded in the Comprehensive Plan.

The Transportation Element calls for ensuring adequate access, maintaining safety, and avoiding transportation impacts that exceed the capabilities of rural roads. Because RR 2.5 densities produce minimal increases in traffic, it will not trigger demands for roadway widening,

turn lanes, or major upgrades. Thus, the map amendment is consistent with the Transportation Element's goal of maintaining an efficient transportation network without unwarranted capital improvements.

6. For land use map designation amendments, identify the land uses surrounding the affected property, and describe how the proposed change would affect the surrounding land uses. Explain why the proposed amendment is more appropriate than the existing land use designation.

The surrounding land uses are entirely residential. The adjacent properties on all sides are developed with single family residences. The change in the map designation would be indistinguishable from surrounding land uses.

RR 10 is generally intended for areas where land characteristics or resource protections justify large minimum lot sizes. For example, RR 10 and RR 20 are applied in areas containing commercial forest lands, steep slopes, or other resource functions. The zoning map identifies RR 10 alongside forest and resource land zones in some regions.

The Comprehensive Plan describes rural areas as places where a variety of rural residential densities are appropriate, provided they support rural character and avoid urban-scale infrastructure. The Rural Element allows and anticipates rural density categories like RR 2.5. RR 2.5 still preserves rural character while providing flexibility consistent with the Comprehensive Plan's rural housing policies. RR 10 is not required to preserve rural character unless justified by environmental or resource constraints

RR 2.5 fits rural roadway and rural service planning assumptions used by the County. RR 10 may underutilize areas where existing or planned rural facilities can already support moderate rural densities.

An RR 10 designation is only necessary when extremely low rural densities are warranted due to environmental constraints, resource protections, or lack of surrounding development. Where these conditions do not exist—and where the surrounding landscape includes RR 2.5 designations—the more suitable land-use classification is RR 2.5.

7. Will the proposed map amendment affect lands designated as resource lands of long term commercial significance and/or critical areas? If so, how will the proposed amendment impact these areas?

No. There are no designated resource lands in the area.

8. Explain how the proposed amendment would affect the supply of land that is available for various purposes to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.

The Comprehensive Plan establishes a long-term framework for managing land supply to accommodate projected growth while preserving rural character and resource lands. The proposed map amendment affects the distribution and availability of land for different rural uses across the 20-year planning period in several important ways. The Comprehensive Plan emphasizes a need to provide a range of rural densities to meet long-term housing needs and comply with the Growth Management Act. The Plan's Housing and Land Use elements identify that rural areas must accommodate a share of future population growth using established rural

residential designations such as RR 2.5. Because RR 2.5 is a recognized rural designation used throughout the county, converting underutilized RR 10 land into RR 2.5 increases the supply of land eligible for modest rural residential development at densities consistent with the Comprehensive Plan.

The proposed amendment does *not* reduce the supply of land needed for urban-level growth. The Comprehensive Plan specifies that urban growth should occur inside Urban Growth Areas. Rural zones—including both RR 10 and RR 2.5—are not part of the County's urban growth capacity.

The proposed amendment does not reduce land available for future city expansions, for residential subdivisions, or for higher-density development. The property will remain outside the Leavenworth UGA and cannot be urbanized, extended with sewer, or converted to higher-density development unless the UGA is expanded through a formal process. Thus, the amendment does not materially affect the county's 20-year urban growth land supply.

9. Explain how the proposed change would serve the interests of not only the applicant, but also the public as a whole, including health, safety or welfare.

The proposed change would provide the applicant a designation suitable for reasonable rural use of the property. The public will gain predictable, low-density rural development that does not strain facilities or alter rural character. The County maintains consistency with its long-range planning vision. This strengthens both the welfare of the community and the stability of the County's planning framework.

The Comprehensive Plan's Capital Facilities Element emphasizes avoiding unnecessary expenditures by ensuring that land uses do not require new, costly infrastructure beyond rural service levels. RR 2.5 does not require urban sewer service, municipal water expansion, urban roads or major capital facility upgrades. This benefits the public by minimizing long-term public financial obligations. It benefits the applicant by providing a clear understanding of service expectations and ensuring their land use aligns with available infrastructure.

The Housing Element of the Comprehensive Plan requires the County to plan for varied rural housing choices. It recognizes that rural areas must accommodate part of future population growth while maintaining rural character. RR 2.5 offers rural-scale housing opportunities without urbanization. By updating outdated or misapplied RR 10 designations, the amendment helps maintain an accurate inventory of rural land available to accommodate long-term population needs. This helps meet long-term housing demand without encroaching on resource or urban growth areas and reduces pressure on agricultural and forest lands by providing appropriate rural housing capacity.

Rural residential development at appropriate densities contributes to the local economy through construction, small service industries, and community vitality. The Comprehensive Plan emphasizes balanced economic development and rural quality of life. RR 2.5 supports steady but controlled growth—avoiding the artificially low capacity created by RR 10 in non-resource areas. Public benefits include supporting steady economic activity without overwhelming rural infrastructure, maintaining stable property values by aligning the zoning with realistic land use potential and strengthens community cohesion by accommodating modest population growth

CHELAN COUNTY
DEPARTMENT OF COMMUNITY DEVELOPMENT
316 WASHINGTON STREET, SUITE 301
WENATCHEE, WA 98801
(509) 667-6225

TO: Chelan County Board of County Commissioners
FROM: Chelan County Community Development
HEARING DATE: November 10, 2026
FILE NUMBER: CPA 26-063 Sanderson

RECOMMENDED MOTION
The Chelan County Planning Commission, at their duly advertised public hearing on September 23, 2026 made a motion to recommend approval (Attachment 1) of CPA 26-063 requested comprehensive plan map amendment from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 5 (RR5).

GENERAL INFORMATION

Applicant	Shawn and DeAnne Sanderson
Planning Commission Notice of Hearing Published	October 3, 2026
Planning Commission Hearing	October 14, 2026
Board of County Commissioners Hearing	November 10, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review
A Determination of Non-Significance was issued under WAC 107-11-340 on April 30, 2026. The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The decision was made after a review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:
In comments dated March 30, 2026, the Chelan Douglas Health District indicated they have no objections to approval of the proposal.
The Chelan County Fire Marshal's office indicated they have no comments on the proposal.

Public Comment:
No public comments were received regarding the proposal.

60-Day Notice
Sent to Department of Commerce July 20, 2026.

PROJECT DESCRIPTION – CPA 26-063 Sanderson
The applicant is requesting a comprehensive plan map amendment to change the designation of the 21.65-acre property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 5 (RR5). The property is developed with one single family residence and an accessory dwelling taking access of Whitetail Way, a private road serving additional single-family residences to the north, west and east. The property has received preliminary approval of a 3-lot rural cluster short subdivision under file number SP23-409. The site is also known as parcel number 28-22-34-410-100.

COMPREHENSIVE PLAN
Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan policies are relevant to the proposed request:

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Policy RE 1.3: Establish a variety of rural land use designations that would accommodate a wide variety of rural uses and densities consistent with the County's rural character.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

REVIEW CRITERIA
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 2) Reduce Sprawl, 3) Transportation, 4) Housing, and 5) Economic Development. The Growth Management Act (GMA) encourages the provision of a

variety of housing densities in order to accommodate projected growth while maintaining the rural character.

The requested map amendment to RR5 would provide for the site to be divided into additional single-family residential lots. The Chelan County Comprehensive Plan purpose the for RR5 designation states that it “provides opportunities for small scale agricultural activities, and rural development consistent with the rural character and rural development provisions outlined in goals and policies of the comprehensive plan.”

Conclusion: The proposal would be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area.

Conclusion: The proposal would be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the RR5 designation should be located in areas that are “predominately rural character.” Lots adjacent to the west, north, and east of the site have been developed with single family residences on lot sizes ranging from 5-14.5 acres. Properties to the south and southwest have been segregated into five acre lots which are proposed for single family residential development to be served by a recently approved Type A water system.

Conclusion: The amendment would comply with comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel is served by Whitetail Way, a private road.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are either zoned RR5 or RR10 and are developed with single family residences.

Conclusion: The designation of the site from RR10 to RR5 would not adversely affect the surrounding area.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The RR5 designation is considered compatible with dispersed single-family residence, farms or forestry uses.

Conclusion: The amendment would not adversely affect resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to potentially develop additional single-family residential lots. The total number of new lots would be dependent upon the method of subdivision proposed.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026, pursuant to RCW 36.70A.106.

6. The location and characteristics are consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 5 as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

RECOMMENDED MOTION

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

A. Re-designation of the site from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 5 (RR5) would comply with applicable Chelan County goals and policies pursuant to the findings of fact and conclusions of law cited below.

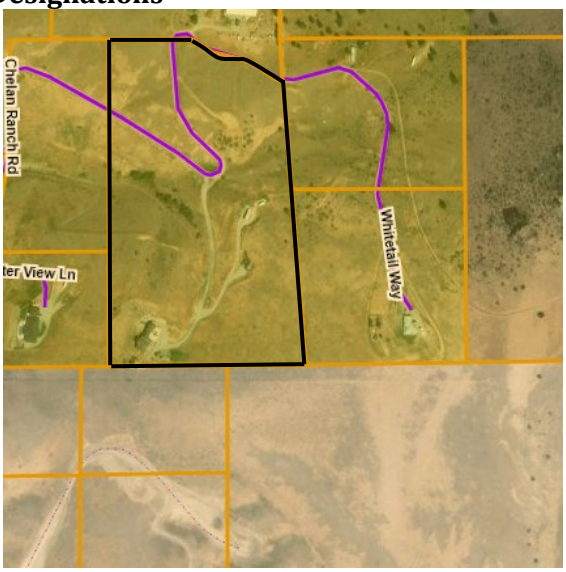
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance (DNS) was issued under WAC 197-11-340(2) for CPA 26-063 on April 30, 2026 (Attachment 1). The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030 (2)(c). The decision was made after review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments: (Attachment 2)

In comments dated March 30, 2026, the Chelan Douglas Health District indicated they have no objections to approval of the proposal.



The Chelan County Fire Marshal's office indicated they have no comments on the proposal.

Public Comment:

PROJECT DESCRIPTION – CPA 26-063 Sanderson

Proposal:. The applicant is requesting a comprehensive plan map amendment to change the designation of the 21.65-acre property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 5 (RR5). The property is developed with one single family residence and an accessory dwelling taking access of Whitetail Way, a private road serving additional single-family residences to the north, west and east. The property has received preliminary approval of a 3-lot rural cluster short subdivision under file number SP23-409. The site is also known as parcel number 28-22-34-410-100.

Chelan County Land Use Designations

Density: The existing Rural Residential/Resource (RR10) zoning allows one dwelling unit per ten acres. The proposed designation of Rural Residential/Resource 5 (RR5) would allow one dwelling unit per 5 acres, which if approved, could result in up to 3-4 additional lots, dependent upon method of subdivision.

Comprehensive Plan

Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan policies are relevant to the proposed request:

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Policy RE 1.3: Establish a variety of rural land use designations that would accommodate a wide variety of rural uses and densities consistent with the County's rural character.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

Review Criteria
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 2) Reduce Sprawl, 3) Transportation, 4) Housing, and 5) Economic Development. The Growth Management Act (GMA) encourages the provision of a variety of housing densities in order to accommodate projected growth while maintaining the rural character.

The requested map amendment to RR5 would provide for the site to be divided into additional single-family residential lots. The Chelan County Comprehensive Plan purpose the for RR5 designation states that it "provides opportunities for small scale agricultural activities, and rural development consistent with the rural character and rural development provisions outlined in goals and policies of the comprehensive plan."

Conclusion: The proposal would be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area.

Conclusion: The proposal would be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the RR5 designation should be located in areas that are "predominately rural character." Lots adjacent to the west, north, and east of the site have been developed with single family residences on lot sizes ranging from 5-14.5 acres. Properties to the south and southwest have been segregated into five acre lots which are proposed for single family residential development to be served by a recently approved Type A water system.

Conclusion: The amendment would comply with comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel is served by Whitetail Way, a private road.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are either zoned RR5 or RR10 and are developed with single family residences.

Conclusion: The designation of the site from RR10 to RR5 would not adversely affect the surrounding area.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The RR5 designation is considered compatible with dispersed single-family residence, farms or forestry uses.

Conclusion: The amendment would not adversely affect resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow the applicant to potentially develop additional single-family residential lots. The total number of new lots would be dependent upon the method of subdivision proposed.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.

3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026, submittal ID (Attachment 3), pursuant to RCW 36.70A.106.
6. The location and characteristics of the site which is the subject this request for a Comprehensive Plan Map Amendment are consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 5 (RR5) as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

STAFF Finding

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

The Comprehensive Plan Amendment to change the subject property's land use designation from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 5 (RR5), given file number CPA 2026-063, based upon the findings of fact and conclusions of law contained would comply with relevant adopted county goals and policies.

Memorandum

To: Susan Dretke, Chelan County

From: Richmond Petty, REHS

Date: 03/30/26

RE: Sanderson (CPA 26-063) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 5 (RR5). The subject property is located at 172 Whitetail Way, Chelan, WA 98816 (county tax parcel: 282234410100)

As proposed, I have no objections to further approval of this project.

- 3-Lot Short plat proposal at Blue Line stage – SP 2023-409, existing parcel at 21.65 acres.
- Proposed Lots 1 & 2 have existing permitted septic systems, Permit 14-348 and Permit 14-347 respectively.
- Individual Private Wells – ALE 672 and Well 673, have been reviewed and approved.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-signif icance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

CPA 26-063 Sanderson- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 10 (RR10) to Rural Residential Resource 5 (RR5). **Site Address:** 172 Whitetail Way Chelan, WA 98816; **Parcel Numbers:** 28-22-34-410-100

CPA 26-067 WA DNR- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 20 (RR20) to Rural Residential Resource 10 (RR10). **Site Address:** Unassigned, Wenatchee, WA 98801; **Parcel Numbers:** 23-20-16-100-000

Subject: Notice of Application for CPA 26-063 Sanderson - Chelan County Dept. of Community Development
Attachments: CPA 26-063 Sanderson NOA.pdf; Affidavit of posting NOA.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Sanderson's property, File# CPA 26-063. This notice should be posted on the subject property by March 12, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days, starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, Susan Dretke, at 509-667-6225 or Susan.Dretke@co.chelan.wa.us.

Thank you,

Jessica Thompson

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-063 Sanderson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 10 (RR10) to Rural Residential/Resource 5 (RR5). 172 Whitetail Way, Chelan, WA 98816 APN: 28-22-34-410-100.

CPA 26-067 WA DNR - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 20 (RR20) to Rural Residential/Resource 10 (RR10). Unassigned, Wenatchee, WA 98801; APN: 23-20-16-100-000.

On March 12, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 26, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

DETERMINATION OF APPLICATION STATUS

Pursuant to Title 14, Development Permit Procedures & Administration Section 14.08.030, Determination of Completeness, Chelan County Board of County Commissioners Resolution No. 2004-16, as amended.

Project Description:

File Number:	PL 26-063
Related Files:	SP 23-409
Parcel Address:	172 Whitetail Way, Chelan, WA 98816
Parcel Zoning:	Rural Residential/Resource 10 (RR10)
Applicant/Owner:	Shawn and DeAnne Sanderson
Mailing Address:	172 Whitetail Way, Chelan, WA 98816
Date Submitted:	February 26, 2026
Date Completed:	March 2, 2026

Upon Initial Review, The Above Referenced Application is Found To Be: **COMPLETE**

The required components of an application are present and are judged by the review authority to be technically accurate and contain sufficient information necessary to allow the processing of the application(s). All submittal fees have been paid.

Your application has been determined to be complete as of the date of this letter. Pursuant to Chelan County Code Section 14.08.030(5), a Determination of Completeness shall not preclude the department from requesting additional information or studies if the need for more information becomes apparent during processing of the proposed development.

Review Authority: Susan Dretke

IN THE MATTER OF	)	**FINDINGS OF FACT,**
SHORT PLAT NO. SP 2023-409	)	**CONCLUSIONS OF LAW**
Shawn and Deanne Sanderson, OWNERS	)	**AND DECISION**

THIS MATTER, an application submitted by Jesse Redell of Erlandsen (agent) to subdivide an existing parcel of land approximately 21.65 acres in size located in the Rural Residential/Resource 10 (RR10) zoning district into two (2) residential lots with a residential open space tract using the cluster provision in Section 11.10.020(1)(A) of the Chelan County Code. Proposed Lot 1 would be at 1.77 acres in size and is currently vacant with the exception of an existing well. Proposed Lot 2 would be at 2.31 acres in size and contains an existing accessory dwelling unit (ADU). The proposed open space tract would be at 17.57 acres in size and contains an existing residence within a proposed 2.34-acre buildable area within the open space tract. Primary access to both lots and the open space tract would continue to be from a private access easement; potable water for all lots would be provided from existing exempt wells; and sanitation for all lots would consist of private septic systems located on each individual lot. This proposed Short Plat was received and decided upon, pursuant to the Chelan County Subdivision Code Title 11, Title 12 and other applicable codes adopted by Chelan County.

DECISION

Based upon the following Findings of Fact and Conclusions of Law, Short Plat SP 2023-409 is hereby **CONDITIONALLY APPROVED,** subject to the conditions noted herein. Unless otherwise noted, the conditions of approval shall be accomplished by the applicant and/or authorized agent prior to recording the final short plat.

Deanna Walter, Director
Department of Community Development

1/16/25
Date

This administrative decision is final unless appealed within ten (10) working days to the Hearing Examiner as provided for in the provisions of Chelan County Code Chapter 14.12, Development Permit Procedures, and Administration, from the date this Administrative Decision was issued.

Standing to appeal is limited to the applicant or owner of the property on which the subdivision is proposed, or any property owner who deems himself/herself aggrieved by the Administrator's decision and who will suffer direct and substantial impacts from the proposed short subdivision. Said appeal shall require the applicable appeal fee as provided for in the Chelan County Department of Community Development Fee Schedule. The complete case file, Findings of Fact, Conclusions of Law, Decision, and Conditions of Approval are available for inspection at the office of the Chelan County Department of Community Development, Monday through Friday during the normal business hours at 316 Washington Street Suite 301, Wenatchee, WA 98801.

FINDINGS OF FACT

1. Pursuant to Section 14.04.020(3), unless otherwise directed in an applicable regulation, the Director is responsible for issuing administrative decisions and is vested with the authority to summarily approve, conditionally approve or disapprove proposed subdivisions.
2. On September 29, 2023, Jesse Redell of Erlandsen (agent) on behalf of Shawn and Deanne Sanderson (owners) requested a short plat of approximately 21.65 acres into two (2) residential building lots and one (1) open space tract with a residential building envelopment.
   - 2.1. Proposed Lot 1 would be at 1.77 acres in size and is currently vacant.
   - 2.2. Proposed Lot 2 would be at 2.31 acres in size and contains an existing 336 sq.ft. accessory dwelling unit (ADU) that received an after-the-fact building permit in 2024 (BP 240719).
   - 2.3. The proposed open space tract would be at 17.57 acres in size and contains an existing residence within a proposed 2.34-acre buildable area within the open space tract.
3. The subject property is currently located at 172 Whitetail Way, Chelan, WA and identified by Chelan County Assessor's Parcel Number 28-22-34-410-100.
4. The subject site is located within the Rural Residential/Resource 10 (RR10) zoning district and corresponding Comprehensive Land Use Designation.
5. The surrounding properties are zoned:
   - 5.1. North: Rural Residential/Resource 10 (RR10)
   - 5.2. East: Rural Residential/Resource 10 (RR10)
   - 5.3. South: Rural Residential/Resource 20 (RR20)
   - 5.4. West: Rural Residential/Resource 10 (RR10)
6. The existing property is currently accessed off of Whitetail Way. The proposed access for all three lots would continue to be from Whitetail Way.
   - 6.1. Whitetail Way, which is a 50' private access easement and is classified as a private road in the county road system. Whitetail Way is a 14'-18' graveled two lane roadway, which provides single lanes for traffic in each direction with no curb, gutter or sidewalk. Whitetail Way would serve 7 parcels with this subdivision included.
7. The site plan of record is date stamped September 29, 2023.
8. The subject parcel is legally described as *"T 28N R 22EWM S 34; LOT 6 SURVEY 3/76; PT NWSE; 21.6500 ACRES"*, but is also known as Parcel A of BLA 2023-023, recorded January 23, 2023 under AFN: 2577966.
9. Pursuant to Chelan County Code (CCC) Section 14.98.1090 definition of 'legal lot of record,' the subject parcel is a legal lot of record having been created prior to October 17, 2000, which is when Chelan County became GMA compliant.
10. Corrected Warranty Deed, recorded October 23, 2014 under AFN: 2408069, identifies Shawn and Deanne Sanderson as owners.
11. Pursuant to CCC Section 14.08.030, a Determination of Complete Application was issued on January 31, 2024, establishing that the application was complete for processing.
12. An Affidavit of Mailing was completed showing that notices were mailed to all property owners within 300 feet, excluding 60 feet of street right-of-way, of the project boundary on February 8, 2024.
13. An Affidavit of Posting was submitted by Shawn Sanderson (owner), showing that the subject property was posted February 8, 2024 through February 22, 2024.
14. Chelan County Comprehensive Plan, Chapter 3 page 9, states the purpose of the Rural Residential/Resource 10 (RR10) designation is to *"To allow for rural development, forestry and agricultural uses consistent with the rural character and rural development provisions outlined in the goals and policies of the comprehensive plan. These areas can function as areas of transition between resource lands and areas of more intense rural or urban development. These areas also provide opportunities for protecting sensitive environmental areas and creating open space typical of a rural setting."*

Uses appropriate for these areas include: open space; residential; agriculture; and forestry."

15. CCC Section 11.10.020: Standards.

    15.1. (1)(A): The minimum required size for the RR10 zoning district is 10 acres, which may be modified one time for cluster subdivisions.

        15.1.1. Proposed Lot 1 would be at 1.77 acres in size and is currently vacant with the exception of an existing well.

        15.1.2. Proposed Lot 2 would be at 2.31 acres in size and contains an existing ADU.

        15.1.3. The proposed open space tract would be at 17.57 acres in size and contains an existing residence within a proposed 2.34-acre buildable area that is part of the open space tract. The applicants are proposing to use the Open Space Exemption pursuant to CCC 12.12.050(4)(A) and a draft open space management plan was submitted along with the application materials (Exhibit B).

    15.2. (2): Access for both residential lots and the open space tract would be from a private access easement off of Whitetail Way. The site plan, date stamped September 29, 2023, demonstrates that both proposed lots and the buildable area in the open space tract exceed the 150-foot minimum lot width requirement at the front building line; therefore the 150-foot lot width at front building line is satisfied

    15.3. (3) & (4): Proposed Lot 1 allows for approximately 26,985 sq.ft. of lot coverage and proposed Lot 2 allows for approximately 35,675 sq. ft. of lot coverage each; the existing structures on the buildable area of the open space tract does not exceed the maximum lot coverage based on the Assessor's records for existing building square footages.

    Building height and lot coverage would be reviewed at the time of building permit submittal for new structure(s).

    15.4. (5) & (6): Based on the site plan of record, the existing residence within the buildable area of the open space tract meets the required setbacks. Per BP 240719, the existing ADU also meets the required setbacks of the short plat.

    Setbacks for new structure(s) on any of the proposed lots would be reviewed at the time of building permit

16. The proposed lots are not on any shorelines of the state; therefore, the provisions of the current Shoreline Master Program do not apply.

17. Pursuant to the Washington State Department of Fish and Wildlife, Priority Habitat and Species Maps, there are protected habitat areas (mule deer habitat and shrubsteppe) within the subject property; therefore, the provisions of CCC Chapter 11.78 Fish & Wildlife Overlay District, as related to known habitat areas, do apply.

    17.1. No comment letter was received from the Department of Fish and Wildlife; however, with the proposed open space management plan (Exhibit B), the open space tract ensures that the existing habitats on the subject property would remain in an undisturbed state.

18. There are no wetlands on or adjacent to the subject property; therefore, the provisions of the CCC Chapter 11.80 Wetland Areas Overlay Districts, do not apply.

19. The proposed lots do not contain flood areas on or adjacent to the property; therefore, the provisions of the CCC Chapter 11.84 Frequently Flooded Areas Overlay Districts, do not apply.

20. The proposed lots are within an area identified by Chelan County as containing highly erodible soils; therefore, the provisions of the CCC Chapter 11.86, Geologically Hazardous Areas Overlay District, do apply.

    20.1. An Engineering Geologic Hazard Assessment, dated October 16, 2023, was prepared by Nelson Geotechnical Associates, Inc for the proposed Short Plat. This evaluation found that the subject property meets the classification of "No Risk" and is not a Geologically Hazardous Area in accordance with the definitions and provisions of Chapter 11.86 and any future proposed development should not adversely affect geologic conditions as long as all recommendations are followed, which include:

Applicant/Agent (if different than owner): _____
Company and Mailing Address: _____
City/State/Zip: _____ Phone: _____
E-mail: _____
For multiple owners, applicants, or agents, provide additional sheets.

This General Land Use Application Form shall be completed unless specified below. Additional information and supplemental forms may be required. Please review all applicable statutes and regulations pertaining to the proposed development and provide information, documents, studies, and reports (such as a Traffic Impact Study or environmental forms) demonstrating compliance with all statutory and regulatory requirements and other applicable criteria.

Application For: (Check all that apply)

- ❑ Administrative Modification
- ❑ Administrative Determination
- ❑ Administrative Interpretation
- ❑ Binding Site Plan
- ☒ Comprehensive Plan Map Amendment
- ❑ Comprehensive Plan Text Amendment
- ❑ Conditional Use Permit
- ❑ Forest Practice/Conversion
- ❑ Open Space: Public Benefit Rating System
- ❑ Major Subdivision
- ❑ Master Planned Development
- ❑ Planned Development
- ❑ Plat Alteration or Vacation
- ❑ Short Plat
- ❑ Variance (zoning or critical areas)
- ❑ Zoning Change-Text Amendment/ Map Amendment
- ❑ Critical Area Determination
- ❑ Other: _____

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

Going through the lengthy process to eventually re zone from current RR10 to RR5. Currently have an approved cluster short plat SP 2023-409.

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: residential
   South: residential
   East: residential
   West: residential
4. What is the current use of the property? Single residence & ADU
5. Sanitation Disposal: ☐ N/A ☒ Septic Permit ☐ Sewer District: _____
6. Water Source: ☐ N/A ☒ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☒ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: NA
8. Fire District: Chelan School District: Chelan
9. Power Service: Chelan County PUD
10. Are there critical areas or critical area buffers on the property? NO
    ☐ Airport Overlay: _____
    ☐ Aquifer Recharge Area (see attached)
    ☐ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☐ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☐ Habitat/Riparian Area, protected species/area: _____
    ☐ Streams / Waterbodies: _____ ☐Shoreline Environment Designation: _____
    ☐ Drainage or Seasonal Stream: _____ ☐ Wetland, if so what category: _____
    ☐ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    NA
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    NA

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:
NA -> No projects planned at this time.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

SS _____ 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

SS _____ 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

SS _____ 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

SS _____ 4. Additional permit applications and approvals may be necessary to conduct specific activities.

SS _____ 5. Application fees are non-refundable, except when approve by the Board.

SS _____ 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

SS ____ 7. Chelan County is hereby given consent to enter the property(ies) listed above.

SS ____ 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

SS ____ 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

SS ____ 10. I certify that this application has been made with the consent of the lawful property owner(s).

SS ____ 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

SS ____ 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

SCHEDULE OF EXCLUSIONS FROM COVERAGE OF THIS GUARANTEE

1. Except to the extent that specific assurances are provided in Schedule A of this Guarantee, the Company assumes no liability for loss or damage by reason of the following:
   (a) Defects, liens, encumbrances, adverse claims or other matters against the title, whether or not shown by the public records.
   (b) (1) Taxes or assessments of any taxing authority that levies taxes or assessments on real property; or, (2) Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not the matters excluded under (1) or (2) are shown by the records of the taxing authority or by the public records.
   (c) (1) Unpatented mining claims; (2) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (3) water rights, claims or title to water, whether or not the matters excluded under (1), (2) or (3) are shown by the public records.
2. Notwithstanding any specific assurances which are provided in Schedule A of this Guarantee, the Company assumes no liability for loss or damage by reason of the following:
   (a) Defects, liens, encumbrances, adverse claims or other matters affecting the title to any property beyond the lines of the land expressly described in the description set forth in Schedule (A), (C) or in Part 2 of this Guarantee, or title to streets, roads, avenues, lanes, ways or waterways to which such land abuts, or the right to maintain therein vaults, tunnels, ramps or any structure or improvements; or any rights or easements therein, unless such property, rights or easements are expressly and specifically set forth in said description.
   (b) Defects, liens, encumbrances, adverse claims or other matters, whether or not shown by the public records; (1) which are created, suffered, assumed or agreed to by one or more of the Assureds; (2) which result in no loss to the Assured; or (3) which do not result in the invalidity or potential invalidity of any judicial or non-judicial proceeding which is within the scope and purpose of the assurances provided.
   (c) The identity of any party shown or referred to in Schedule A.
   (d) The validity, legal effect or priority of any matter shown or referred to in this Guarantee.

GUARANTEE CONDITIONS AND STIPULATIONS

1. Definition of Terms.
The following terms when used in the Guarantee mean:
   (a) the "Assured": the party or parties named as the Assured in this Guarantee, or on a supplemental writing executed by the Company.
   (b) "land": the land described or referred to in Schedule (A)(C) or in Part 2, and improvements affixed thereto which by law constitute real property. The term "land" does not include any property beyond the lines of the area described or referred to in Schedule (A)(C) or in Part 2, nor any right, title, interest, estate or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways.
   (c) "mortgage": mortgage, deed of trust, trust deed, or other security instrument.
   (d) "public records": records established under state statutes at Date of Guarantee for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge.
   (e) "date": the effective date.

2. Notice of Claim to be Given by Assured Claimant.
An Assured shall notify the Company promptly in writing in case knowledge shall come to an Assured hereunder of any claim of title or interest which is adverse to the title to the estate or interest, as stated herein, and which might cause loss or damage for which the Company may be liable by virtue of this Guarantee. If prompt notice shall not be given to the Company, then all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall in no case prejudice the rights of any Assured unless the Company shall be prejudiced by the failure and then only to the extent of the prejudice.

3. No Duty to Defend or Prosecute.
The Company shall have no duty to defend or prosecute any action or proceeding to which the Assured is a party, notwithstanding the nature of any allegation in such action or proceeding.

4. Company's Option to Defend or Prosecute Actions; Duty of Assured Claimant to Cooperate.
Even though the Company has no duty to defend or prosecute as set forth in Paragraph 3 above:
   (a) The Company shall have the right, at its sole option and cost, to institute and prosecute any action or proceeding, interpose a defense, as limited in (b), or to do any other act which in its opinion may be necessary or desirable to establish the title to the estate or interest as stated herein, or to establish the lien rights of the Assured, or to prevent or reduce loss or damage to the Assured. The Company may take any appropriate action under the terms of this Guarantee, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this Guarantee. If the Company shall exercise its rights under this paragraph, it shall do so diligently.
   (b) If the Company elects to exercise its options as stated in Paragraph 4(a) the Company shall have the right to select counsel of its choice (subject to the right of such Assured to object for reasonable cause) to represent the Assured and shall not be liable for and will not pay the fees of any other counsel, nor will the Company pay any fees, costs or expenses incurred by an Assured in the defense of those causes of action which allege matters not covered by this Guarantee.
   (c) Whenever the Company shall have brought an action or interposed a defense as permitted by the provisions of this Guarantee, the Company may pursue any litigation to final determination by a court of competent jurisdiction and expressly reserves the right, in its sole discretion, to appeal from an adverse judgment or order.
   (d) In all cases where this Guarantee permits the Company to prosecute or provide for the defense of any action or proceeding, an Assured shall secure to the Company the right to so prosecute or provide for the defense of any action or proceeding, and all appeals therein, and permit the Company to use, at its option, the name of such Assured for this purpose. Whenever requested by the Company, an Assured, at the Company's expense, shall give the Company all

reasonable aid in any action or proceeding, securing evidence, obtaining witnesses, prosecuting or defending the action or lawful act which in the opinion of the Company may be necessary or desirable to establish the title to the estate or interest as stated herein, or to establish the lien rights of the Assured. If the Company is prejudiced by the failure of the Assured to furnish the required cooperation, the Company's obligations to the Assured under the Guarantee shall terminate.

5. Proof of Loss or Damage.

In addition to and after the notices required under Section 2 of these Conditions and Stipulations have been provided to the Company, a proof of loss or damage signed and sworn to by the Assured shall be furnished to the Company within ninety (90) days after the Assured shall ascertain the facts giving rise to the loss or damage. The proof of loss or damage shall describe the matters covered by this Guarantee which constitute the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage. If the Company is prejudiced by the failure of the Assured to provide the required proof of loss or damage, the Company's obligation to such assured under the Guarantee shall terminate. In addition, the Assured may reasonably be required to submit to examination under oath by any authorized representative of the Company and shall produce for examination, inspection and copying, at such reasonable times and places as may be designated by any authorized representative of the Company, all records, books, ledgers, checks, correspondence and memoranda, whether bearing a date before or after Date of Guarantee, which reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Assured shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect and copy all records, books, ledgers, checks, correspondence and memoranda in the custody or control of a third party, which reasonably pertain to the loss or damage. All information designated as confidential by the Assured provided to the Company pursuant to this Section shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Assured to submit for examination under oath, produce other reasonably requested information or grant permission to secure reasonably necessary information from third parties as required in the above paragraph, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this Guarantee to the Assured for that claim.

6. Options to Pay or Otherwise Settle Claims: Termination of Liability.

In case of a claim under this Guarantee, the Company shall have the following additional options:

(a) To Pay or Tender Payment of the Amount of Liability or to Purchase the Indebtedness.

The Company shall have the option to pay or settle or compromise for or in the name of the Assured any claim which could result in loss to the Assured within the coverage of this Guarantee, or to pay the full amount of this Guarantee or, if this Guarantee is issued for the benefit of a holder of a mortgage or a lienholder, the Company shall have the option to purchase the indebtedness secured by said mortgage or said lien for the amount owing thereon, together with any costs, reasonable attorneys' fees and expenses incurred by the Assured claimant which were authorized by the Company up to the time of purchase.

Such purchase, payment or tender of payment of the full amount of the Guarantee shall terminate all liability of the Company hereunder. In the event after notice of claim has been given to the Company by the Assured the Company offers to purchase said indebtedness, the owner of such indebtedness shall transfer and assign said indebtedness, together with any collateral security, to the Company upon payment of the purchase price.

Upon the exercise by the Company of the option provided for in Paragraph (a) the Company's obligation to the Assured under this Guarantee for the claimed loss or damage, other than to make the payment required in that paragraph, shall terminate, including any obligation to continue the defense or prosecution of any litigation for which the Company has exercised its options under Paragraph 4, and the Guarantee shall be surrendered to the Company for cancellation.

(b) To Pay or Otherwise Settle With Parties Other Than the Assured or With the Assured Claimant.

To pay or otherwise settle with other parties for or in the name of an Assured claimant any claim assured against under this Guarantee, together with any costs, attorneys' fees and expenses incurred by the Assured claimant which were authorized by the Company up to the time of payment and which the Company is obligated to pay.

Upon the exercise by the Company of the option provided for in Paragraph (b) the Company's obligation to the Assured under this Guarantee for the claimed loss or damage, other than to make the payment required in that paragraph, shall terminate, including any obligation to continue the defense or prosection of any litigation for which the Company has exercised its options under Paragraph 4.

7. Determination and Extent of Liability.

This Guarantee is a contract of Indemnity against actual monetary loss or damage sustained or incurred by the Assured claimant who has suffered loss or damage by reason of reliance upon the assurances set forth in this Guarantee and only to the extent herein described, and subject to the Exclusions From Coverage of This Guarantee.

The liability of the Company under this Guarantee to the Assured shall not exceed the least of:

(a) the amount of liability stated in Schedule A or in Part 2;

(b) the amount of the unpaid principal indebtedness secured by the mortgage of an Assured mortgagee, as limited or provided under Section 6 of these Conditions and Stipulations or as reduced under Section 9 of these Conditions and Stipulations, at the time the loss or damage assured against by this Guarantee occurs, together with interest thereon; or

(c) the difference between the value of the estate or interest covered hereby as stated herein and the value of the estate or interest subject to any defect, lien or encumbrance assured against by this Guarantee.

8. Limitation of Liability.

(a) If the Company establishes the title, or removes the alleged defect, lien or encumbrance, or cures any other matter assured against by this Guarantee in a reasonably diligent manner by

any method, including litigation and the completion of any appeals therefrom, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused thereby.

(b) In the event of any litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom, adverse to the title, as stated herein.

(c) The Company shall not be liable for loss or damage to any Assured for liability voluntarily assumed by the Assured in settling any claim or suit without the prior written consent of the Company.

9. Reduction of Liability or Termination of Liability.

All payments under this Guarantee, except payments made for costs, attorneys' fees and expenses pursuant to Paragraph 4 shall reduce the amount of liability pro tanto.

10. Payment of Loss.

(a) No payment shall be made without producing this Guarantee for endorsement of the payment unless the Guarantee has been lost or destroyed, in which case proof of loss or destruction shall be furnished to the satisfaction of the Company.

(b) When liability and the extent of loss or damage has been definitely fixed in accordance with these Conditions and Stipulations, the loss or damage shall be payable within thirty (30) days thereafter.

11. Subrogation Upon Payment or Settlement.

Whenever the Company shall have settled and paid a claim under this Guarantee, all right of subrogation shall vest in the Company unaffected by any act of the Assured claimant.

The Company shall be subrogated to and be entitled to all rights and remedies which the Assured would have had against any person or property in respect to the claim had this Guarantee not been issued. If requested by the Company, the Assured shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect this right of subrogation. The Assured shall permit the Company to sue, compromise or settle in the name of the Assured and to use the name of the Assured in any transaction or litigation involving these rights or remedies.

If a payment on account of a claim does not fully cover the loss of the Assured the Company shall be subrogated to all rights and remedies of the Assured after the Assured shall have recovered its principal, interest, and costs of collection.

12. Arbitration.

Unless prohibited by applicable law, either the Company or the Assured may demand arbitration pursuant to the Title Insurance Arbitration Rules of the American Land Title Association. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Assured arising out of or relating to this Guarantee, any service of the Company in connection with its issuance or the breach of a Guarantee provision or other obligation. All arbitrable matters when the Amount of Liability is $2,000,000 or less shall be arbitrated at the option of either the Company or the Assured. All arbitrable matters when the amount of liability is in excess of $2,000,000 shall be arbitrated only when agreed to by both the Company and the Assured. The Rules in effect at Date of Guarantee shall be binding upon the parties. The award may include attorneys' fees only if the laws of the state in which the land is located permits a court to award attorneys' fees to a prevailing party. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court having jurisdiction thereof.

The law of the situs of the land shall apply to an arbitration under the Title Insurance Arbitration Rules.

A copy of the Rules may be obtained from the Company upon request.

13. Liability Limited to This Guarantee; Guarantee Entire Contract.

(a) This Guarantee together with all endorsements, if any, attached hereto by the Company is the entire Guarantee and contract between the Assured and the Company. In interpreting any provision of this Guarantee, this Guarantee shall be construed as a whole.

(b) Any claim of loss or damage, whether or not based on negligence, or any action asserting such claim, shall be restricted to this Guarantee.

(c) No amendment of or endorsement to this Guarantee can be made except by a writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

14. Notices, Where Sent.

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this Guarantee and shall be addressed to the Company at **First American Title Insurance Company, Attn: Claims National Intake Center, 1 First American Way, Santa Ana, California 92707 Claims.NIC@firstam.com Phone: 888-632-1642 Fax: 877-804-7606**

First American Title Insurance Company

GUARANTEE NUMBER
4260360

Order No.: 4260360 | Liability: $2,000.00 | Fee: $350.00 Tax: $30.80

Name of Assured: Shawn Sanderson

Date of Guarantee: April 14, 2025

The assurances referred to on the face page hereof are:

1. Title is vested in:

   SHAWN P. SANDERSON AND DEANNE M. SANDERSON, HUSBAND AND WIFE

2. That, according to the public records relative to the land described in Schedule C attached hereto (including those records maintained and indexed by name), there are no other documents affecting title to said land or any portion thereof, other than those shown under Record Matters in Schedule B.

3. The following matters are excluded from the coverage of this Guarantee

   A. Unpatented Mining Claims, reservations or exceptions in patents or in acts authorizing the issuance thereof.

   B. Water rights, claims or title to water.

   C. Tax Deeds to the State of Washington.

   D. Documents pertaining to mineral estates.

4. No guarantee is given nor liability assumed with respect to the validity, legal effect or priority of any matter shown herein.

5. This Guarantee is restricted to the use of the Assured for the purpose of providing title evidence as may be required when subdividing land pursuant to the provisions of Chapter 58.17, R.C.W., and the local regulations and ordinances adopted pursuant to said statute. It is not to be used as a basis for closing any transaction affecting title to said property.

6. Any sketch attached hereto is done so as a courtesy only and is not part of any title commitment, guarantee or policy. It is furnished solely for the purpose of assisting in locating the premises and First American expressly disclaims any liability which may result from reliance made upon it.

Property owners:
Shawn and DeAnne Sanderson
172 Whitetail Way
Chelan, WA 98816
509-860-8649
Parcel number: 282234410100

i.) Statement of What is Proposed and Why

The applicants (Shawn and DeAnne Sanderson) propose to amend the Comprehensive Plan land use designation and zoning classification from Rural Residential/Resource (RR10) to Rural Residential (RR5) for the 21.65-acre parcel located at 172 Whitetail Way, Chelan, WA. The requested amendment would allow a 4-lot residential short plat consistent with a 5-acre minimum lot size.

The purpose of the amendment is to allow modest rural residential development that aligns with the property's size, existing access, surrounding parcel patterns, and long-term residential character of the area. The proposed 4-lot configuration maintains rural densities while making efficient use of the land.

We have a conditional cluster short plat (SP 2023-409) approval for three lots on our 21.65 acres. However, the open space requirements were significantly restrictive for us to be able to enjoy the freedom of our property. We feel re-zoning to RR5 will enable us to fulfil our potential objectives without the restrictions.of the open space requirements.

ii.) Consistency with the Washington Growth Management Act (RCW 36.70A)

The proposed amendment is consistent with the goals of the Washington State Growth Management Act (GMA), including:

Urban Growth Goal: The property is outside the UGA and the proposed density remains rural in character, consistent with GMA provisions that allow limited rural development that does not create urban-level densities.
Rural Element: The proposal maintains rural character, preserves open space between homes, and avoids sprawl.
Housing Goal: The amendment modestly increases rural housing supply in a manner consistent with existing development patterns.
Property Rights Goal: The proposal allows reasonable use of private property consistent with surrounding land uses.

The requested RR5 zoning maintains low-density rural development and does not create urban services demand.

The RR10 and RR5 guidelines are relatively the same other than the lot size.

iii.) Compliance with Comprehensive Plan Goals and Policies

The amendment supports Chelan County Comprehensive Plan goals related to:

* Encouraging rural development at appropriate densities.
* Maintaining rural character and open space.
* Supporting incremental housing opportunities.
* Ensuring compatibility with surrounding land uses.

The proposal reflects the established rural residential pattern in the surrounding area and does not introduce incompatible uses.

iv.) Compliance with Land Use Designation Criteria

The requested RR5 designation is appropriate because:

* The parcel size (21.65 acres) comfortably supports four 5-acre lots.
* The property is currently used for single-family residential purposes.
* No critical areas or designated resource lands are present.
* The proposed density is consistent with surrounding lot sizes.
* The change does not require extension of urban-level infrastructure.

v.) Consistency with Capital Facilities and Transportation Elements

The proposed 4-lot short plat will not create significant demand on capital facilities.

Transportation: Access is available via Whitetail Way. Traffic generated by four rural residential lots is minimal and consistent with rural road standards.
Schools and Emergency Services: The increase of three additional dwelling units (beyond the existing home) will have negligible impact on public services.
Utilities: Development will rely on individual wells and septic systems consistent with rural service levels.

The proposal does not require expansion of public infrastructure beyond rural service standards.

vi.) Surrounding Land Uses and Appropriateness of Amendment

Surrounding properties are characterized by rural residential uses and large-lot development patterns. The proposed RR5 designation remains consistent with:

* Existing rural residential character
* Similar lot sizes in the vicinity
* Low-density residential use

The proposed amendment is more appropriate than the existing RR10 zoning because it better reflects the parcel's size and allows logical subdivision while maintaining rural spacing and open character. Two of the adjoining properties are 5 acres and 5.88 acres.

Vii.) Impact on Resource Lands or Critical Areas

The property does not contain or impact designated agricultural, forest, or mineral resource lands. No mapped critical areas (wetlands, fish and wildlife habitat, geologic hazards, or shorelines) are present on the site.

The proposal therefore does not negatively impact long-term commercial resource lands or environmentally sensitive areas.

viii.) Impact on 20-Year Land Supply

The amendment provides a modest increase in rural residential land supply by allowing up to four lots rather than limiting development to two under RR10 standards.

This incremental increase supports projected population growth while maintaining rural densities and does not undermine the County's allocation of growth to Urban Growth Areas.

ix.) Public Health, Safety, and Welfare

The proposed amendment serves the public interest by:

* Allowing orderly rural development consistent with established patterns.
* Supporting housing availability in Chelan County.
* Maintaining rural character and low-density design.
* Avoiding impacts to critical areas or resource lands.
* Ensuring development remains within rural infrastructure capacity.
* Added parcels would contribute more to the local tax base, helping fund schools, fire districts, etc.

The proposal balances private property rights with community planning goals and promotes the health, safety, and welfare of the public as a whole.

Site Conditions Review Letter
172 Whitetail Way Short Plat
Chelan County, Washington
NGA File No. 910214

Dear Shawn:

This letter documents our review of the current site conditions and prior geotechnical recommendations for **the property located at 172 Whitetail Way near Chelan in Chelan County, Washington**. The Chelan County parcel number is **282234410100**.

INTRODUCTION

The project area consists of an irregularly shaped 21.65-acre parcel that slopes to the north, west, and southeast along a historical drainage swale that runs downhill to the northwest. We previously prepared an engineering geologic assessment letter for the property titled **"Engineering Geologic Assessment – Parcel No. 282234410100 – Chelan County, Washington," dated October 16, 2014.** A new site plan titled, "Proposed Cluster Short Plat," dated October 28, 2022, and prepared by Erlandsen Inc. of East Wenatchee, Washington, was provided to us, showing the locations of two new lots to be created in the proposed short plat, attached as Figure 1. Per Chelan County Code Section 11.86.070 (3), geologic hazard assessments are valid for a period of five years and may acquire a five-year extension, provide the qualified professional submits a letter stating the validity of the existing document. Accordingly, we have been requested to review the current site conditions and provide an extension letter.

SITE CONDITIONS

We visited the site on June 17, 2024, to assess any changes in the surrounding land use activity or site conditions. In our prior geologic hazard assessment letter, the site is described as an undeveloped parcel surrounded by large-tract rural residential properties. As described in our previous letter, a single-family residence was constructed in the southwest corner of the property. Other changes that have occurred on the site include the grading of three small pads and associated driveways on the western half of the

property, as indicated on the attached Site Plan (Figure 1). These pads appear to be primarily constructed though cutting into the hillside; however, some amount of undocumented fill may be present at the downhill edges of the pads.

Other than the construction of the primary single-family residence in the southwest corner of the property and cut-and-fill grading associated with preparing the three building pads, there appears to be no significant change to the geologic conditions within the site or nearby vicinity since our October 16, 2014 letter. As such, it is our opinion that the previous geologic hazard assessment letter, dated October 16, 2014, remains valid and applicable to the site conditions and project plans.

USE OF THIS LETTER

This letter was prepared for **Shawn Sanderson** and his agents, for use in planning and budgeting the above-referenced project only. Within the limitations of scope, schedule, and budget, our services have been performed in accordance with generally accepted geotechnical engineering practices in effect in this area at the time this letter was prepared. No other warranty, expressed or implied, is made. Our observations, findings, and opinions are a means to identify and reduce the inherent risks to the owner.

o-o-o

We trust this letter should satisfy your needs at this time. Please contact us if you have any questions or require additional services.

Sincerely,

NELSON GEOTECHNICAL ASSOCIATES, INC.

SEPA[1] Environmental Checklist

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**
Rolling hills

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**
25 - 30% in a couple smaller areas.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.** 12" - 36" well draining topsoil on top of decomposed granite and solid granite under decomposed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.** No. Nelson Geotechnical has done 3 site visits & reports for various projects starting in 2014. most recently in 2025.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**
3 - Flat areas have been cut out of hilly areas to access well heads, build an ADU.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**
If precaution is taken groundwater absorbs very quickly in large grass & brush areas.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**
No plans at this time for more impervious surfaces.

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**
We annually clean out ditches and add rock & gravel to control erosion.

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**
No plans of further construction at this time.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.** No nearby emissions or odors we're aware of.

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**
No emissions would occur as part of this approval.

3. Water

Find help answering water questions[5]

a. **Surface:**
Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.** There is no surface water, streams etc anywhere on or near our property.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**
No water nearby.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**
No wetlands or surface water on our parcel.

---

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air
[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**
   No surface water.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.** Not in 100-year floodplain.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**
   NO discharges of waste materials to surface water would occur.

b. **Ground:**
   Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**
   We have 4 wells on our property but only one is active for exsisting residence + ADU.
2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.** We have 2 permitted septic systems on our property and 2 approved site evaluations for future.

c. **Water Runoff (including stormwater):**

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.** Any rain or snow melt runs into ditches which disperse in large well draining grass fields. No other water sources nearby.
2. **Could waste materials enter ground or surface waters? If so, generally describe.**
   NO waste materials or surface water present.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.** Not at this time.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

d. **Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:**

No surface, ground, or runoff water impacts would occur as a direct result of this approval.

4. Plants

Find help answering plants questions

a. **Check the types of vegetation found on the site:**

- ☐ **deciduous tree: alder, maple, aspen, other**
- ☒ **evergreen tree: fir, cedar, pine, other**
- ☒ **shrubs**
- ☒ **grass**
- ☐ **pasture**
- ☐ **crop or grain**
- ☐ **orchards, vineyards, or other permanent crops.**
- ☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**
- ☐ **water plants: water lily, eelgrass, milfoil, other**
- ☐ **other types of vegetation**

b. **What kind and amount of vegetation will be removed or altered?**

None at this time or in the near future.

c. **List threatened and endangered species known to be on or near the site.**

No endangered species on or near the site.

d. **Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.** We've tried to leave as much natural landscape around our buildings except for fire buffer.

e. **List all noxious weeds and invasive species known to be on or near the site.**

We try to remove - Dalmation toadflax, Russian knapweed

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include: Hawks, crows, songbirds.
Deer, coyote.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:** Nope

b. List any threatened and endangered species known to be on or near the site.
Not aware of any threatned or endangered on or nearby.

c. Is the site part of a migration route? If so, explain.
No migration route.

d. Proposed measures to preserve or enhance wildlife, if any.
Mostly natural landscape, deer visit close to our house.

e. List any invasive animal species known to be on or near the site.
Starlings

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. No additional energy needs at this time.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe. wouldn't affect any future solar on or nearby.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.
"Green Building", solar panels.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe. Not that we're aware of.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

1. **Describe any known or possible contamination at the site from present or past uses.** None as far as we know.

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**
No hazardous chemicals/conditions nearby.

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.** only gas, oil, propane.

4. **Describe special emergency services that might be required.**
Wildland Fire protection.

5. **Proposed measures to reduce or control environmental health hazards, if any.**
Future silt fences, straw, limiting to normal construction hours.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?** Very quiet, occasional tractors, mowing, animals.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**
None at this time or in the near future.

3. **Proposed measures to reduce or control noise impacts, if any:**
Standard work hours.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**
Currently in its natural state around exsisting structures.

b. **Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have**
Not forest land. No irrigation so probably never farmed.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?
Never had farm or forest tax breaks

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**
No farming or forestry nearby.

c. **Describe any structures on the site.** Single family home & seperate ADU. Garden shed, chicken coop, open sided tractor & hay storage.

d. **Will any structures be demolished? If so, what?**
No demolishing.

e. **What is the current zoning classification of the site?** RR10

f. **What is the current comprehensive plan designation of the site?** Rural Residential

g. **If applicable, what is the current shoreline master program designation of the site?**
No shoreline.

h. **Has any part of the site been classified as a critical area by the city or county? If so, specify.** No critical areas.

i. **Approximately how many people would reside or work in the completed project?**
No additional people at this time.

j. **Approximately how many people would the completed project displace?**
Nobody will be displaced.

k. **Proposed measures to avoid or reduce displacement impacts, if any.**
Nobody will be displaced.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**
Plan to remain residential

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**
No forest, no agriculture

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**
No added residences at this time.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**
No units will be eliminated.

c. **Proposed measures to reduce or control housing impacts, if any:**
Low density housing.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**
No proposed structures at this time.

b. **What views in the immediate vicinity would be altered or obstructed?**
No proposed structures at this time.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**
No proposed structures at this time.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?** No lighting or windows will be added at this time.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?** No added lighting at this time.

c. **What existing off-site sources of light or glare may affect your proposal?**
None

d. **Proposed measures to reduce or control light and glare impacts, if any:**
Dim or downward facing outside lights to protect night sky.

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing

[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?** Numerous recreational opportunities are readily available nearby including hiking, biking, boating, swimming.

b. **Would the proposed project displace any existing recreational uses? If so, describe.** No existing recreational uses would be displaced.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:** Recreation won't be impacted.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.** No old buildings etc.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.** No evidence of any Indian or historic use.

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.** No potential impacts to cultural or historical.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.** No disturbance would occur.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**
Access to property is Boyd Rd off Hwy 150. Right on Purtteman Gulch, rt on Chelan Ranch rd. Right on Whitetail Way.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?** Hwy 150 at intersection of Boyd rd has a public bus stop aprox 1.6 miles away.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**
No, rural gravel & dirt road access.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**
No water, rail, or air transportation nearby.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**
No extra traffic in this proposal.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**
No agriculture or forestry work nearby.

g. **Proposed measures to reduce or control transportation impacts, if any:**
No transportation impacts at this time.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.** Not at this time.

---

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation
[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services

b. Proposed measures to reduce or control direct impacts on public services, if any.
No added impacts in the near future.

16. Utilities

Find help answering utilities questions[18]

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed. Nothing proposed at this time.

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

X Shawn Sanderson

Type name of signee: Shawn Sanderson

Position and agency/organization: owner

Date submitted: 2/25/26

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities
[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature
[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?** Increased but minimal impervious surfaces.

   - **Proposed measures to avoid or reduce such increases are:**
     Smaller foot print homes with less impervious surfaces.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**
   Deer, coyote & birds adapt well.

   - **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**
     Natural (native) landscape.

3. **How would the proposal be likely to deplete energy or natural resources?**
   Each parcel would potentially have a residence.

   - **Proposed measures to protect or conserve energy and natural resources are:**
     "Green building" practices, solar panels.

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**
   No sensitive areas on our parcel.

   - **Proposed measures to protect such resources or to avoid or reduce impacts are:**
     No sensitive areas.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**
   No shorline on our parcel.

   - **Proposed measures to avoid or reduce shoreline and land use impacts are:**
     No shorline on or near our parcel.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?** None at this time or near future.

   - **Proposed measures to reduce or respond to such demand(s) are:**
     This proposal will not directly increase transportation demand.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal is consistent with Ecology requirements.

Subject: Re: Comprehensive Plan Map Amendment

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

A. Consistency with the Growth Management Act (Chapter 36.70A RCW)

The proposal is consistent with the goals of the Growth Management Act (GMA) because it:

- Maintains rural character consistent with lands outside the UGA.
- Does not introduce urban-level densities or services.
- Allows orderly, low-density rural development.
- Utilizes individual well and septic systems, consistent with rural infrastructure standards.

The proposed RR5 designation remains a rural classification and does not promote urban sprawl or premature extension of urban services.

B. Consistency with Chelan County Comprehensive Plan Goals and Policies

The proposed amendment supports Comprehensive Plan goals by:

- Promoting efficient and logical rural land division.
- Maintaining large-lot rural residential development.
- Supporting housing opportunities consistent with rural land use policies.
- Preserving rural character while allowing reasonable property use.

Reducing the minimum lot size from 10 acres to 5 acres remains fully consistent with rural land use objectives and does not introduce incompatible densities.

C. Compliance with Comprehensive Plan Land Use Designation/Siting Criteria

The 21.6-acre parcel is physically suitable for division into RR5-sized lots. The property:

- Meets minimum acreage thresholds under RR5.
- Is capable of accommodating individual wells and septic systems.
- Has legal access via Whitetail Way.
- Does not require urban utilities or infrastructure expansion.

The site is appropriate in size, location, and physical characteristics to support the proposed designation.

D. Consistency with Capital Facilities and Transportation Elements

The proposal does not require expansion of public capital facilities.

- Water will be provided by individual wells.
- Wastewater will be managed by on-site septic systems.
- Access is existing and adequate.
- Traffic generation from potential RR5 parcels will remain consistent with rural residential levels.

The amendment does not conflict with adopted transportation or capital facilities planning.

E. No Adverse Impact to Surrounding Land Uses

The surrounding area consists of rural residential properties and large-acreage parcels. The proposed RR5 designation:

- Maintains rural residential character.
- Does not introduce commercial or industrial uses.
- Preserves compatibility with surrounding properties.

The amendment will not create adverse impacts to neighboring landowners.

F. No Adverse Impact to Resource Lands or Critical Areas

The property is not designated as long-term commercial agricultural, forest, or mineral resource land. The proposed amendment:

- Does not convert designated resource lands.
- Will comply with critical areas regulations at time of development.
- Does not create unavoidable impacts to environmentally sensitive areas.

G. No Adverse Effect on Land Supply

The proposal does not reduce the County's ability to meet projected rural land needs. Instead, it allows modest rural residential density consistent with long-term planning policies.

The 21.6-acre parcel remains rural in character and continues to support low-density development consistent with rural land supply projections.

H. Serves the Public Interest

The proposed amendment serves the public interest by:

- Allowing reasonable and economically viable use of private property.
- Supporting rural housing opportunities.
- Maintaining public health and safety through compliance with well and septic standards.
- Preserving rural character outside the UGA.

For these reasons, the proposed Comprehensive Plan Map Amendment from RR10 to RR5 meets the criteria of Chelan County Code 14.14.060(1).

Please let me know if additional information is needed to complete the review.

Thanks,
Shawn Sanderson

On Wed, Feb 25, 2026 at 12:25 PM Susan Dretke <Susan.Dretke@co.chelan.wa.us> wrote:

Hi-

We've received the application, however, it looks as if you're missing responses to the following:

- Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following: 1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:

- A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,

- B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

- C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

- D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

- E. The amendment does not adversely affect the surrounding land uses; and,

- F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

- G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

- H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

To: Susan Dretke
Subject: Re: Comprehensive Plan Map Amendment

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

A. Consistency with the Growth Management Act (Chapter 36.70A RCW)

The proposal is consistent with the goals of the Growth Management Act (GMA) because it:

- Maintains rural character consistent with lands outside the UGA.
- Does not introduce urban-level densities or services.
- Allows orderly, low-density rural development.
- Utilizes individual well and septic systems, consistent with rural infrastructure standards.

The proposed RR5 designation remains a rural classification and does not promote urban sprawl or premature extension of urban services.

B. Consistency with Chelan County Comprehensive Plan Goals and Policies

The proposed amendment supports Comprehensive Plan goals by:

- Promoting efficient and logical rural land division.
- Maintaining large-lot rural residential development.
- Supporting housing opportunities consistent with rural land use policies.
- Preserving rural character while allowing reasonable property use.

Reducing the minimum lot size from 10 acres to 5 acres remains fully consistent with rural land use objectives and does not introduce incompatible densities.

C. Compliance with Comprehensive Plan Land Use Designation/Siting Criteria

The 21.6-acre parcel is physically suitable for division into RR5-sized lots. The property:

- Meets minimum acreage thresholds under RR5.
- Is capable of accommodating individual wells and septic systems.
- Has legal access via Whitetail Way.
- Does not require urban utilities or infrastructure expansion.

The site is appropriate in size, location, and physical characteristics to support the proposed designation.

D. Consistency with Capital Facilities and Transportation Elements

The proposal does not require expansion of public capital facilities.

- Water will be provided by individual wells.
- Wastewater will be managed by on-site septic systems.
- Access is existing and adequate.
- Traffic generation from potential RR5 parcels will remain consistent with rural residential levels.

The amendment does not conflict with adopted transportation or capital facilities planning.

E. No Adverse Impact to Surrounding Land Uses

The surrounding area consists of rural residential properties and large-acreage parcels. The proposed RR5 designation:

- Maintains rural residential character.
- Does not introduce commercial or industrial uses.
- Preserves compatibility with surrounding properties.

The amendment will not create adverse impacts to neighboring landowners.

F. No Adverse Impact to Resource Lands or Critical Areas

The property is not designated as long-term commercial agricultural, forest, or mineral resource land. The proposed amendment:

- Does not convert designated resource lands.
- Will comply with critical areas regulations at time of development.
- Does not create unavoidable impacts to environmentally sensitive areas.

G. No Adverse Effect on Land Supply

The proposal does not reduce the County's ability to meet projected rural land needs. Instead, it allows modest rural residential density consistent with long-term planning policies.

The 21.6-acre parcel remains rural in character and continues to support low-density development consistent with rural land supply projections.

H. Serves the Public Interest

The proposed amendment serves the public interest by:

- Allowing reasonable and economically viable use of private property.
- Supporting rural housing opportunities.
- Maintaining public health and safety through compliance with well and septic standards.
- Preserving rural character outside the UGA.

For these reasons, the proposed Comprehensive Plan Map Amendment from RR10 to RR5 meets the criteria of Chelan County Code 14.14.060(1).

Please let me know if additional information is needed to complete the review.

Thanks,
Shawn Sanderson

Hi-

We've received the application, however, it looks as if you're missing responses to the following:

- Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following: 1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:

- A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,

- B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

- C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

- D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

- E. The amendment does not adversely affect the surrounding land uses; and,

- F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

- G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

- H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

The Department of Community Development would appreciate your feedback. Please take a moment to complete our Public Experience Survey: https://www.surveymonkey.com/r/XP7NYJZ

SEPA[1] Environmental Checklist

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

[1] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/Checklist-guidance

A. Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**
   Sanderson Short Plat
2. **Name of applicant:**
   Shawn & DeAnne Sanderson
3. **Address and phone number of applicant and contact person:**
   172 Whitetail Way Chelan, WA 98816, Shawn S. (509) 860-8649
4. **Date checklist prepared:**
   Feb 2026
5. **Agency requesting checklist:**
   Chelan County
6. **Proposed timing of schedule (including phasing, if applicable):**
   ASAP
7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**
   Our eventual goal is to change zoning from current RR10 to RR5.
8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.** Parcel was approved for Cluster Short Plat NO SP 2023-409
9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**
   Open in ground swimming pool permit BP 250540 To be finished in the Spring.
10. **List any government approvals or permits that will be needed for your proposal, if known.**
    Comprehensive Plan Amendment, re zone, Short Plat approval.
11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)** Trying to have flexibility to sell off a few acres of our property to help cover our rapidly rising property taxes.
12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section,**
    21.65 acres @ 172 Whitetail Way Chelan, Parcel # 282234410100

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**
Rolling hills

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**
25 - 30% in a couple smaller areas.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.** 12" - 36" well draining topsoil on top of decomposed granite and solid granite under decomposed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.** No. Nelson Geotechnical has done 3 site visits & reports for various projects starting in 2014. most recently in 2025.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**
3 - Flat areas have been cut out of hilly areas to access well heads, build an ADU.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**
If precaution is taken groundwater absorbs very quickly in large grass & brush areas.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**
No plans at this time for more impervious surfaces.

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**
We annually clean out ditches and add rock & gravel to control erosion.

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**
No plans of further construction at this time.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.** No nearby emissions or odors we're aware of.

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**
No emissions would occur as part of this approval.

3. Water

Find help answering water questions[5]

a. **Surface:**
Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.** There is no surface water, streams etc anywhere on or near our property.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**
No water nearby.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**
No wetlands or surface water on our parcel.

---

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air
[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**
   No surface water.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.** Not in 100-year floodplain.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**
   NO discharges of waste materials to surface water would occur.

b. **Ground:**
   Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**
   We have 4 wells on our property but only one is active for exsisting residence + ADU.
2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.** We have 2 permitted septic systems on our property and 2 approved site evaluations for future.

c. **Water Runoff (including stormwater):**

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.** Any rain or snow melt runs into ditches which disperse in large well draining grass fields. No other water sources nearby.
2. **Could waste materials enter ground or surface waters? If so, generally describe.**
   NO waste materials or surface water present.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.** Not at this time.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

d. **Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:**

No surface, ground, or runoff water impacts would occur as a direct result of this approval.

4. Plants

Find help answering plants questions

a. **Check the types of vegetation found on the site:**

- ☐ **deciduous tree: alder, maple, aspen, other**
- ☒ **evergreen tree: fir, cedar, pine, other**
- ☒ **shrubs**
- ☒ **grass**
- ☐ **pasture**
- ☐ **crop or grain**
- ☐ **orchards, vineyards, or other permanent crops.**
- ☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**
- ☐ **water plants: water lily, eelgrass, milfoil, other**
- ☐ **other types of vegetation**

b. **What kind and amount of vegetation will be removed or altered?**

None at this time or in the near future.

c. **List threatened and endangered species known to be on or near the site.**

No endangered species on or near the site.

d. **Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.** We've tried to leave as much natural landscape around our buildings except for fire buffer.

e. **List all noxious weeds and invasive species known to be on or near the site.**

We try to remove - Dalmation toadflax, Russian knapweed

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include: Hawks, crows, songbirds.
Deer, coyote.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:** Nope

b. List any threatened and endangered species known to be on or near the site.
Not aware of any threatned or endangered on or nearby.

c. Is the site part of a migration route? If so, explain.
No migration route.

d. Proposed measures to preserve or enhance wildlife, if any.
Mostly natural landscape, deer visit close to our house.

e. List any invasive animal species known to be on or near the site.
Starlings

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. No additional energy needs at this time.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe. wouldn't affect any future solar on or nearby.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.
"Green Building", solar panels.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe. Not that we're aware of.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

1. **Describe any known or possible contamination at the site from present or past uses.** None as far as we know.

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**
No hazardous chemicals/conditions nearby.

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.** only gas, oil, propane.

4. **Describe special emergency services that might be required.**
Wildland Fire protection.

5. **Proposed measures to reduce or control environmental health hazards, if any.**
Future silt fences, straw, limiting to normal construction hours.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?** Very quiet, occasional tractors, mowing, animals.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**
None at this time or in the near future.

3. **Proposed measures to reduce or control noise impacts, if any:**
Standard work hours.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**
Currently in its natural state around exsisting structures.

b. **Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have**
Not forest land. No irrigation so probably never farmed.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?
Never had farm or forest tax breaks

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**
No farming or forestry nearby.

c. **Describe any structures on the site.** Single family home & seperate ADU. Garden shed, chicken coop, open sided tractor & hay storage.

d. **Will any structures be demolished? If so, what?**
No demolishing.

e. **What is the current zoning classification of the site?** RR10

f. **What is the current comprehensive plan designation of the site?** Rural Residential

g. **If applicable, what is the current shoreline master program designation of the site?**
No shoreline.

h. **Has any part of the site been classified as a critical area by the city or county? If so, specify.** No critical areas.

i. **Approximately how many people would reside or work in the completed project?**
No additional people at this time.

j. **Approximately how many people would the completed project displace?**
Nobody will be displaced.

k. **Proposed measures to avoid or reduce displacement impacts, if any.**
Nobody will be displaced.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**
Plan to remain residential

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**
No forest, no agriculture

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**
No added residences at this time.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**
No units will be eliminated.

c. **Proposed measures to reduce or control housing impacts, if any:**
Low density housing.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**
No proposed structures at this time.

b. **What views in the immediate vicinity would be altered or obstructed?**
No proposed structures at this time.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**
No proposed structures at this time.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?** No lighting or windows will be added at this time.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?** No added lighting at this time.

c. **What existing off-site sources of light or glare may affect your proposal?**
None

d. **Proposed measures to reduce or control light and glare impacts, if any:**
Dim or downward facing outside lights to protect night sky.

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing

[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?** Numerous recreational opportunities are readily available nearby including hiking, biking, boating, swimming.

b. **Would the proposed project displace any existing recreational uses? If so, describe.** No existing recreational uses would be displaced.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:** Recreation won't be impacted.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.** No old buildings etc.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.** No evidence of any Indian or historic use.

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.** No potential impacts to cultural or historical.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.** No disturbance would occur.

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**
Access to property is Boyd Rd off Hwy 150. Right on Purtteman Gulch, rt on Chelan Ranch rd. Right on Whitetail Way.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?** Hwy 150 at intersection of Boyd rd has a public bus stop aprox 1.6 miles away.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**
No, rural gravel & dirt road access.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**
No water, rail, or air transportation nearby.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**
No extra traffic in this proposal.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**
No agriculture or forestry work nearby.

g. **Proposed measures to reduce or control transportation impacts, if any:**
No transportation impacts at this time.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.** Not at this time.

---

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation
[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services

b. Proposed measures to reduce or control direct impacts on public services, if any.
No added impacts in the near future.

16. Utilities

Find help answering utilities questions[18]

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed. Nothing proposed at this time.

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

X Shawn Sanderson

Type name of signee: Shawn Sanderson

Position and agency/organization: owner

Date submitted: 2/25/26

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities
[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature
[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?** Increased but minimal impervious surfaces.

   - **Proposed measures to avoid or reduce such increases are:**
     Smaller foot print homes with less impervious surfaces.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**
   Deer, coyote & birds adapt well.

   - **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**
     Natural (native) landscape.

3. **How would the proposal be likely to deplete energy or natural resources?**
   Each parcel would potentially have a residence.

   - **Proposed measures to protect or conserve energy and natural resources are:**
     "Green building" practices, solar panels.

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**
   No sensitive areas on our parcel.

   - **Proposed measures to protect such resources or to avoid or reduce impacts are:**
     No sensitive areas.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**
   No shorline on our parcel.

   - **Proposed measures to avoid or reduce shoreline and land use impacts are:**
     No shorline on or near our parcel.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?** None at this time or near future.

   - **Proposed measures to reduce or respond to such demand(s) are:**
     This proposal will not directly increase transportation demand.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal is consistent with Ecology requirements.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

Going through the lengthy process to eventually re zone from current RR10 to RR5. Currently have an approved cluster short plat SP 2023-409.

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: residential
   South: residential
   East: residential
   West: residential
4. What is the current use of the property? Single residence & ADU
5. Sanitation Disposal: ☐ N/A ☒ Septic Permit ☐ Sewer District: _____
6. Water Source: ☐ N/A ☒ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☒ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: NA
8. Fire District: Chelan School District: Chelan
9. Power Service: Chelan County PUD
10. Are there critical areas or critical area buffers on the property? NO
    ☐ Airport Overlay: _____
    ☐ Aquifer Recharge Area (see attached)
    ☐ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☐ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☐ Habitat/Riparian Area, protected species/area: _____
    ☐ Streams / Waterbodies: _____ ☐Shoreline Environment Designation: _____
    ☐ Drainage or Seasonal Stream: _____ ☐ Wetland, if so what category: _____
    ☐ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    NA
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    NA

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:
NA -> No projects planned at this time.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

SS _____ 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

SS _____ 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

SS _____ 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

SS _____ 4. Additional permit applications and approvals may be necessary to conduct specific activities.

SS _____ 5. Application fees are non-refundable, except when approve by the Board.

SS _____ 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

SS ____ 7. Chelan County is hereby given consent to enter the property(ies) listed above.

SS ____ 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

SS ____ 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

SS ____ 10. I certify that this application has been made with the consent of the lawful property owner(s).

SS ____ 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

SS ____ 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

Owner Signature: Shawn Sanderson **Place:** 172 Whitetail Way **Date:** 2/24/26

Owner/Applicant/Agent Signature: _____ **Place:** _____ **Date:** _____

Print Name: _____

Owner/Applicant/Agent Signature: _____ **Place:** _____ **Date:** _____

Print Name: _____

Property owners:
Shawn and DeAnne Sanderson
172 Whitetail Way
Chelan, WA 98816
509-860-8649
Parcel number: 282234410100

i.) Statement of What is Proposed and Why

The applicants (Shawn and DeAnne Sanderson) propose to amend the Comprehensive Plan land use designation and zoning classification from Rural Residential/Resource (RR10) to Rural Residential (RR5) for the 21.65-acre parcel located at 172 Whitetail Way, Chelan, WA. The requested amendment would allow a 4-lot residential short plat consistent with a 5-acre minimum lot size.

The purpose of the amendment is to allow modest rural residential development that aligns with the property's size, existing access, surrounding parcel patterns, and long-term residential character of the area. The proposed 4-lot configuration maintains rural densities while making efficient use of the land.

We have a conditional cluster short plat (SP 2023-409) approval for three lots on our 21.65 acres. However, the open space requirements were significantly restrictive for us to be able to enjoy the freedom of our property. We feel re-zoning to RR5 will enable us to fulfil our potential objectives without the restrictions.of the open space requirements.

ii.) Consistency with the Washington Growth Management Act (RCW 36.70A)

The proposed amendment is consistent with the goals of the Washington State Growth Management Act (GMA), including:

Urban Growth Goal: The property is outside the UGA and the proposed density remains rural in character, consistent with GMA provisions that allow limited rural development that does not create urban-level densities.
Rural Element: The proposal maintains rural character, preserves open space between homes, and avoids sprawl.
Housing Goal: The amendment modestly increases rural housing supply in a manner consistent with existing development patterns.
Property Rights Goal: The proposal allows reasonable use of private property consistent with surrounding land uses.

The requested RR5 zoning maintains low-density rural development and does not create urban services demand.

The RR10 and RR5 guidelines are relatively the same other than the lot size.

iii.) Compliance with Comprehensive Plan Goals and Policies

The amendment supports Chelan County Comprehensive Plan goals related to:

* Encouraging rural development at appropriate densities.
* Maintaining rural character and open space.
* Supporting incremental housing opportunities.
* Ensuring compatibility with surrounding land uses.

The proposal reflects the established rural residential pattern in the surrounding area and does not introduce incompatible uses.

iv.) Compliance with Land Use Designation Criteria

The requested RR5 designation is appropriate because:

* The parcel size (21.65 acres) comfortably supports four 5-acre lots.
* The property is currently used for single-family residential purposes.
* No critical areas or designated resource lands are present.
* The proposed density is consistent with surrounding lot sizes.
* The change does not require extension of urban-level infrastructure.

v.) Consistency with Capital Facilities and Transportation Elements

The proposed 4-lot short plat will not create significant demand on capital facilities.

Transportation: Access is available via Whitetail Way. Traffic generated by four rural residential lots is minimal and consistent with rural road standards.
Schools and Emergency Services: The increase of three additional dwelling units (beyond the existing home) will have negligible impact on public services.
Utilities: Development will rely on individual wells and septic systems consistent with rural service levels.

The proposal does not require expansion of public infrastructure beyond rural service standards.

vi.) Surrounding Land Uses and Appropriateness of Amendment

Surrounding properties are characterized by rural residential uses and large-lot development patterns. The proposed RR5 designation remains consistent with:

* Existing rural residential character
* Similar lot sizes in the vicinity
* Low-density residential use

The proposed amendment is more appropriate than the existing RR10 zoning because it better reflects the parcel's size and allows logical subdivision while maintaining rural spacing and open character. Two of the adjoining properties are 5 acres and 5.88 acres.

Vii.) Impact on Resource Lands or Critical Areas

The property does not contain or impact designated agricultural, forest, or mineral resource lands. No mapped critical areas (wetlands, fish and wildlife habitat, geologic hazards, or shorelines) are present on the site.

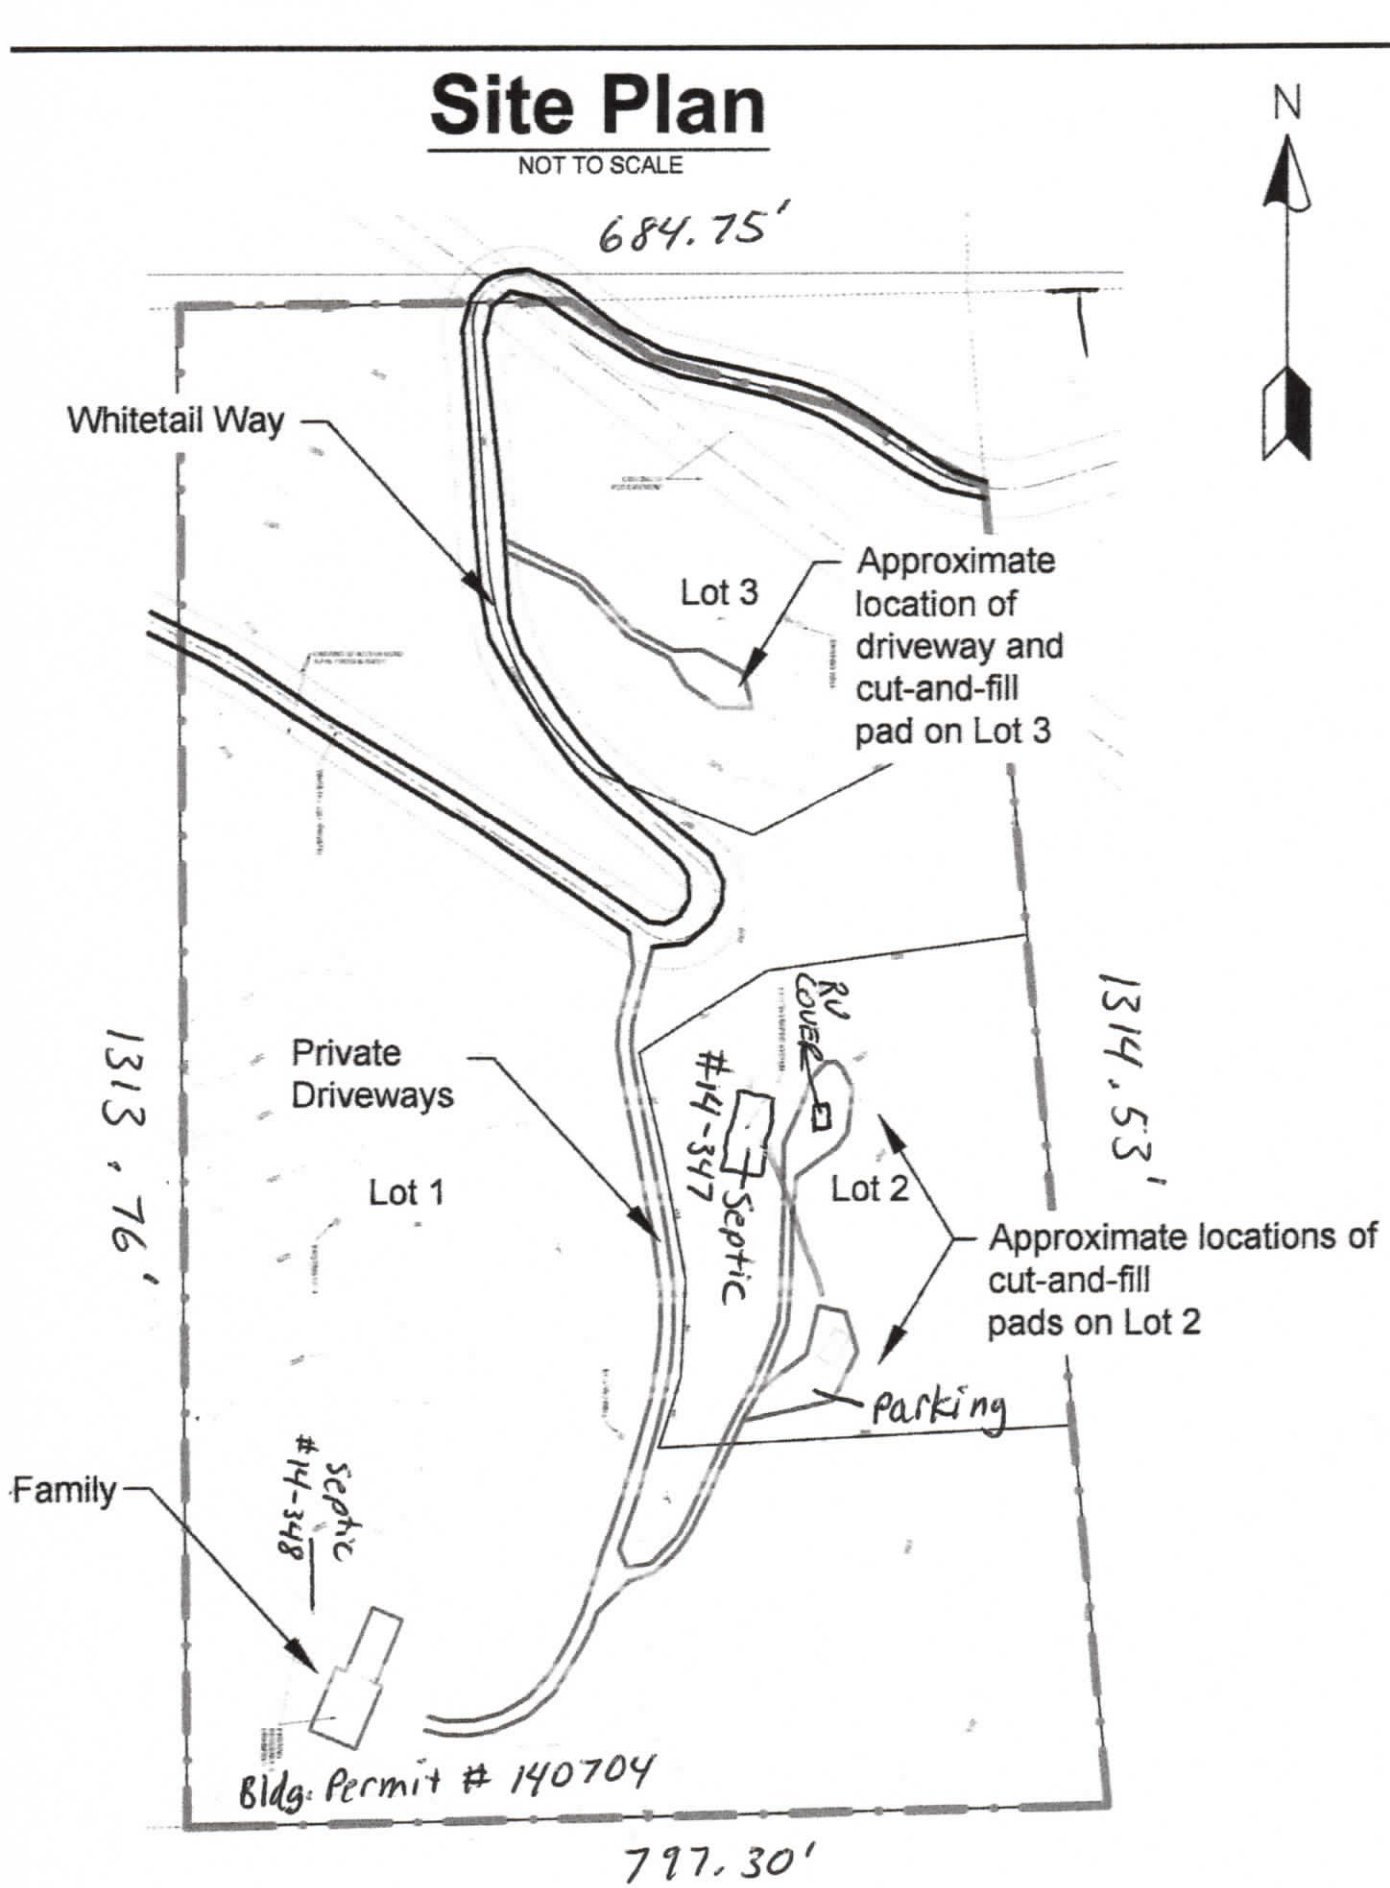
The proposal therefore does not negatively impact long-term commercial resource lands or environmentally sensitive areas.

viii.) Impact on 20-Year Land Supply

The amendment provides a modest increase in rural residential land supply by allowing up to four lots rather than limiting development to two under RR10 standards.

This incremental increase supports projected population growth while maintaining rural densities and does not undermine the County's allocation of growth to Urban Growth Areas.

ix.) Public Health, Safety, and Welfare



The proposed amendment serves the public interest by:

* Allowing orderly rural development consistent with established patterns.
* Supporting housing availability in Chelan County.
* Maintaining rural character and low-density design.
* Avoiding impacts to critical areas or resource lands.
* Ensuring development remains within rural infrastructure capacity.
* Added parcels would contribute more to the local tax base, helping fund schools, fire districts, etc.

The proposal balances private property rights with community planning goals and promotes the health, safety, and welfare of the public as a whole.

This General Land Use Application Form shall be completed unless specified below. Additional information and supplemental forms may be required. Please review all applicable statutes and regulations pertaining to the proposed development and provide information, documents, studies, and reports (such as a Traffic Impact Study or environmental forms) demonstrating compliance with all statutory and regulatory requirements and other applicable criteria.

Application For: (Check all that apply)

- ❑ Administrative Modification
- ❑ Administrative Determination
- ❑ Administrative Interpretation
- ❑ Binding Site Plan
- ☒ Comprehensive Plan Map Amendment
- ❑ Comprehensive Plan Text Amendment
- ❑ Conditional Use Permit
- ❑ Forest Practice/Conversion
- ❑ Open Space: Public Benefit Rating System
- ❑ Major Subdivision
- ❑ Master Planned Development
- ❑ Planned Development
- ❑ Plat Alteration or Vacation
- ❑ Short Plat
- ❑ Variance (zoning or critical areas)
- ❑ Zoning Change-Text Amendment/ Map Amendment
- ❑ Critical Area Determination
- ❑ Other: _____

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

Going through the lengthy process to eventually re zone from current RR10 to RR5. Currently have an approved cluster short plat SP 2023-409.

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: residential
   South: residential
   East: residential
   West: residential
4. What is the current use of the property? Single residence & ADU
5. Sanitation Disposal: ☐ N/A ☒ Septic Permit ☐ Sewer District: _____
6. Water Source: ☐ N/A ☒ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☒ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: NA
8. Fire District: Chelan School District: Chelan
9. Power Service: Chelan County PUD
10. Are there critical areas or critical area buffers on the property? NO
    ☐ Airport Overlay: _____
    ☐ Aquifer Recharge Area (see attached)
    ☐ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☐ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☐ Habitat/Riparian Area, protected species/area: _____
    ☐ Streams / Waterbodies: _____ ☐Shoreline Environment Designation: _____
    ☐ Drainage or Seasonal Stream: _____ ☐ Wetland, if so what category: _____
    ☐ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    NA
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    NA

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:
NA -> No projects planned at this time.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

SS _____ 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

SS _____ 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

SS _____ 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

SS _____ 4. Additional permit applications and approvals may be necessary to conduct specific activities.

SS _____ 5. Application fees are non-refundable, except when approve by the Board.

SS _____ 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

SS ____ 7. Chelan County is hereby given consent to enter the property(ies) listed above.

SS ____ 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

SS ____ 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

SS ____ 10. I certify that this application has been made with the consent of the lawful property owner(s).

SS ____ 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

SS ____ 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-signif icance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

CPA 26-063 Sanderson- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 10 (RR10) to Rural Residential Resource 5 (RR5). **Site Address:** 172 Whitetail Way Chelan, WA 98816; **Parcel Numbers:** 28-22-34-410-100

Subject: Notice of Application for CPA 26-063 Sanderson - Chelan County Dept. of Community Development
Attachments: CPA 26-063 Sanderson NOA.pdf; Affidavit of posting NOA.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding Sanderson's property, File# CPA 26-063. This notice should be posted on the subject property by March 12, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days, starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, Susan Dretke, at 509-667-6225 or Susan.Dretke@co.chelan.wa.us.

Thank you,

Jessica Thompson

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-063 Sanderson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 10 (RR10) to Rural Residential/Resource 5 (RR5). 172 Whitetail Way, Chelan, WA 98816 APN: 28-22-34-410-100.

CPA 26-067 WA DNR - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 20 (RR20) to Rural Residential/Resource 10 (RR10). Unassigned, Wenatchee, WA 98801; APN: 23-20-16-100-000.

On March 12, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 26, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Date: March 12, 2026

DETERMINATION OF APPLICATION STATUS

Pursuant to Title 14, Development Permit Procedures & Administration Section 14.08.030, Determination of Completeness, Chelan County Board of County Commissioners Resolution No. 2004-16, as amended.

Project Description:

File Number:	PL 26-063
Related Files:	SP 23-409
Parcel Address:	172 Whitetail Way, Chelan, WA 98816
Parcel Zoning:	Rural Residential/Resource 10 (RR10)
Applicant/Owner:	Shawn and DeAnne Sanderson
Mailing Address:	172 Whitetail Way, Chelan, WA 98816
Date Submitted:	February 26, 2026
Date Completed:	March 2, 2026

Upon Initial Review, The Above Referenced Application is Found To Be: **COMPLETE**

The required components of an application are present and are judged by the review authority to be technically accurate and contain sufficient information necessary to allow the processing of the application(s). All submittal fees have been paid.

Your application has been determined to be complete as of the date of this letter. Pursuant to Chelan County Code Section 14.08.030(5), a Determination of Completeness shall not preclude the department from requesting additional information or studies if the need for more information becomes apparent during processing of the proposed development.

Memorandum

To: Susan Dretke, Chelan County

From: Richmond Petty, REHS

Date: 03/30/26

RE: Sanderson (CPA 26-063) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 5 (RR5). The subject property is located at 172 Whitetail Way, Chelan, WA 98816 (county tax parcel: 282234410100)

As proposed, I have no objections to further approval of this project.

- 3-Lot Short plat proposal at Blue Line stage – SP 2023-409, existing parcel at 21.65 acres.
- Proposed Lots 1 & 2 have existing permitted septic systems, Permit 14-348 and Permit 14-347 respectively.
- Individual Private Wells – ALE 672 and Well 673, have been reviewed and approved.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

Subject: Re: Comprehensive Plan Map Amendment

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

A. Consistency with the Growth Management Act (Chapter 36.70A RCW)

The proposal is consistent with the goals of the Growth Management Act (GMA) because it:

- Maintains rural character consistent with lands outside the UGA.
- Does not introduce urban-level densities or services.
- Allows orderly, low-density rural development.
- Utilizes individual well and septic systems, consistent with rural infrastructure standards.

The proposed RR5 designation remains a rural classification and does not promote urban sprawl or premature extension of urban services.

B. Consistency with Chelan County Comprehensive Plan Goals and Policies

The proposed amendment supports Comprehensive Plan goals by:

- Promoting efficient and logical rural land division.
- Maintaining large-lot rural residential development.
- Supporting housing opportunities consistent with rural land use policies.
- Preserving rural character while allowing reasonable property use.

Reducing the minimum lot size from 10 acres to 5 acres remains fully consistent with rural land use objectives and does not introduce incompatible densities.

C. Compliance with Comprehensive Plan Land Use Designation/Siting Criteria

The 21.6-acre parcel is physically suitable for division into RR5-sized lots. The property:

- Meets minimum acreage thresholds under RR5.
- Is capable of accommodating individual wells and septic systems.
- Has legal access via Whitetail Way.
- Does not require urban utilities or infrastructure expansion.

The site is appropriate in size, location, and physical characteristics to support the proposed designation.

D. Consistency with Capital Facilities and Transportation Elements

The proposal does not require expansion of public capital facilities.

- Water will be provided by individual wells.
- Wastewater will be managed by on-site septic systems.
- Access is existing and adequate.
- Traffic generation from potential RR5 parcels will remain consistent with rural residential levels.

The amendment does not conflict with adopted transportation or capital facilities planning.

E. No Adverse Impact to Surrounding Land Uses

The surrounding area consists of rural residential properties and large-acreage parcels. The proposed RR5 designation:

- Maintains rural residential character.
- Does not introduce commercial or industrial uses.
- Preserves compatibility with surrounding properties.

The amendment will not create adverse impacts to neighboring landowners.

F. No Adverse Impact to Resource Lands or Critical Areas

The property is not designated as long-term commercial agricultural, forest, or mineral resource land. The proposed amendment:

- Does not convert designated resource lands.
- Will comply with critical areas regulations at time of development.
- Does not create unavoidable impacts to environmentally sensitive areas.

G. No Adverse Effect on Land Supply

The proposal does not reduce the County's ability to meet projected rural land needs. Instead, it allows modest rural residential density consistent with long-term planning policies.

The 21.6-acre parcel remains rural in character and continues to support low-density development consistent with rural land supply projections.

H. Serves the Public Interest

The proposed amendment serves the public interest by:

- Allowing reasonable and economically viable use of private property.
- Supporting rural housing opportunities.
- Maintaining public health and safety through compliance with well and septic standards.
- Preserving rural character outside the UGA.

For these reasons, the proposed Comprehensive Plan Map Amendment from RR10 to RR5 meets the criteria of Chelan County Code 14.14.060(1).

Please let me know if additional information is needed to complete the review.

Thanks,
Shawn Sanderson

On Wed, Feb 25, 2026 at 12:25 PM Susan Dretke <Susan.Dretke@co.chelan.wa.us> wrote:

Hi-

We've received the application, however, it looks as if you're missing responses to the following:

- Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following: 1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:

- A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,

- B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

- C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

- D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

- E. The amendment does not adversely affect the surrounding land uses; and,

- F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

- G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

- H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

IN THE MATTER OF	)	**FINDINGS OF FACT,**
SHORT PLAT NO. SP 2023-409	)	**CONCLUSIONS OF LAW**
Shawn and Deanne Sanderson, OWNERS	)	**AND DECISION**

THIS MATTER, an application submitted by Jesse Redell of Erlandsen (agent) to subdivide an existing parcel of land approximately 21.65 acres in size located in the Rural Residential/Resource 10 (RR10) zoning district into two (2) residential lots with a residential open space tract using the cluster provision in Section 11.10.020(1)(A) of the Chelan County Code. Proposed Lot 1 would be at 1.77 acres in size and is currently vacant with the exception of an existing well. Proposed Lot 2 would be at 2.31 acres in size and contains an existing accessory dwelling unit (ADU). The proposed open space tract would be at 17.57 acres in size and contains an existing residence within a proposed 2.34-acre buildable area within the open space tract. Primary access to both lots and the open space tract would continue to be from a private access easement; potable water for all lots would be provided from existing exempt wells; and sanitation for all lots would consist of private septic systems located on each individual lot. This proposed Short Plat was received and decided upon, pursuant to the Chelan County Subdivision Code Title 11, Title 12 and other applicable codes adopted by Chelan County.

DECISION

Based upon the following Findings of Fact and Conclusions of Law, Short Plat SP 2023-409 is hereby **CONDITIONALLY APPROVED,** subject to the conditions noted herein. Unless otherwise noted, the conditions of approval shall be accomplished by the applicant and/or authorized agent prior to recording the final short plat.

Deanna Walter, Director
Department of Community Development

1/16/25
Date

This administrative decision is final unless appealed within ten (10) working days to the Hearing Examiner as provided for in the provisions of Chelan County Code Chapter 14.12, Development Permit Procedures, and Administration, from the date this Administrative Decision was issued.

Standing to appeal is limited to the applicant or owner of the property on which the subdivision is proposed, or any property owner who deems himself/herself aggrieved by the Administrator's decision and who will suffer direct and substantial impacts from the proposed short subdivision. Said appeal shall require the applicable appeal fee as provided for in the Chelan County Department of Community Development Fee Schedule. The complete case file, Findings of Fact, Conclusions of Law, Decision, and Conditions of Approval are available for inspection at the office of the Chelan County Department of Community Development, Monday through Friday during the normal business hours at 316 Washington Street Suite 301, Wenatchee, WA 98801.

FINDINGS OF FACT

1. Pursuant to Section 14.04.020(3), unless otherwise directed in an applicable regulation, the Director is responsible for issuing administrative decisions and is vested with the authority to summarily approve, conditionally approve or disapprove proposed subdivisions.
2. On September 29, 2023, Jesse Redell of Erlandsen (agent) on behalf of Shawn and Deanne Sanderson (owners) requested a short plat of approximately 21.65 acres into two (2) residential building lots and one (1) open space tract with a residential building envelopment.
   - 2.1. Proposed Lot 1 would be at 1.77 acres in size and is currently vacant.
   - 2.2. Proposed Lot 2 would be at 2.31 acres in size and contains an existing 336 sq.ft. accessory dwelling unit (ADU) that received an after-the-fact building permit in 2024 (BP 240719).
   - 2.3. The proposed open space tract would be at 17.57 acres in size and contains an existing residence within a proposed 2.34-acre buildable area within the open space tract.
3. The subject property is currently located at 172 Whitetail Way, Chelan, WA and identified by Chelan County Assessor's Parcel Number 28-22-34-410-100.
4. The subject site is located within the Rural Residential/Resource 10 (RR10) zoning district and corresponding Comprehensive Land Use Designation.
5. The surrounding properties are zoned:
   - 5.1. North: Rural Residential/Resource 10 (RR10)
   - 5.2. East: Rural Residential/Resource 10 (RR10)
   - 5.3. South: Rural Residential/Resource 20 (RR20)
   - 5.4. West: Rural Residential/Resource 10 (RR10)
6. The existing property is currently accessed off of Whitetail Way. The proposed access for all three lots would continue to be from Whitetail Way.
   - 6.1. Whitetail Way, which is a 50' private access easement and is classified as a private road in the county road system. Whitetail Way is a 14'-18' graveled two lane roadway, which provides single lanes for traffic in each direction with no curb, gutter or sidewalk. Whitetail Way would serve 7 parcels with this subdivision included.
7. The site plan of record is date stamped September 29, 2023.
8. The subject parcel is legally described as *"T 28N R 22EWM S 34; LOT 6 SURVEY 3/76; PT NWSE; 21.6500 ACRES"*, but is also known as Parcel A of BLA 2023-023, recorded January 23, 2023 under AFN: 2577966.
9. Pursuant to Chelan County Code (CCC) Section 14.98.1090 definition of 'legal lot of record,' the subject parcel is a legal lot of record having been created prior to October 17, 2000, which is when Chelan County became GMA compliant.
10. Corrected Warranty Deed, recorded October 23, 2014 under AFN: 2408069, identifies Shawn and Deanne Sanderson as owners.
11. Pursuant to CCC Section 14.08.030, a Determination of Complete Application was issued on January 31, 2024, establishing that the application was complete for processing.
12. An Affidavit of Mailing was completed showing that notices were mailed to all property owners within 300 feet, excluding 60 feet of street right-of-way, of the project boundary on February 8, 2024.
13. An Affidavit of Posting was submitted by Shawn Sanderson (owner), showing that the subject property was posted February 8, 2024 through February 22, 2024.
14. Chelan County Comprehensive Plan, Chapter 3 page 9, states the purpose of the Rural Residential/Resource 10 (RR10) designation is to *"To allow for rural development, forestry and agricultural uses consistent with the rural character and rural development provisions outlined in the goals and policies of the comprehensive plan. These areas can function as areas of transition between resource lands and areas of more intense rural or urban development. These areas also provide opportunities for protecting sensitive environmental areas and creating open space typical of a rural setting."*

Uses appropriate for these areas include: open space; residential; agriculture; and forestry."

15. CCC Section 11.10.020: Standards.

    15.1. (1)(A): The minimum required size for the RR10 zoning district is 10 acres, which may be modified one time for cluster subdivisions.

        15.1.1. Proposed Lot 1 would be at 1.77 acres in size and is currently vacant with the exception of an existing well.

        15.1.2. Proposed Lot 2 would be at 2.31 acres in size and contains an existing ADU.

        15.1.3. The proposed open space tract would be at 17.57 acres in size and contains an existing residence within a proposed 2.34-acre buildable area that is part of the open space tract. The applicants are proposing to use the Open Space Exemption pursuant to CCC 12.12.050(4)(A) and a draft open space management plan was submitted along with the application materials (Exhibit B).

    15.2. (2): Access for both residential lots and the open space tract would be from a private access easement off of Whitetail Way. The site plan, date stamped September 29, 2023, demonstrates that both proposed lots and the buildable area in the open space tract exceed the 150-foot minimum lot width requirement at the front building line; therefore the 150-foot lot width at front building line is satisfied

    15.3. (3) & (4): Proposed Lot 1 allows for approximately 26,985 sq.ft. of lot coverage and proposed Lot 2 allows for approximately 35,675 sq. ft. of lot coverage each; the existing structures on the buildable area of the open space tract does not exceed the maximum lot coverage based on the Assessor's records for existing building square footages.

    Building height and lot coverage would be reviewed at the time of building permit submittal for new structure(s).

    15.4. (5) & (6): Based on the site plan of record, the existing residence within the buildable area of the open space tract meets the required setbacks. Per BP 240719, the existing ADU also meets the required setbacks of the short plat.

    Setbacks for new structure(s) on any of the proposed lots would be reviewed at the time of building permit

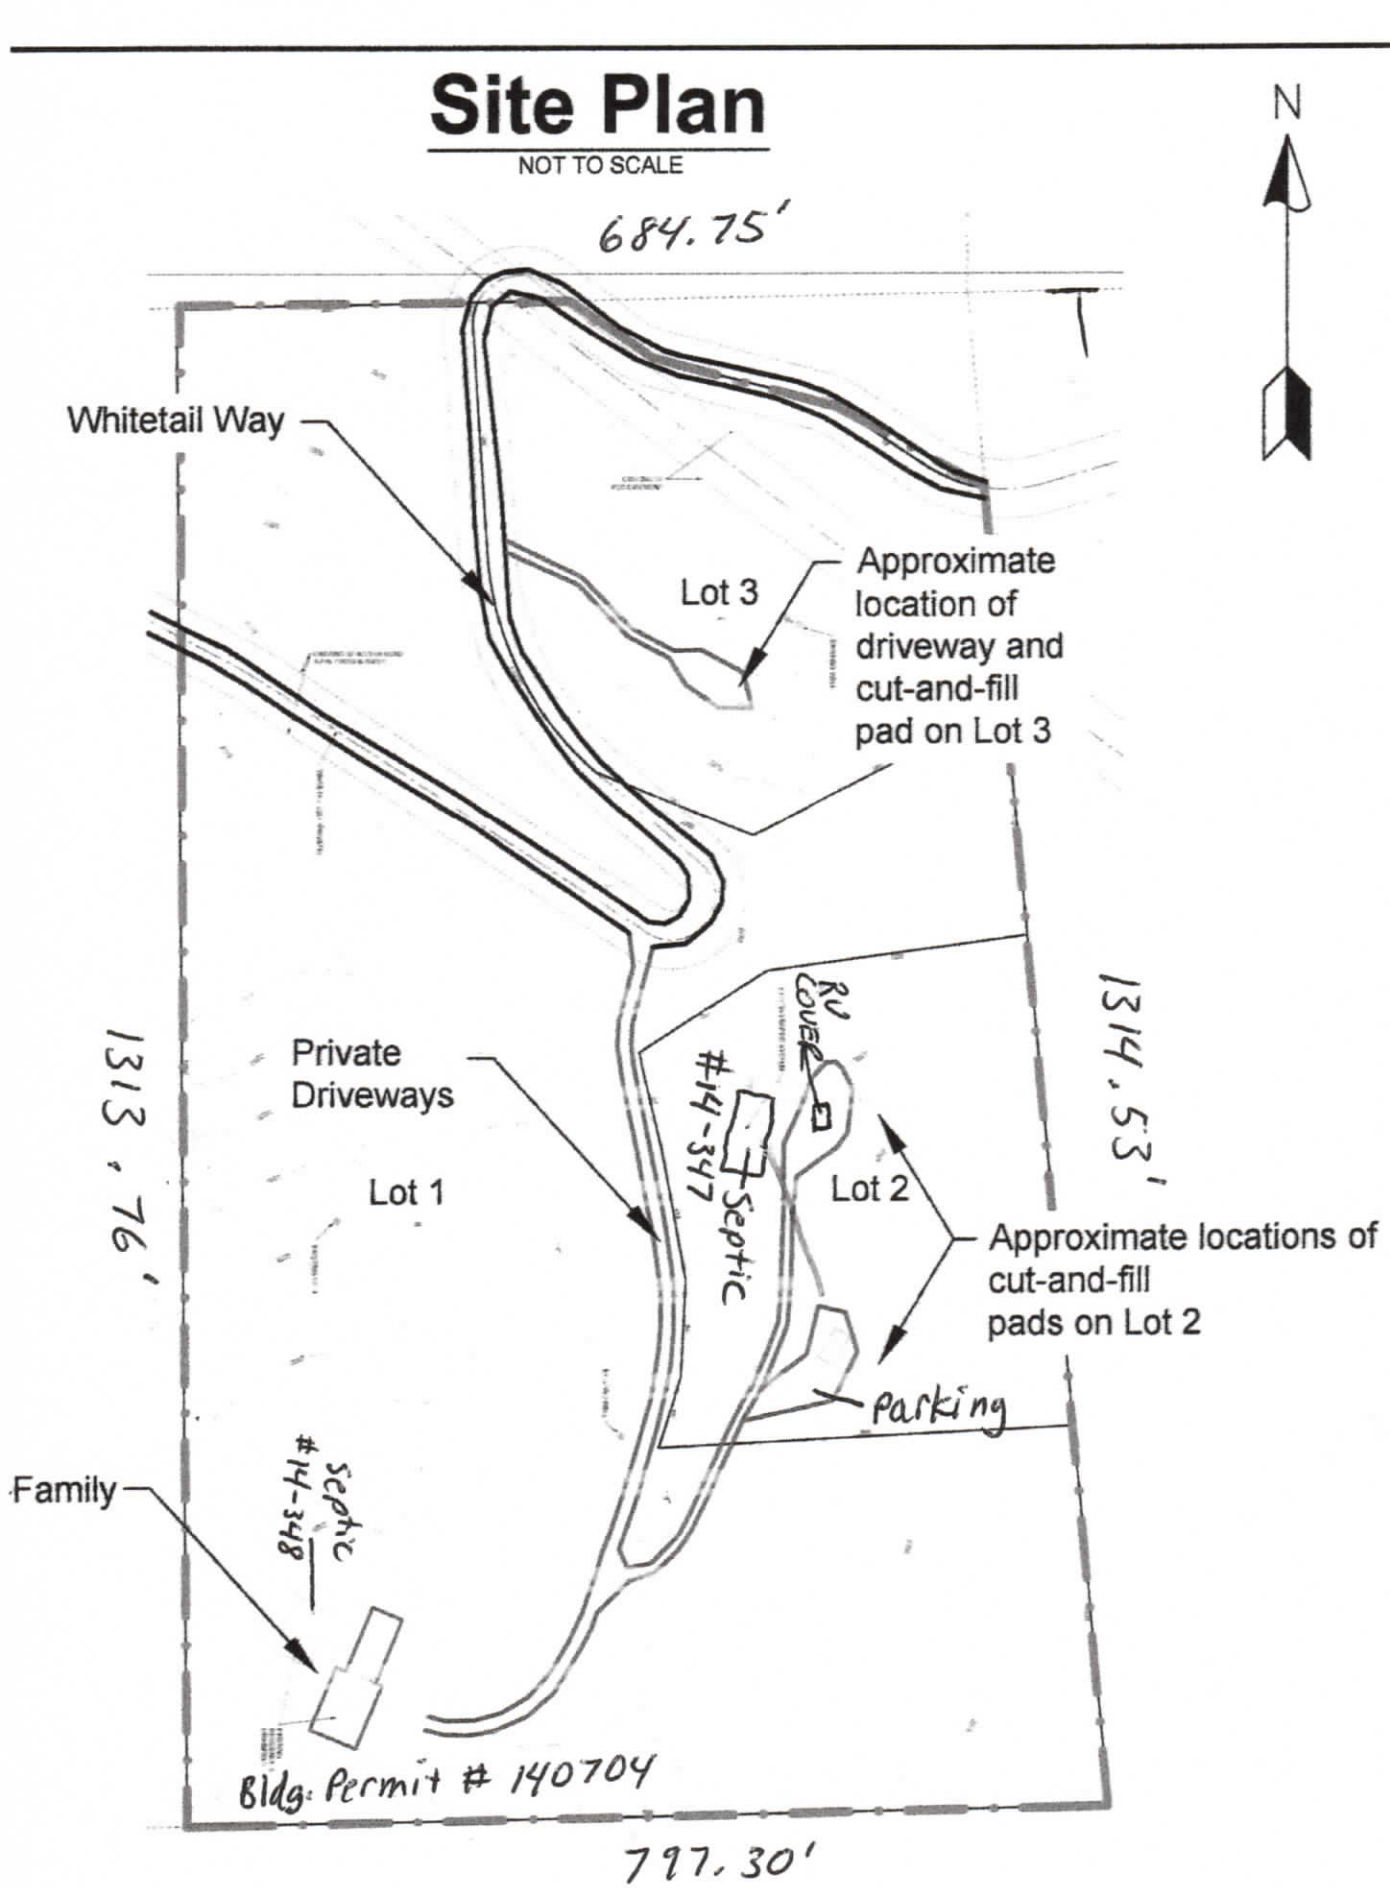
16. The proposed lots are not on any shorelines of the state; therefore, the provisions of the current Shoreline Master Program do not apply.

17. Pursuant to the Washington State Department of Fish and Wildlife, Priority Habitat and Species Maps, there are protected habitat areas (mule deer habitat and shrubsteppe) within the subject property; therefore, the provisions of CCC Chapter 11.78 Fish & Wildlife Overlay District, as related to known habitat areas, do apply.

    17.1. No comment letter was received from the Department of Fish and Wildlife; however, with the proposed open space management plan (Exhibit B), the open space tract ensures that the existing habitats on the subject property would remain in an undisturbed state.

18. There are no wetlands on or adjacent to the subject property; therefore, the provisions of the CCC Chapter 11.80 Wetland Areas Overlay Districts, do not apply.

19. The proposed lots do not contain flood areas on or adjacent to the property; therefore, the provisions of the CCC Chapter 11.84 Frequently Flooded Areas Overlay Districts, do not apply.



20. The proposed lots are within an area identified by Chelan County as containing highly erodible soils; therefore, the provisions of the CCC Chapter 11.86, Geologically Hazardous Areas Overlay District, do apply.

    20.1. An Engineering Geologic Hazard Assessment, dated October 16, 2023, was prepared by Nelson Geotechnical Associates, Inc for the proposed Short Plat. This evaluation found that the subject property meets the classification of "No Risk" and is not a Geologically Hazardous Area in accordance with the definitions and provisions of Chapter 11.86 and any future proposed development should not adversely affect geologic conditions as long as all recommendations are followed, which include:

To: Susan Dretke
Subject: Re: Comprehensive Plan Map Amendment

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

A. Consistency with the Growth Management Act (Chapter 36.70A RCW)

The proposal is consistent with the goals of the Growth Management Act (GMA) because it:

- Maintains rural character consistent with lands outside the UGA.
- Does not introduce urban-level densities or services.
- Allows orderly, low-density rural development.
- Utilizes individual well and septic systems, consistent with rural infrastructure standards.

The proposed RR5 designation remains a rural classification and does not promote urban sprawl or premature extension of urban services.

B. Consistency with Chelan County Comprehensive Plan Goals and Policies

The proposed amendment supports Comprehensive Plan goals by:

- Promoting efficient and logical rural land division.
- Maintaining large-lot rural residential development.
- Supporting housing opportunities consistent with rural land use policies.
- Preserving rural character while allowing reasonable property use.

Reducing the minimum lot size from 10 acres to 5 acres remains fully consistent with rural land use objectives and does not introduce incompatible densities.

C. Compliance with Comprehensive Plan Land Use Designation/Siting Criteria

The 21.6-acre parcel is physically suitable for division into RR5-sized lots. The property:

- Meets minimum acreage thresholds under RR5.
- Is capable of accommodating individual wells and septic systems.
- Has legal access via Whitetail Way.
- Does not require urban utilities or infrastructure expansion.

The site is appropriate in size, location, and physical characteristics to support the proposed designation.

D. Consistency with Capital Facilities and Transportation Elements

The proposal does not require expansion of public capital facilities.

- Water will be provided by individual wells.
- Wastewater will be managed by on-site septic systems.
- Access is existing and adequate.
- Traffic generation from potential RR5 parcels will remain consistent with rural residential levels.

The amendment does not conflict with adopted transportation or capital facilities planning.

E. No Adverse Impact to Surrounding Land Uses

The surrounding area consists of rural residential properties and large-acreage parcels. The proposed RR5 designation:

- Maintains rural residential character.
- Does not introduce commercial or industrial uses.
- Preserves compatibility with surrounding properties.

The amendment will not create adverse impacts to neighboring landowners.

F. No Adverse Impact to Resource Lands or Critical Areas

The property is not designated as long-term commercial agricultural, forest, or mineral resource land. The proposed amendment:

- Does not convert designated resource lands.
- Will comply with critical areas regulations at time of development.
- Does not create unavoidable impacts to environmentally sensitive areas.

G. No Adverse Effect on Land Supply

The proposal does not reduce the County's ability to meet projected rural land needs. Instead, it allows modest rural residential density consistent with long-term planning policies.

The 21.6-acre parcel remains rural in character and continues to support low-density development consistent with rural land supply projections.

H. Serves the Public Interest

The proposed amendment serves the public interest by:

- Allowing reasonable and economically viable use of private property.
- Supporting rural housing opportunities.
- Maintaining public health and safety through compliance with well and septic standards.
- Preserving rural character outside the UGA.

For these reasons, the proposed Comprehensive Plan Map Amendment from RR10 to RR5 meets the criteria of Chelan County Code 14.14.060(1).

Please let me know if additional information is needed to complete the review.

Thanks,
Shawn Sanderson

Hi-

We've received the application, however, it looks as if you're missing responses to the following:

- Pursuant to Chelan County Code, Section 14.14.060 (1), Amendment review criteria for comprehensive plan maps, urban growth area and county-adopted plans, shall be comply with the following: 1. General Review Criteria. Proposed amendments to the Chelan County comprehensive plan maps and county-adopted city comprehensive plan maps as these plans relate to the unincorporated portions of each city's urban growth area (UGA) must meet the following criteria:

- A. The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies; and,

- B. The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies; and,

- C. The amendment complies with comprehensive plan land use designation/siting criteria; and,

- D. The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended; and,

- E. The amendment does not adversely affect the surrounding land uses; and,

- F. The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated; and,

- G. The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan; and,

- H. The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

SEPA[1] Environmental Checklist

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

A. Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**
   Sanderson Short Plat
2. **Name of applicant:**
   Shawn & DeAnne Sanderson
3. **Address and phone number of applicant and contact person:**
   172 Whitetail Way Chelan, WA 98816, Shawn S. (509) 860-8649
4. **Date checklist prepared:**
   Feb 2026
5. **Agency requesting checklist:**
   Chelan County
6. **Proposed timing of schedule (including phasing, if applicable):**
   ASAP
7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**
   Our eventual goal is to change zoning from current RR10 to RR5.
8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.** Parcel was approved for Cluster Short Plat NO SP 2023-409
9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**
   Open in ground swimming pool permit BP 250540 To be finished in the Spring.
10. **List any government approvals or permits that will be needed for your proposal, if known.**
    Comprehensive Plan Amendment, re zone, Short Plat approval.
11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)** Trying to have flexibility to sell off a few acres of our property to help cover our rapidly rising property taxes.
12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section,**
    21.65 acres @ 172 Whitetail Way Chelan, Parcel # 282234410100

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**
Rolling hills

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**
25 - 30% in a couple smaller areas.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.** 12" - 36" well draining topsoil on top of decomposed granite and solid granite under decomposed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.** No. Nelson Geotechnical has done 3 site visits & reports for various projects starting in 2014. most recently in 2025.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**
3 - Flat areas have been cut out of hilly areas to access well heads, build an ADU.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**
If precaution is taken groundwater absorbs very quickly in large grass & brush areas.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**
No plans at this time for more impervious surfaces.

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**
We annually clean out ditches and add rock & gravel to control erosion.

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**
No plans of further construction at this time.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.** No nearby emissions or odors we're aware of.

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**
No emissions would occur as part of this approval.

3. Water

Find help answering water questions[5]

a. **Surface:**
Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.** There is no surface water, streams etc anywhere on or near our property.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**
No water nearby.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**
No wetlands or surface water on our parcel.

---

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air
[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**
   No surface water.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.** Not in 100-year floodplain.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**
   NO discharges of waste materials to surface water would occur.

b. **Ground:**
   Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**
   We have 4 wells on our property but only one is active for exsisting residence + ADU.
2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.** We have 2 permitted septic systems on our property and 2 approved site evaluations for future.

c. **Water Runoff (including stormwater):**

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.** Any rain or snow melt runs into ditches which disperse in large well draining grass fields. No other water sources nearby.
2. **Could waste materials enter ground or surface waters? If so, generally describe.**
   NO waste materials or surface water present.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.** Not at this time.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

d. **Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:**

No surface, ground, or runoff water impacts would occur as a direct result of this approval.

4. Plants

Find help answering plants questions

a. **Check the types of vegetation found on the site:**

- ☐ **deciduous tree: alder, maple, aspen, other**
- ☒ **evergreen tree: fir, cedar, pine, other**
- ☒ **shrubs**
- ☒ **grass**
- ☐ **pasture**
- ☐ **crop or grain**
- ☐ **orchards, vineyards, or other permanent crops.**
- ☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**
- ☐ **water plants: water lily, eelgrass, milfoil, other**
- ☐ **other types of vegetation**

b. **What kind and amount of vegetation will be removed or altered?**

None at this time or in the near future.

c. **List threatened and endangered species known to be on or near the site.**

No endangered species on or near the site.

d. **Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.** We've tried to leave as much natural landscape around our buildings except for fire buffer.

e. **List all noxious weeds and invasive species known to be on or near the site.**

We try to remove - Dalmation toadflax, Russian knapweed

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include: Hawks, crows, songbirds.
Deer, coyote.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:** Nope

b. List any threatened and endangered species known to be on or near the site.
Not aware of any threatned or endangered on or nearby.

c. Is the site part of a migration route? If so, explain.
No migration route.

d. Proposed measures to preserve or enhance wildlife, if any.
Mostly natural landscape, deer visit close to our house.

e. List any invasive animal species known to be on or near the site.
Starlings

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. No additional energy needs at this time.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe. wouldn't affect any future solar on or nearby.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.
"Green Building", solar panels.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe. Not that we're aware of.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

1. **Describe any known or possible contamination at the site from present or past uses.** None as far as we know.

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**
No hazardous chemicals/conditions nearby.

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.** only gas, oil, propane.

4. **Describe special emergency services that might be required.**
Wildland Fire protection.

5. **Proposed measures to reduce or control environmental health hazards, if any.**
Future silt fences, straw, limiting to normal construction hours.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?** Very quiet, occasional tractors, mowing, animals.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**
None at this time or in the near future.

3. **Proposed measures to reduce or control noise impacts, if any:**
Standard work hours.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**
Currently in its natural state around exsisting structures.

b. **Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have**
Not forest land. No irrigation so probably never farmed.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?
Never had farm or forest tax breaks

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**
No farming or forestry nearby.

c. **Describe any structures on the site.** Single family home & seperate ADU. Garden shed, chicken coop, open sided tractor & hay storage.

d. **Will any structures be demolished? If so, what?**
No demolishing.

e. **What is the current zoning classification of the site?** RR10

f. **What is the current comprehensive plan designation of the site?** Rural Residential

g. **If applicable, what is the current shoreline master program designation of the site?**
No shoreline.

h. **Has any part of the site been classified as a critical area by the city or county? If so, specify.** No critical areas.

i. **Approximately how many people would reside or work in the completed project?**
No additional people at this time.

j. **Approximately how many people would the completed project displace?**
Nobody will be displaced.

k. **Proposed measures to avoid or reduce displacement impacts, if any.**
Nobody will be displaced.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**
Plan to remain residential

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**
No forest, no agriculture

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**
No added residences at this time.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**
No units will be eliminated.

c. **Proposed measures to reduce or control housing impacts, if any:**
Low density housing.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**
No proposed structures at this time.

b. **What views in the immediate vicinity would be altered or obstructed?**
No proposed structures at this time.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**
No proposed structures at this time.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?** No lighting or windows will be added at this time.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?** No added lighting at this time.

c. **What existing off-site sources of light or glare may affect your proposal?**
None

d. **Proposed measures to reduce or control light and glare impacts, if any:**
Dim or downward facing outside lights to protect night sky.

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?** Numerous recreational opportunities are readily available nearby including hiking, biking, boating, swimming.

b. **Would the proposed project displace any existing recreational uses? If so, describe.** No existing recreational uses would be displaced.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:** Recreation won't be impacted.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.** No old buildings etc.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.** No evidence of any Indian or historic use.

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.** No potential impacts to cultural or historical.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.** No disturbance would occur.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**
Access to property is Boyd Rd off Hwy 150. Right on Purtteman Gulch, rt on Chelan Ranch rd. Right on Whitetail Way.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?** Hwy 150 at intersection of Boyd rd has a public bus stop aprox 1.6 miles away.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**
No, rural gravel & dirt road access.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**
No water, rail, or air transportation nearby.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**
No extra traffic in this proposal.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**
No agriculture or forestry work nearby.

g. **Proposed measures to reduce or control transportation impacts, if any:**
No transportation impacts at this time.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.** Not at this time.

---

[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services

b. Proposed measures to reduce or control direct impacts on public services, if any.
No added impacts in the near future.

16. Utilities

Find help answering utilities questions[18]

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed. Nothing proposed at this time.

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

X Shawn Sanderson

Type name of signee: Shawn Sanderson

Position and agency/organization: owner

Date submitted: 2/25/26

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities
[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature
[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?** Increased but minimal impervious surfaces.

   - **Proposed measures to avoid or reduce such increases are:**
     Smaller foot print homes with less impervious surfaces.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**
   Deer, coyote & birds adapt well.

   - **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**
     Natural (native) landscape.

3. **How would the proposal be likely to deplete energy or natural resources?**
   Each parcel would potentially have a residence.

   - **Proposed measures to protect or conserve energy and natural resources are:**
     "Green building" practices, solar panels.

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**
   No sensitive areas on our parcel.

   - **Proposed measures to protect such resources or to avoid or reduce impacts are:**
     No sensitive areas.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**
   No shorline on our parcel.

   - **Proposed measures to avoid or reduce shoreline and land use impacts are:**
     No shorline on or near our parcel.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?** None at this time or near future.

   - **Proposed measures to reduce or respond to such demand(s) are:**
     This proposal will not directly increase transportation demand.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal is consistent with Ecology requirements.

- ❑ Plat Alteration or Vacation
- ❑ Short Plat
- ❑ Variance (zoning or critical areas)
- ❑ Zoning Change-Text Amendment/ Map Amendment
- ❑ Critical Area Determination
- ❑ Other: _____

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership (Title holder signature is required on all applications. Properties being purchased on a Real Estate Contract require title holder signature.)
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

Going through the lengthy process to eventually re zone from current RR10 to RR5. Currently have an approved cluster short plat SP 2023-409.

☐ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): _____
2. Is the subject property located within an Urban Growth Area (UGA)? ☒ No ☐ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: residential
   South: residential
   East: residential
   West: residential
4. What is the current use of the property? Single residence & ADU
5. Sanitation Disposal: ☐ N/A ☒ Septic Permit ☐ Sewer District: _____
6. Water Source: ☐ N/A ☒ Single Private Well ☐ Shared Private Well ☐ Group B
   ☐ Public Water Supplier: _____
7. Irrigation Water:
   ☒ N/A ☐ Yes (Private) ☐ Yes (Public) Irrigation District/Purveyor: NA
8. Fire District: Chelan School District: Chelan
9. Power Service: Chelan County PUD
10. Are there critical areas or critical area buffers on the property? NO
    ☐ Airport Overlay: _____
    ☐ Aquifer Recharge Area (see attached)
    ☐ Floodplain / Floodway _____
    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ☐ Alluvial Fan (250') ☐ Known Historic Hazardous Area (250') ☐ Slopes > 40% (250')
    ☐ Erosive soils (on-site) ☐ Landslide ☐ Snow Avalanche (500')
    ☐ Habitat/Riparian Area, protected species/area: _____
    ☐ Streams / Waterbodies: _____ ☐Shoreline Environment Designation: _____
    ☐ Drainage or Seasonal Stream: _____ ☐ Wetland, if so what category: _____
    ☐ Cultural or Archeological: _____
11. Will landfill be required? ☒ No ☐ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☒ No ☐ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    NA
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    NA

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:
NA -> No projects planned at this time.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☒ No ☐ Yes, please list:

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Pursuant to Chelan County Code (CCC), Section 11.82.030: An applicant seeking to develop property which requires a development permit, not otherwise exempted from the requirements of this chapter, shall submit with the application this certified statement, which lists criteria (5)(A) through (5)(D), (6), and (7) as set forth in CCC, Section 11.82.040 and indicate whether the criteria apply or do not apply to the site or development.

*****Any development application that fails to contain this statement or fails to indicate whether any one of the criteria apply or do not apply shall be rejected and only accepted upon resubmission of the completed statement. "Unknown" or similar responses will not be accepted.*****

If the administrator determines the development meets one or more of criteria (1) through (4) of CCC, Section 11.82.040, or if the administrator determines the development meets criterion (5) of CCC, Section 11.82.040 and the applicant indicates the development meets one or more of criteria (5)(A) through (5)(D), or if the applicant indicates the development meets one or more of criteria (6) or (7) of CCC, Section 11.82.040, the development shall require a hydrogeologic evaluation as described in CCC, Section 11.82.050. If the development has a medium or high vulnerability rating, the development shall be subject to the performance standards of CCC, Section 11.82.060.

If the administrator determines that criteria (1) through (5) of CCC, Section 11.82.040 do not apply to the development and an applicant's statement asserts that criteria (6) and (7) of CCC, Section 11.82.040 do not apply to the development, the administrator will accept the statement and proceed with the permitting or approval process, except if the administrator has or obtains information prior to the permit or approval being finalized, which clearly establishes the applicant's statement is incorrect. In which case, the applicant will be advised in writing of the inconsistent information and advised to either (A) provide an amended statement adding the evaluation criteria as being applicable and complete a hydrogeologic evaluation of the development pursuant to CCC, Section 11.82.050, or (B) present sufficient countering information clearly establishing that the basis for the department's concern is incorrect. If the applicant selects to proceed under (B), upon receipt of the applicant's information, the administrator shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the administrator.

EVALUATION CRITERIA:

The applicant is required to determine the vulnerability rating for any development permit, not otherwise exempted, and meets any one of the criteria below. Please check the boxes that apply to your project:

- ☐ 1.Within a wellhead protection area designated under WAC 246-290-135
- ☐ 2. Within a critical aquifer recharge area mapped and identified by a qualified groundwater professional
- ☐ 3. Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act
- ☐ 4. Within an area established for special protection pursuant to a groundwater management program, Chapters 90.44, 90.48, and 90.54 RCW, and Chapters 173-100 and 173-200 WAC
- ☐ 5. The site contains highly permeable soils, which include types 1 ,2 and 3 under WAC 246-272A-0220, Table V or soils mapped by US Department of Agriculture Natural Resources Conservation Service as having saturated hydraulic conductivity (Ksat) classification of Moderately High or identified as Hydrologic Soil Group "A" and:
  - ☐ A. The site will be utilized for hazardous substance (defined in Chapter 70.105 RCW) processing, storage or handling in applications or quantities larger than is typical of household use; or
  - ☐ B. The site is currently or will be utilized for commercial or industrial activities listed in the US Environmental Protection Agency's Potential Sources of Drinking Water Contamination Index that can be found in Appendix A to Department of Ecology's Critical Aquifer Recharge Area Guidance Document; or
  - ☐ C. The development involves a major subdivision and includes present or future plans to construct dwelling units that will not be connected to a public sewer system and any of the lots are less than one net acre in size; or
  - ☐ D. The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds four thousand square feet;
- ☐ 6. The proposed use is as a commercial feedlot, landfill, junkyard, salvage yard, or auto wrecking yard, or
- ☐ 7. The site will be used for above ground application of sewage or sludge.

Development proposals for a single-family residential dwelling, accessory dwelling unit, or accessory building that is connected to a public sewer system or has a septic permit approved by the Chelan-Douglas health district shall be exempt from hydrogeologic evaluation under CCC, Section 11.82.050.

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

- ❑ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.
- ❑ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).
- ❑ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.
- ❑ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.
- ❑ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.
- ❑ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

SS _____ 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

SS _____ 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

SS _____ 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

SS _____ 4. Additional permit applications and approvals may be necessary to conduct specific activities.

SS _____ 5. Application fees are non-refundable, except when approve by the Board.

SS _____ 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

File(s) No. _____

SS ____ 7. Chelan County is hereby given consent to enter the property(ies) listed above.

SS ____ 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

SS ____ 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

SS ____ 10. I certify that this application has been made with the consent of the lawful property owner(s).

SS ____ 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

SS ____ 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

Owner Signature: Shawn Sanderson **Place:** 172 Whitetail Way **Date:** 2/24/26

Print Name: Shawn Sanderson

Owner/Applicant/Agent Signature: _____ **Place:** _____ **Date:** _____

Print Name: _____

Owner/Applicant/Agent Signature: _____ **Place:** _____ **Date:** _____

Print Name: _____

Property owners:
Shawn and DeAnne Sanderson
172 Whitetail Way
Chelan, WA 98816
509-860-8649
Parcel number: 282234410100

i.) Statement of What is Proposed and Why

The applicants (Shawn and DeAnne Sanderson) propose to amend the Comprehensive Plan land use designation and zoning classification from Rural Residential/Resource (RR10) to Rural Residential (RR5) for the 21.65-acre parcel located at 172 Whitetail Way, Chelan, WA. The requested amendment would allow a 4-lot residential short plat consistent with a 5-acre minimum lot size.

The purpose of the amendment is to allow modest rural residential development that aligns with the property's size, existing access, surrounding parcel patterns, and long-term residential character of the area. The proposed 4-lot configuration maintains rural densities while making efficient use of the land.

We have a conditional cluster short plat (SP 2023-409) approval for three lots on our 21.65 acres. However, the open space requirements were significantly restrictive for us to be able to enjoy the freedom of our property. We feel re-zoning to RR5 will enable us to fulfil our potential objectives without the restrictions.of the open space requirements.

ii.) Consistency with the Washington Growth Management Act (RCW 36.70A)

The proposed amendment is consistent with the goals of the Washington State Growth Management Act (GMA), including:

Urban Growth Goal: The property is outside the UGA and the proposed density remains rural in character, consistent with GMA provisions that allow limited rural development that does not create urban-level densities.
Rural Element: The proposal maintains rural character, preserves open space between homes, and avoids sprawl.
Housing Goal: The amendment modestly increases rural housing supply in a manner consistent with existing development patterns.
Property Rights Goal: The proposal allows reasonable use of private property consistent with surrounding land uses.

The requested RR5 zoning maintains low-density rural development and does not create urban services demand.

The RR10 and RR5 guidelines are relatively the same other than the lot size.

iii.) Compliance with Comprehensive Plan Goals and Policies

The amendment supports Chelan County Comprehensive Plan goals related to:

* Encouraging rural development at appropriate densities.
* Maintaining rural character and open space.
* Supporting incremental housing opportunities.
* Ensuring compatibility with surrounding land uses.

The proposal reflects the established rural residential pattern in the surrounding area and does not introduce incompatible uses.

iv.) Compliance with Land Use Designation Criteria

The requested RR5 designation is appropriate because:

* The parcel size (21.65 acres) comfortably supports four 5-acre lots.
* The property is currently used for single-family residential purposes.
* No critical areas or designated resource lands are present.
* The proposed density is consistent with surrounding lot sizes.
* The change does not require extension of urban-level infrastructure.

v.) Consistency with Capital Facilities and Transportation Elements

The proposed 4-lot short plat will not create significant demand on capital facilities.

Transportation: Access is available via Whitetail Way. Traffic generated by four rural residential lots is minimal and consistent with rural road standards.
Schools and Emergency Services: The increase of three additional dwelling units (beyond the existing home) will have negligible impact on public services.
Utilities: Development will rely on individual wells and septic systems consistent with rural service levels.

The proposal does not require expansion of public infrastructure beyond rural service standards.

vi.) Surrounding Land Uses and Appropriateness of Amendment

Surrounding properties are characterized by rural residential uses and large-lot development patterns. The proposed RR5 designation remains consistent with:

* Existing rural residential character
* Similar lot sizes in the vicinity
* Low-density residential use

The proposed amendment is more appropriate than the existing RR10 zoning because it better reflects the parcel's size and allows logical subdivision while maintaining rural spacing and open character. Two of the adjoining properties are 5 acres and 5.88 acres.

Vii.) Impact on Resource Lands or Critical Areas

The property does not contain or impact designated agricultural, forest, or mineral resource lands. No mapped critical areas (wetlands, fish and wildlife habitat, geologic hazards, or shorelines) are present on the site.

The proposal therefore does not negatively impact long-term commercial resource lands or environmentally sensitive areas.

viii.) Impact on 20-Year Land Supply

The amendment provides a modest increase in rural residential land supply by allowing up to four lots rather than limiting development to two under RR10 standards.

This incremental increase supports projected population growth while maintaining rural densities and does not undermine the County's allocation of growth to Urban Growth Areas.

ix.) Public Health, Safety, and Welfare

The proposed amendment serves the public interest by:

* Allowing orderly rural development consistent with established patterns.
* Supporting housing availability in Chelan County.
* Maintaining rural character and low-density design.
* Avoiding impacts to critical areas or resource lands.
* Ensuring development remains within rural infrastructure capacity.
* Added parcels would contribute more to the local tax base, helping fund schools, fire districts, etc.

The proposal balances private property rights with community planning goals and promotes the health, safety, and welfare of the public as a whole.

Site Conditions Review Letter
172 Whitetail Way Short Plat
Chelan County, Washington
NGA File No. 910214

Dear Shawn:

This letter documents our review of the current site conditions and prior geotechnical recommendations for **the property located at 172 Whitetail Way near Chelan in Chelan County, Washington**. The Chelan County parcel number is **282234410100**.

INTRODUCTION

The project area consists of an irregularly shaped 21.65-acre parcel that slopes to the north, west, and southeast along a historical drainage swale that runs downhill to the northwest. We previously prepared an engineering geologic assessment letter for the property titled **"Engineering Geologic Assessment – Parcel No. 282234410100 – Chelan County, Washington," dated October 16, 2014.** A new site plan titled, "Proposed Cluster Short Plat," dated October 28, 2022, and prepared by Erlandsen Inc. of East Wenatchee, Washington, was provided to us, showing the locations of two new lots to be created in the proposed short plat, attached as Figure 1. Per Chelan County Code Section 11.86.070 (3), geologic hazard assessments are valid for a period of five years and may acquire a five-year extension, provide the qualified professional submits a letter stating the validity of the existing document. Accordingly, we have been requested to review the current site conditions and provide an extension letter.

SITE CONDITIONS

We visited the site on June 17, 2024, to assess any changes in the surrounding land use activity or site conditions. In our prior geologic hazard assessment letter, the site is described as an undeveloped parcel surrounded by large-tract rural residential properties. As described in our previous letter, a single-family residence was constructed in the southwest corner of the property. Other changes that have occurred on the site include the grading of three small pads and associated driveways on the western half of the

property, as indicated on the attached Site Plan (Figure 1). These pads appear to be primarily constructed though cutting into the hillside; however, some amount of undocumented fill may be present at the downhill edges of the pads.

Other than the construction of the primary single-family residence in the southwest corner of the property and cut-and-fill grading associated with preparing the three building pads, there appears to be no significant change to the geologic conditions within the site or nearby vicinity since our October 16, 2014 letter. As such, it is our opinion that the previous geologic hazard assessment letter, dated October 16, 2014, remains valid and applicable to the site conditions and project plans.

USE OF THIS LETTER

This letter was prepared for **Shawn Sanderson** and his agents, for use in planning and budgeting the above-referenced project only. Within the limitations of scope, schedule, and budget, our services have been performed in accordance with generally accepted geotechnical engineering practices in effect in this area at the time this letter was prepared. No other warranty, expressed or implied, is made. Our observations, findings, and opinions are a means to identify and reduce the inherent risks to the owner.

o-o-o

We trust this letter should satisfy your needs at this time. Please contact us if you have any questions or require additional services.

Sincerely,

NELSON GEOTECHNICAL ASSOCIATES, INC.

Attachment: One Figure

Property owners:
Shawn and DeAnne Sanderson
172 Whitetail Way
Chelan, WA 98816
509-860-8649
Parcel number: 282234410100

i.) Statement of What is Proposed and Why

The applicants (Shawn and DeAnne Sanderson) propose to amend the Comprehensive Plan land use designation and zoning classification from Rural Residential/Resource (RR10) to Rural Residential (RR5) for the 21.65-acre parcel located at 172 Whitetail Way, Chelan, WA. The requested amendment would allow a 4-lot residential short plat consistent with a 5-acre minimum lot size.

The purpose of the amendment is to allow modest rural residential development that aligns with the property's size, existing access, surrounding parcel patterns, and long-term residential character of the area. The proposed 4-lot configuration maintains rural densities while making efficient use of the land.

We have a conditional cluster short plat (SP 2023-409) approval for three lots on our 21.65 acres. However, the open space requirements were significantly restrictive for us to be able to enjoy the freedom of our property. We feel re-zoning to RR5 will enable us to fulfil our potential objectives without the restrictions.of the open space requirements.

ii.) Consistency with the Washington Growth Management Act (RCW 36.70A)

The proposed amendment is consistent with the goals of the Washington State Growth Management Act (GMA), including:

Urban Growth Goal: The property is outside the UGA and the proposed density remains rural in character, consistent with GMA provisions that allow limited rural development that does not create urban-level densities.
Rural Element: The proposal maintains rural character, preserves open space between homes, and avoids sprawl.
Housing Goal: The amendment modestly increases rural housing supply in a manner consistent with existing development patterns.
Property Rights Goal: The proposal allows reasonable use of private property consistent with surrounding land uses.

The requested RR5 zoning maintains low-density rural development and does not create urban services demand.

The RR10 and RR5 guidelines are relatively the same other than the lot size.

iii.) Compliance with Comprehensive Plan Goals and Policies

The amendment supports Chelan County Comprehensive Plan goals related to:

* Encouraging rural development at appropriate densities.
* Maintaining rural character and open space.
* Supporting incremental housing opportunities.
* Ensuring compatibility with surrounding land uses.

The proposal reflects the established rural residential pattern in the surrounding area and does not introduce incompatible uses.

iv.) Compliance with Land Use Designation Criteria

The requested RR5 designation is appropriate because:

* The parcel size (21.65 acres) comfortably supports four 5-acre lots.
* The property is currently used for single-family residential purposes.
* No critical areas or designated resource lands are present.
* The proposed density is consistent with surrounding lot sizes.
* The change does not require extension of urban-level infrastructure.

v.) Consistency with Capital Facilities and Transportation Elements

The proposed 4-lot short plat will not create significant demand on capital facilities.

Transportation: Access is available via Whitetail Way. Traffic generated by four rural residential lots is minimal and consistent with rural road standards.
Schools and Emergency Services: The increase of three additional dwelling units (beyond the existing home) will have negligible impact on public services.
Utilities: Development will rely on individual wells and septic systems consistent with rural service levels.

The proposal does not require expansion of public infrastructure beyond rural service standards.

vi.) Surrounding Land Uses and Appropriateness of Amendment

Surrounding properties are characterized by rural residential uses and large-lot development patterns. The proposed RR5 designation remains consistent with:

* Existing rural residential character
* Similar lot sizes in the vicinity
* Low-density residential use

The proposed amendment is more appropriate than the existing RR10 zoning because it better reflects the parcel's size and allows logical subdivision while maintaining rural spacing and open character. Two of the adjoining properties are 5 acres and 5.88 acres.

Vii.) Impact on Resource Lands or Critical Areas

The property does not contain or impact designated agricultural, forest, or mineral resource lands. No mapped critical areas (wetlands, fish and wildlife habitat, geologic hazards, or shorelines) are present on the site.

The proposal therefore does not negatively impact long-term commercial resource lands or environmentally sensitive areas.

viii.) Impact on 20-Year Land Supply

The amendment provides a modest increase in rural residential land supply by allowing up to four lots rather than limiting development to two under RR10 standards.

This incremental increase supports projected population growth while maintaining rural densities and does not undermine the County's allocation of growth to Urban Growth Areas.

ix.) Public Health, Safety, and Welfare

The proposed amendment serves the public interest by:

* Allowing orderly rural development consistent with established patterns.
* Supporting housing availability in Chelan County.
* Maintaining rural character and low-density design.
* Avoiding impacts to critical areas or resource lands.
* Ensuring development remains within rural infrastructure capacity.
* Added parcels would contribute more to the local tax base, helping fund schools, fire districts, etc.

The proposal balances private property rights with community planning goals and promotes the health, safety, and welfare of the public as a whole.

SCHEDULE OF EXCLUSIONS FROM COVERAGE OF THIS GUARANTEE

1. Except to the extent that specific assurances are provided in Schedule A of this Guarantee, the Company assumes no liability for loss or damage by reason of the following:
   (a) Defects, liens, encumbrances, adverse claims or other matters against the title, whether or not shown by the public records.
   (b) (1) Taxes or assessments of any taxing authority that levies taxes or assessments on real property; or, (2) Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not the matters excluded under (1) or (2) are shown by the records of the taxing authority or by the public records.
   (c) (1) Unpatented mining claims; (2) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (3) water rights, claims or title to water, whether or not the matters excluded under (1), (2) or (3) are shown by the public records.
2. Notwithstanding any specific assurances which are provided in Schedule A of this Guarantee, the Company assumes no liability for loss or damage by reason of the following:
   (a) Defects, liens, encumbrances, adverse claims or other matters affecting the title to any property beyond the lines of the land expressly described in the description set forth in Schedule (A), (C) or in Part 2 of this Guarantee, or title to streets, roads, avenues, lanes, ways or waterways to which such land abuts, or the right to maintain therein vaults, tunnels, ramps or any structure or improvements; or any rights or easements therein, unless such property, rights or easements are expressly and specifically set forth in said description.
   (b) Defects, liens, encumbrances, adverse claims or other matters, whether or not shown by the public records; (1) which are created, suffered, assumed or agreed to by one or more of the Assureds; (2) which result in no loss to the Assured; or (3) which do not result in the invalidity or potential invalidity of any judicial or non-judicial proceeding which is within the scope and purpose of the assurances provided.
   (c) The identity of any party shown or referred to in Schedule A.
   (d) The validity, legal effect or priority of any matter shown or referred to in this Guarantee.

GUARANTEE CONDITIONS AND STIPULATIONS

1. Definition of Terms.
The following terms when used in the Guarantee mean:
   (a) the "Assured": the party or parties named as the Assured in this Guarantee, or on a supplemental writing executed by the Company.
   (b) "land": the land described or referred to in Schedule (A)(C) or in Part 2, and improvements affixed thereto which by law constitute real property. The term "land" does not include any property beyond the lines of the area described or referred to in Schedule (A)(C) or in Part 2, nor any right, title, interest, estate or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways.
   (c) "mortgage": mortgage, deed of trust, trust deed, or other security instrument.
   (d) "public records": records established under state statutes at Date of Guarantee for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge.
   (e) "date": the effective date.

2. Notice of Claim to be Given by Assured Claimant.
An Assured shall notify the Company promptly in writing in case knowledge shall come to an Assured hereunder of any claim of title or interest which is adverse to the title to the estate or interest, as stated herein, and which might cause loss or damage for which the Company may be liable by virtue of this Guarantee. If prompt notice shall not be given to the Company, then all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall in no case prejudice the rights of any Assured unless the Company shall be prejudiced by the failure and then only to the extent of the prejudice.

3. No Duty to Defend or Prosecute.
The Company shall have no duty to defend or prosecute any action or proceeding to which the Assured is a party, notwithstanding the nature of any allegation in such action or proceeding.

4. Company's Option to Defend or Prosecute Actions; Duty of Assured Claimant to Cooperate.
Even though the Company has no duty to defend or prosecute as set forth in Paragraph 3 above:
   (a) The Company shall have the right, at its sole option and cost, to institute and prosecute any action or proceeding, interpose a defense, as limited in (b), or to do any other act which in its opinion may be necessary or desirable to establish the title to the estate or interest as stated herein, or to establish the lien rights of the Assured, or to prevent or reduce loss or damage to the Assured. The Company may take any appropriate action under the terms of this Guarantee, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this Guarantee. If the Company shall exercise its rights under this paragraph, it shall do so diligently.
   (b) If the Company elects to exercise its options as stated in Paragraph 4(a) the Company shall have the right to select counsel of its choice (subject to the right of such Assured to object for reasonable cause) to represent the Assured and shall not be liable for and will not pay the fees of any other counsel, nor will the Company pay any fees, costs or expenses incurred by an Assured in the defense of those causes of action which allege matters not covered by this Guarantee.
   (c) Whenever the Company shall have brought an action or interposed a defense as permitted by the provisions of this Guarantee, the Company may pursue any litigation to final determination by a court of competent jurisdiction and expressly reserves the right, in its sole discretion, to appeal from an adverse judgment or order.
   (d) In all cases where this Guarantee permits the Company to prosecute or provide for the defense of any action or proceeding, an Assured shall secure to the Company the right to so prosecute or provide for the defense of any action or proceeding, and all appeals therein, and permit the Company to use, at its option, the name of such Assured for this purpose. Whenever requested by the Company, an Assured, at the Company's expense, shall give the Company all

reasonable aid in any action or proceeding, securing evidence, obtaining witnesses, prosecuting or defending the action or lawful act which in the opinion of the Company may be necessary or desirable to establish the title to the estate or interest as stated herein, or to establish the lien rights of the Assured. If the Company is prejudiced by the failure of the Assured to furnish the required cooperation, the Company's obligations to the Assured under the Guarantee shall terminate.

5. Proof of Loss or Damage.

In addition to and after the notices required under Section 2 of these Conditions and Stipulations have been provided to the Company, a proof of loss or damage signed and sworn to by the Assured shall be furnished to the Company within ninety (90) days after the Assured shall ascertain the facts giving rise to the loss or damage. The proof of loss or damage shall describe the matters covered by this Guarantee which constitute the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage. If the Company is prejudiced by the failure of the Assured to provide the required proof of loss or damage, the Company's obligation to such assured under the Guarantee shall terminate. In addition, the Assured may reasonably be required to submit to examination under oath by any authorized representative of the Company and shall produce for examination, inspection and copying, at such reasonable times and places as may be designated by any authorized representative of the Company, all records, books, ledgers, checks, correspondence and memoranda, whether bearing a date before or after Date of Guarantee, which reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Assured shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect and copy all records, books, ledgers, checks, correspondence and memoranda in the custody or control of a third party, which reasonably pertain to the loss or damage. All information designated as confidential by the Assured provided to the Company pursuant to this Section shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Assured to submit for examination under oath, produce other reasonably requested information or grant permission to secure reasonably necessary information from third parties as required in the above paragraph, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this Guarantee to the Assured for that claim.

6. Options to Pay or Otherwise Settle Claims: Termination of Liability.

In case of a claim under this Guarantee, the Company shall have the following additional options:

(a) To Pay or Tender Payment of the Amount of Liability or to Purchase the Indebtedness.

The Company shall have the option to pay or settle or compromise for or in the name of the Assured any claim which could result in loss to the Assured within the coverage of this Guarantee, or to pay the full amount of this Guarantee or, if this Guarantee is issued for the benefit of a holder of a mortgage or a lienholder, the Company shall have the option to purchase the indebtedness secured by said mortgage or said lien for the amount owing thereon, together with any costs, reasonable attorneys' fees and expenses incurred by the Assured claimant which were authorized by the Company up to the time of purchase.

Such purchase, payment or tender of payment of the full amount of the Guarantee shall terminate all liability of the Company hereunder. In the event after notice of claim has been given to the Company by the Assured the Company offers to purchase said indebtedness, the owner of such indebtedness shall transfer and assign said indebtedness, together with any collateral security, to the Company upon payment of the purchase price.

Upon the exercise by the Company of the option provided for in Paragraph (a) the Company's obligation to the Assured under this Guarantee for the claimed loss or damage, other than to make the payment required in that paragraph, shall terminate, including any obligation to continue the defense or prosecution of any litigation for which the Company has exercised its options under Paragraph 4, and the Guarantee shall be surrendered to the Company for cancellation.

(b) To Pay or Otherwise Settle With Parties Other Than the Assured or With the Assured Claimant.

To pay or otherwise settle with other parties for or in the name of an Assured claimant any claim assured against under this Guarantee, together with any costs, attorneys' fees and expenses incurred by the Assured claimant which were authorized by the Company up to the time of payment and which the Company is obligated to pay.

Upon the exercise by the Company of the option provided for in Paragraph (b) the Company's obligation to the Assured under this Guarantee for the claimed loss or damage, other than to make the payment required in that paragraph, shall terminate, including any obligation to continue the defense or prosection of any litigation for which the Company has exercised its options under Paragraph 4.

7. Determination and Extent of Liability.

This Guarantee is a contract of Indemnity against actual monetary loss or damage sustained or incurred by the Assured claimant who has suffered loss or damage by reason of reliance upon the assurances set forth in this Guarantee and only to the extent herein described, and subject to the Exclusions From Coverage of This Guarantee.

The liability of the Company under this Guarantee to the Assured shall not exceed the least of:

(a) the amount of liability stated in Schedule A or in Part 2;

(b) the amount of the unpaid principal indebtedness secured by the mortgage of an Assured mortgagee, as limited or provided under Section 6 of these Conditions and Stipulations or as reduced under Section 9 of these Conditions and Stipulations, at the time the loss or damage assured against by this Guarantee occurs, together with interest thereon; or

(c) the difference between the value of the estate or interest covered hereby as stated herein and the value of the estate or interest subject to any defect, lien or encumbrance assured against by this Guarantee.

8. Limitation of Liability.

(a) If the Company establishes the title, or removes the alleged defect, lien or encumbrance, or cures any other matter assured against by this Guarantee in a reasonably diligent manner by

any method, including litigation and the completion of any appeals therefrom, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused thereby.

(b) In the event of any litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom, adverse to the title, as stated herein.

(c) The Company shall not be liable for loss or damage to any Assured for liability voluntarily assumed by the Assured in settling any claim or suit without the prior written consent of the Company.

9. Reduction of Liability or Termination of Liability.

All payments under this Guarantee, except payments made for costs, attorneys' fees and expenses pursuant to Paragraph 4 shall reduce the amount of liability pro tanto.

10. Payment of Loss.

(a) No payment shall be made without producing this Guarantee for endorsement of the payment unless the Guarantee has been lost or destroyed, in which case proof of loss or destruction shall be furnished to the satisfaction of the Company.

(b) When liability and the extent of loss or damage has been definitely fixed in accordance with these Conditions and Stipulations, the loss or damage shall be payable within thirty (30) days thereafter.

11. Subrogation Upon Payment or Settlement.

Whenever the Company shall have settled and paid a claim under this Guarantee, all right of subrogation shall vest in the Company unaffected by any act of the Assured claimant.

The Company shall be subrogated to and be entitled to all rights and remedies which the Assured would have had against any person or property in respect to the claim had this Guarantee not been issued. If requested by the Company, the Assured shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect this right of subrogation. The Assured shall permit the Company to sue, compromise or settle in the name of the Assured and to use the name of the Assured in any transaction or litigation involving these rights or remedies.

If a payment on account of a claim does not fully cover the loss of the Assured the Company shall be subrogated to all rights and remedies of the Assured after the Assured shall have recovered its principal, interest, and costs of collection.

12. Arbitration.

Unless prohibited by applicable law, either the Company or the Assured may demand arbitration pursuant to the Title Insurance Arbitration Rules of the American Land Title Association. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Assured arising out of or relating to this Guarantee, any service of the Company in connection with its issuance or the breach of a Guarantee provision or other obligation. All arbitrable matters when the Amount of Liability is $2,000,000 or less shall be arbitrated at the option of either the Company or the Assured. All arbitrable matters when the amount of liability is in excess of $2,000,000 shall be arbitrated only when agreed to by both the Company and the Assured. The Rules in effect at Date of Guarantee shall be binding upon the parties. The award may include attorneys' fees only if the laws of the state in which the land is located permits a court to award attorneys' fees to a prevailing party. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court having jurisdiction thereof.

The law of the situs of the land shall apply to an arbitration under the Title Insurance Arbitration Rules.

A copy of the Rules may be obtained from the Company upon request.

13. Liability Limited to This Guarantee; Guarantee Entire Contract.

(a) This Guarantee together with all endorsements, if any, attached hereto by the Company is the entire Guarantee and contract between the Assured and the Company. In interpreting any provision of this Guarantee, this Guarantee shall be construed as a whole.

(b) Any claim of loss or damage, whether or not based on negligence, or any action asserting such claim, shall be restricted to this Guarantee.

(c) No amendment of or endorsement to this Guarantee can be made except by a writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

14. Notices, Where Sent.

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this Guarantee and shall be addressed to the Company at **First American Title Insurance Company, Attn: Claims National Intake Center, 1 First American Way, Santa Ana, California 92707 Claims.NIC@firstam.com Phone: 888-632-1642 Fax: 877-804-7606**

Subdivision Guarantee

ISSUED BY
First American Title Insurance Company

GUARANTEE NUMBER
4260360

Order No.: 4260360 | Liability: $2,000.00 | Fee: $350.00 Tax: $30.80

Name of Assured: Shawn Sanderson

Date of Guarantee: April 14, 2025

The assurances referred to on the face page hereof are:

1. Title is vested in:

   SHAWN P. SANDERSON AND DEANNE M. SANDERSON, HUSBAND AND WIFE

2. That, according to the public records relative to the land described in Schedule C attached hereto (including those records maintained and indexed by name), there are no other documents affecting title to said land or any portion thereof, other than those shown under Record Matters in Schedule B.

3. The following matters are excluded from the coverage of this Guarantee

   A. Unpatented Mining Claims, reservations or exceptions in patents or in acts authorizing the issuance thereof.

   B. Water rights, claims or title to water.

   C. Tax Deeds to the State of Washington.

   D. Documents pertaining to mineral estates.

4. No guarantee is given nor liability assumed with respect to the validity, legal effect or priority of any matter shown herein.

5. This Guarantee is restricted to the use of the Assured for the purpose of providing title evidence as may be required when subdividing land pursuant to the provisions of Chapter 58.17, R.C.W., and the local regulations and ordinances adopted pursuant to said statute. It is not to be used as a basis for closing any transaction affecting title to said property.

6. Any sketch attached hereto is done so as a courtesy only and is not part of any title commitment, guarantee or policy. It is furnished solely for the purpose of assisting in locating the premises and First American expressly disclaims any liability which may result from reliance made upon it.

Recorded:	February 27, 1974
Recording No.:	738250

6. Conditions, notes, easements, provisions and/or encroachments contained or delineated on the face of the Survey recorded under Recording No. 764226.

7. Easement, including terms and provisions contained therein:
   Recording Information: 764227
   For: ingress, egress and utilities

8. Road Improvement and Maintenance Agreement and the terms and conditions thereof:

Between:	Lisa L. Ward, a single person, Violet L. Williams, a single person, Mark Reimers and Karla Reimers, husband and wife
And:	Lois K. Champion, a married woman dealing in her sole and separate property, and Reed Chase and Tuy Van Chase, husband and wife
Recording Information:	2272800

9. Easement, including terms and provisions contained therein:

In Favor Of:	Public Utility District 1 of Chelan County
Purpose:	Electric transmission and/or distribution system
Recorded:	October 15, 2014
Recording No.:	2407720

10. The terms and provisions contained in the document entitled "Declaration of Notice"
    Recorded: October 27, 2014
    Recording No.: 2408197

11. Terms, covenants, conditions, restrictions, easements, boundary discrepancies and encroachments as contained in recorded Lot Line Adjustment (Boundary Line Revisions):
    Recorded: January 23, 2023
    Recording Information: 2577955

12. Rights and liabilities under customary agreement for water right in Lake Chelan Reclamation Irrigation District, including the restriction of the use of said water to irrigation, stock and domestic purposes, the granting of an easement for lateral ditches and pipelines used in connection therewith, and the creation of a lien upon the land for assessments therein.

Informational Notes, if any

First American Title™

Schedule C

Subdivision Guarantee

ISSUED BY
First American Title Insurance Company

GUARANTEE NUMBER
4260360

The land in the County of Chelan, State of Washington, described as follows:

Tract 6, as delineated on survey, recorded September 3, 1976 in Book 3 of surveys, Page 76 and 77, recorded under auditor's File No. 764226, being a portion of the Northwest Quarter of the Southeast Quarter of Section 34, Township 28 North, Range 22 East of the Willamette Meridian, Chelan County, Washington;

Except that portion Commencing at the Northeast corner of said Tract 6; thence with the North line of said Tract 6 South 88°58'25" West a distance of 344.30 feet, more or less, to the centerline of Whitetail Way; thence Southeasterly with the centerline of said Whitetail Way to the East line of said Tract 6; thence with the East line of said Tract 6 North 5°22'37" West 168.93 feet, more or less, to the Point of Beginning.

(also known as Parcel A of boundary Line Adjustment No. 2023-023 recorded January 23, 2023 under auditor's File No. 2577955 in the records of Chelan County.).

Illegal Restrictive Covenants

Please be advised that any provision contained in this document, or in a document that is attached, linked, or referenced in this document, that under applicable law illegally discriminates against a class of individuals based upon personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or any other legally protected class, is illegal and unenforceable by law.

SEPA[1] Environmental Checklist

Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the Supplemental Sheet for Nonproject Actions (Part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

[1] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/Checklist-guidance

A. Background

Find help answering background questions[2]

1. **Name of proposed project, if applicable:**
   Sanderson Short Plat
2. **Name of applicant:**
   Shawn & DeAnne Sanderson
3. **Address and phone number of applicant and contact person:**
   172 Whitetail Way Chelan, WA 98816, Shawn S. (509) 860-8649
4. **Date checklist prepared:**
   Feb 2026
5. **Agency requesting checklist:**
   Chelan County
6. **Proposed timing of schedule (including phasing, if applicable):**
   ASAP
7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**
   Our eventual goal is to change zoning from current RR10 to RR5.
8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.** Parcel was approved for Cluster Short Plat NO SP 2023-409
9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**
   Open in ground swimming pool permit BP 250540 To be finished in the Spring.
10. **List any government approvals or permits that will be needed for your proposal, if known.**
    Comprehensive Plan Amendment, re zone, Short Plat approval.
11. **Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)** Trying to have flexibility to sell off a few acres of our property to help cover our rapidly rising property taxes.
12. **Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section,**
    21.65 acres @ 172 Whitetail Way Chelan, Parcel # 282234410100

[2] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-A-Background

township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

B.Environmental Elements

1. Earth

Find help answering earth questions[3]

a. **General description of the site:**
Rolling hills

Circle or highlight one: Flat, rolling, hilly, steep slopes, mountainous, other:

b. **What is the steepest slope on the site (approximate percent slope)?**
25 - 30% in a couple smaller areas.

c. **What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.** 12" - 36" well draining topsoil on top of decomposed granite and solid granite under decomposed.

d. **Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.** No. Nelson Geotechnical has done 3 site visits & reports for various projects starting in 2014. most recently in 2025.

e. **Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.**
3 - Flat areas have been cut out of hilly areas to access well heads, build an ADU.

f. **Could erosion occur because of clearing, construction, or use? If so, generally describe.**
If precaution is taken groundwater absorbs very quickly in large grass & brush areas.

g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**
No plans at this time for more impervious surfaces.

[3] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-earth

h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any.**
We annually clean out ditches and add rock & gravel to control erosion.

2. Air

Find help answering air questions[4]

a. **What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.**
No plans of further construction at this time.

b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.** No nearby emissions or odors we're aware of.

c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**
No emissions would occur as part of this approval.

3. Water

Find help answering water questions[5]

a. **Surface:**
Find help answering surface water questions[6]

1. **Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.** There is no surface water, streams etc anywhere on or near our property.

2. **Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.**
No water nearby.

3. **Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.**
No wetlands or surface water on our parcel.

---

[4] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-Air
[5] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water
[6] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Surface-water

4. **Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.**
   No surface water.

5. **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.** Not in 100-year floodplain.

6. **Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.**
   NO discharges of waste materials to surface water would occur.

b. **Ground:**
   Find help answering ground water questions[7]

1. **Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.**
   We have 4 wells on our property but only one is active for exsisting residence + ADU.
2. **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals…; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.** We have 2 permitted septic systems on our property and 2 approved site evaluations for future.

c. **Water Runoff (including stormwater):**

1. **Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.** Any rain or snow melt runs into ditches which disperse in large well draining grass fields. No other water sources nearby.
2. **Could waste materials enter ground or surface waters? If so, generally describe.**
   NO waste materials or surface water present.

3. **Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.** Not at this time.

[7] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-3-Water/Environmental-elements-Groundwater

d. **Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:**

No surface, ground, or runoff water impacts would occur as a direct result of this approval.

4. Plants

Find help answering plants questions

a. **Check the types of vegetation found on the site:**

- ☐ **deciduous tree: alder, maple, aspen, other**
- ☒ **evergreen tree: fir, cedar, pine, other**
- ☒ **shrubs**
- ☒ **grass**
- ☐ **pasture**
- ☐ **crop or grain**
- ☐ **orchards, vineyards, or other permanent crops.**
- ☐ **wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other**
- ☐ **water plants: water lily, eelgrass, milfoil, other**
- ☐ **other types of vegetation**

b. **What kind and amount of vegetation will be removed or altered?**

None at this time or in the near future.

c. **List threatened and endangered species known to be on or near the site.**

No endangered species on or near the site.

d. **Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.** We've tried to leave as much natural landscape around our buildings except for fire buffer.

e. **List all noxious weeds and invasive species known to be on or near the site.**

We try to remove - Dalmation toadflax, Russian knapweed

5. Animals

Find help answering animal questions[8]

a. **List any birds and other animals that have been observed on or near the site or are known to be on or near the site.**

Examples include: Hawks, crows, songbirds.
Deer, coyote.

[8] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-5-Animals

- **Birds: hawk, heron, eagle, songbirds, other:**
- **Mammals: deer, bear, elk, beaver, other:**
- **Fish: bass, salmon, trout, herring, shellfish, other:** Nope

b. List any threatened and endangered species known to be on or near the site.
Not aware of any threatned or endangered on or nearby.

c. Is the site part of a migration route? If so, explain.
No migration route.

d. Proposed measures to preserve or enhance wildlife, if any.
Mostly natural landscape, deer visit close to our house.

e. List any invasive animal species known to be on or near the site.
Starlings

6. Energy and natural resources

Find help answering energy and natural resource questions[9]

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. No additional energy needs at this time.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe. wouldn't affect any future solar on or nearby.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.
"Green Building", solar panels.

7. Environmental health

Health Find help with answering environmental health questions[10]

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe. Not that we're aware of.

[9] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-6-Energy-natural-resou
[10] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-7-Environmental-health

1. **Describe any known or possible contamination at the site from present or past uses.** None as far as we know.

2. **Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.**
No hazardous chemicals/conditions nearby.

3. **Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.** only gas, oil, propane.

4. **Describe special emergency services that might be required.**
Wildland Fire protection.

5. **Proposed measures to reduce or control environmental health hazards, if any.**
Future silt fences, straw, limiting to normal construction hours.

b. Noise

1. **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?** Very quiet, occasional tractors, mowing, animals.

2. **What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?**
None at this time or in the near future.

3. **Proposed measures to reduce or control noise impacts, if any:**
Standard work hours.

8. Land and shoreline use

Find help answering land and shoreline use questions[11]

a. **What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.**
Currently in its natural state around exsisting structures.

b. **Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have**
Not forest land. No irrigation so probably never farmed.

[11] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-8-Land-shoreline-use

not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?
Never had farm or forest tax breaks

1. **Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?**
No farming or forestry nearby.

c. **Describe any structures on the site.** Single family home & seperate ADU. Garden shed, chicken coop, open sided tractor & hay storage.

d. **Will any structures be demolished? If so, what?**
No demolishing.

e. **What is the current zoning classification of the site?** RR10

f. **What is the current comprehensive plan designation of the site?** Rural Residential

g. **If applicable, what is the current shoreline master program designation of the site?**
No shoreline.

h. **Has any part of the site been classified as a critical area by the city or county? If so, specify.** No critical areas.

i. **Approximately how many people would reside or work in the completed project?**
No additional people at this time.

j. **Approximately how many people would the completed project displace?**
Nobody will be displaced.

k. **Proposed measures to avoid or reduce displacement impacts, if any.**
Nobody will be displaced.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.**
Plan to remain residential

m. **Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:**
No forest, no agriculture

9. Housing

Find help answering housing questions[12]

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.**
No added residences at this time.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.**
No units will be eliminated.

c. **Proposed measures to reduce or control housing impacts, if any:**
Low density housing.

10. Aesthetics

Find help answering aesthetics questions[13]

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**
No proposed structures at this time.

b. **What views in the immediate vicinity would be altered or obstructed?**
No proposed structures at this time.

c. **Proposed measures to reduce or control aesthetic impacts, if any:**
No proposed structures at this time.

11. Light and glare

Find help answering light and glare questions[14]

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?** No lighting or windows will be added at this time.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?** No added lighting at this time.

c. **What existing off-site sources of light or glare may affect your proposal?**
None

d. **Proposed measures to reduce or control light and glare impacts, if any:**
Dim or downward facing outside lights to protect night sky.

[12] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-9-Housing
[13] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-10-Aesthetics
[14] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-11-Light-glare

12. Recreation

Find help answering recreation questions

a. **What designated and informal recreational opportunities are in the immediate vicinity?** Numerous recreational opportunities are readily available nearby including hiking, biking, boating, swimming.

b. **Would the proposed project displace any existing recreational uses? If so, describe.** No existing recreational uses would be displaced.

c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:** Recreation won't be impacted.

13. Historic and cultural preservation

Find help answering historic and cultural preservation questions[15]

a. **Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.** No old buildings etc.

b. **Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.** No evidence of any Indian or historic use.

c. **Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.** No potential impacts to cultural or historical.

d. **Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.** No disturbance would occur.

[15] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-13-Historic-cultural-p

14. Transportation

Find help with answering transportation questions[16]

a. **Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.**
Access to property is Boyd Rd off Hwy 150. Right on Purtteman Gulch, rt on Chelan Ranch rd. Right on Whitetail Way.

b. **Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?** Hwy 150 at intersection of Boyd rd has a public bus stop aprox 1.6 miles away.

c. **Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).**
No, rural gravel & dirt road access.

d. **Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.**
No water, rail, or air transportation nearby.

e. **How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?**
No extra traffic in this proposal.

f. **Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.**
No agriculture or forestry work nearby.

g. **Proposed measures to reduce or control transportation impacts, if any:**
No transportation impacts at this time.

15. Public services

Find help answering public service questions[17]

a. **Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.** Not at this time.

---

[16] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-B-Environmental-elements/Environmental-elements-14-Transportation
[17] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-15-public-services

b. Proposed measures to reduce or control direct impacts on public services, if any.
No added impacts in the near future.

16. Utilities

Find help answering utilities questions[18]

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed. Nothing proposed at this time.

C.Signature

Find help about who should sign[19]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

X Shawn Sanderson

Type name of signee: Shawn Sanderson

Position and agency/organization: owner

Date submitted: 2/25/26

D.Supplemental sheet for nonproject actions

Find help for the nonproject actions worksheet[20]

Do not use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

[18] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-b-environmental-elements/environmental-elements-16-utilities
[19] https://ecology.wa.gov/Regulations-Permits/SEPA/Environmental-review/SEPA-guidance/SEPA-checklist-guidance/SEPA-Checklist-Section-C-Signature
[20] https://ecology.wa.gov/regulations-permits/sepa/environmental-review/sepa-guidance/sepa-checklist-guidance/sepa-checklist-section-d-non-project-actions

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. **How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?** Increased but minimal impervious surfaces.

   - **Proposed measures to avoid or reduce such increases are:**
     Smaller foot print homes with less impervious surfaces.

2. **How would the proposal be likely to affect plants, animals, fish, or marine life?**
   Deer, coyote & birds adapt well.

   - **Proposed measures to protect or conserve plants, animals, fish, or marine life are:**
     Natural (native) landscape.

3. **How would the proposal be likely to deplete energy or natural resources?**
   Each parcel would potentially have a residence.

   - **Proposed measures to protect or conserve energy and natural resources are:**
     "Green building" practices, solar panels.

4. **How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?**
   No sensitive areas on our parcel.

   - **Proposed measures to protect such resources or to avoid or reduce impacts are:**
     No sensitive areas.

5. **How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?**
   No shorline on our parcel.

   - **Proposed measures to avoid or reduce shoreline and land use impacts are:**
     No shorline on or near our parcel.

6. **How would the proposal be likely to increase demands on transportation or public services and utilities?** None at this time or near future.

   - **Proposed measures to reduce or respond to such demand(s) are:**
     This proposal will not directly increase transportation demand.

7. **Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**

The proposal is consistent with Ecology requirements.

CHELAN COUNTY
DEPARTMENT OF COMMUNITY DEVELOPMENT
316 WASHINGTON STREET, SUITE 301
WENATCHEE, WA 98801
(509) 667-6225

TO: Chelan County Board of County Commissioners
FROM: Chelan County Community Development
HEARING DATE: November 10, 2026
FILE NUMBER: CPA 26-067 WA DNR

RECOMMENDED MOTION

The Chelan County Planning Commission, at their duly advertised public hearing on September 23, 2026 made a motion to recommend denial (Attachment 1) of CPA 26-067 requested comprehensive plan map amendment from Rural Residential/Resource 20 (RR20) to Rural Residential/Resource 10 (RR10).

GENERAL INFORMATION

Applicant	Washington State Department of Natural Resources
Planning Commission Notice of Hearing Published	October 3, 2026
Planning Commission Hearing	October 14, 2026
Board of County Commissioners Hearing	November 10, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance was issued under WAC 107-11-340 on April 30, 2026. The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The decision was made after a review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

Comments submitted by the Chelan Douglas Health District indicated they have no objections to approval of the proposal.
The Colville Tribe provided comment indicating that they will be reviewing any future development permits.

The Chelan County Fire Marshal's office has indicated they have no comments regarding the proposal.

Public Comment:
Comments were received from two neighboring property owners. Their comments are summarized below. The full text of these comments has been entered in the file and can be found in Attachment 2.

Ivey, Bert and Meilyn – Opposes the approval of the application due to the following reasons: impact on neighborhood character, traffic and safety, environmental and infrastructure concerns.

Farnus, Bob – Questioned why DNR is rezoning public land property, and what it has to do with the CDLT trying to access this land in connection with the Lookout trail system above Ohme Gardens.

60-Day Notice
Sent to Department of Commerce July 20, 2026.

PROJECT DESCRIPTION – CPA 26-067 WA DNR
The applicant is requesting a comprehensive plan map amendment to change the designation of the 119-acre property from Rural Residential/Resource 20 (RR20) to Rural Residential/Resource 10 (RR10). The property is located northwest of the City of Wenatchee's urban growth area and is undeveloped. Burch Mountain Road bisects the parcel in a north/south orientation in the western portion of the site. The site is also known as parcel number 28-22-34-410-100.

COMPREHENSIVE PLAN
Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan policies are relevant to the proposed request:

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Policy RE 1.3: Establish a variety of rural land use designations that would accommodate a wide variety of rural uses and densities consistent with the County's rural character.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

REVIEW CRITERIA
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 1) Urban Growth, 2) Reduce Sprawl, 3) Transportation, 4) Housing, and 5) Economic Development. The Growth Management Act (GMA) encourages the provision of a variety of densities in order to accommodate projected growth while maintaining the rural character.

The requested map amendment to RR10 would provide for the site to be divided to provide additional single-family residential lots. The Chelan County Comprehensive Plan purpose for the RR10 zone is "to allow for rural development, forestry and agricultural uses consistent with the rural character and rural development provisions outlined in the goals and policies of the comprehensive plan. These areas can function as areas of transition between resource lands and areas of more intense rural or urban development." Properties in the immediate vicinity of the parcel are zoned RR2.5, RV, RS and RR10

Conclusion: The proposal would be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area.

Conclusion: The proposal would be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the RR10 should be located in areas that are predominantly rural in character. Soil characteristics, steep slopes or other physical constraints to development may be present.
Significant areas of undeveloped open space may exist.". Although the subject parcel is located in a rapidly developing area, it is characterized by the steep slopes of Burch Mountain which may limit future development.

Conclusion: The amendment would comply with comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel is served by Burch Mountain Road, a public road.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are zoned a wide variety of both urban and rural zones and are developed with single family residences.

Conclusion: The designation of the site from RR20 to RR10 would not adversely affect the surrounding area.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The RR10 designation is considered compatible with dispersed single-family residence, farms or forestry uses.

Conclusion: The amendment would not adversely affect resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow development of additional single-family residential lots. The total number of new lots would be dependent upon the method of subdivision proposed.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026, pursuant to RCW 36.70A.106.
6. The location and characteristics are consistent with Chelan County Comprehensive Plan designation for Rural Residential/Resource 5 as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

2026 Comprehensive Plan Map Amendment
Staff Report

TO:	Chelan County Planning Commission
FROM:	Chelan County Community Development
HEARING DATE:	October 14, 2026
FILE NUMBER:	CPA 26-067 WA Department of Natural Resources

RECOMMENDED MOTION

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

A. Re-designation of the site from Rural Residential/Resource 20 (RR20) to Rural Residential/Resource 10 (RR10) would comply with applicable Chelan County goals and policies for LAMIRD's pursuant to the findings of fact and conclusions of law cited below.

GENERAL INFORMATION

Planning Commission Workshop	August 26, 2026
Notice of Application to Surrounding Properties	March 4, 2026
Planning Commission Notice of Hearing Published	October 3, 2026
Planning Commission Hearing on	October 14, 2026
60-day State agency review	July 20, 2026
SEPA Determination	April 30, 2026

SEPA Environmental Review

A Determination of Non-Significance (DNS) was issued under WAC 197-11-340(2) for CPA 26-067 on April 30, 2026 (Attachment 1). The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030 (2)(c). The decision was made after review of a completed environmental checklist and other information on file with the lead agency.

Agency Comments:

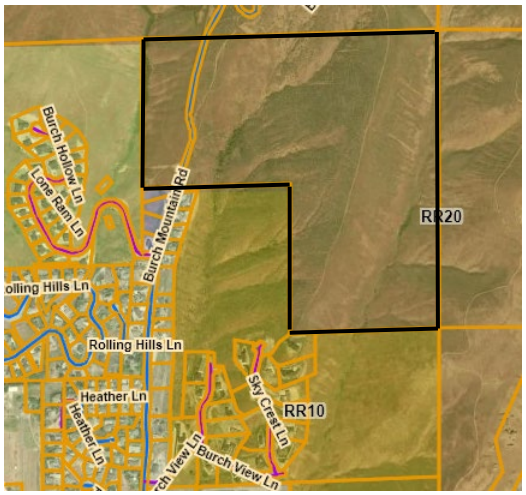
Comments submitted by the Chelan Douglas Health District indicated they have no objections to approval of the proposal.

The Colville Tribe provided comment indicating that they will be reviewing any future development permits.

The Chelan County Fire Marshal's office has indicated they have no comments regarding the proposal.

Public Comment:

Comments were received from two neighboring property owners. Their comments are summarized below. The full text of these comments has been entered in the file and can be found in Attachment 2.



Ivey, Bert and Meilyn – Opposes the approval of the application due to the following reasons: impact on neighborhood character, traffic and safety, environmental and infrastructure concerns.

Farnus, Bob – Questioned why DNR is rezoning public land property, and what it have to do with the CDLT trying to access this land in connection with the Lookout trail system above Ohme Gardens.

PROJECT DESCRIPTION – CPA 26-067 WA DNR

Proposal: The applicant is requesting a comprehensive plan map amendment to change the designation of the 119-acre property from Rural Residential/Resource 20 (RR20) to Rural Residential/Resource 10 (RR10). The property is located northwest of the City of Wenatchee's urban growth area and is undeveloped. Burch Mountain Road bisects the parcel in a north/south orientation in the western portion of the site. The site is also known as parcel number 28-22-34-410-100.

Chelan County Land Use Designation

Density: The Rural Residential/Resource 20 designation allows for one lot per 20 acres. The Rural Residential/Resource 10 designation would allow for approximately twice the density or one lot per 10 acres.

Comprehensive Plan

Chelan County conducts an annual concurrent review of proposals to amend the Comprehensive Plan. The Plan represents the long-term vision for future land uses and development. Applicants must demonstrate the merits of the requested change as being consistent with adopted goals and policies.

The following Comprehensive Plan policies are relevant to the proposed request:

Goal LU 1: Residential designations shall provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations shall provide for a variety of residential opportunities to serve a full range of income levels.

Goal RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Policy RE 1.3: Establish a variety of rural land use designations that would accommodate a wide variety of rural uses and densities consistent with the County's rural character.

Goal RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Goal H 1: Encourage the availability of affordable housing to all economic segments of the population of the county.

Goal H 2: Promote a variety of residential densities and housing types.

Review Criteria
The map amendment was analyzed based on information provided by the applicant or when readily available, within existing County resources. Agency and public comment also play a role in understanding how the amendment may advance the Comprehensive Plan goals and policies and how it may serve the general public's interest.

Pursuant to Chelan County Code (CCC) Section 14.14.060(1), the following general review criteria were used to evaluate the proposed amendment:

(A) The proposal is consistent with the goals of the Growth Management Act (Chapter 36.70A RCW), and any applicable county-wide planning policies.

Finding of Fact: The Growth Management Act under RCW 36.70A.020 contains planning goals that include, but are not limited to, 1) Urban Growth, 2) Reduce Sprawl, 3) Transportation, 4) Housing, and 5) Economic Development. The Growth Management Act (GMA) encourages the provision of a variety of densities in order to accommodate projected growth while maintaining the rural character.

The requested map amendment to RR10 would provide for the site to be divided to provide additional single-family residential lots. The Chelan County Comprehensive Plan purpose for the RR10 zone is "to allow for rural development, forestry and agricultural uses consistent with the rural character and rural development provisions outlined in the goals and policies of the comprehensive plan. These areas can function as areas of transition between resource lands and areas of more intense rural or urban development." Properties in the immediate vicinity of the parcel are zoned RR2.5, RV, RS and RR10

Conclusion: The proposal would be consistent with the goals of the Growth Management Act and the applicable county-wide planning policies.

(B) The amendment is consistent with or supports the Chelan County comprehensive plan goals and policies.

Finding of Fact: The proposed land use change would support the comprehensive plan goals and policies which encourage a variety of housing densities in the rural area.

Conclusion: The proposal would be consistent with the GMA goals and with County-wide Planning Policies.

(C) The amendment complies with comprehensive plan land use designation/siting criteria.

Finding of Fact: The comprehensive plan states that the RR10 should be located in areas that are predominantly rural in character. Soil characteristics, steep slopes or other physical constraints to development may be present.
Significant areas of undeveloped open space may exist.". Although the subject parcel is located in a rapidly developing area, it is characterized by the steep slopes of Burch Mountain which may limit future development.

Conclusion: The amendment would comply with comprehensive plan land use designation/siting criteria.

(D) The amendment is supported by and consistent with the capital facility element and the transportation element. Amendments that would alter existing provisions of the capital facilities or transportation elements shall demonstrate why existing provisions should not continue to be in effect or why existing provisions should be amended.

Finding of Fact: The subject parcel is served by Burch Mountain Road, a public road.

Conclusion: No change in the Capital Facility Element or Transportation Element has been identified. The proposed amendment would be supported by and consistent with the existing capital facility element and transportation element.

(E) The amendment does not adversely affect the surrounding land uses.

Finding of Fact: The areas surrounding the subject property are zoned a wide variety of both urban and rural zones and are developed with single family residences.

Conclusion: The designation of the site from RR20 to RR10 would not adversely affect the surrounding area.

(F) The amendment does not adversely affect lands designated as resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

Finding of Fact: The RR10 designation is considered compatible with dispersed single-family residence, farms or forestry uses.

Conclusion: The amendment would not adversely affect resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.

(G) The amendment does not adversely affect the supply of land for various purposes which is available to accommodate projected growth over the twenty-year planning period covered by the comprehensive plan.

Finding of Fact: The proposed amendment would allow development of additional single-family residential lots. The total number of new lots would be dependent upon the method of subdivision proposed.

Conclusion: The proposed amendment would not have an adverse impact on projected growth; and would not contribute to the possibility of sprawl.

(H) The proposed amendment serves the interests of both the applicant and the general public including public health, safety, and welfare.

Finding of Fact: The proposed amendment could increase the availability of additional housing at rural densities.

Conclusion: The proposed amendment could provide additional housing opportunities while retaining the rural character of the area.

FINDINGS OF FACT

1. Chelan County adopted Title 14, Development Permit Procedures and Administration outlining provisions relating to the amendment of the Comprehensive Plan consistent with RCW 36.70A. The County followed the procedures required for amendment of the Comprehensive Plan.
2. Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and Chelan County Code outline provisions relating to the adoption and amendments to the Comprehensive Plan. The County used the applicable guidelines and regulatory review criteria for each amendment.
3. RCW 36.70A.210 requires that the Comprehensive Plan be consistent with the provisions of the adopted County-Wide Planning Policies.
4. The requirements of RCW 43.21C, the State Environmental Policy Act, and WAC 197-11, SEPA Rules, have been satisfied. To comply with the requirements of the State Environmental Policy Act for environmental review of a non-project action, the County, as lead agency issued a Determination of Non-significance for the application on April 30, 2026.
5. The required State agency review with the Department of Commerce (COM) and other State agencies was initiated on July 20, 2026 (Attachment 3), pursuant to RCW 36.70A.106.
6. The location and characteristics of the site which is the subject this request for a Comprehensive Plan Map Amendment are consistent with Chelan County Comprehensive Plan as outlined in this staff report.

CONCLUSIONS OF LAW

1. The amendment to the Chelan County Comprehensive Plan would be consistent with the requirements of the Growth Management Act (RCW 36.70A), Chelan County Comprehensive Plan and County-Wide Planning Policies.
2. The amendment would comply with the Comprehensive Plan designation/siting criteria.
3. The amendment would not adversely affect the surrounding land uses.
4. The amendment would not adversely affect designated resource lands of long-term commercial significance or designated critical areas in ways that cannot be mitigated.
5. The amendment would not adversely affect the supply of land for various purposes available to accommodate projected growth over the twenty-year planning period covered by the Comprehensive Plan.
6. Reviewing agencies and the general public were given an opportunity to comment on the proposed amendments.
7. The amendments are consistent with Chelan County Code Title 14 Development Permit Procedures and Administration.
8. The requirements of RCW 43.21C, the State Environmental Policy Act and WAC 197-11, SEPA Rules have been satisfied.

STAFF Finding

The Chelan County Planning Commission may make a motion to recommend approval or denial of the proposed Comprehensive Plan Amendments to the Chelan County Board of County Commissioners, pursuant to Chelan County Code Section 14.10.050. Suggested Findings of Fact and Conclusions of Law, which may be modified, are included in this staff report. Staff finds:

The Comprehensive Plan Amendment to change the subject property's land use designation from Rural Residential/Resource 10 (RR10) to Rural Residential/Resource 5 (RR5), given file number CPA 2026-063, based upon the findings of fact and conclusions of law contained would comply with relevant adopted county goals and policies.

Subject:	Opposition to Land Use Designation Change - Project File No: CPA 26-067
Date:	Thursday, March 26, 2026 11:33:02 AM

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Ms. Dretke,

I am writing as the owner of 111 Rolling Hills Lane, Wenatchee to express my strong opposition to the proposed re-designation of Parcel Number: 232016100000 from RR20 to RR10 as discussed in Project File No: CPA 26-067.

As a nearby property owner, I believe this change will have a significant negative impact on our community, specifically:

Impact on Neighborhood Character: This area consists primarily of single-family homes. Introducing a change in the designation of this land will allow for future sales and development. This development will significantly decrease the quality of life, privacy, and safety for existing residents.

Traffic and Safety: The proposed development will increase traffic on Burch Mountain Road, which is already unsuitable for high-volume or commercial vehicles. This poses a danger to families and children.

Environmental/Infrastructure Concerns: With recent developments off Burch Mountain Road, we have already lost significant land protection for steppe zone and mule deer migration. This change in designation would lead to future loss of these carefully balanced environments.

I request that the Chelan County Community Development Committee rejects this rezoning request from the Washington State Department of Natural Resources to maintain the integrity of our neighborhood and our foothill habitats.

Sincerely,

Bert and Meilyn Ivey

Hello Susan,

This consultation is in response to CPA 26-067 WA DNR, SEPA Determination of Non-significance. This land use change allows an additional dwelling unit to be constructed with the ratio of 1 residence per 10 acres. If and when there is a planned development we look forward to reviewing those future plans.

On behalf of Amelia Stanger, Interim Tribal Historic Preservation Officer.

RE: Washington DNR (CPA 26-067) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 20 (RR20) to Rural Residential/Resource 10 (RR10). The subject property is located off Burch Mountain Rd., Wenatchee, WA 98801 (county tax parcel: 232016100000)

As proposed, I have no objections to further approval of this project.

- Parcel is vacant with no existing septic or drinking water records.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

As I searched through all of the paperwork, I'm still lookin for motive.

#1 Why does DNR care what the zoning is on public land unless it has future plans?

#2 What does this have to do with the Chelan-Douglas Land Trust tying to access this land in connection with the Lookout trail system above Ohme Gardens?

Thanks for your help,
Bob Farnus
(One of the Mountain Vista Estates owners adjoining the DNR property)

Washington State Department of Commerce

THANK YOU

We have received your amendment submission. Please allow 1-3 business days for review. Please keep the Submittal ID as your receipt and for any future questions. We will also send an email receipt to all contacts listed in the submittal.

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-signif icance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

Subject: Notice of Application for CPA 26-067 WA DNR - Chelan County Dept. of Community Development
Attachments: CPA 26-067 WA DNR NOA.pdf; Affidavit of posting NOA.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding WA DNR's property, File# CPA 26-067. This notice should be posted on the subject property by March 12, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days, starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, Susan Dretke, at 509-667-6225 or Susan.Dretke@co.chelan.wa.us.

Thank you,

Jessica Thompson

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-063 Sanderson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 10 (RR10) to Rural Residential/Resource 5 (RR5). 172 Whitetail Way, Chelan, WA 98816 APN: 28-22-34-410-100.

CPA 26-067 WA DNR - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 20 (RR20) to Rural Residential/Resource 10 (RR10). Unassigned. Wenatchee. WA 98801; APN: 23-20-16-100-000.

On March 12, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 26, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

Date: March 12, 2026

DETERMINATION OF APPLICATION STATUS

Pursuant to Title 14, Development Permit Procedures & Administration, Section 14.08.030, Determination of Completeness. (CCBOR Resolution No. 2004-16, as amended)

Project Description: The proposal is a request to amend the current comprehensive plan map designation from Rural Residential/Resource 20 (RR20) to Rural Residential/Resource 10 (RR10).

File Number:	CPA 26-067
Related Files:	None
Parcel Address:	Unassigned, Wenatchee, WA 98801
Parcel Zoning	Rural Residential/Resource 20 (RR20)
Applicant/Owner:	Washington State Department of Natural Resources
Mailing Address:	1111 Washington St SE, Mailstop 47014, Olympia, WA 98504
Date Submitted:	3/2/26
Date Complete:	3/4/26

Upon Initial Review, The Above Referenced Application is Found To Be: COMPLETE

The required components of an application are present and are judged by the review authority to be technically accurate and contain sufficient information necessary to allow the processing of the application. All submittal fees have been paid.

Your application has been determined to be complete as of the date of this letter. Pursuant to Chelan County Code Section 14.08.030(5), a Determination of Completeness shall not preclude the department for requesting additional information or studies if the need for more information becomes apparent during processing of the proposed development.

Narrative-

The Washington State Department of Natural Resources (DNR) hopes to amend the Comprehensive Plan Map to eventually allow a rezone of:

Portion of Section 16, Township 23 North, Range 20 East, W.M.,
Chelan County, Washington.
Land Description
The Northwest Quarter of the Northeast Quarter, and the East Half of Section 16, Township 23 North, Range 20 East, Willamette Meridian, Chelan County, Washington, according to U.S. Government subdivision procedures.
Subject to Burch Mountain County Road and Washington State Department of Transportation (WSDOT) utility easement.
or

Chelan County parcel number- 232016100000

DNR would like to change the comprehensive plan map designation from RR20 to RR10. No physical site changes are planned by DNR. The Comp Plan Map change and rezone will likely lead to an eventual sale. Specific comp plan map is 65.

This site is a Common School Trust property that does not currently provide revenue for statewide K-12 school construction. Shifting this asset to a denser zoning would allow better transitioning from its neighboring urban growth area and dense rural zoning, creating a gradual transition to the more rural RR20. The change would increase the parcel's socioeconomic value to the county via urban adjacent density and tax revenue.

This proposal addresses zoning irregularities where RV, R 2.5, and the Wenatchee Urban Growth Area flow directly into RR20. Transitioning to RR10 would allow a more gradual decrease in density, maximizing the benefit of public services and transportation while alleviating some development pressures from more rural properties. This would promote urban transition growth, allowing a gradual transition to lower density while further maximizing the public benefit via eventual taxation and, separately, an increase in revenue for statewide K-12 funding by allowing DNR to transition to a better location to generate long-term revenue.

The site is situated on public roads and near existing bus, train, and airport services. This allows existing infrastructure to maximize its public benefit by enhancing its economies of scale.

If additional potential density is achieved at maximum residential yield, this site would still feature a lower density than neighboring developed sites. It would only nominally aesthetically affect land use in the area; the potential built-out landscape view would be altered only minimally, thanks to the eventual RR10 still being a relatively low density and existing development difficulties associated with the terrain.

This property has been vacant for many years. It has not provided the trust or the county with revenue, nor has it provided the community with housing or employment. We hope this step allows the site to achieve its highest and best use.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

***Instructions for applicants*:**

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background

1. Name of proposed project, if applicable:
   Burch Mountain Rezone

2. Name of applicant:
   Washington State Department of Natural Resources

3. Address and phone number of applicant and contact person:

1111 Washington St SE, MS 47014
Olympia, WA 98504
Matthew Matulovich
564.669.0897

4. Date checklist prepared:
   02.12.2026

5. Agency requesting checklist:
   Chelan County

6. Proposed timing or schedule (including phasing, if applicable):
   As needed for county review and processing, 9-12 months.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.
   NO

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
   DNR departmental site review based upon section wide internal special concerns report. Report and departmental conclusions available upon request. Data present in checklist responces.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.
   No

10. List any government approvals or permits that will be needed for your proposal, if known.
    Comp Plan Map update & Rezone

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

    DNR hopes to amend the county comp plan map to allow for a rezone and then rezone 119 acres of school trust land near Wenatchee.
    The current zoning is RR-20. DNR hopes to achieve a zoning consistent with area properties that allows more density.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

    T23-0N R20-0E S16, Chelan County parcel 232016100000

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site:

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _Foothills_

b. What is the steepest slope on the site (approximate percent slope)?

A small area of 65-80%. Slope class II per DNRs SUVT(State Uplands Viewing Tool)

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

All Non Hydric- Cowiche silt loam, Burch loam, and Bjork silt loam. (SUVT)

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No known issues per SUVT. Some modeling flags small potential slide areas forreview(Eastside Slope Stability Model).

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No earthwork planned.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No earthwork planned.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

No project construction planned.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

None

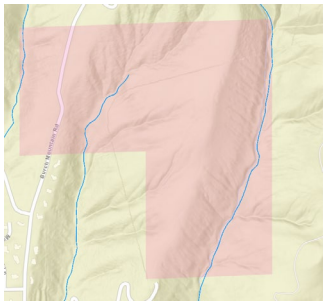
2. Air

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

No construction/project planned

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

Nope



c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None

3. **Water**

a. Surface Water:

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Three streams are shown on the site, all of which are listed as both continuous and intermittent. All flow into the Columbia. None appears to be fish-bearing. (SUVT)

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described
waters? If yes, please describe and attach available plans.

Nope

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected.
Indicate the source of fill material.

None

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

Nope

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

Nope

6) Does the proposal involve any discharges of waste materials to surface waters? If so,
describe the type of waste and anticipated volume of discharge.

Nope

b. Ground Water:

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

Nope

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

No change to the current runoff.

2) Could waste materials enter ground or surface waters? If so, generally describe.

No planned change to the site, no new waste materials will be generated.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

Site maintains current drainage patterns.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None

4. **Plants**

a. Check the types of vegetation found on the site:

__X_deciduous tree: alder, maple, aspen, other
_X_evergreen tree: fir, cedar, pine, other
_X_shrubs
_X__grass
____pasture
____crop or grain
____ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None

c. List threatened and endangered species known to be on or near the site.

No known threatened or endangered plants on site.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

No changes planned.

e. List all noxious weeds and invasive species known to be on or near the site.

No known noxious weeds.

5. **Animals**

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Deer, various birds, insects, and snakes.

b. List any threatened and endangered species known to be on or near the site.

This site is flagged as winter range for Mule Deer, overlaps or is within 1000' of Golden Eagle areas of interest, overlaps or is within 45000' of Grey Wolf areas of interest, overlaps or is within 6000' of Western Gray Squirrel area of interest. (SUVT)

c. Is the site part of a migration route? If so, explain.

Winter range for Mule Deer

f. Proposed measures to preserve or enhance wildlife, if any:

None

g. List any invasive animal species known to be on or near the site.

None known on site.

6. **Energy and Natural Resources**

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

None

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

Nope

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

None

7. **Environmental Health**

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal?
If so, describe.

Nope

1) Describe any known or possible contamination at the site from present or past uses.

No known contaminations.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None

4) Describe special emergency services that might be required.

No change to the site, no anticipated additional need for emergency services.

5) Proposed measures to reduce or control environmental health hazards, if any:

None

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indi-
cate what hours noise would come from the site.

None

3) Proposed measures to reduce or control noise impacts, if any:

None

8. **Land and Shoreline Use**

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is vacant land, surrounded mostly by vacant land and some small single-family residential lots.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No, no conversion planned.

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

Nope

c. Describe any structures on the site.

None

d. Will any structures be demolished? If so, what?

Nope

e. What is the current zoning classification of the site?

RR20

f. What is the current comprehensive plan designation of the site?

RR40

g. If applicable, what is the current shoreline master program designation of the site?

No shoreline.

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No, no critical areas listed in or near the site on the state's special concerns report.

i. Approximately how many people would reside or work in the completed project?

None

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any:

None

L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

No change in use planned. No compatibility change.

l. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None

9. **Housing**

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

None

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None

c. Proposed measures to reduce or control housing impacts, if any:

None

10. **Aesthetics**

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

No structures planned.

b. What views in the immediate vicinity would be altered or obstructed?

No change in views.

h. Proposed measures to reduce or control aesthetic impacts, if any:

None

11. **Light and Glare**

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

No change

b. Could light or glare from the finished project be a safety hazard or interfere with views?

Nope

c. What existing off-site sources of light or glare may affect your proposal?

None

d. Proposed measures to reduce or control light and glare impacts, if any:

None

12. **Recreation**

a. What designated and informal recreational opportunities are in the immediate vicinity?

Many indoor and outdoor recreational opportunities exist, from parks and trails to bowling alleys and gymnasiums.

b. Would the proposed project displace any existing recreational uses? If so, describe.

Nope

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

Nope

13. **Historic and cultural preservation**

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

Nope

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

Yes, DNRs archioligist review and recommendations attached.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

No development planned, no impact.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

No impact anticipated.

14. **Transportation**

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Burch Mt Road passes through the site, no additional impact will be added.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

The site is about 7000’ from Transit Route 28 on W Peters Street, about 22700’ as the crow flies from the local Amtrak station, and 44155’ as the crow flies from Pangborn Memorial Airport

b. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

Nope

c. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

Nope

d. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

No additional trips per day.

e. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

Nope

f. Proposed measures to reduce or control transportation impacts, if any:

None

15. **Public Services**

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

Nope

b. Proposed measures to reduce or control direct impacts on public services, if any.

None

16. **Utilities**

a. Circle utilities currently available at the site:

electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Nothing proposed

C. Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: _____

Name of signee _Matthew V Matulovich_____

Position and Agency/Organization _Transition Lands Program Manager WA DNR_

Date Submitted: _2.12.2026

D. **SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS**

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

   No increase anticipated.

Proposed measures to avoid or reduce such increases are:

None

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

   No anticipated affect.

   Proposed measures to protect or conserve plants, animals, fish, or marine life are:

   None

3. How would the proposal be likely to deplete energy or natural resources?

   No anticipated depletion.

   Proposed measures to protect or conserve energy and natural resources are:

   None

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

No anticipated affect.

Proposed measures to protect such resources or to avoid or reduce impacts are:

None

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Proposed measures to reduce or respond to such demand(s) are:

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

File(s) No. _____

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

DNR would like to change the comp plan map designation from RR20 to RR10.

No physical site changes planned. Comp Plan Map change and rezone may lead to eventual sale.

☒ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): SEPA Checklist, CPA Supplemental information
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: 91 Undeveloped Land-range, open land undeveloped
   South: 11 Household, single family units
   East: 94 Open space land classified under chapter 84.34 RCW
   West: 11 Household, single family units
4. What is the current use of the property? 69 Miscellaneous Services
5. Sanitation Disposal: ☑ N/A ❑ Septic Permit ❑ Sewer District: _____
6. Water Source: ☑ N/A ❑ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____
7. Irrigation Water:
   ☑ N/A ❑ Yes (Private) ❑ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: Chelan County FPD 01 School District: Wenatchee SD
9. Power Service: No power
10. Are there critical areas or critical area buffers on the property?
    ❑ Airport Overlay: _____
    ❑ Aquifer Recharge Area (see attached)
    ❑ Floodplain / Floodway _____

    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ❑ Alluvial Fan (250') ❑ Known Historic Hazardous Area (250') ☑ Slopes > 40% (250')
    ❑ Erosive soils (on-site) ☑ Landslide ❑ Snow Avalanche (500')
    ☑ Habitat/Riparian Area, protected species/area: No DNR internal concerns. Evidence of Grey Wolf, Mule Deer, Steppe zone
    ☑ Streams / Waterbodies: 1 potential fish-bearing stream on site ❑ Shoreline Environment Designation: _____
    ☑ Drainage or Seasonal Stream: _____ ❑ Wetland, if so what category: _____
    ☑ Cultural or Archeological: "...a probability for cultural resources to be present." State Archaeologist comments attached.
11. Will landfill be required? ☑ No ❑ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ❑ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No site prep or site work required.
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No changes to site planned.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

No changes to site planned.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ❑ Yes, please list:

No known "other proposal"s that are not directly related to this proposal (SEPA checklist)

"Does not apply*"--- "We do not meet the standard of "An applicant seeking to develop property.."

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Exempt from this section only are Single Family Residences and their associated development per CCC 11.82.060.An applicant seeking to develop property which requires a development permit, shall submit with the permit application this certified statement, which lists each of the evaluation criteria and shall indicate whether the criteria "applies" or "does not apply" to the site or development. "Unknown" or similar responses will not be accepted.

If the development meets criteria A, B, C, or D or if the site or development meets any two of the remaining criteria, the Department will direct the applicant to determine the vulnerability rating for the development pursuant to Section 11.82.050 Aquifer Recharge Areas. If the development has a high or medium vulnerability rating, the development shall be subject to the performance standards of Section 11.82.060.

If an applicant's statement asserts that the criteria of do not apply to the development, the Department will accept the statement and proceed with the permitting process. If any statement is incorrect, the applicant will be advised in writing to either; (a) provide an amended statement adding the evaluation criteria as being applicable and determine the vulnerability rating of the development pursuant to Section 11.82.050, or (b) present sufficient countering information clearly establishing that the basis for the Department's concern is incorrect. If the applicant selects to proceed under (b), upon receipt of the applicant's information, the Department shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the Administrator.

EVALUATION CRITERIA

The applicant is required to determine the vulnerability rating for **any development permit**, not otherwise exempted, if the site or development meets criteria A, B, C, or D or meets two or more of the remaining criteria below:

Please write the word(s) **"Applies** or **"Does Not Apply"** on the lines before each of the following statements:

Does Not apply* **A.** Within a wellhead protection area designated under WAC 246-290; *Wellhead Protection Area: The surface and subsurface area surrounding a well or well field for a distance of 100 feet, supplying a public water system, through which contaminants are reasonably likely to move toward and reach such water well or well field.

Does Not apply* **B.** Within an aquifer recharge area mapped and identified by a qualified ground water scientist;

Does Not apply **C.** The site will be utilized for hazardous substance, (as now or hereafter defined in RCW 70.105D.020(7)), processing storage or handling in applications or quantities larger than is typical of household use;

Does Not apply* **D.** The site will be utilized for hazardous waste treatment and storage as set forth in RCW 70.105 Hazardous Waste Management, as now or hereafter amended;

Does Not apply* **E.** The site contains highly permeable soils (please reference WAC 246-272A-0220 for Soil Table and Descriptions).

N/A **F.** Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act **(None currently designated in Chelan County)**;

N/A **G.** Within an area established for special protection pursuant to a groundwater management program, chapters 90.44, 90.48 and 90.54 RCW, and Chapters 173-100 and 173-200 WAC **(None currently designated in Chelan County)**;

Does Not apply* **H.** The development involves a proposed major or short subdivision and includes present or future plans to construct three or more dwelling units where the dwelling units will not be connected to a public sewer system and any of the lots are less than 1 net acre in size;

Does Not apply* **I.** The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds 4,000 square feet;

Does Not apply* **J.** The proposed use is as a commercial feedlot;

Does Not apply* **K.** The development is within 200 feet of the ordinary high water mark of a perennial river, stream, lake or pond.

Depending upon soil depths from the surface, the following soil series within Chelan County are considered to be highly permeable soils:

Ardenvoir: ArF, 27-43 inches (depth from surface), very gravelly sandy loam

Anatone: AkD, 5-14 inches (depth from surface), very gravelly silt loam

Beverly: Be, 17-24 inches (depth from surface), very gravelly sandy loam; Bf, 17-24 inches (depth from surface), very gravelly sandy loam; Bg, 0-10 inches (depth from surface), very gravelly loamy fine sand; Bg, 17-24 inches (depth from surface), very gravelly sandy loam

Brief: BrA, BrB, BrC, Brd, 26-60 inches (depth from surface), very gravelly sandy loam

BsD, 26-60 inches (depth from surface), very gravelly sandy loam

Chelan: CgB, CgC, CgD, CgE, 35-60 inches (depth from surface), very gravelly sandy loam; ChC, ChE, 35-60 inches (depth from surface), very gravelly sandy loam; CkD, CkE, 35-60 inches (depth from surface), very gravelly sandy loam; CIA, CIB, CIC, CID, CIE, 35-60 inches (depth from surface), very gravelly sandy loam

Jumpe: JmD, 10-60 inches (depth from surface), very stony silt loam; JnF, 0-60 inches (depth from surface), very stony silt loam

Loneridge: LoD, LoF, 0-10 inches (depth from surface), very stony loam; 10-16 inches (depth from surface), very gravelly clay loam

Malaga: MaA, MaC, 15-19 inches (depth from surface), very gravelly sandy loam

Peshastin: PhB, PhC, 18-60 inches (depth from surface), very cobbly sandy loam; PID, PIE, 18-60 inches (depth from surface), very cobbly loam

Pogue: PsE, 0-17 inches (depth from surface), very stony fine sandy loam

Stemilt: StD, StE, 17-60 inches (depth from surface), very cobbly silty clay loam

Supplee: SuA, SuB, SuC, SuD, SuE, 0-6 inches (depth from surface), Very fine sandy loam; 18-31 inches (depth from surface), very gravelly sandy loam

Thow: TgD, 10-60 inches (depth from surface), very gravelly sandy loam; ThE 10-60 inches (depth from surface), very gravelly sandy loam

Tronsen: TrD, TrE, 8-60 inches (depth from surface), very gravelly clay loam

---

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

☒ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.

☐ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).

☐ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.

☐ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.

☐ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.

☐ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

MVM _____ 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

MVM _____ 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

MVM _____ 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

MVM _____ 4. Additional permit applications and approvals may be necessary to conduct specific activities.

MVM _____ 5. Application fees are non-refundable, except when approve by the Board.

MVM _____ 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

MVM _____ 7. Chelan County is hereby given consent to enter the property(ies) listed above.

MVM _____ 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

MVM _____ 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

MVM _____ 10. I certify that this application has been made with the consent of the lawful property owner(s).

MVM _____ 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

MVM _____ 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

Parcel Address: T23N R 20E WM S2 NE NW NE City/Zip Code: Wenatchee, WA 98801
Property Owner(s): DNR Zoning: RR20
Mailing Address: 1111 Washington St SE Mailstop 47014
City/State/Zip Code: Olympia, WA 98504-7014
Phone: 564.669.0897 E-mail: matthew.matulovich@dnr.wa.gov

Applicant/Agent (if different than owner)**:** _____
Company and Mailing Address: _____
City/State/Zip: _____ Phone: _____
E-mail: _____
For multiple owners, applicants, or agents, provide additional sheets.

This General Land Use Application Form shall be completed unless specified below. Additional information and supplemental forms may be required. Please review all applicable statutes and regulations pertaining to the proposed development and provide information, documents, studies, and reports (such as a Traffic Impact Study or environmental forms) demonstrating compliance with all statutory and regulatory requirements and other applicable criteria.

Application For: (Check all that apply)

- ❑ Administrative Modification
- ❑ Administrative Determination
- ❑ Administrative Interpretation
- ❑ Binding Site Plan
- ☑ Comprehensive Plan Map Amendment
- ❑ Comprehensive Plan Text Amendment
- ❑ Conditional Use Permit
- ❑ Forest Practice/Conversion
- ❑ Open Space: Public Benefit Rating System
- ❑ Major Subdivision
- ❑ Master Planned Development
- ❑ Planned Development
- ❑ Plat Alteration or Vacation
- ❑ Short Plat
- ❑ Variance (zoning or critical areas)
- ❑ Zoning Text Amendment/ Map Amendment
- ❑ Critical Area Determination
- ❑ Other: _____

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

DNR would like to change the comp plan map designation from RR20 to RR10.

No physical site changes planned. Comp Plan Map change and rezone may lead to eventual sale.

☒ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): SEPA Checklist, CPA Supplemental information
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: 91 Undeveloped Land-range, open land undeveloped
   South: 11 Household, single family units
   East: 94 Open space land classified under chapter 84.34 RCW
   West: 11 Household, single family units
4. What is the current use of the property? 69 Miscellaneous Services
5. Sanitation Disposal: ☑ N/A ❑ Septic Permit ❑ Sewer District: _____
6. Water Source: ☑ N/A ❑ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____
7. Irrigation Water:
   ☑ N/A ❑ Yes (Private) ❑ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: Chelan County FPD 01 School District: Wenatchee SD
9. Power Service: No power
10. Are there critical areas or critical area buffers on the property?
    ❑ Airport Overlay: _____
    ❑ Aquifer Recharge Area (see attached)
    ❑ Floodplain / Floodway _____

    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ❑ Alluvial Fan (250') ❑ Known Historic Hazardous Area (250') ☑ Slopes > 40% (250')
    ❑ Erosive soils (on-site) ☑ Landslide ❑ Snow Avalanche (500')
    ☑ Habitat/Riparian Area, protected species/area: No DNR internal concerns. Evidence of Grey Wolf, Mule Deer, Steppe zone
    ☑ Streams / Waterbodies: 1 potential fish-bearing stream on site ❑ Shoreline Environment Designation: _____
    ☑ Drainage or Seasonal Stream: _____ ❑ Wetland, if so what category: _____
    ☑ Cultural or Archeological: "...a probability for cultural resources to be present." State Archaeologist comments attached.
11. Will landfill be required? ☑ No ❑ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ❑ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No site prep or site work required.
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No changes to site planned.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

No changes to site planned.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ❑ Yes, please list:

No known "other proposal"s that are not directly related to this proposal (SEPA checklist)

"Does not apply*"--- "We do not meet the standard of "An applicant seeking to develop property.."

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Exempt from this section only are Single Family Residences and their associated development per CCC 11.82.060.An applicant seeking to develop property which requires a development permit, shall submit with the permit application this certified statement, which lists each of the evaluation criteria and shall indicate whether the criteria "applies" or "does not apply" to the site or development. "Unknown" or similar responses will not be accepted.

If the development meets criteria A, B, C, or D or if the site or development meets any two of the remaining criteria, the Department will direct the applicant to determine the vulnerability rating for the development pursuant to Section 11.82.050 Aquifer Recharge Areas. If the development has a high or medium vulnerability rating, the development shall be subject to the performance standards of Section 11.82.060.

If an applicant's statement asserts that the criteria of do not apply to the development, the Department will accept the statement and proceed with the permitting process. If any statement is incorrect, the applicant will be advised in writing to either; (a) provide an amended statement adding the evaluation criteria as being applicable and determine the vulnerability rating of the development pursuant to Section 11.82.050, or (b) present sufficient countering information clearly establishing that the basis for the Department's concern is incorrect. If the applicant selects to proceed under (b), upon receipt of the applicant's information, the Department shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the Administrator.

EVALUATION CRITERIA

The applicant is required to determine the vulnerability rating for **any development permit**, not otherwise exempted, if the site or development meets criteria A, B, C, or D or meets two or more of the remaining criteria below:

Please write the word(s) **"Applies** or **"Does Not Apply"** on the lines before each of the following statements:

Does Not apply* **A.** Within a wellhead protection area designated under WAC 246-290; *Wellhead Protection Area: The surface and subsurface area surrounding a well or well field for a distance of 100 feet, supplying a public water system, through which contaminants are reasonably likely to move toward and reach such water well or well field.

Does Not apply* **B.** Within an aquifer recharge area mapped and identified by a qualified ground water scientist;

Does Not apply **C.** The site will be utilized for hazardous substance, (as now or hereafter defined in RCW 70.105D.020(7)), processing storage or handling in applications or quantities larger than is typical of household use;

Does Not apply* **D.** The site will be utilized for hazardous waste treatment and storage as set forth in RCW 70.105 Hazardous Waste Management, as now or hereafter amended;

Does Not apply* **E.** The site contains highly permeable soils (please reference WAC 246-272A-0220 for Soil Table and Descriptions).

N/A **F.** Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act **(None currently designated in Chelan County)**;

N/A **G.** Within an area established for special protection pursuant to a groundwater management program, chapters 90.44, 90.48 and 90.54 RCW, and Chapters 173-100 and 173-200 WAC **(None currently designated in Chelan County)**;

Does Not apply* **H.** The development involves a proposed major or short subdivision and includes present or future plans to construct three or more dwelling units where the dwelling units will not be connected to a public sewer system and any of the lots are less than 1 net acre in size;

Does Not apply* **I.** The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds 4,000 square feet;

Does Not apply* **J.** The proposed use is as a commercial feedlot;

Does Not apply* **K.** The development is within 200 feet of the ordinary high water mark of a perennial river, stream, lake or pond.

Depending upon soil depths from the surface, the following soil series within Chelan County are considered to be highly permeable soils:

Ardenvoir: ArF, 27-43 inches (depth from surface), very gravelly sandy loam

Anatone: AkD, 5-14 inches (depth from surface), very gravelly silt loam

Beverly: Be, 17-24 inches (depth from surface), very gravelly sandy loam; Bf, 17-24 inches (depth from surface), very gravelly sandy loam; Bg, 0-10 inches (depth from surface), very gravelly loamy fine sand; Bg, 17-24 inches (depth from surface), very gravelly sandy loam

Brief: BrA, BrB, BrC, Brd, 26-60 inches (depth from surface), very gravelly sandy loam

BsD, 26-60 inches (depth from surface), very gravelly sandy loam

Chelan: CgB, CgC, CgD, CgE, 35-60 inches (depth from surface), very gravelly sandy loam; ChC, ChE, 35-60 inches (depth from surface), very gravelly sandy loam; CkD, CkE, 35-60 inches (depth from surface), very gravelly sandy loam; CIA, CIB, CIC, CID, CIE, 35-60 inches (depth from surface), very gravelly sandy loam

Jumpe: JmD, 10-60 inches (depth from surface), very stony silt loam; JnF, 0-60 inches (depth from surface), very stony silt loam

Loneridge: LoD, LoF, 0-10 inches (depth from surface), very stony loam; 10-16 inches (depth from surface), very gravelly clay loam

Malaga: MaA, MaC, 15-19 inches (depth from surface), very gravelly sandy loam

Peshastin: PhB, PhC, 18-60 inches (depth from surface), very cobbly sandy loam; PID, PIE, 18-60 inches (depth from surface), very cobbly loam

Pogue: PsE, 0-17 inches (depth from surface), very stony fine sandy loam

Stemilt: StD, StE, 17-60 inches (depth from surface), very cobbly silty clay loam

Supplee: SuA, SuB, SuC, SuD, SuE, 0-6 inches (depth from surface), Very fine sandy loam; 18-31 inches (depth from surface), very gravelly sandy loam

Thow: TgD, 10-60 inches (depth from surface), very gravelly sandy loam; ThE 10-60 inches (depth from surface), very gravelly sandy loam

Tronsen: TrD, TrE, 8-60 inches (depth from surface), very gravelly clay loam

---

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

☒ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.

☐ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).

☐ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.

☐ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.

☐ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.

☐ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

MVM _____ 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

MVM _____ 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

MVM _____ 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

MVM _____ 4. Additional permit applications and approvals may be necessary to conduct specific activities.

MVM _____ 5. Application fees are non-refundable, except when approve by the Board.

MVM _____ 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

MVM _____ 7. Chelan County is hereby given consent to enter the property(ies) listed above.

MVM _____ 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

MVM _____ 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

MVM _____ 10. I certify that this application has been made with the consent of the lawful property owner(s).

MVM _____ 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

MVM _____ 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

Narrative-

The Washington State Department of Natural Resources (DNR) hopes to amend the Comprehensive Plan Map to eventually allow a rezone of:

Portion of Section 16, Township 23 North, Range 20 East, W.M.,
Chelan County, Washington.
Land Description
The Northwest Quarter of the Northeast Quarter, and the East Half of Section 16, Township 23 North, Range 20 East, Willamette Meridian, Chelan County, Washington, according to U.S. Government subdivision procedures.
Subject to Burch Mountain County Road and Washington State Department of Transportation (WSDOT) utility easement.
or

Chelan County parcel number- 232016100000

DNR would like to change the comprehensive plan map designation from RR20 to RR10. No physical site changes are planned by DNR. The Comp Plan Map change and rezone will likely lead to an eventual sale. Specific comp plan map is 65.

This site is a Common School Trust property that does not currently provide revenue for statewide K-12 school construction. Shifting this asset to a denser zoning would allow better transitioning from its neighboring urban growth area and dense rural zoning, creating a gradual transition to the more rural RR20. The change would increase the parcel's socioeconomic value to the county via urban adjacent density and tax revenue.

This proposal addresses zoning irregularities where RV, R 2.5, and the Wenatchee Urban Growth Area flow directly into RR20. Transitioning to RR10 would allow a more gradual decrease in density, maximizing the benefit of public services and transportation while alleviating some development pressures from more rural properties. This would promote urban transition growth, allowing a gradual transition to lower density while further maximizing the public benefit via eventual taxation and, separately, an increase in revenue for statewide K-12 funding by allowing DNR to transition to a better location to generate long-term revenue.

The site is situated on public roads and near existing bus, train, and airport services. This allows existing infrastructure to maximize its public benefit by enhancing its economies of scale.

If additional potential density is achieved at maximum residential yield, this site would still feature a lower density than neighboring developed sites. It would only nominally aesthetically affect land use in the area; the potential built-out landscape view would be altered only minimally, thanks to the eventual RR10 still being a relatively low density and existing development difficulties associated with the terrain.

This property has been vacant for many years. It has not provided the trust or the county with revenue, nor has it provided the community with housing or employment. We hope this step allows the site to achieve its highest and best use.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

***Instructions for applicants*:**

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background

1. Name of proposed project, if applicable:
   Burch Mountain Rezone

2. Name of applicant:
   Washington State Department of Natural Resources

3. Address and phone number of applicant and contact person:

1111 Washington St SE, MS 47014
Olympia, WA 98504
Matthew Matulovich
564.669.0897

4. Date checklist prepared:
   02.12.2026

5. Agency requesting checklist:
   Chelan County

6. Proposed timing or schedule (including phasing, if applicable):
   As needed for county review and processing, 9-12 months.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.
   NO

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
   DNR departmental site review based upon section wide internal special concerns report. Report and departmental conclusions available upon request. Data present in checklist responces.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.
   No

10. List any government approvals or permits that will be needed for your proposal, if known.
    Comp Plan Map update & Rezone

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

    DNR hopes to amend the county comp plan map to allow for a rezone and then rezone 119 acres of school trust land near Wenatchee.
    The current zoning is RR-20. DNR hopes to achieve a zoning consistent with area properties that allows more density.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

    T23-0N R20-0E S16, Chelan County parcel 232016100000

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site:

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _Foothills_

b. What is the steepest slope on the site (approximate percent slope)?

A small area of 65-80%. Slope class II per DNRs SUVT(State Uplands Viewing Tool)

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

All Non Hydric- Cowiche silt loam, Burch loam, and Bjork silt loam. (SUVT)

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No known issues per SUVT. Some modeling flags small potential slide areas forreview(Eastside Slope Stability Model).

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No earthwork planned.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No earthwork planned.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

No project construction planned.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

None

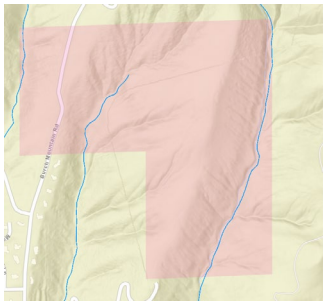
2. Air

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

No construction/project planned

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

Nope



c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None

3. **Water**

a. Surface Water:

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Three streams are shown on the site, all of which are listed as both continuous and intermittent. All flow into the Columbia. None appears to be fish-bearing. (SUVT)

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described
waters? If yes, please describe and attach available plans.

Nope

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected.
Indicate the source of fill material.

None

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

Nope

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

Nope

6) Does the proposal involve any discharges of waste materials to surface waters? If so,
describe the type of waste and anticipated volume of discharge.

Nope

b. Ground Water:

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

Nope

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

No change to the current runoff.

2) Could waste materials enter ground or surface waters? If so, generally describe.

No planned change to the site, no new waste materials will be generated.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

Site maintains current drainage patterns.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None

4. **Plants**

a. Check the types of vegetation found on the site:

__X_deciduous tree: alder, maple, aspen, other
_X_evergreen tree: fir, cedar, pine, other
_X_shrubs
_X__grass
____pasture
____crop or grain
____ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None

c. List threatened and endangered species known to be on or near the site.

No known threatened or endangered plants on site.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

No changes planned.

e. List all noxious weeds and invasive species known to be on or near the site.

No known noxious weeds.

5. **Animals**

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Deer, various birds, insects, and snakes.

b. List any threatened and endangered species known to be on or near the site.

This site is flagged as winter range for Mule Deer, overlaps or is within 1000' of Golden Eagle areas of interest, overlaps or is within 45000' of Grey Wolf areas of interest, overlaps or is within 6000' of Western Gray Squirrel area of interest. (SUVT)

c. Is the site part of a migration route? If so, explain.

Winter range for Mule Deer

f. Proposed measures to preserve or enhance wildlife, if any:

None

g. List any invasive animal species known to be on or near the site.

None known on site.

6. **Energy and Natural Resources**

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

None

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

Nope

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

None

7. **Environmental Health**

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal?
If so, describe.

Nope

1) Describe any known or possible contamination at the site from present or past uses.

No known contaminations.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None

4) Describe special emergency services that might be required.

No change to the site, no anticipated additional need for emergency services.

5) Proposed measures to reduce or control environmental health hazards, if any:

None

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indi-
cate what hours noise would come from the site.

None

3) Proposed measures to reduce or control noise impacts, if any:

None

8. **Land and Shoreline Use**

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is vacant land, surrounded mostly by vacant land and some small single-family residential lots.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No, no conversion planned.

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

Nope

c. Describe any structures on the site.

None

d. Will any structures be demolished? If so, what?

Nope

e. What is the current zoning classification of the site?

RR20

f. What is the current comprehensive plan designation of the site?

RR40

g. If applicable, what is the current shoreline master program designation of the site?

No shoreline.

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No, no critical areas listed in or near the site on the state's special concerns report.

i. Approximately how many people would reside or work in the completed project?

None

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any:

None

L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

No change in use planned. No compatibility change.

l. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None

9. **Housing**

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

None

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None

c. Proposed measures to reduce or control housing impacts, if any:

None

10. **Aesthetics**

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

No structures planned.

b. What views in the immediate vicinity would be altered or obstructed?

No change in views.

h. Proposed measures to reduce or control aesthetic impacts, if any:

None

11. **Light and Glare**

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

No change

b. Could light or glare from the finished project be a safety hazard or interfere with views?

Nope

c. What existing off-site sources of light or glare may affect your proposal?

None

d. Proposed measures to reduce or control light and glare impacts, if any:

None

12. **Recreation**

a. What designated and informal recreational opportunities are in the immediate vicinity?

Many indoor and outdoor recreational opportunities exist, from parks and trails to bowling alleys and gymnasiums.

b. Would the proposed project displace any existing recreational uses? If so, describe.

Nope

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

Nope

13. **Historic and cultural preservation**

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

Nope

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

Yes, DNRs archioligist review and recommendations attached.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

No development planned, no impact.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

No impact anticipated.

14. **Transportation**

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Burch Mt Road passes through the site, no additional impact will be added.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

The site is about 7000’ from Transit Route 28 on W Peters Street, about 22700’ as the crow flies from the local Amtrak station, and 44155’ as the crow flies from Pangborn Memorial Airport

b. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

Nope

c. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

Nope

d. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

No additional trips per day.

e. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

Nope

f. Proposed measures to reduce or control transportation impacts, if any:

None

15. **Public Services**

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

Nope

b. Proposed measures to reduce or control direct impacts on public services, if any.

None

16. **Utilities**

a. Circle utilities currently available at the site:

electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Nothing proposed

C. Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: _____

Name of signee _Matthew V Matulovich_____

Position and Agency/Organization _Transition Lands Program Manager WA DNR_

Date Submitted: _2.12.2026

D. **SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS**

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

   No increase anticipated.

Proposed measures to avoid or reduce such increases are:

None

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

   No anticipated affect.

   Proposed measures to protect or conserve plants, animals, fish, or marine life are:

   None

3. How would the proposal be likely to deplete energy or natural resources?

   No anticipated depletion.

   Proposed measures to protect or conserve energy and natural resources are:

   None

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

No anticipated affect.

Proposed measures to protect such resources or to avoid or reduce impacts are:

None

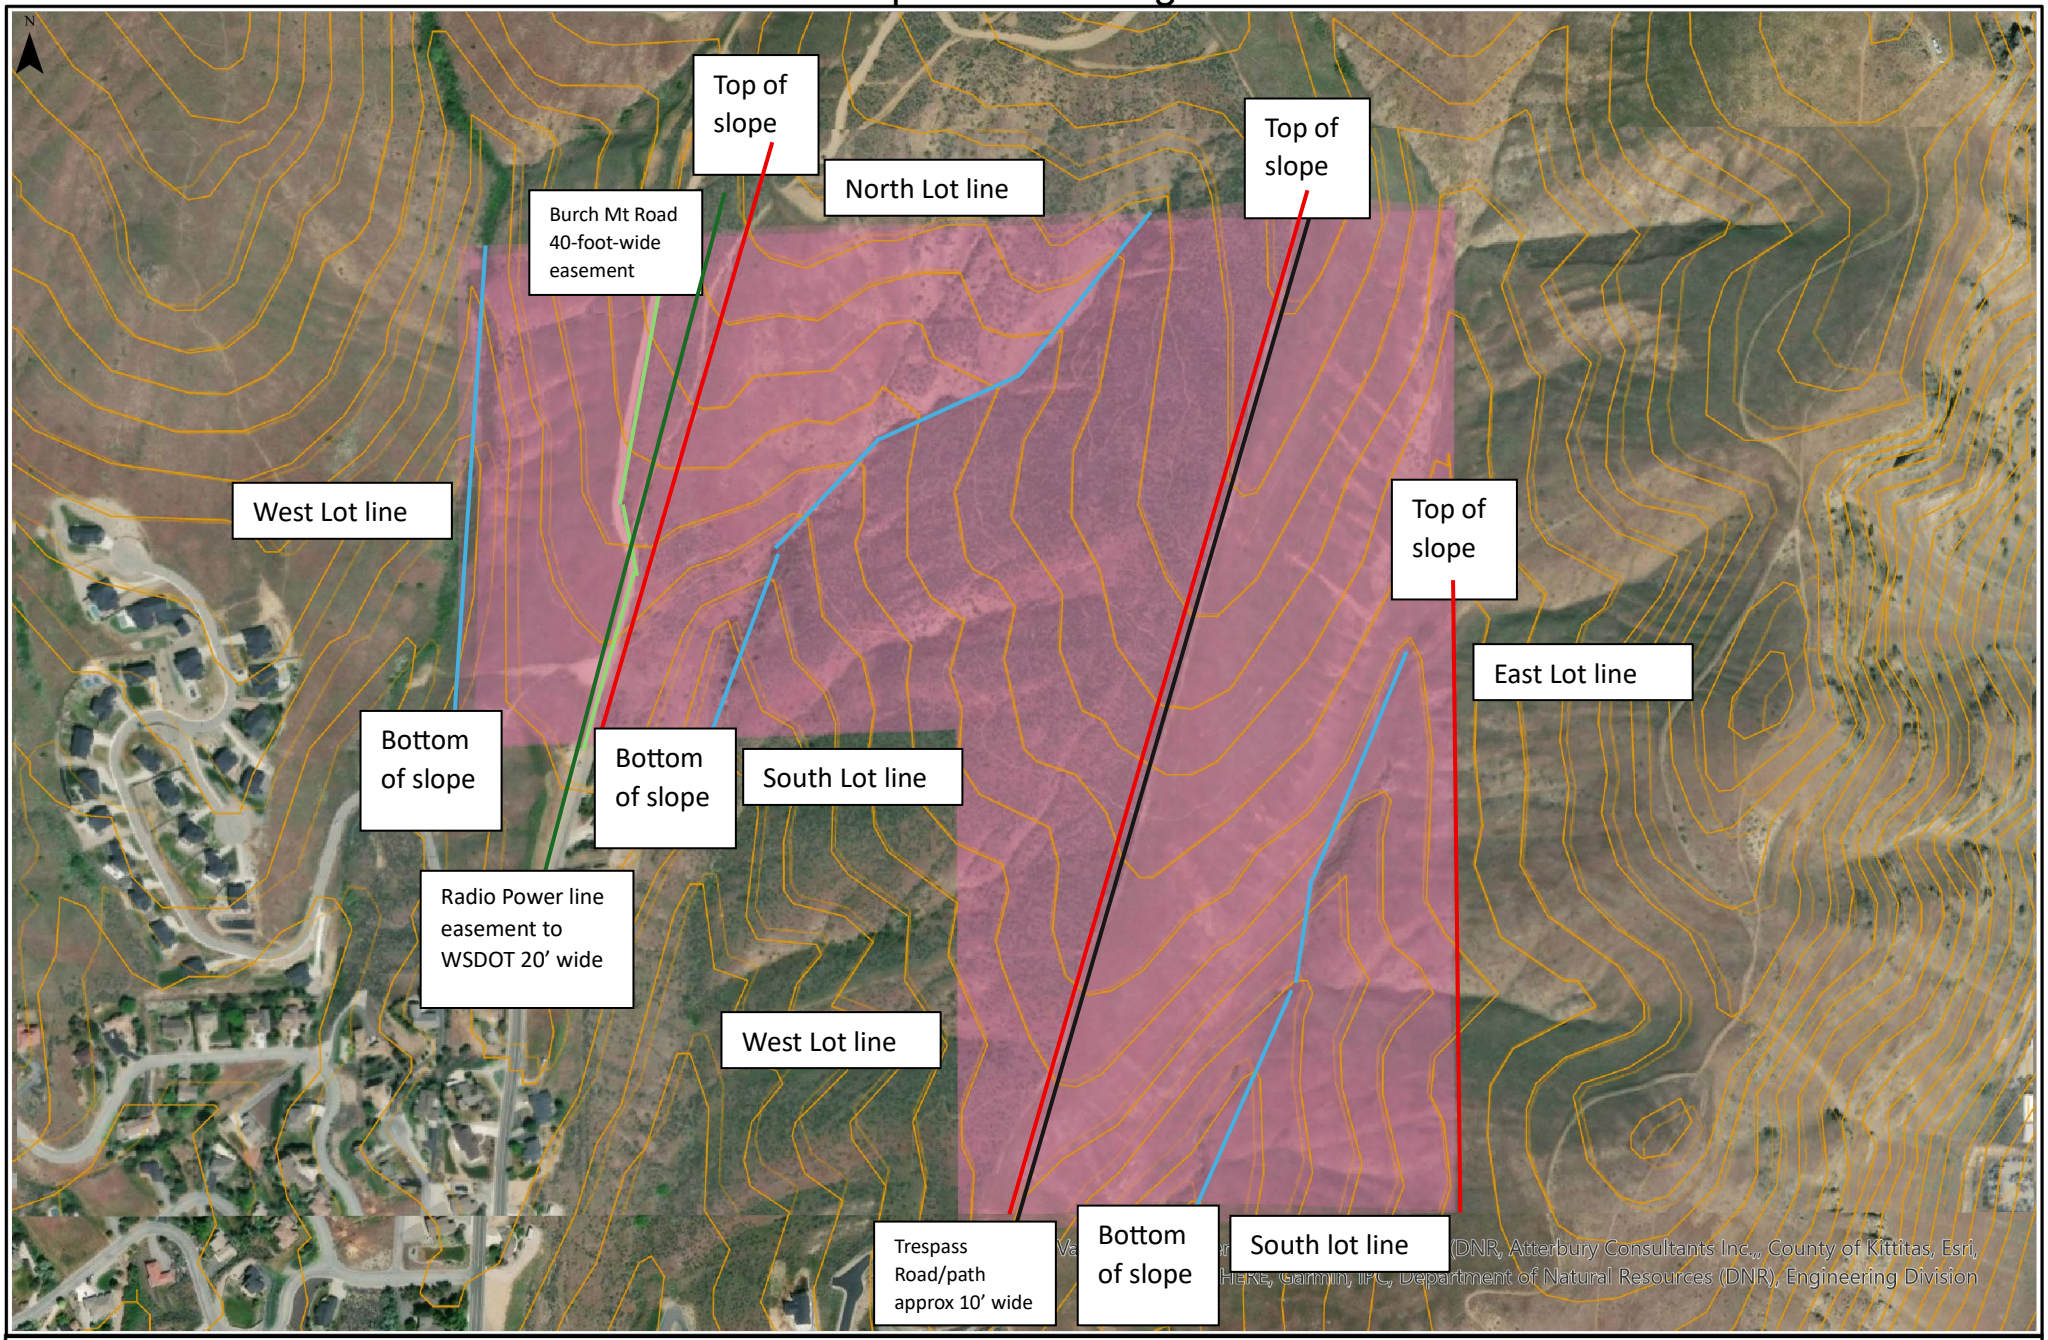
5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?



Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Proposed measures to reduce or respond to such demand(s) are:

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

Re: Mineral potential review for Burch Mountain

As requested, I have completed a remote review of surface and subsurface mineral potential, as well as geological hazards, for the Burch Mountain project. This project consists of portions of section 16, T23 R20E in Chelan County, as shown in Figure 1. It is my understanding that this review is part of a comprehensive plan amendment and rezone for the property, with eventual disposal of the property. This letter documents the scope of my review, my findings and my conclusions.

I reviewed the 1:100,000-scale geologic mapping and ground response maps from the Washington Geologic Information Portal (Washington Department of Natural Resources, 2025), Department of Natural Resources lidar digital elevation models and derivatives, and the U.S. Department of Agriculture online soil survey (USDA, 2025). I also reviewed the active surface mine reclamation permit data on the Washington Geologic Information Portal for nearby mining activities, and the mining/minerals overlay on the Portal for information about minerals and historical mining districts. I used additional maps and resources as cited.

The subject property is 115 acres located west of the Columbia River, and north of the community of Wenatchee. Burch Mountain Road crosses the western portion of the property. According to aerial imagery, the property is shrub-steppe environment, with limited riparian vegetation along several drainages. West and south of the subject property is residential, with shrub-steppe land to the north and east. Lidar imagery indicates south-verging drainages with north-south trending ridges between the drainages. Minor drainages off the ridge slopes join the more major drainages. Personal professional experience supports that all drainages are dry most of the year, with limited flow only after intense precipitation or during seasonal snowmelt. Lidar imagery indicates occasional rocky outcrops within the more major drainages. Roads and trails are visible in both lidar and aerial imagery.

The 1:100k-scale geologic mapping indicates the subject property to be underlain by Precambrian Swakane Biotite Gneiss (DNR, 2025). Gneiss is a metamorphic rock that forms under high temperatures and pressures deep in the subsurface. More recent studies suggest the Swakane Biotite Gneiss to be Cretaceous in age, with the protolith (original rock) likely composed of sediments outboard of a volcanic arc system that were incorporated into deeper levels of the system by underthrusting (Matzel et al., 2004; Sauer et al., 2018). Although not shown on the 1:100k-scale geologic map, the lower slopes of Burch Mountain, including the subject property, are mantled by sediments associated with late Pleistocene glacial outburst flooding (Waitt et al., 2018). Personal professional experience supports that there are glacial erratic boulders on or near the subject property that were deposited by grounded ice bergs transported by outburst floods. These are relatively rare in the region and geologically important as they mark near high-water for the outburst floods. An onsite investigation would be required to verify the location of these erratic boulders. The soil survey indicates silt loam, sandy clay loam, and sandy loam up to 60-inches deep on the subject property (USDA, 2025). This soil is consistent with soils formed on slope-wash originating from metamorphic rocks and on glacial outburst flood sediments. The subject property is not located within a volcanic hazard zone nor a tsunami hazard zone. There is low liquefaction susceptibility from ground shaking during an earthquake. Liquefaction occurs when saturated sediments lose strength during strong shaking. There are no mapped landslides on the property.

Within an approximate 6-mile radius of the subject property there are four surface mine reclamation permits, all within sand and gravel (DNR, 2025). All are shown as mapped within sediments associated with glacial outburst flood deposits. Although the subject property does have outburst flood deposits, personal professional experience supports that these are relatively thin or consist of individual boulders, neither of which are suitable for an aggregate mine. Locally, there are no aggregate mines within the gneiss. The banding and layering common in the gneiss prevent it from being a suitable aggregate resource.

The subject property is located within the historical Wenatchee mining district. Significant gold was mined out of this district (Stanton, 2022). Metals minerals were hosted in Oligocene to Eocene sedimentary rocks and have not been found in the gneiss. The minerals overlay on the Geologic Information Portal indicates observations of massive quartz and limestone or marble within the gneiss that could be suitable for building stone (DNR, 2025). However, these have never been mined out of the gneiss and the subject property does not appear to have significant exposure of rock to assess the suitability. There are no oil/gas wells within over a 6-mile radius of the subject property. Oil or gas would not be sourced within gneiss.

In summary, the subject property likely does not have an aggregate resource, nor metal or industrial mineral, building rock, or oil/gas resources. The subject property may have glacial erratics rafted on glacial outburst flooding. If present, these are geologically significant as they mark near high-water for the flooding.

If you have questions or require additional information, please don't hesitate to contact me.

Limitations

This letter is a cursory remote review of the surface and subsurface mineral potential for the above-mentioned property. The conclusions presented in this report are based on information available at the time it was written. It is not possible to fully define geologic conditions, mineral potential, or geologic hazards based on this limited investigation.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

DNR would like to change the comp plan map designation from RR20 to RR10.

No physical site changes planned. Comp Plan Map change and rezone may lead to eventual sale.

☒ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): SEPA Checklist, CPA Supplemental information
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: 91 Undeveloped Land-range, open land undeveloped
   South: 11 Household, single family units
   East: 94 Open space land classified under chapter 84.34 RCW
   West: 11 Household, single family units
4. What is the current use of the property? 69 Miscellaneous Services
5. Sanitation Disposal: ☑ N/A ❑ Septic Permit ❑ Sewer District: _____
6. Water Source: ☑ N/A ❑ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____
7. Irrigation Water:
   ☑ N/A ❑ Yes (Private) ❑ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: Chelan County FPD 01 School District: Wenatchee SD
9. Power Service: No power
10. Are there critical areas or critical area buffers on the property?
    ❑ Airport Overlay: _____
    ❑ Aquifer Recharge Area (see attached)
    ❑ Floodplain / Floodway _____

    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ❑ Alluvial Fan (250') ❑ Known Historic Hazardous Area (250') ☑ Slopes > 40% (250')
    ❑ Erosive soils (on-site) ☑ Landslide ❑ Snow Avalanche (500')
    ☑ Habitat/Riparian Area, protected species/area: No DNR internal concerns. Evidence of Grey Wolf, Mule Deer, Steppe zone
    ☑ Streams / Waterbodies: 1 potential fish-bearing stream on site ❑ Shoreline Environment Designation: _____
    ☑ Drainage or Seasonal Stream: _____ ❑ Wetland, if so what category: _____
    ☑ Cultural or Archeological: "...a probability for cultural resources to be present." State Archaeologist comments attached.
11. Will landfill be required? ☑ No ❑ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ❑ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No site prep or site work required.
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No changes to site planned.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

No changes to site planned.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ❑ Yes, please list:

No known "other proposal"s that are not directly related to this proposal (SEPA checklist)

"Does not apply*"--- "We do not meet the standard of "An applicant seeking to develop property.."

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Exempt from this section only are Single Family Residences and their associated development per CCC 11.82.060.An applicant seeking to develop property which requires a development permit, shall submit with the permit application this certified statement, which lists each of the evaluation criteria and shall indicate whether the criteria "applies" or "does not apply" to the site or development. "Unknown" or similar responses will not be accepted.

If the development meets criteria A, B, C, or D or if the site or development meets any two of the remaining criteria, the Department will direct the applicant to determine the vulnerability rating for the development pursuant to Section 11.82.050 Aquifer Recharge Areas. If the development has a high or medium vulnerability rating, the development shall be subject to the performance standards of Section 11.82.060.

If an applicant's statement asserts that the criteria of do not apply to the development, the Department will accept the statement and proceed with the permitting process. If any statement is incorrect, the applicant will be advised in writing to either; (a) provide an amended statement adding the evaluation criteria as being applicable and determine the vulnerability rating of the development pursuant to Section 11.82.050, or (b) present sufficient countering information clearly establishing that the basis for the Department's concern is incorrect. If the applicant selects to proceed under (b), upon receipt of the applicant's information, the Department shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the Administrator.

EVALUATION CRITERIA

The applicant is required to determine the vulnerability rating for **any development permit**, not otherwise exempted, if the site or development meets criteria A, B, C, or D or meets two or more of the remaining criteria below:

Please write the word(s) **"Applies** or **"Does Not Apply"** on the lines before each of the following statements:

Does Not apply* **A.** Within a wellhead protection area designated under WAC 246-290; *Wellhead Protection Area: The surface and subsurface area surrounding a well or well field for a distance of 100 feet, supplying a public water system, through which contaminants are reasonably likely to move toward and reach such water well or well field.

Does Not apply* **B.** Within an aquifer recharge area mapped and identified by a qualified ground water scientist;

Does Not apply **C.** The site will be utilized for hazardous substance, (as now or hereafter defined in RCW 70.105D.020(7)), processing storage or handling in applications or quantities larger than is typical of household use;

Does Not apply* **D.** The site will be utilized for hazardous waste treatment and storage as set forth in RCW 70.105 Hazardous Waste Management, as now or hereafter amended;

Does Not apply* **E.** The site contains highly permeable soils (please reference WAC 246-272A-0220 for Soil Table and Descriptions).

N/A **F.** Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act **(None currently designated in Chelan County)**;

N/A **G.** Within an area established for special protection pursuant to a groundwater management program, chapters 90.44, 90.48 and 90.54 RCW, and Chapters 173-100 and 173-200 WAC **(None currently designated in Chelan County)**;

Does Not apply* **H.** The development involves a proposed major or short subdivision and includes present or future plans to construct three or more dwelling units where the dwelling units will not be connected to a public sewer system and any of the lots are less than 1 net acre in size;

Does Not apply* **I.** The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds 4,000 square feet;

Does Not apply* **J.** The proposed use is as a commercial feedlot;

Does Not apply* **K.** The development is within 200 feet of the ordinary high water mark of a perennial river, stream, lake or pond.

Depending upon soil depths from the surface, the following soil series within Chelan County are considered to be highly permeable soils:

Ardenvoir: ArF, 27-43 inches (depth from surface), very gravelly sandy loam

Anatone: AkD, 5-14 inches (depth from surface), very gravelly silt loam

Beverly: Be, 17-24 inches (depth from surface), very gravelly sandy loam; Bf, 17-24 inches (depth from surface), very gravelly sandy loam; Bg, 0-10 inches (depth from surface), very gravelly loamy fine sand; Bg, 17-24 inches (depth from surface), very gravelly sandy loam

Brief: BrA, BrB, BrC, Brd, 26-60 inches (depth from surface), very gravelly sandy loam

BsD, 26-60 inches (depth from surface), very gravelly sandy loam

Chelan: CgB, CgC, CgD, CgE, 35-60 inches (depth from surface), very gravelly sandy loam; ChC, ChE, 35-60 inches (depth from surface), very gravelly sandy loam; CkD, CkE, 35-60 inches (depth from surface), very gravelly sandy loam; CIA, CIB, CIC, CID, CIE, 35-60 inches (depth from surface), very gravelly sandy loam

Jumpe: JmD, 10-60 inches (depth from surface), very stony silt loam; JnF, 0-60 inches (depth from surface), very stony silt loam

Loneridge: LoD, LoF, 0-10 inches (depth from surface), very stony loam; 10-16 inches (depth from surface), very gravelly clay loam

Malaga: MaA, MaC, 15-19 inches (depth from surface), very gravelly sandy loam

Peshastin: PhB, PhC, 18-60 inches (depth from surface), very cobbly sandy loam; PID, PIE, 18-60 inches (depth from surface), very cobbly loam

Pogue: PsE, 0-17 inches (depth from surface), very stony fine sandy loam

Stemilt: StD, StE, 17-60 inches (depth from surface), very cobbly silty clay loam

Supplee: SuA, SuB, SuC, SuD, SuE, 0-6 inches (depth from surface), Very fine sandy loam; 18-31 inches (depth from surface), very gravelly sandy loam

Thow: TgD, 10-60 inches (depth from surface), very gravelly sandy loam; ThE 10-60 inches (depth from surface), very gravelly sandy loam

Tronsen: TrD, TrE, 8-60 inches (depth from surface), very gravelly clay loam

---

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

☒ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.

☐ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).

☐ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.

☐ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.

☐ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.

☐ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

MVM _____ 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

MVM _____ 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

MVM _____ 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

MVM _____ 4. Additional permit applications and approvals may be necessary to conduct specific activities.

MVM _____ 5. Application fees are non-refundable, except when approve by the Board.

MVM _____ 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

MVM _____ 7. Chelan County is hereby given consent to enter the property(ies) listed above.

MVM _____ 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

MVM _____ 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

MVM _____ 10. I certify that this application has been made with the consent of the lawful property owner(s).

MVM _____ 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

MVM _____ 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

Narrative-

The Washington State Department of Natural Resources (DNR) hopes to amend the Comprehensive Plan Map to eventually allow a rezone of:

Portion of Section 16, Township 23 North, Range 20 East, W.M.,
Chelan County, Washington.
Land Description
The Northwest Quarter of the Northeast Quarter, and the East Half of Section 16, Township 23 North, Range 20 East, Willamette Meridian, Chelan County, Washington, according to U.S. Government subdivision procedures.
Subject to Burch Mountain County Road and Washington State Department of Transportation (WSDOT) utility easement.
or

Chelan County parcel number- 232016100000

DNR would like to change the comprehensive plan map designation from RR20 to RR10. No physical site changes are planned by DNR. The Comp Plan Map change and rezone will likely lead to an eventual sale. Specific comp plan map is 65.

This site is a Common School Trust property that does not currently provide revenue for statewide K-12 school construction. Shifting this asset to a denser zoning would allow better transitioning from its neighboring urban growth area and dense rural zoning, creating a gradual transition to the more rural RR20. The change would increase the parcel's socioeconomic value to the county via urban adjacent density and tax revenue.

This proposal addresses zoning irregularities where RV, R 2.5, and the Wenatchee Urban Growth Area flow directly into RR20. Transitioning to RR10 would allow a more gradual decrease in density, maximizing the benefit of public services and transportation while alleviating some development pressures from more rural properties. This would promote urban transition growth, allowing a gradual transition to lower density while further maximizing the public benefit via eventual taxation and, separately, an increase in revenue for statewide K-12 funding by allowing DNR to transition to a better location to generate long-term revenue.

The site is situated on public roads and near existing bus, train, and airport services. This allows existing infrastructure to maximize its public benefit by enhancing its economies of scale.

If additional potential density is achieved at maximum residential yield, this site would still feature a lower density than neighboring developed sites. It would only nominally aesthetically affect land use in the area; the potential built-out landscape view would be altered only minimally, thanks to the eventual RR10 still being a relatively low density and existing development difficulties associated with the terrain.

This property has been vacant for many years. It has not provided the trust or the county with revenue, nor has it provided the community with housing or employment. We hope this step allows the site to achieve its highest and best use.

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

***Instructions for applicants*:**

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background

1. Name of proposed project, if applicable:
   Burch Mountain Rezone

2. Name of applicant:
   Washington State Department of Natural Resources

3. Address and phone number of applicant and contact person:

1111 Washington St SE, MS 47014
Olympia, WA 98504
Matthew Matulovich
564.669.0897

4. Date checklist prepared:
   02.12.2026

5. Agency requesting checklist:
   Chelan County

6. Proposed timing or schedule (including phasing, if applicable):
   As needed for county review and processing, 9-12 months.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.
   NO

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
   DNR departmental site review based upon section wide internal special concerns report. Report and departmental conclusions available upon request. Data present in checklist responces.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.
   No

10. List any government approvals or permits that will be needed for your proposal, if known.
    Comp Plan Map update & Rezone

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

    DNR hopes to amend the county comp plan map to allow for a rezone and then rezone 119 acres of school trust land near Wenatchee.
    The current zoning is RR-20. DNR hopes to achieve a zoning consistent with area properties that allows more density.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

    T23-0N R20-0E S16, Chelan County parcel 232016100000

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site:

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _Foothills_

b. What is the steepest slope on the site (approximate percent slope)?

A small area of 65-80%. Slope class II per DNRs SUVT(State Uplands Viewing Tool)

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

All Non Hydric- Cowiche silt loam, Burch loam, and Bjork silt loam. (SUVT)

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No known issues per SUVT. Some modeling flags small potential slide areas forreview(Eastside Slope Stability Model).

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No earthwork planned.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No earthwork planned.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

No project construction planned.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

None

2. Air

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

No construction/project planned

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

Nope

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None

3. **Water**

a. Surface Water:

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Three streams are shown on the site, all of which are listed as both continuous and intermittent. All flow into the Columbia. None appears to be fish-bearing. (SUVT)

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described
waters? If yes, please describe and attach available plans.

Nope

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected.
Indicate the source of fill material.

None

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

Nope

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

Nope

6) Does the proposal involve any discharges of waste materials to surface waters? If so,
describe the type of waste and anticipated volume of discharge.

Nope

b. Ground Water:

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

Nope

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

No change to the current runoff.

2) Could waste materials enter ground or surface waters? If so, generally describe.

No planned change to the site, no new waste materials will be generated.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

Site maintains current drainage patterns.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None

4. **Plants**

a. Check the types of vegetation found on the site:

__X_deciduous tree: alder, maple, aspen, other
_X_evergreen tree: fir, cedar, pine, other
_X_shrubs
_X__grass
____pasture
____crop or grain
____ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None

c. List threatened and endangered species known to be on or near the site.

No known threatened or endangered plants on site.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

No changes planned.

e. List all noxious weeds and invasive species known to be on or near the site.

No known noxious weeds.

5. **Animals**

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Deer, various birds, insects, and snakes.

b. List any threatened and endangered species known to be on or near the site.

This site is flagged as winter range for Mule Deer, overlaps or is within 1000' of Golden Eagle areas of interest, overlaps or is within 45000' of Grey Wolf areas of interest, overlaps or is within 6000' of Western Gray Squirrel area of interest. (SUVT)

c. Is the site part of a migration route? If so, explain.

Winter range for Mule Deer

f. Proposed measures to preserve or enhance wildlife, if any:

None

g. List any invasive animal species known to be on or near the site.

None known on site.

6. **Energy and Natural Resources**

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

None

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

Nope

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

None

7. **Environmental Health**

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal?
If so, describe.

Nope

1) Describe any known or possible contamination at the site from present or past uses.

No known contaminations.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None

4) Describe special emergency services that might be required.

No change to the site, no anticipated additional need for emergency services.

5) Proposed measures to reduce or control environmental health hazards, if any:

None

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indi-
cate what hours noise would come from the site.

None

3) Proposed measures to reduce or control noise impacts, if any:

None

8. **Land and Shoreline Use**

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is vacant land, surrounded mostly by vacant land and some small single-family residential lots.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No, no conversion planned.

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

Nope

c. Describe any structures on the site.

None

d. Will any structures be demolished? If so, what?

Nope

e. What is the current zoning classification of the site?

RR20

f. What is the current comprehensive plan designation of the site?

RR40

g. If applicable, what is the current shoreline master program designation of the site?

No shoreline.

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No, no critical areas listed in or near the site on the state's special concerns report.

i. Approximately how many people would reside or work in the completed project?

None

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any:

None

L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

No change in use planned. No compatibility change.

l. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None

9. **Housing**

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

None

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None

c. Proposed measures to reduce or control housing impacts, if any:

None

10. **Aesthetics**

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

No structures planned.

b. What views in the immediate vicinity would be altered or obstructed?

No change in views.

h. Proposed measures to reduce or control aesthetic impacts, if any:

None

11. **Light and Glare**

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

No change

b. Could light or glare from the finished project be a safety hazard or interfere with views?

Nope

c. What existing off-site sources of light or glare may affect your proposal?

None

d. Proposed measures to reduce or control light and glare impacts, if any:

None

12. **Recreation**

a. What designated and informal recreational opportunities are in the immediate vicinity?

Many indoor and outdoor recreational opportunities exist, from parks and trails to bowling alleys and gymnasiums.

b. Would the proposed project displace any existing recreational uses? If so, describe.

Nope

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

Nope

13. **Historic and cultural preservation**

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

Nope

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

Yes, DNRs archioligist review and recommendations attached.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

No development planned, no impact.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

No impact anticipated.

14. **Transportation**

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Burch Mt Road passes through the site, no additional impact will be added.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

The site is about 7000’ from Transit Route 28 on W Peters Street, about 22700’ as the crow flies from the local Amtrak station, and 44155’ as the crow flies from Pangborn Memorial Airport

b. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

Nope

c. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

Nope

d. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

No additional trips per day.

e. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

Nope

f. Proposed measures to reduce or control transportation impacts, if any:

None

15. **Public Services**

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

Nope

b. Proposed measures to reduce or control direct impacts on public services, if any.

None

16. **Utilities**

a. Circle utilities currently available at the site:

electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Nothing proposed

C. Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: _____

Name of signee _Matthew V Matulovich_____

Position and Agency/Organization _Transition Lands Program Manager WA DNR_

D. **SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS**

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

   No increase anticipated.

Proposed measures to avoid or reduce such increases are:

None

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

   No anticipated affect.

   Proposed measures to protect or conserve plants, animals, fish, or marine life are:

   None

3. How would the proposal be likely to deplete energy or natural resources?

   No anticipated depletion.

   Proposed measures to protect or conserve energy and natural resources are:

   None

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

No anticipated affect.

Proposed measures to protect such resources or to avoid or reduce impacts are:

None

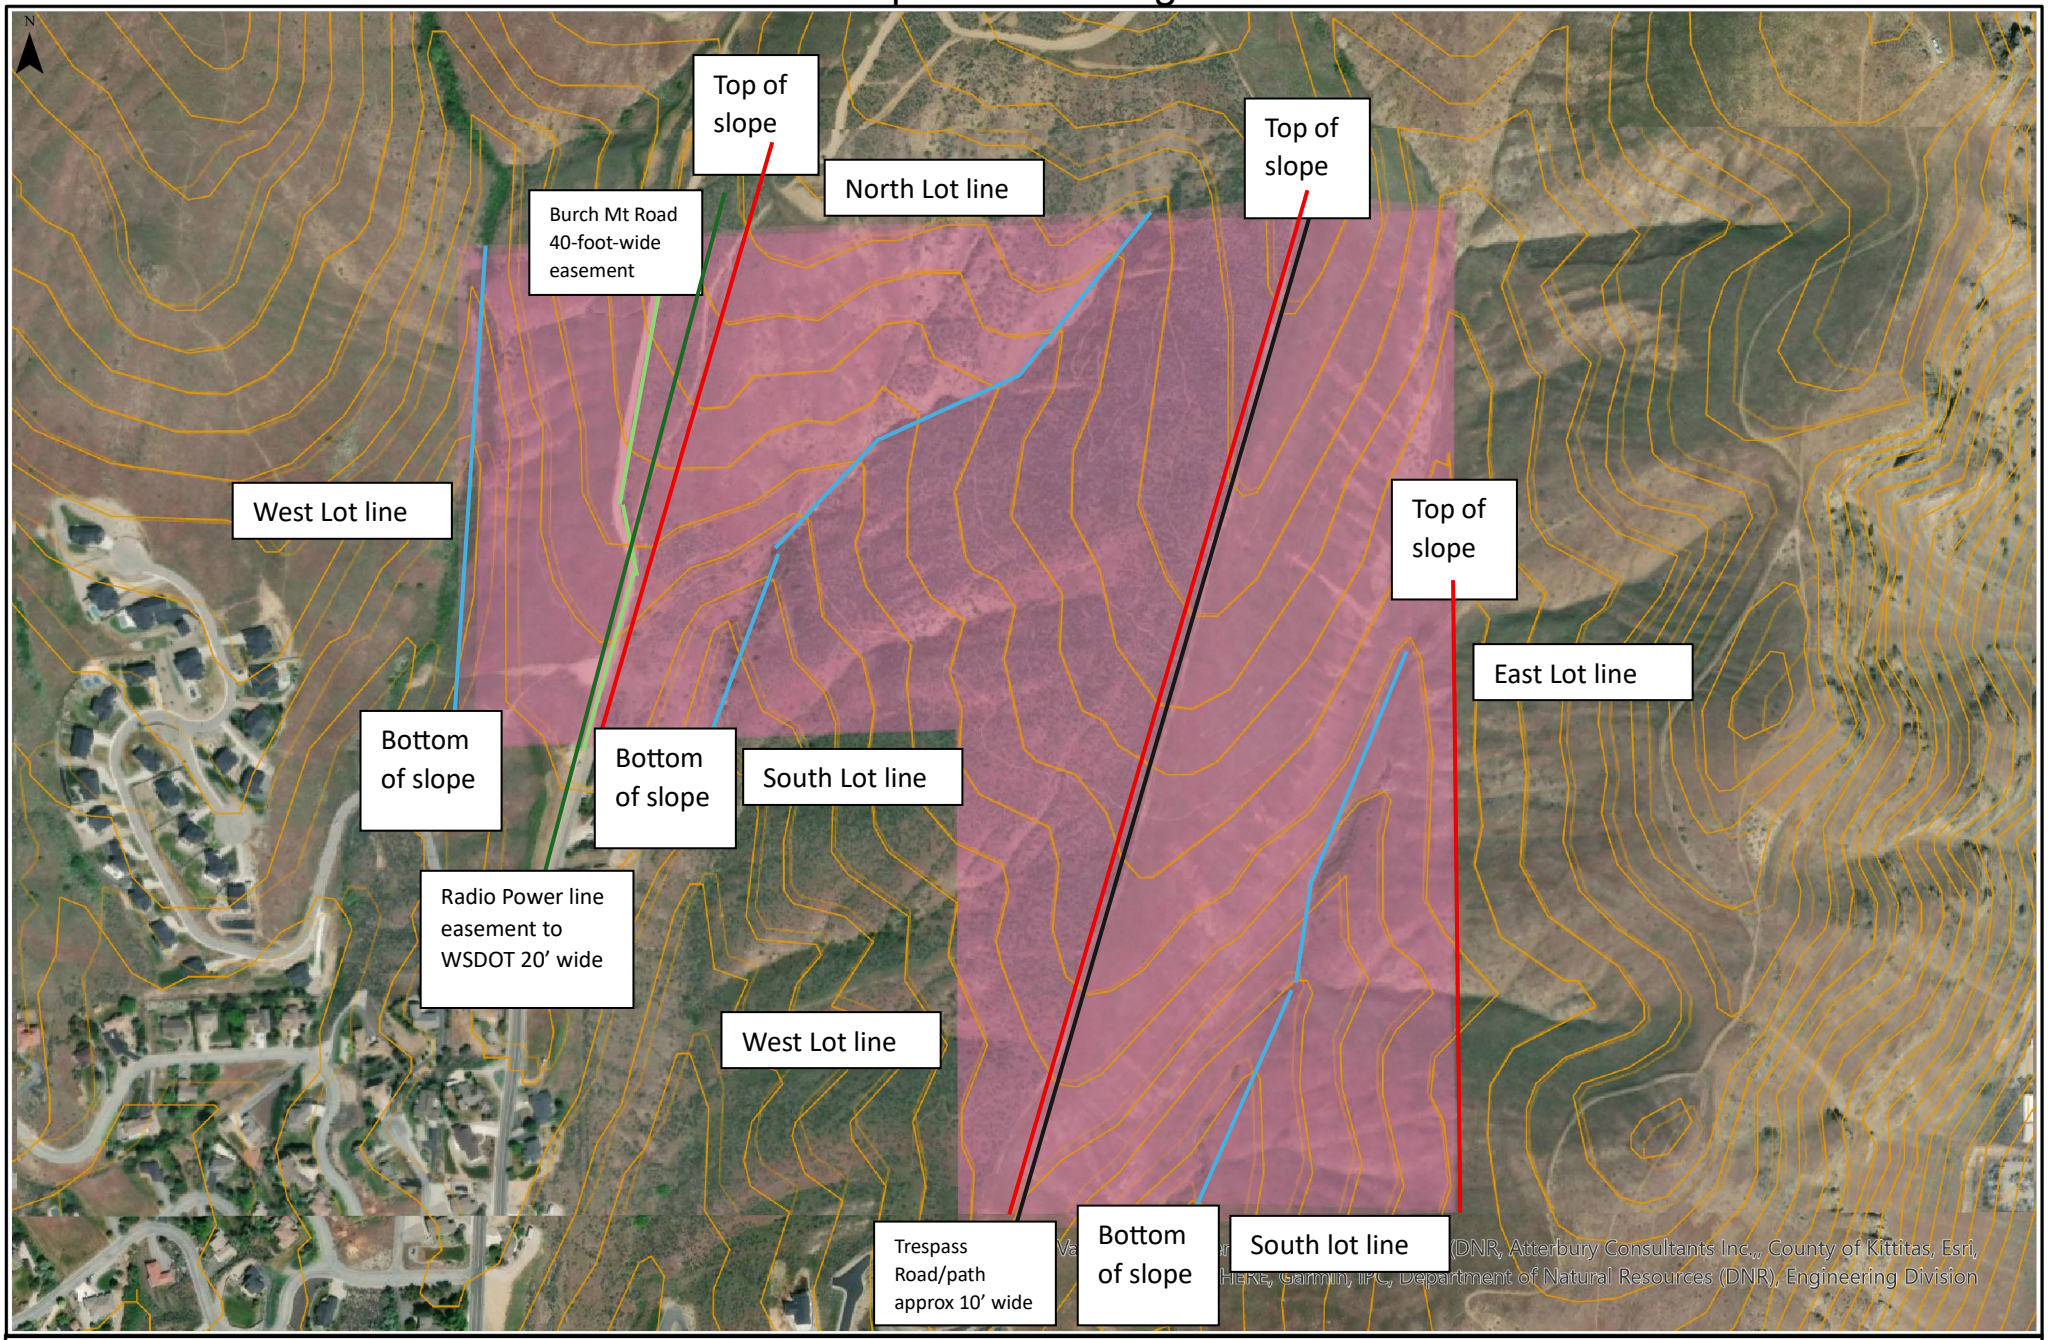
5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?



Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Proposed measures to reduce or respond to such demand(s) are:

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

Subject: Additional comment period for a SEPA Determination regarding CPA 26-067- WA DNR - Chelan County Dept. of Community Development
Attachments: CPA 26-067 - WA DNR - SEPA -DNS.pdf

Good afternoon,

Please see the attached SEPA Determination of Non-significance regarding WA DNR's application, File# CPA 26-067. This is a notification of a decision that was made regarding the application. The comment period ends on May 14, 2026.

If you have any questions pertaining to this application please feel free to contact the Chelan County Planner associated with this file, Susan Dretke, at 509-667-6225 or susan.dretke@co.chelan.wa.us.

Have a great week!

Cheers,

Ashley Fernandez

DETERMINATION OF NON-SIGNIFICANCE

PURSUANT to R.C.W 43.21C, NOTICE IS HEREBY GIVEN THAT on April 30, 2026 Chelan County Community Development (LEAD AGENCY) did issue a determination of non-signif icance relative to the environmental impact for the applications listed below. The lead agency for these proposals has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21.C.030 (2)(c). This decision was made after review of completed environmental checklist and other information on file with the lead agency.

CPA 26-063 Sanderson- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 10 (RR10) to Rural Residential Resource 5 (RR5). **Site Address:** 172 Whitetail Way Chelan, WA 98816; **Parcel Numbers:** 28-22-34-410-100

CPA 26-067 WA DNR- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 20 (RR20) to Rural Residential Resource 10 (RR10). **Site Address:** Unassigned, Wenatchee, WA 98801; **Parcel Numbers:** 23-20-16-100-000

CPA 26-060 McMahon - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 10 (RR10) to Rural Residential Resource 2.5 (RR2.5). **Site Address:** 7948 East Leavenworth Rd. Leavenworth, WA 98826; **Parcel Numbers:** 24-17-23-510-480

CPA 26-054 Hellickson- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Commercial Forest (FC) to Rural Residential/Resource 10 (RR10). **Site Address:** 10705 Fox Rd. Leavenworth, WA 98826; **Parcel Numbers:** 25-18-32-330-200

CPA 26-041 Campbell- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residentia l/Resource 5 (RR5) to Rural Residential/Resource 2.5 (RR2.5) **Site Address:** 24 Hugo Rd. Chelan, WA 98816; **Parcel Numbers:** 27-23-03-330-175

CPA 26-048 HMJD-Collins LLC- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) and Rural Residential/Resource 10 to Rural Residential/ Resource 2.5 (RR2.5) **Site Address:** Unassigned. Chelan, WA 98816; **Parcel Numbers:** 27-23-03-430-050

CPA 26-026 G&B Properties East LLC- An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/Resource 5 (RR5) to Rural Commercial (RC). **Site Address:** 18625 Beaver Valley Rd., Plain, WA 98826; **Parcel Numbers:** 26-17-13-720-007

CPA 26-007 Heart for Homes - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Industrial (RI) to Rural Commercial (RC). **Site Address:** 85 Chestnut St., Chelan Falls, WA 98817; **Parcel Numbers:** 27-23-32-515-096

This information is available to the public on request and may be reviewed at Chelan County Community Development, 316 Washington Street, #301, Wenatchee, WA, during normal business hours. **Comments on these determinations should be sent to the above listed address and must be received by May 14, 2026 at 5:00 PM.**

Date: April 30, 2026

Subject: Notice of Application for CPA 26-067 WA DNR - Chelan County Dept. of Community Development
Attachments: CPA 26-067 WA DNR NOA.pdf; Affidavit of posting NOA.pdf

Greetings,

Please find the attached Notice of Application for a Comprehensive Plan Amendment regarding WA DNR's property, File# CPA 26-067. This notice should be posted on the subject property by March 12, or as soon as possible. Please place in a prominent position on site and maintain it for 14 days, starting from the first day of posting. If you need a sign for posting, you may pick one up at our office.

Also attached is the affidavit of posting that needs to be filled out with the appropriate information after the 14-day comment period, signed before a notary, and the original returned to your planner. If your affidavit of posting is not returned to your planner, your file may be placed on hold.

If you have any questions pertaining to your application please contact the Chelan County Planner associated with this file, Susan Dretke, at 509-667-6225 or Susan.Dretke@co.chelan.wa.us.

Thank you,

Jessica Thompson

NOTICE OF APPLICATION AND ENVIRONMENTAL REVIEW

Notice is hereby given that the Chelan County Department of Community Development has received and found the following land use application to be complete and ready for processing, public review, and comment. We have further determined that this proposal is unlikely to have a significant adverse impact on the environment. The department expects to issue a Determination of Non-Significance (DNS) in accordance with the DNS process found in WAC 197-11-340(2). The proposal may include mitigation measures under applicable codes and public review processes. Mitigation measures may be required regardless of whether an EIS is prepared; however, possible mitigation measures are unknown at the issuance of this notice. A copy of the subsequent threshold determination for this proposal may be obtained upon request to this department. **This may be the only opportunity to comment on the environmental impact of this proposal.**

CPA 26-063 Sanderson - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 10 (RR10) to Rural Residential/Resource 5 (RR5). 172 Whitetail Way, Chelan, WA 98816 APN: 28-22-34-410-100.

CPA 26-067 WA DNR - An application for a Comprehensive Plan Map Amendment was submitted to change the land use designation for the subject property from Rural Residential/ Resource 20 (RR20) to Rural Residential/Resource 10 (RR10). Unassigned. Wenatchee. WA 98801; APN: 23-20-16-100-000.

On March 12, 2026, this application was noticed to the public, and no action will be taken on this project until the agency comment period ends March 26, 2026.

All reports and file of record are available at 316 Washington St., Suite 301, Wenatchee, WA 98801 for review. Public comments will be accepted at any time prior to the close of the public record on project permits. Chelan County welcomes written public comment on all proposed land use actions. Comments must include your name, current address, and original signature, should be as specific as possible, and may be mailed or personally delivered at the address listed above. Any person has the right to receive notice, participate in any hearings, request a copy of the final decision, and appeal the decision as provided by law.

As I searched through all of the paperwork, I'm still lookin for motive.

#1 Why does DNR care what the zoning is on public land unless it has future plans?

#2 What does this have to do with the Chelan-Douglas Land Trust tying to access this land in connection with the Lookout trail system above Ohme Gardens?

Thanks for your help,
Bob Farnus
(One of the Mountain Vista Estates owners adjoining the DNR property)

From: Richmond Petty, REHS

Date: 03/30/26

RE: Washington DNR (CPA 26-067) Comments

I have reviewed the above development proposal for a Comprehensive Plan Map Amendment. The request to change the land use designation for the subject property from Rural Residential/Resource 20 (RR20) to Rural Residential/Resource 10 (RR10). The subject property is located off Burch Mountain Rd., Wenatchee, WA 98801 (county tax parcel: 232016100000)

As proposed, I have no objections to further approval of this project.

- Parcel is vacant with no existing septic or drinking water records.

Any changes to the project may require additional Health District review.

Fees for review of land-use applications have been established by the Chelan-Douglas Health District Board of Health. The District will bill the applicant upon receipt of our comments (attached).

Project	CDHD 2026 fees
Other Land Use review (per hour)	$125
Administration Fee	$5

Hello Susan,

This consultation is in response to CPA 26-067 WA DNR, SEPA Determination of Non-significance. This land use change allows an additional dwelling unit to be constructed with the ratio of 1 residence per 10 acres. If and when there is a planned development we look forward to reviewing those future plans.

On behalf of Amelia Stanger, Interim Tribal Historic Preservation Officer.

Subject:	Opposition to Land Use Designation Change - Project File No: CPA 26-067
Date:	Thursday, March 26, 2026 11:33:02 AM

WARNING! This email is from an EXTERNAL SOURCE.
Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Ms. Dretke,

I am writing as the owner of 111 Rolling Hills Lane, Wenatchee to express my strong opposition to the proposed re-designation of Parcel Number: 232016100000 from RR20 to RR10 as discussed in Project File No: CPA 26-067.

As a nearby property owner, I believe this change will have a significant negative impact on our community, specifically:

Impact on Neighborhood Character: This area consists primarily of single-family homes. Introducing a change in the designation of this land will allow for future sales and development. This development will significantly decrease the quality of life, privacy, and safety for existing residents.

Traffic and Safety: The proposed development will increase traffic on Burch Mountain Road, which is already unsuitable for high-volume or commercial vehicles. This poses a danger to families and children.

Environmental/Infrastructure Concerns: With recent developments off Burch Mountain Road, we have already lost significant land protection for steppe zone and mule deer migration. This change in designation would lead to future loss of these carefully balanced environments.

I request that the Chelan County Community Development Committee rejects this rezoning request from the Washington State Department of Natural Resources to maintain the integrity of our neighborhood and our foothill habitats.

Sincerely,

Bert and Meilyn Ivey

SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

***Instructions for applicants*:**

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background

1. Name of proposed project, if applicable:
   Burch Mountain Rezone

2. Name of applicant:
   Washington State Department of Natural Resources

3. Address and phone number of applicant and contact person:

1111 Washington St SE, MS 47014
Olympia, WA 98504
Matthew Matulovich
564.669.0897

4. Date checklist prepared:
   02.12.2026

5. Agency requesting checklist:
   Chelan County

6. Proposed timing or schedule (including phasing, if applicable):
   As needed for county review and processing, 9-12 months.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.
   NO

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.
   DNR departmental site review based upon section wide internal special concerns report. Report and departmental conclusions available upon request. Data present in checklist responces.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.
   No

10. List any government approvals or permits that will be needed for your proposal, if known.
    Comp Plan Map update & Rezone

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

    DNR hopes to amend the county comp plan map to allow for a rezone and then rezone 119 acres of school trust land near Wenatchee.
    The current zoning is RR-20. DNR hopes to achieve a zoning consistent with area properties that allows more density.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

    T23-0N R20-0E S16, Chelan County parcel 232016100000

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site:

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other _Foothills_

b. What is the steepest slope on the site (approximate percent slope)?

A small area of 65-80%. Slope class II per DNRs SUVT(State Uplands Viewing Tool)

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

All Non Hydric- Cowiche silt loam, Burch loam, and Bjork silt loam. (SUVT)

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No known issues per SUVT. Some modeling flags small potential slide areas forreview(Eastside Slope Stability Model).

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

No earthwork planned.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

No earthwork planned.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

No project construction planned.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

None

2. Air

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

No construction/project planned

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

Nope

c. Proposed measures to reduce or control emissions or other impacts to air, if any:

None

3. **Water**

a. Surface Water:

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Three streams are shown on the site, all of which are listed as both continuous and intermittent. All flow into the Columbia. None appears to be fish-bearing. (SUVT)

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described
waters? If yes, please describe and attach available plans.

Nope

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected.
Indicate the source of fill material.

None

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

Nope

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

Nope

6) Does the proposal involve any discharges of waste materials to surface waters? If so,
describe the type of waste and anticipated volume of discharge.

Nope

b. Ground Water:

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

Nope

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

No change to the current runoff.

2) Could waste materials enter ground or surface waters? If so, generally describe.

No planned change to the site, no new waste materials will be generated.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

Site maintains current drainage patterns.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

None

4. **Plants**

a. Check the types of vegetation found on the site:

__X_deciduous tree: alder, maple, aspen, other
_X_evergreen tree: fir, cedar, pine, other
_X_shrubs
_X__grass
____pasture
____crop or grain
____ Orchards, vineyards or other permanent crops.
____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
____water plants: water lily, eelgrass, milfoil, other
____other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None

c. List threatened and endangered species known to be on or near the site.

No known threatened or endangered plants on site.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

No changes planned.

e. List all noxious weeds and invasive species known to be on or near the site.

No known noxious weeds.

5. **Animals**

a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site.

Deer, various birds, insects, and snakes.

b. List any threatened and endangered species known to be on or near the site.

This site is flagged as winter range for Mule Deer, overlaps or is within 1000' of Golden Eagle areas of interest, overlaps or is within 45000' of Grey Wolf areas of interest, overlaps or is within 6000' of Western Gray Squirrel area of interest. (SUVT)

c. Is the site part of a migration route? If so, explain.

Winter range for Mule Deer

f. Proposed measures to preserve or enhance wildlife, if any:

None

g. List any invasive animal species known to be on or near the site.

None known on site.

6. **Energy and Natural Resources**

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

None

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

Nope

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

None

7. **Environmental Health**

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal?
If so, describe.

Nope

1) Describe any known or possible contamination at the site from present or past uses.

No known contaminations.

2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

None

3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

None

4) Describe special emergency services that might be required.

No change to the site, no anticipated additional need for emergency services.

5) Proposed measures to reduce or control environmental health hazards, if any:

None

b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

None

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indi-
cate what hours noise would come from the site.

None

3) Proposed measures to reduce or control noise impacts, if any:

None

8. **Land and Shoreline Use**

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Current use is vacant land, surrounded mostly by vacant land and some small single-family residential lots.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

No, no conversion planned.

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

Nope

c. Describe any structures on the site.

None

d. Will any structures be demolished? If so, what?

Nope

e. What is the current zoning classification of the site?

RR20

f. What is the current comprehensive plan designation of the site?

RR40

g. If applicable, what is the current shoreline master program designation of the site?

No shoreline.

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

No, no critical areas listed in or near the site on the state's special concerns report.

i. Approximately how many people would reside or work in the completed project?

None

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any:

None

L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

No change in use planned. No compatibility change.

l. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

None

9. **Housing**

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

None

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

None

c. Proposed measures to reduce or control housing impacts, if any:

None

10. **Aesthetics**

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

No structures planned.

b. What views in the immediate vicinity would be altered or obstructed?

No change in views.

h. Proposed measures to reduce or control aesthetic impacts, if any:

None

11. **Light and Glare**

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

No change

b. Could light or glare from the finished project be a safety hazard or interfere with views?

Nope

c. What existing off-site sources of light or glare may affect your proposal?

None

d. Proposed measures to reduce or control light and glare impacts, if any:

None

12. **Recreation**

a. What designated and informal recreational opportunities are in the immediate vicinity?

Many indoor and outdoor recreational opportunities exist, from parks and trails to bowling alleys and gymnasiums.

b. Would the proposed project displace any existing recreational uses? If so, describe.

Nope

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

Nope

13. **Historic and cultural preservation**

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers ? If so, specifically describe.

Nope

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

Yes, DNRs archioligist review and recommendations attached.

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

No development planned, no impact.

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

No impact anticipated.

14. **Transportation**

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Burch Mt Road passes through the site, no additional impact will be added.

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

The site is about 7000’ from Transit Route 28 on W Peters Street, about 22700’ as the crow flies from the local Amtrak station, and 44155’ as the crow flies from Pangborn Memorial Airport

b. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

Nope

c. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

Nope

d. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

No additional trips per day.

e. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

Nope

f. Proposed measures to reduce or control transportation impacts, if any:

None

15. **Public Services**

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

Nope

b. Proposed measures to reduce or control direct impacts on public services, if any.

None

16. **Utilities**

a. Circle utilities currently available at the site:

electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other _____

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Nothing proposed

C. Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: _____

Name of signee _Matthew V Matulovich_____

Position and Agency/Organization _Transition Lands Program Manager WA DNR_

D. **SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS**

(**IT IS NOT NECESSARY** to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

   No increase anticipated.

Proposed measures to avoid or reduce such increases are:

None

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

   No anticipated affect.

   Proposed measures to protect or conserve plants, animals, fish, or marine life are:

   None

3. How would the proposal be likely to deplete energy or natural resources?

   No anticipated depletion.

   Proposed measures to protect or conserve energy and natural resources are:

   None

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

No anticipated affect.

Proposed measures to protect such resources or to avoid or reduce impacts are:

None

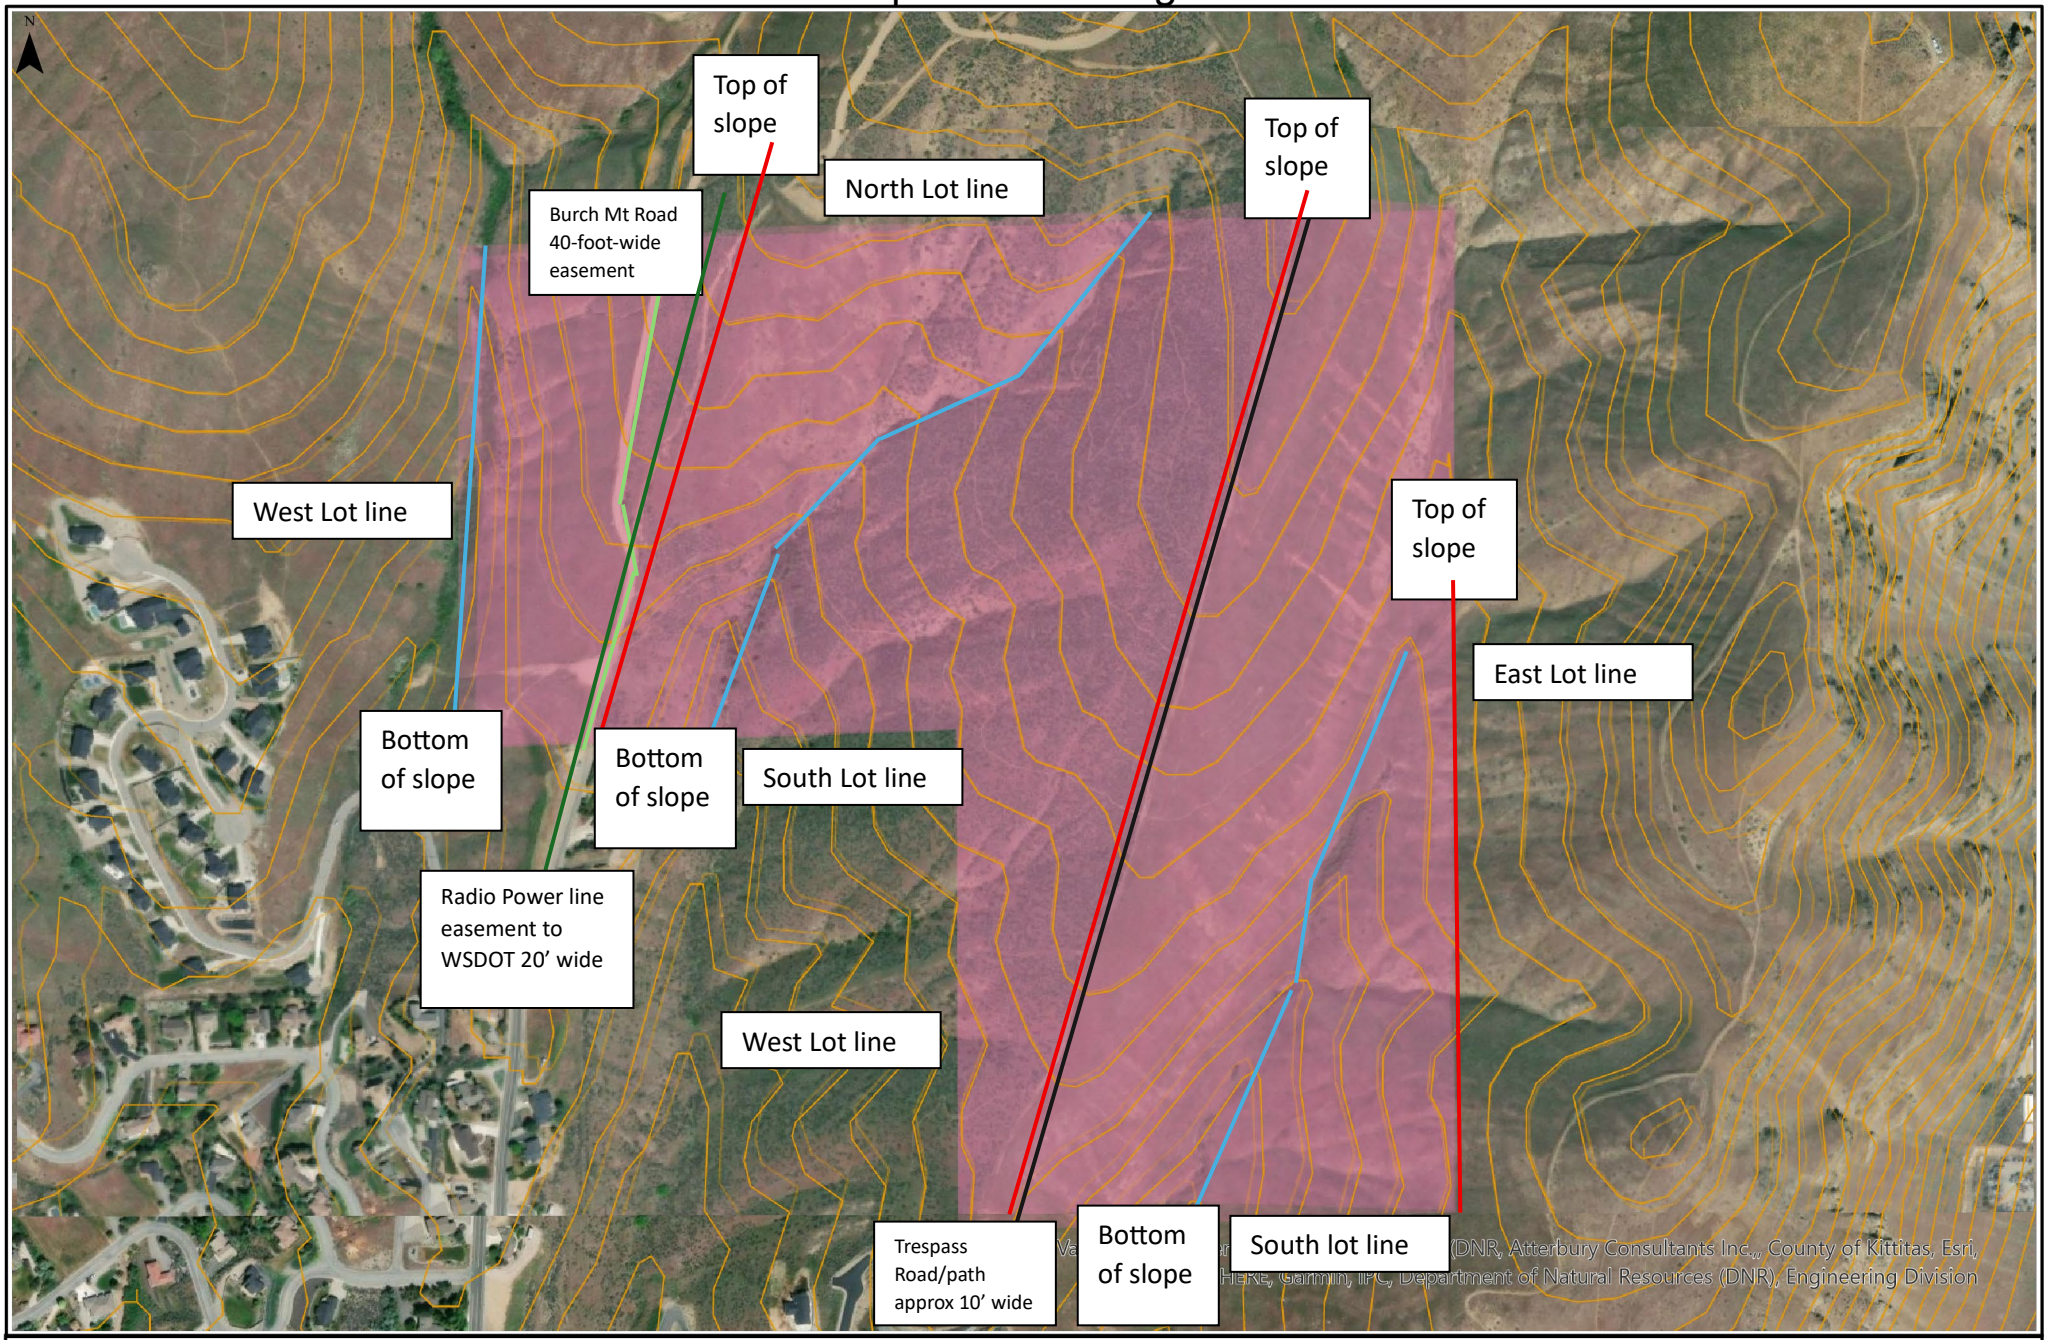
5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?



Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Proposed measures to reduce or respond to such demand(s) are:

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

Re: Mineral potential review for Burch Mountain

As requested, I have completed a remote review of surface and subsurface mineral potential, as well as geological hazards, for the Burch Mountain project. This project consists of portions of section 16, T23 R20E in Chelan County, as shown in Figure 1. It is my understanding that this review is part of a comprehensive plan amendment and rezone for the property, with eventual disposal of the property. This letter documents the scope of my review, my findings and my conclusions.

I reviewed the 1:100,000-scale geologic mapping and ground response maps from the Washington Geologic Information Portal (Washington Department of Natural Resources, 2025), Department of Natural Resources lidar digital elevation models and derivatives, and the U.S. Department of Agriculture online soil survey (USDA, 2025). I also reviewed the active surface mine reclamation permit data on the Washington Geologic Information Portal for nearby mining activities, and the mining/minerals overlay on the Portal for information about minerals and historical mining districts. I used additional maps and resources as cited.

The subject property is 115 acres located west of the Columbia River, and north of the community of Wenatchee. Burch Mountain Road crosses the western portion of the property. According to aerial imagery, the property is shrub-steppe environment, with limited riparian vegetation along several drainages. West and south of the subject property is residential, with shrub-steppe land to the north and east. Lidar imagery indicates south-verging drainages with north-south trending ridges between the drainages. Minor drainages off the ridge slopes join the more major drainages. Personal professional experience supports that all drainages are dry most of the year, with limited flow only after intense precipitation or during seasonal snowmelt. Lidar imagery indicates occasional rocky outcrops within the more major drainages. Roads and trails are visible in both lidar and aerial imagery.

The 1:100k-scale geologic mapping indicates the subject property to be underlain by Precambrian Swakane Biotite Gneiss (DNR, 2025). Gneiss is a metamorphic rock that forms under high temperatures and pressures deep in the subsurface. More recent studies suggest the Swakane Biotite Gneiss to be Cretaceous in age, with the protolith (original rock) likely composed of sediments outboard of a volcanic arc system that were incorporated into deeper levels of the system by underthrusting (Matzel et al., 2004; Sauer et al., 2018). Although not shown on the 1:100k-scale geologic map, the lower slopes of Burch Mountain, including the subject property, are mantled by sediments associated with late Pleistocene glacial outburst flooding (Waitt et al., 2018). Personal professional experience supports that there are glacial erratic boulders on or near the subject property that were deposited by grounded ice bergs transported by outburst floods. These are relatively rare in the region and geologically important as they mark near high-water for the outburst floods. An onsite investigation would be required to verify the location of these erratic boulders. The soil survey indicates silt loam, sandy clay loam, and sandy loam up to 60-inches deep on the subject property (USDA, 2025). This soil is consistent with soils formed on slope-wash originating from metamorphic rocks and on glacial outburst flood sediments. The subject property is not located within a volcanic hazard zone nor a tsunami hazard zone. There is low liquefaction susceptibility from ground shaking during an earthquake. Liquefaction occurs when saturated sediments lose strength during strong shaking. There are no mapped landslides on the property.

Within an approximate 6-mile radius of the subject property there are four surface mine reclamation permits, all within sand and gravel (DNR, 2025). All are shown as mapped within sediments associated with glacial outburst flood deposits. Although the subject property does have outburst flood deposits, personal professional experience supports that these are relatively thin or consist of individual boulders, neither of which are suitable for an aggregate mine. Locally, there are no aggregate mines within the gneiss. The banding and layering common in the gneiss prevent it from being a suitable aggregate resource.

The subject property is located within the historical Wenatchee mining district. Significant gold was mined out of this district (Stanton, 2022). Metals minerals were hosted in Oligocene to Eocene sedimentary rocks and have not been found in the gneiss. The minerals overlay on the Geologic Information Portal indicates observations of massive quartz and limestone or marble within the gneiss that could be suitable for building stone (DNR, 2025). However, these have never been mined out of the gneiss and the subject property does not appear to have significant exposure of rock to assess the suitability. There are no oil/gas wells within over a 6-mile radius of the subject property. Oil or gas would not be sourced within gneiss.

In summary, the subject property likely does not have an aggregate resource, nor metal or industrial mineral, building rock, or oil/gas resources. The subject property may have glacial erratics rafted on glacial outburst flooding. If present, these are geologically significant as they mark near high-water for the flooding.

If you have questions or require additional information, please don't hesitate to contact me.

Kelsay M. Stanton, LG, Ph.D.
Mining and Minerals Program Manager

Kelsay.Stanton@dnr.wa.gov

Limitations

This letter is a cursory remote review of the surface and subsurface mineral potential for the above-mentioned property. The conclusions presented in this report are based on information available at the time it was written. It is not possible to fully define geologic conditions, mineral potential, or geologic hazards based on this limited investigation.

Narrative-

The Washington State Department of Natural Resources (DNR) hopes to amend the Comprehensive Plan Map to eventually allow a rezone of:

Portion of Section 16, Township 23 North, Range 20 East, W.M.,
Chelan County, Washington.
Land Description
The Northwest Quarter of the Northeast Quarter, and the East Half of Section 16, Township 23 North, Range 20 East, Willamette Meridian, Chelan County, Washington, according to U.S. Government subdivision procedures.
Subject to Burch Mountain County Road and Washington State Department of Transportation (WSDOT) utility easement.
or

Chelan County parcel number- 232016100000

DNR would like to change the comprehensive plan map designation from RR20 to RR10. No physical site changes are planned by DNR. The Comp Plan Map change and rezone will likely lead to an eventual sale. Specific comp plan map is 65.

This site is a Common School Trust property that does not currently provide revenue for statewide K-12 school construction. Shifting this asset to a denser zoning would allow better transitioning from its neighboring urban growth area and dense rural zoning, creating a gradual transition to the more rural RR20. The change would increase the parcel's socioeconomic value to the county via urban adjacent density and tax revenue.

This proposal addresses zoning irregularities where RV, R 2.5, and the Wenatchee Urban Growth Area flow directly into RR20. Transitioning to RR10 would allow a more gradual decrease in density, maximizing the benefit of public services and transportation while alleviating some development pressures from more rural properties. This would promote urban transition growth, allowing a gradual transition to lower density while further maximizing the public benefit via eventual taxation and, separately, an increase in revenue for statewide K-12 funding by allowing DNR to transition to a better location to generate long-term revenue.

The site is situated on public roads and near existing bus, train, and airport services. This allows existing infrastructure to maximize its public benefit by enhancing its economies of scale.

If additional potential density is achieved at maximum residential yield, this site would still feature a lower density than neighboring developed sites. It would only nominally aesthetically affect land use in the area; the potential built-out landscape view would be altered only minimally, thanks to the eventual RR10 still being a relatively low density and existing development difficulties associated with the terrain.

This property has been vacant for many years. It has not provided the trust or the county with revenue, nor has it provided the community with housing or employment. We hope this step allows the site to achieve its highest and best use.

APPLICABILITY SECTION

The following have their own individual application. Do not use this form for:

1. Boundary Line Adjustments. Please use corresponding Boundary Line Adjustment Application Form.
2. Certificate of Exemptions. Please use corresponding Certificates of Exemption Application Form.
3. Shoreline Permits. Provide the JARPA form along with the corresponding Supplemental Form, as necessary.
4. Building and Fire Permits.
5. Pre-Applications.

The following attachments are required for a complete application:

1. Copy of Deed or Proof of Ownership
2. Supplemental Forms, if applicable
3. Completed Aquifer Recharge Section, Marijuana Disclosure Section and Site Plan Checklist
4. All information, documents, studies and reports demonstrating compliance with all statutory and regulatory criteria and requirements and the Chelan County Comprehensive Plan
5. The applicant is required to review and submit documentation showing compliance with all Chelan County Code, including but not limited to Title 4, Title 11, Title, 12, Title 14, and Title 15.

File(s) No. _____

GENERAL INFORMATION

Please provide a narrative of the proposed project including, but not limited to, all proposed activities, uses and development (attach additional sheets if needed):

DNR would like to change the comp plan map designation from RR20 to RR10.

No physical site changes planned. Comp Plan Map change and rezone may lead to eventual sale.

☒ Narrative attached

Please complete the following:

1. Any related files (such as Pre-Applications): SEPA Checklist, CPA Supplemental information
2. Is the subject property located within an Urban Growth Area (UGA)? ☑ No ❑ Yes
   If "yes", which UGA? _____
3. Please describe adjacent land uses in all directions around the subject property:
   North: 91 Undeveloped Land-range, open land undeveloped
   South: 11 Household, single family units
   East: 94 Open space land classified under chapter 84.34 RCW
   West: 11 Household, single family units
4. What is the current use of the property? 69 Miscellaneous Services
5. Sanitation Disposal: ☑ N/A ❑ Septic Permit ❑ Sewer District: _____
6. Water Source: ☑ N/A ❑ Single Private Well ❑ Shared Private Well ❑ Group B
   ❑ Public Water Supplier: _____
7. Irrigation Water:
   ☑ N/A ❑ Yes (Private) ❑ Yes (Public) Irrigation District/Purveyor: _____
8. Fire District: Chelan County FPD 01 School District: Wenatchee SD
9. Power Service: No power
10. Are there critical areas or critical area buffers on the property?
    ❑ Airport Overlay: _____
    ❑ Aquifer Recharge Area (see attached)
    ❑ Floodplain / Floodway _____

    Geologically Hazardous Areas (11.86.020) on the site or within the specified distance of the site:
    ❑ Alluvial Fan (250') ❑ Known Historic Hazardous Area (250') ☑ Slopes > 40% (250')
    ❑ Erosive soils (on-site) ☑ Landslide ❑ Snow Avalanche (500')
    ☑ Habitat/Riparian Area, protected species/area: No DNR internal concerns. Evidence of Grey Wolf, Mule Deer, Steppe zone
    ☑ Streams / Waterbodies: 1 potential fish-bearing stream on site ❑ Shoreline Environment Designation: _____
    ☑ Drainage or Seasonal Stream: _____ ❑ Wetland, if so what category: _____
    ☑ Cultural or Archeological: "...a probability for cultural resources to be present." State Archaeologist comments attached.
11. Will landfill be required? ☑ No ❑ Yes, approximate _____(cubic yards)
12. Will excavation be required? ☑ No ❑ Yes, approximate _____(cubic yards)
13. Has site preparation been started on the site? If so, to what extent?
    No site prep or site work required.
14. Are there plans for future additions, expansions, or further activity related to or connected with the proposal?
    No changes to site planned.

15. Provide a development schedule with the approximated dates of commencing and completing construction or proposed activity:

No changes to site planned.

16. Are there any other applications pending for governmental approvals for this or other proposal affecting the property coverd by this proposal? ☑ No ❑ Yes, please list:

No known "other proposal"s that are not directly related to this proposal (SEPA checklist)

"Does not apply*"--- "We do not meet the standard of "An applicant seeking to develop property.."

AQUIFER RECHARGE AREA DISCLOSURE SECTION

Exempt from this section only are Single Family Residences and their associated development per CCC 11.82.060.An applicant seeking to develop property which requires a development permit, shall submit with the permit application this certified statement, which lists each of the evaluation criteria and shall indicate whether the criteria "applies" or "does not apply" to the site or development. "Unknown" or similar responses will not be accepted.

If the development meets criteria A, B, C, or D or if the site or development meets any two of the remaining criteria, the Department will direct the applicant to determine the vulnerability rating for the development pursuant to Section 11.82.050 Aquifer Recharge Areas. If the development has a high or medium vulnerability rating, the development shall be subject to the performance standards of Section 11.82.060.

If an applicant's statement asserts that the criteria of do not apply to the development, the Department will accept the statement and proceed with the permitting process. If any statement is incorrect, the applicant will be advised in writing to either; (a) provide an amended statement adding the evaluation criteria as being applicable and determine the vulnerability rating of the development pursuant to Section 11.82.050, or (b) present sufficient countering information clearly establishing that the basis for the Department's concern is incorrect. If the applicant selects to proceed under (b), upon receipt of the applicant's information, the Department shall review the information and obtain whatever additional assistance may be required to resolve the issue. The final determination as to whether a determination of vulnerability is required shall be made by the Administrator.

EVALUATION CRITERIA

The applicant is required to determine the vulnerability rating for **any development permit**, not otherwise exempted, if the site or development meets criteria A, B, C, or D or meets two or more of the remaining criteria below:

Please write the word(s) **"Applies** or **"Does Not Apply"** on the lines before each of the following statements:

Does Not apply* **A.** Within a wellhead protection area designated under WAC 246-290; *Wellhead Protection Area: The surface and subsurface area surrounding a well or well field for a distance of 100 feet, supplying a public water system, through which contaminants are reasonably likely to move toward and reach such water well or well field.

Does Not apply* **B.** Within an aquifer recharge area mapped and identified by a qualified ground water scientist;

Does Not apply **C.** The site will be utilized for hazardous substance, (as now or hereafter defined in RCW 70.105D.020(7)), processing storage or handling in applications or quantities larger than is typical of household use;

Does Not apply* **D.** The site will be utilized for hazardous waste treatment and storage as set forth in RCW 70.105 Hazardous Waste Management, as now or hereafter amended;

Does Not apply* **E.** The site contains highly permeable soils (please reference WAC 246-272A-0220 for Soil Table and Descriptions).

N/A **F.** Within a sole source aquifer recharge area designated pursuant to the Federal Safe Drinking Water Act **(None currently designated in Chelan County)**;

N/A **G.** Within an area established for special protection pursuant to a groundwater management program, chapters 90.44, 90.48 and 90.54 RCW, and Chapters 173-100 and 173-200 WAC **(None currently designated in Chelan County)**;

Does Not apply* **H.** The development involves a proposed major or short subdivision and includes present or future plans to construct three or more dwelling units where the dwelling units will not be connected to a public sewer system and any of the lots are less than 1 net acre in size;

Does Not apply* **I.** The proposed commercial and industrial site is not on a public sewer system and the main structure exceeds 4,000 square feet;

Does Not apply* **J.** The proposed use is as a commercial feedlot;

Does Not apply* **K.** The development is within 200 feet of the ordinary high water mark of a perennial river, stream, lake or pond.

Depending upon soil depths from the surface, the following soil series within Chelan County are considered to be highly permeable soils:

Ardenvoir: ArF, 27-43 inches (depth from surface), very gravelly sandy loam

Anatone: AkD, 5-14 inches (depth from surface), very gravelly silt loam

Beverly: Be, 17-24 inches (depth from surface), very gravelly sandy loam; Bf, 17-24 inches (depth from surface), very gravelly sandy loam; Bg, 0-10 inches (depth from surface), very gravelly loamy fine sand; Bg, 17-24 inches (depth from surface), very gravelly sandy loam

Brief: BrA, BrB, BrC, Brd, 26-60 inches (depth from surface), very gravelly sandy loam

BsD, 26-60 inches (depth from surface), very gravelly sandy loam

Chelan: CgB, CgC, CgD, CgE, 35-60 inches (depth from surface), very gravelly sandy loam; ChC, ChE, 35-60 inches (depth from surface), very gravelly sandy loam; CkD, CkE, 35-60 inches (depth from surface), very gravelly sandy loam; CIA, CIB, CIC, CID, CIE, 35-60 inches (depth from surface), very gravelly sandy loam

Jumpe: JmD, 10-60 inches (depth from surface), very stony silt loam; JnF, 0-60 inches (depth from surface), very stony silt loam

Loneridge: LoD, LoF, 0-10 inches (depth from surface), very stony loam; 10-16 inches (depth from surface), very gravelly clay loam

Malaga: MaA, MaC, 15-19 inches (depth from surface), very gravelly sandy loam

Peshastin: PhB, PhC, 18-60 inches (depth from surface), very cobbly sandy loam; PID, PIE, 18-60 inches (depth from surface), very cobbly loam

Pogue: PsE, 0-17 inches (depth from surface), very stony fine sandy loam

Stemilt: StD, StE, 17-60 inches (depth from surface), very cobbly silty clay loam

Supplee: SuA, SuB, SuC, SuD, SuE, 0-6 inches (depth from surface), Very fine sandy loam; 18-31 inches (depth from surface), very gravelly sandy loam

Thow: TgD, 10-60 inches (depth from surface), very gravelly sandy loam; ThE 10-60 inches (depth from surface), very gravelly sandy loam

Tronsen: TrD, TrE, 8-60 inches (depth from surface), very gravelly clay loam

---

CANNABIS DISCLOSURE SECTION

SUB-SECTION I: Circle

I AFFIRM there **IS NOT** or **IS** (circle one) an existing or pending Liquor and Cannabis Board (LCB) license or approval for cannabis production, processing, or retail located on the property that is the subject of the requested development permit or approval.

If you circled "**IS NOT**" above, proceed to Sub-Section III of this form.

If you circled "**IS**" above, proceed to Sub-Section II of this form.

SUB-SECTION II: You must read the below statements, initial on the space provided, and then proceed to Sub-Section III.

_____ I ACKNOWLEDGE AND UNDERSTAND that all cannabis-related activities, development, uses and construction must comply with Chelan County regulations, including but not limited to Chelan County Code Section 11.100.

_____ I ACKNOWLEDGE AND UNDERSTAND that only those cannabis-related uses authorized pursuant to Chelan County Code Section 11.100 are permitted within Chelan County. All other commercial and noncommercial licensed or registered cannabis uses, including but not limited to cannabis research facilities and medical cannabis cooperatives, are prohibited within all zones of Chelan County.

_____ I ACKNOWLEDGE AND UNDERSTAND that pursuant to Chelan County Code Section 11.100 a conditional use permit is required to engage in the production or processing of cannabis within Chelan County, and that all cannabis producers and processors must register annually with Chelan County and pay the appropriate registration fee.

_____ I ACKNOWLEDGE AND UNDERSTAND that it is the responsibility of the property owner to submit for and obtain all necessary development permits and approvals prior to engaging in cannabis-related activities, development, uses or construction, including but not limited to conditional use permits for the production or processing of cannabis, building permits, change of use/occupancy permits, shoreline permits, variances, and mechanical permits.

SUB-SECTION III: Please select one of the following:

☒ I certify with the signature below that the building or land use permit requested **IS NOT** related to or in any way supportive of existing or planned cannabis-related activities, development, uses or construction on the property. I further certify that any authorized activities, development, uses or construction **WILL NOT** be utilized to support or expand cannabis-related activities, development, uses or construction.

☐ I certify with the signature below that the building or land use permit requested **IS** related to or in support of existing or planned cannabis- related activities, development, uses or construction on the property. I certify that any authorized activities, development, uses or construction will be in strict compliance with LCB licensure requirements and all applicable laws and regulations including but not limited to Chelan County Code, Chapter 69.50 RCW (Uniform Controlled Substances Act), Chapter 69.51A (Medical Cannabis), Chapter 19.27 RCW and WAC Title 51 (State Building Code), Chapter 58.17 RCW (Plats-Subdivisions-Dedications), Chapter 90.58 RCW (Shoreline Management Act), Chapter 314.55 WAC, and the Chelan County Shoreline Master Program.

SITE PLAN CHECKLIST SECTION

☒ Two copies of site plan are required. Must be drawn to standard engineering/architect's scale, such as 1"=100'. Indicate the scale used. Must include North arrow, and be drawn on grid paper or engineering plan format. For large parcels, applicant may submit a two-page site plan, the first page depicting the entire lot at a convenient scale and the second page depicting an enlargement of the developed area at a larger scale.

☐ Label all property lines/boundaries, dimensions, and area of lot/parcel (square feet or acreage).

☐ Label the location, size, and use of all existing building(s). Identify the distance between property lines and buildings. Label structures with previous building permit number(s) issued if applicable.

☐ Label the location, size, and use of all proposed structure(s) (temporary or permanent) to include dimensions of all decks, porches, cantilevers, bay windows, roof overhangs, retaining walls, patios, chimneys, landings and stairs.

☐ Identify the location, dimensions and volume of all existing and proposed propane tanks, fuel tanks, etc., both above ground and underground, as well as setback from property lines.

☐ Identify land features such as top and bottom of slopes, direction of slope and any areas of erosion.

- ❑ Identify and label all water features to include, ponds, springs, ravines, streams, creeks, lakes, rivers, irrigation laterals, canals, ditches, wetlands, bogs, areas of saturated ground, flood plain, floodway. Identify the closest distance between the ordinary high water mark and proposed/existing structures.
- ❑ Label the name and width of roads bordering the property and indicate whether they are public or private.
- ❑ Locate the width of existing and proposed driveways/accesses serving each structure. Include stormwater control facilities such as drains, detention ponds, connection lines, catch basins, etc.
- ❑ Label all existing and proposed parking spaces/areas. Parking in residential districts is typically not allowed in the front yard setback area. All parking shall have durable and dustless surfaces suited to all weather use, unless required otherwise. If applicable, show handicapped parking and accessible routes to the structure and within the site to other structures and features.
- ❑ Identify and label all easements and widths, deed restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property, including but not limited to access, utilities, railroads, irrigation and overhead power. Include the Auditor's file number(s). *Before Any Development Occurs, Please Call 1-509-661-8400 To Locate Any PUD Easements!*
- ❑ Show the location of all existing and proposed overhead and underground utilities including, but not limited to water, sewer, gas, and electrical.
- ❑ Identify location of water lines, well and sanitary control radius. Note: A sanitary control radius around an off-site well may impact your project if it overlaps onto your parcel.
- ❑ Identify location of all well(s), septic/pump tank, drain field, reserve area and tight line involving the proposed structure(s). Show the distance from proposed structure(s) to septic tank, drain field, drinking water well source(s), and any water body, wetland area and/or flood plain to ensure they meet the required horizontal setbacks from each other and property lines. See Chelan Douglas Health District Horizontal Setback Table for details. If applicable, the approved Health District and County site plan must be identical.
- ❑ If drinking water wells, septic tank/drain field is off site, show the location of these systems on the adjacent property or properties and provide a copy of the easement agreement(s).
- ❑ If applicable, identify existing and proposed landscaping, screening and/or fencing. (Show type of landscaping, size, spacing, and provisions for irrigation).
- ❑ If applicable, include outdoor lighting and signage. Label each as existing or proposed.

ACKNOWLEGEMENT SECTION

If the Applicant is not the owner of the property, this application and acknowledgment shall also be executed (signed) by each property owner.

By submitting this application, I acknowledge and certify the following:

Initials
(Owner and, if applicable, Applicant)

MVM _____ 1. All applications will be reviewed for completeness and processed according to Chelan County Code Title 14. Each application may be denied if not consistent with all Chelan County Codes, adopted regulations, Comprehensive Plan and related plans or studies.

MVM _____ 2. This application does not constitute approval of the proposed development and Chelan County does not make any guarantee, either express or implied, that this application will be approved.

MVM _____ 3. False statements, errors and/or omissions in this application or information provided with or in regard to this application may be sufficient cause for denial of the request.

MVM _____ 4. Additional permit applications and approvals may be necessary to conduct specific activities.

MVM _____ 5. Application fees are non-refundable, except when approve by the Board.

MVM _____ 6. In the event of any legal proceeding to challenge this application, any environmental determination or any other aspect of the proposed development, the applicant/owner(s) shall be solely responsible to defend such challenge and pay all court costs and attorney's fees necessary for such defense.

MVM _____ 7. Chelan County is hereby given consent to enter the property(ies) listed above.

MVM _____ 8. I certify that I am the property owner, or authorized agent of the property owner, and I have familiarized myself with the rules and regulations of Chelan County with respect to making this application.

MVM _____ 9. I certify that I possess full legal authority and rights necessary to exercise control over the subject property.

MVM _____ 10. I certify that this application has been made with the consent of the lawful property owner(s).

MVM _____ 11. I certify that all Easements, Deed Restrictions, other encumbrances, and/or issues restricting or affecting the use or condition of the property have been accurately disclosed and are shown on the site plan submitted with this application.

MVM _____ 12. This application shall be subject to all additions to and changes in the laws, regulations and ordinances applicable to the proposed development until a determination of completeness has been made pursuant to Section 14.08.030.

I certify (or declare) under penalty of perjury and under the laws of the State of Washington that the foregoing and all information submitted with this application is true, correct and complete to the best of my knowledge.

CHAPTER 1
INTRODUCTION

I. History of Chelan County Comprehensive Planning

Chelan County has a long history of community planning efforts. The first Comprehensive Plan was completed in 1958[1] and included the following statement:

> The Comprehensive Planning Outline is intended to serve as a guiding policy for planning activity in Chelan County. The results of haphazard development are familiar to us all in the form of traffic congestion from string commercial uses along major streets, of dangerous heavy traffic within residential neighborhoods, of inadequate streets and roads, and of an incompatible mixture of residential, commercial, and industrial uses. Fortunately, Chelan

[1] Information on other plans is encouraged—contact Community Development

> County is early enough in its development process to gain much from a blueprint for orderly growth.

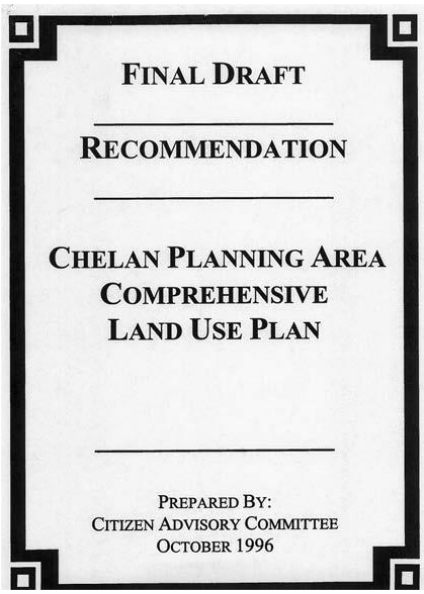
This plan was followed by a few regional plans, such as the 1979 Malaga Plan.

Then in 1990, the State Legislature responded to increased pressures from unprecedented population growth by passing the Washington State Growth Management Act of 1990 (GMA). The GMA requires all cities and counties in the state to do planning. The GMA required fast growing counties, including Chelan County, to adopt new comprehensive land use plans in compliance with the new law.

County Wide Planning Policies

The first step taken towards the development of new comprehensive land use plans was the adoption of County-Wide Planning Policies to be used throughout the County, including the cities. A committee was formed with representation from the Board of County Commissioners, cities and community councils. The committee consulted a variety of people for input in the development of the policies.

The Board of County Commissioners adopted the County-Wide Planning Policies on May 26, 1992 (See Appendix A for complete text of this document.) addressing the following issues:



- The establishment of Urban Growth Areas (UGAs)
- Promotion of contiguous and orderly development and the provision of urban governmental services to such development
- Siting of public capital facilities that are of a county-wide nature
- County-wide transportation facilities and strategies
- Need for affordable housing for all economic segments of the population and the adoption of parameters for the distribution of affordable housing
- Joint county and city planning within UGAs and provision of innovative land use management techniques that may include use of flexible zoning processes
- County-wide economic development and employment
- An analysis of fiscal impact
- Public education and citizen participation
- Monitoring, reviewing, and amendment of county-wide planning policies

Comprehensive Plan Development

At the inception of drafting the comprehensive plan, the County and the cities of Leavenworth, Cashmere, Wenatchee, Entiat, and Chelan, opted to divide the County into 8 study areas and prepare a plan for each area. The County took the lead role, in coordination with the cities in the development of 7 sub-area plans. The City of Wenatchee took the lead role in the development of a comprehensive plan for the Wenatchee Urban Area.

In August of 1993, Chelan County established Citizen Advisory Committees (CAC's) to develop new comprehensive plans for its 7 sub-areas. These community representatives were appointed by the Board of County Commissioners and the cities mayors. The committees were diverse groups representing a variety of viewpoints.

Due to time constraints, the cities of Leavenworth, Chelan, Cashmere, and Entiat, chose to pull out of the joint process with the County and revise and adopt their own versions of the County draft sub-area plans.

Due to the requirements of the GMA regarding coordination and consistency, implementation issues, and changes made to the Act, the decision was made to develop a single county-wide comprehensive plan utilizing the work done by the CAC's and the Rural Coordinating Committee.

The County-wide Comprehensive Plan covers the unincorporated areas outside of the City UGAs. Within the county-wide plan, 7 study areas are identified. Specific goals are identified for these study areas where unique circumstances specific to the study areas exist. All other goals and policies apply county-wide.

The Rural Coordinating Committee was a 12 member body whose members were appointed by the Board of Commissioners to coordinate the Rural Element of the Plan. Some members of the Rural Coordinating Committee were also members of the Citizen Advisory Committees. The Rural Coordinating Committee and the Planning Commission went

through a process where they identified goals and policies applicable to specific study areas, and goals and policies applicable county-wide.

The remaining unincorporated areas of the County within the UGA boundaries are covered by the city comprehensive plans. Consistent with the County Wide Planning Policies, and a Memorandum of Understanding with the cities, the County has committed to coordinated planning to regulate the unincorporated areas of the cities UGAs.

II. What Is a Comprehensive Plan?

A comprehensive plan is a legal document adopted by local elected officials establishing policies that will guide future land use decisions and physical development of the community. It will be used by local elected officials, planning commissions, private firms, and individuals when making decisions about land use development or changes, capital improvements programming, and the enactment of development regulations and related growth management legislation. Zoning and other development regulations must be consistent with the comprehensive plan.

The plan is divided into several chapters called "elements". This plan contains the following elements.

- Land Use
- Rural
- Resource
- Housing
- Capital Facilities
- Utilities
- Economic Development
- Parks and Recreation
- Shoreline
- Transportation

This 2026–2046 Comprehensive Plan reflects decades of coordinated planning efforts and the extensive work completed during the periodic update. The following appendices provide the technical foundation and supporting documentation for the Comprehensive Plan, including public engagement results, community and subarea plans, required Growth Management Act analyses, mapping, and supporting implementation documents. As required by the Washington State legislature in House Bill 1181, this Comprehensive Plan also includes goals and policies related to

resiliency supported by a Resiliency Plan. Together, these appendices provide additional detail and context for the updated goals and policies contained in this Plan.

- Appendix A Public Participation Summary Report
- Appendix B Manson Comprehensive Plan
- Appendix C Peshastin Comprehensive Plan
- Appendix D Malaga UGA Plan
- Appendix E Stehekin Community Plan
- Appendix F Resiliency Plan
- Appendix G Land Capacity Analysis
- Appendix H Designation Maps
- Appendix I Racially Disparate Populations Analysis
- Appendix J Capital Facilities Plan
- Appendix K Recreation Element (PROS) Plan
- Appendix L Chelan County Roadway LOS Analysis Summary

It is important to County residents and property owners to have an opportunity to express their concerns and goals for the future in order to maintain some local control over land use decisions that may affect them. This Plan is intended to be a vehicle to accomplish this. By clearly articulating a plan for the future of the area, the county is informed about the local implications of its policy decisions, and is able to address the concerns of the citizens. The GMA requires that state agencies comply with local comprehensive plans and development regulations. It is important to have a plan that identifies goals to help state agencies make informed decisions.

This plan seeks to provide this opportunity for growth, while preserving the positive attributes that make the County so desirable.

-

III. Citizen Participation

The GMA stresses the importance of ongoing citizen participation in the preparation of the comprehensive plan. In addition to the utilization of citizen advisory committees to develop the plan, Chelan County has used a variety of other methods to both distribute information and obtain citizen input regarding this planning process.

Extensive citizen participation has and will continue to be a major goal in the formation, modification and implementation of the comprehensive plan and accompanying development regulations. Citizen Advisory Committees were utilized in the formation and drafting of this plan. Decisions made by local governmental decision making bodies that utilize maximum citizen participation are usually better received by the public and generate better decisions.

The GMA states that public participation shall have a wide range of input. The process shall have a "…broad dissemination of proposals and alternatives, opportunity for written comments, public meetings after effective notice, provision for open discussion, communication programs, information services, and consideration of and response to public comments." Proposed actions should include early and continuous public input. Specific importance is attained to input from local individuals, businesses, and groups; regional, state, and national organizations can add distinctive and valuable input to the planning process.

Amendments to the Chelan County Comprehensive Plan have followed similar public participation efforts including "visioning sessions", public workshops, and public hearings. Another key component has been internet landing page posting of workshop minutes, special studies, research data, and similar documents as well as gathering public feedback, displaying storymaps, and hosting virtual meetings that can be recorded and summarized electronically. The amendment process for the plan is conducted by the Chelan County Planning Commission.

For the 2026–2046 Comprehensive Plan update, similar strategies were employed by Chelan County to obtain public feedback. The first round of public open houses was held in May 2025 to introduce the Comprehensive Plan update and gather input from elected officials and the public. Held in Chelan, Leavenworth, and Wenatchee, the open houses included a virtual option when possible and were intended to invite the community to provide feedback on the update process. A fourth series open house was held in May 2026 to receive feedback on the Comprehensive Plan updates and communicate the adoption process schedule to the public. Chelan County also attended the April 18, 2026, Earth Day event to table and answer questions about the Comprehensive Plan update. Outreach to the Confederated Tribes of the Colville Reservation included email correspondence from Chelan County inviting feedback during the planning process and notifications for the open houses.

The County hosted a webpage that included updates and documents throughout the Comprehensive Plan Periodic Update process that included an online storymap and survey that remote users could use to provide feedback in English or Spanish. The storymap that was linked to GIS tools capable of allowing users to view countywide data and apply comments to areas where there may be issues or concerns. The team's interpretation specialist from Wenatchee CAFÉ, also took printed surveys in Spanish and distributed them at local events to reach the county's Spanish-

speaking community. Nearly 100 survey results were received during the outreach process and used to inform the update. Outreach and citizen participation efforts undertaken to prepare for the 2026–2046 Comprehensive Plan Update are described in detail in the Public Engagement Summary (Appendix A).

Types of Public Participation Techniques

Depending on the type of action, the region of interest and/or administrative considerations, a variety of public participation techniques may be necessary. These types of outreach activities are summarized in the Public Participation Plan, which is prepared and maintained for each Comprehensive Plan update cycle. The following are a sample of what should be considered to encourage public participation.

- Newspaper legal notices and special advertisement
- Postings at post office or other areas know to attract people
- Newsletters and/or utility flyers
- Website / electronic mailings
- Invitations to specific groups or interested parties
- Direct mailing
- In appropriate regional, neighborhood, ethnic, or trade journals
- Provide press releases or interviews with area radio stations and newspapers
- Posting of property for development proposals

Meetings

- Board of Chelan County Commissioners and Chelan County Planning Commission Meetings
- Public Hearings
- Open Houses or workshops
- Attending local service club, trade organization, etc., meetings

Written Comment

- Surveys
- Written Comments

Additional Formats

- Youth workshops, public service messages, advisory committees, school programs, visioning, etc.

Comments and ideas are used throughout the process to help shape the Comprehensive Plan changes. As comments are received, additional meetings may be necessary to fully secure adequate public participation on new or refined proposals. The importance of early and continuous involvement in the development of processes and products is vital to the success of the planning process.

GOAL CP 1: Encourage the involvement of citizens in the planning process.

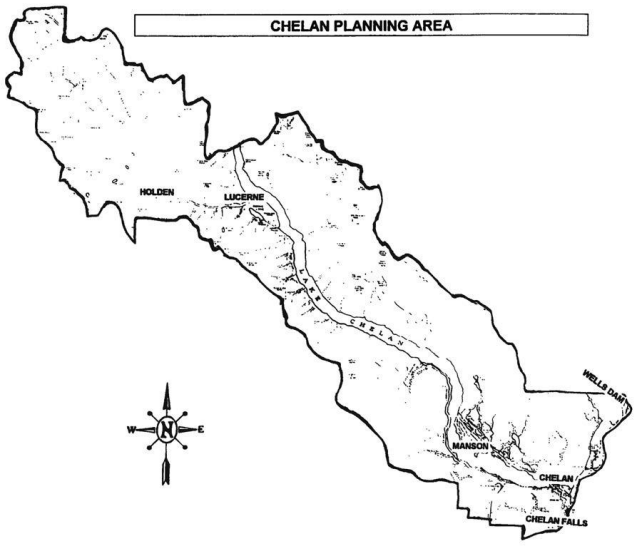
Goal Rationale: Citizen input is necessary in the planning process to ensure that community needs and concerns are addressed.

Policy CP 1.1: In addition to mandatory notification requirements, consider additional public participation measures where appropriate, including but not limited to the Public Participation Techniques listed above.

Rationale: Additional notification measures may be necessary to ensure adequate public participation.

Policy CP 1.2: Support the continued utilization of community councils as an effective source for community concerns regarding planning issues and development proposals.

Rationale: Community councils provide valuable input for land use decisions.



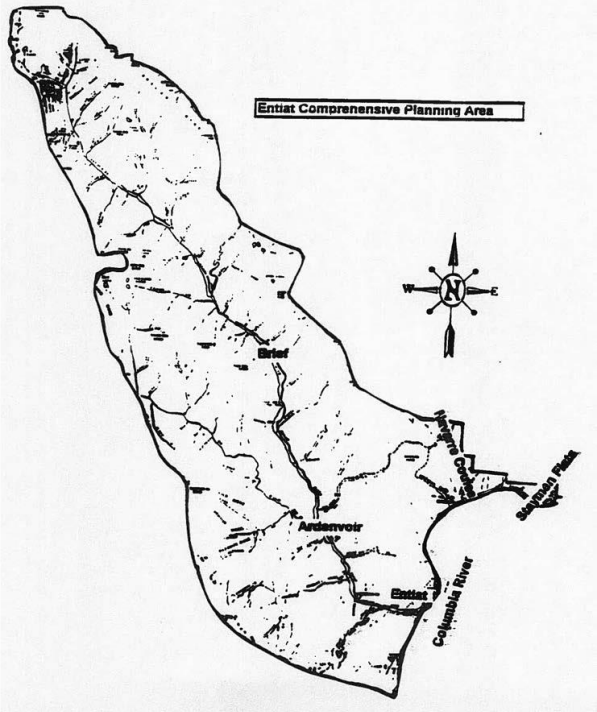
Policy CP 1.3: Provide opportunities for citizen involvement in various languages at various locations and during different times of the day to increase participation of communities with limited-English proficiency (LEP), community members with limited mobility, and community members working standard office hours or non-traditional or shift-based schedules.

Rationale: Providing opportunities for citizen involvement in multiple languages supports individuals with LEP who might otherwise be excluded from understanding or contributing to public discussions. Holding meetings and events at a variety of accessible locations increases convenience and reduces travel burdens, making it easier for people across different neighborhoods and communities to attend. Similarly, offering opportunities at different times of

day acknowledges the diverse work schedules within the community. Removing barriers that prevent all community members from engaging in the planning process improves participation, fosters diversity of perspectives in the planning process.

IV. Community Vision Statements

One of the first tasks completed by each of the Citizen Advisory Committees to support early drafts of the Comprehensive Plan was the development of vision statements. The vision statement describes the image that the community sees for its future. The committees spent time listing characteristics of the community and what they would like to see happen in the future. The following vision statements were completed for the different study areas.



Chelan-Manson

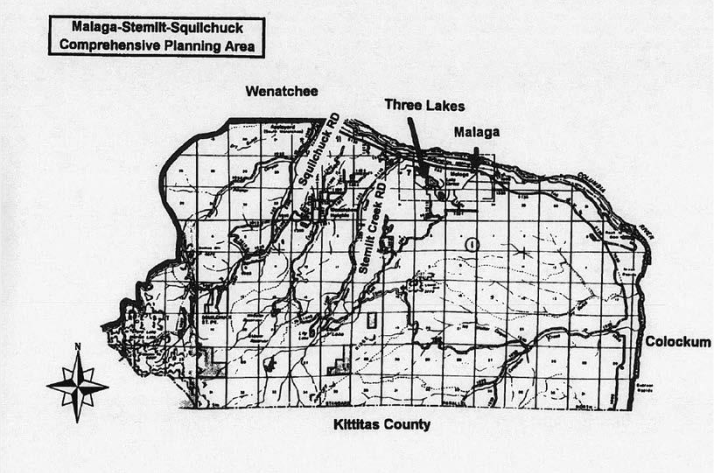
The Chelan-Manson Study Area vision provides a guide for the development of the Study Area. The plan strives to maintain and enhance the existing quality of life that includes: culture, customs, economy, agricultural economy, sense of community, water quality, and recreational opportunities. This is a plan to promote the development of a 12 month economy utilizing the abundant natural resources of the area. This plan should provide for expansion of these opportunities, while maintaining an adequate infrastructure to accommodate this growth. Continuous public participation is warranted, with decision making and implementation at the local level. This plan will ensure the protection of individual property rights, and provide for the right to farm according to historic and recommended practices.

Entiat Valley

The Entiat Valley Study Area vision provides recommendations for the citizens of the Study Area. The plan will strive to maintain the existing quality of life that includes: culture, customs, economy, agricultural opportunities, sense of community, water quality, and recreational opportunities. This plan should provide for expansion of these opportunities, while maintaining an adequate infrastructure to accommodate this growth. Continuous public participation is warranted, with decision making and implementation at the local level. This plan will ensure the protection of individual property rights, and provide for the right to farm according to historic and recommended practices.

Malaga-Stemilt-Squilchuck

The citizens of the Malaga-Stemilt-Squilchuck Study Area believe that their greatest asset is the rural character of the community. Rural character may be defined as that mixture of open space, housing, and agricultural land uses which are believed to express and preserve the quality of life desired by the residents.



The citizens of the Malaga-Stemilt-Squilchuck Study Area envision future development that will complement and enhance, and not unreasonably impact, our rural character, our strong agricultural economy, and natural resource based industries.

We foresee maintaining the area's high quality of life while sustaining growth that can be served with the necessary public services and, facilities. Open spaces, wildlife conservation, and recreational opportunities will be encouraged.

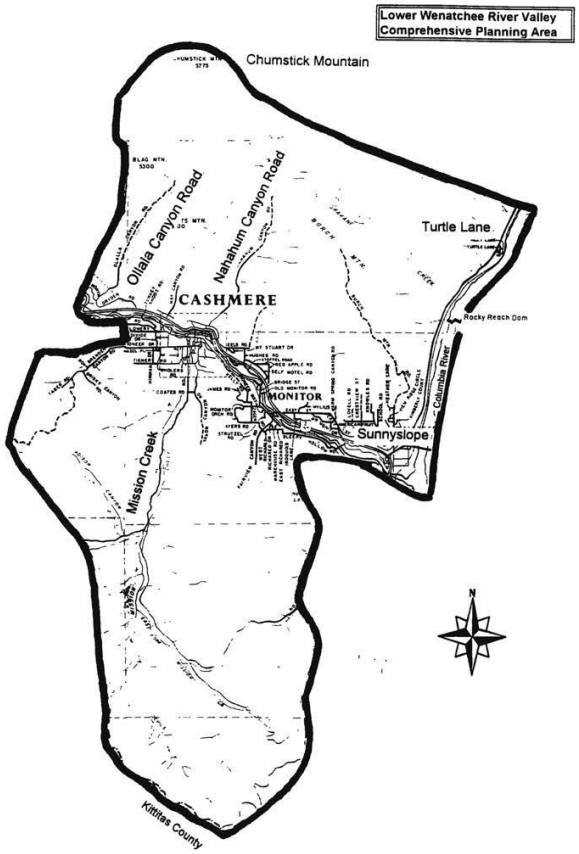
We foresee expansion of transportation systems to allow efficient movement of goods, services and people within the planning area and connecting with the rest of Chelan County.

We foresee the establishment of quality educational facilities to meet the needs of community growth.

We foresee varied levels of development with suitable mitigation between different land uses. We envision that the expansion of our existing residential, commercial and industrial land uses will take place in those areas already characterized by that type of use.

We foresee the requirement to support sustainable hydroelectric power generation to maintain and meet our community growth.

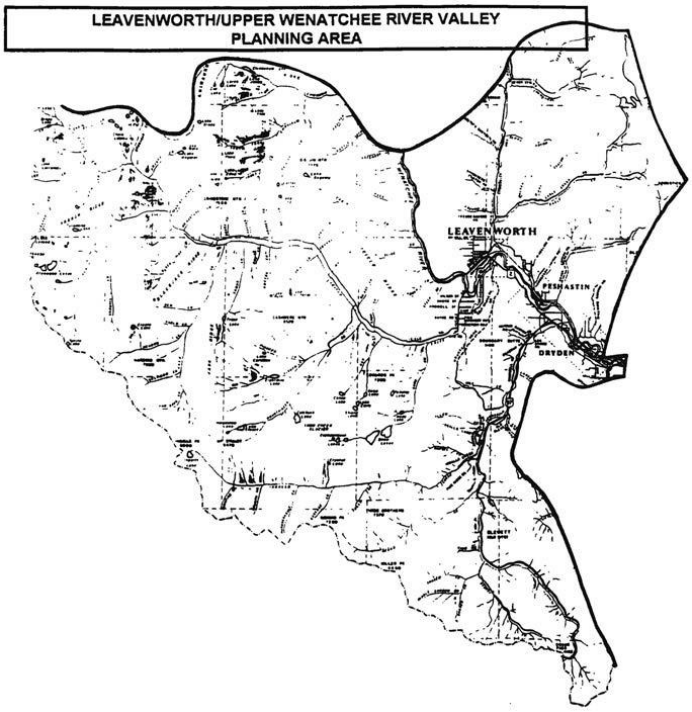
In recognition of the importance of preservation of existing water rights and future need for water for our community and its agricultural base; we foresee the continued support, development and expansion, and maintenance of water supplies and their associated sources.



In conclusion, we envision growth that will maintain the continuity of our rural character and quality of life while protecting the private property rights of the citizens of this area.

Lower Wenatchee River Valley

The citizens of the Lower Wenatchee River Valley Study Area envision:

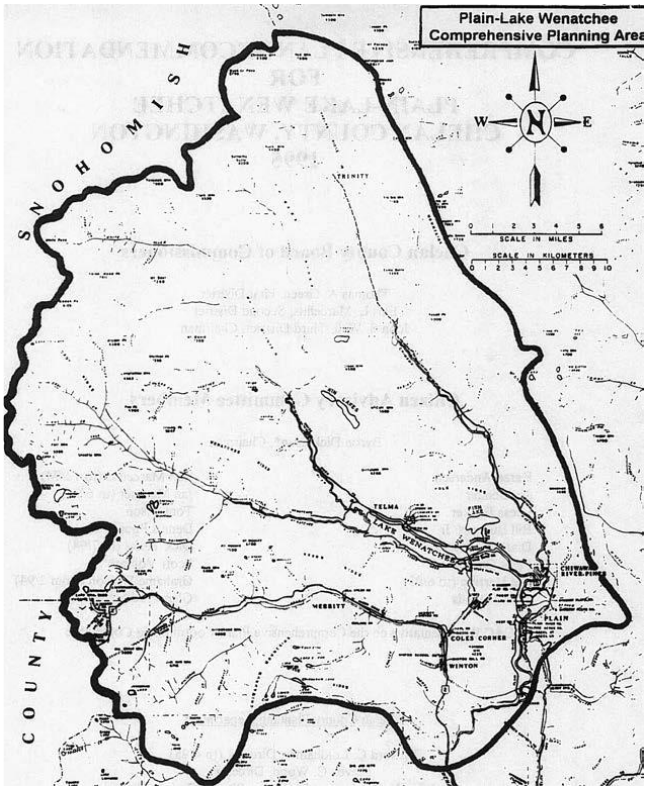


- Future development that will complement and enhance and not unreasonably impact our natural resource-based industries, including our strong agricultural industry, and the forest and mineral resources industries;

- An economic and educational climate that enables our citizens to find suitable employment within the valley;
- Sustainable growth that can be served effectively and efficiently with the necessary public services and facilities, while enhancing our community's quality of life;
- Open spaces and recreational opportunities, particularly along the rivers and streams, to preserve the community's rural character, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks;
- Protection of the environment and maintenance of the community's high quality of life, including air and water quality, and the availability of water;
- Protection of private property rights of landowners;

- Adequate housing that fulfills the housing needs of all segments of the population;
- Efficient transportation systems that allow the movement of goods, services, and people within the community.

Upper Wenatchee River



The citizens of the Study Area envision: maintaining the uniqueness of the area which combines a quality "rural/small community" lifestyle with a diversified economic base that allows orderly growth and development while preserving the beauty of the area with open spaces and enhancing the proper management of the natural environment.

This vision can be accomplished with the goals and policies in this plan and by preparing development regulations with this vision in mind. The goals and policies identified in this plan are deemed to be essential in maintaining a satisfactory quality of life for the Study Area.

Plain-Lake Wenatchee

The intent of the Comprehensive Plan is to provide guidance for future development and land use within the Plain-Lake Wenatchee Study Area. The Comprehensive Plan is an integral part of a county-wide planning effort to upgrade land use plans in accordance with the GMA. The Plan seeks to

maintain a balance of private property rights within a scenic rural community. The Plan maintains an established quality of life, including cultural and economic opportunities, and insures a rural environment.

The Study Area is in a rural setting, within the Eastern foothills of the Cascade Mountains. It includes private and state lands in the area surrounding Plain, Lake Wenatchee, and the Stevens Pass Corridor. Much of the land in this area is owned and managed by the United States Forest Service, and although these federal lands are not part of this plan, they are closely associated with the private and state lands within the Study area. A strong attraction to the people who live and visit the Study Area is its pervasive natural beauty. Wildlife, clear air and water, a rural atmosphere and sense of community, open space, relatively low population density, and local availability of basic services all contribute to the appeal of the area.

Preceding this Comprehensive Plan were the West Central Chelan County Comprehensive Plan of 1973, which included the Chumstick Valley, and the Upper Wenatchee River Valley Plan of 1988, which only included those areas surrounding Plain. This Plan reviews background information within the Study Area, discusses current land use and future projections, discusses elements relative to GMA, and finally, establishes goals and policies for the study area. The Plan allows for continuous public participation in the planning process decision making and implementation occurring at the local level. The adoption of the Comprehensive Plan is the first step toward achieving orderly and harmonious community action in the development of an optimum living environment.

Stehekin

This comprehensive plan encompasses a valley that has been recognized on a national scale for its remote, isolated setting; rich pioneer heritage; scenic grandeur; the subtle details of its beauty; and scope of recreational opportunities. As part of the 2026–2046 Comprehensive Plan Update, the County is preparing a supplemental Stehekin Community Plan (Appendix E) to augment existing policy with more detail tailored to the unique area in and around Stehekin. The Stehekin Community Plan establishes policy and strategy to guide land use, interagency partnerships, and public and private investment in Stehekin. It also acknowledges the importance of critical local services and infrastructure, as well as the impact of National Park Service past, current and future policies and decisions on the long-term viability of the Stehekin community.

V. Plan Implementation and Monitoring

This section outlines the plan implementation and monitoring procedures developed to measure progress in implementing the goals, policies and rationale in the Comprehensive Plan. This process also prepares the County for updates in the future. These procedures address:

- Citizen participation in the process, as addressed above; and
- Updating appropriate base-line data and measurable objectives; and
- Reviewing the degree to which the goals and policies have been successfully reached; and
- Identifying obstacles or problems which resulted in the under-achievement of goals and policies; and
- Providing new or modified goals, policies and rationale needed to address and correct discovered problems

A comprehensive plan has traditionally been a policy document with implementation through land development regulations and other ordinances. The GMA encourages a variety of implementation methods, regulatory and non-regulatory, which should be considered. The implementation procedures listed above would be used to evaluate measurable objectives and the County will continue its public education program following plan adoption to provide information about the rationale and goals of the plan, as well as the changes that will take place in the County because of the plan's implementation. The county believes that broad support for the plan is crucial for effective implementation. Moreover, implementation of the Comprehensive Plan does not result in an unconstitutional taking of private property, consistent with RCW 36.70A.370 .

Pursuant to RCW 36.70A.100, Chelan County strives to develop a Comprehensive Plan that is consistent with neighboring jurisdictions. To ensure coordination, the County will utilize a review process, which includes public participation and coordination with neighboring jurisdictions and other agencies to accomplish this goal. The comprehensive plan is supported by provisions that ensure the effective enforcement of development regulations, including zoning and critical area ordinances (CAOs) consistent with implementation strategies outlined in WAC 365-196-650(1). Additionally, when actions such as expanding a UGA, creating or expanding a limited area of more intensive rural development (LAMIRD), establishing a fully contained community, or creating or expanding a master planned resort are adopted, RCW 36.70A.067 requires policies and regulations to specify their effective date. These actions take effect either 60 days after public notice of adoption or, if appealed to the Growth Management Hearings Board, upon the Board's final order.

Amendments to the Comprehensive Plan

Planning is an ongoing process, and improved data or changing circumstances will require amendment to the comprehensive plan. The plan will be reviewed once a year and updated as necessary to reflect revisions to the Office of Financial Management population estimate and revisions to the Capital Facilities Plan. The update will also address any specific concerns, clarify inconsistencies that were identified during the year and review the adequacy of the adopted level of service standards.

The community's visions provide long-range guidance for the county. To maintain consistency and allow sufficient time for decisions to take effect, these general guidelines should not be changed more than every five years. However, as specific objectives or policy are achieved, revision of the plan in each element may be required to continue progress toward the overall goals.

Amendments to the comprehensive plan can be requested by the Planning Commission or by any affected citizen or property owner. However, the plan may not be amended more than once a year. The Planning Commission will review the comprehensive plan and citizen requests for amendments and propose any needed changes to the plan. A public hearing will then be held to solicit comment. After further review, a formal recommendation will be made to the Board of County Commissioners. Emergency amendments to a comprehensive plan may only be adopted after public notice and opportunity for comment. While moratoria and interim development regulations (RCW 36.70A) do not apply to comprehensive plan amendments, cities and counties may adopt emergency amendments to address urgent issues or resolve appeals, provided they are considered with proper public participation and in coordination with other plan amendments to assess cumulative impacts.

The Board of County Commissioners will hold a public hearing and consider the proposed amendment to the comprehensive plan. By reviewing and updating the plan on a regular basis, the County can rely on this document in decision making and maintain public interest and support of the planning process.

CHAPTER 2
LAND USE ELEMENT

I. Introduction

This Land Use Element represents the County's policy plan for growth over the next 20 years in accordance with Section RCW 36.70A.070. The Land Use Element describes how the goals in the other plan elements will be implemented through land use policies and regulations; thus, it is a key element in implementing the comprehensive plan.

The Land Use Element has also been developed in accordance with the most recent version of the County-Wide Planning Policies, and has been integrated with all other planning elements to ensure consistency throughout the comprehensive plan. The Land Use Element, along with other elements and appendices, considers the general distribution and location of land uses; the appropriate intensity and density of land uses given current development trends; the protection of the quality

and quantity of water supply; the provision of public services, stormwater runoff; and the measurement of the costs and benefits of growth.

The goals and policies contained in the Land Use Element form the basis of the land use strategy for development within the County and address the following general planning goals:

- Provide for a supply and distribution of land use types to accommodate the population and employment growth projected for the planning area as well as resource production, commerce, housing, recreation, public facilities, and other land uses;
- Reduce development pressures and patterns of sprawl within rural areas;
- Provide for protection of groundwater;
- Provide for Stormwater management;
- Promote physical activity and reduction of vehicle miles traveled;
- Conserve agricultural, forest and mineral resource lands of long-term commercial significance; and
- Preserve and protect critical areas, open space, and the areas of rural character.

The Land Use Element is divided into sub-elements to address the issues relating to residential, commercial, industrial, and resource based land uses; open space and recreation; UGAs; and natural systems/critical areas. Each of these sub-elements contains goals and policies.

Major Land Use Considerations

While Chelan County appears to be a large county, with approximately 1.9 million acres or 2, 920 square miles, the majority of land, approximately 1.5 million acres, is in federal and state ownership. The major geographic features include: Cascade Mountains, Chiwaukum mountains, Stuart Range, The Enchantments, Bonanza Peak, and the Chelan, Wenatchee and Columbia rivers. Most of the County is nationally protected lands: Lake Chelan National Recreation Area, North Cascades National Park (part) and the Wenatchee National Forest (part). Most of these lands are not expected to be developed within the 20 year planning horizon. Should any development occur it is expected to be only on leased land providing small scale residential or recreation uses. Any large scale development should occur concurrent with a Comprehensive Plan review or amendment to analyze potential Countywide impacts.

Land available for development, approximately 279,000 acres or 436 square miles, is generally found along the valleys and rolling hills associated with Lake Chelan, the Entiat River, the Wenatchee River and the Columbia River, as shown in orange on the map. The largest populated area is located at

the southeast corner of the County, in the City of Wenatchee and Malaga. As part of the Comprehensive Plan update process, the County is converting the designation of the community of Malaga from a LAMIRD to a UGA. A Malaga UGA Plan is included as Appendix D.

Due to geographic limitations, it is common for rural areas to have isolated commercial or tourist activities. These areas, addressed below and in the Rural Element as LAMIRDs, provide residents and tourists with necessary services, reduce travel demands on limited roadways, and provide local areas with employment opportunities. The community of Monitor is presently designated as a LAMIRD. Isolated areas throughout the county also contain LAMIRD implementing zoning designations.

Rural Character

The remaining County land is able to meet current and projected population needs; however, due to constrained transportation facilities and funding resources for rural utilities, it is common to find development occurring adjacent to built infrastructure, such as roads and power lines, and where travel to services (such as grocery stores, churches or schools) is more easily accessible. This type of development is not sprawl but rather follows the pattern of rural living in Chelan County with larger lot sizes used for residential living and often agricultural activities or clustered lots with large areas of protected open space. The County will continue to experience growth pressures on developable land.

Resource Lands

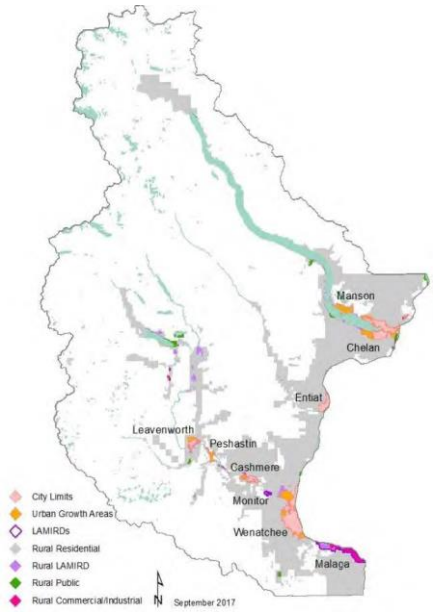
Agricultural uses continue to dominate as a rural economic benefit to the County. It should be noted that some historical agricultural activities, primarily orchards, are changing to vineyards, wineries, and other agricultural activities. The County has historically provided agricultural opportunities at a variety of scales, including various parcel sizes. Many of the new agricultural activities can and are occurring on smaller parcels of land near tourist communities. Other agricultural operations include organic farms, dairy production, row-crops, and where appropriate, fish farms. The long-term changes in agricultural operations will be determined, in large part, by the economic and market demands.

Open Space Lands

As noted above, much of Chelan County is open space established and maintained by Federal and State government. Additionally, the County encourages open cluster subdivisions in the rural areas; provides the opportunity for open space tax credits through the Public Benefit Rating System (PBRS); conducts countywide park and recreation planning; has adopted habitat and environmental

protection regulations; and preserves environmentally sensitive areas through planning and restoration plans and projects. Open space provides an important function, protecting fish and wildlife habitat areas, reducing development on steep slopes (geologically hazardous areas), protecting groundwater, and preserving the scenic rural character of Chelan County.

Population Growth



As the population increases, conflicts between resources and more intense land uses will continue to arise. . The County will continue to experience growth pressures on developable land. Appendix G includes a Land Capacity Analysis (LCA) for Chelan County. The analysis identifies areas in the County's rural zones, as well as the Manson and Peshastin UGAs, that have the potential to accommodate new or additional residential development over the next 20 years. As addressed in Appendix G, Chelan County has experienced 8.9% population growth between 2013 and 2023, reflecting that Chelan County's population has been growing and is expected to continue growing more slowly than the state rate (13.5%) but faster than the national rate (6.7%). Growth has varied across the County, with the Leavenworth UGA experiencing the largest increase (24.1%), while the Peshastin UGA population has declined (2.1%).

Industrial and Commercial Development

Rural industrial land uses are common throughout the County, including orchard processing and packaging facilities and mining. Rural commercial designations provide areas for necessary services and/or recreational support in isolated regions of the County. Both rural commercial and industrial are appropriate for Chelan County's unique land uses and provide rural employment opportunities. These types of uses are vital to residents and visitors where they are compatible with surrounding land uses.

Residential Development Patterns

The numerous water bodies of Chelan County provide opportunity for a mix of recreational and residential living adjacent to the water. It is common to find small lot residential development along the shoreline. These areas were often platted prior to the GMA and reflect the County's character of rural recreational lifestyle. It is appropriate that newer developments provide for smaller lots and public access when consistent with the Shoreline Master Program.

Development among the hills and hilltops has become increasingly common and can be consistent with the rural area, especially when developed in a manner which reduces road cuts and visual impacts, preserves open space, provides agriculture and/or recreational opportunities and protects critical areas.

Sprawl is defined, by Webster's Dictionary, as "to spread or develop irregularly or without restraint" and 'to cause to spread out carelessly or awkwardly". The negative effects associated with sprawl may include a reduction in environmental and human health. Chelan County does not support sprawl and requires that new development of rural land is consistent with historic density patterns; provides for the protection of the natural and critical environment and habitat; supports the Federal and State natural wilderness and park lands; protects the small rural communities; allows for recreation throughout the County; and encourages orderly growth of populated areas through adoption of LAMIRD designations and UGAs in a manner consistent with the State population forecasting and Chelan County's rural character.

Natural Systems/Critical Areas

The GMA requires all counties and cities in Washington to adopt regulations that protect critical areas to preserve the natural environment, wildlife habitats, and sources of fresh drinking water (Washington State Department of Commerce 2024). Local CAOs must be consistent with the RCW,

Washington Administrative Code (WAC) and GMA guidelines. Critical areas include the following areas and ecosystems: (a) wetlands; (b) areas with a critical recharging effect on aquifers used for potable water; (c) fish and wildlife habitat conservation areas; (d) frequently flooded areas; and (e) geologically hazardous areas.

The County has adopted a CAO that protects these critical areas and ecosystems from the impacts of development and people from the consequences of developing in unsuitable areas. The County has also adopted an ordinance for its Shoreline Master Program, which protects shorelines based on preferred and existing patterns of development. Both the CAO and Shoreline Master Program rely on best available science for decision making and require development to result in no net loss of ecological function. Jurisdictions must demonstrate that the best available science (BAS) has been considered when creating or updating a CAO (Municipal Research and Service Center 2024). All jurisdictions are required to review, evaluate, and revise CAOs every 10 years per the schedule provided in RCW 36.70A.130.

The County has completed the planning process for developing these regulations following an extensive citizen participation process. Many of the issues and concerns that guided the development of the critical area regulations were discussed and addressed in the comprehensive planning process, and, subsequently, the adoption of the CAO update on May 4, 2021.

The GMA also requires the provision for the protection of the quality and quantity of ground water used for public water supplies. The land use element is also required to review; where applicable, drainage, flooding, and storm water run-off and to provide guidance for corrective actions to mitigate or cleanse those discharges that pollute waters of the state.

Flood Hazard Management Plan

The Chelan County Comprehensive Flood Hazard Management Plan, adopted November 13, 2017 Resolution 2017-102, recommends regional policies, programs, and projects to reduce the risk to people and property from river flooding, alluvial fans and channel migration. This plan complies with state and federal requirements for flood hazard management. It presents a longterm vision for managing flood hazards and recommends actions, the Chelan County and its cities, to reduce flood risks and to protect, restore or enhance riparian and aquatic ecosystems. It identifies resources, information and strategies for reducing risk from flood hazards, and will help guide and coordinate mitigation activities. All citizens and businesses of Chelan County are the ultimate beneficiaries of this plan. The Flood Plan is adopted into the Comprehensive Plan by this reference.

II. Inventory

The inventory presented in this element provides information useful to the planning process by listing the various existing land uses within the County. This inventory was last completed in 2017 but is still relevant today. (A full inventory update will occur with the next comprehensive update.) Additional data and support documentation is located in the appendices. This inventory includes the general physical description and characteristics of key locations around the county and current land uses.

Land Uses

The purpose of a land use inventory is to describe existing land use conditions within the County.

Parcels have been grouped, as identified below, into eleven land use categories, based on the Assessor's primary land use classification code, per WAC 458-53-030. City and UGA land uses have been addressed in more detail within Appendix H. As resources permit, future physical inventories may provide more accurate information of existing land use.

- **Agriculture** includes parcels that are primarily devoted to agricultural activities, although residential uses may occur, land use codes 81-83.
  - Countywide: 1,578 parcels covering 45,384 acres
  - County (excluding Cities and UGAs): 1,375 parcels covering 44,142 acres
- **Undeveloped/Vacant** includes heavily timbered areas and rangeland type areas, both public and private. Some residential uses may occur in these areas. Undeveloped may be expanded based on actual land sizes and uses.
  - Countywide: 1,891 parcels covering 93,526 acres
  - County (excluding Cities and UGAs): 1,624 parcels covering 90,946 acres
- **Mineral Resource Land** includes areas either used for extraction or storage of rock, gravel or sand resources, land use code 85.
  - Countywide: 23 parcels covering 888 acres
  - County (excluding Cities and UGAs): 22 parcels covering 886 acres
- **Forest Resource Lands** includes areas designated forest, timberland, resource production or noncommercial forest, land use codes 88, 89, 92 and 95.
  - Countywide: 1,513 parcels covering 116,534 acres
  - County (excluding Cities and UGAs): 1,458 parcels covering 116,145 acres

- **Single Family Residential** includes a single home (including manufactured homes) on a lot as the primary activity, land use codes 11 and 19.
  - Countywide: 30,077 parcels covering 71,097 acres
  - County (excluding Cities and UGAs): 12,250 parcels covering 61,396 acres
- **Multi-Family Residential** includes condominiums, duplexes, multi-plexes, apartments and mobile home parks, land use codes 12-18.
  - Countywide: 5,885 parcels covering 8,520 acres
  - County (excluding Cities and UGAs): 2,931 parcels covering 7,473 acres
- **Commercial** includes any retail and/or service activity and may include secondary residential uses, land use codes 50-66.
  - Countywide: 1,367 parcels covering 942 acres
  - County (excluding Cities and UGAs): 76 parcels covering 278 acres
- **Industry** encompasses industrial activities, including uses related to agriculture, land use codes 21-39, 46 and 86.
  - Countywide: 309 parcels covering 1,501 acres
  - County (excluding Cities and UGAs): 20 parcels covering 1,054 acres
- **Transportation/Utilities** include transportation, utility and/or irrigation facilities, excluding any facilities within rights-of-way, land use codes 41-45. However, most of the roads are not identified within the County parcel data information, See the Transportation Element.
  - Countywide: 117 parcels covering 284 acres
  - County (excluding Cities and UGAs): 57 parcels covering 205 acres
- **Public/Quasi-Public** includes facilities such as fire stations, libraries, parks, schools, churches, and federal, state or local government owned lands, land use codes 47-49 and 67-79. This excludes roads and public lands not identified with a parcel number.
  - Countywide: 3,065 parcels covering 586,765 acres (note, the 'government' classification, land use code 67, makes up 2,043 parcels covering 543,167 acres)
  - County (excluding Cities and UGAs): 2,163 parcels covering 584,221 acres (note, the 'government' classification, land use code 67, makes up 1,694 parcels covering 542,071 acres)
- **Open Space** includes areas of open space designated under RCW 84.34, land use codes 93 and 94.
  - Countywide: 148 parcels covering 9,718 acres
  - County (excluding Cities and UGAs): 141 parcels covering 9,680 acres

III. Regions/Community Overviews

Chelan-Manson

Location and Geology

The Chelan-Manson area is situated between the Sawtooth and Chelan Mountains and is bounded by the Columbia River on the southeast. The Basin is dominated by Lake Chelan, a glacially formed lake approximately 55 miles long with an average width of 1.5 miles and a maximum depth of 1,500 feet. Three major tributaries: the Stehekin River, Railroad Creek and Twenty Five Mile Creek, along with numerous lesser streams flow into the lake. The outfall is controlled through a hydroelectric dam and a penstock system to the Columbia River. Lake Chelan and the Columbia River are important water bodies; providing the main source of drinking water for the area, they are also important for irrigation and recreation. The water quality of Lake Chelan is a major concern to many area residents.

Elevations in the Chelan/Manson area range from just over 700 feet above sea level along the Columbia River to 9,511 feet at the summit of Bonanza Peak, the highest point in the County. Many of the soils within the area become unstable or susceptible to erosion as slopes increase. An analysis of existing land use patterns indicates that virtually all existing structural and orchard development has occurred on those lands below 2,000 feet in elevation and on less than a 20% slope. The geology is characterized by underlying rock formations covered by a shallow mantle of soils in the valleys.

There is a wide variety of soil conditions in the planning area. Throughout much of the area, the soil is underlain with alluvial deposits and glacial drift. Volcanic pumice and ash from the Glacier Peak region have added substantially to the depth and character of the soil in many areas. The mountainous terrain, with characteristically steep slopes and high elevations, consist largely of rock outcroppings and shallow soils. The Natural Resources Conservation Service (NRCS) has classified 84% of the Lake Chelan Basin area as being forest. Lands below the forest level consist of grasses, sagebrush and shrubs, with the more level areas developed as crop land.

The climate is characterized as "marine west coast", with hot, dry summers and mild to severe winters. Temperature and precipitation vary widely depending on the elevation and proximity to the Cascade Crest. Lake Chelan exercises a local moderating influence on temperatures which adds to the suitability of the area for orchard production.

The thermal winds around Chelan Butte provide national and international hang gliding and parasailing opportunities. With development of access to the top of the Butte, parking, launches and other facilities, the Sky Park is renown as one of the best hang gliding areas and facilities in the world.

Tourism is a major industry for the county, with much of it concentrated in the Lake Chelan area. Especially during the summer months, the area draws visitors from around the world to admire its natural beauty and recreational opportunities. Tourism supports a number of businesses in the area that provide support for these tourist activities including restaurants, shopping, watercraft rentals, and more.

Vegetation

Fauna is found in three specific habitats: the wetlands along the Columbia River and the Lake Chelan shorelines, the canyon/steppe habitat of the steep drainages and the urban areas of Manson, Chelan and Chelan Falls. The Chelan Butte Wildlife Area is a an approximate 9,000-acre game refuge and popular recreation area. The property was purchased by the Chelan County PUD #1 in 1967 as a mitigating measure for the construction of the Rocky Reach Hydroelectric Dam. The refuge is primarily inhabited by game birds and occasionally migrating big game animals. The area is presently managed by the Washington State Department of Fish and Wildlife.

Land Uses

As stated above, most development has occurred below the 2,000-foot elevation on slopes less than 20%. The area enjoys a variety of recreational uses with two urban growth areas: City of Chelan UGA, and the unincorporated Manson UGA; and the developed community of Chelan Falls. See Appendix B for the Manson Subarea Plan, which includes policy framework to guide land uses within the UGA.

Most development is concentrated around the lower end of Lake Chelan, where private land dominates. The upper portion of the basin lies within the North Cascades National Park and the Lake Chelan National Recreation Area, while the area between is in the Wenatchee National Forest, a portion of which is in the Glacier Peak Wilderness Area.

Rural Character

Chelan and Manson communities provide urban services within defined boundaries. The remaining portion of the region is characterized by a variety of parcel sizes containing a mix of orchards and

vineyards, wineries, large estate homes, golf courses, ranchettes, open space, and pastureland. To the west, access roads become primitive, private, or forest service, which greatly reduces the number and types of land uses that can be developed. Higher levels of development, primarily residential uses, are common along the lakes. These homes provide for the rural recreational lifestyle and character of the area. Development among the hills and hilltops is becoming common and can be consistent with the rural area, when developed in a manner which reduces road cuts and visual impacts, preserves open space, provides agriculture and/or recreational opportunities and protects critical areas.

Entiat Valley

Location and Geology

The Entiat Valley area encompasses the Entiat River Basin. The Basin is shaped like a triangle with the Columbia River forming the base and the valley lying between the Chelan and Entiat Mountains. The Entiat River begins at the terminus of the Entiat Glacier on Mt. Maude and flows approximately 50 miles into the Columbia River at the south end of the City of Entiat. The drainage is generally long and narrow, with numerous small tributaries flowing into the main river. The north fork of the Entiat River and the Mad River are the largest tributaries. Not only do these bodies of water and their tributaries provide the main source of drinking water for the area, but they are also important for irrigation and recreation.

The climate is also characterized as "marine west coast", with hot, dry summers and mild to severe winters.

Elevations in the area range from just over 700 feet above sea level along the Columbia River to 9,249 feet at the summit of Mt. Fernow. Many of the soils within the area become unstable or susceptible to erosion as slopes increase. Consistent with development patterns in Chelan/Manson, virtually all existing structural and orchard development has occurred on those lands below 2,000 feet in elevation and on less than a 20% slope. Throughout much of the area, the soil is underlain with alluvial deposits and glacial drift. The geology of the Entiat area is igneous bedrock with granite and diorite predominating.

Vegetation

Vegetation in the valley depends largely on the elevation, with most of the land above 1,500 feet being forested. Lands below the forest level consist of grasses, sagebrush and shrubs. The more level

sites have, for the most part been developed as crop land, with orchards generally occurring where irrigation has been possible.

Land Uses

The Entiat basin is primarily natural habitat area with rural residential and agricultural uses primarily along the Entiat River. Development is limited as a result of there being only a single public access up the valley. The City of Entiat and associated UGA are located at the base of the Entiat River along the Columbia River.

Rural Character

As noted above, the Entiat Valley is a long, narrow, over 40-mile long valley along the Entiat River. The area contains several pockets of rural residential development and scattered rural commercial uses necessary to support the isolated lifestyle. Parcel sizes vary greatly throughout the valley. Along the river, smaller parcels of land are generally flat while hills and steep slopes primarily contain larger parcels of land which help protect critical areas. Residential structures are mixed in among the natural environment. Mining, timber activities and ranchettes are common. Higher levels of development are common along the eastern portion of the river, closer to the main highway and the City of Entiat. Several branch roads provide access to residential and recreational land uses among the mountains adjacent to the river. Future development and clustering would be compatible when developed in a manner which reduces road cuts and visual impacts, preserves open space, provides agriculture and/or recreational opportunities and protects critical areas.

Stemilt-Squilchuck

Location and Geology

The Stemilt-Squilchuck area is located in the southeast corner of the County. It includes Pitcher Canyon, Halverson Canyon, Mission Peak, Wenatchee Heights, Jumpoff Ridge, the Malaga sub-basin and Three Lakes Communities, and the drainage basins of Squilchuck Creek, Stemilt Creek, and Colockum Creek. The area is bordered by the Columbia River to the north and east, and by Kittitas County to the south.

Land Uses

The Stemilt-Squilchuck Community Vision addresses the area's primary land uses and goals. Wenatchee Heights is a large plateau overlooking the Wenatchee Valley. The Heights contains several large orchard tracts. Primary crops include apples, cherries and pears. Residences are scattered throughout the area. The Stemilt Hill is another large agricultural area. The area is well known for its high-quality cherry crop. Most residential development is scattered throughout the orchards. Colockum Creek, Jumpoff Ridge, Stemilt Basin, and Mission Ridge are comprised of undeveloped open spaces varying from grassland to forest. Primary land uses in those areas include rangeland, timber production and recreation. Recreation, industrial development, and agriculture are the most significant contributors to the economic base of the planning area. Mission Ridge ski area is located in the upper most portion of the planning area and is accessed by way of Squilchuck Road.

Rural Character

The topography of the Stemilt-Squilchuck area includes canyons, ridges, and upland benches that create a rural, foothill environment. The area embodies open landscapes dominated by agriculture and native vegetation, and scenic views from Wenatchee Heights and Jumpoff Ridge toward the Columbia River. The area is known for its orchard-based agriculture and includes open irrigated fields, small fruit warehouses, and sparse and dispersed settlements with residential pockets in Wenatchee Heights, Three Lakes, and along canyon roads. There is limited infrastructure and residents of these areas rely on nearby Wenatchee for urban services.

Malaga UGA

Location and Geology

Malaga is primarily an industrial and residential community located southeast of the City of Wenatchee in Chelan County. The area is bounded by the Columbia River to the north, the basalt cliffs and talus below Jumpoff Ridge to the south, by Stemilt Creek drainage to the west, and Colockum Creek drainage and Rock Island Dam to the east. The railroad crosses the Columbia into Chelan County at Malaga and extends north to Wenatchee. Water bodies in the vicinity include Cortex and Meadow Lakes. There are three water districts within this area, including Malaga Water District, Three Lakes, and the Stemilt Irrigation District. There is currently no sanitary sewage treatment facility in the study area.

Land Uses

Chelan County's first irrigation ditch was built in Malaga to serve the orchards and vineyards planted by early settlers. Malaga was named for the grapes, which were grown there for many years. The town site of Malaga was originally platted in 1903. Development of the Alcoa plant in the early 1950s stimulated residential development in the area. Most of the recent development has occurred southwest of the original town site especially around Cortez Lake, which is part of the Three Lakes residential area. Land uses and economic activity in the community are primarily tied to the surrounding agricultural activity, as well as recreational activities associated with Three Lakes Golf Course. Moving to the south of Malaga, the character is defined by industrial uses, primarily the former Alcoa plant site, the new Microsoft data centers, and the Helion fusion power plant. Chelan County Public Utility District's Rock Island Dam spans the Columbia River in the southeast portion of the area. In 2006, Malaga completed a visioning planning document, which defined the LAMIRD boundary and set appropriate land use designations (see Appendix D). As part of the Comprehensive Plan update process, the County is seeking to revise the designation of the community of Malaga from a LAMIRD to UGA. The UGA boundary excludes properties designated for agricultural use to preserve agricultural lands and maintain consistency with resource land protection policies.

Rural Surroundings

Malaga's unique character is addressed in large part by the Malaga Vision Plan; however, the region outside the plan area provides a rural character unlike any other in the County. This area is known for winding roadways that hug the hill sides. Rural farm life is most common with early morning tractors, spraying, farm worker housing, ranches are common where water rights are available. Larger parcels of land with dry farms or natural landscape are common as the roads turn private or end. Future development and clustering would be compatible when developed in a manner which reduces road cuts and visual impacts, preserves open space, provides agriculture and/or recreational opportunities and protects critical areas.

Lower Wenatchee River Valley

Location and Geology

The Lower Wenatchee River area includes the City of Cashmere and the communities of Monitor and Sunnyslope; and multiple canyons: Ollala, Hay, Nahahum, Warner, Warm Springs, Brender, Brisky, Tripp, Yaksum and Fairview,, and Mission, Brender and Swakane Creeks.

This area was first settled by members of the Wenatchi Indian Tribe. Where Cashmere now stands, the winter village of Ntuatckam was located and had a population of about 400 in 1850. Missionaries founded a small mission near the present site of Cashmere in 1863. In 1870, the first irrigation ditch in the valley was built which permitted irrigation around the mission. Other permanent settlers began arriving around 1881. They first settled in the Monitor area, but eventually homesites could be found in all areas of the Wenatchee Valley. The first major irrigation project, the Peshastin Ditch, was completed in 1890 to serve Cashmere and Dryden. The completion of the Great Northern Railway through Wenatchee in 1892 provided the impetus for undertaking the construction of the Highline and Icicle Canals. Completed in the early 1900s, these canals provided a source of water for orchards on the north and south sides of the Wenatchee River.

Today, the agricultural and services industries continue to be significant contributors to the economy of the planning area. Orchards are located throughout much of the lower valley, although they are being replaced by residential development in the Sunnyslope area. Major crops include apples, pears and cherries. Service industries are found primarily in the incorporated City of Cashmere and the unincorporated community of Sunnyslope. In 2008 Sunnyslope was included in the City of Wenatchee UGA and has since undergone significant residential development.

Rural Character

This region of Chelan County is made up of flat land and rolling hills with orchards and residential living among the numerous streams, hills and natural habitat areas. The rural environment is characterized by orchards in the valley and on the lower elevations of the hills. Preservation of farming rights is important to the region. Along the primary river – the Wenatchee River, and the highway there are several communities which provide small town living and work opportunities. These towns are a source of great pride to the local residents. They represent the best of small town living with concentrated development in a core "downtown," residential homes, and rural public services, such as a post office or school. These areas also contain industrial processing facilities necessary for the agricultural actives. Moving away from the Wenatchee river valley and orchards, land to the north is characterized by evergreen trees while the southern portion of the valley's undeveloped land contains natural grasses, shrubs and occasional trees. Future development and clustering would be compatible when the development was consistent with farming rights, reduced road cuts and visual impacts, and protects critical areas.

Upper Wenatchee River Valley

Location and Geology

The Upper Wenatchee River Valley area includes portions of the Wenatchee River, Chumstick Creek, Peshastin Creek and Icicle River Valleys, including the City of Leavenworth, the Urban Growth Area for Peshastin and the community of Dryden.

The topography of the west and north is a direct result of large mountain glaciers that formed in the Icicle, Tumwater, and Chumstick Canyons. Glacial action was responsible for deepening and smoothing the valley floors. These glaciers probably terminated along the Mountain Home Road, to the southeast of Leavenworth, where there is evidence of a terminal moraine.

Throughout much of the area, the soil is underlain with alluvial deposits and glacial drift. Volcanic pumice and ash from the Glacier Peak region have added substantially to the depth and character of the soil in the valleys and drainages. The mountainous terrain, with characteristically steep slopes and high elevations, consist largely of rock outcroppings and shallow soils.

The Wenatchee and Icicle Rivers and supporting tributaries are important bodies of water. Not only do these bodies of water and their tributaries provide the main source of drinking water for the area, they are also important for irrigation, recreation, and fish and wildlife habitat.

Rural Character

Most of the Upper Wenatchee River Valley consists of mountainous terrain with residential development along the rivers and lakes. The development areas are "pockets" of higher densities surrounded by natural lands. Land north and east of Leavenworth contains several unofficial communities – Tumwater, Chumstick, which are expected to continue growth patterns of smaller lots sizes along developed roads and water ways. Land to the west of Leavenworth is extremely limited by the mountains and steep slopes. Small parcel sizes are common due to the building area and ownership patterns. Future development and clustering would be compatible when developed in a manner which reduces road cuts and visual impacts, preserves open space, provides recreational opportunities and protects critical areas.

Plain-Lake Wenatchee

Location and Geology

The Plain/Lake Wenatchee area is located on the east slope of the Cascade Mountains in west central Chelan County, roughly within the boundaries of the Lake Wenatchee Ranger District of the Wenatchee National Forest. It is comprised of several river valleys which feed into Lake Wenatchee.

Much of the area is designated as National Forest. Most of the private land in the area is concentrated along the major water bodies and transportation routes.

Due to steep unstable slopes, floodways, wetlands and other critical areas, much of the area is not suitable for development. Development is also constrained by designated resource lands. Current development has occurred on limited areas near the rivers, Lake Wenatchee and Fish Lake.

There are 30 different soil types in the area. Of primary concern is the limitation for septic tank absorption fields, based on soil types. Three of the soil series, the Brief, Burch and Chiwawa have only slight limitations for septic tanks and are therefore desirable soils to develop. The remaining 27 soil types have septic tank limitations.

The area has two large lakes of state-wide significance: Lake Wenatchee and Fish Lake. There are also dozens of smaller alpine lakes in the Wenatchee National Forest, which includes portions of three different wilderness areas. Lake Wenatchee and Fish Lake support a number of recreational uses. There are also several significant rivers including: Wenatchee River, Chiwawa River, Nason Creek, Little Wenatchee River, White River, Napeequa River, Phelps Creek, and Whitepine Creek.

Rural Character

Most of the Plain-Lake Wenatchee area contains residential homes among the mountains with denser populations along the lakes and rivers. This is consistent with the rural recreation opportunities of the area. Plain provides a community area with commercial services and a public post office and school. Development is limited by ownership and parks but future development of recreational support services would be consistent with current activities. Future development and clustering would be compatible when developed in a manner which reduces road cuts and visual impacts, preserves open space, provides recreational opportunities and protects critical areas.

Stehekin

Location and Geology

The Stehekin area includes the northeastern most portion of the Lake Chelan National Recreation Area, extending to the County boundary and the entirety of the northwest end of Chelan County, including that part of the North Cascades National Park that falls within the County boundary. The National Park Service manages most of the federal property in Stehekin. There are approximately 400 acres of private land, intermingled with federal land administered by the National Park Service.

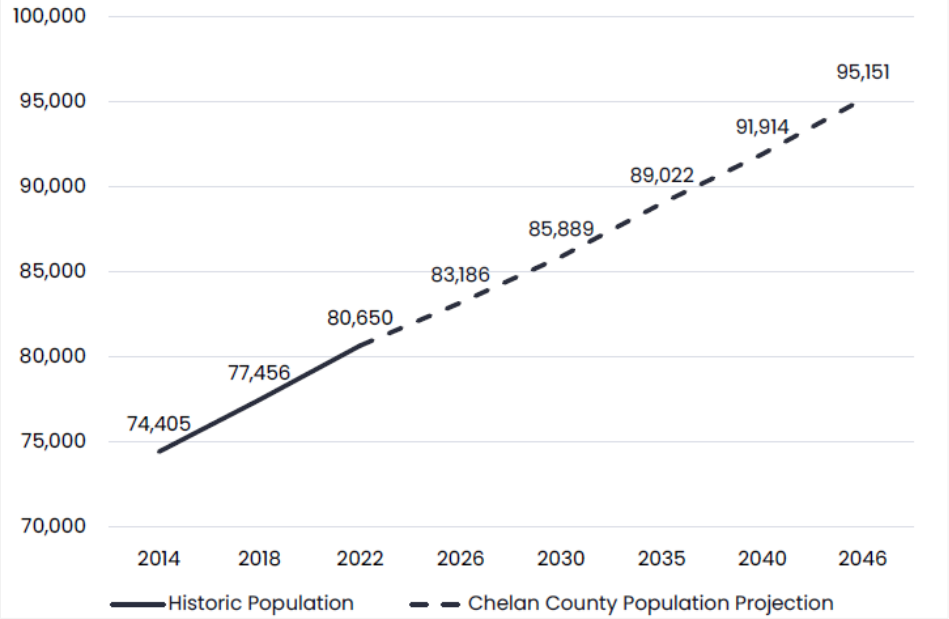
The Stehekin Valley is a U-shaped, glacially-carved canyon in the North Cascades. The valley is nearly 6,000 feet deep, and a mile or less wide as it extends 25 miles from Lake Chelan to the Cascade Crest. The valley floor is relatively flat with very little slope. The walls rise abruptly on each side of the river; hence, all construction has occurred on the floor of the valley, which is prone to flooding. Efforts have been made to move residential structures from the flood plain/way areas to higher ground.

The surface waters of the Stehekin River system, including the upper portion of Lake Chelan, can be characterized as clear and cold, with high oxygen content and low fertility. During major floods, the river spills its banks and occupies its floodplain, moderating the ultimate height of the flood's crest.

Native trees include western red cedar, Douglas and grand firs, ponderosa and white pines, big leaf, and vine maples, dogwoods, alders and cottonwoods. Limited logging, and timber cutting for firewood have opened some areas to change. Taking advantage of such change, or adapting to it, have been mule deer, black bears, coyotes and cougars, along with numerous small mammals and birds.

Rural Character

Most of Stehekin is undeveloped federal land. A small community along the northern most shore of Lake Chelan, it continues to develop and grow as a recreation and tourist service center. When future development occurs, it should be compatible if developed in a manner which reduces road cuts and visual impacts, preserves open space, provides recreational opportunities and protects critical areas.



IV. Future Needs and Alternatives

Analysis of Population and Demographics

The analysis of local population and demographic trends is important for a broad understanding of the County and to anticipate future needs.

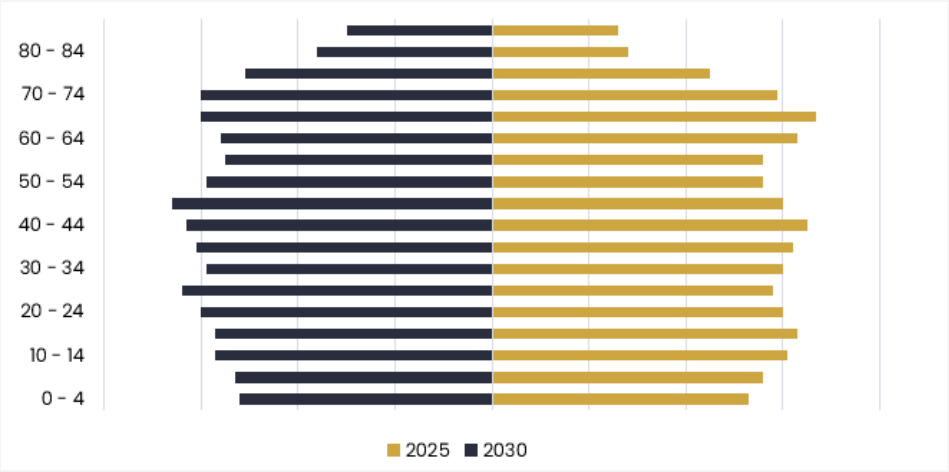
In 2023, Chelan County's estimated population was 81,500. On March 5, 2024, the Board of Chelan County Commissioners adopted a set of population projections based on the medium targets set by the Washington State Office of Financial Management (OFM). Figure 2-1 shows the population projections that were chosen by the County. Table 2-1 shows the adopted projections broken down by each UGA, as well as incorporated and unincorporated Chelan County.

Figure 2-1
Chelan County Population Projections

Source: Chelan County Land Capacity Analysis, 2025

Table 2-1
Chelan County Population Projections by Geographic Area

UGA	Population Allocation	2022	2026	2030	2035	2040	2046	2026-2046
Manson	3.4%	2,103	2,189	2,280	2,385	2,483	2,592	403
Chelan	3.4%	4,704	4,791	4,884	4,991	5,090	5,201	410
Entiat	2.2%	1,361	1,418	1,478	1,548	1,612	1,684	267
Leavenworth	3.4%	3,041	3,128	3,221	3,329	3,428	3,539	410
Peshastin	0.0%	655	655	655	655	655	655	--
Cashmere	3.2%	4,153	4,235	4,322	4,423	4,517	4,621	386
Wenatchee	59.6%	41,019	42,530	44,141	46,008	47,731	49,660	7,130
Urban	75.28%	57,036	58,945	60,980	63,339	65,516	67,953	9,007
Rural	24.72%	23,614	24,241	24,909	25,683	26,398	27,198	2,958
Total	**100.00%**	**80,650**	**83,186**	**85,889**	**89,022**	**91,914**	**95,151**	**11,965**



Source: Chelan County Land Capacity Analysis, 2025

Appendix G includes a LCA for Chelan County. The LCA outlines the first step in the process undertaken by Chelan County to ensure sufficient land is available to meet future housing needs, based on projected population growth and the corresponding housing demand of all income segments through 2046.

Age Groups

In 2023, approximately 31% of the population was under the age of 25. Working age-adults between the ages of 25 to 54 made up 36% of the population, and retirement-age residents made up approximately 21% of the population.

Figure 2-2
Age Distribution in Chelan County, Current and Projected, 2025–2030 Gender

Source: Points Consulting, 2025

The large group of school aged residents has put the educational system at or over capacity. Several of the schools are adding facilities, see the Capital Facilities Element.

Diversity of Population

There are numerous challenges in collecting cultural data, including, how individuals classify themselves or how they want to be seen by others. Additionally, changes in how demographic information is collected and tracked, through the US Census, make it difficult to compare data. Table 2-2 summarizes 2023 census demographics (see Attachment B).

While many population groups can meet their housing needs, more vulnerable populations require special attention. They often lack financial or social resources to secure market-rate housing. Chelan County overall has a poverty rate of 9.0% that is comparable to the state average of 9.9% and lower than the national rate of 12.4%.

Table 2-2
2020 Census Data

Subject	Population Share (percentage)
White	66%
Hispanic or Latino	28%
Black/African American	1%
American Indian & Alaskan Native	1%
Asian	1%
Native Hawaiian & Other Pacific Islander	0%
Some Other Race	0%
Two or More Races	3%

Adopted Population Projections

Table 2-3
Jurisdiction Specific Population Projections and Housing Allocations for Chelan County

Population Allocations										
Urban Growth Area	Share of 2000-2020 Population Growth	Adjusted Population Allocation	2022 OFM Estimate	2026 Projection	2030 Projection	2035 Projection	2040 Projection	2045 Projection	2046 Projection	2026-2046 20 year change
Manson UGA	3.37%	3.37%	2,103	2,189	2,280	2,385	2,483	2,574	2,592	403
Chelan UGA	3.43%	3.43%	4,704	4,791	4,884	4,991	5,090	5,183	5,201	410
Entiat UGA	2.23%	2.23%	1,361	1,418	1,478	1,548	1,612	1,673	1,684	267
Leavenworth UGA	3.43%	3.43%	3,041	3,128	3,221	3,329	3,428	3,521	3,539	410
Peshastin UGA	-0.43%	0.00%	655	655	655	655	655	655	655	-
Cashmere UGA	3.23%	3.23%	4,153	4,235	4,322	4,423	4,517	4,604	4,621	386
Wenatchee UGA	59.59%	59.59%	41,019	42,530	44,141	46,008	47,731	49.347	49,660	7,130
Urban	74.86%	75.28%	57,036	58,945	60,980	63,339	65,516	67,557	67,953	9,007
Rural	25.14%	24.72%	23,614	24,241	24,909	25,683	26,398	27,069	27,198	2,958
Total	100.00%	100.00%	80,650	83,186	85,889	89,022	91,914	94,626	95,151	11,965

The share of population growth presented in the above table was calculated using the same methodology as the population allocations adopted under Chelan County Resolution 2015-112 for the last periodic update cycle.

The UGAs listed above include incorporated areas located within them, if any.

Growth Patterns

The County anticipates growth to occur in a manner consistent with the land use designations planned for and implemented by the zoning map and regulations. Growth in the County is constrained by public land ownership and topography. However, in developable areas, growth is expected to occur in areas identified as vacant and underutilized by the County Assessor's primary land use classification code. However, there is less land available for development within the Rural Residential/Resource 2.5 and LAMIRD designations. Therefore, the percentage of growth in these areas may be less than other residentially designated lands.

V. Goals and Policies for Land Uses

While recognizing that residential development is important and necessary to the sustainability of the County, the following goals and policies were developed to ensure that future development is compatible with surrounding land uses and can be efficiently and effectively served by public facilities and services. Further guidance can be found in the Rural Element and the Housing Element.

GOAL LU 1: Residential designations should provide for an adequate supply of land to accommodate the housing needs and strategies outlined by the comprehensive plan. Implementation regulations should provide for a variety of residential opportunities to serve a full range of income levels.

Rationale: An adequate supply of housing available to all income levels is necessary to meet the housing needs of the County.

Policy LU 1.1: Promote improved neighborhood character and compatibility through unified design and site requirements for both site-built homes and manufactured and modular housing.

Rationale: The placement of housing units should take into consideration compatibility with the character of existing and future residential areas.

Policy LU 1.2: Protect residential neighborhoods from impacts associated with incompatible land uses through application of development standards and permit conditioning.

Rationale: Incompatible land uses located in close proximity to residential neighborhoods may create adverse impacts which could lead to a reduction in the high quality of life for the County residents.

Policy LU 1.3: Develop innovative regulatory strategies that create developer incentives to provide affordable housing to low- and moderate-income households.

Rationale: This can be accomplished through the use of innovative techniques including but not limited to: density bonuses, performance zoning, zero lot line development, and cluster subdivisions. Incentives may help facilitate the construction of low and moderate income housing, including government-assisted housing, housing for moderate, low, very low, and extremely low-income households, manufactured housing, multifamily housing, group homes, foster care facilities, emergency housing, emergency shelters, permanent supportive housing, and within a UGA boundary, consideration of duplexes, triplexes, and townhomes in single family residential designations

Policy LU 1.4: Encourage development of moderate density housing options, such as duplexes, triplexes, and townhomes, and accessory dwelling units in relation to employment locations.

Rationale: Consistent with RCW 36.70A.070(2)(b), (d) and WAC 365-196-410(2)(a), locating new multi-unit development increases residential capacity in areas located near employment centers promotes workforce housing, reduces long travel distances, and promote multimodal access to jobs and services.

Policy LU 1.5: Allow co-living as a permitted use on lots located within a UGA that allows at least six multifamily residential units, including on a lot zoned for mixed use development following the standards set forth on HB 1998.

Rationale: Co-living housing is a type of housing that can provide rental homes affordable to people with moderate to low incomes without requiring any public funding. HB 1998, enacted in 2024, added a new section to RCW 36.70A to allow co-living housing as a permitted use on any lot located within an urban growth area that allows at least six multifamily residential units, including on a lot zoned for mixed use development.

Policy LU 1.6: Except as provided by the Rural Element, new residential development which requires urban services and facilities must be located within UGAs or LAMIRDs.

Rationale: Residential development at a size and density which requires urban services and utilities normally associated with urban areas should be located within the urban growth areas. Logical expansion and infill of urban growth areas will assist in reducing the cost of providing necessary infrastructure.

Policy LU 1.7: Encourage infill of vacant and underdeveloped land in existing residential areas within urban growth areas and rural communities, such as LAMIRDs.

Rationale: Many parcels of land are available within existing residential developments that can accommodate further development. Infill within these areas will allow public facilities and services to be provided in a more efficient manner.

Policy LU 1.8: Consider environmental limitations, availability of infrastructure and consistency with the Comprehensive Plan and the GMA when establishing residential density standards.

Rationale: Physical characteristics and the availability of utilities are important factors in determining residential development patterns and densities. In addition, residential densities must be consistent with the guidance of the comprehensive plan and the requirements of the Act.

Policy LU 1. 9: Consistent with the GMA, ensure provision of necessary public facilities and public services for the development, infill and redevelopment of existing residential and mixed-use centers outside urban growth areas, such as LAMIRDs or rural communities. Such services should not be extended in a manner that promotes low density sprawl in rural areas.

Rationale: The GMA permits the development, redevelopment and infill of existing intensely developed rural areas. The Act does not allow for the expansion of these areas outside of logically set boundaries.

Policy LU 1.10: Ensure that adequate off-street parking is provided for residential development.

Rationale: Off street parking should be provided in safe and convenient locations. Off street parking for high density multifamily residential development should accommodate those with special needs.

GOAL LU 2: Physical Activity: Encourage active communities through land use decisions and designs that support bikeways, pedestrian, equestrian and other non-motorized transportation modes.

Rationale: Land use regulations set the framework for how communities function. Supporting non-motorized transportation through land use not only increases the transportation functions but benefits an individual's health, the environment and can improve land values. Encouraging physical activity would reduce per capita vehicle miles traveled within the County.

Policy LU 2.1: Encourage physical activity through land use policies, regulations, design and, when feasible, community awareness and education.

Policy LU 2.2: Support implementation of multi-modal transportation facilities, continued use of public lands, and land uses such as parks, trail systems, sidewalks, road ways and other transportation systems, when reviewing land use designations, development permits and land divisions.

Policy LU 2.3: Support higher density residential uses in areas with access to multimodal transportation, urban amenities, goods and services, physical activity, and healthy foods.

Rationale: Locating residential areas with access to multimodal transportation, urban amenities, and goods and services can reduce the reliance on single occupancy vehicles (SOVs) to cover everyday needs and promotes physical activity, consistent with RCW 36.70A.070(1), as amended, and WAC 365-196-405(2)(j).

Policy LU 2.4: Promote commercial, mixed use, high-density housing, and transit-oriented development to promote non-vehicular modes of transportation as well as public transportation, while reducing SOV trips and reducing per capital vehicle miles traveled (VMT).

Rationale: Commercial and mixed-used zoning could reduce commutes, VMT and travel distances by co-locating homes, jobs, urban amenities, and access goods and services. Access to active transportation infrastructure promotes physical activity, consistent with RCW 36.70A.070(1), as amended, and WAC 365-196-405(2)(j).

Policy LU 2.5: Update zoning provisions that are coordinated with transit access, commercial services, and public amenities.

Rationale: Zoning updates aligned with these factors helps to optimize public investment in infrastructure that support economic vitality in commercial centers, promotes transit-oriented and walkable communities, reduces dependence on SOVs, and improves accessibility to daily needs and employment opportunities.

Policy LU 2.6: Prioritize development of bikeways, sidewalks, multi-use trails, and equestrian routes in communities that experience the greatest environmental health burdens, ensuring safe, comfortable, and connected non-motorized routes for residents of all ages and abilities.

Rationale: Land-use decisions that support walkable and bike-accessible connections to schools, parks, public lands, grocery stores, social services, and transit, with priority placed on communities experiencing environmental health disparities improves everyday access to healthy food, recreation, and social resources and avoids creating or worsening environmental health disparities, pursuant to RCW 36.70A.070(1).

Policy LU 2.7: When siting active-transportation corridors near overburdened and vulnerable communities, pursue alignments that enhance safety and health while minimizing new impacts such as noise, dust, traffic conflicts, or other pollution.

Rationale: This policy ensures that physical-activity infrastructure does not unintentionally worsen health disparities, pursuant to RCW 36.70A.070(1).

Policy LU 2.7: Encourage the integration of shade trees, green infrastructure, and heat-mitigation features into walking and biking routes, prioritizing areas with high heat exposure, low canopy coverage, or other health risks.

Rationale: Design that prioritizes natural heat-mitigation features minimizes the risks of exposure to extreme heat for all users of non-motorized transportation infrastructure.

GOAL LU 3: Protect water quality and quantity.

Rationale: The protection of water quality and quantity is important for the public health, the local economy, the environment, and helps to maintain the high quality of life.

Policy 3.1: Support data collection for water quality and quantity which can be used to evaluate land uses and development. Including but not limited to:

- Support the implementation of watershed plans to address water quantity and quality, including instream flows. Continue to plan reserves for future population growth and track exempt well use.
- Improve County tracking and coordination efforts with public water providers.
- Evaluate the existing exempt well and reserve tracking system for expansion Countywide.
- Consider different conditions in each Water Resources Inventory Area (WRIA) or sub-basin regarding water quantity and quality concerns.
- For areas where physical availability is potentially limiting, support studies on safe sustaining yield of water in relation to planned growth.
- Support mitigation measures including infrastructure projects.
- Support analysis of water bank options, or other alternatives, where instream flow reserves are exhausted, or where there are concerns over legal or physical availability.
- Support development of outreach/educational materials to residents, interest groups and developers.
- Require development to provide adequate water for domestic use. Water source priorities are as follows, in order of priority:
    1. Connection to an existing public water system where available;
    2. Where a public water system is not available, implementation of a new public water system consistent with DOH and CDHD requirements; and
    3. Individual well outside the service of a public water system.

Policy LU 3.2: Encourage and support future and ongoing water quality monitoring programs.

Rationale: Monitoring of water quality helps to determine the impacts of growth and development on water quality. Should water quality problems arise, determining the sources of water quality degradation, and educational and regulatory tools to maintain or improve water quality would be necessary.

Policy LU 3.3: Support water quality education programs which inform local citizens and visitors about water quality issues and ramifications.

Rationale: Education programs can be an effective approach to maintaining or enhancing water quality.

Policy LU 3.4: Encourage appropriate regulatory agencies to actively pursue violators which illegally discharge waste into rivers, lakes and streams.

Rationale: Enforcement of water quality and waste disposal standards is a key element in maintaining contaminant free water resources.

Policy LU 3.5: Support ongoing health department efforts to adequately monitor on-site septic systems and require the repair of failing on-site septic systems.

Rationale: Failing on-site systems have the potential to introduce fecal coliform and bacteria into water systems.

Policy LU 3.6: Encourage existing and require future public boat launches to incorporate washoff stations. Vessel sewage pump-out and fueling facilities should be sited to implement best management practices for the protection of water quality.

Rationale: Preventative management of water resources is essential to maintain our high-quality water environments.

🥬 Policy LU 3.7: Promote municipal and agricultural water conservation and efficiency efforts in watersheds to manage water demand.

Rationale: It is anticipated that the most consequential change to water supply will likely be a shift in the timing of natural water availability throughout the year, which may create challenges for adequate water supply when water demand is greatest.

🥬 Policy LU 3.8: Allow for water storage near sources to address low stream flow, flooding, firefighting, and water supply needs consistent with watershed plans and development regulations.

Rationale: The water availability timing may change and alter how to provide an adequate water supply when water demand is greatest. Review watershed plans and other irrigation and water district plans for potential strategies and solutions.

🥬Policy LU 3.9: Compatible with state and health district rules, allow for greywater systems and promote water re-use.

Rationale: Greywater could be used for irrigation to conserve potable water.

GOAL LU 4: Preserve the integrity of significant natural, historic, and cultural features by minimizing the impacts of development.

Rationale: These features are an important part of the surroundings that contribute to the area's high quality of life.

Policy LU 4.1: Encourage development that is compatible with the natural environment and minimizes impacts on significant natural and scenic features.

Rationale: The design of development proposals should consider the relationship with the natural environment from both aesthetic and environmental perspectives. Capitalizing on natural features can enhance the quality of new development while minimizing potential adverse impacts and exposure.

Policy LU 4.2: Partner with agencies responsible for managing public lands to ensure that local interests are represented.

Rationale: Because public lands comprise such a large percentage of the County, the importance of management that reflects local interest cannot be over-emphasized.

Policy LU 4.3: Promote the use of land preserves and conservation areas to protect important natural areas from inappropriate development.

Rationale: Resource conservation areas are important for preservation of natural features.

Policy LU 4.4: Establish a framework for the identification and preservation of archeological and significant historic sites and structures within the County.

Rationale: Goal 13 of the GMA requires the identification of lands, sites, and structures that have historical or archaeological significance.

Policy LU 4.5: Encourage the design of non-motorized trails and recreation routes in consultation with Tribes and affected communities to avoid harm to cultural resources and environmentally sensitive habitats, while expanding inclusive access to outdoor recreational opportunities.

Rationale: Designing non-motorized trails and recreation routes in consultation with Tribes and affected communities can expand non-motorized access to parks, open space, and natural areas. Focusing on communities that currently lack safe and convenient recreation options while ensuring new park infrastructure does not create or exacerbate environmental burdens and avoids creating or worsening environmental health disparities.

VI. Urban Growth Areas

A focal point of the GMA is the requirement of designating urban growth areas (UGAs). UGAs are to include areas and densities sufficient to permit the urban growth that is projected to occur in the County over a 20-year planning period. Urban growth areas are to be located first in areas already characterized by urban development where existing public facilities and service capacity is available and second, in areas where public or private facilities or services are planned or could be provided in an efficient manner. Planning for growth in this way accomplishes two GMA goals: 1) the efficient provision and utilization of public facilities and services and 2) reduce inappropriate conversion of undeveloped land into sprawling, low density development. The GMA also requires the county to identify open space corridors within and between UGAs. Open space corridors connect parks, recreational lands, wildlife habitat, critical areas, and provide opportunities for trails and other compatible uses. Open space opportunities provide relief from intense urban land uses that create, among other things, urban heat islands.

The County contains two UGAs encompassing the unincorporated communities of Manson and Peshastin. The County has worked, and continues to work, with these communities to ensure that the development patterns and community objectives are met through the planning process and zoning regulations. Both Manson and Peshastin have completed comprehensive planning exercises in the past, the goals and policies of which have carried forward into this Chelan County Comprehensive Plan update. However, it should be noted that those plans were not updated as part of the 2026 effort and in the rare instance that there may be inconsistencies between the two, the full Comprehensive Plan policies will supersede the local plan.

In areas where UGA boundaries are associated with an incorporated city, the County and cities have worked jointly in the adoption of the UGA boundaries outlined in the County-Wide Planning Policies.

The County and the cities also work together to adopt development regulations and land use designations which meet the County and City's objectives for growth and development.

As part of the Comprehensive Plan update process, the County is revising the designation of the community of Malaga from a LAMIRD to UGA. Converting Malaga to a UGA would allow the County to increase density to support future anticipated development and commercial opportunities in this area. The rationale is that Malaga already operates as a UGA and adding urban services, such as sewer, could help alleviate environmental concerns related to water quality issues associated with increased levels of nitrates in groundwater as described in Appendix D.

The UGA boundaries will be evaluated at least once every ten years, according to RCW 36.70A.130, and may be amended on an annual basis to ensure they are adequate to accommodate the 20-year population projections. The assessment of the UGA capacity is based upon developable lands, environmental constraints, known water quality and quantity issues, housing and economic development needs, public facility and service capacities and the implementation of growth strategies.

The GMA defines urban growth, and urban governmental services as:

A. Urban growth refers to growth that makes intensive use of land for the location of buildings, structures, and impermeable surfaces to such a degree as to be incompatible with the primary use of land for the production of food, other agricultural products, or fiber, or the extraction of mineral resources, rural uses, rural development and natural resource lands designated pursuant to RCW 36.70A.170. A pattern of more intensive rural development, as provided in RCW 36.70A.70(5)(d), is not urban growth. When allowed to spread over wide areas, urban growth typically requires urban governmental services. "Characterized by urban growth" refers to land having urban growth located on it, or to land located in relationship to an area with urban growth on it as to be appropriate for urban growth.
B. Urban governmental services or urban services include those public services and public facilities at an intensity historically and typically provided in cities, specifically including storm and sanitary sewer systems, domestic water systems, street cleaning services, fire and police protection services, public transit services, and other public utilities associated with urban areas and normally not associated with rural areas.

VII. Goals and Policies for Urban Growth Area

GOAL LU 5: Encourage development to occur in urban growth areas where adequate public facilities and services exist or can be provided in an efficient manner.

Rationale: Promoting the efficient utilization of land by encouraging urban development within UGAs will improve the efficiency of infrastructure provision and usage and reduce low density sprawling development within the County.

Policy LU 5.1: Designated urban growth areas should include those areas already characterized by urban growth as well as those areas projected to accommodate future growth.

Rationale: Including areas already characterized by urban growth and those areas projected for urban growth within the urban growth areas is a logical progression that will help to prevent leapfrog development, reduce sprawl, and decrease infrastructure costs.

Policy LU 5.2: Designate and size urban growth areas in accordance with the GMA (RCW 36.70A.110) based on projected population growth; existing land use and transportation systems; capacity of public facilities and services; capacity to fund the necessary infrastructure and capital facilities. Consideration should also be given to addressing grossly irregular corporate boundaries during the process of designating urban growth boundaries.

Rationale: Following these criteria will ensure that the urban growth areas will be of sufficient size to allow for future growth and be served with urban level services.

Policy LU 5.3: Implementation regulations should be designed to ensure that urban densities outlined in the comprehensive plan can be accommodated in urban growth areas.

Rationale: Implementation regulations must be consistent with the comprehensive plan. Urban growth areas are the most appropriate location for accommodating urban growth.

Policy LU 5.4: The timing of utility extensions into the urban growth areas should be consistent with the adopted capital facilities plan of the utility purveyor.

Rationale: Public financing for the extension of public facilities and services may not allow for the extension of facilities and services prior to established timelines in the purveyor's capital facility plans. However, coordination between developers and public service purveyors may allow a repayment plan for improvements with provisions for utility assisted financing and latecomer fees.

Policy LU 5.5: Capital Facility Plans should provide for an urban-level of public facilities and services for buildout of lands within the Urban Growth Area.

Rationale: Urban levels of public facilities and services are necessary to accommodate planned urban growth and development.

Policy LU 5.6: Regularly evaluate Urban Growth Area boundaries based on new population projections provided by the State.

Rationale: Changing conditions that could affect growth rates in the future will necessitate a re-evaluation of established urban growth boundaries. Re-evaluations should be done on a more frequent basis than every ten years as required by the GMA.

Policy LU 5.7: Require developments within Urban Growth Areas to commit to public water and sewer systems, if available at the site. If public water or sewer service is not available, encourage use of community water and sewer systems over individual water wells and septic systems.

Policy LU 5.8: Require curb, gutter and sidewalks for all new roads in UGAs, and develop standards for street improvements, including alignment and grading, road surfacing, public road access and right-of-way and stormwater.

Policy LU 5.9: Enhance the visual character of access points to urban growth areas and rural community centers through implementation of development standards addressing signage, setbacks, landscaping, and design.

Rationale: Development standards should be adopted to address appropriate signage, setbacks and landscaping to promote an orderly and aesthetic approach into a community.

Policy LU 5.10: Permit development, redevelopment and infill in urban shoreline areas, when consistent with protection of critical areas.

Rationale: The amount of waterfront property suited for residential and multi-use development is limited. The presence of urban-level services will support higher densities, and development at such densities is encouraged to make efficient use of the shoreline.

Policy LU 5.11: Promote infill of vacant, partially used, and underutilized land as an important aspect of the efficient development of urban growth.

Rationale: Many parcels of land available within the residential, commercial, and industrial areas can accommodate further development. Infill within the urban growth area will allow public facilities and services to be provided in a more efficient manner.

GOAL LU 6: Identify and designate open space corridors within and between UGAs that connect parks, recreational lands, wildlife habitat, critical areas and that provide opportunities for trails and other compatible uses.

Rationale: Consistent with WAC 365-196-335, when identifying open space corridors, the county and cities should plan an integrated open space system that connects large parks, recreational lands, resource lands, wildlife habitats and critical areas. Designating and preserving open space corridors integrates multiple planning objectives, promotes access to nature for urban and rural residents, and supports ecosystem preservation.

Policy LU 6.1: Encourage the use of land development techniques to identify and maintain open space corridors that define urban growth boundaries and provide separation between communities, and between urban and rural areas where feasible.

Rationale: Designating open space corridors support GMA goals to reduce sprawl, protect rural character, and sustain ecological and recreational open space between developed areas.

Policy LU 6.2: Urban growth planning with any federally recognized Tribe whose reservation or ceded lands lie within the County and has chosen to participate in GMA planning should include early and meaningful government-to-government consultation.

Rationale: Pursuant to RCW 36.70A.040 and RCW 36.70A.110(9) early, substantive consultation with affected Tribes addresses potential impacts to cultural resources and treaty rights and establishes mediation when agreement cannot be reached.

Policy LU 6.3: Consider various land acquisition techniques in the development of cooperative management plans and implementation strategies for open space areas of inter-jurisdictional significance and encourage cooperative work with public and private groups to identify, protect, and enhance open space areas.

Rationale: By using diverse land acquisition techniques and partnerships with public and private entities, the county can more effectively identify, protect, and enhance open space areas that provide regional ecological, recreational, and community benefits across jurisdictions.

Policy LU 6.4: Preserve tree canopy cover in critical areas such as streams, wetlands, critical aquifer recharge areas, geologically hazardous areas, frequently flooded areas, and shorelines.

Rationale: Maintaining canopy cover along streams, wetlands, and other sensitive areas enhances habitat quality, stabilizes soils, improves water quality, moderates microclimates, and supports the broader goal of creating an integrated green network that links parks, habitats, and recreational spaces.

Policy LU 6.5: Encourage construction within or within proximity of urban forests to occur in such a way to protect the forest and the structures against hazards of wildfire.

Rationale: This approach supports the long-term health and safety of the built and natural environments and maintains the integrity of open space corridors and urban forest systems by reducing fire and property risks and preserving habitat connectivity within and between UGAs.

Policy LU 6.6: Promote urban forests through tree planting programs, increased education and awareness, maintenance of trees in parks, residential, commercial, and industrial areas, and restoration and protection of forest habitat.

Rationale: Promoting urban forests through tree planting, education, maintenance, and habitat restoration strengthens the ecological and social value of open space corridors within and between urban growth areas.

Policy LU 6.7: Consider establishment of tree retention and replacement policies in all zones.

Rationale: Expanding and caring for urban tree cover enhances air and water quality, provides wildlife habitat, mitigates heat island effects, and fosters community stewardship of green spaces across all land use types.

GOAL LU 7: Convert the Malaga LAMIRD into a UGA.

Rationale: Converting the Malaga LAMIRD to a UGA would allow the County to provide urban services, increase density to support future anticipated economic development and commercial opportunities, and reduce environmental health hazards from septic tank use in this area. This ::services and reducing inappropriate conversion of undeveloped land into sprawling, low density development.

LU 7.1: Develop and adopt development standards that are compatible with the existing rural landscape in Malaga. These include requiring landscaping, buffering, and screening for residential, commercial, and industrial uses, with emphasis on native vegetation, visual integration with the surrounding landscape, and mitigation of noise, dust, and light impacts.

Rationale: Thoughtfully designed buffering standards protect the rural visual character while allowing for economic diversification and the development of new commercial and housing units. These standards minimize land use conflicts, enhance community aesthetics, and provide ecological benefits such as habitat and stormwater filtration.

LU 7.2: Continue to develop and implement a public education initiative to inform community members about the use of cluster development as a tool for preserving open space, agricultural land, and natural resources, including the use of Transfer of Development Rights (TDRs) and Commerce's Landscape Conservation Infrastructure Program (LCLIP). Following implementation, conduct a community feedback process to reassess public perspectives and refine clustering policies accordingly.

Rationale: Educating residents on the opportunities and benefits of cluster development strategies and following up on public perceptions by meaningful public engagement helps address misconception, builds relationships, and enables informed refinement of land use policies.

LU 7.3: Initiate and ma.2intain coordination with the Wenatchee School District to evaluate population growth projections and jointly identify suitable sites for a future elementary school that ensures safe, accessible, and equitable educational infrastructure for local families.

Rationale: There are no public school facilities within Malaga. Collaboration with the school district ensures that education facilities keep pace with demographic changes. Early coordination reduces siting conflicts, improves transportation planning, and supports neighborhood-centered development.

LU 7.4: Encourage the expansion and modernization of public safety services to meet or exceed urban service standards in the Malaga UGA.

Rationale: Demands for critical services increase as population and development increase. Efficient public safety services support new development and maintain community resilience.

GOAL LU 8: Develop / maintain community-specific plans for UGAs

Rationale: While Urban Growth Areas are included in the county-wide planning goals and policies and all land use decisions must be consistent with this plan, community-specific plans can be useful in establishing vision and policy for unique communities in Chelan County.

LU 8.1: Ensure that community plans are consistent with the overall Chelan County Comprehensive Plan by reviewing population and housing allocations.

LU 8.2: As resources allow or as changing conditions merit, work with community representatives to update community plans in alignment with the 2027-2047 Comprehensive Plan.

VIII. Commercial Development

This sub-element addresses land use goals and policies relating to commercial development. The Citizen Advisory Committees also reviewed the following issues during discussions about future commercial development: parking, aesthetics, compatibility with adjacent land uses and the efficient

provision of public services and facilities. Further guidance for commercial development can be found in the Rural Element.

IX. Commercial Development Goals and Policies

GOAL LU 8: Direct future commercial development to designated commercial areas in urban growth areas and to existing rural commercial areas consistent with the Growth Management Act.

Rationale: Commercial activities should occur within urban growth areas which have the infrastructure and services necessary for such development. Under the provisions of the GMA, commercial development, redevelopment, and infill may also occur in existing rural commercial locations. The Act also provides for cottage industries and small scale recreation and tourist commercial activities in rural areas.

Policy LU 8.1: Strengthen existing commercial centers rather than permitting the aimless spread of new development.

Rationale: Strip commercial development causes negative impacts on existing infrastructure and access problems for road systems.

Policy LU 8.2: Support home occupations in residential areas provided such occupations would not alter the residential character of the property or create a nuisance that interferes with the peaceful occupancy of neighboring homes.

Rationale: Home occupations generate substantial economic activity with minimal land use impact.

Policy LU 8.3: Promote employment opportunities for rural residents by permitting isolated cottage industries and small-scale businesses where public services and public facilities would be limited to those necessary to serve these uses and be provided in a manner that does not permit low density sprawl.

Rationale: The GMA provides opportunities for cottage industries and small scale businesses in rural areas.

Policy LU 8.4: Take advantage of Chelan County's rural character and natural setting by promoting small scale, non-residential, recreation and tourist uses, including associated commercial facilities in rural areas.

Rationale: The GMA provides opportunities for small scale recreation and tourist uses in rural areas.

GOAL LU 9: Support the enhancement and development of successful commercial areas that are aesthetically pleasing, compatible with non-commercial uses, and have adequate access, public facilities, utilities, and parking.

Rationale: Commercial development must take into consideration potential impacts on adjacent land uses and the community.

Policy LU 9.1: Protect residential zones and scenic corridors from visual impacts of commercial development by requiring screening or enclosure of outdoor vehicle or material storage areas.

Rationale: A compatible image is essential for the success of the community, quality of life, and the tourism industry.

Policy LU 9.2: Implement regulations to ensure recreation or tourist uses and associated commercial facilities in rural areas are compatible with surrounding land uses.

Rationale: Potential impacts on surrounding land uses should be addressed.

Policy LU 9.3: Promote commercial development design that maintains high aesthetic quality and includes features to protect less intense land uses, including setbacks, landscape buffers, and screening.

Rationale: Appropriate setbacks and landscape buffers can help mitigate impacts on less intensive land uses.

Policy LU 9.4: Future commercial development should contribute a proportionate share of infrastructure improvement costs, though local government may choose to incentivize desirable commercial development when the public benefits would surpass improvement costs.

Rationale: Existing uses should not be responsible for the costs of system improvements associated with new development. However, development should not be required to contribute to improvements not reasonably related to the development. Desirable commercial development can bring greater benefits to an area than it may cost to provide services.

Policy LU 9.5: Ensure that adequate parking and transportation facilities are provided in conjunction with expansion of or development of additional commercial activities.

Rationale: Sufficient off-street parking should be provided in safe and convenient locations and should be compatible with adjacent land uses. Off street parking should accommodate those with special needs.

Policy LU 9.6: Promote and encourage improvements to the appearance of the commercial districts and residential areas throughout the County.

Rationale: Consideration of the compatibility of land uses, and providing for appropriate lighting, curbs and gutters, and sidewalks may encourage improvements to commercial buildings and adjoining residential districts in the County.

Policy LU 9.7: Support placement of commercial activities and land use designations to meet the economic needs of the County and provide for a range of commercial opportunities that support diversification of the area economy.

GOAL LU 10: Retain docking facilities at the Stehekin landing for both commercial and private use.

Rationale: The dock is the port area of Stehekin and should be used for the benefit of all.

Policy LU 10.1: Provide the opportunity for appropriate year around moorage at Stehekin landing for commercial and private use.

Rationale: People who work and recreate with watercraft in the Stehekin Area should have access to a portion of the Stehekin boat docks year around.

X. Industrial Development Goals and Policies

Existing industrial activities contribute significantly to the economic and employment base of the County. Industrial uses overall in the County are primarily resource based; however, non-resource-based industries have become more common in the county. Industrial development opportunities in rural areas are limited due to the lack of available infrastructure including public water and sewer systems. During the discussion of industrial development, several issues and concerns were identified. Some of these include:

- Size of projects
- Emissions from uses (fumes, noise, dust)
- Locating compatible or similar uses together
- Buffering of industrial development and less intensive land uses

Strategies to diversify and provide guidance for industrial development can be found in the Rural Element as well as this sub-element.

GOAL LU 11: Direct future industrial development to designated industrial areas in Urban Growth Areas and LAMIRDs and to existing rural industrial areas, consistent with the Growth Management Act.

Rationale: Industrial activities should occur within urban growth areas and LAMIRDs which have the infrastructure and services necessary for such development. Under the provisions of the GMA, industrial development, redevelopment, and infill may also occur in existing rural industrial locations. The Act also allows for the development of cottage industries in rural areas.

Policy LU 11.1: Permit siting of industrial uses in rural areas when adverse impacts to the rural community can be minimized and the requirements of the GMA (RCW 36.70A.365 or RCW 36.70A.070(5)) can be met.

Rationale: Some industrial uses, because of the nature of their operations, are more appropriately located in rural areas.

Policy LU 11.2: Promote the use of innovative development techniques, such as industrial parks, to improve the aesthetic appearance of industrial development and promote positive working environments.

Rationale: Industrial parks can be used to promote the human working environment through the provision of convenient and safe access, parking and landscaping. Site design of industrial parks can improve the aesthetic appearance of industrial developments.

Policy LU 11.3: Encourage industrial development to locate in areas with access to necessary support facilities, services, and transportation systems, and where industrial development would be compatible with nearby land uses.

Rationale: Industrial development should not conflict with adjacent land uses, should be served by a convenient transportation system and have access to necessary public facilities and services.

Policy LU 11.4: Provide necessary public facilities and services for development, infill and redevelopment of existing industrial or mixed-use sites outside of urban growth areas, where such services can be provided in a manner that does not promote sprawl, consistent with the GMA.

Rationale: The GMA provides for the redevelopment and infill of existing industrial areas.

Policy LU 11.5: Promote revitalization of existing developed industrial areas suitable for continued use.

Rationale: Continued use and on-going redevelopment of developed sites will take advantage of existing infrastructure investments.

Policy LU 11.6: Develop a comprehensive solid waste management plan in coordination with the cities within Chelan County and that contains policies on the reduction, collection, and handling of solid waste and materials as well as management services and programs throughout the County.

Rationale: Consistent with RCW 36.70A.142, as amended to allow for siting of organic materials management facilities as identified in local solid waste management plans.

Policy LU 11.7: Organic materials management facilities should be sited following the criteria described in RCW 70A.205.040(3)

Rationale: Consistent with RCW 70A.205.040(3), priority areas for organic materials management facilities must be in industrial zones, agricultural zones, or rural zones, and may not be located in overburdened communities identified by Ecology under chapter 70A.02 RCW.

GOAL LU 12: Maintain Chelan County's existing industrial base and promote further diversification of the area's economy with industries that are compatible with surrounding land uses.

Rationale: Existing industrial base and resource based industries provide the foundation for the area's economy. Industrial development and redevelopment should take into consideration impacts on surrounding land uses.

Policy LU 12.1: Encourage public/private partnerships for targeted identification and development of industrial sites.

Rationale: Public/private cooperation can more effectively help implement economic development and diversification of the County.

Policy LU 12.2: Future industrial development should contribute a proportionate share of infrastructure improvement costs, though, local government may choose to incentivize desirable industrial development when the public benefits would surpass improvement costs.

Rationale: Desirable industrial development can bring greater benefits to an area than it may cost to provide services.

Policy LU 12.3: Require industrial development to provide adequate setbacks, landscape buffers and/or screening to aid the transition between industrial development and other land uses.

Rationale: Appropriate setbacks, landscape buffers, and screening provided by vegetation, fencing and other methods can help mitigate impacts to less intensive land uses.

Policy LU 12.4: When evaluating industrial development proposals, ensure potential impacts on nearby properties and public facilities and services are avoided, minimized, or mitigated.

Rationale: Industrial developments can be fairly intensive land uses. When reviewing industrial development proposals, impacts on nearby properties and public facilities and services must be addressed.

Policy LU 12.5: Encourage the development of light industries to diversify the area economy while minimizing negative environmental impacts.

Rationale: Further development of light industries would help diversify the area's economy while minimizing negative environmental impacts.

Policy LU 12.6: Develop regulations to ensure that cottage industries in rural areas are compatible with surrounding land uses.

Rationale: Impacts to surrounding land uses should be avoided or mitigated whenever possible.

Policy LU 12.7: Ensure provision of adequate off-street parking in conjunction with the expansion or development of industrial sites.

Rationale: Sufficient off-street parking should be provided in safe and convenient locations and should be compatible with adjacent land uses. Off street parking should accommodate those with special needs.

Policy LU 12.8: Industrial and natural resource land uses that constitute a nuisance, making them inherently unsuitable for urban areas, may be permitted on a limited basis in remote rural areas, provided that the extension of urban services would not be required and that potential impacts on surrounding land uses can be addressed.

Rationale: Some industrial and natural resource based uses, due to their nature, are not appropriate to be located in urban growth areas but can be located in remote locations within the limits set by rural governmental services, and the protection of the rural character and critical areas. Said uses can play an important role in support of other industries and businesses in the county.

XI. Open Space/Recreation

Open space is an important component of the natural environment and supports natural systems, aesthetic, recreational, and economic resources in the rural landscape. Open space is minimally developed or undeveloped land that serves a functional role in the life of a region. Open space helps

define the rural character of the County. Open space related to recreation is specifically addressed in the Park and Recreation Element.

Open space lands in Chelan County consist of critical areas, parks and recreational land, wildlife corridors and conservation areas. Within the County a significant amount of land is owned and managed by Federal and State agencies. These areas are an important open space resource providing numerous benefits to the County and its residents.

Open space lands may have some restrictions on their use or management. If the County acquires sufficient interest in a property, or control of resource development, based on public interest, additional restrictions may occur. The County may acquire, by donation or purchase, land ownership and/or easements within these open space corridors.

XII. Goals and Policies for Open Space/Recreation

GOAL LU 13: Preserve open space for the enjoyment of County residents and visitors.

Rationale: Open space is a valuable resource for the enjoyment of residents and visitors. The retention of open space helps to maintain the natural beauty and rural character of the County.

Policy LU 13.1: Encourage the provision and retention of open space through regulations that allow innovative techniques and incentive-based programs, such as the public benefit rating system, the open space tax program, purchase of development rights or conservation easements by public or private entities, and land trusts.

Rationale: Innovative site and development designs and incentive programs help to encourage the retention and provision of open space.

Policy LU 13.2: Encourage multiple uses of public lands to support open space and recreational use in the County.

Rationale: Public lands can provide opportunities for open space preservation and recreation opportunities while providing for the management of valuable natural resources by public entities.

Policy LU 13.3: Encourage preservation of outstanding natural and scenic resources, critical areas, and significant historic and cultural resources.

Rationale: Protection of these resources will help to maintain the high quality of life enjoyed by residents and visitors of Chelan County.

Policy LU 13.6: Ensure that construction within or within proximity of urban forests occurs in such a way to protect the forest and the structures against hazards of wildlife.

Rationale: The Land Use Element must be consistent with RCW 36.70A.070(1), as amended, RCW 36.70A.160, and WAC 365-196-335.

Policy LU 13.7: Promote urban forests through tree planting programs, increased education and awareness, maintenance of trees in parks, residential, commercial, and industrial areas, and restoration and protection of forest habitat.

Rationale: The Land Use Element must be consistent with RCW 36.70A.070(1), as amended, RCW 36.70A.160, and WAC 365-196-335.

Policy LU 13.8: Consider establishment of tree retention and replacement policies in all zones.

Rationale: The Land Use Element must be consistent with RCW 36.70A.070(1), as amended, RCW 36.70A.160, and WAC 365-196-335.

GOAL LU 14: Encourage development and maintenance of recreational facilities and opportunities to meet the needs of residents and visitors.

Rationale: Recreational opportunities help to promote the area for tourism and provide for a high quality of life.

Policy LU 14.1: State and publicly owned tourist/recreation destinations should provide adequate sanitary facilities.

Rationale: Adequate sanitary facilities help to maintain the quality of recreation opportunities enjoyed by residents and tourists in the area.

Policy LU 14.2: Prepare a comprehensive study of underutilized public rights of way and easements and assess the potential for public benefit through the following steps:

- Identify all undeveloped or underutilized public rights of way and easements and determine ownership status.
- Establish criteria to evaluate public benefit, including, but not limited to, lake access, park siting, trails, view corridors, resale or exchange, open space, critical areas, utility purposes, and property access streets.
- Assess each site's value using criteria established in step "b" to determine value for use or sale.
- Develop and encourage the implementation of a plan for use or sale of each site.

Rationale: Underutilized right of ways and easements offer an opportunity for significant public benefit as open space and recreation.

Policy LU 14.3: Support the development of recreation districts in the County where local support can be demonstrated.

Rationale: This is an opportunity to meet open space and recreation needs within the County.

🥦 Policy LU 14.4: Improve and promote the range of weather-independent and all-season tourism and recreation opportunities.

Rationale: Anticipated changes in temperature and precipitation are expected to affect availability of winter and summer recreation and tourism (e.g., shorter winter recreation periods and less summer water availability). Adaptions to seasonal conditions would be important to the local economy.

XIII. Master Planned Resorts

The scenic and natural amenities located within Chelan County afford opportunities for varied recreational activities. It is the intent of this comprehensive plan to provide guidance for Master Planned Resorts (MPR) as authorized by the general principles contained in RCW 36.70A master planned resorts, as amended.

MPRs are developments with urban characteristics that may be located outside of urban growth areas. A MPR is a fully integrated, self-contained planned unit development, in a setting of significant natural amenities, with its primary focus on destination resort facilities, consisting of short-term visitor accommodations associated with a range of developed on-site indoor and/or outdoor recreational facilities. Capital facilities, utilities, and services, including those related to sewer, water, stormwater, security, fire suppression, and emergency medical provided on-site should be limited to meet the needs of the master planned resort. Implementation regulations will be established for the approval of MPRs that are consistent with the goals and policies contained in this plan and meeting the future development goals of the county.

XIV. Goals and Policies for Master Planned Resorts

GOAL LU 15: Provide opportunities for Master Planned Resorts (MPRs), consistent with the provisions of RCW 36.70A.360, to create a diversity of recreational, tourist and economic opportunities in Chelan County.

Rationale: State law contains criteria that are required to be utilized in the review and formation of development standards for MPRs.

Policy LU 15.1: The primary focus of Master Planned Resorts are as a fully-contained destination resort consisting of short-term visitor accommodations associated with a range of developed on-site indoor or outdoor recreation facilities, mix of related convenience goods and services, short-term residential uses, capital facilities, utilities and services and, when feasible, an affordable housing component for employees.

Rationale: RCW 36.70A.360 requires MPRs to have a primary focus on destination resort facilities.

Policy LU 15.2: MPRs should not occur in areas that are designated as agricultural or forest lands of long-term commercial significance under RCW 36.70A.170, unless a finding can be made that the land is better suited in the long-term for development as a MPR than for the commercial harvesting of timber or agricultural production.

Rationale: Chelan County places a prime importance on maintaining the current inventory of commercial forest and commercial agricultural land, which is a significant economic contributor to the county. Development of MPRs in rural areas would reduce the amount of productive land for agricultural or forest uses, as required by RCW 36.70a.360(4)(c).

Policy LU 15.3: Ensure the compatibility of MPRs with adjacent land uses through appropriate site design which emphasizes physical and visual separation from the nearest existing developed areas, preservation and protection of critical areas, and cluster development surrounded by open space.

Rationale: The urban characteristics of a MPR has the potential to create conflicts with rural uses.

Policy LU 15.4: Development plans for MPRs should blend site development and architecture with the natural character and features of the land, topography, vegetation, geology, slope, soils etc. The MPR design should also reflect relevant cultural heritage and preservation of the area's rural character or natural resource uses.

Rationale: MPRs are intended to take advantage of the natural amenities and character of the area. To ensure that those amenities continue and are undiminished, the design of the MPR must be compatible with the surrounding area.

Policy LU 15.5: Permanent residential uses may be included within the boundaries of a MPR, provided such uses are integrated into and support the on-site recreational nature of the resort.

Rationale: The primary focus of the MPR is for destination resort facilities with short-term visitor accommodations associated with a range of developed on-site indoor or outdoor recreation facilities. Given this focus, single-family or multi-family residential development should not be the primary component of MPRs.

Policy LU 15.6: Necessary capital facilities, utilities and services may be provided to a MPR by outside service providers, including municipalities and special service districts, provided that all costs associated with service extensions and capacity increases directly attributable to the MPR are fully born by the resort, and provided that such facilities and utilities serve only the MPR and/or urban growth areas.

Rationale: Due to the size and remote distance from existing services, significantly larger costs of extending services and capacity result from an MPR than from other forms of development. Limiting the use of those services outside of an UGA will limit unwanted development outside of those areas.

Policy LU 15.7: Existing resorts seeking designation as Master Planned Resorts should have been completed before July 1, 1990, and planned as self-contained integrated developments focused on short-term visitor accommodations and recreational facilities.

Policy LU 15.8: After designation as a MPR, new urban and suburban land uses should be precluded in the vicinity surrounding the resort, except in areas otherwise designated for urban growth or LAMIRDS.

> Rationale: MPRs are created to maintain rural character while allowing development to take advantage of natural amenities. Additional urban or suburban land uses around an MPR will diminish the rural character and should be directed to other areas designated for those types of uses, and as required by RCW 36.70A.362(2).

Policy LU 15.9: An existing resort may be included or expanded as a MPR when consistent with the provisions for a new MPR, critical areas and other regulations.

> Rationale: The impacts of the existing resort on the surrounding area should have been mitigated in a prior process. The expansion of a resort may create new impacts that must be identified and mitigated with the MPR process prior to approval.

XV. Environmental Justice Goals and Policies

The 2024 GMA legislation and updated Commerce guidance requires that counties that are fully planning under the GMA give special consideration to achieving environmental justice goals and policies, including efforts to avoid creating or worsening environmental health disparities (RCW 36.70A.070(1)). The term "Environmental Justice" is defined by RCW 70A.02.010 as "as the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to development, implementation, and enforcement of environmental laws, regulations, and policies. Environmental justice includes addressing disproportionate environmental and health impacts in all laws, rules, and policies with environmental impacts by prioritizing vulnerable populations and overburdened communities and the equitable distribution of resources and benefits." In this context, the term "overburdened communities" refers to the geographic area where vulnerable populations face combined, multiple environmental harms and health impacts, and includes but is not limited to communities impacted by fossil fuel pollution, by natural disasters, or a community located in census tracts that are fully or partially on Tribal land.

The Environmental Justice sub-element is consistent with the definition provided by the Washington State Department of Health that defines environmental health disparities as the increasing combination of social, medical, and environmental factors that cause more sickness, disease, pollution, and other problems and that affect communities with more economic needs. Goals and policies proposed in this sub element prioritize increased levels of health and wellness for all communities to benefit from clean air, clean water, and a healthy environment.

GOAL LU 16: Encourage the implementation of land use strategies and efforts that work to avoid creating or worsening environmental health disparities.

Rationale: Consistent with RCW 36.70A.070(1), as amended, this helps ensures that environmental benefits (e.g., access to services, and natural and recreational areas) are equitably distributed among all communities, including those with existing health disparities, and that no population is subject to disproportionate adverse effects.

Policy LU 16.1: Consider using geospatial analysis or other techniques that help identify overburdened communities within Chelan County to inform policies, plans, and distribution of funding that promote environmental justice and avoid creating or worsening environmental health disparities.

Rationale: Identifying geographic areas where vulnerable populations face combined, multiple environmental harms and health impacts, including communities impacted by fossil fuel pollution, by natural disasters, or a community located in census tracts that are fully or partially on Tribal land is the first step to guaranteeing meaningful involvement of all populations in development, implementation, and enforcement of environmental laws, regulations, and policies.

Policy LU 16.2: Encourage investments that meet the needs of current and future residents and employers, including overburdened communities.

Rationale: Residential and employment opportunities for all communities, including overburdened communities, contribute to the access to services by reducing economic and spatial barriers that could create or worsen environmental health disparities.

Policy LU 16.3: Reduce disparities in access to opportunity for all residents through inclusive community planning.

Rationale: Access to clean air and water, safe housing, green infrastructure, and park leads to improvements in the quality of life of all communities and reduces the potential for environmental health disparities.

Policy LU 16.4: Encourage the development of livable communities for those who live, work, and recreate in Chelan County by directing growth into urban areas that are accessible, walkable, and transit oriented; preserving and creating open spaces; and protecting resource and rural lands.

Rationale: Accessible, walkable, and transit oriented developments, in addition to preserving and creating open spaces and protecting resource and urban lands, could improve the quality of life of all communities by removing barriers to benefiting from resources and services offered in the County.

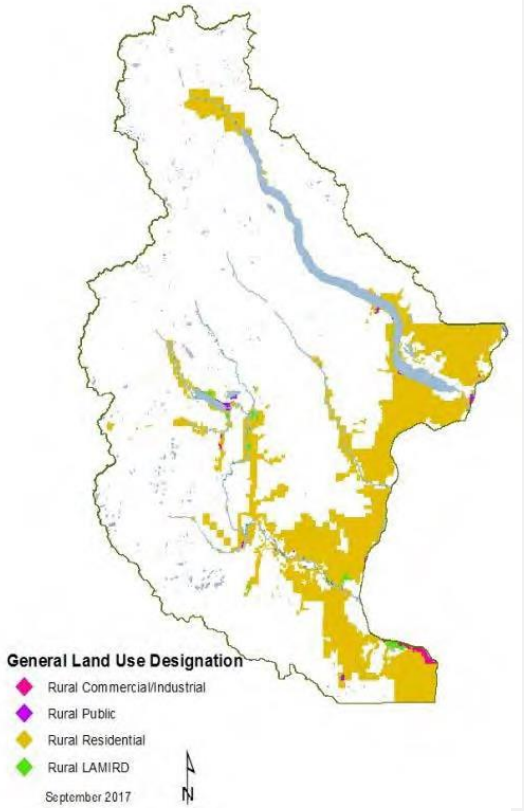
CHAPTER 3
RURAL ELEMENT



I. Introduction

The GMA requires a Rural Element in the County's comprehensive plan. The Rural Element contains goals and policies to guide the development of rural land including the identification of the general types of uses to be permitted. Rural lands are all lands not designated for urban growth, or agriculture, forest or mineral resource lands.

The GMA recommends providing a variety of residential densities at levels that are consistent with the preservation of rural character and the requirements of the Rural Element. The Rural Element provides guidance on appropriate land uses and densities for Chelan County's rural areas. Rural governmental services should be provided at a level necessary to support and sustain the land use pattern planned for rural areas. Rural governmental services should not provide the level of service

which promotes growth or sprawl in rural areas. The GMA provides the following definitions of rural development, rural character and rural governmental services:

A. Rural development refers to development outside of UGAs and outside agricultural, forest, and mineral resource lands designated pursuant to RCW 36.70A.170. This type of development can consist of a variety of uses and residential densities, including clustered residential development, at levels that are consistent with the preservation of rural character and other requirements. Rural development does not refer to agriculture or forestry activities that may be conducted in rural areas.

B. Rural governmental services or rural services include those public services and public facilities historically and typically delivered at an intensity usually found in rural areas, and may include domestic water systems, fire and police protection services, transportation and public transit services, and other public utilities associated with rural development and normally not associated with urban areas. Rural services do not include storm or sanitary sewers, except as otherwise authorized by RCW 36.70A.110(4).

C. Rural character refers to the patterns of land use and development established by a county in the rural element of its comprehensive plan:

   1. In which open space, the natural landscape, and vegetation predominate over the built environment;
   2. That foster traditional rural lifestyles, rural-based economies, and opportunities to both live and work in rural areas;

3. That provide visual landscapes that are traditionally found in rural areas and communities;
4. That reduce the inappropriate conversion of undeveloped land into sprawling, low density development;
5. That generally do not require the extension of urban governmental services; and
6. That are consistent with the protection of natural surface water flows and ground water and surface water recharge and discharge areas.

II. Intent

It is the intent of this Rural Element to preserve the rural character and way of life in the rural area, and to protect private property rights while considering impacts to the environment of Chelan County.

As noted in the Land Use Element, most land within the County is in Federal or State ownershipand is therefore considered unbuildable within the planning horizon of this plan.

As documented in the Parks and Recreation Element, the Federal and State lands provide the County with large rural and natural park lands, these include: Glacier Peak Wilderness, Lake Chelan Sawtooth Wilderness, Wenatchee National Forest, Alpine Lakes Wilderness, Henry M. Jackson Wilderness, North Cascades National Park, and Lake Chelan National Recreation Area. These very large wilderness and park areas are not expected to develop but rather enhance the character of the County as a recreation and natural resource to locals and visitors.

In addition to Chelan County's rural character being dominated by park lands, Chelan County has a history of agricultural uses—primarily orchards of various sizes, residential rural living; forest practices, rural industrial activities, mining and small town settlements. Over the last 20 years, some areas have transitioned to vineyards, wineries, smaller-scale agricultural production and agricultural and recreational tourism.

Within the Land Use Element each region of the County has been defined by its unique characteristics and rural character, including innovative tools for development. The goals and policies in the Rural Element are to guide land use activities in and surrounding rural lands. Goals and policies have been developed for the preservation of the rural character by:

- Containing or otherwise controlling rural development;
- Assuring visual compatibility of rural development with the surrounding rural area;

- Reducing the inappropriate conversion of undeveloped land into sprawling, low-density development in the rural area;
- Protection of critical areas, surface water and ground water resources; and,
- Protecting against conflicts with the use of agricultural, forest, and mineral resource lands of long-term commercial significance, see Resource Element.

The County land use designations can be grouped as Rural, limited areas of more intensive rural development (LAMIRD), Resource, and UGA. This Element addresses the siting criteria and Goals and Policies of the Rural and LAMIRD designations. Additionally, each designation is broadly defined with intended uses and densities under the siting criteria. Services for rural lands are addressed in the Capital Facilities and Utilities Elements.

Rural designations include: Rural Residential/Resource 2.5, 5, 10 and 20 LAMIRD designations include: Rural Waterfront; Rural; Rural Village; Rural Recreational/Residential; Rural Commercial; and, Rural Industrial

III. Goals and Policies – Rural Designations

GOAL RE 1: Maintain a balance between human uses and the natural environment in rural areas of the County.

Rationale: Residents who choose to live in rural areas need to realize that their lifestyle has an impact on the natural environment and efforts need to be made to find and maintain a balance between human activity and the natural environment.

🥬 Policy RE 1.1: Rural development should avoid and mitigate impacts to critical areas, which have value as wildlife habitat and open space and protect developed areas from natural disasters.

Rationale: Wildlife habitat and open space are typically located in rural areas and are an important part of the reason why people choose to live in a rural setting. Therefore, development may occur when suitable mitigation is provided to address impacts to Critical Areas existing in rural lands.

Policy RE 1.2: Uses not specifically addressed or prohibited in the comprehensive plan are not automatically allowed and should be reviewed on their own merits for compatibility with existing goals and policies.

Rationale: Should there be a new land use or an innovative technique towards the management of growth, they can be reviewed during the annual review process to analyze their compatibility with existing goals and policies of the plan.

Policy RE 1.3: Establish a variety of rural land use designations that would accommodate a wide variety of rural uses and densities consistent with the County's rural character.

Rationale: The rural areas of Chelan County contain a variety of land uses and densities that comprise the rural character of the area. Continuing this pattern will help to maintain and enhance this rural character.

Policy RE 1.4: Essential public facilities and/or services should be sited and developed in a manner that maintains the rural character of the area. Essential public facilities and/or services are appropriate for location in rural areas when suitable mitigation is provided.

Rationale: Essential public facilities and/or services should not compromise the goal of the Rural Lands.

Policy RE 1.5: Provide adequate stormwater infrastructure focused on regional systems (e.g., developing new and expanded pump stations and new stormwater facilities) where financially feasible and in circumstances shown to be necessary to protect basic human health and safety of the environment.

Rationale: Promote stormwater best practices to mitigate or cleanse discharges that may pollute waters of the state. Stormwater infrastructure should not compromise the goal of Rural Lands.

Policy RE 1.6: Where financially feasible and necessary to protect basic human health and safety of the environment, provide adequate wastewater infrastructure including new and upgraded pump stations to accommodate growth, with opportunities for private development to construct new and/or improve existing pump stations.

Rationale: Promote wastewater best practices to mitigate or cleanse discharges that may pollute waters of the state. Wastewater facilities and infrastructure should not compromise the goal of Rural Lands.

Policy RE 1.7: Encourage coordination with state and federal partners to evaluate long-term impacts to watershed hydrology, including the provisions of sufficient streamflow for salmonids, and identify mitigation options.

Rationale: Coordination with state and federal partners ensures that local policies align with broader water management, and habitat protection goals. Promoting efficient irrigation reduces infrastructure demands. Expanding water supplies for firefighting enhances public safety and reduces wildfire damage to watershed resources, protecting both communities and natural systems.

Policy RE 1.8: Where financially feasible and necessary to support and protect basic human health and safety of the environment, incentivize development that utilizes Low Impact Development (LID) practices, which improve stormwater quality and control runoff flow beyond minimum standards.

Rationale: Incentivizing LID and minimizing impervious surfaces reduces stormwater runoff, flooding risks and water quality degradation and do not compromise the goal of rural lands.

GOAL RE 2: Maintain natural environment features that support and enhance natural resource-based economic activities, wildlife habitats, traditional rural lifestyles, outdoor recreation, and open space.

Rationale: Conserving ecological functions, open space, landscapes, fish and wildlife habitat, and sustaining the environmental qualities that define traditional rural lifestyles supports long-term economic vitality. By maintaining natural environmental features, the County ensures that rural development proceeds at intensities compatible with surrounding resource lands and ecological constraints, preventing the creation of urban or suburban patterns in rural areas. .

Policy RE 2.1: Review rural development applications to determine the potential for groundwater contamination.

Rationale: Preventing groundwater contamination is necessary to avoid exorbitant costs, hardships, and potential physical harm.

Policy RE 2.2: Rural development should not preclude use of rural lands for agriculture and timber production and should avoid or mitigate impacts on existing agriculture or timber operations.

Rationale: Productive agriculture and timber lands exist in rural areas. Potential negative impacts to these lands from more intense land uses should be avoided through the application of appropriate mitigation measures and/or the use of innovative techniques.

Policy RE 2.3: Ensure that rural development (residential, commercial and industrial) near designated resource lands occurs in a manner that minimizes potential conflicts and reduces conversion of farm and forest land to non-resource uses. Develop mitigating measures to provide adequate protection against potential conflicts.

Rationale: The close proximity of rural lands to resource lands is unavoidable. The presence of these resource activities such as forests and agricultural production adds to the character of these rural lands. However, many activities which take place on these resource lands are not compatible with other activities, especially residential uses. Since the conservation of these resource lands may be jeopardized by development which is not sensitive to the activities that characterize a resource based land use; it is important to implement mitigating measures that will provide an adequate transition area between potentially conflicting land uses.

Policy RE 2.4: Encourage the preservation and protection of unique, rare and fragile natural features, unstable bluffs, and culturally significant features.

Rationale: These features contribute to the character and attractiveness of the rural area. Their preservation enhances the openness and aesthetic quality of the area. The use of voluntary incentives including the Chelan County Public Benefit Rating System used in evaluating applications for current use taxation of property under the Open Space Program and clustering provisions will help to encourage the preservation and protection of these areas.

Policy RE 2.5: When open space areas are provided in a development, provisions should be made to identify: who owns the open space, what uses or activities will be permitted on it, how the area will be maintained, and whether public access will be provided. This information should be contained on the face of the plat or binding site plan.

Rationale: One of the drawbacks of providing open space is determining how it should be managed. It is important to establish this at the design phase, so everyone is clear on their responsibilities. When the information is noted on the face of the plat or binding site plan all subsequent property owners will be aware of the open space provisions.

Policy RE 2.6: To achieve a variety of rural densities and uses, allow for clustering, density transfer, design guidelines, conservation easements, and other innovative techniques to accommodate growth consistent with rural character.

Rationale: The amount of privately owned developable land in the County is limited. Innovative techniques can allow rural development while protecting the rural character of the County.

Policy RE 2.7: Protect local environmental and visual resources in hillside areas by encouraging development to locate on existing benches and terraces and by applying appropriate development standards and performance criteria.

Rationale: Hillside residential development offers a number of potential advantages, if properly established. If hillsides are to be both used and enjoyed by present and future residents of the area, development policies must include soundly based standards and performance criteria, yet have sufficient flexibility to fit varied environmental conditions.

Policy RE 2.8: Protect hillside areas from erosion by requiring development to adequately capture storm drainage and avoid duplication of road systems.

Rationale: Road cuts impact on the visual quality of hillsides and are a source of erosion and should be minimized.

LU 11.1: The Stemilt-Squilchuck area should actively preserve and promote agricultural and outdoor recreational land uses as key element of local identity, economy, and land use pattern through zoning protections, the use of TDRs and the Landscape Conservation and Local Infrastructure Program (LCLIP), incentives for agricultural viability, and limitations on non-agricultural encroachment.

Rationale: Agriculture is both a cultural heritage and an economic asset for the community. Retaining agricultural land ensures food security, environmental sustainability, and preserves the rural character that defines the area. Encouraging agricultural uses supports local producers and prevents sprawl. Additionally, designating and enforcing the zoning code will prevent non-agricultural encroachment.

GOAL RE 3: Develop at densities such that demands will not be created for urban levels of public services and facilities in rural areas.

Goal Rationale: Development in rural areas should not be at densities which require urban levels of service. Development at lower densities will also help protect the rural quality of life.

Policy RE 3.1: Provide government services in non-urban areas at a limited level appropriate to the rural setting, including police, fire, roads, and general utilities.

Rationale: Limited public facilities and services will be provided to persons living and working in rural areas. Urban levels of services should not extend beyond UGAs, except where provided for under the Growth Management Act.

Policy RE 3.2: Permit development of rural areas adjacent to UGAs at densities that will allow for orderly extension of urban utilities and services as UGAs expand in the future.

Rationale: Land that is immediately adjacent to an UGA is unique in that it has a greater potential to eventually develop at higher densities. Therefore, it is appropriate that these lands develop at an appropriate rural density so that when they do obtain the opportunity to develop in an UGA, they will permit the orderly extension of public utilities.

Policy RE 3.3: Promote orderly expansion of urban facilities and infrastructure by including rural areas adjacent to UGAs with capital facilities and transportation plans. These plans should try to anticipate, where appropriate, where future additional infrastructure and facilities will be sited.

Rationale: Anticipation of future siting needs for facilities and infrastructure will help ensure the orderly expansion of UGAs.

Policy RE 3.4: Promote use of innovative site designs that employ alternatives to conventional on-site wastewater disposal systems.

Rationale: Innovative site designs can take advantage of alternative wastewater systems such as community drain-fields within open space areas which may be effective in reducing potential failures and contamination of water sources.

Policy RE 3.5: Where consistent with State and local requirements, encourage innovative site designs that utilize community water systems.

Rationale: Innovative site designs can provide an affordable option for rural residential development since many of the site improvement costs and restrictions associated with individual wells can be distributed equally between all the home sites.

Policy RE 3.6: Develop fire protection standards for all commercial, industrial and residential development in rural areas, including, but not limited to, use of fire retardant building materials, access to on-site water bodies (lake, ponds, cisterns, pools, etc), and Firewise program consistent vegetation removal or fire breaks.

Rationale: Rural development depends upon adequate safety standards to reduce wildfire risk and protect life and property in rural areas.

Policy RE 3.7: Seek input from rural fire districts and the County Fire Marshal on design standards for adequate ingress and egress to new developments to address fire safety and evacuation issues.

Rationale: To provide adequate escape routes for residents and emergency vehicles.

Policy RE 3.8: Appropriate rural densities and designations should be applied which maintain the rural character, accommodate rural population projections and can be provided with rural services within the constraints of the County Budget and Capital Facility Plan.

Rationale: To plan for and fund the proper size and extent of supporting public facilities, utilities and services, the density and extent of future development areas must be specified.

Policy RE 3.9: Where feasible, allow the infill, development, and redevelopment of existing intensely developed rural areas where consistent with the goals and policies of the comprehensive plan, including recreational, mixed-use, shoreline developments, and residential developments for different income categories, including moderate, low, very low, and extremely low-income households .

Rationale: Rural recreational developments provide the opportunity for residential development, multiple uses of a recreational area, and innovative techniques to meet the needs and desires of the public to live and recreate in rural areas, with access or proximity to natural amenities.

Policy RE 3.10: Necessary public facilities and public services may be provided for the development, infill, and redevelopment of existing intensely developed residential, mixed use, shoreline, commercial and industrial areas outside of UGAs. Provision of such services should not be provided in a manner which permits low density sprawl outside of the boundary of the designation area.

Rationale: This policy recognizes the existence of intensely developed areas in rural lands and provides for the provision of necessary public facilities and services.

Policy RE 3.11: Encourage rural subdivision designs that cluster development in appropriate locations in order to protect critical areas, maintain open space, and preserve rural character.

Rationale: This approach reduces land fragmentation, protects critical areas, and maintains opportunities for agricultural and forestry activities, while offering more affordable options outside UGAs without compromising the goal of rural lands.

Policy RE 3.12: Urban governmental services that pass through rural areas when connecting urban areas should not constitute an extension of urban services into a rural area provided those public services are not provided in the rural area. Sanitary sewer service may be provided only if it:

a. Is necessary to protect basic public health and safety and the environment;
b. Is financially supportable at rural densities; and
c. Does not permit urban development.

Rationale: Providing sanitary services when feasible and following the criteria above improve public health and safety without compromising the goal of Rural Lands.

Policy RE 3.13: Establish and coordinate rural levels of service that reflect the diverse needs and service capacities of different rural areas, ensuring adequate public facilities while maintaining rural character. Levels of service may vary across the rural area, and the County should encourage coordination between private and public service providers to document and align appropriate service standards.

Rationale: Rural communities have diverse needs and varying service capacities, and a uniform level of service standard would not reflect local conditions or community expectations. Allowing varying levels of service recognizes these differences while maintaining consistency with GMA requirements for adequate public facilities. This approach addresses the needs of individual rural communities and supports fiscally responsible planning without compromising the rural character of Chelan County.

GOAL RE 4: Identify, protect and enhance rural communities and natural areas at potential risks from the effects of natural disasters, including wildfires and flooding.

Goal Rationale: Development in rural areas should not be planned in areas vulnerable to flooding and wildfire. The County should identify, protect, and enhance existing rural communities and natural areas located in risk areas.

Policy 4.1: Identify and prioritize rural areas vulnerable to flood hazards in alignment with the Multi-Hazard Mitigation Plan, Shoreline Master Program and Critical Areas Ordinance, and apply

appropriate land use tools, development standards, and public education to all populations to reduce hazard exposure and protect rural property, infrastructure, and public safety.

Rationale: The Rural Element aims to reduce and mitigate the risk to lives and property posed by floodings by using available tools and support local, state, and federal efforts to reduce exposure of rural communities and property to areas prone to flooding.

Policy RE 4.2: Reduce and mitigate the risk to all rural populations and property posed by wildfire in the wildland urban interface area by developing building, engineering, and maintenance standards consistent with the Firewise program, separating human development from wildfire prone landscape with open space, and protecting existing residential development through community wildfire preparedness and fire adaptation measures.

Rationale: The Rural Element aims to reduce and mitigate the risk to lives and property posed by wildfire by using land use planning tools and through wildfire preparedness and fire adaptation measures.

Policy RE 4.3: New subdivisions and individual structures in wildland and rural residential areas should be provided with fire apparatus access roads in accordance with the International Wildland Urban Interface Code (WAC 51-55).

Rationale: Compliance with updates to the International Wildland Urban Interface Code and amended WAC 51-55 ensures that development in wildfire-prone areas includes public safety and emergency response capacity. Adequate access supports timely firefighting, evacuation, and medical response, which reduces risks to human life, property, and natural resources.

Policy RE 4.4: Wildland-urban interface areas should be recorded on maps available for inspection by the public and be reevaluated and modified on a 3-year basis or more frequently as deemed necessary by the legislative body.

Rationale: Compliance with the International Wildland Urban Interface Code and amended WAC 51-55 ensures that emergency services, developers, and property owners understand the risks associated with wildfire-prone areas. By reevaluating wildlife-urban interface area boundaries at least every 3 years, the County can incorporate new conditions, including wildfire science, changes in vegetation or land use, and evolving weather patterns. An updated database helps reduce risks and strengthens the County's ability to protect life, property, and natural resources.

GOAL RE 5: Encourage rural economic development consistent with the goals and policies of the Chelan County Comprehensive Plan and the Growth Management Act.

Rationale: The comprehensive plan provides for a range of rural economic activities including: rural agriculture, forestry, and mineral resource industries as well as a range of rural development opportunities consistent with the Growth Management Act.

Policy RE 5.1: Permit rural development of small scale recreational, tourist, and resort uses that rely on a rural location and setting, including commercial facilities to serve such uses, provided they do not include new residential development and are otherwise consistent with other goals and policies of this plan.

Rationale: These uses are appropriate in rural areas when it can be demonstrated that they are compatible with the goals and policies of the comprehensive plan. Public services and public facilities should be limited to those necessary to serve the recreational or tourist use and should be provided in a manner that does not permit low density sprawl.

Policy RE 5.2: Additional commercial centers or activities may be considered in existing rural activity centers, villages, hamlets, or crossroad developments in the rural area during the yearly amendment process for the comprehensive plan when consistent with RCW 36.70A.070(5) and the goals and policies of the comprehensive plan.

Rationale: Limited commercial development may be appropriate in some rural areas to meet the needs of residents and visitors.

Policy RE 5.5: Encourage new visitor facilities and services, consistent with the national mandate for recreation and visitors in the Lake Chelan National Recreation Area and in coordination with the General Management Plan for the Lake Chelan National Recreation Area.

Rationale: Growth of the state and all associated areas indicates increased visitor use for Stehekin. Tastefully constructed and environmentally sensitive installations to support the increased number of visitors are required and desired.

Policy RE 5.6: MPRs may be considered within rural areas when consistent with the provisions of the comprehensive plan and RCW 36.70A.360.

Rationale RCW 36.70A.040 requires all land use regulations to be consistent with and implement the adopted comprehensive plan.

GOAL RE 6: Support RCW 17.10 purpose to limit economic loss and adverse effects to Washington's agriculture, natural, and human resources due to the presence and spread of noxious weeds on all terrestrial and aquatic areas in the State.

Policy RE 6.1: Encourage public awareness and removal of noxious weeds through the Chelan County Noxious Weed Control Board.

IV. Designations/Siting Criteria – Rural:

The following designations apply to the implementation of the Comprehensive Plan through the zoning map. The following purpose and locational guidelines provide a basic understanding of the zoning districts' intent and how they relate to the Comprehensive Plan designations, see the Land Use Element.

A. RR20, Rural Residential/Resource: 1 Dwelling Unit per 20 Acres

Purpose: To allow for low intensity rural development, agricultural and forestry uses which do not require the extension of services or infrastructure. These areas provide greater opportunities for protecting sensitive environmental areas and creating open space typical of a rural setting.

Uses appropriate for these areas include: open space; residential; agriculture; and forestry. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: natural resource support facilities and services; mineral resource activities; intensification of existing small scale recreational or tourist uses that rely on a rural location or setting, but that do not include a new residential component; intensification of development on lots containing existing isolated nonresidential uses; home occupations; bed and breakfasts; and community facilities.

Density: One (1) dwelling unit per twenty (20) acres.

Locational Guidelines:

1. Geographical and Geological Characteristics. These areas tend to be remote or have been historically rural in character. Soil characteristics, steep slopes or other physical constraints to development may be present. Large tracts of undeveloped, open space exist.

2. Natural Resources. The area may have agricultural or forest land practices of both small scale and/or commercial significance. The area may also be adjacent to designated resource lands.

3. Public Services. Uses do not require extension or provision of urban level services. In many locations, public roads or infrastructure are not available to serve the area and may not be available in the 20-year planning period.

4. Existing Land Uses. Dispersed single family residences, farms or forest management activities, and other low intensity rural development may be present. Predominant parcel sizes are 20 acres or greater.

B. RR10, Rural Residential/Resource: 1 Dwelling Unit per 10 Acres

Purpose: To allow for rural development, forestry and agricultural uses consistent with the rural character and rural development provisions outlined in the goals and policies of the comprehensive plan. These areas can function as areas of transition between resource lands and areas of more intense rural or urban development. These areas also provide opportunities for protecting sensitive environmental areas and creating open spaces typical of a rural setting.

Uses appropriate for these areas include: open space; residential; agriculture; and forestry. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: natural resource support facilities and services; mineral resource activities; intensification of existing development or new development of small scale recreational or tourist uses that rely on a rural location or setting but that do not include a new residential component; intensification of development on lots containing existing isolated nonresidential uses or new development of isolated cottage industries and isolated small-scale businesses that are not principally designed to serve the existing and projected rural population and nonresidential uses, but do provide for job opportunities for rural residents; home occupations; bed and breakfasts; and community facilities.

Density: One (1) dwelling unit per ten (10) acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. Geographical and Geological Characteristics. The area is predominantly rural in character. Soil characteristics, steep slopes or other physical constraints to development may be present. Significant areas of undeveloped open space may exist.

2. Natural Resources. The area may have agricultural or forest land practices of both small scale and/or commercial significance. The area may also be adjacent to designated resource lands.

3. Public Services. Uses do not require the extension or provision of urban level services. These areas are rural in character and may have access or limited access to rural governmental services and infrastructure. These areas may have the potential to be provided with rural governmental services within the 20-year planning period.

4. Existing Land Uses. Dispersed single family residences, farms or forest management activities and other rural development may be present. Predominant parcel sizes are 10 acres or larger.

C. RR5, Rural Residential/Resource: 1 Dwelling Unit per 5 Acres

Purpose: Provides opportunities for small scale agricultural activities, and rural development consistent with the rural character and rural development provisions outlined in goals and policies of the comprehensive plan. These areas may provide opportunities for protecting sensitive environmental areas and open spaces typical of a rural setting. RR5 designations adjacent to UGAs are intended to encourage the preservation of rural areas until such time as they serve as UGAs and urban services become available. RR5 designations can also act as buffers between designated resource lands and more intense rural or urban development.

Uses appropriate for these areas include: open space; residential; agriculture; and forestry. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: natural resource support facilities and services; mineral

resource activities; intensification of existing development or new development of small scale recreational or tourist uses that rely on a rural location or setting but that do not include a new residential component; intensification of development on lots containing existing isolated nonresidential uses or new development of isolated cottage industries and isolated small-scale businesses that are not principally designed to serve the existing and projected rural population and nonresidential uses, but do provide job opportunities for rural residents; home occupations; bed and breakfasts; and community facilities.

Density: One (1) dwelling unit per five (5) acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. Geographical and Geological Characteristics. The area is predominantly rural in character. Soil characteristics or other physical constraints to development may also be present. Some areas of undeveloped, open space may exist. The area may also be adjacent to designated UGAs.

2. Natural Resources. The area may have agricultural or forest land practices of both small scale and/or commercial significance. The area may also be adjacent to designated resource lands.

3. Public Services. Uses do not require extension or provision of urban level services. Rural governmental services are available or may be provided within the 20 -year planning period.

4. Existing Land Uses. Dispersed single family residences, farms or forestry uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are 5 acres or larger.

D. RR2.5, Rural Residential: 1 Dwelling Unit per 2.5 Acres

Purpose: To maintain the range of rural development opportunities consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan. These areas can provide buffering or transitions between existing rural developments and areas of higher or lower densities. This designation should not function as an urban reserve area, although these areas may someday be incorporated into UGAs.

Uses appropriate for these areas include: residential; agriculture; and forestry. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: intensification of existing development or new development of small scale recreational or tourist uses that rely on a rural location or setting but that do not include a new residential component; intensification of development on lots containing existing isolated nonresidential uses or new development of isolated cottage industries and isolated small-scale businesses that are not principally designed to serve the existing and projected rural population and nonresidential uses, but do provide job opportunities for rural residents; home occupations; bed and breakfasts; and community facilities.

Density: One (1) dwelling unit per 2.5 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. Geographical and Geological Characteristics The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be immediately adjacent to existing residential or rural developments. The area may be adjacent to UGAs.

2. Natural Resources. The area has limited resource management potential. The area may be adjacent to resource lands.

3. Public Services. Uses do not require extension or provision of urban levels of services. Rural governmental services and infrastructure are typically available, planned and/or funded for.

4. Existing Land Uses. Single family residences, agricultural uses, cottage industries and small businesses, and other rural development may be present. Predominant parcel sizes are currently 2.5 acres or greater in size but typically less than 5 acres.

E. Rural Public Lands And Facilities (RP):

Purpose: To provide open space, recreational opportunities, sites for necessary public facilities, utilities and services, and protection of critical areas. Encourage joint public/private ventures,

consistent with the rural development and rural character provisions, and goals and policies of this comprehensive plan.

Uses appropriate for these areas include: public facilities and services, open space and developed open space; agriculture; and forestry. Additional uses may be considered with supplemental provisions.

These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: natural resource support facilities and services; mineral resource activities; intensification of existing or new development of small scale recreational or tourist uses that rely on a rural location or setting but that do not include new residential development; and intensification of development on lots containing isolated nonresidential uses or new development of isolated cottage industries and isolated small-scale businesses that are not principally designed to serve the existing and projected rural population and nonresidential uses.

Locational Guidelines:

1. Geographical and Geological Characteristics: These lands are in public ownership and may contain critical areas. The County has no jurisdiction over federal lands.

2. Natural Resources: Public lands may contain resource lands.

Public Services: Services should be limited to the needs of the public agencies. Extension of public services can be considered for joint public/private ventures if consistent with the provisions of the comprehensive plan. Development in these areas shall not create a need for urban governmental services.

V. Limited Areas of More Intensive Rural Development (LAMIRD)

Introduction

Generally, the rural element is to provide for a variety of rural densities, uses and facilities and services. It is recognized that a variety of developments already exist in rural areas. This includes some development that is more compact than the surrounding rural lands, which are identified as Limited Areas of More Intensive Rural Developments (LAMIRD). There are three distinct types of

LAMIRDs that may be designated pursuant to RCW 36.70A.070(5)(d) and WAC 365-196-425. Type 1 can either be commercial, industrial, residential, or mixed-use. Type 2 delineates existing commercial tourist or recreational commercial uses as well as allowing some new commercial tourist uses that rely on a rural location. The Type 3 LAMIRD identifies isolated small-scale businesses. Generally, limited areas of more intensive rural development include necessary public facilities and public services to serve that area.

Intent

LAMIRDs are designated to identify more intense areas of existing development, and to minimize and contain those existing developed areas within the rural lands. LAMIRDs are not intended by the Legislature to be mini-UGAs, suburbs or areas for significant future development. LAMIRDs are rural; they are contained and compact, and, with minor exceptions, were built before July 1, 1990. Though the LAMIRD will recognize existing development, it cannot promote sprawl or low-density growth in the rural area. In designating LAMIRDs, the County has established clear criteria to address each type of LAMIRD. Those criteria generally address the need to contain and control existing development, and the need to preserve the character of the community, its physical boundaries, and prevent abnormally irregular boundaries. The criteria will also determine how public facilities and services will be provided in a manner that does not permit low density sprawl.

General LAMIRD Criteria

LAMIRDs serve the following purposes:

a. To recognize existing areas of more intense rural development and to minimize and contain these areas to prevent low density sprawl;
b. To allow for small-scale commercial uses that rely on a rural location;
c. To allow for small-scale economic development and employment consistent with rural character; and
d. To allow for redevelopment of existing industrial areas within rural areas.

Lands designated as LAMIRDs will not extend beyond the logical outer boundary of the existing area or use. Existing areas are those that are clearly identifiable and contained and where there is a logical boundary delineated predominately by the built environment, but may also include limited undeveloped lands within the LAMIRD. Generally, future development may occur as infill or redevelopment, although new development can occur in some LAMIRD types.

In establishing the logical outer boundary the County will address (A) the need to preserve the character of existing natural neighborhoods and communities, (B) physical boundaries such as bodies of water, streets and highways, and land forms and contours, (C) the prevention of abnormally irregular boundaries, and (D) the ability to provide public facilities and public services in a manner that does not permit low-density sprawl. The logical outer boundary must be delineated primarily by the built environment as it existed on the date the County became subject to the planning requirements of WAC 365-196-425. Vacant land may be included within the logical outer boundary provided it is limited and does not create a significant amount of new development within the LAMIRD. The County should favor the configuration that best minimizes and contains the LAMIRD to the area of existing development as of the date the County became subject to the planning requirements of WAC 365-196-425. The County should determine how much new growth will occur at build out and determine if this level of new growth is consistent with rural character and can be accommodated with the appropriate level of public facilities and public services.

Upon the initiation or update of a community and/or sub-area plan in the rural areas of the County, future LAMIRDs will be evaluated and existing LAMIRD designations will be updated as necessary to be consistent with the Growth Management Act provisions in RCW 36.70A.070(5) for Limited Areas of More Intensive Rural Development (LAMIRDs).

Type 1 LAMIRD – commercial, industrial, residential, or mixed-use.

Type 1 LAMIRDs are described as rural development consisting of existing and potential infill of commercial, industrial, residential, or mixed use, whether characterized as shoreline developments, villages, hamlets, rural activity centers, or crossroads developments. These LAMIRDs must meet the general criteria listed above, and must be principally designed to serve the existing and projected rural population (with the exception of industrial LAMIRDs and/or industrial uses within a mixed use LAMIRD, which are not required to meet this standard). It is also important that these designations are consistent with the character of the existing uses, particularly in terms of building size, scale, use or intensity. Changes in use from vacant land or some previous use may be allowed, provided the new use complies with these above requirements.

Type 2 LAMIRD – existing commercial tourist or recreational commercial uses as well as some new commercial tourist uses in a rural location.

Type 2 LAMIRDs are an intensification of development on lots containing, or new development of, small-scale recreational or tourist uses, including commercial facilities to serve those recreational or tourist uses that rely on a rural location and setting. This type of LAMIRD designation is not required to only serve the existing and projected rural population, but it also may not include new residential development. Public services and public facilities are limited to those necessary to serve the recreation or tourist use and will be provided in a manner that does not permit low-density sprawl.

Type 3 LAMIRD – isolated non-residential, cottage industries and small-scale businesses.

Type 3 LAMIRDs are the intensification of development on lots containing isolated nonresidential uses or new development of isolated cottage industries and isolated small-scale businesses. This type of LAMIRD is not principally designed to serve the existing and projected rural population and nonresidential uses, but does provide job opportunities for rural residents. The County may allow the expansion of small-scale businesses if those small-scale businesses conform with the rural character of the area as defined by the County through a process consistent with RCW 36.70A.030(14). The County may also allow new small-scale businesses to utilize a site previously occupied by an existing business if the new small-scale business conforms to the rural character of the area as defined by the County. Public services and public facilities are limited to those necessary to serve the isolated nonresidential use and will be provided in a manner that does not permit low-density sprawl.

VI. Goals and Policies – LAMIRDs

Where applicable, existing policies identified within the Comprehensive Plan which are consistent with LAMIRD designations should be considered when addressing LAMIRD development.

GOAL RE 7: Designate limited areas of more intensive rural development (LAMIRDs) for infill, development or redevelopment of existing commercial, industrial, residential or mixed use areas.

Policy RE 7.1: Development in LAMIRDs, except for industrial areas or industrial sites within mixed use areas, should be principally designed to serve the existing and projected rural population.

Rationale: Requirements of the Growth Management Act allowing more intense development in rural areas include a provision that these areas serve primarily the existing and projected rural population, generally to ensure rural sprawl does not occur where inappropriate.

Policy RE 7.2: Apply development standards in LAMIRDs (e.g., allowance of infill and development within LAMIRD boundaries) to ensure the design of development or redevelopment is consistent with the character of the existing areas and the proposed use conforms to the intent of this Comprehensive Plan. Building size, scale, use, and intensity should not increase the need for public facilities and utilities to urban levels.

Rationale: Requiring new and/or redevelopment within LAMIRD designations to be consistent with the provisions of this element ensure that the County remains consistent with the requirements of the Growth Management Act with respect to LAMIRD designations. The Rural Element must be consistent with RCW 36.70A.070(5), as amended.

Policy RE 7.3: Encourage business growth in existing LAMIRDs while limiting business growth outside of LAMIRDs.

Rationale: The Rural Element must be consistent with RCW 36.70A.070(5), as amended.

VII. Designations/Siting Criteria – LAMIRDs:

The following designations apply to the implementation of the Comprehensive Plan through the zoning map. Comprehensive Plan Land Use Designation for the Rural areas are identified and discussed in the Land Use Element. The following purpose and locational guidelines provide a basic understanding of the zoning districts' intent and how they relate to the Comprehensive Plan designations, see the Land Use Element.

A. Rural Waterfront (RW):

This designation is considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act.

Purpose: This designation will provide the opportunity for the development, redevelopment and infill of existing intensely developed shoreline areas for residential, and water related/water dependent recreational and tourist development consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan. These areas provide a distinct water related lifestyle. Potential impacts on the surrounding area, critical areas, and water quality shall be addressed. These areas must be clearly identifiable as existing intensely developed rural shorelines; where a logical boundary can be delineated and set by the built environment. Such a boundary shall not permit or encourage a new pattern of sprawling low density or urban type development.

Uses appropriate for these areas include: open space and developed open space; residential; agriculture; and forestry. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: intensification of existing development or new development of small scale water related/water dependent recreational or tourist uses, including commercial facilities to serve those recreational or tourist uses, that rely on a rural location or setting but that do not include a new residential component; intensification of development on lots containing existing isolated nonresidential uses; home occupations; bed and breakfasts; and community facilities.

Density: May allow for less than 1 acre per dwelling unit, when consistent with the Health District standards. The provision of necessary public facilities and services shall not permit or encourage low density sprawl or urban type development outside of the designation boundary. Existing urban governmental services in some areas, may allow for higher densities than those with rural governmental services.

Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. Geographical and Geological Characteristics: Parcels are located on or near shorelines identified by the Chelan County Shoreline Master Program. The area may have moderate soil limitations and may have other limited physical constraints to development.
2. Natural Resources: This designation shall not be applied on resource lands of long term commercial significance.

3. Public Services: Necessary public facilities and public services to serve the development, redevelopment or infill of these areas may be provided. There may be some existing urban governmental services. Rural governmental services are typically available, planned and/or funded for.
4. Existing land uses: Seasonal and year-round residences, tourist and recreational activities and other rural development may be present. Predominant parcel sizes are 1 acre or smaller.

B. Rural Recreational/Residential (RRR)

This designation is considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act.

Purpose: This designation will provide the opportunity for the development, redevelopment and infill of existing intensely developed rural recreational/residential areas for residential, recreational and tourist development consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan. These areas provide a distinct rural lifestyle closely associated with the many natural amenities found within Chelan County. Potential impacts on the surrounding area, critical areas, and water quality shall be addressed. These areas must be clearly identifiable as existing intensely developed rural recreational development; where a logical boundary can be delineated and set by the built environment. Such a boundary shall not permit or encourage a new pattern of sprawling low density or urban type development.

Uses appropriate for these areas include: open space and developed open space; residential; agriculture; and forestry. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: intensification of existing development or new development of small scale recreational or tourist uses, including commercial facilities to serve those recreational or tourist uses, that rely on a rural location or setting but that do not include a new residential component; intensification of development on lots containing existing isolated nonresidential uses; home occupations; bed and breakfasts; and community facilities.

Density: May allow for less than 1 acre per dwelling unit, when consistent with Health District standards. The provision of necessary public facilities and services shall not permit or encourage low-density sprawl or urban type development outside of the designation boundary.

Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography,

critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. Geographical and Geological Characteristics: Developments are closely associated with natural amenities found within Chelan County. The area may have moderate soil limitations and may have other limited physical constraints to development.
2. Natural Resources: This designation shall not be applied on resource lands of long term commercial significance.
3. Public Services: Necessary public facilities and public services to serve the development, redevelopment or infill of these areas may be provided. Rural governmental services are typically available, planned and/or funded for.
4. Existing land uses: Seasonal and year-round residences, tourist and recreational activities and other rural development may be present. Predominant parcel sizes are 1 acre or smaller.

C. Rural Village (RV):

This designation is considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act.

Purpose: This designation recognizes the existence of intensely developed rural residential developments and communities, with densities less than 2.5 acres per dwelling unit, which typically will not have sewer service. This designation will provide the opportunity for the development, redevelopment and infill of existing intensely developed rural residential areas for residential and other rural development consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan. Potential impacts to the surrounding area, critical areas, and water quality shall be addressed. These areas must be clearly identifiable as existing intensely developed rural residential development; where a logical boundary can be delineated and set by the built environment. Such a boundary shall not permit or encourage a new pattern of sprawling low density or urban type development.

Uses appropriate for these areas include: developed open space; residential; agriculture; and forestry. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: intensification of existing small scale recreational or tourist uses that rely on a rural location or setting but that do not include a new

residential component; intensification of development on lots containing existing isolated nonresidential uses; home occupations; bed and breakfasts; and community facilities.

Density: May allow for less than 2.5 acres per dwelling unit. The establishment of densities shall consider pre-existing development patterns, Health District standards, proximity to resource lands, existence of critical areas and the availability of necessary public facilities and services. The provision of necessary public facilities and services shall not permit or encourage low density sprawl or urban type development outside of the designation boundary.

Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. Geographical and Geological Characteristics: The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be adjacent to a variety of rural development, and areas with varying residential densities. The area may be adjacent to UGAs.
2. Natural Resources. The area has low resource management potential. The area may be adjacent to resource lands.
3. Public Services: Sewer service is typically not available. Rural governmental services and infrastructure are typically available, planned and/or funded for. Necessary public facilities and public services to serve the development, redevelopment, or infill of these areas may be provided.
4. Existing Land Uses. Single family residences and other rural development may be present. Predominant parcel sizes are less than 2.5 acres.

D. Rural Commercial (RC):

This designation is appropriate in any of the LAMIRD designations (Type 1, 2, or 3). To be considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act, this designation would be applied to existing mixed-use areas. It should be noted that per the RCW Type 1 LAMIRDs are limited to existing designated areas.

This designation may also be applied within a Type 2 LAMIRD as discussed above, where the uses and activities are aligned with the district use chart. This would include limited commercial uses to support recreational activities.

Finally, this designation may also be applied to implement a Type 3 LAMIRD. This would be appropriate in an isolated area where the existing uses consist of only commercial or light industrial activities.

Because this designation may be applied in all different LAMIRDs, the purpose and intent statement for the designation is broad. Any application of the RC designation would take into account the associated LAMIRD and the goals and policies related to the area.

Purpose: To provide for a range of commercial uses to meet the needs of local residents, and small scale tourist or recreational uses including commercial facilities to serve those recreational or tourist uses within the rural areas to meet the needs of local residents and visitors. This designation will provide the opportunity for the development, redevelopment and infill of commercial uses in existing rural commercial developments, mixed use areas, or intensely developed residential areas consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan. Potential impacts to the surrounding area, critical areas, and water quality shall be addressed. These areas must be clearly identifiable as existing rural commercial developments, mixed use areas, or intensely developed residential developments; where a logical boundary can be delineated and set by the built environment. Such a boundary shall not permit or encourage new rural commercial development outside of these boundaries.

Uses appropriate for these areas include: commercial facilities and services; developed open space; above ground floor residential housing; agriculture; forestry; natural resource support facilities and services, tourist or recreational uses; home occupations; bed and breakfasts; and community facilities.

Locational Guidelines:

1. Geographical and Geological Characteristics: The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be adjacent to a variety of rural development.
2. Natural Resources. These areas have low resource management potential. The area may be adjacent to resource lands.

3. Public Services: Rural governmental services and infrastructure are typically available, planned and/or funded for. Necessary public facilities and public services to serve the development, redevelopment or infill of these areas may be provided.
4. Existing Land Uses. Commercial, or higher intensity residential uses may be present, in addition to other rural development.

E. Rural Industrial (RI):

This designation is considered an implementation of a Type 1 LAMIRD as described above, consistent with the Growth Management Act.

Purpose: To recognize the need for rural industrial and resource based industrial activities within the rural areas. This designation will provide the opportunity for the development, redevelopment and infill of existing rural industrial developments or former industrial sites consistent with the rural character and rural development provisions outlined in the goals and policies of this comprehensive plan. Potential impacts on the surrounding area, critical areas, and water quality shall be addressed. These areas must be clearly identifiable as existing rural industrial developments or former industrial sites; where a logical boundary can be delineated and set by the built environment. Such a boundary shall not permit or encourage new industrial development outside of these boundaries.

Uses appropriate for these areas include: industrial facilities and services; intensification of development on lots containing isolated nonresidential uses; agriculture; forestry; caretaker residence for industrial facilities; and natural resource support facilities and services. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: mineral resource activities.

New industrial sites may be designated during yearly comprehensive plan amendments if consistent with criteria and requirements outlined in RCW 36.70A.365 and the goals and policies of this comprehensive plan. Such a new industrial area would be designated as an UGA and have the potential to receive urban services.

Locational Guidelines:

1. Geographical and Geological Characteristics: The area may have moderate soil limitations and may have other limited physical constraints to development. The area may be adjacent to a variety of rural development.

2. Natural Resources. Existing rural industrial sites have low resource management potential. The area may be adjacent to resource lands. Future industrial sites may be located in areas with agricultural or forestry uses if consistent with the criteria outlined in RCW36.70A.365.
3. Public Services: Rural governmental services and infrastructure are typically available, planned and/or funded for. Necessary public facilities and public services to serve the development, redevelopment, or infill of these areas may be provided. Some industrial sites may currently have sewer service. Industrial sites designated pursuant to RCW 36.70A.365, as UGAs, would have access to urban services.
4. Existing Land Uses. Industrial developments currently exist or the area may have been utilized in the past for an industrial use. Areas identified as having potential for infill for industrial uses may be currently utilized for a variety of rural development and resource activities. Future industrial sites designated pursuant to RCW 36.70A.365, may presently have a variety of rural development and resource activities.

CHAPTER 4
RESOURCE ELEMENT

I. Introduction

This Resource Element provides a concise overview of the Agricultural, Forest and Mineral Resources and critical areas within Chelan County consistent with the Goals of the Growth Management Act, in accordance RCW 36.70A, WAC 365 and with the County-Wide Planning Policies. Furthermore, it has been integrated with all other planning elements to ensure consistency throughout the comprehensive plan.

The goals and policies contained in the Resource Element form the basis of the land use strategy to support long-term resources:

- Providing for a supply and distribution of land use types to accommodate the population and employment growth projected for the planning area;
- Reducing development pressures and patterns of sprawl within rural areas;

- Conserving agricultural, forest and mineral resource lands of long-term commercial significance; and
- Preserving and protecting critical areas and areas of rural character.

The State legislature found that it is in the public interest to identify and provide long-term conservation of those productive natural resource lands that are critical to and can be managed economically and practically for longterm commercial production of food, fiber, and minerals. Successful achievement of the natural resource industries' goal set forth in RCW 36.70A.020 requires the conservation of a land base sufficient in size and quality to maintain and enhance those industries and the development and use of land use techniques that discourage uses incompatible to the management of designated lands.

II. Overview of Chelan County

Chelan County is divided by mountains and rolling hills which form several valley and basin areas where agricultural and mineral resources compete with growing rural and urban land uses. It is not uncommon for development and resource lands to be intermixed or in close proximity to each other.

This Element summarizes the current resource lands, provides guidance for locating and protecting resources, and identifies specific goals and policies for managing these resources to "assure that the use of lands adjacent to agricultural, forest, or mineral resource lands shall not interfere with the continued use of these designated lands for the production of food, agricultural products, or timber, or for the extraction of minerals."[3]

Overall, two key issues, land ownership and access, currently restrict the County for accessing the vast potential for resources. First, as discussed in the Land Use Element, most of Chelan County is in federal or state ownership. Ownership has less of an impact on Forest/Timber resource management than on Agriculture and Mineral Resources.

Secondly, as discussed in the Transportation Element, the road network provides major trucking routes which support related resources industries. Hauling routes are limited, in part, due to topography. For the three types of resources reviewed in this Element, mineral, agriculture and forestry, the current primary resource exports are agriculture and forestry products.

[3] RCW 36.70A.060

III. Chelan County Agricultural Lands

Chelan County contains agricultural lands that are important to the local economy. It must be recognized that in order to continue to exist, orchards must remain profitable. In an attempt to encourage existing and future agricultural development as a viable land use and a significant economic activity within the County, agricultural lands of long term commercial significance have been designated according to the U.S. Soil Conservation Service's classification for prime and unique farmland soils, and criteria outlined in WAC 365-190-050. These areas have been identified on the land use map designated as Commercial Agricultural Lands (AC) and are shown in Appendix H in specific area maps. The Growth Management Act defines "long term commercial significance" to include the growing capacity, productivity, and soil composition of the land for long-term commercial production, in consideration with the land's proximity to population areas, and the possibility of more intense uses of the land.

Typically, the most successful agricultural land conservation programs in the United States have been ones that combine incentive and regulatory techniques chosen according to the needs and conditions of a community. The opportunity for differential tax assessment for orchardists in Chelan County, helps to provide landowners an incentive to remain in agricultural use. Buffers, parcel size, and clustering development provide regulatory techniques to retain agricultural land. This combination of conservation techniques provides property owners the flexibility for some non-farm development, helps reduce conflict between non-farm development and agricultural operations, and preserves farmable orchard parcels in support of retaining a viable orchard industry.

Chelan County participates in the Voluntary Stewardship Program (VSP) program. The VSP is an optional, incentive-based approach to protecting critical areas while promoting agriculture. The VSP is allowed under the Growth Management Act (RCW 36.70A.700-760) as an alternative to traditional approaches to critical area protection, such as “no touch” buffers. Chelan County is one of 28 counties that has “opted in” to participate in VSP. A VSP Work Plan was published in 2017 outlining the County’s approach to implementing VSP, including monitoring, reporting, and adaptive management.

Land Use Designation/Siting Criteria: Commercial Agricultural Lands

Land use designations and siting criteria for agricultural property are applied in the County to assure the long-term conservation of commercial agricultural lands; to protect and preserve the farmers

ability to farm; encourage existing and future agricultural land uses as a viable land use and a significant economic activity within the community; and, to protect agricultural land of long-term commercial significance not already characterized by urban development from encroachment and incompatible uses. Lands designated for agricultural use are shown in detail in the map set in Appendix H.

Uses appropriate for these areas include: agriculture; open space; residential; and forestry. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include natural resource support facilities and services; mineral resource activities; intensification of existing small scale recreational or tourist uses that rely upon a rural setting but that do not include a new residential component; intensification of development on lots containing existing isolated nonresidential uses; home occupations; bed and breakfasts; and community facilities.

Density: One (1) dwelling unit per 10 acres. Clustering consistent with the underlying densities and the rural character and rural development provisions of the goals and policies of the comprehensive plan may be permitted. Topography, critical areas, other environmental constraints, and compliance with all other applicable development standards shall be considered in the provisions to allow for clustering.

Locational Guidelines:

1. Geographic and Geological Characteristics: The area contains farmland soils classified as prime or unique by the Natural Resource Conservation Service. Soil characteristics. Moderate slopes or other physical constraints to development may be present. The area should not be adjacent to intensive urban or incompatible rural development. The predominant land use in the area is agriculture.
2. Natural Resources: The area should contain or have the potential to contain agricultural or agriculture support activities. The area should meet the criteria under WAC 365-190-050, as agricultural lands of long-term commercial significance.
3. Public Services: Uses should not require extension or provision of urban level services. These areas may have access to rural governmental services and infrastructure or have the potential to be provided with rural governmental services within the 20-year planning period. Urban services should not be present.
4. Existing Land Uses: The prevailing land use pattern consists of agricultural operations and agricultural support facilities and services. Dispersed single family residences and low intensity rural uses may be present. The predominant parcel size is typically 5 acres or larger.

Agricultural Resource Lands: Goals & Policies

While developing goals and policies and designating agricultural resource lands, many issues and concerns were identified during the public participation process and addressed during the development of the goals and policies for the agricultural section of the Land Use Element including agricultural vs. residential development. These concerns included the following:

- Responsibility for mitigation measures (developer of incompatible use)
- Location of future development
- Recognize agriculture as a significant economic activity
- Agricultural uses vs. compatible and incompatible uses
- Availability of irrigation water
- Protecting farmers options
- Periodic evaluation of Commercial Agriculture designations

Areas not designated as agricultural resource lands of long-term commercial significance that do not meet the designation criteria can still play an important part in the local agricultural industry. Rural designations and buffers between orchards and non-farm development may be beneficial in retaining much of the rural area's current orchards. Future expansion of long-term agriculture into rural undeveloped areas is a possibility, but will heavily depend upon the availability of water, water rights, and market conditions.

GOAL AL 1: Support the viability of agriculture and encourage the continued use of rural and resource lands for agriculturally related land uses.

Goal Rationale: The County benefits from a commercially significant and viable agricultural industry.

Policy AL 1.1: Encourage air quality standards and policies that accommodate necessary agricultural practices.

Rationale: Agricultural practices vary depending on local and specific conditions. In contexts where burning is necessary, such activities should implement best practices and follow local standards.

Policy AL 1.2: The farmer shall have the right to farm, consistent with appropriate local, state and federal requirements.

Rationale: Agriculture plays a significant role in the welfare of the County and its residents and should be supported.

Policy AL 1.3: Encourage the maintenance of agricultural lands in current use property tax classification consistent with RCW 84.34, the Open Space Taxation Act.

Rationale: Open space taxation allows property owners to be assessed at current use rather than highest and best use. This provides an incentive for the property owner to continue to use land for resource production.

Policy AL 1.4: Conserve agricultural lands for productive economic use by identifying and designating agricultural resource lands whose principal and preferred land use is commercial agricultural resource management.

Rationale: Activities in designated agricultural resource lands should be discouraged that would limit or eliminate the ability to continue agricultural operations.

Policy AL 1.5: Agricultural resource lands should be classified and designated based on the criteria and procedures established in WAC 365-190-040, and 050, with special consideration given to long-term viability of commercially significant agricultural land.

Rationale: Agricultural Resource lands should be identified based on the best available information at the time of the designation.

Policy AL 1.6: Support public and private programs and efforts to ensure the viability and sustainability of the agricultural industry.

Rationale: Strong agricultural markets and a supportive regulatory environment are two of the necessary components of a healthy agricultural industry. Attempts to secure these will be beneficial to the general welfare of the County.

Policy AL 1.7: In rural and resource lands, permit facilities and services that support Chelan County's natural resource industries, provided such facilities are compatible with surrounding uses and potential impacts can be mitigated.

Rationale: The agricultural industry in Chelan County is a significant economic activity. Necessary support services and facilities should be accommodated.

Policy AL 1.8: Protect the economic viability of the agricultural industry by supporting the construction of agricultural worker housing near orchard areas. Where permitted by state agencies, consider the reduction of site development and fire protection standards for temporary housing units for migrant workers.

Rationale: This will assist the agricultural industry to remain economically viable, reduce transportation needs, and provide adequate housing for agricultural workers.

Policy AL 1.9: Develop regulations promoting agriculture-related accessory uses on existing farms to supplement farm income, improve farming efficiency, and provide employment for farm family members.

Rationale: Regulatory opportunities for limited enterprises such as direct marketing of unprocessed and value-added agricultural products and agriculturally related small scale tourist operations can help supplement the agricultural industry and maintain the primary use of agriculture.

Policy AL 1.10: Through the Voluntary Stewardship Program and other programs, encourage agricultural producers to implement sustainable farming practices that anticipate future conditions and ensure adequate water supply and conservation, voluntary implementation of ecological enhancements in vulnerable areas, and other strategies to increase resilience.

Rationale: Soil health strategies, water conservation, cover crops and no till farming, and other conservation practices can increase resilience to changing conditions.

GOAL AL 2: Conserve agricultural lands of long-term significance by controlling encroachment of incompatible uses.

Goal Rationale: Limiting the encroachment of incompatible uses will help to ensure that agricultural lands remain viable.

Policy AL 2.1: All plats, short plats, binding site plans, development permits and building permits issued for development activities on or within five hundred feet of lands designated as agricultural resource lands, should contain a notice that the subject property is within or near designated agricultural resource lands. The notice should further state that a variety of commercial activities may occur on these designated lands that are not compatible with the development.

Rationale: Such notification will help property owners and purchasers to make educated decisions.

Policy AL 2.2: Encourage clustering of residential development on lands adjacent to agricultural resource lands, provide open space buffers between uses and address incompatibility issues.

Rationale: Clustering can provide for open space adjacent to the resource use and may help to minimize conflicts.

Policy AL 2.3: Require new non-farm development in rural areas, adjacent to an existing orchard operation, to provide appropriate buffers and/or mitigation measures to minimize potential conflicts.

Rationale: Orchard operations in rural lands account for a significant amount of the agriculture within Chelan County. It is important to protect the farmer's ability to continue to farm by minimizing potential conflicts.

Policy AL 2.4: Development on or adjacent to designated agricultural resource lands, including plats, short plats, and binding site plans, should avoid and minimize potential conflicts with agricultural operations through appropriate siting and mitigation measures, such as buffers, screening, dust control, and pest control.

Rationale: Buffers can reduce the potential for conflicts between agricultural operations and other land uses.

Policy AL 2.5: Designated agricultural resource lands should be protected from inappropriate infrastructure improvement assessments. Deferral programs or other measures should be considered that would protect the farmer's ability to continue farming.

Rationale: Additional taxes would impact the viability of agricultural operations. Infrastructure improvements or assessments inconsistent with the comprehensive plan should not be supported.

Policy AL 2.6: The retention of small forest operations, crop and specialty farming, livestock-based farm operations, and hobby farms should be encouraged in rural areas.

Rationale: Maintaining and enhancing small forest operations, crop and specialty farming, livestock-based farm operations, and hobby farms is consistent with RCW 36.70A020(8) and encourages the conservation of productive forestlands and productive agricultural lands and discourages incompatible uses.

Policy AL 2.7: Resource-dependent tourism and recreation-oriented uses such as commercial horse stables, guide services, golf courses, and group camps should be allowed on a conditional use basis in rural areas provided they do not adversely impact adjoining rural uses.

Rationale: This type of tourism offers support to local economies while encouraging the conservation of productive agricultural lands while discouraging incompatible uses.

Policy AL 2.8: Resource-based industries that help sustain rural communities, require only rural levels of service, support the conservation of natural resource lands, and complement rural character should be promoted in rural areas.

Rationale: Encouraging resource-based industries that conserve natural resources, maintain existing levels of service, and complement rural areas discourage incompatible uses.

Policy AL 2.9: Non-resource dependent tourism-related uses such as motels and restaurants serving rural and resource areas should be located within commercial zones.

Rationale: Allocating these uses to designated zones discourages incompatible uses.

IV. Chelan County Mineral Lands[4]

Chelan County has a Mineral Resource Lands Overlay (MRLO) which identifies and protects lands that have the potential to contain mineral resource deposits of long-term commercial significance, to recognize the importance of preserving mineral lands to ensure the future supply and to ensure compatibility between mineral resource lands and surrounding land uses.

Mineral resources in Chelan County are classified into two tiers of commercial importance. This MRLO focuses on Primary resources:

Primary: Sand, gravel, and rock/stone (either solid or crushed for use in aggregate). The Mineral Resource Lands Overlay (MRLO) is generally applied to areas of existing production and those rural lands with high potential for production. It should be noted that large areas of potential mineral production are under federal ownership and therefore not considered available or mapped but may be designated if the site meets the MRLO criteria.

[4] Mineral Resource data contained within this Element reflects work completed by BERK Consulting, Inc with grant funds from the Department of Commerce, July 26, 2017.

Secondary: All other metallic, non-metallic, and petroleum mineral resources occurring in Chelan County. Historically, mining was a major component of the regional economy, including extraction of copper, zinc, silver and gold. The MRLO is not generally applied to areas where these resources occur, but property owners may apply for designation if the site meets the MRLO criteria.

Surface Mineral Extraction Sites

In 2026, the Washington State Department of Natural Resources (DNR) records documented eight active surface mining sites in Chelan County.

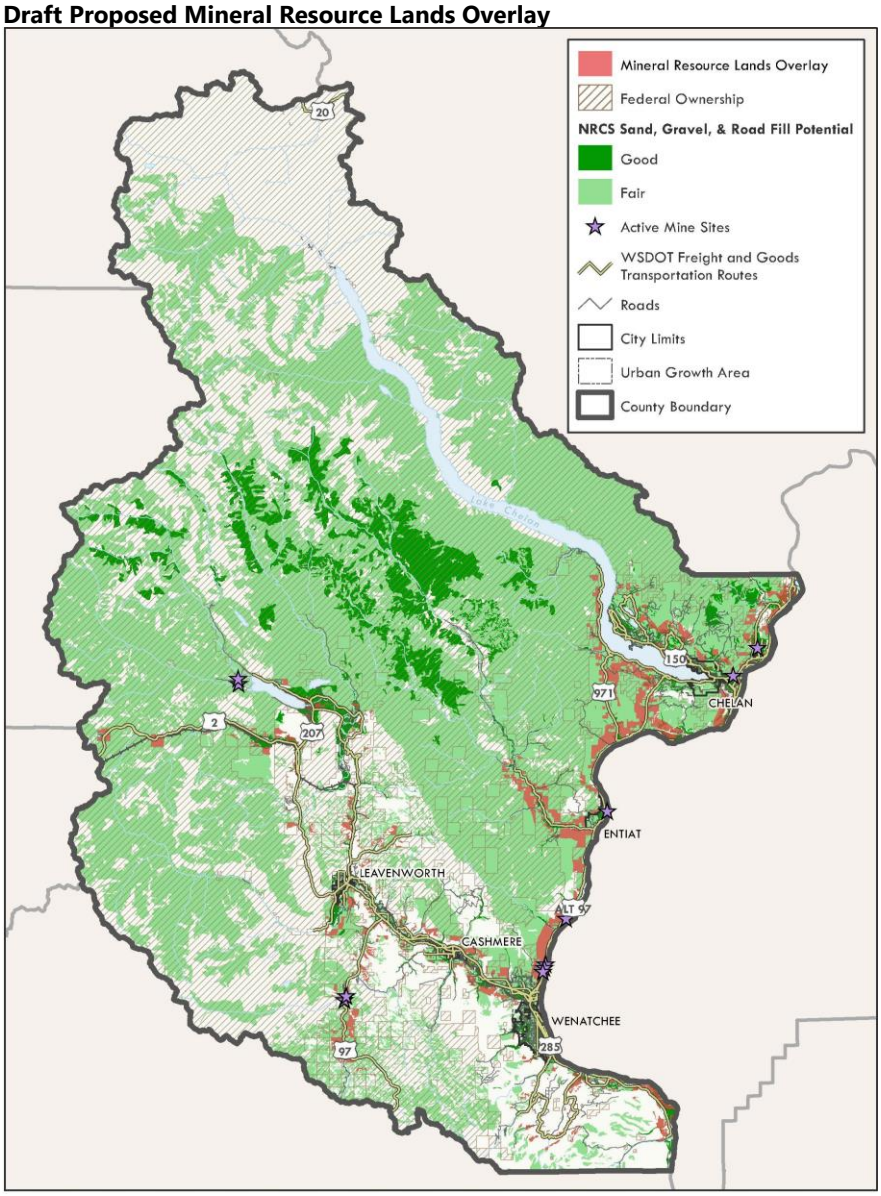
In addition to DNR-permitted surface mines, mineral extraction also occurs in Chelan County at smaller scales. Mines with surface disturbance of less than three acres or a depth of less than 30 feet may operate without a DNR surface mining permit, and DNR does not track these operations. The Chelan County Assessor documents an additional 19 locations with a current land use classification of "Mining Activities." Of these, six are owned by a land conservation organization and seven are owned by the federal government.

Mining operations occur near agriculture, forestry, manufacturing/industrial, single-family residential, government service, and undeveloped land, according to the County Assessor records. Of the eight active mines in the County, some are adjacent to or located on land classified as single-family residential. This is consistent with Exhibit 1, which identifies high-potential mineral sources lands within the Rural Residential/Resource zoning district, covering nearly 57,000 acres. Current and potential impacts on residential development may occur should mining be proposed and should be reflected in mitigation measures applied through either environmental review or special use permitting.

The most recent comprehensive study of mineral resource lands was completed with the 2017 Comprehensive Plan update. That study showed that most of the mines have capacity to continue extraction for a number of years; estimating annual production is difficult because mining (especially sand and gravel) relies so heavily on local demand.

Mineral Resource Lands Overlay

Based on review of available mineral resources data, information gained from local businesses and agencies, the requirements of the Growth Management Act, and designation frameworks employed by other jurisdictions, the Mineral Resource Lands Overlay (MRLO), shown on Exhibit 4.1, covers the following areas:



- Properties housing active mining operations and adjacent parcels under unified ownership;

- Lands classified by NRCS as "good" sources of sand, gravel, or road fill material; and
- Lands classified by NRCS as "fair" sources of sand, gravel, or road fill material and which are located outside cities and urban growth areas.

The following areas are excluded from the overlay:

- Properties currently developed for single-family residential or commercial uses.
  Rationale: Mining on or near these lands poses a possibility of adverse impacts that must be mitigated.
- Properties zoned for commercial or residential uses at urban intensities.
- Land zoned for a minimum lot size smaller than 10 acres.
- Developed properties less than 20 acres in size.
  Rationale: Large properties are better able to accommodate buffers from surrounding uses.
- Properties under Federal ownership.
- Lands designated as Natural by the Chelan County Shoreline Master Program.
  Rationale: The SMP prohibits mining activities in these areas for the protection of valuable shoreline natural resources.
- Lands more than one mile from a designated WSDOT Freight and Goods Transportation route.
  Rationale: WAC 365-190 requires consideration of the availability of roads and public infrastructure, as well as the distance from mineral deposits to market. Mining operations have the potential to generate significant truck traffic, which will require roads designated to handle high volumes of freight trips.

Exhibit 4.1
Draft Proposed Mineral Resource Lands Overlay

Land Use Designation/Siting Criteria: Commercial Mineral Lands

The following purpose and locational guidelines provide a basic understanding of the zoning districts intent and how they relate to the Comprehensive Plan designations.

Designation Guidelines:

1. Geographic and Geologic Characteristics: The designated property should be at least 20 acres in size, and the estimated deposit size should be sufficient to meet both of the following:
    a. Depth of overburden should be no more than 25 feet, and
    b. The ratio of the amount of resource to be extracted to the amount of overburden to be removed should be at least 3:1.
2. Natural Resources: The designated property does not contain environmentally critical areas, including wetlands, riparian areas, threatened or endangered species, geological hazards, and critical aquifer recharge areas, or adequate mitigation can be provided.
3. Transportation Infrastructure: Extraction and processing sites have adequate access to the regional transportation network:
    a. Mineral Resource Lands should be located within one mile of a designated WSDOT Freight and Goods Transportation System route; and
    b. Truck haul routes from the site should avoid areas of residential development or employ appropriate mitigation measures to avoid impacts to residences.
4. Existing Land Uses: Adjacent land uses are generally compatible with mineral extraction and processing activities – examples include mining, agriculture, commercial forestry, industrial development, and undeveloped land. Designation of land adjacent to large-lot residential (no more than 1 dwelling per 5 acres) is conditional on mitigation of impacts from any future mineral extraction or processing activities on nearby residences.

Mineral Resource Lands: Goals & Policies

GOAL ML 1: Protect Chelan County's mineral resource lands of long-term commercial significance and allow for short-term mineral resource extraction opportunities in unincorporated areas, where appropriate.

Rationale: Conservation of these resources must be assured through measures designed to prevent incompatible development in or adjacent to designated mineral resource lands, and to mitigate impacts of mineral extraction activities on adjacent land uses.

Policy ML 1.1: Conduct a comprehensive countywide analysis when classifying, designating, and de-designating natural resource lands to maintain and enhance natural resource-based industries and discourage incompatible uses.

Rationale: Because of the significant amount of time needed to review natural resource lands and potential impacts from incompatible uses, frequent, piecemeal de-designations of resource lands should not be allowed. Site-specific proposals to de-designate natural resource lands should be deferred until a comprehensive countywide analysis is conducted.

Policy ML 1.2: Review and update designations and development regulations for mineral resource lands to reflect the most current information available. Updates should include the data and model development regulations prepared by the State Department of Natural Resources, Department of Commerce, or the Washington State Association of Counties.

Rationale: Pursuant to RCW 36.70A.131, incorporating new data from the Department of Natural Resources helps protect valuable mineral resources by accurately identifying deposit locations and preventing incompatible land uses. Using updated model regulations from state and county associations promotes consistency across jurisdictions and provides best practices for balancing mineral extraction with community interests.

Policy ML: 1.3: Designate mineral resource lands in locations proximate to their likely end-use areas to preserve access to valuable mineral deposits, reduce the risk of resource loss due to incompatible development, and minimize costs associated with extraction and transport.

Rationale: It is expected that mineral resource lands will be depleted of minerals over time. Planning for their appropriate location ensures efficient use of the resource while safeguarding future opportunities for future land uses once mining activities are complete.

Policy ML 1.4: Assure conservation of designated mineral resource lands through land use regulations that prevent incompatible development on or adjacent to mineral resource lands.

Rationale: Mineral resource extraction, such as sand and gravel, pits are typically incompatible with residential and other types of land uses due to noise, dust and heavy equipment traffic. Therefore, it is important to develop appropriate land use regulations that protect mineral resource lands as well as adjacent land uses.

Policy ML 1.5: Require the reclamation of land after the completion of gravel and mineral extraction.

Rationale: Effective reclamation of mining sites can insure future redevelopment of the site and prevent impacts from erosion and visual impacts.

Policy ML 1.6: Require mining and extraction operations to be sited and designed to avoid and mitigate conflicts with surrounding land uses. Screening, buffers, the provision of open space and other mitigation measures should be considered and required where necessary.

Rationale: The careful design and siting of mining operations can prevent or minimize impacts to surrounding land uses.

Policy ML 1.7: Require mining sites to be served by roadways, adequate to handle industrial traffic and not endanger public health and safety.

Rationale: Transportation system impacts and public health and safety issues must be addressed.

Policy ML 1.8: Encourage development adjacent to designated mineral resource lands to incorporate screening, buffers, open space, or other design features to prevent conflicts with existing or future mineral resource extraction activities.

Rationale: The minimization of potential conflicts helps to maintain the viability of mineral resource extraction operations.

Policy ML 1.9: Protect water quality and prevent sedimentation through use of settling ponds, retaining basins, ditches, diking and re-vegetation of slopes and other measures for mining and production operations.

Rationale: Water resources must be protected.

Policy ML 1.10: Surface mining should not lower the ground water table of surrounding properties in a manner that directly impacts their use.

Rationale: Lowering of the ground water table could have serious effects on domestic water supplies.

Policy ML 1.11: Clustering of residential development on adjacent non-resource lands is encouraged.

Rationale: Clustering will provide for open space adjacent to the resource use and will minimize conflicts.

Policy ML 1.12: Designated mineral resource lands not included in urban growth areas should be protected from infrastructure improvement assessments such as, but not limited to, local improvement districts and local utility districts with deferral programs or other measures.

Rationale: Additional taxes would pressure the property owner into converting resource land into other uses.

Policy ML 1.13: Support the maintenance and development of mineral resource extraction that is consistent with the comprehensive plan to provide necessary materials for the development of roads, structures and other projects.

Rationale: Materials provided by mineral extraction operations are vital to the community, and are a significant economic activity and supports broader economic development.

Policy ML 1.14: Protection of mineral resources under the MRLO should occur in two tiers:

- Lands actively being mined for commercial production of sand, gravel, or rock/stone are designated as mineral resource lands of long-term commercial significance. Owners of these properties may request an amendment to remove the MRLO once mineral production has permanently ceased.
- For lands not currently in active mineral production, the MRLO should act as an interim measure to protect mineral resources until the presence of a commercially viable mineral deposit can be verified through a geologic study. Property owners who wish to finalize designation of their property and undertake mining activities may submit a study by a qualified geologist indicating the presence of commercially significant, accessible mineral resources. Likewise, property owners may request removal of their property from the MRLO by submitting a study from a qualified geologist confirming the absence of such resources.

Rationale: Sand, gravel, and rock are the primary mineral products in Chelan County and are therefore given the highest protection. Mineral resources not currently under production can be evaluated and added to the overlay as more detailed information becomes available.

Policy ML 1.15: Inclusion of a property under the MRLO does not imply approval for a specific mineral extraction activity and does not substitute for any necessary local or state mining permit required.

Rationale: The MRLO is designed to protect and preserve mineral lands, but permitting is necessary to ensure mineral extraction is conducted consistent with applicable laws and regulations.

Policy ML 1.16: As part of the periodic comprehensive plan update process under the Growth Management Act, the County should regularly review the criteria for economic viability of a mineral resource and update the criteria for designation as appropriate.

Rationale: Economic conditions, market trends, and demand for mineral products can change over time, and the MRLO designation criteria may need to be periodically revised to reflect current conditions. The regular GMA plan review cycle is an appropriate time to review this information.

Policy ML 1.17: All plats, short plates, development permits, and building permits issued on properties within 500 feet of lands designated as part of the MRLO should include a notice to that effect. The notice should disclose that development of the nearby MRLO lands may include uses and activities that are not compatible with residential development.

Rationale: This notice is required under the Growth Management Act (RCW 36.70a.060(1)(b)). Additionally, such notification will allow potential real estate purchasers to make educated decisions.

Policy ML 1.18: Mineral extraction and processing activities in the MRLO should be required to implement best management practices (BMPs) to avoid, reduce, or mitigate environmental impacts associated with mining activities. Such BMPs should be designed to protect the natural environment, adjacent land uses, and the long-term viability of mineral lands.

Rationale: Mineral resource extraction operations are intensive land uses that can involve large amounts of ground disturbance, noise, dust, and heavy equipment traffic. BMPs are necessary to prevent unnecessary impacts on sensitive natural resources and nearby development.

Policy ML 1.19: Once mining activities have commenced on a MRLO-designated property, development of said property under the rules of the underlying zoning may apply in conjunction with the restoration of the mining activities.

Rationale: Postponing development of any part of the site until after reclamation is complete ensures that the property is safe for use and that no incompatible land uses are introduced while mining operations are ongoing.

Policy ML 1.18: At the time of permitting, the County should coordinate with property owners and the Department of Natural Resources to identify post-reclamation uses for MRLO properties that are consistent with the County's comprehensive plan and zoning code, both for the mine site itself and for planned adjacent uses.

Rationale: Coordination on future use of the property will help ensure that County plans recognize post-mining conditions in these areas and reduce the potential for future development that is incompatible with surrounding uses.

V. Chelan County Forest/Timber Lands

Forestland is defined as *"land primarily devoted to growing trees for long-term commercial timber production on land that can be economically and practically managed for such production…and has longterm commercial significance,"* RCW 36.70A.030.

Timber harvesting is a type of natural resource industry with a long history in Chelan County. The following outlines the declining trend of timber harvesting, as documented by the Department of Natural Resources.[7] The following table denotes "thousand board feet" of harvested timber.

Year	1990	1995	2000	2005	2010	2015	2017[8]
Ownership							
Private Industrial	5,710	18,192	1,800	-	-	19,820	11,170
Private Large	-	7,486	636	9,482	1,866	-	-
Private Small	866	31,286	6,698	2,780	882	2,374	1,852
Private Unknown	-	-	-	-	186	719	-
Total Private	**6,576**	**56,964**	**9,134**	**12,262**	**2,934**	**22,913**	**13,022**
State	7,989	5,921	897	2,455	1,100	43	-
Federal	68,382	6,703	8,990	15,913	6,200	-	35
Other Public	13,035	9,708	-	588	-	9,091	2,989
Total Public	**89,406**	**22,332**	**9,887**	**18,956**	**7,300**	**9,134**	**3,024**
Total All	**95,982**	**79,296**	**19,021**	**31,218**	**10,234**	**32,047**	**16,046**

Notes:
Source: DNR, Washington State Timber Harvest Reports.

[7] Industry – companies and individuals operating wood, using plants; private large – non-industrial companies and individuals not operating wood-using plants but with statewide holdings totaling 1,000 or more acres; private small – non-industrial companies and individuals not operating wood-using plants and owning less than a total of 1,000 acres.

The Timber Harvest Report was put on indefinite hold at the beginning of the COVID-19 pandemic due to funding constraints, and 2017 is the most recent year harvest data were collected. As of January 2026, considerations are underway whether to reinstate it.

Land Use Designation/Siting Criteria: Commercial Forest Lands

The growth management process requires identification of forest lands of long-term commercial significance as part of the growth management process. The identification of these lands is an attempt to conserve and encourage existing and future forest practice land uses as a viable, permanent land use and a significant economic activity within the County. Forest land also provides recreational opportunities, scenic value and wildlife habitat. In addition, the identification and land use regulations of the commercially significant forest lands will provide protection for forest lands from encroachment and incompatible land uses. The Growth Management Act defines "long term commercial significance" to include the growing capacity, productivity, and soil composition of the land for long-term commercial production, in consideration with the land's proximity to population areas, and the possibility of more intense uses of the land. These areas are identified as (FC) on the land use maps, and are shown in Appendix H.

The following purpose and locational guidelines provide a basic understanding of the zoning districts intent and how they relate to the Comprehensive Plan designations.

Purpose: To assure the long-term conservation of commercial forest lands; to preserve and encourage existing and future forest land uses as a viable, permanent land use and a significant economic activity within the community; and to protect forest lands of long term commercial significance not already characterized by urban development from encroachment of incompatible uses.

Uses appropriate for these areas include: forestry, open space; residential; and agriculture. Additional uses may be considered with supplemental provisions. These provisions shall address performance standards, impacts to the surrounding area, and be consistent with the goals and policies of the comprehensive plan. Such uses may include: natural resource support facilities and services; mineral resource activities; intensification of existing development or the development of new small scale recreational or tourist uses that rely upon a rural setting but that do not include new residential development; intensification of development on lots containing existing isolated nonresidential uses; home occupations; bed and breakfasts; and community facilities.

Density: One (1) dwelling unit per 20 acres.

Locational Guidelines:

1. Geographic and Geological Characteristics: Soil characteristics, steep slopes or other physical constraints to development may be present. The area should not be adjacent to intensive urban or incompatible rural development. Large tracts of land oriented to forest resource management exist.
2. Natural Resources: The area should contain or have the potential to contain commercial forest resource management operations and commercial forest support facilities and services. The area should meet the criteria under WAC 365-190-060, as forest resource lands of long-term commercial significance.
3. Public Services: Uses should not require extension or provision of urban level services. These areas may have access to rural governmental services and infrastructure or have the potential to be provided with rural governmental services within the 20-year planning period. Urban services should not be present.
4. Existing Land Uses: The prevailing land use pattern consists of commercial forest resource management operations and commercial forest support facilities and services. Dispersed single family residences and low intensity rural uses may be present. The predominant parcel size is typically 20 acres or larger. Recreational and small-scale tourist commercial opportunities may be present.

Forest/Timber Resource Lands: Goals & Policies

GOAL FL 1: Conserve forest lands of long-term commercial significance. Encourage sustainable timber production in rural and resource lands as a viable, permanent land use, a significant economic activity within the community, and a means to improve forest health and reduce wildfire risk.

Goal Rationale: Timber production remains an important aspect of the County's economy.

Policy FL 1.1: Conserve forest lands for productive economic use by identifying and designating forest resource lands where the principle and preferred land use is commercial resource management.

Rationale: Timber production remains an important aspect of the County's economy and the productive capacity of area forests cannot be ignored. Activities in designated forest resource lands that would limit or eliminate the ability to continue commercial forest resource management should be discouraged.

Policy FL 1.2: Promote multiple uses of forest resource lands where such uses do not eliminate or limit commercial forest resource management.

Rationale: Forest resource lands provide unique opportunities and locations for land uses such as natural resource extraction and open space and recreation development.

Policy FL 1.3: Protect designated forest resource lands from inappropriate infrastructure improvement assessments through deferral programs or other measures that would protect the ability to continue long-term commercial forest resource management.

Rationale: Additional taxes would impact the viability of commercial forest resource management operations. Infrastructure improvements or assessments inconsistent with the comprehensive plan should not be supported.

Policy FL 1.4: Classify and designate forest resource lands based on the criteria and procedures established in WAC 365-190-040, and 060 with special consideration given to the determination of whether forest resource lands considered for designation are viable as long term commercial significant forest resource lands.

Rationale: Resource lands should be identified based on the best available information at the time of the designation.

Policy FL 1.5: Support maintenance of forest lands in timber and current use property tax classification consistent with RCW 84.28, 84.33, and 84.34.

Rationale: Open space taxation assists the property owner in maintaining property in commercial forest production.

Policy FL 1.6: Promote cooperative resource management between government agencies and private entities.

Rationale: This policy would provide equal representation and efficient management regarding forest issues.

🥬 Policy FL 1.7: Use the permit review process to promote implementation of forest management practices that minimize the potential for catastrophic wildfires. In partnership with state and federal

agencies and property owners, proactively address fire resiliency through activities such as: pre-fire monitoring, forest treatment, thinning, prescribed fire, and managed natural fire.

Rationale: The potential for catastrophic forest fires should be reduced. Coordination with other state and federal entities is necessary as most forest land is in federal or state hands. The Community Wildfire Protection Plan addresses several resiliency efforts.

Policy FL 1.8: Recognize that state and national forest lands and orchard lands accommodate carbon sequestration, having a positive effect on carbon emissions in the region.

Rationale: Chelan County contains extensive forest lands and agricultural lands that can absorb carbon emissions.

Policy FL 1.9: Support local industry that can process harvested, thinned, and salvaged timber into value-added products that support regional markets, such as lumber, mass timber, and engineered wood products.

Rationale: Supporting local wood-processing industries creates markets for thinned and salvaged timber, making forest restoration and wildfire risk-reduction efforts more feasible while strengthening the regional economy. Local value-added processing creates jobs, keeps economic benefits in the community, reduces transportation impacts and costs, and supports sustainable forest management in heavily timbered areas.

GOAL FL 2: Icicle River Valley: Where appropriate, encourage sustainable timber production in the Icicle Valley.

Goal Rationale: Timber production remains an important aspect of Chelan County's economy, and the productive capacity of forest in the Icicle Valley cannot be ignored. Consideration of visual management to maintain the scenic quality of the Icicle Valley should be encouraged, while at the same time providing for the growing, management, and harvesting of timber resources.

Policy FL 2.1: Promote timber production in the Icicle Valley, subject to appropriate conditions for protection of the area's scenic qualities and water resources.

Rationale: It is important to maintain the environmental and scenic qualities of the Icicle Valley.

Policy FL 2.2: Protect the visual character of the Icicle Valley by discouraging clear cutting, except where such cuts can be designed in the form of small, irregular patch cuts that take advantage of natural variations in the vegetation and topography.

Rationale: Such measures will help mitigate the visual impact of clear cutting.

Policy FL 2.3: Minimize logging road construction; approval of new logging roads should be conditional on evaluation of visual and environmental impacts.

Rationale: Minimizing the construction of logging roads will help to preserve the environmental quality of the area.

Goal FL 3: Build community resilience and support forest management that reduces wildfire risk.

Policy FL 3.1: In partnership with state and local entities, build awareness of increasing wildfire and smoke risk, encourage mitigation and preparedness, and create fire adapted communities.

Rationale: Chelan County can play a role in sharing information and coordinating strategies to prepare communities for resilience to wildfires. The Chelan County Community Wildfire Protection Plan identifies area-specific wildfire preparation and protection strategies.

Policy FL 3.2: Enhance safety and develop fire safe places in fire-prone areas through wildland urban interface policies and codes.

Rationale: Chelan County implements fire and building, standards as new or altered development is proposed, and continues to monitor and apply newer codes to development in hazard areas.

Policy FL 3.3: Work with partners to integrate potential future conditions into hazard response plans. Coordinate emergency preparedness systems, increase early detection capabilities and communication. Respond to emerging health and safety threats. Assist the most vulnerable people and communities in preparing for and responding to wildfire and post-fire hazards.

Rationale: The County Sherriff's Emergency Management Office produces the Comprehensive Emergency Management Plan (CEMP) providing mitigation, preparedness, response, and recovery activities for wildfire and other emergencies and provides it to a range of state, regional, and local agencies. The County develops the CEMP on behalf of the cities of Cashmere, Chelan, Entiat, Leavenworth, and Wenatchee through an interlocal agreement.

Policy FL 3.4: Work in partnership with federal, state, and local entities to test relevant forest management scenarios to understand combined benefits for fire fuels reduction, snowpack retention, summer streamflow, and water supply.

Rationale: Snowpack accumulation and melt rates are related to forest structure as well as climate. Forest management practices could increase snow water storage, change the timing of snowmelt, and support stream flow and fish habitat.

VI. Chelan County Natural Systems/Critical Areas

The Growth Management Act states that counties should "protect critical area." Critical areas include the following areas and ecosystems: (a) wetlands; (b) areas with a critical recharging effect on aquifers used for potable water; (c) fish and wildlife habitat conservation areas; (d) frequently flooded areas; and (e) geologically hazardous areas.

The County has completed the planning process for developing these goals and policies and corresponding regulations following an extensive citizen participation process.

Natural Systems: Critical Area Goals & Policies

GOAL CL 1: Use best available science to identify and protect critical areas from adverse environmental impacts while providing for reasonable use of private property.

Goal Rationale: Preservation of critical areas will help protect the environment and maintain and enhance the quality of life. Implementation regulations should provide reasonable use of private property. The use of best available science helps to identify and protect critical areas by applying current and best practices.

Policy CL 1.1: Promote residential, commercial, and industrial development regulations that protect the availability of potable water by preventing contamination of groundwater sources.

Rationale: The maintenance of a safe potable water supply is vital to the County.

Policy CL 1.2: Encourage restoration of contaminated groundwater sources.

Rationale: The restoration of contaminated ground water helps to meet County needs for potable water and is beneficial to the environment and rural property owners that use wells.

Policy CL 1.3: Classify, designate and protect all critical areas, including frequently flooded areas, wetlands (as defined in 36.70A.030), fish and wildlife habitat conservation areas, aquifer recharge areas and geologically hazardous areas using best available science, pursuant to RCW 36.70A.172, WAC 365-190-040, WAC 365-195, and WAC 365-196-830.

Rationale: Critical areas add to the quality of life within a community, as well as performing important natural functions that assist with protecting private property from damage from natural disasters and events. Identifying critical areas and protection measures for those areas in alignment with best available science (WAC 365-195) are important steps in ensuring that those functions and values are preserved for future generations' enjoyment and protection. WAC 365-190-040 outlines the process to classify and designate natural resource lands and critical areas.

Policy CL 1.4: Regulate development in floodplains to protect property and mitigate the loss of floodplain storage capacity.

Rationale: The loss of floodwater storage results in a potentially greater level of destruction to downstream properties from the resultant higher flood elevations and water flow velocities.

Policy CL 1.4.1: Improve flood warning and information dissemination. Assess risk management, and prepare for rapid response during the flood event.

Rationale: In the future, both the frequency and magnitude of floods in and around Chelan County are predicted to increase. The Flood Control Zone District is tasked with flood warning and emergency response, but other agencies also support.

Policy CL 1.4.2: Evaluate and improve stormwater management and infrastructure for high-intensity rainfall events.

Rationale: In the future, more winter precipitation is predicted to fall as rain rather than snow, increasing winter runoff and streamflow volumes.

Policy CL 1.4.3: Seek funding for measures to protect and restore fish and wildlife habitats and ecosystem function to support resilience in response to flood events. Plan for post-flood replanting and restoration to increase infiltration and slow movement of water and to stabilize ecosystems.

Rationale: As a result of increased flooding, effects on habitat could include greater mortality of juvenile fish and eggs and reduced slow-water habitat.

Policy CL 1.4.4: Relocate, upgrade, or protect critical facilities from wildfire and flooding.

Rationale: Wildfire and floods can affect facilities and services important to emergency response. The County has mapped critical facilities in its Natural Hazard Mitigation Plan, Community Wildfire Protection Plan, and Comprehensive Flood Hazard Management Plan.

Policy CL 1.5: Discourage development on unstable soils or steep slopes and in areas susceptible to landslide, flood, or avalanche.

Rationale: Discouraging development in natural hazard areas helps to protect the public health, safety, and general welfare.

Policy CL 1.6: Adopt an excavation and grading ordinance to regulate excavation, grading and earthwork construction activities.

Rationale: Uncontrolled filling and grading can cause erosion and siltation of streams, rivers and ponds. These activities can also be detrimental to adjacent properties.

🥬 Policy CL 1.7: Support the purchase of critical areas by public or private organizations for purposes of preservation, restoration, or conservation.

Rationale: This option allows interested private and public organizations to purchase lands they wish to put into a long-term conservation or preservation programs.

Policy CL 1.8: Critical area regulations should not preclude reasonable use of property or affect a taking in violation of the U.S. Constitution, the Constitution of the State of Washington, or substantive due process.

Rationale: Private property rights must be protected.

Policy CL 1.9: Allow for open space and recreational use of critical areas where such use does not negatively impact critical areas.

Rationale: Open space and recreational use of critical areas may provide an opportunity for residents and visitors to enjoy the natural amenities of the County.

Policy CL 1.10: When reviewing development proposals, the County should apply appropriate conditions to avoid or mitigate negative impacts to critical areas, including the no net loss of critical areas functions and values. Proposal review should also include evaluation of the cumulative impacts of development proposals in critical areas.

Rationale: It is important to take a comprehensive approach to development in a critical area since there is often a compounding effect resulting from changes to natural systems. Consistent

with WAC 365-196-830(4), if development regulations allow harm to critical areas, they must require compensatory mitigation of the harm to avoid a net loss of the functions and values of the ecosystem that includes the impacted or lost critical areas.

Policy CL 1.11: Protect water quality and fish habitat by requiring dredging and filling activities to minimize introduction of suspended solids, leaching of contaminants, or habitat disturbance.

Rationale: Uncontrolled dredging and filling activities can negatively impact fish habitat and water quality.

Policy CL 1.12: Encourage the restoration and enhancement of critical areas.

Rationale: The enhancement and restoration of critical areas improves the functions and values they provide.

Policy CL 1.13: Encourage the use of innovative techniques to protect critical areas, such as purchase of development rights, transfer of development rights, clustering, conservation easements, land trusts, and the Public Benefit Rating System.

Rationale: Innovative techniques can benefit the public, land owner, and help to protect critical areas.

Policy CL 1.14: In designating and protecting critical areas, the County should use best available science to develop policies and development regulations. The County should also give special consideration to conservation or protection measures necessary to preserve or enhance anadromous fisheries.

Rationale: Inclusion and consideration of best available science ensures that the best available information and protection measures are utilized.

Policy CL 1.15: Critical areas regulations and designations should be reviewed when adopting a comprehensive plan under RCW 36.70A.040 and implementing development regulations under RCW 36.70A.120 and may be altered to ensure consistency. In addition, subsequent studies and information will be reviewed when drafting development regulations.

Rationale: Consistency between the comprehensive plan and development regulations is required. Additional studies may constitute best available science.

Policy CL 1.16: The goals and policies of the Chelan County Shoreline Master Program, as amended, are considered an element of the comprehensive plan, and are included by reference as if fully set forth herein.

Rationale: The goals and policies of the Shoreline Management Act, as set forth in RCW 90.58.020, are considered one of the goals of the Growth Management Act. The Growth Management Act requires that shoreline master programs be integrated as an element of the comprehensive plan.

Policy CL 1.17: Support ongoing watershed planning efforts.

Rationale: Watershed planning is essential to address a variety of issues including endangered and threatened species listings and water quantity issues.

Policy CL 1.18: Continue to build partnerships across state, federal, and local agencies to monitor and respond to vulnerabilities in forested and shrub-steppe lands as conditions change. Monitor exotic and invasive species and prioritize detection, control, and eradication. Coordinate ecological recovery programs for public and private areas subject to fire in forested and shrub-steppe lands.

Rationale: The effects of changing conditions could include habitat loss and more invasive species, especially in shrub-steppe ecosystems. In the future, Chelan County may face a higher risk of wildfire, and with that natural hazard, a need to recover habitat, reduce erosion, and restore ecological conditions.

Policy CL 1.19: Encourage watershed-scale community building to adapt to changing streamflow and snowpack within the watershed.

Rationale: Spring snowpack in the Washington Cascades has declined in recent decades and is expected to further decline with warming in the future. Watershed scale community building efforts can help local communities understand and respond to the effects of change to streamflow and snow pack. Community-building could address a range of resiliency measures such as: forest practices, riparian enhancement restoration addressing stream temperatures and flow patterns, management of invasive or non-native aquatic species, irrigation efficiencies, and prioritization of water use as snowpack decreases. An example of community building is the Icicle Work Group, a joint effort between Chelan County and the Washington State Department of Ecology. Within these community building efforts, the County could develop priorities and strategies to proactively implement adaptation measures for the most vulnerable and underserved populations.

Policy CL 1.20: Increase the resilience of aquatic systems through improvement of in-stream habitats and floodplain connectivity.

Rationale: The effects of drought on aquatic systems include warmer stream temperatures during low flow periods, reduced habitat quantity due to lower summer flows, reduced aquatic habitat quality, and more favorable conditions for invasive fish and other aquatic species.

Policy CL 1.21: Identify locations where changes in surface and groundwater flow could result in new or greater releases of toxic substances to the environment.

Rationale: Through hazard management planning the County can identify locations at risk of toxic release due to larger floods, erosion, or fire.

Policy CL 1.22: Identify opportunities to expand habitat protection and improve habitat quality and connectivity to foster resilience using conservation area designations, easements, buffers, and open space corridors.

Rationale: Protecting and connecting habitat areas helps maintain healthy ecosystems that support wildlife, water quality, and habitat function. As development and infrastructure interrupt natural landscapes, strategically designated conservation areas, buffers, easements, and open space corridors reduce habitat loss, allow species movement, and sustain ecological processes.

Natural Systems: Air Goals & Policies

GOAL NS 1: Protect and maintain air quality.

Goal Rationale: The protection of air quality is important for the public health, the local economy, the environment, and helps to maintain the high quality of life enjoyed by County residents and visitors alike.

Policy NSL 1.1: Support future and ongoing air quality monitoring programs.

Rationale: Monitoring of air quality helps to determine the impacts of growth and development on air quality. Should air quality problems arise, determining the sources of air quality degradation, and educational and regulatory tools to maintain or improve air quality would be necessary.

Policy NS 1.2: Promote industrial development that meets air quality standards and is compatible with adjacent property uses.

Rationale: Air pollution can cause health problems, obscure visibility, create unpleasant odors and damage animal and plant life.

Policy NS 1.3: Support public awareness of air quality standards and safety, including wildfire smoke, woods, and burning restrictions as adopted by the Department of Ecology.

Rationale: Federal and state agencies set air quality standards for outdoor air. The purpose of these standards is to prevent air pollution from reaching levels that hurt human health. When an area does not meet an air quality standard, the state must develop a plan to clean up the air.

Policy NS 1.4: Leverage funding with partners and facilitate proper placement of facilities that collect local climate data including precipitation, wind velocity, temperature, humidity, sunshine, etc.

Rationale: To support an understanding of snowpack, stream flows, wildfire risk, and other conditions important for resiliency, watershed planning, emergency management, etc., the County could support collection of local relevant data, including but not limited to, federal and state agencies adding stream gages, weather stations, SNOTEL, and other facilities on public lands including forest lands.

Natural Systems: Icicle Valley Goals & Policies

GOAL NS 2: ICICLE RIVER VALLEY: Encourage retention of the scenic character and environmental quality of the Icicle Valley.

Goal Rationale: The preservation of the scenic and environmental qualities of the Icicle Valley, ensures the retention of significant open space and recreational opportunities, and critical areas.

Critical Area Policy CL 2.1: Continue to utilize the Icicle Valley Design Review Overlay District or design guidelines to retain the scenic and environmental qualities of the Icicle Valley.

Rationale: The Icicle Valley Design Review Overlay District provides additional standards to ensure that development does not negatively impact the scenic and environmental qualities of the Icicle Valley.

Critical Area Policy CL 2.2: Residential development should occur at a very low density, and in a scattered, diffused pattern in the Icicle Valley Design Review Overlay District.

Rationale: Dispersed very low density development will help to limit negative visual and environmental impacts.

Critical Area Policy CL 2.3: Implement visual quality standards within the Icicle Valley Design Review Overlay District to protect scenic resources.

Rationale: These standards will allow for continued recreational use of the Icicle Valley and avoid or mitigate visual and environmental impacts.

Critical Area Policy CL 2.4: Private property within the Icicle Valley Design Review Overlay District should continue to be designated as an environmentally sensitive area under the provisions of the State Environmental Policy Act.

Rationale: This designation helps ensure that environmental aspects are properly considered.

Critical Area Policy CL 2.5: Protect both wilderness values and reserved rights within the Alpine Lakes Wilderness so that clean and reliable water resources and water supply continue into the future.

Rationale: A variety of users, including wilderness recreationists and water suppliers (municipal, irrigation and fish hatchery) rely on the cold, clean and clear water resources of the Icicle Valley for people, farms and fish.

CHAPTER 5
HOUSING ELEMENT

I. Introduction

The Housing Element of this Comprehensive Plan provides a comprehensive analysis of housing conditions, challenges, and opportunities within Chelan County. The forecasts and data focus on the unincorporated areas of the county wherever possible, however, in many cases the data includes both the incorporated areas and unincorporated areas by default. This housing element serves as a guide for future housing development and addresses housing affordability through 2046.

A healthy housing ecosystem is characterized by a market in equilibrium, where housing supply meets the community's demand. Key factors in measuring housing supply and demand include the number of housing units, vacant and developable parcels, employment levels, and income levels.

The following sections analyze data on Chelan County's housing market and use population and housing forecasts to assess future demand.

The chapter is organized as follows:

Section I: Executive Summary & Introduction:

Key highlights from the assessment

Section II: Land Capacity Analysis:

Study of land supply and demand for housing development

Section III: Demographics & Socioeconomic Trends:

Overview of underlying socioeconomics affecting housing demand and affordability characteristics

Section IV: Housing Trends:

Overview of owner- and renter-occupied housing, including affordability dynamics

Section V: Gaps and Barriers Analysis:

Affordability gaps for renting and homeowning residents

Section VI: Policies and Programs:

Overview of relevant policies and programs the City has implemented or uses to provide more affordable housing

Expectations of Data Accuracy

Rural geographic areas, such as the Stehekin County Subdivision (CCD), are prone to challenges in data accuracy and forecasting. Any users of public data should be aware of the challenges and methodological limitations of demographers and statisticians working on such processes. It is easy to fall into the mindset of wondering why the numbers are "wrong," but those expectations need to be reset. Statisticians are not simply tallying up values from a perfect and esoteric spreadsheet, they are modeling an array of data sources, tabulating untold different metrics, across inconsistent geographies, using diverse methos, and non-consistent time periods. Not only that but the amount of data points that they have to work with in neighboring densely populated municipalities greatly outweighs the amount of data for rural, sparsely populated municipalities. Hence, some margin of error should not only be tolerated, but expected.

In this chapter, PC provides the full gamut of population and socioeconomic estimates, from a range of geographic areas. We do not expect these data to be perfect; however, our main goal is to accurately estimate current land use and forecast demand in future years, and we will ensure those inputs and assumptions are as accurate as possible. Many of the statistics presented in this chapter are for regional context and inference but are not serving as direct inputs into that model.

Executive Summary

Chelan County is a uniquely diverse region in the heart of Washington state. Its scenic lakefronts, forested hillsides, and rural farmland make it both a desirable place to live and a popular destination for visitors. This distinctive mix creates a unique housing market as the County strives to maintain its character and ensure continued access to affordable housing for residents from all walks of life.

Housing Situation

Population growth in Chelan County has outpaced national growth over the past decade and is expected to continue at a similar pace. As a result, housing demand will keep rising. While over half of county residents (63%) are homeowners, affordability will continue to be a growing concern for both renters and prospective buyers. At the time of this assessment, a majority of Chelan County's first-time homebuyers (84%) could not afford an average-priced home. Even lowest-tier homes remain unaffordable for 66% of first-time homebuyers, and 49% of all households.

Rental burdens are also present, although they are lower in the County than in the state or nation overall. Still, 34% of renter households spend more than 30% of their income on housing and are therefore considered cost-burdened. Among low-income renter households, over half (53%) are cost-burdened.

One unique aspect of Chelan County's housing supply goes hand in hand with its vibrant tourism industry. Because many tourists are attracted to Chelan County, especially in the summer months, a portion of its housing stock has been reserved for tourists and seasonal residents. Points Consulting (PC) identified approximately 1,726 active STRs within Chelan County. This represents about 4% of the County's housing stock.

Chelan County contains approximately 38,968 housing units. Of these units, 19% are vacant. Roughly 78% of vacant homes are for seasonal, recreational, or occasional use. Of the occupied units, the majority (67%) are single-family detached homes. This share is slightly above the state (63%) and national (63%) averages. Buildings with 10 or more units, as well as mobile homes and other housing

types, each make up another 10% of the housing stock. This mix signals a relatively higher level of housing diversity in Chelan County, which can support affordability across multiple income levels.

Over the past decade, housing prices and rents have risen rapidly, especially in the wake of COVID-19 and rising inflation. Since 2014, housing prices have increased 150%. This is more than double (and nearly triple) the growth of local incomes, which rose by 54% over the same period. Rents have also climbed sharply, nearly doubling with a 92% increase since 2014.

Demographics

Since 2013, Chelan County's population has grown 9%. State forecasts predict continued growth over the next 20 years. A growing population signals increased demand for housing as more people move into the area.

Age plays a key role in housing needs. Older populations typically require more space per person than younger ones. Younger households often compromise on unit size, lot size, or even homeownership due to budget constraints. In Chelan County, 31% of the population is under age 25, 36% are prime-working age adults, and 21% are age 65 or older. This reflects a sizable young population; however, there is also a relatively large senior population compared to state and national averages. The result is a smaller proportion of working-age adults in the community.

Income levels play a crucial role in housing affordability and demand. Chelan County's median household income is nearly equal to the national median ($75.3K versus $75.5K). However, despite similar income levels, Chelan County's poverty rate (9%) is well below the United States poverty rate (12%).

Economy

The regional economy of Chelan County has grown over the past decade, with employment up 9% since 2014 and wages up 74%. In contrast, the number of establishments has declined 6.6%. This seems to be due to a sharp drop between 2021 and 2023. Overall, Chelan County has lagged behind both the state and nation in employment growth, and well behind the nation in establishment growth. Unemployment in the County stands at 4.7%. This is only slightly above the state rate of 4.5%.

The three largest employment sectors in Chelan County are Health Care & Social Assistance, Retail Trade, and Agriculture, Forestry, & Fishing.

Forecast

Given its current housing supply, Chelan County anticipates approximately 1,806 units will be needed in the rural county area and Manson UGA to accommodate projected population growth from 2027 to 2046. The estimated number of housing units needed at each Area Median Income (AMI) level is as follows:

- 0–30% AMI: 611 units
- 30–50% AMI: 476 units
- 50–80% AMI: 375 units
- 80–100% AMI: 151 units
- 100–120% AMI: 132 units
- 120%+ AMI: 62 units

Additionally, Chelan County anticipates a need for 85 additional units of temporary and emergency housing within the rural county area and Manson UGA.

Land Capacity Analysis

While Chelan County has some challenges related to affordable housing, it has a plentiful supply of land that the County can leverage for future development. PC's land capacity analysis indicates that rural Chelan County and the Manson UGA have enough vacant land in appropriately zoned districts to accommodate about 6,669 new housing units.

II. Land Capacity Analysis

This section provides a summary of the findings of the Land Capacity Analysis. For full methodology and details see the Chelan County 2025 Land Capacity Analysis.

Future Housing Demand

The Housing for All Planning Tool (HAPT) was developed under House Bill 1220 (HB 1220), a revision to the Growth Management Act (GMA). HAPT helps counties plan for population growth by estimating housing needs across different income levels.

Estimated Housing Supply by Income Level and Region

The Comprehensive Planning Update covers a 20-year growth period, but the HAPT model produces housing demand estimates for 2020 to 2046. To align with the 20-year planning horizon, housing supply is first estimated for 2021 to 2026. These estimates were then subtracted from total demand (2021–2026) to determine the remaining housing need for 2027 to 2046.

Housing supply estimates for 2021 to 2026 are based on permit data collected by the University of Washington's Center for Real Estate Research (WCRER) for number of housing units produced, and residential sales data from Realtors Property Resource (RPR) for the distribution of income levels these properties would fall into.

Residential Permits Issued, 2021–2024

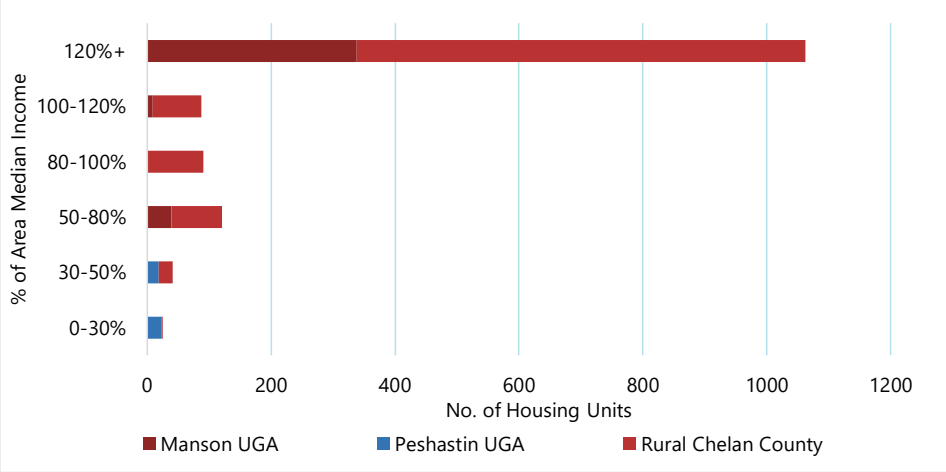
WCRER housing permit data include the number of permits issued by local jurisdictions for 2021 to 2024. These values were used to estimate the total number of housing units constructed during that period. RPR residential sales and tax assessment data for the time period was used to assess the value of the single-family homes built from 2021-2024. Since the RPR database does not contain all houses built during this period, the distribution of home values was applied to the number estimated from the WCRER permit count to approximate the number of homes built at each AMI level. Multi-family units values were pulled from the WCRER data.

Estimating Housing Supply, 2025–2026

A three-year moving average of dwelling units built from 2021 to 2024 was used to forecast housing production in subsequent years. Specifically, the 2022–2024 average estimates 2025 production, and the 2023–2025 average is applied to the 2026 projection.

Estimated Housing Supply, 2021–2026

Figure 5-4 shows the estimated total housing supply by affordability level for 2021 to 2026. The graph indicates that developers are expected to build the majority of housing in the rural areas of the County during this period.



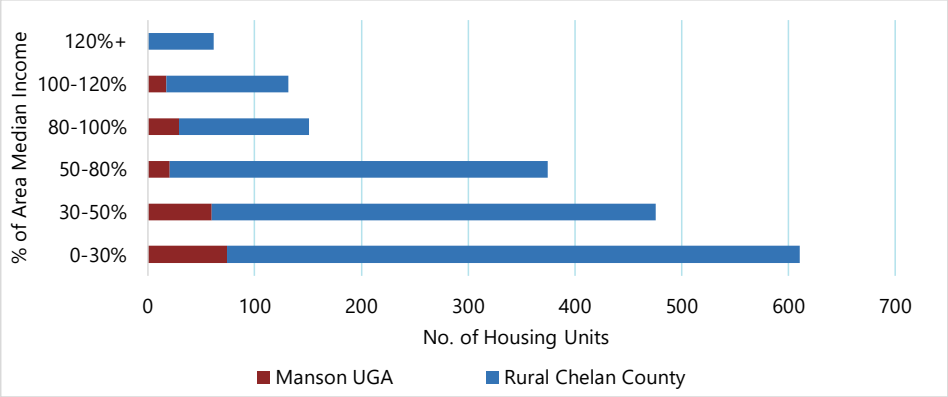
Determining Affordability of the Estimated Housing Supply

To estimate the affordability level of new housing units, the project team used different methods based on housing type. For single-family and two-unit structures, we calculated affordability using mortgage payment estimates. We compared these against income levels derived from the

U.S. Department of Housing and Urban Development's (HUD) Median Family Income (MFI) data to determine affordability at various Area Median Income (AMI) levels.

For structures with five or more units, we used HUD's Fair Market Rents (FMRs) to assess affordability.

Figure 5-4
Estimated Housing Supply by Region and Income Level, 2021–2026



Source: Housing for All Planning Tool, Method A; WCRER Housing Permit Data; Realtors Property Resource; HUD Area Median Incomes; HUD Fair Market Rents

Housing Demand by Income Level 2027–2046

The project team calculated housing demand for the planning period of 2027 to 2046 by subtracting the estimated housing supply built between 2020 and 2026 from the total projected demand for 2020 to 2046. The substantial number of units built in Manson in the 120%+ AMI range during 2021–2026 suggests that this need has been met. Therefore, no additional units in this category are required over the next 20 years.

Based on the current housing supply, Manson will need approximately 134 low-income multifamily units (0-50% AMI) and no single-family units (120%+ AMI) between 2027 and 2046. The remainder of rural Chelan County will require 953 low-income multifamily units and 62 single-family units during the same period (Figure5-5).

Figure5-5
Housing Demand by Region and Income Level, 2027–2046

Source: Housing for All Planning Tool, Method A; WCRER Housing Permit Data; Realtors Property Resource; HUD Area Median Incomes; HUD Fair Market Rents

Temporary Emergency Housing Demand

The HAPT model projected housing unit needs for temporary and emergency housing. According to the model, Chelan County will require 302 additional units by 2046. Approximately 10 of these will be located in the Manson UGA, and 75 will be located in the rural areas of the County.

Land Capacity Analysis

The housing market and its outcomes are determined by two factors: supply and demand. Because land availability is a key driver of supply, Points Consulting (PC) conducted a Land Capacity Analysis (LCA) for Chelan County. The analysis identifies areas in the County's rural zones, as well as the Manson and Peshastin Urban Growth Areas (UGAs), that have the potential to accommodate new or additional residential development over the next twenty years (2027–2046).

By comparing the estimated housing supply in each zoning district with anticipated demand during this period, the analysis highlights potential gaps or surpluses in housing availability. This type of assessment is critical for long-term urban planning, helping ensure that sufficient land is appropriately zoned (and that enough land exists overall) to accommodate population growth and housing needs without overburdening infrastructure or leaving space underutilized.

Relationship between Zoning Districts and Housing Affordability

For the purposes of this study, we assumed that single-family dwellings developed over the next two decades will primarily serve households earning more than 120% of the Area Median Income (AMI). This applies to all zoning districts in the County where only single-family dwellings are permitted, such as UR1 in Manson, R-1 in Peshastin, and RR 2-20 in rural Chelan County.

Similarly, PC assumes that duplex and multifamily dwellings developed during the same period will serve households below 120% of AMI. This includes all zoning districts in the County's urban areas that allow duplexes and multifamily units, such as UR2 in Manson, R-2 in Peshastin, and RV in rural Chelan County.

More specifically, PC expects only two zoning districts in rural areas, UR3 (high-density Manson) and R-3 (upper-medium and high-density Peshastin), to provide affordable housing opportunities for households earning below 50% of AMI and the need for temporary and emergency housing. Additionally, RV in rural Chelan County could serve the needs of those below 50% AMI as well as those from 50-120% AMI. All other zoning districts permitting duplexes and multifamily dwellings are expected to serve households with incomes ranging from 50% to 120% of AMI.

Any government-assisted housing, emergency housing, permanent supportive housing, etc. would also be supported by the RV zone as these are usually placed in areas of higher density.

Findings

This section compares total housing demand with the estimated housing supply that the region can support under current zoning. As shown in Table 5-1, Table 5-2, Table 5-3, Figure 5-6 and Figure 5-7, every region and income group has sufficient capacity to meet future housing needs driven by population growth. Note that Peshastin has zero projected housing demand by 2046 and is therefore excluded from these findings.

Table 5-1
Housing Demand vs. Supply

Region	Total No. of Dwelling Units Demanded	Total No. of Possible Dwelling Units	Supply Meets Demand?
Manson UGA	201	1,110	Yes
Rural Chelan County	1,605	5,559	Yes

Table 5-2
Housing Demand vs. Supply by AMI Level, Rural Chelan County

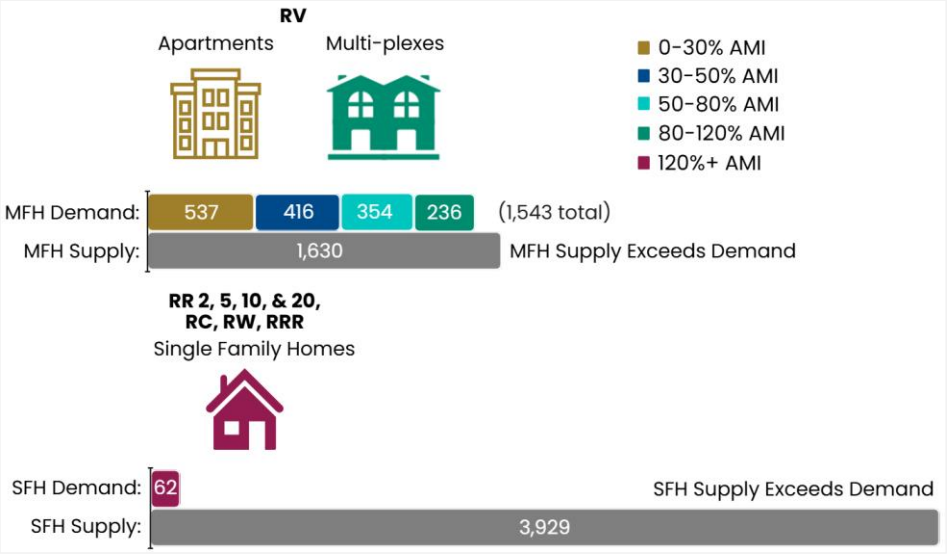
Housing Type	Dwelling Units Demanded	Zones	Possible Dwelling Units	Supply Meets Demand?
Emergency Housing	75	RV	1,630	Yes
0–30% AMI	537			
30–50% AMI	416			
50–80% AMI	354			
80–120% AMI	236			
120%+ AMI	62	RR2, RR5, RR10, RR20, RC, RW, RRR	3,929	Yes

Source: Housing for All Planning Tool Method A; WCRER Housing Permit Data; Realtors Property Resource; HUD Area Median Incomes; HUD Fair Market Rents

Table 5-3
Housing Demand vs. Supply by AMI Level, Manson

Housing Type	Dwelling Units Demanded	Zones	Possible Dwelling Units	Supply Meets Demand?
Emergency Housing	10	UR3	258	Yes
0–30% AMI	74			
30–50% AMI	60			
50–80% AMI	20	UR2	672	Yes

Housing Type	Dwelling Units Demanded	Zones	Possible Dwelling Units	Supply Meets Demand?
80–120% AMI	46			
120%+ AMI	0	UR1	180	Yes



Source: Housing for All Planning Tool Method A; WCRER Housing Permit Data; Realtors Property Resource; HUD Area Median Incomes; HUD Fair Market Rents

Residential areas in rural Chelan County generally favor single-family, sprawling developments on large lots. However, the Rural Village (RV) zone permits multiplex and apartment-style dwellings. This zone is part of a Limited Area of More Intensive Rural Development (LAMIRD), along with Rural Commercial (RC), Rural Waterfront (RW) and Rural Recreational/Residential (RRR) zones. Outside of the RV zone, the other designations are intended primarily for single-family use, though allowable densities vary.

Given the amount of underutilized space in Rural Village areas, sufficient land is available to meet future housing demand. However, if this underutilized space were unavailable, the demand for multifamily dwellings would not be fully met.

For the purposes of this analysis, RC is considered single-family, as RC land will primarily be developed for commercial rather than residential use.

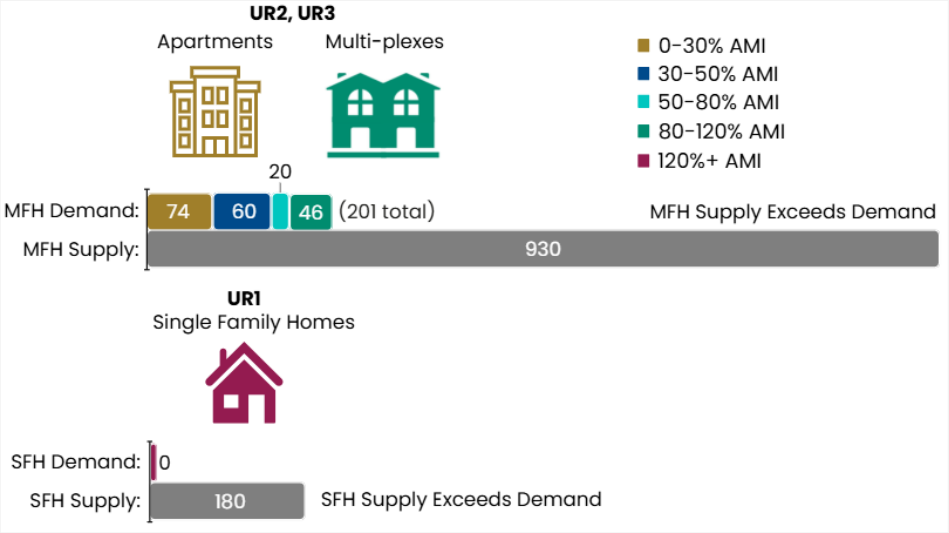


Figure 5-6
Rural Chelan County Residential Supply and Demand

Source: Washington State Department of Commerce; Housing for All Planning Tool, Method A; WCRER Housing Permit Data; Realtors Property Resource; HUD Area Median Incomes; HUD Fair Market Rents

The Manson UGA area, shown in Figure5-7, meets both single-family and multifamily housing needs. Similar to rural Chelan County, much of the multifamily demand is accommodated by underutilized parcels in the UR2 and UR3 multifamily districts. Additionally, the remaining land categorized as Vacant and Potentially Redevelopable in the UR1 zones satisfies the demand for single-family housing.

Figure 5-7
Manson UGA Residential Supply and Demand

Source: Washington State Department of Commerce; Housing for All Planning Tool, Method A; WCRER Housing Permit Data; HUD Area Median Incomes; HUD Fair Market Rents

IV. Demographic & Socioeconomic Trends

Population

Population growth Is generally a signal of increased demand for housing. More homes are required as more people move into the area. Since 2013, Chelan County has experienced 8.9% population growth (Table 5-4). This is notably higher than the U.S. growth rate (6.7%) but lower than Washington's rate (13.5%). Growth has varied across the County, with the Leavenworth UGA experiencing the largest increase (24.1%), while the Peshastin UGA has declined (2.1%).

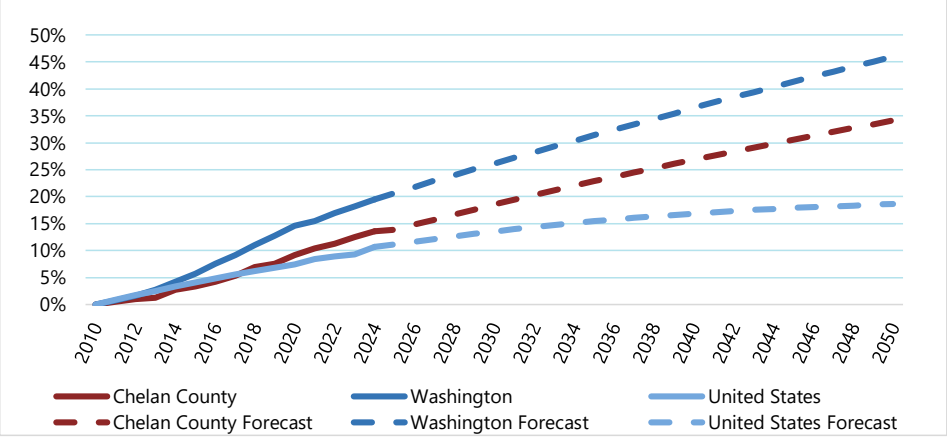

Table 5-4
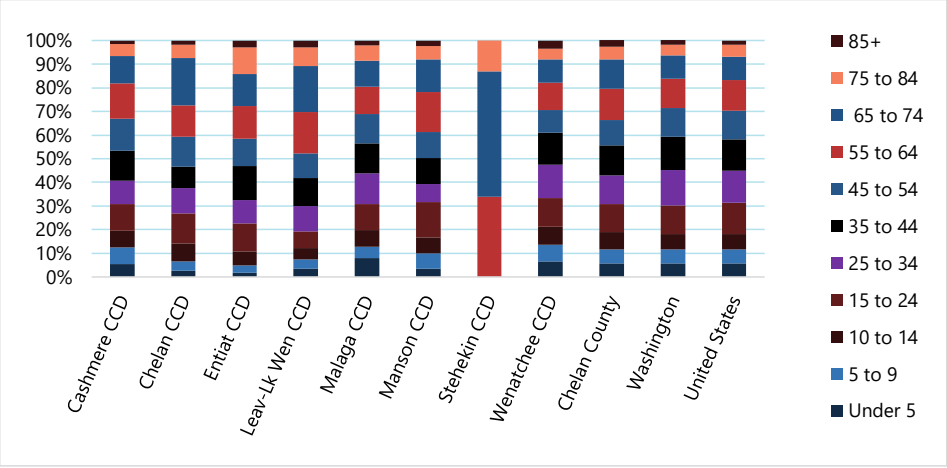
Population Change 2013–2023

Region	2013 Population	2023 Population	Change	% Change
Cashmere UGA	3,911	4,226	315	8.1%
Chelan UGA	4,213	4,786	573	13.6%
Entiat UGA	1,152	1,365	213	18.5%
Leavenworth UGA	2,509	3,114	605	24.1%
Manson UGA	1,897	2,179	282	14.9%
Peshastin UGA	666	652	(14)	(2.1%)
Wenatchee UGA	38,083	41,219	3,136	8.2%
Chelan County	73,047	79,518	6,471	8.9%
Washington	6.8M	7.7M	0.9M	13.5%
United States	311.5M	332.4M	20.9M	6.7%

Source: Washington State Office of Financial Management, Population and Demographics & U.S. Census Bureau

Figure 5-8 shows the cumulative population change for Chelan County compared with state and national rates from 2010 to 2024. Projections extend through 2050. Chelan County's population has been growing (and is expected to continue growing) more slowly than the state rate but faster than the national rate.

Figure 5-8
Population Growth Estimates and Forecast, 2010–2050



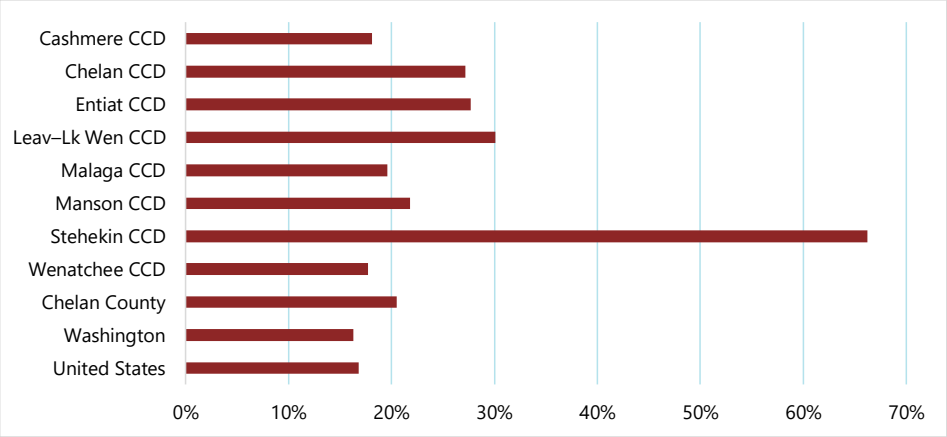
Source: Washington State Office of Financial Management, Population and Demographics

Age

Community age distributions impact local housing needs. Younger residents typically have less time to accumulate wealth and therefore require affordable or starter housing options. Older residents, on the other hand, may be looking to downsize, live with younger family members, or access more supportive care.

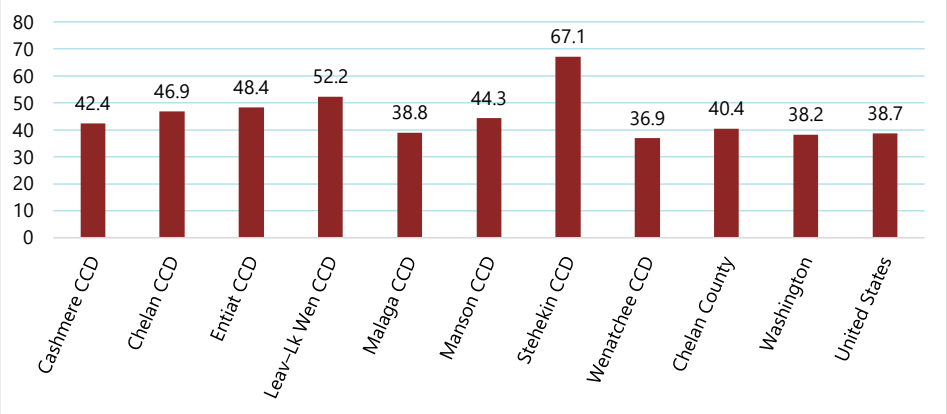
As shown in Figure 5-9, 30.7% of Chelan County's population is under the age of 25. Prime working-age adults (ages 25 to 54) make up 35.7% of the population, and retirement-aged residents (65+) make up another 20.5%. Figure 5-9 and Table 5-5 also illustrate how this distribution varies across regions of the County.

Figure 5-9
Population by Age, 2023[9]



Source: U.S. Census Bureau, American Community Survey 5-year Estimates, S0101, 2023

Chelan County and all regions within it have a higher percentage of residents aged 65 and older than the state or national average (Figure 5-10).



[9] In the original Census text, Figures 5-9 through 5-11 listed "Leav-Lk Wen CCD" as "Leavenworth-Lake Wenatchee CCD."

Race and Ethnicity

The racial and ethnic composition of a region provides valuable insights into its diversity, which can greatly influence housing needs and market dynamics. Factors such as multigenerational living, income levels, and household size are closely linked to these demographic characteristics. Table 5-6 presents the racial and ethnic composition of each county subdivision within the County, as well as overall Chelan County, Washington, and the United States.

In Chelan County, 66.2% of residents identify as White. This is slightly higher than the state average and eight percentage points higher than the national average. The second-largest group in Chelan County is Hispanic or Latino, comprising 28.4% of the population. This is also higher than the state and national averages.

Table 5-6

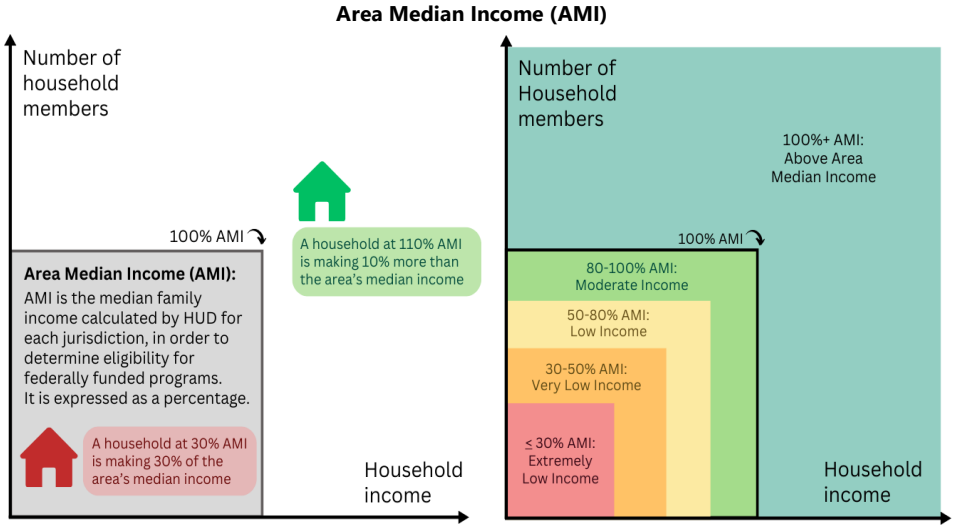
Underserved Population



While many population groups can afford their housing needs, more vulnerable populations require special attention. They often lack the financial or social resources to secure market-rate housing. This section highlights key vulnerable groups in the Chelan region.

Low-Income Population Groups

The U.S. Department of Housing and Urban Development (HUD) defines a household's income level based on the Area Median Income (AMI). AMI helps determine Fair Market Rents (FMRs) and income limits for HUD programs (Figure 5-13).

[10] Totals for some communities may not sum to 100% due to rounding.

Figure 5-13
Area Median Income Definitions

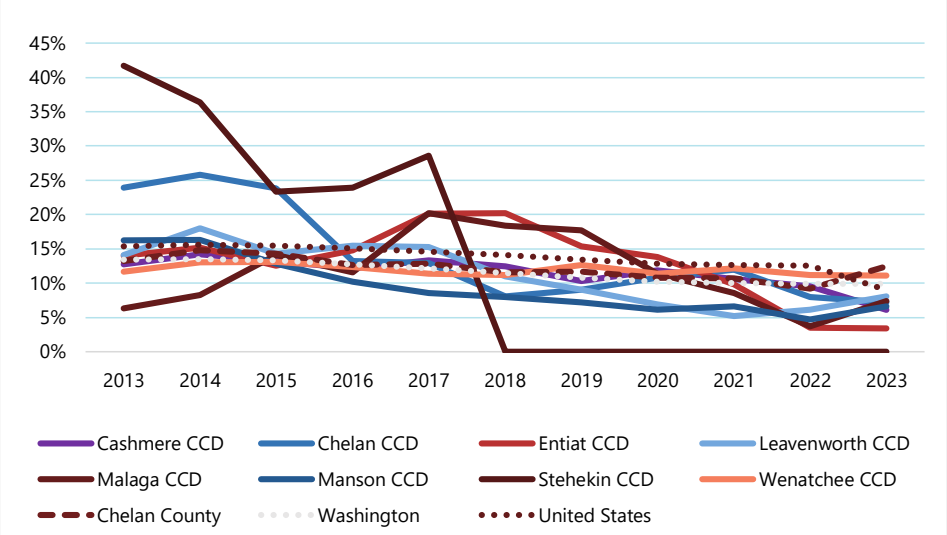
Population in Poverty

Chelan County overall has a poverty rate (9.0%) that is comparable, although slightly lower than, the state average (9.9%). Its poverty rate is over three percentage points below the national rate (12.4%). However, the poverty rate varies across different regions of the County, as shown in Table 5-8. The highest concentration of population in poverty is in the Wenatchee CCD, where over 4,500 people live below the poverty line (11.1% of the population). This is followed by the Leavenworth–Lake

Wenatchee CCD, with an 8.1% poverty rate. We observe the lowest rates in the Stehekin CCD (0.0%) and the Entiat CCD (3.4%), which happen to be the two smallest CCDs in terms of population size.[11]

Table 5-8
Population in Poverty, 2023



Region	Population in Poverty	Percentage in Poverty
Wenatchee CCD	4,573	11.1%
Cashmere CCD	715	6.1%
Leavenworth-Lake Wenatchee CCD	610	8.1%
Chelan CCD	525	7.2%
Malaga CCD	298	7.4%
Manson CCD	283	6.6%
Entiat CCD	81	3.4%
Stehekin CCD	0	0.0%
Chelan County	**7,085**	**9.0%**
Washington	**753,455**	**9.9%**
United States	**40.4M**	**12.4%**

Source: U.S. Census Bureau, 2023, 5-Year ACS, Table S1701

Figure 5-15 illustrates poverty rate trends across each region of the County from 2013 to 2023.

[11] Due to the large margin of error from a small sample size in the Stehekin CCD, this and other metrics for the area may be unreliable and could be either higher or lower than reported by the Census.

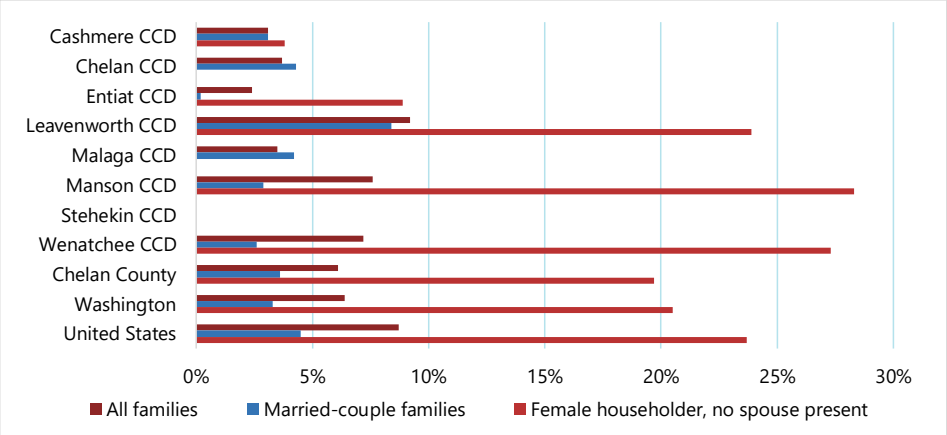


Figure 5-15
Poverty Rate, 2013–2023

Source: U.S. Census Bureau, 2023, 5-Year ACS, Table S1701

Poverty levels can vary noticeably across demographic groups, as shown in Figure 5-16. Female householders with no spouse present tend to have the highest poverty rates. In most regions (except for the Cashmere, Chelan, and Malaga CCDs) the poverty rate among female householders is more than double that of married couples.

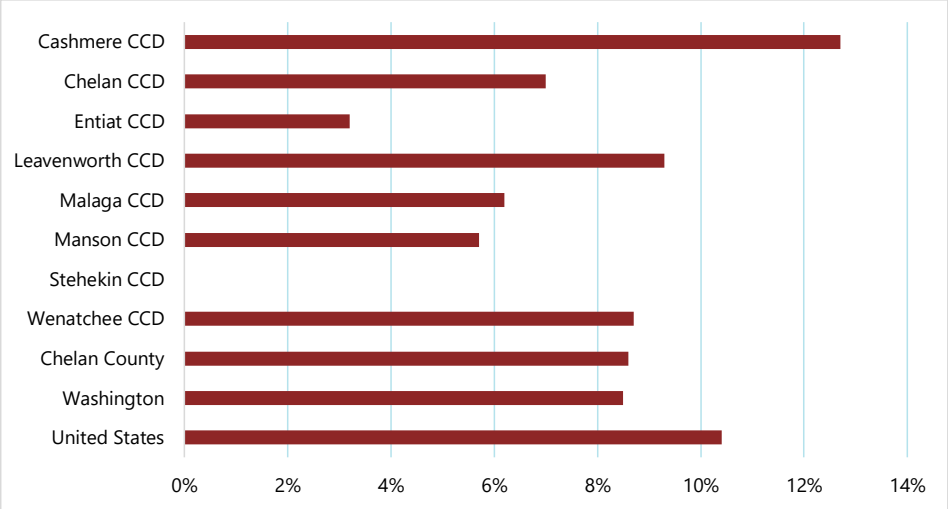

Figure 5-16
Percentage of Families in Poverty by Household Composition, 2023

Source: U.S. Census Bureau, 2023, 5-Year ACS, Table S1702

Seniors in Chelan County have a poverty rate nearly two percentage points lower (8.6%) than in the United States (10.4%). This varies across different regions of the County (Figure 5-17). The Cashmere CCD has the highest senior poverty rate at 12.7%.

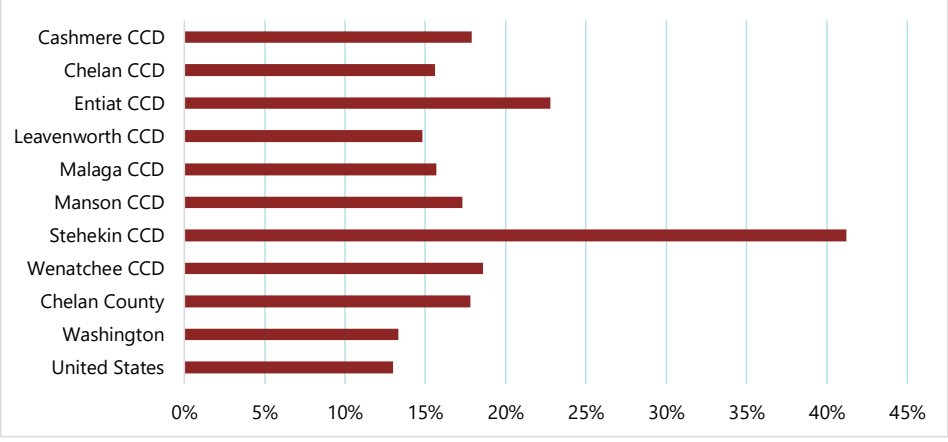
Figure 5-17
Percentage of Seniors (65 years+) in Poverty, 2023[12]

Source: U.S. Census Bureau, 2023, 5-Year ACS, Table S1702

Disabilities

Across all CCDs in Chelan County, the disability rate is higher than in the state or nation as a whole. The lowest is in the Leavenworth-Lake Wenatchee CCD at 14.8%, followed by the Chelan CCD at 15.6%. The highest disability rate is in Stehekin CCD at 41.2%, followed by Entiat CCD at 22.8% (Table 5-9 and Figure 5-18).

One family member's disability can place significant financial and caregiving burdens on an entire household, further impacting economic stability. These challenges are often worsened by a lack of affordable housing, which makes it even harder for families to find suitable and affordable living arrangements. To better serve this population, communities may need more accessible housing options, such as single-story homes or residences with ramps and other mobility-friendly features.



[12] Due to the rural nature of the Stehekin CCD, a large margin of error exists on the data. Therefore the actual value may be higher or lower than what is reported.

Table 5-9
Population with Disabilities, 2023

Region	Population with a Disability	Percentage with a Disability
Cashmere CCD	2,125	17.9%
Chelan CCD	1,129	15.6%
Entiat CCD	539	22.8%
Leavenworth-Lake Wenatchee CCD	1,116	14.8%
Malaga CCD	632	15.7%
Manson CCD	749	17.3%
Stehekin CCD	28	41.2%
Wenatchee CCD	7,701	18.6%
Chelan County	14,019	17.8%
Washington	1.0M	13.3%
United States	42.7M	13.0%

Veteran Population

Veterans have faced hardships in the housing market since the First World War. Reintegration into the economy can be challenging for some, often resulting in higher poverty rates and housing affordability issues. In addition, many veterans experience health complications after service. This can further undermine their economic stability. Given these challenges, ensuring access to affordable housing is essential.

In Chelan County, veterans make up 7.2% of the population (Table 5-10). This share is slightly lower than the state average (8.1%) but higher than the national rate (6.4%) and varies widely across different regions of the County.

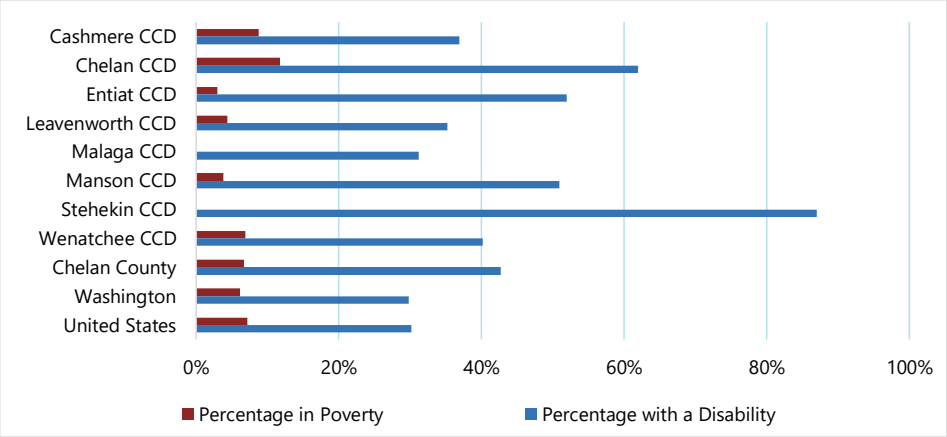

Table 5-10
Veteran Population, 2023

Region	Number of Veterans	Percentage of Veterans
Cashmere CCD	584	6.4%
Chelan CCD	529	8.8%
Entiat CCD	202	9.8%
Leavenworth CCD	523	8.1%
Malaga CCD	205	6.6%
Manson CCD	234	6.9%
Stehekin CCD	23	33.8%
Wenatchee CCD	2,097	6.7%
Chelan County	4,397	7.2%
Washington	0.5M	8.1%
United States	16.6M	6.4%

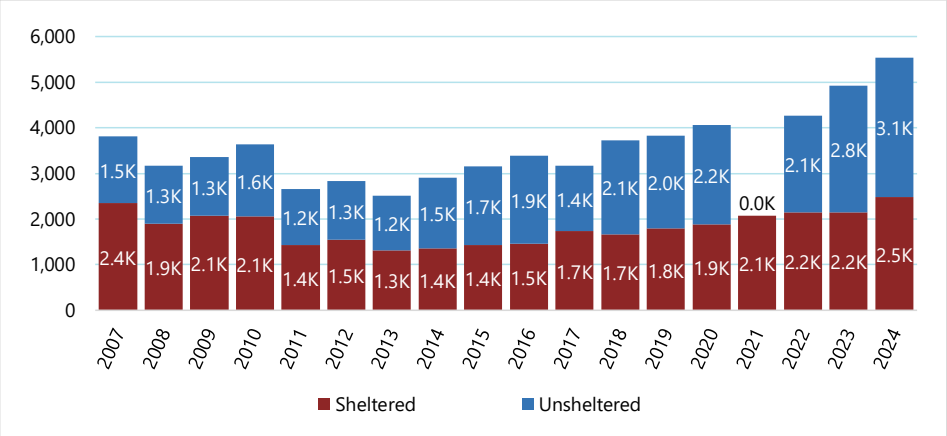
Source: U.S. Census Bureau, 2023, 5-Year ACS, Table S2101

Focusing on disabled veterans (Figure 5-19), Chelan County reports a veteran disability rate more than 10 percentage points higher than the state and national averages. Again, this varies across different regions of the County. Stehekin CCD ranks the highest at 87.0% and Malaga CCD the lowest at 31.2%.

Figure 5-19
Percentage of Veterans in Poverty and with Any Disability, 2023

Source: U.S. Census Bureau, 2023, 5-Year ACS, Table S2101

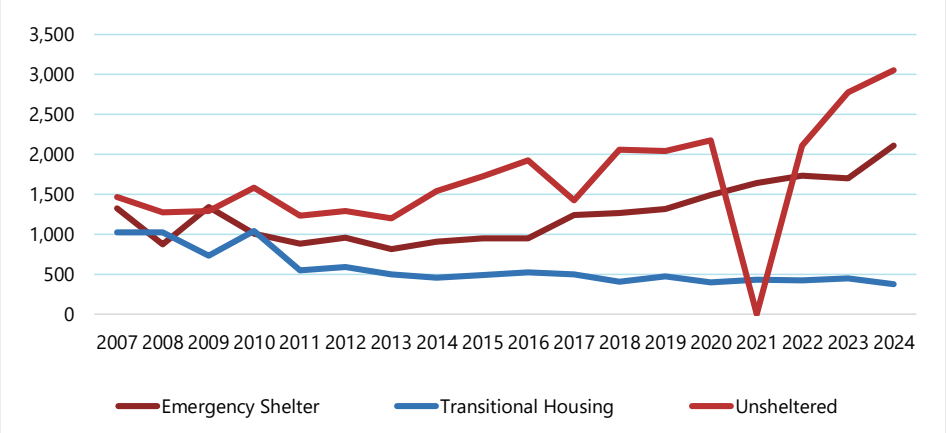
Homeless



Homelessness is inherently difficult to quantify, particularly in smaller cities and non-metropolitan areas. Individuals experiencing homelessness are often reluctant to disclose their situation. This means the actual extent of homelessness is likely more widespread than statistical analyses suggest.

Most efforts to measure homelessness rely on the HUD Point-in-Time (PIT) Count, which records the number of sheltered and unsheltered people experiencing homelessness on a single night in January each year. This count is conducted for the Washington Balance of State Continuum of Care (BOSCOC), which includes all Washington counties except Spokane, Snohomish, King, Pierce, and Clark (each of these counties maintains its own continuum of care). For Chelan County, the most detailed HUD PIT data available is therefore at the Balance of State level.

Because the PIT Count reflects only a single day each year, it does not fully capture the number of people experiencing homelessness over time. Improvements in counting methods have also likely contributed to higher reported numbers in recent years. Even so, 2024 marked the highest total number of homeless individuals recorded in the PIT Count over the past two decades for the Washington BOSCOC, with 5,538 individuals. Of these, 55.1% were unsheltered, while 44.9% were sheltered in emergency or transitional housing programs (Figure 5-20 and Figure 5-21).



It is worth noting that although January 2020 preceded the full impact of the COVID-19 pandemic, PIT Count efforts in January 2021 may have been affected by lockdowns and social distancing measures. This potentially resulted in a lower overall count that year.

Figure 5-20
PIT Homeless Count in the Washington BOSCOC, 2007–2024

Source: HUD 2007-2024 PIT Estimates by CoC

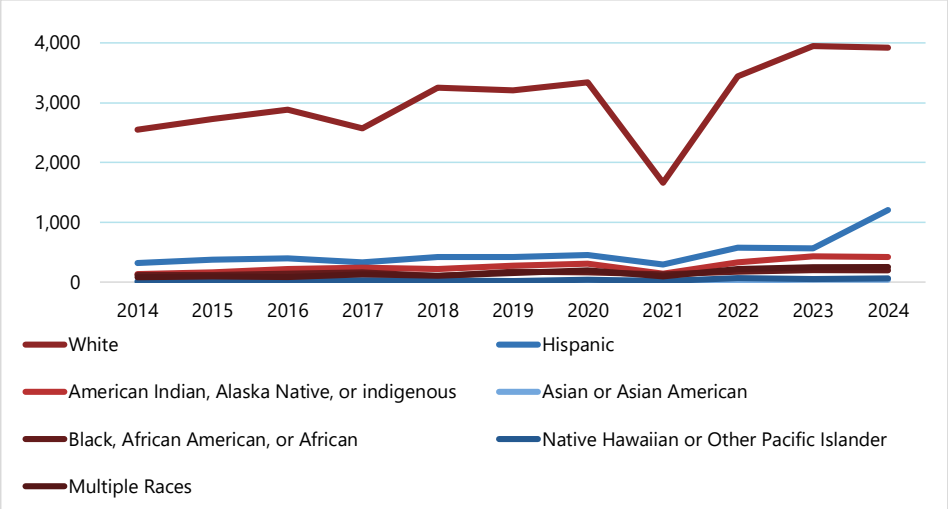


Figure 5-21
Shelter Type of Homeless in the Washington BOSCOC

Source: HUD 2007-2024 PIT Estimates by CoC

Among homeless individuals counted in the Washington BOSCOC, the Hispanic/Latino group has consistently been the second most represented group after White in every year of the past decade (Figure 5-22). In 2024, 19.8% of homeless individuals were identified as Hispanic/Latino (Table 5-11). This share is higher than in any other year since data collection on ethnicity began in 2014. The next highest level was recorded at 12.4% in 2021.

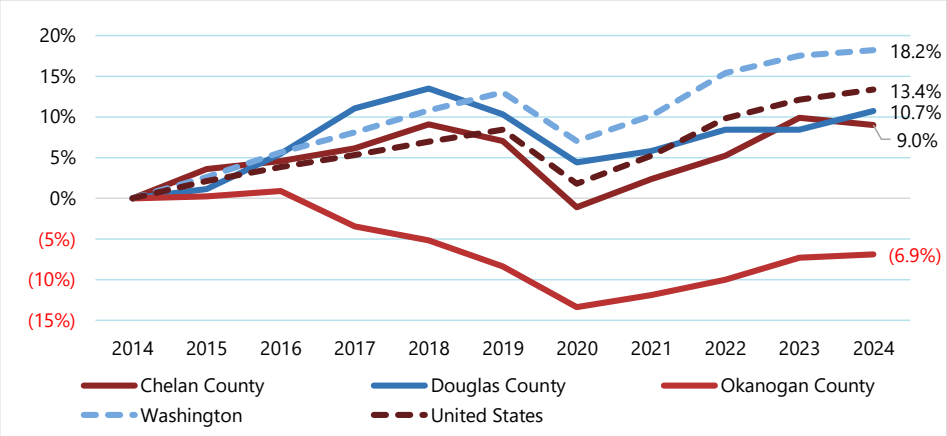
Economic Drivers

This section examines key drivers of local economies. Labor force growth and the establishment of new businesses are essential for economic development. Specific industries with higher levels of employment and wages often serve as powerful economic drivers, partly due to clustering effects. Clusters form when businesses in the same industry benefit from proximity.[13] This often enhances regional competitiveness.

Strong and expanding economic drivers also contribute to higher housing demand. Since individuals rely on employment and income to afford housing, overall job growth increases the need for additional housing. Differences in earnings create varying demands for housing types.

Labor Force, Earnings, and Establishments

Chelan County, along with Douglas and Okanogan counties, is part of the North Central Washington Economic Development District (NCWEDD). The organization's mission is to foster an innovative and resilient economy in the region through economic strategy development and planning, as well as by fostering collaboration with private and public entities.[14]



The following section analyzes employment, establishment, and wage growth rates in the NCWEDD counties from 2014 to 2024. We include state and national trends for comparison.

All regions have experienced employment growth since 2020, following the steep decline at the onset of the COVID-19 pandemic. Employment in Chelan and Douglas counties grew 9.0% and

[13] Joseph Cortright, "Making Sense of Clusters: Regional Competitiveness and Economic Development," The Brookings Institute, March 1, 2006, https://www.brookings.edu/articles/making-sense-of-clusters-regional-competitiveness-and-economic-development/.
[14] "Who We Are," NCW Economic Development District, April 18, 2023. https://ncwedd.com/who-we-are/.

10.7%, respectively, over the past decade. Growth in both of these counties was slower than the state and national averages. However, Chelan and Douglas counties grew much faster than Okanogan County during the same period (Figure 5-23).

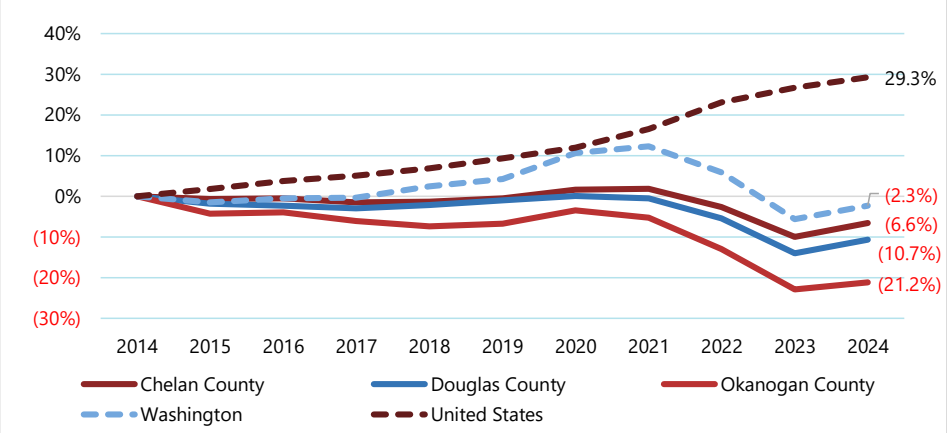


Figure 5-23
Cumulative Annual Employment Growth Rate, 2014–2024

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wages

In terms of total establishment growth, Washington has decreased overall over the past decade, particularly since 2021. Growth began to rebound in 2023. This trend is also reflected in the NCWEDD counties. Among these counties, Chelan County experienced the smallest decline, decreasing only 6.6% since 2014. By comparison, the United States saw growth of 29.3% over the same period (Figure 5-24).

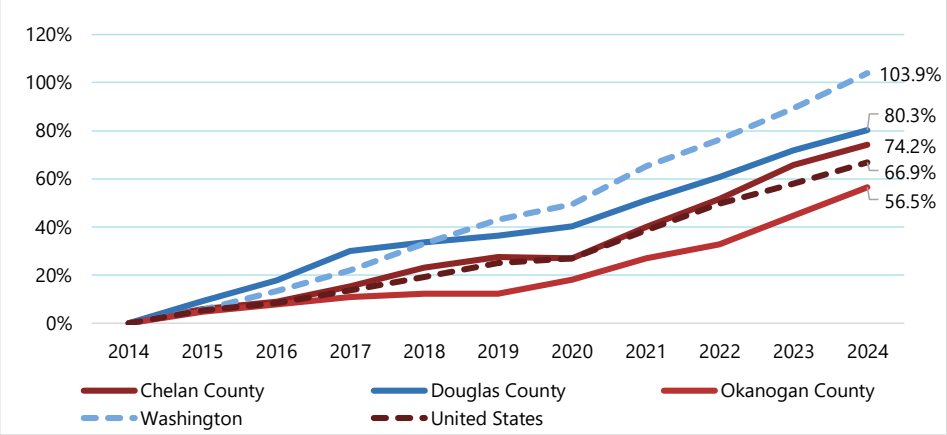

Figure 5-24
Cumulative Annual Establishments Growth Rate, 2014–2024

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wages

By contrast, total wages in all NCWEDD counties have increased over the past decade. Washington overall has grown even faster, more than doubling during this period. While not quite as rapid as the state, wage growth in both Chelan and Douglas counties has outpaced the national average (Figure 5-25).

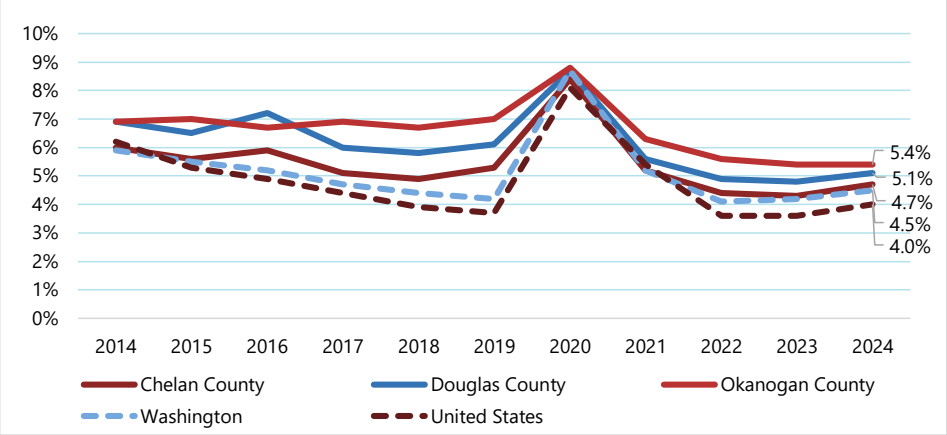

Figure 5-25
Cumulative Annual Total Wages Growth Rates, 2014–2024

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Figure 5-26 illustrates the annual unemployment rate over the same period. All NCWEDD counties followed trends similar to the state and nation, peaking in 2020 and rapidly declining by 2022. Chelan County has the lowest unemployment rate among the three counties and most closely aligns with the state and national levels.

Figure 5-26
Annual Rate of Unemployment, 2014–2024

Source: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

Employment by Industry

Examining employment data by industry helps identify the employment clusters in a region. Clusters often necessitate different types of housing to accommodate workers in particular industries. For instance, many health care workers follow rotating or traveling schedules, spending only a few weeks or months in one location. They may not need a long-term residence. In contrast, local government employees typically prefer to live near their workplace and require permanent housing. Additionally, different industries offer varying income levels, so workers in some sectors can generally afford more expensive housing than those in others. Overall, employment by industry contributes to housing demand in Chelan County.

As shown in Table5-12, the three largest industries by employment in Chelan County are Health Care & Social Assistance (16.3%), Retail Trade (10.8%), and Agriculture, Forestry & Fishing (8.6%)

Location quotients (LQs) compare the relative concentration of industries in an area to the national average. For example, Finance & Insurance accounts for about 2.5% of employment in Chelan County and has and LQ of 0.51. This means that Chelan's share of Finance & Insurance employment is roughly half the national share of about 5%. Agriculture, Forestry & Fishing has the highest LQ in

Chelan County at 7.99, followed by Utilities at 2.09. These high LQs suggest that these industries form significant employment clusters in Chelan County relative to the national average.

Table5-12
Employment by Industry in Chelan County, 2025

Industry	% Employment	LQ
Agriculture, Forestry & Fishing	8.6%	7.99
Mining, Quarrying, Oil & Gas	0.2%	0.62
Construction	6.8%	0.97
Manufacturing	4.2%	0.44

Public Administration	4.7%	0.94

Source: Esri Business Analyst 2025

Table 5-13 compares Chelan County's employment by industry with that of Washington state and the United States. Notably, Chelan County has a much higher concentration of employment in Agriculture, Forestry & Fishing (8.6%) than the state average (2.1%), but only about half the concentration of Manufacturing employment (4.2%) compared to Washington (8.8%).

Household Income

Household income is a critical factor in housing demand and influences affordability. Lower-income households struggle to afford today's high housing costs, while higher-income households have greater financial flexibility. Consequently, regions with higher income levels tend to experience higher housing costs, and vice versa.

Figure 5-27 shows the distribution of household incomes in Chelan County compared to Washington state and the United States. Chelan County has a higher concentration of households earning less than $50,000 and a much smaller share earning over $200,000 compared to Washington. Overall, however, Chelan County's income distribution is generally similar to the national average.

shows the distribution of household incomes in Chelan County, compared to Washington and the United States. Chelan County has a higher concentration of households earning less than $50,000 and a much smaller share earning over $200,00 compared to Washington. However, Chelan County's income distribution is generally similar to the national average.

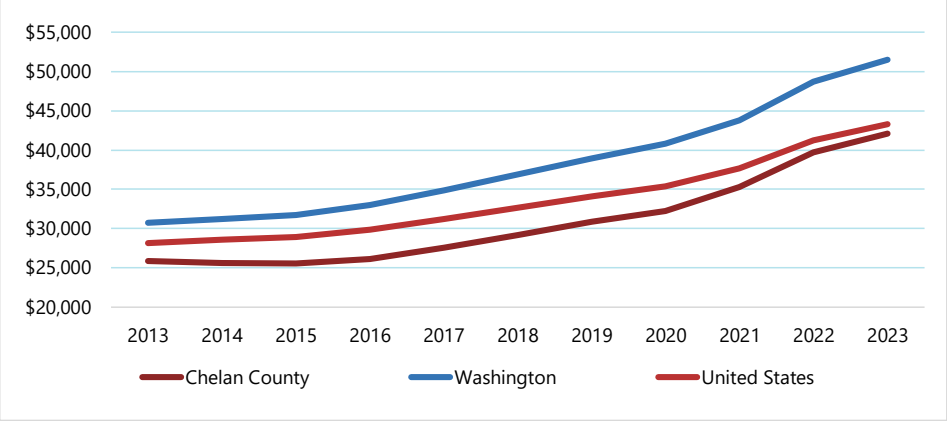

Figure 5-27
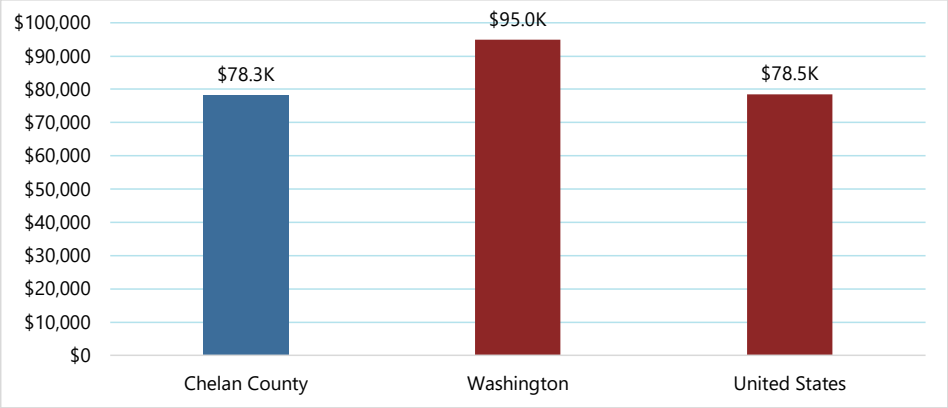
Distribution of Household Income, 2025

Source: Esri Business Analyst, 2025

Per capita income measures the average income per person within a region and is useful for comparing wealth and assessing economic well-being. Figure 5-28 shows per capita income trends from 2013 to 2023. Since 2014, all regions have experienced growth, indicating overall economic expansion and suggesting that this upward trend may continue in the near future.

Figure 5-28
Per Capita Income, 2013–2023



Source: U.S. Census Bureau, 2013-2023 5-Year Estimates, Table B19301

While a region's income distribution shows the full range of income levels and per capita income reflects overall economic growth or decline, median household income provides a snapshot of how a typical household compares to those in other regions (Figure 5-29). Median household income measures all sources of income: wages, investments, rents, pensions, and transfer payments. This metric measures the income which 50% of households in Chelan are below and 50% are above.

In Chelan County, the median household income is $78,300. This is very close to the national average of $78,500 but nearly $17,000 lower than Washington state's median. Generally, lower household incomes are associated with lower overall housing demand in a region.

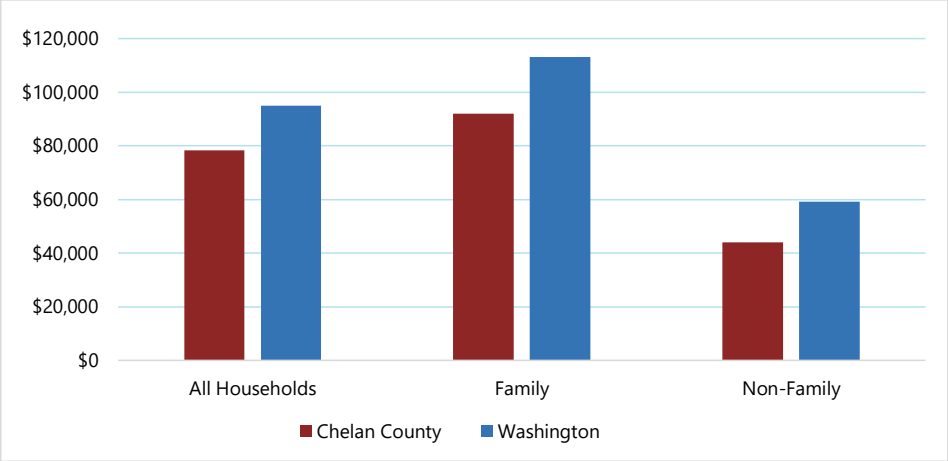


Figure 5-29
Median Household Income, 2023

Source: U.S. Census Bureau, ACS 5-Year Estimates, Table S1901

Figure 5-30 highlights the income difference between family and non-family households. On average, family households earn more than non-family households, largely because they are more likely to have dual earners. In Chelan County, family households earn more than twice the income of non-family households.

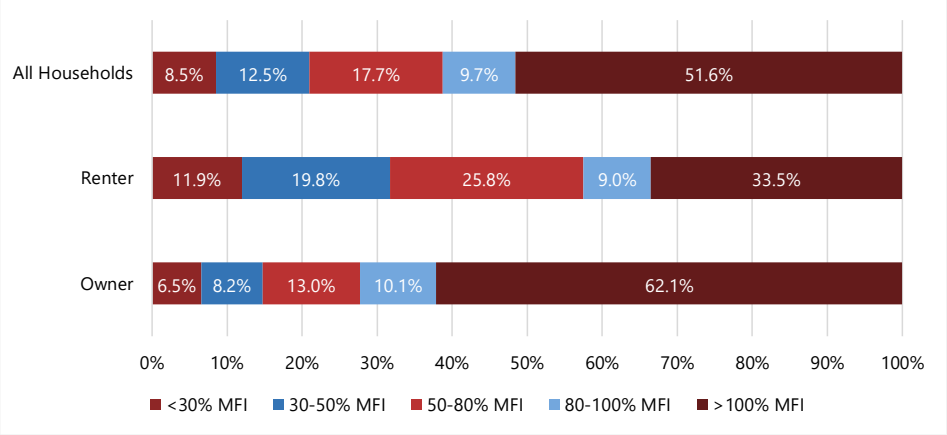

Figure 5-30
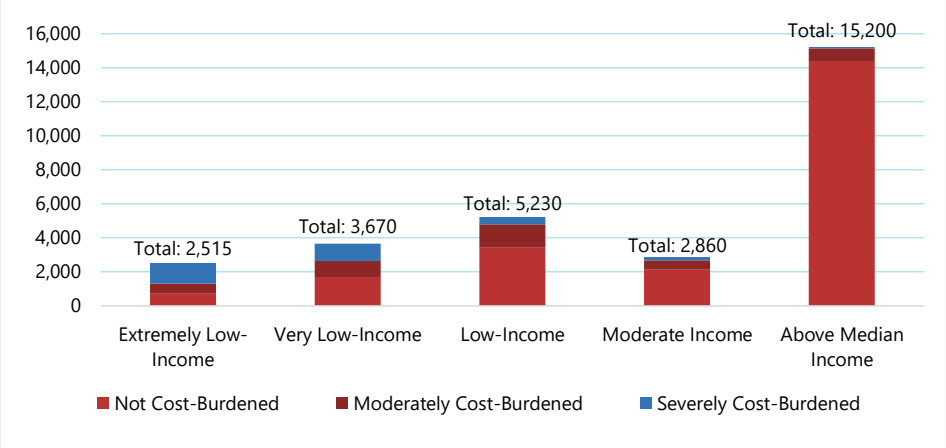
Median Household Income by Household Type, 2023

Source: U.S. Census Bureau, ACS 5-Year Estimates, Table S1901

The U.S. Department of Housing and Urban Development (HUD) calculates the Area Median Family Income (MFI) as a benchmark for comparing income levels within a region. Figure 5-31 illustrates the distribution of renter- and owner-occupied households by income level using this metric. Overall, 8.5% of households in Chelan County are classified as Extremely Low-Income (<30% MFI), and 12.5% as Very Low-Income (30–50% MFI). Renters are more likely than owners to fall into all low-income categories (Extremely Low-Income, Very Low-Income, and Low-Income). At the higher end of the spectrum, 51.6% of all households have incomes above the median, including 62.1% of owner households and 33.5% of renter households.

Figure 5-31
Percentage of Households by Tenure & Income Level, Chelan County, 2021



Source: HUD Comprehensive Housing Affordability Strategy Data, 2017-2021

Cost-Burdened Households

Housing cost-burden is a key indicator of affordability in a community. A household is considered cost-burdened if it spends more than 30% of its income on housing, leaving less for necessities such as food, healthcare, and education. Cost-burdened households also face a higher risk of displacement if their circumstances change.

Figure 5-32 illustrates the prevalence of cost-burdened households by income level. While households in all AMI groups experience some cost burden, those with incomes below the AMI have a much higher concentration of cost-burdened households. We observe the highest concentration among Extremely Low-Income households.

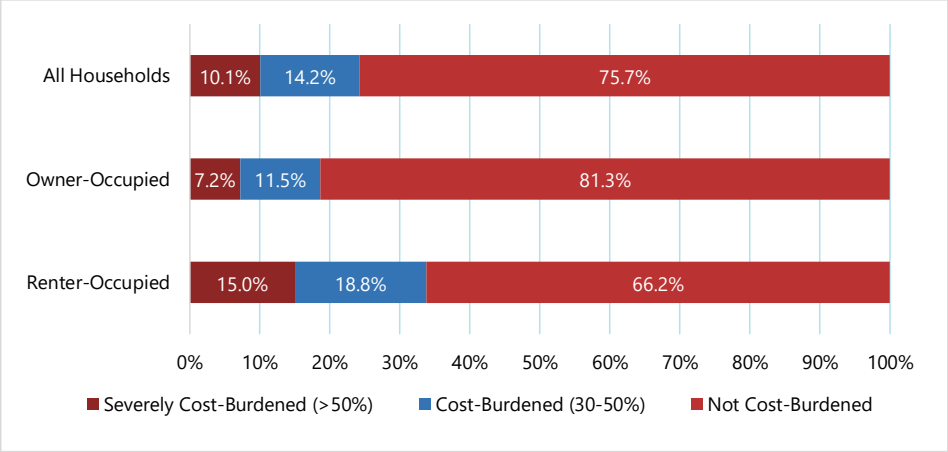


Figure 5-32
Cost Burden Status of Households by AMI, Chelan County, 2021

Source: Housing & Urban Development Comprehensive Housing Affordability Strategy Data, Table 7, 2017-2021

Figure 5-33 compares renter- and owner-occupied households. Renters experience a higher overall rate of cost burden (33.8% versus 18.7%) and are also more likely to be severely cost-burdened (15.0% versus 7.2%).

Figure 5-33
Percentage of Cost-Burdened Households by Tenure, Chelan County, 2021

Source: Housing & Urban Development Comprehensive Housing Affordability Strategy Data, Table 7, 2017–2021

Although cost-burdened households exist at all AMI levels, the majority earn less than 50% of AMI. Small families are the most at risk, followed by seniors living alone (Figure 5-34).

Figure 5-34
Cost-Burdened Households by Household Type & AMI, Chelan County, 2021

Household Type	<30% AMI	30–50% AMI	50–80%AMI	80–100% AMI	>100% AMI	All Income Levels

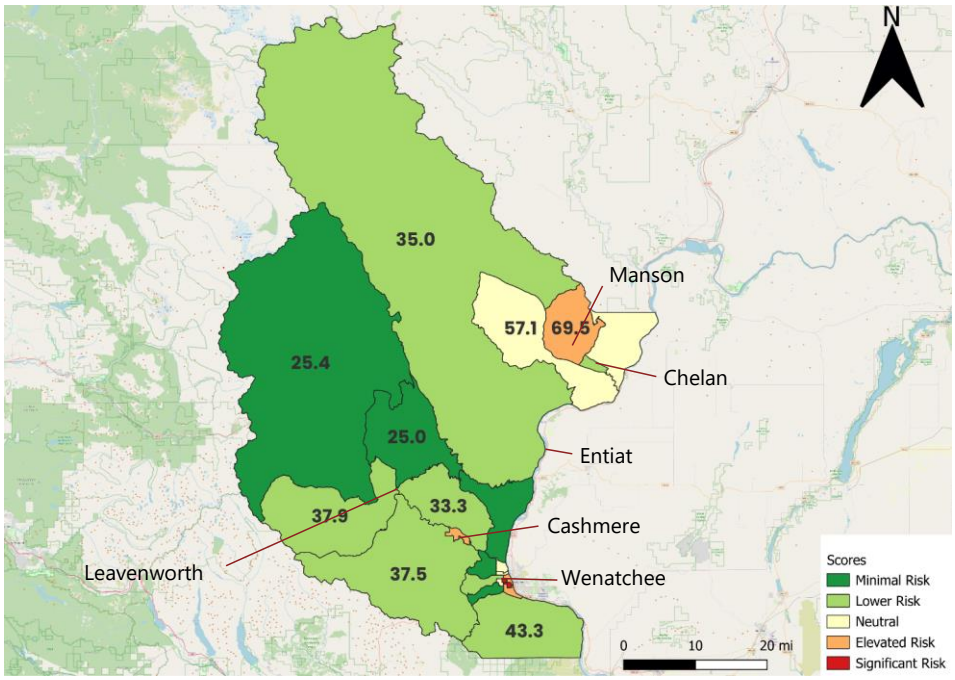
Displacement Risks

Displacement risks highlight which communities are more vulnerable to being forced out due to factors such as rising housing costs, uneven wealth distribution, and racial and ethnic inequities. These disparities disproportionately affect minority groups (largely due to a history of discrimination and systemic oppression in the United States). Risks become especially pronounced when communities face natural disasters, such as wildfire or flooding.[15] Overall, identifying which areas are at a higher risk of displacement helps policymakers and planners proactively design strategies that protect communities and ensure growth benefits existing residents.

To assess displacement risks for homeowners in Chelan County, the PC team complied statistics for local census tracts and compared them to state and national averages. We then applied a percentile-based scoring methodology and ranked each tract by percentile for each variable. This allowed for direct comparisons across tracts. We then averaged these percentiles (ranging from 0 to 100) to generate a composite risk score for each tract. A score of 100 indicates that a tract ranks highest across all displacement-related factors compared to other tracts.

Chelan County contains 23 census tracts. To provide a larger basis for comparison, we analyzed these tracts against the County as a whole, the state of Washington, and the United States. We then developed the displacement risk model using the following statistics:



- Population 25+ with no diploma
- Population with disabilities
- Single parents
- Age 5+ with limited English
- Racial/Ethnic status
- Occupied units with more people than rooms (overcrowding)
- Housing cost-burdened units occupied by households with an annual income less than $75K
- Persons below 150% poverty estimate
- % renter-occupied households
- % of housing stock built prior to 1970

Figure 5-35 presents the findings of the County's displacement risk study. Most rural areas have relatively low displacement risk scores. The only cities with tracts showing elevated risk are

[15] Ther W. Aung and Ashwini R. Sehgal, "Prevalence, Correlates, and Impacts of Displacement Because of Natural Disasters in the United States from 2022 to 2023," American Journal of Public Health 115 (2025): 55-65, https://doi.org/10.2105/AJPH.2024.307854.

Cashmere, Chelan, and Wenatchee, with Wenatchee containing the highest-risk tracts in the County. Manson, an unincorporated UGA, also exhibits higher-than-average displacement risks.

Figure 5-35
Displacement Risk in Chelan County

Assessing Racially Disparate Impacts

The diversity in Chelan County has largely remained unchanged over the past five years. The concentration of white residents decreased by 1.9% while Hispanic, Black, American Indian, Other Race, and Two or More Races each increased by one percentage point or less (Table 5-15). This could be a signal that there are not many barriers to housing pushing residents of color out of Chelan County.

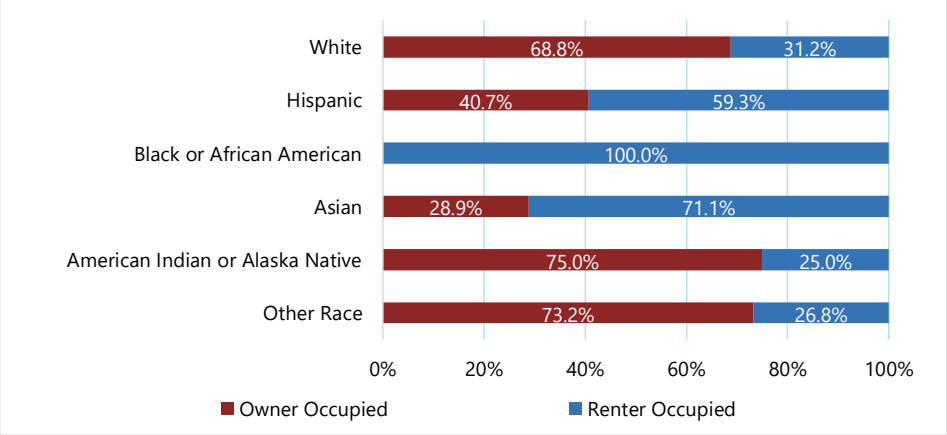

Table 5-15
Change in Race/Ethnicity Concentration, Chelan County

Race/Ethnicity	2023	2018	Change
White	66.2%	68.1%	-1.9%
Hispanic or Latino	28.4%	27.8%	0.6%
Black or African American	0.5%	0.4%	0.1%
American Indian and Alaska Native	0.7%	0.6%	0.1%
Asian	0.8%	1.0%	-0.2%
Native Hawaiian and Other Pacific Islander	0.1%	0.1%	0.0%
Some Other Race	0.4%	0.0%	0.4%
Two or More Races	2.9%	1.9%	1.0%

Source: U.S. Census Bureau, ACS 5-Year, 2018 & 2023

Chelan County is home to about 18,590 owner-occupied households and 10,880 renter-occupied households. American Indian or Alaska Native residents have the largest concentration of home-owners at 75.0% (Figure 5-36). This is followed by the Other Race category, which is 73.2% homeowners, and the White category at 68.8%. The only group that has no homeowners is the Black or African American group which makes up 0.5% of the County's population.

Figure 5-36
Tenure by Race/Ethnicity, Chelan County

Source: HUD Comprehensive Housing Affordability Survey, 2017-2021, Table 9

Table 5-16 displays the breakdown of cost-burden by race and tenure. Overall, only 18.7% of owner-occupied households are cost-burdened while 33.8% of renter-occupied households are. Therefore groups that rent more tend to be more at risk for cost-burden and the instability that can be caused by that. Among renter-occupied white households 34.4% spend over 30% of their income on rent compared to 79.0% of Black or African American households but only 32.8% of Hispanic or Latino households.

Table 5-16
Cost-Burden by Race/Ethnicity, Chelan County

	White	Black or African American	Asian	American Indian or Alaska Native	Hispanic or Latino	Other Race
Owner-Occupied Households						
Not Cost-Burdened	80.0%	-	93.8%	97.0%	80.7%	92.1%
Moderately Cost-Burdened	11.3%	-	6.3%	3.0%	13.4%	7.9%
Severely Cost-Burdened	7.7%	-	0.0%	0.0%	5.5%	0.0%
Not Computed	1.0%	-	0.0%	0.0%	0.4%	0.0%
Total	15615	0	64	134	2275	505
Renter-Occupied Households						
Not Cost-Burdened	64.9%	21.1%	84.9%	91.8%	67.2%	84.2%

Total	7085	95	159	49	3305	184

Source: HUD Comprehensive Housing Affordability Survey, 2017-2021, Table 9

Income distribution helps to complete the picture of economic differences among racial groups in Chelan County. Overall, in the County, 50.9% of households make over 100% AMI. Comparatively,

55.9% of white households, 75.9% of Asian households, 62.8% of American Indian or Alaska Native households, 30.1% of Hispanic households and 0% of Black or African American households make over 100% AMI. These metrics suggest that, although Chelan County continues to maintain its diversity, there are some differences in quality of life between different racial groups in the county.

Figure 5-37
Distribution of Households by Income and Race/Ethnicity, Chelan County

Commuter & Transportation Data

Data on commuters and transportation are valuable tools for determining housing demand patterns in different regions. If local workers struggle to find affordable housing, they may choose to live in nearby towns and commute to work.

Commuting patterns are shown in Table 5-17 and Figure 5-38. According to the Census Bureau's OnTheMap database, 47.5% of Chelan County workers live outside the County. The largest share commute from nearby Douglas County (21.0%), followed by 4.3% from Grant County. Additionally, 45.0% of residents work outside the County, with 14.5% commuting to King County and 8.9% to Douglas County.

Table 5-17
Commuting Patterns, 2022

Where Chelan Residents Work		Where Chelan Workers Live	
Location	**Percentage**	**Location**	**Percentage**
Chelan County, WA	55.0%	Chelan County, WA	52.5%
King County, WA	14.5%	Douglas County, WA	21.0%
Douglas County, WA	8.9%	Grant County, WA	4.3%
Snohomish County, WA	3.8%	King County, WA	2.7%
Yakima County, WA	3.4%	Okanogan County, WA	2.2%
Grant County, WA	2.9%	Yakima County, WA	1.7%
Okanogan County, WA	1.7%	Snohomish County, WA	1.4%
Pierce County, WA	1.6%	Pierce County, WA	1.3%
Spokane County, WA	1.6%	Spokane County, WA	1.2%
Benton County, WA	0.9%	Benton County, WA	1.0%
All Other Locations	5.8%	All Other Locations	10.7%

Source: U.S. Census Bureau, OnTheMap, 2022

Overall, approximately 42,000 workers are employed in Chelan County. Just under half are in-commuters from other counties, representing potential opportunities for Chelan County to capture in its housing market (Figure 5-38). In contrast, just under 18,000 residents are employes elsewhere. This reflects employment leakage for the County. Nearly 22,000 workers both live and work in Chelan County.

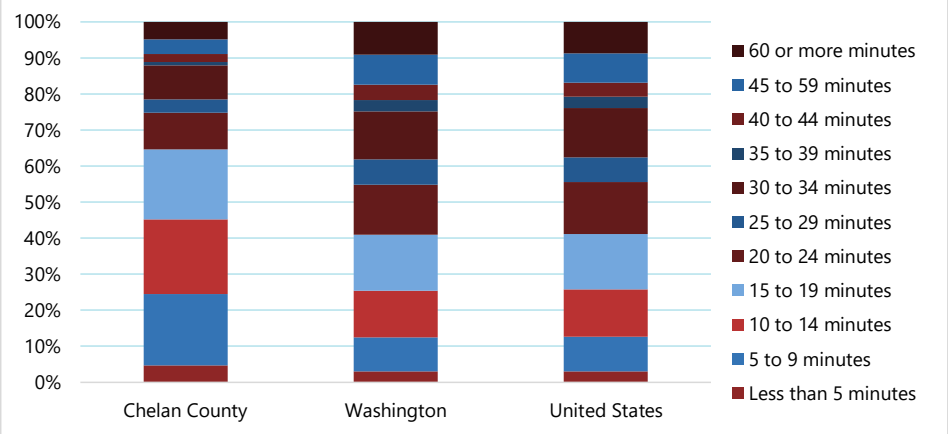

Figure 5-38
Commuter Inflow and Outflow from Chelan County, 2022

Source: U.S. Census Bureau, OnTheMap, 2022

Figure 5-39 compares Chelan County's travel times to work with those of the state and nation. Chelan County reports shorter commutes, averaging 22.9 minutes. This is about five minutes less than the state and national averages of 27.2 minutes.

Figure 5-39
Travel Time to Work by Region, 2023

Source: U.S. Census Bureau, 2023 5-Year Estimates, Table B08012

A different commuting trend has emerged over the past five years: not commuting at all. Working from home (WFH) became widespread in 2020 during COVID-19 lockdowns as companies sought to maintain productivity. Table 5-18 shows this trend from 2019 through 2023. In Chelan County, the share of WFH workers increased 30.3%. While significant, this growth is modest compared to state and national trends, both of which saw the share of WFH workers more than double over the same period.

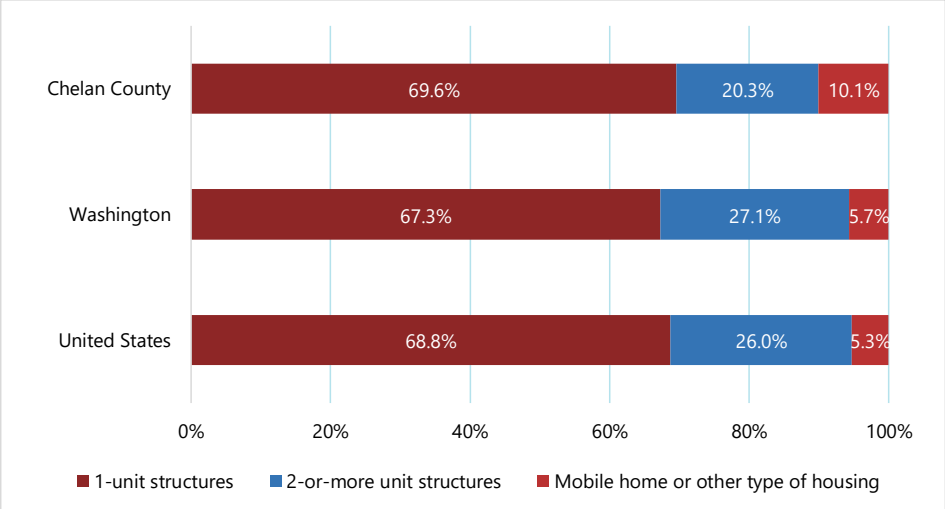
Table 5-18
Work From Home Trends, 2019–2023

Region	% of Workers WFH, 2019	% of Workers WFH, 2023	% Change
Chelan County	6.6%	8.6%	30.3%
Washington	6.1%	17.7%	190.2%
United States	5.2%	13.5%	159.6%

Source: U.S. Census Bureau, 2019 and 2023 5-Year Estimates, Table S0801

V. Housing Trends

Building Types & Tenures



This chapter focuses on trends in housing. Table 5-19 and Figure 5-40 provide an overview of Chelan County's housing stock, with comparative statistics for Washington and the nation. Detached single-family homes dominate the housing stock across all observed geographies, accounting for 67.1% of Chelan's total housing. Notably, Chelan has nearly twice the concentration of mobile homes and other non-traditional housing types compared to the state and nation.

Table 5-19
Housing Stock Type, 2023

	Chelan County		Washington		United States	
	#	%	#	%	#	%
Occupied units	30,825	--	3.0M	--	127.5M	--
1, detached	20,670	67.1%	1.9 M	62.8%	79.6M	62.5%
1, attached	763	2.5%	135,401	4.5%	8.1M	6.3%
2 apartments	1,062	3.4%	66,740	2.2%	4.1M	3.3%
3 or 4 apartments	1,473	4.8%	105,059	3.5%	5.4M	4.2%
5 to 9 apartments	624	2.0%	131,839	4.4%	5.6M	4.5%
10 or more apartments	3,116	10.1%	512,139	17.0%	17.8M	14.0%
Mobile home or other type	3,117	10.1%	172,079	5.7%	6.7M	5.3%

Source: U.S. Census Bureau, 2023 5-Year Estimates, Table S2504

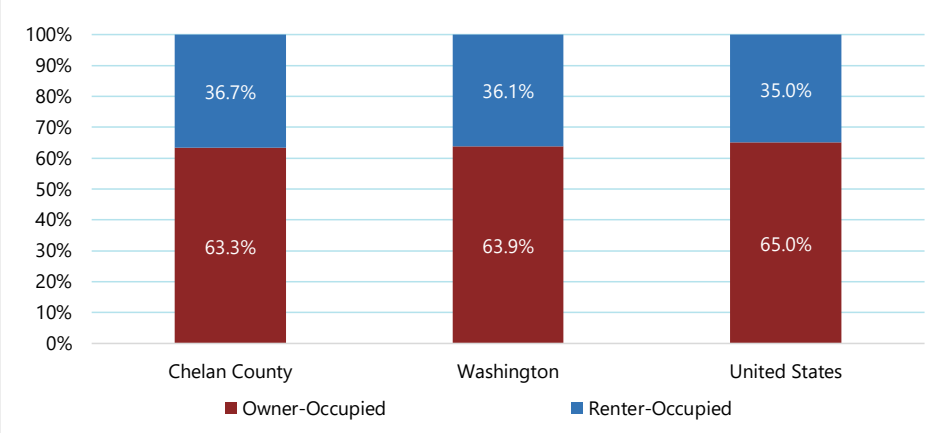


Figure 5-40
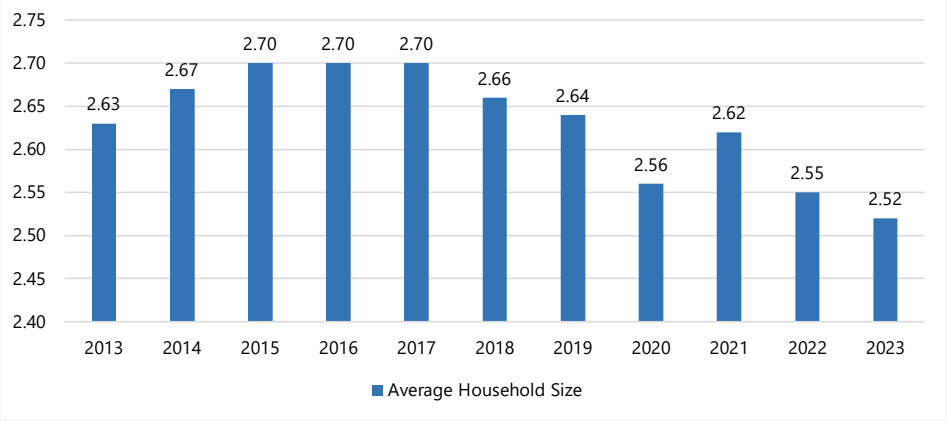
Percentage of Housing Units by Type

Source: U.S. Census Bureau, 2023 5-Year Estimates, Table S2504

Another way to analyze the housing supply is by examining owner- versus renter-occupied units. Nationally, homeownership is roughly split 65% to 35% (Figure 5-40). Both Washington and Chelan County largely follow this pattern, though they have slightly higher shares of renter-occupied homes.

Figure 5-40
Owner-Occupied and Renter-Occupied Homes



Source: U.S. Census Bureau, 2023 5-Year Estimates, Table S2504

Household Tenure and Size

Household size often influences decisions about whether to buy or rent housing. Figure 5-41 shows the average household size in Chelan County over time, while Figure 5-42 presents the distribution of household sizes within the County. Between 2013 and 2015, the average household size rose to 2.70 people per household before plateauing and decreasing down to 2.52 in 2023. By comparison, the average household size in the United States was 2.54 in 2023.

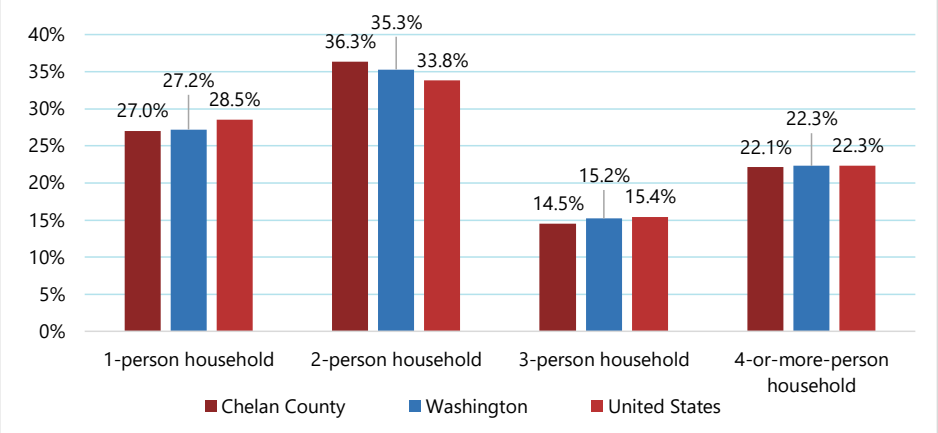


Figure 5-41
Average Household Size in Chelan County, 2013–2023

Source: U.S. Census Bureau, American Community Survey, B25010 5-year estimates, 2013-2023

The largest share of Chelan County residents (36.3%) live in two-person households (Figure 5-42). This is slightly higher than the state and national averages, but overall, Chelan County's household size distribution closely mirrors that of the state and nation.

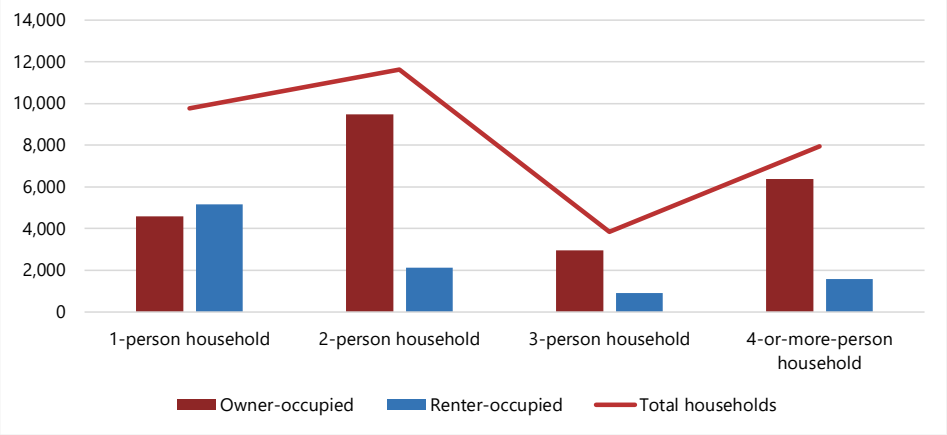

Figure 5-42
Households by Size in Chelan County, 2023

Source: U.S. Census Bureau, American Community Survey, S2501, 5-year estimates, 2023

Figure 5-43 illustrates owner- versus renter-occupancy by household size. Notably, one-person households are predominantly renter-occupied, whereas two-, three-, and four-or-more-person households are mostly owner-occupied.

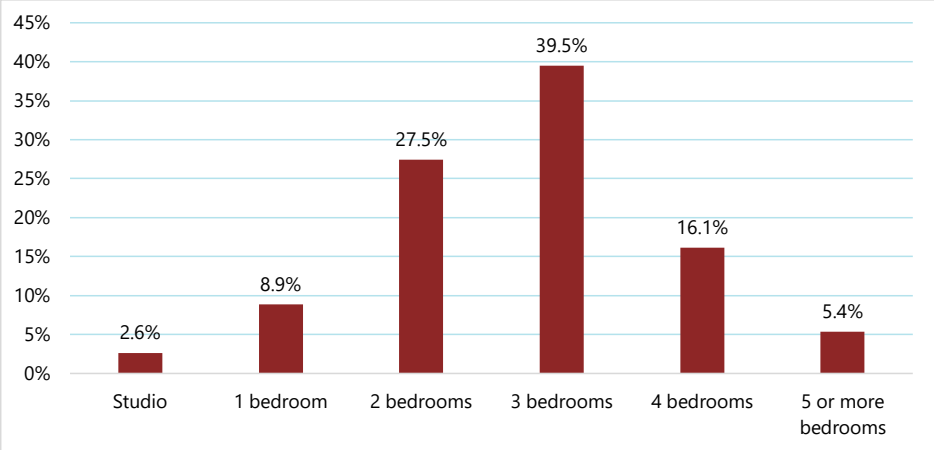

Figure 5-43
Household Size by Tenure in Chelan County, 2023

Source: U.S. Census Bureau, American Community Survey, S2501, 5-year estimates, 2023

While 63.3% of households in Chelan County consist of one or two people (Figure 5-42), only 8.9% of housing units have one bedroom and 27.5% have two bedrooms (Figure 5-44). The most common unit size is three bedrooms, comprising 39.5% of the housing stock.

Figure 5-44
Housing Units by Number of Bedrooms in Chelan County, 2023

Source: U.S. Census Bureau, 2023 5-Year Estimates, Table B25042

Group Housing

Across the United States, 2.5% of the population resides in group housing (Table 5-20). This includes institutionalized populations, such as those in correctional facilities or nursing homes, as well as noninstitutionalized populations, such residents of college dorms or military quarters. In Chelan County, the share is slightly lower, at 2.1% of the population.

Table 5-20
Group Housing and Care Facilities Population, 2020

Category	Chelan County	Washington	United States
% of Population in Group Housing	2.1%	2.1%	2.5%
Institutionalized population	825	55,485	3.8M
Correctional facilities for adults	247	26,677	2.0M
Juvenile facilities	15	1,532	88,115
Nursing/Skilled-nursing Facilities	563	25,856	1.6M
Other institutional facilities	0	1,420	70,943
Noninstitutionalized population	829	104,722	4.5M

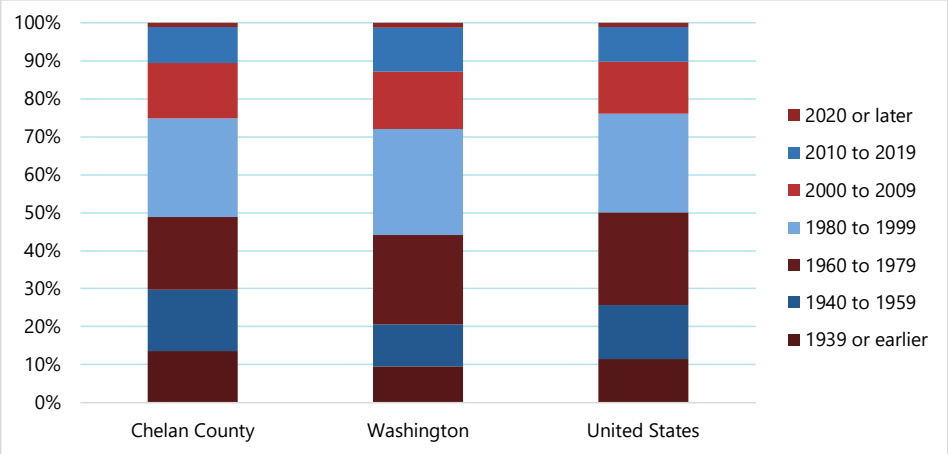
Military quarters	0	16,811	328,372
Other noninstitutional facilities	829	46,820	1.4M



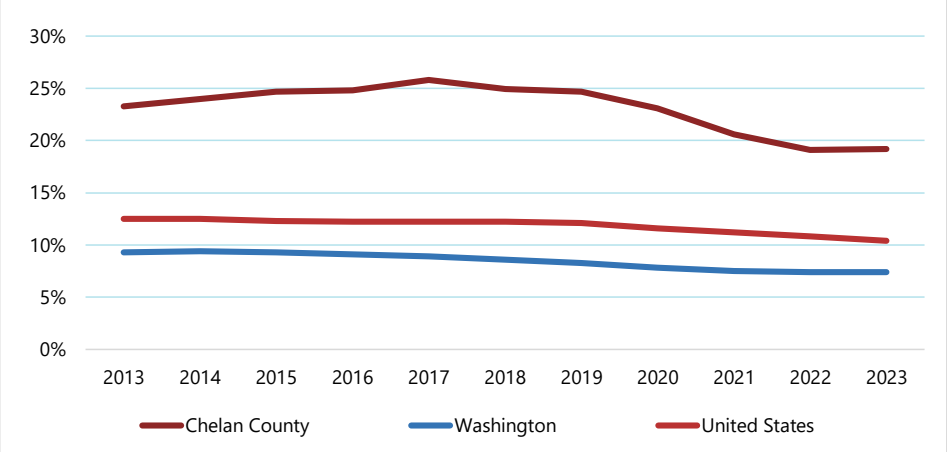
Source: U.S. Census Bureau, 2020 Decennial Census, Table P5

Housing Stock & Occupancy Rates

The age of a region's housing stock provides insight into both the physical condition of homes and their maintenance needs. Older homes require more upkeep, making housing age a key factor in long-term sustainability.

Nationally, about half of all homes (49.9%) were built after 1980 (Figure 5-45). This trend is mirrored in Chelan County, where 51.0% of homes were constructed after 1980. Notably, Chelan County has a larger share of homes built before 1960 (29.7%), but a smaller share built between 1960 and 1999. This suggests it experienced less of a mid-century housing boom than Washington or the United States. More recently, Chelan County has seen modest growth in homes built after 2010. This likely reflects population inflows. A combination of older housing, fewer mid-century homes, and recent new development may contribute to market pressures, including demand for rehabilitation of older homes and limited availability of moderately priced options.

Figure 5-45
Age of Housing Stock, 2023



Source: U.S. Census Bureau, 2023 ACS 5-Year Estimates, Table DP04

Vacancy rates reflect the balance of supply and demand in a real estate market. Figure 5-46 shows how vacancy rates in Chelan County have fluctuated over time, alongside state and nationwide trends. Chelan County's vacancy rates have consistently remained much higher than those in Washington or the United States overall. In 2023, the County's vacancy rate was 19.2%, down from 23.1% in 2020, but still far above the state rate of 7.4%.

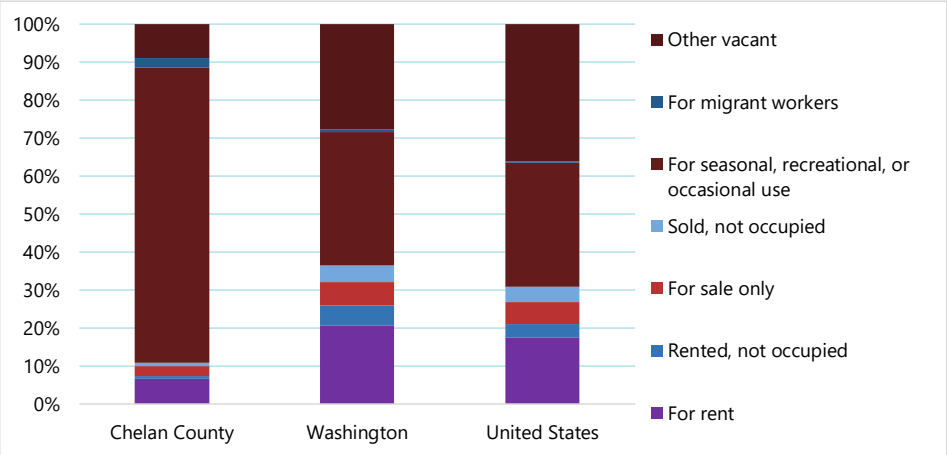


Figure 5-47 further breaks down the types of vacancies, revealing that a large share in Chelan County (77.6%) is tied to seasonal, recreational, or occasional use. This pattern is consistent with the area's strong tourist economy.

Figure 5-46
Vacancy Rates over Time, 2013–2023

Source: U.S. Census Bureau, 2013-2023 5-Year Estimates, Table DP04

Figure 5-47
Vacancy Status of Housing Units, 2023

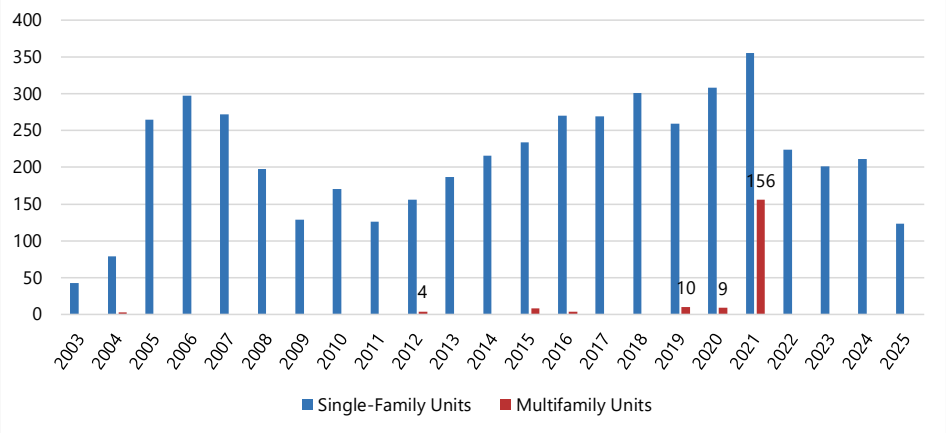
New Housing Production



Since 2011, housing permits in Chelan County have generally increased, though production has been inconsistent. This is especially true for multifamily housing (MFH). Single-family home (SFH) permits rose steadily and peaked in 2021, likely driven by pandemic-era migration trends favoring more space and remote work (Figure 5-48). By contrast, MFH development has been minimal, with only 18 permits issued between 2012 and 2025. These permits account for 194 MFH units, 156 of which were approved in 2021 alone (Figure 5-49). While this represents progress, it remains insufficient to address the County's housing shortage. Limited multifamily construction continues to constrain affordability as supply lags behind growing demand.

Figure 5-48
Total Housing Permits, Chelan County, 2003–2025

Home Value Trends

From 2014 to 2024, median home values in Chelan County have more than doubled, rising 150.0% from $241,025 to $602,450 (Figure 5-50). This increase slightly outpaces statewide growth of 143.4% over the same period. Figure 5-50 also compares this trend to growth in Area Median Income (AMI). Between 2014 and 2023, Median Household Income in Chelan County grew 53.9%. This is only about one-third the rate of housing value growth.

[16] According to county planners, the record is unclear on how many units were built from a 2020 application (either nine or 10).

Figure 5-50
Median Home Value and Median Household Income Cumulative Annual Growth, 2014–2024

Source: University of Washington, State's Housing Markey 2025 Q1 & U.S. Census Bureau, ACS Table S1901

Table 5-21 portrays the year-over-year change from 2023 to 2024 in similar metrics. The median home sale price rose 10.1% in the past year, while the number of home sales increased only 7.3%.

Table 5-21
Residential Home Sales in Chelan County

Metric	2023	2024	Change	% Change
Median Home Sale Price	$550,000	$605,400	$55,400	10.1%
Home Sales	710	762	52	7.3%
Active Listings	149	155	6	4.0%
Months of Supply	2.8	3.1	0.3	10.7%

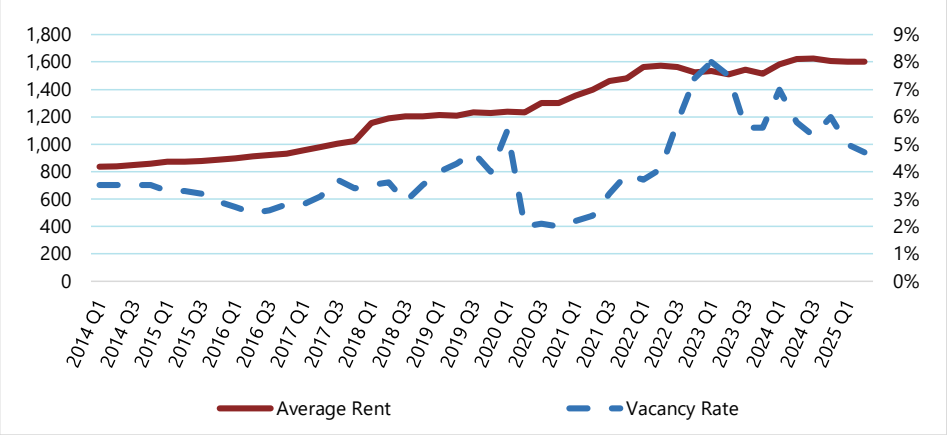
Source: University of Washington, State's Housing Market 2025 Q1

The Washington Center for Real Estate Research (WCRER) produces a Home Affordability Indes (HAI) for both average buyers and renters, with separate measures for first-time buyers and low-income renters. Table 5-22 displays HAI values for Chelan County and nearby counties for comparison.

Higher index values indicate greater affordability, with 100 indicating a middle-income family can just qualify for a median-priced home.

As of Q2 2025, both the First-Time Buyer HAI and the Median Buyer HAI are the lowest in Chelan compared to the state and surrounding counties. For renters, both the Median and Low-Income HAI are slightly below the state average but remain higher than in neighboring Douglas County. Notably, the Median Renter HAI stands at 125.4. This is well above the 100 benchmark.

Table5-22
Home Affordability Index (HAI), Home Buyers and Renters, 2025 Q2



Region	Median Buyer	First-Time Buyer	Median Renter	Low-Income Renter
Chelan County	55.97	39.94	125.4	87.8
Douglas County	59.15	42.23	110	76.97
Okanogan County	66.15	47.17	189.2	132.4
Grant County	83.91	59.84	161.6	113.1
Statewide	60.67	43.33	136	95.19

Rent Trends

Similar to home prices, rents in Chelan County have risen sharply over the past decade (Figure 5-51). The average rent increased from $836 in 2014 to $1,600 in 2025. This is an overall increase of 91.5% (nearly doubling in 10 years) and represents a growth rate that is almost twice that of Area Median Income (AMI) over the same period (Figure 5-50).

Figure 5-51
Average Rent and Vacancy Rates, Chelan County, 2014–2025

Source: University of Washington, Apartment Market Report 2025 Q1

Table 5-23 presents the average rent and the income required to afford one-bedroom, two-bedroom, and all apartments in Chelan County, with statewide averages for comparison. The average rent for a one-bedroom apartment in Chelan County is $1,483. Using the standard definition of affordability (spending less than 30% of income on housing) a household would need to earn just under $60,000 annually, or 83.4% of the Area Median Income (AMI), to afford this rent. To afford an average two-bedroom apartment, a household would need to earn nearly 100% of AMI (99.3%).

Statewide, average rents across all unit sizes are higher, but so is AMI. As a result, the absolute income needed to afford rent is greater at the state level, yet the percentage of AMI required is actually lower than in Chelan County.

Table5-23
Apartment Rent Metrics, Chelan County and Washington, Q1 2025

	Average Sq Ft	Average Rent	Cost per Sq Ft	Income Needed to Afford	% AMI Needed to Afford
One-Bedroom					
Chelan County	691	$1,483	$2.14	$59,320	82.4%
Statewide	679	$1,746	$2.58	$69,840	73.6%
Two-Bedroom					
Chelan County	945	$1,788	$1.89	$71,520	99.3%
Statewide	966	$1,981	$2.05	$79,240	83.5%
All Units					
Chelan County	792	$1,600	$2.00	$64,000	88.9%
Statewide	824	$1,853	$2.28	$74,120	78.1%

Source: University of Washington, Apartment Market Report 2025 Q1

Short-Term Rental & Seasonal Populations

The short-term rental (STR) industry (e.g., Airbnb) increasingly influences local housing markets. This model is a double-edged sword. On one hand, it provides a potential source of "side-hustle" revenue for existing residents. On the other hand, it can inflate home prices, as single-family homes may be valued at the same level as commercial real estate in the area.

To mitigate the potential downsides of STRs, Chelan County has implemented regulations on where they are allowed to operate. There are three classifications of STRs in the County: Tier 1, Tier 2, and Tier 3. Tier 1 STRs are allowed to operate wherever the zoning code permits, while Tier 2 & 3 STRS are subject to restrictions on the maximum share of the housing supply in zip codes and subareas that may be used for STRs.

AirDNA is a valuable resource for understanding overall STR concentration in an area and for comparing trends across regions. However, it is not compliance software and therefore may not provide completely accurate counts of STRs.

Table 5-24 shows the STR patterns for each incorporated city in the County as well as the Peshastin, and Manson UGAs. These figures represent the STRs inside the UGA boundaries, including those within city limits. In terms of the percentage of housing stock consisting of STRs, the Leavenworth

ranks highest at 14.3% followed by Chelan and Manson at 13.7% and 12.9%, respectively. Countywide, STRs account for only 4.3% of the housing stock.

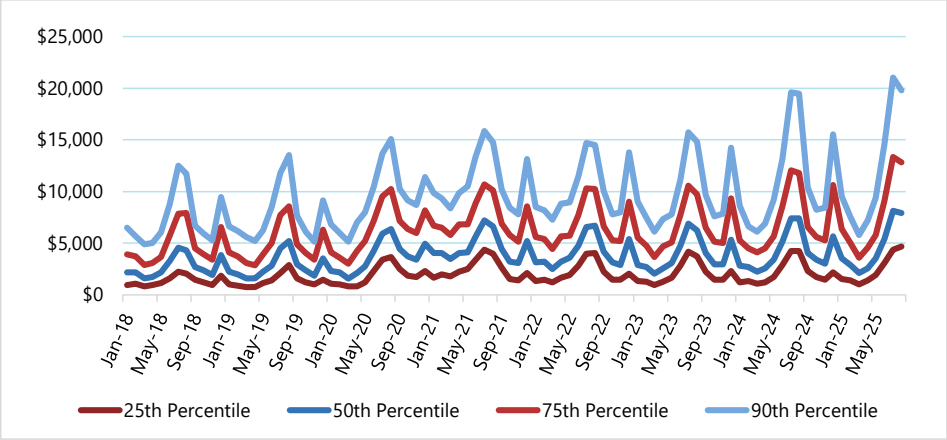

Table 5-24
STR Patterns, Chelan County, 2025

Area	Total Housing Units	Active Short-Term Rentals	Percentage STR Stock	Median Occupancy Rate	Average Daily Rate
Leavenworth UGA	1,736	248	14.3%	58%	$326.58
Chelan UGA	2,997	410	13.7%	48%	$465.70
Manson UGA	1,392	180	12.9%	54%	$455.50
Peshastin UGA	282	4	1.4%	52%	$412.75
Entiat UGA	602	4	0.7%	66%	$241.80
Cashmere UGA	1,616	10	0.6%	51%	$244.61
Wenatchee UGA	16,904	63	0.4%	54%	$220.07
Chelan County	**39,943**	**1,726**	**4.3%**	**53.0%**	**$408.61**

Source: AirDNA 2025, Washington State OFM 2025, Census Bureau

Figure 5-52 shows the monthly revenue of STR operators across various percentiles. Most operators are represented at the 50th percentile, above-average performers at the 75th percentile, and top performers at the 90th percentile. Revenue for all percentiles follows a cyclical, seasonal pattern but has increased overall over the period. For most operators, peak-month revenue rose from just under $5,000 in 2018 to just under $8,000 in 2025.

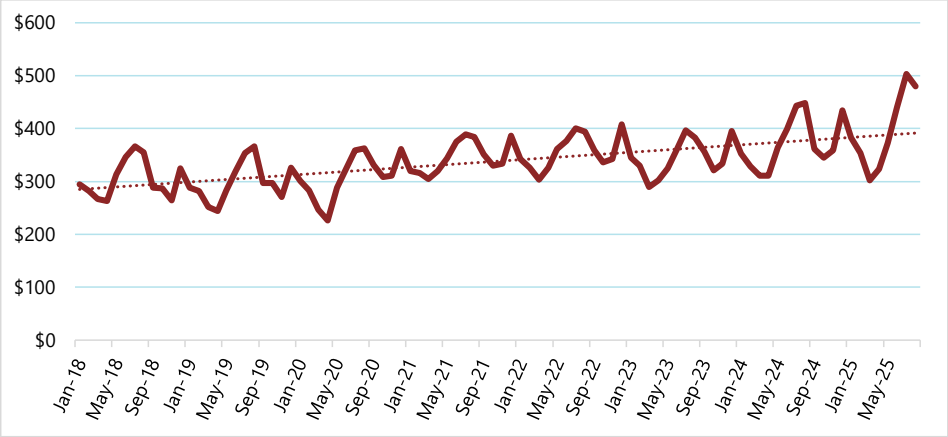

Figure 5-52
STR Monthly Revenue by Percentile, Chelan County, 2018–2025

Source: AirDNA, 2025

The average daily rate (ADR) of STRs in Chelan County is shown in Figure 5-53. Since 2018, ADR has followed a seasonal cyclical pattern while trending upward at a fairly steady rate. The main exception is a sharp dip in early 2020, after which growth resumed along its prior trajectory.

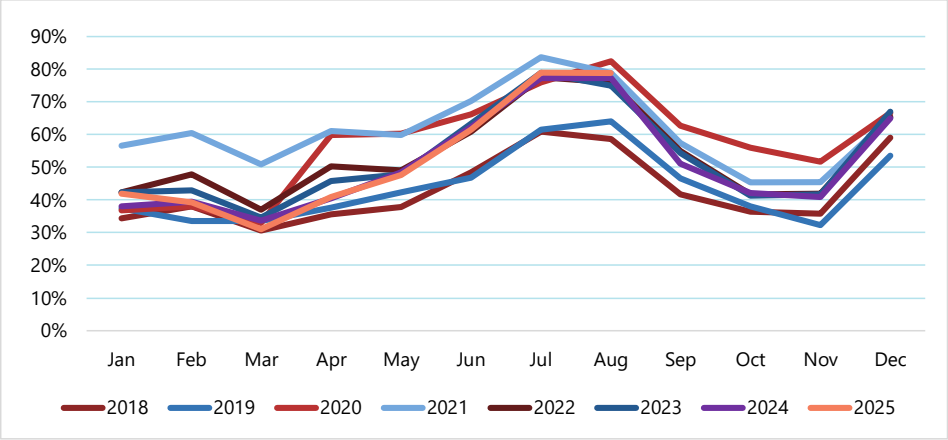

Figure 5-53
STR Average Daily Rate, Chelan County, 2018–2025

Source: AirDNA 2025

The occupancy rate of a short-term rental (STR) reflects how often it is booked each month. Occupancy rates can help operators evaluate whether to adjust rental prices. For example, a property booked 90% of the time at $100 per night could generate more revenue if rented at a lower occupancy rate for $300 per night. Figure 5-54 shows monthly occupancy rates for Chelan County STRs from 2018 to 2025. In 2025, occupancy patterns mirror those of previous years, with the highest rates occurring in mid to late summer.

Figure 5-54
STR Occupancy Rate, Chelan County, 2018–2025

Source: AirDNA 2025

II. Gaps & Barriers Analysis

There is often an imbalance between supply and demand in the housing market. This imbalance can manifest as either an undersupply of housing or as housing that is unaffordable. For this Gaps and Barriers Analysis, Points Consulting (PC) measured affordability gaps experienced by both renters and homeowners.

Renter Challenges

Chelan County renters are less likely to be cost-burdened than other renters in Washington or the United States. This holds true for both moderate and severe cost-burden. In Chelan County, 14.9% of renting households are severely cost-burdened, meaning they spend 50% or more of their household income on housing. By contrast, 20.7% of renting households in Washington fall into this

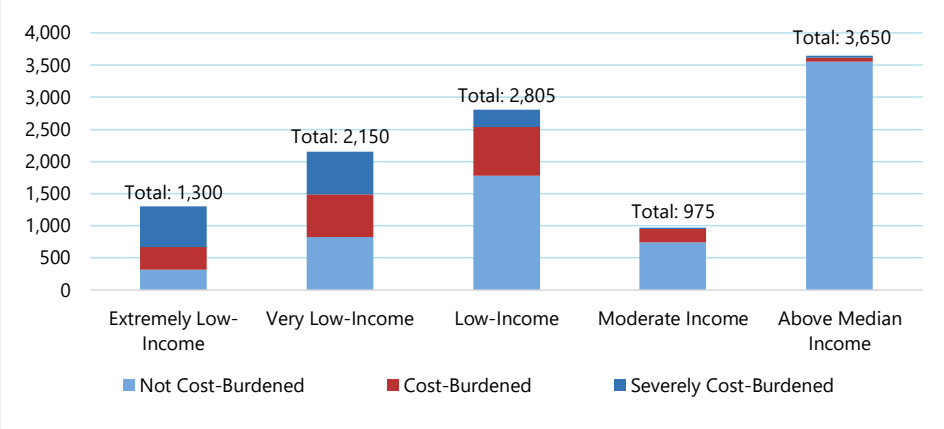
category (Table 5-25). Additionally, 18.7% of Chelan County renters are moderately cost-burdened (spending 30–50% of income on housing), compared to 22.8% in the state.[17]

Altogether, 33.6% of Chelan County renters experience a housing cost burden to some degree. This is roughly 10 percentage points lower than the rates observed in the state and nation (43.5% and 43.9%, respectively).

Table 5-25
Renters' Housing Cost Burden by Region

Region	Renting Households	Severely Cost-Burdened	Moderately Cost-Burdened	Total Cost-Burdened	Not Cost-Burdened
Chelan County	10,880	14.9%	18.7%	33.6%	66.4%
Washington	1.1M	20.7%	22.8%	43.5%	56.5%
United States	44.2M	22.2%	21.7%	43.9%	56.1%

Source: HUD Comprehensive Housing Affordability Strategy Data, 2017-2021



PC also measured affordability issues by various Area Median Income (AMI) levels. Please note these data use 2021 AMI levels. The five AMI categories are:

- **Extremely low-income:** Less than 30% of AMI
- **Very low-income:** 30–50% of AMI
- **Low-income:** 50–80% of AMI
- **Moderate income:** 80–100% of AMI
- **Above median income:** 100%+ of AMI

Figure 5-1 compares levels of cost burden across these income levels. In Chelan County, renters categorized as Extremely Low-Income are the most likely to be severely cost-burdened, with 48.8% of households in this category affected. Households with above-median incomes experience minimal moderate or severe cost burdens, while moderate- and low-income renter households face smaller (but still notable) shares of cost burden.

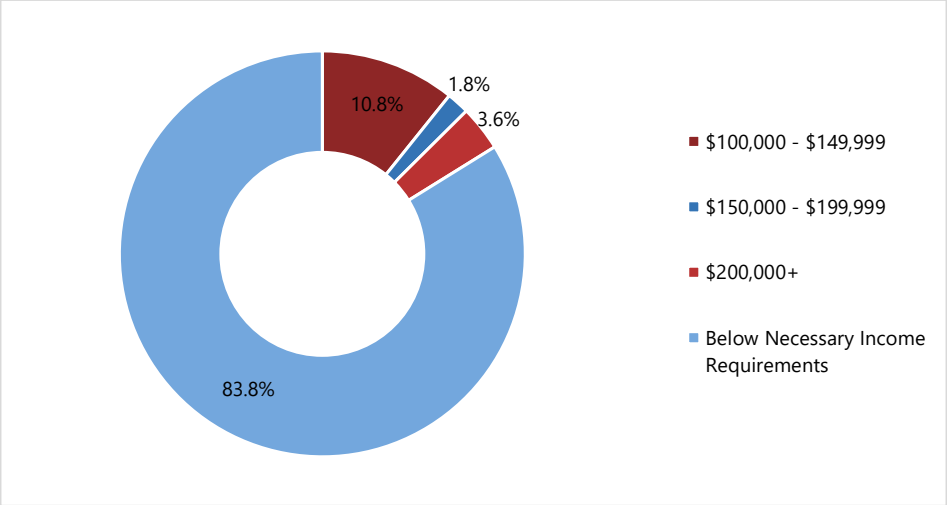
[17] By HUD definitions, "housing costs" include only rent or mortgage payments and generally exclude utilities such as water, sewer, refuse removal, and internet, which are typically not included in most leases. In short, if these additional housing-related costs were included, the reported cost-burdened statistics would be even higher than those presented here.

Figure 5-1
Chelan County Renters' Housing Cost Burden by Income Level

Source: HUD Comprehensive Housing Affordability Strategy Data, 2017-2021

Homeownership Challenges

Many homeowners are also cost-burdened and may be at risk of foreclosure. In Chelan County, about 11.3% of homeowners are moderately cost-burdened, while 7.1% are severely cost-burdened.



Some of these homeowners were likely able to purchase their homes years ago, when prices were lower. This suggests that new buyers today face greater cost burdens due to higher home values and mortgage rates. Considering current income levels, regional home prices (as of November 2025), and average current mortgage rates, PC estimated the share of potential, first-time homebuyers able to afford a home. The model assumes an average credit rating and a conventional 30-year mortgage.

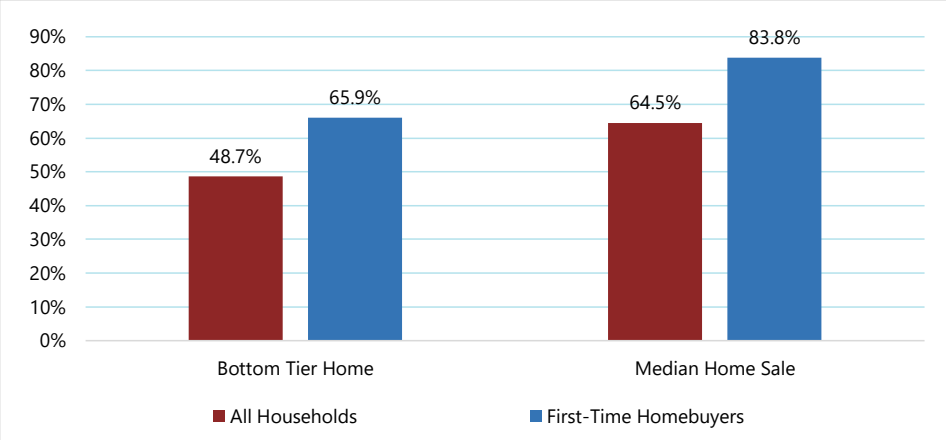
PC's estimates indicate that most potential first-time homebuyers in Chelan County cannot afford an average-priced home. Figure 5-2 shows which income cohorts can afford an average-priced home and their respective shares of total households in the County.

In Chelan County, the median home value is $535,000. Based on PC's assumptions and calculations, this would mean a monthly payment of $2,655. In order to spend less than 30% of their income on housing, a household would need an income of approximately $106,000 to afford the mortgage on an average-priced home. By comparison, the median household income in the County is about

$78,000. This means an average household would need to earn roughly $28,000 more per year to afford an average-priced home. As a result, 83.8% of potential first-time homebuyers in Chelan County cannot afford this purchase today (Figure 5-2).

Figure 5-2
First-Time Home Buyers who Can Afford to Buy an Average-Priced Home in Chelan County

Source: U.S. Census Bureau Table S2503 5-Year Estimates, Realtors Property Resource, Realtor.com



While PC's estimates focus on households that do not currently own homes, the majority of households in the County are homeowners. What would affordability look like if these households attempted to purchase a home today? Figure 5-3 compares all households with first-time homebuyers under current market conditions.

Excluding the equity homeowners could access by selling their current homes, current homeowners would fare better: 64.5% of all households would be unable to afford an average-priced home, compared with 83.8% of potential first-time homebuyers.

The average-priced home is not the only option for prospective buyers. Figure 5-3 also shows the percentage of households unable to purchase a bottom-tier home in the County. For this metric, PC used the 25th percentile home value for Chelan County: $377,000. Both first-time homebuyers and

all households fare considerably better in this scenario, with only 65.9% of first-time homebuyers unable to afford a bottom-tier home. However, households pursuing this option may face a higher risk of ending up in substandard housing.

Figure 5-3
Comparison of Households that Cannot Afford to Buy an Average-Priced Home

Source: U.S. Census Bureau Table S2503 5-Year Estimates, Realtors Property Resource, Realtor.com

Funding Gaps

High market value home prices and rents lead to an affordability gap that the County must navigate. Specifically for Chelan County, the median home value is around $535,000 resulting in a monthly payment of approximately $2,600 with current mortgage rates. Median rent is lower at only $1,200 per month, however, the market does not produce sufficient units to support those with monthly incomes below 80% AMI, and especially doesn't produce enough to support those below 50% AMI.

Table 5.2 illustrates the potential level of funding needed to subsidize housing needs in rural Chelan County. This should be taken as a low estimate given the rising cost of construction in the state.

Table 5.2: Rural Chelan County Possible Annual Subsidized Units Needed

AMI Level	Annual Subsidized Units Needed	Cost Per Unit	Total Annual Cost
[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]

Funding Affordable Housing

There are multiple types of subsidies or government fundings that are or could be used in Chelan for affordable housing. These include funding from at the federal, state, and local level.

Local Funding

Chelan County's budget includes multiple items for the support of affordable housing needs:
The **Rural Counties Tax** provides funds that must be used for public facilities and infrastructure which promote economic development and for affordable housing. These funds were authorized by State Legislation passed in 1997 to provide for rural counties to receive back a portion of the state sales and use tax.
The **Community Services and Housing Fund**, is used for Dispute Resolution, Domestic Violence, Homeless Housing, and Low Income Housing. The housing funds currently are passed through to the City of Wenatchee homeless programs.
Pursuant to state law, certain **recording fees** are also used as a revenue source to support Homelessness.
The **Cascade Public Infrastructure Fund Grant Program (CPIF)** is a grant program approved by the Chelan County Board of Commissioners in 2021. Due to the state's critical housing shortage, it was expanded to include projects supporting permanently affordable housing in 2021.
Other potential local funding options authorized by the state that Chelan County could implement to close the funding gap in the future include Local Housing Levies (as authorized by RCW 84.52.105), and Mental Health Sales & Use Tax (specifically for housing related to treatment of chemical dependency or mental health treatment as authorized by RCW 82.14.460).

State and Federal Funds

- USDA Rural Development Multifamily Housing
- USDA Rural Development Single Family Housing
- HUD Section 8 housing vouchers
- Low-Income Housing Tax Credit (LIHTC)
- HUD Choice Neighborhoods Grant
- HOME Investment Partnerships Program
- Community Development Block Grants
- National Housing Trust Fund
- Capital Magnet Fund
- Washington Housing Trust Fund
- Connecting Housing to Infrastructure Program (CHIP)

Potential Policy Barriers & Remedy Options

The funding gap is not the only potential barrier to affordable housing development. Other steps can be taken to reduce the funding gap and incentivize the housing needed to serve Rural Chelan County such as identifying potential policy barriers and implementing remedy options. Adjusting development regulations, permit processes, and supporting regional affordable housing providers are some steps that can be taken in the direction of closing this gap. Some ways Chelan County can take these steps are detailed below.

Accessory Dwelling Units

Deploying ADUS is a common way to gradually increase density within single-family districts while not significantly altering the character or home values in existing neighborhoods. They can also offer a more affordable way of building than new units on undeveloped lots, as the utilities and street infrastructure are already in place on and around these parcels. They are also used to address needs for a variety of high-need groups, including:

- Aging adults/seniors looking to downsize
- Professionals and young adults who cannot yet afford their own home but are looking to get away from apartments
- Part-time residents or seasonal workers who do not need a full-time single-family home

As it currently stands, ADUs are allowed in all zones where single family homes are permitted. To ensure ADUs are adequately used to address housing needs, Accessory Dwelling Units should be encouraged in all zones in which they are allowed, and clear documentation of the permitting process should be made available and easily searchable on the County website. Other options the County may consider for encouraging ADUs for affordable housing are allowing double ADUs on rural lots and reducing impact fees for ADUs.

Middle Housing Types

Chelan County recognizes that a mix of housing unit types is needed to provide for all income levels in the county. This especially applies to "middle density" housing units which include various sizes of units between the single-family home and apartment buildings. Duplexes, triplexes, fourplexes, cottage court developments, townhomes, and ADUs are common housing types within the middle density spectrum (Figure 5.4). These housing types typically develop to have more affordable monthly payments than a single-family home on a mortgage, but higher that high-density apartment complexes, targeting affdability for middle-income households.

Figure 5.4: Middle Density Housing Types

Source: Daniel Parolek at Opticos Design, 2010

The County RV district and the Manson UR2 & UR3 zoning districts currently permit duplexes by right, while accessory dwelling units (ADUs) are allowed as accessory uses. Multifamily dwellings are permitted in UR3 and conditionally permitted in RV. Clarifying what types of multifamily dwellings would be encouraged, and the permitting procedure for these units would eliminate uncertainty for developers looking to build these middle housing types.

To encourage a diversity of housing types in other areas of the county, the County should also consider allowing duplexes in the RRR district, which also provides provisions for rural areas of the county where intensely developed rural areas already exist. If duplexes are appropriate in RV, extending that allowance to RRR would support uniformity in land use regulations and reduce confusion for property owners and developers as well as encourage more variety of housing types in Chelan County.

Another avenue is to consider "cluster housing" allowances in the RV and RRR zones that preserve open space in the rural county while allowing for more housing options.

Regional Discussion with Local Developers

Another effective way to encourage housing development and better meet housing needs is to directly engage with local developers and stakeholders. This could take the form of one-on-one meetings, small focus groups, or open house-style forums designed to actively solicit feedback on the County's development review processes.

Proactive engagement offers meaningful potential benefits. At best, Chelan County would receive actionable, experience-based feedback that could inform improvements to development standards, permitting procedures, and timelines—ultimately helping to facilitate housing production. At a minimum, these efforts would demonstrate that County staff are responsive to concerns, understand procedural challenges, and are committed to working collaboratively with the development community.

Even in the absence of immediate policy changes, this type of outreach can build trust, improve communication, and enhance the County's reputation among developers. A stronger working relationship between the County and the development community can, in itself, help reduce perceived barriers and encourage greater participation in housing development efforts.

Chelan-Douglas Homeless Housing Strategic Plan 2025-2030

Washington State law requires a five-year strategic plan addressing homelessness for each county. Chelan and Douglas Counties established the Chelan-Douglas Homeless Housing Task Force which is responsible for creating and updating this five-year homeless housing strategic plan and the provision of homeless and housing programs funded through the available funding through the two counties.

The goals of the task force and strategic plan Is to reduce the amount of time a person/household spends unhoused by eliminating barriers and providing long-term housing solutions. The Task Force focuses on investing in projects and programs that provide long-term supported housing stability while maintaining and improving existing emergency shelters.[19]

Chelan County will continue partnering with local jurisdictions and other agencies to uphold the goals and policies of the Chelan-Douglas Homeless Housing Strategic Plan and its subsequent updates. The County's continued support for this initiative represents its priority of limiting housing displacement.

Housing Authority of Chelan County & the City of Wenatchee (CCWHA)

The County has limited resources to directly address housing, but provides grant funding and support to the Housing Authority of Chelan County & the City of Wenatchee (CCWHA). CCWHA understands the need to address housing affordability and has already begun implementing programs and policies to provide affordable housing to households earning 80% or less of the

[19] "Chelan-Douglas Homeless Housing Strategic Plan 2025-2030," Chelan-Douglas Local Homeless Housing Task Force, September 24, 2025, https://www.co.chelan.wa.us/files/board-of-commissioners/documents/Housing/Homeless%20Housing%20Strategic%20Plan%202025-2030.pdf.

Area Median Income (AMI). CCWHA is overseen by a board of 11 people and manages an annual operating budget of $6.2 million and an additional $4.2 million to distribute in Housing Assistance payments. CCWHA manages 599 units of affordable housing across 20 properties. Its waitlists are further evidence of the depth of need in Chelan County. Beyond the units that it directly manages, CCWHA also supports efforts to encourage short-term housing assistance through its Housing Choice Voucher Program and the Veterans Administration Supportive Housing Program.[20]

Housing Choice Voucher Program (Section 8)

This program helps low-income families, individuals, seniors and people with disabilities pay monthly rent for apartments or houses in the Chelan and Douglas counties. Participants receive a housing subsidy in the form of a voucher, which they can use to rent a unit from any landlord in Chelan or Douglas counties who meets program requirements. To qualify, households must earn 50% or less of the Area Median Income (AMI) and pay the portion of rent and utilities not covered by the voucher (this is typically 30–40% of their monthly income). Preference is given to households earning 30% or less of AMI and to those experiencing homelessness.[21]

HUD-Veterans Affairs Supportive Housing (VASH) Program

The HUD-VASH Program is a partnership between the Department of Housing and Urban Development (HUD), the Department of Veterans Affairs (VA), and local Public Housing Authorities (PHAs). Low-income veterans who are eligible for HUD-VASH receive a specialized Housing Choice Voucher (HCV) to use at the rental of their choosing. In addition to the rental subsidy, eligible veterans also receive ongoing supportive services from the Community-Based Outpatient Clinic in Wenatchee. The local HUD-VASH Program currently serves Veterans in Chelan, Douglas, Okanogan, and Grant counties.[22]

Family Self-Sufficiency Program (FSS)

Families who participate in the federal Section 8 Housing Choice Voucher program are eligible to join CCWHA's Family Self-Sufficiency (FSS) Program. FSS is a voluntary program designed to help families achieve economic independence. Through this program, households set goals that always include employment and often include homeownership.
FSS participants commit to a five-year contract to establish and pursue specific goals. The program focuses on helping families become free of all forms of state and federal welfare through employment. FSS Specialists in each branch office work with households to set goals that may include employment, job training, education, job search, money management, credit

repair, and homeownership. Working together, the family, local service providers, and FSS Specialists help identify and remove obstacles to self-sufficiency.
Participants may also receive an interest-bearing escrow (savings) account, which grows as the household's share of rent increases due to higher earned income. The tax-free account is distributed to the family once they complete their FSS Contract of Participation and have been free of welfare assistance for 12 consecutive months.[23]

Rental Properties

The Housing Authority of Chelan County & the City of Wenatchee also provide rental housing for eligible residents. Qualified groups include seniors, agricultural workers, and others who meet program requirements. Additional information on eligibility is available on the Housing Authority's website.[24]

Farm Worker Housing

Chelan County also has a farm worker housing camp providing housing for migrant agricultural workers and their families from June 1st through November 1st. The camp accommodates workers in the pear and apple season and has a total of 180 beds for singles and 25 trailers each with 8 beds for families.[25]

Habitat for Humanity

Since 1990 Habitat for Humanity has been in Chelan County working with those who desire to help themselves gain homeownership. Specifically, Habitat for Humanity is based in Wenatchee and serves the Cities of Wenatchee and East Wenatchee and lands within a five mile radius of the city limits. Through donations of money and time, the houses are built and sold to qualifying low-income households for much lower than market price providing a path to homeownership for low-income households who would not have the chance otherwise.[26]

Upper Valley MEND (Meeting Each Need with Dignity)

MEND provides support for low-income households, including help with housing. As of 2025, they have an affordable homeownership program for low and moderate-income individuals who live or work in the Upper Wenatchee Valley with 20 homes in two neighborhoods. They also stepped in the preserve 31 affordable rental units in Leavenworth and now rent those to low and moderate-income households and have plans to continue to increase the number of rentals and homeownership opportunities they provide.[27]

Chelan-Douglas Community Action Council

The Chelan-Douglas Community Action Council was formed in 1965 as a private non-profit organization to help people change their lives for the better. This includes multiple housing assistance programs including affordable housing, rapid rehousing, homeless prevention, housing and essential needs, and foundational community supports.[28]

VI. Housing Related Policies

The County recognizes that housing is a pivotal piece directly impacting all other element addressed within the Comprehensive Plan. Furthermore, the County recognizes that accessible and adequate housing is a necessity for citizens to live and thrive in Chelan County. As housing has become a developing concern over the past several years, the County and its partners have taken numerous proactive steps both to legislate better outcomes and to activate and enable the private sector to address housing issues. Continuing to make progress on housing will require the collaborative effort from each community as well as its various non-profit organizations and housing builders/developers.

Chelan County manages all unincorporated areas in the county, however, it does not manage the incorporated areas. For cities such as Chelan, Wenatchee, and Entiat, the County manages the associated UGA, however, the city oversees the planning of these areas. As is often the case, it is more advisable for affordable housing to locate within more urbanized areas which are closer to

[27] Upper Valley Mend, accessed December 2, 2025, https://www.uvmend.org/.
[28] "Programs/Services" Chelan-Douglas Community Action Council, accessed December 2, 2025, https://cdcac.org/programs-services/.

employment and services, hence the County will often play more of a partnership role on these endeavors than the incorporated Cities.

Awareness of Racially Disparate Impacts

The Growth Management Act (GMA) now requires a recognition of how zoning and land use practices could have historically or currently contributed to racially disparate impacts. (See Appendix I for analysis.) The County's current code has no explicit references that discriminate against populations according to race or national origin.

Another less explicit form of discrimination that has sometimes been cited in other communities as residual "redlining" are anti-density standards which were at times designed to prevent certain populations from inhabiting in the area.

The County's zoning definitions and allowable densities have long emphasized low density residential not for reasons of discrimination against multi-family housing. The County's zoning elaborates a variety of standards including RR20, RR10, RR5, and RR2.5, none of which permit greater than 1 unit per 2.5 acres. This usage pattern comports with the County's history of agriculture, another long-established priority of the GMA.

The County now bears some responsibility to ensure adequate low-income housing within its jurisdictions. To meet these requirements, the County will focus on ensuring appropriate zoning alterations in UGAs such as Manson and Peshastin such that multi-family housing is not restricted in these areas.

Goals and Policies to Improve Housing Access and Affordability

These goals and policies have been established in order to address housing barriers and disparities identified throughout this element.

Goal HO 1: Affordable housing in good condition for residents of all income levels

Rationale: Identify adequate provisions for existing and projected housing needs for all economic segments of the community, including documenting barriers and actions needed to achieve housing availability in consistency with RCW 36.70A.070(2)(d) and WAC 365-196-010(1)(g)(ii), WAC 365-196-300(4)(f), and WAC 365-196-410.

Policy HO 1.1: Promote and retain affordable housing and focus on the needs of full-time residents earning 120% of median income or less.

Policy HO 1.2: The County shall facilitate affordable home ownership and rental opportunities by promoting an increasing supply of safe and healthy lower-cost housing types, including housing on small lots, accessory dwelling units (ADUs), duplexes, townhouses, multiplexes, manufactured housing, mobile homes, co-living, and mixed-use housing.

Policy HO 1.3: The County shall pursue techniques to minimize the displacement of extremely low, very low, low, and moderate-income households resulting from losses in the County's existing stock of low-cost housing. Examples of techniques could include strategic acquisition and financing of existing multi-family development, tenant relocation assistance, right-to-return policies, and policies requiring displacement and mitigation plans during the permitting process.

Policy HO 1.4: The County shall ensure that redevelopment will not result in a net loss of affordable housing; i.e. every unit of affordable housing lost to redevelopment is replaced with like, affordable housing, suitable for and in a location beneficial to the same demographics as those displaced by redevelopment. To this end, the county shall establish requirements for the inclusion of low-income housing or fees in lieu of providing low-income housing.

Policy HO 1-5: The County shall encourage for-profit and non-profit sector production of new housing units that are affordable to and occupied by extremely low, very low, low, and moderate-income households.

a) The County shall implement various fiscal and regulatory tools and funding resources and strategies to encourage housing providers to increase the supply of affordable housing units generally, and particularly within mixed-income developments and communities.
b) The County shall provide incentives that encourage for-profit and non-profit residential developers to address extremely low, very low, low, and moderate-income housing needs, such as priority permit processing and exemptions or reductions in impact fee mitigation payments for low-income projects with long-term affordability commitments.
c) Evaluate the feasibility of reducing minimum permitted lot sizes in non-planned residential developments (PRD).

d) Encourage through incentives and other techniques a balance of affordable and market-rate housing within urban centers with job opportunities and along transit emphasis corridors, including establishing an incentive program for affordable housing in multifamily developments with access to transit.

Goal HO 2: Livable neighborhoods with diverse housing options.

Rationale: This element must be consistent with moderate-density housing and ADU policies in RCW 36.70A.070(2) and WAC 365-196-410(2)(a). Identification of capacity of land for housing including government-assisted housing consistency with RCW 36.70A.070(2)(c) and WAC 365-196-410(2)(e) and (f). Consideration of the preservation, improvement, and development of neighborhoods and diverse housing options consistent with RCW 36.70A.070(2)(b).

Policy HO 2.1: Use neighborhood planning to develop locally-supported action plans for existing neighborhoods.

Policy HO 2.2: Include the option of neighborhood-specific design standards, including standards that limit building height and size, in neighborhood planning processes.

Policy HO 2.3: Where neighborhood planning supports retention of existing housing stock, support maintenance and upkeep of that stock by sponsoring housing rehabilitation programs offered by state and federal governments and nonprofit agencies.

Policy HO 2.4: Focus efforts to increase the affordable housing stock near urban areas and commercial districts where more jobs, multi-modal transportation, and other supporting services are located.

Policy HO 2.5: Encourage diversity in single-family housing types throughout the City.

Policy HO 2.6: Encourage special housing types (such as cottage housing, ADUs, townhouses, and zero-lot-line development) in developing areas and in existing neighborhoods where such housing can be developed while retaining or enhancing neighborhood livability.

Policy HO 2.7: Allow mobile home parks in one or more zoning districts and adopt and enforce development and maintenance standards to keep housing condition and livability high in the parks and the neighborhoods in which they are located. Pair standards with programs to help current residents ensure they can meet the requirements.

Policy HO 2.8: The County shall cooperate with public, private, and non-profit providers in applying techniques for increasing the supply of owner-occupied homes, including affordable home ownership opportunities, facilitating community land trusts, and first-time homebuyer programs.

Policy HO 2.9: The County shall cooperate with public, private, and non-profit providers in applying techniques for increasing the supply of owner-occupied homes, including affordable home ownership opportunities, facilitating community land trusts, and first-time homebuyer programs.

Policy HO 2.10: The County shall update the demographic changes and housing needs of county residents to identify the gaps in housing availability for low, very low, extremely low, and moderate-income households, government-assisted housing, special needs populations, emergency housing, emergency shelters, and permanent supportive housing for the homeless.

Goal HO 3: Adequate special needs housing, including government-assisted housing, permanent supportive housing, transitional housing, and emergency housing needs.

Rationale: Identify adequate provisions for existing and projected housing needs for all economic segments of the community, including documenting barriers and actions needed to achieve housing availability in consistency with RCW 36.70A.070(2)(d) and WAC 365-196-010(1)(g)(ii), WAC 365-196-300(4)(f), and WAC 365-196-410.

Policy HO 3.1: Ensure the County's Urban Growth Area provides adequate, appropriately-zoned land for special needs housing, including housing that will meet the needs of the County's aging population.

Policy HO 3.2: Establish standards for special needs housing, including housing that will meet the needs of the County's aging population, to ensure that such housing is well integrated in the community and complies with Americans with Disabilities Act standards.

Policy HO 3.3: Review and update the County's zoning regulations and design standards to remove barriers the development of special needs housing and emergency shelter and to affirmatively address these types of shelters and dwellings in the UGA.

Policy HO 3.4: As necessary based on the forecasted housing demand in this comprehensive plan, prioritize the creation of extremely low, very low, and low-income housing using identified federal and state subsidies.

Policy HO 3.5: Based on the forecasted housing demand in this comprehensive plan, the County will prioritize the creation of extremely low, very low, and low-income housing using identified federal and state subsidies.

Goal HO 4: County leadership provides leadership and support to meet housing needs

Rationale: Ensure policies are consistent with zoning maps, Urban Growth Areas, and housing goals. Promote active participation of County staff in program initiation and community partnerships.

Policy HO 4.1: Regularly review the County zoning map and zoning districts and make any changes needed to encourage a mix of housing types that will advance the County's housing goals, meet identified housing needs, provide quality housing, and support the County's overall land use plan.

Policy HO 4.2: Regularly assess the size of the Chelan Urban Growth Area and increase the size as needed to maintain an adequate supply of appropriately zoned land.

Policy HO 4.3: Encourage County staff to take an active role in promoting the County's housing goals, including outreach, coordination, and initiating programs (such as an infill development program or incentive programs), changes in development regulations, and other actions.

Policy HO 4.4: Where appropriate, work in partnership with other public entities to facilitate use of surplus public land (including land owned by Chelan Public Utility District (PUD), City of Chelan, and by other entities for affordable housing development.

Goal HO 5: Strive to prevent the displacement of historically and currently marginalized communities as well as extremely low, very low, low, and moderate-income households from existing neighborhoods.

Rationale: Identify local policies and regulations that result in racially disparate impacts, displacement, and exclusion in housing in consistency with RCW 36.70A.070(2)(e). Establish policies and regulations to address and begin to undo racially disparate impacts, displacement, and exclusion caused by local polices and actions in consistency with RCW 36.70A.070(2)(f).

Policy HO 5.1: Evaluate plans, investments, new infrastructure, and new development for the potential to increase housing costs for, or to cause displacement of, historically and currently marginalized communities, as well as extremely low, very low, low, and moderate- income households. Identify and implement strategies to mitigate anticipated impacts.

Policy HO 5.2: The County shall consider equitable development initiatives, inclusionary zoning, and other strategies to counter displacement. The county shall engage those communities most at risk of displacement, including those affected by poverty, communities of color, and other historically and currently marginalized communities while developing anti-displacement policies.

Policy HO 5.3: Explore racial equity assessment tools (e.g., Racial Equity Impact Assessment Toolkit from Race Forward) to evaluate development regulation update proposals.

Policy HO 5.4: Expand community outreach strategies to vulnerable populations in the development of regulation updates.

Goal HO 6: Support year-round and seasonal agricultural worker housing

Policy HO 6.1: Protect the economic viability of the agricultural industry by supporting construction of agricultural worker housing near orchards. Consider the reduction of site development standards and building fees for agricultural housing units.

Goal HO 7: Ensure that development and redevelopment projects are resilient to future conditions and increase health and safety of the occupants.

Policy HO 7.1: Establish development regulations that incorporate best practices for reducing the risk of wildfire, extreme weather, flooding, and other natural hazards.

Policy HO 7.2: Encourage on-site non-potable water systems to reduce water demand in residential buildings.

Policy HO 7.3: Encourage the implementation of recommended actions in the WUI building standards as prescribed by Chelan County Fire Districts.

Policy HO 7.4: Prioritize the preservation and weatherization of housing in overburdened communities to protect residents and increase housing resilience.

🥦Policy HO 7.5: Support and promote programs that install cooling units, heat pumps, and air filtration, prioritizing households or facilities with residents (e.g., low-income seniors) most vulnerable to extreme temperature events.

Malaga

Policy HO M.1: Promote a range of housing types and densities that respect rural character of the Malaga UGA while ensuring sufficient, affordable, and diverse housing stock to preserve existing housing and meet anticipated population growth.

> Rationale: The Malaga UGA faces challenge of maintaining rural character and addressing housing shortages. A balanced housing strategy supports existing homeowners' economic sustainability, intergenerational living, and community inclusivity, while accommodating for population growth without compromising rural values.

CHAPTER 6
CAPITAL FACILITIES ELEMENT

I. Introduction

The Capital Facilities Element reflects requirements and direction from the Growth Management Act (GMA), the Procedural Criteria as established by the WAC and the County-Wide Planning Policies. This element estimates capital facility needs for the next 20 years based on the County's selected levels of service standards, and the growth, densities and distribution of land uses anticipated in the Land Use and Rural elements of this plan. Financing approaches to fund these capital facilities are identified to support decision making to achieve the County goals for capital facilities planning.

The Capital Facilities Element promotes efficiency by requiring the prioritization of capital improvements for a longer period of time than the single budget year. In addition, the identification of adequate funding should result in prioritization of needs.

This Element addresses water systems, irrigation systems, sanitary sewer systems, stormwater, flood management, schools, law enforcement, fire protection and government properties. Even though the County does not own many of these facilities, it is required to address them per RCW 36.70A.170 and Western WA Growth Management Decisions 95-2-0067 and 00-2-0062.

The County works with all agencies to coordinate capital facilities plans and projects but may not always have the most up-to-date information. Each agency is maintained by separate commissions which manage their own budgets and projects. However, the State requires that any agency adopting a planning document be reviewed by the County for "consistency." This consistency review, when completed, ensures that all agencies are using the Chelan County Comprehensive Plan as a base for

Growth Management Act:
A Capital Facilities Element includes: (a) an inventory of existing capital facilities owned by public entities, showing the locations and capacities of the capital facilities; (b) a forecast of the future needs for such capital facilities; (c) the proposed locations and capacities of expanded or new capital facilities; (d) at least a six year plan that will finance such capital facilities within projected funding capacities and clearly identifies sources of public money for such purposes; and (e) a requirement to reassess the land use element if probable funding falls short of meeting needs and to ensure that the land use element, capital facilities plan element, and financing plan within the capital facilities plan element are coordinated and consistent.

their plans, policies and projects. Appendix J summarizes the current planning status for various public agencies, the location of their planning documents, and adopted level of service (if any)

Additional capital facility information related to roads, utilities and parks is located in the Transportation Element, Utilities Element and the Park and Recreation Element. The six-year Capital Improvement Program is included as Appendix J.

II. Level of Service Standards

The GMA requires that levels of service be established for capital facilities. Levels of service (LOS) are quantifiable measures of the capacity or other service thresholds that are to be provided in the County.

The GMA indicates that public facilities needed to support a development should be concurrent (at the same time as) with the impacts of the development. The intent of this concurrency requirement is that no development or permit should be approved if it would result in a reduction in the LOS below the standards adopted by the County. This concurrency test must be met for transportation facilities in order for development to proceed. This test is encouraged but not expressly required for other types of public facilities. Minimum standards for levels of service for capital facilities provided by public entities are as follows, and as summarized in Appendix J.

Recommended Levels of Service Standards

Water	Proof of water availability in conformance with standards provided by The Washington State Department of Health and Chelan-Douglas Health District is required for development (RCW 19.27.097). This availability is also required to be confirmed by Chelan County, pursuant to RCW 36.70A.070.
Sanitary Sewer Systems	Treatment capacity should conform to standards set by the Washington State Department of Health. Treatment capacity must be adequate to treat peak flows. Collection systems must be adequate to accommodate 2.5 times the peak flow volume. In the rural areas, on-site sewage disposal will be utilized in conformance with the standards provided by The Washington State

	Department of Health (WAC 246-272A and B) and the Chelan-Douglas Health District. Limited sewer service to mitigate an existing health problem or protect surface water quality in areas of existing development may be allowed. Providing limited sewer service for the infill, development or redevelopment of existing intensive areas of rural development may also be allowed in conformance to the provisions outlined in the Growth Management Act.
Stormwater Systems	Stormwater from new development must be controlled so as not to contribute additional off-site flows that exceed predevelopment flow rates. Chelan County Public Works regulates and approvals stormwater plans throughout the County. All new development is reviewed for Construction and Post-Construction Stormwater Runoff Control Program applicability to control and remove off site flows that exceed predevelopment flow rates. Within the Wenatchee basin additional planning has been completed through the Comprehensive Stormwater Plan, adopted in 2012 and updated in 2021. This plan addresses conveyance concerns, water quality elements, operation and maintenance schedules and capital projects intended to address deficiencies within the Wenatchee basin. Stormwater projects associated with transportation facilities are managed and addressed within the Transportation Element.
School Districts	The standard for schools is the current State standard for funding under the School Construction Assistance Program as determined by the State Office of Superintendent for Public Instruction. OSPI also sets standards or guidelines for building condition assessments, which direct funding eligibility for capital improvements, and provides enrollment projections for school districts to use in facilities planning.
Fire Protection	The standard for fire protection is to be in accordance with the International Fire Code standards or alternatives as approved by the Chelan County Fire Marshal. Each fire district completes a strategic plan (which may be titled differently) that sets forth service goals,

	generally based on response times for different types of response (e.g., respond to urban areas within 6 minutes for 90% of the calls, with technical response time less than one hour).
Law Enforcement	The standard for law enforcement is to answer calls for assistance within a reasonable time consistent with the nature of the call.

III. Inventory and Planned Improvements

The following discussion generally describes capital facilities that are used in providing public services within Chelan County. During the preparation of this element of the plan, many agencies were contacted to provide information relative to capital facilities planning. Many of the agencies providing services or facilities have prepared comprehensive plans that will be adopted by reference and will be available for review at the specific agency or facility and at the Chelan County Community Development office. (See Appendix J.) In some cases, plans are being prepared by the service agency and are not yet available.

Water Systems

Domestic water is supplied by several hundred public and private sources. Larger systems are described below.

Water system classifications

A "public water system" means any system, excluding a system serving only one single-family residence and a system with four or fewer connections all of which serve residences on the same farm, providing piped water for human consumption, including collection, treatment, storage, or distribution facilities used primarily in connection with such system (WAC 246-291-010). The Chelan-Douglas Health District classifies a "Group A" system as serving 15 or more connections, regardless of the number of people, or a transient business with 25 or more customers per day for at least 60 days per year, or 10 or more dwelling units. A "Group B" system serves less than 15 connections and any of the following uses: food service establishments, residential treatment facility, transient accommodations, boarding homes, childcare, or nursing homes. A two party system is a public system but is exempt from the requirements for a "Group B" water system.

Chelan PUD Wenatchee Water System

The PUD system surrounds the City of Wenatchee's water system, extending north along SR 97 to Tree Top Fruit, west to Monitor, and south through Squilchuck to Forest Ridge Subdivision. Its service area is identified in the 2016 Wenatchee Water System Plan. The Regional Water System supplies source water and water rights.

Wenatchee Regional Water System

The City of Wenatchee and Chelan PUD developed the Eastbank Aquifer as a regional supply under the original 1979 Water Contract. East Wenatchee Water District (EWWD) joined through an amended contract in November 1998. The Regional Facilities include the facilities, lands, water rights, and rights-of-way developed to meet projected regional demand. Wells north of Rocky Reach Dam, east of the Columbia River, supply the City, PUD, and EWWD through metered connections that are also Regional Facilities.

Chelan PUD owns the aquifer property within the Rocky Reach Hydroelectric Project. The land is subject to Federal Energy Regulatory Commission licensing; FERC approved the PUD's permitting of the land to the City for Regional Facilities construction in 1979.

Facilities: Four operating groundwater wells and pumps; sodium hypochlorite injection; surge control; a control building and power supply; and a 30-inch ductile iron transmission line. The line transitions to 36-inch steel across the Columbia River Bridge (SR 2), then returns to 30-inch ductile iron. Appurtenances include 19 combination air/vacuum release valves, 16 drain stations, and seven mainline valves. Emergency standby wells are near Kentucky Street (wells 4 and 5) and Cascade Avenue (well 7) in Douglas County.

Radio telemetry links pressure and pump operation to the City's low (883) zone reservoirs and distribution system. It includes a source meter to monitor supply and determine chlorine dosage, and monitoring of EWWD and PUD supply stations.

Supply measure	Amount or status
Annual supply to three members	11,500 acre-feet
Eastbank Aquifer annual withdrawal rights	13,277 acre-feet
Total regional annual withdrawal rights	22,065 acre-feet, including Eastbank and other sources

Supply measure	Amount or status
Alternative source evaluation	Near Chelan PUD's Rock Island Dam in Chelan County, as of December 2016

Planning and needs: No capital improvements have been identified at this time.

Chelan PUD Chelan Falls Water System

Owned by Chelan Falls Water District and operated and managed by Chelan PUD. Located southeast of Chelan along the Columbia River, primarily in southwest Township 27 N., Range 23 E.

Inventory: Two wells, a pump station, a storage tank, and about 15,000 feet of 6- and 8-inch mains; approximately 140 connections.

Capacity and demand: Certificate G4-27862 authorizes 470 gallons per minute (gpm) and 300 acre-feet annually (97.8 million gallons). Reported annual supply is about 36.2 million gallons.

Planning and needs: No capital improvements have been identified at this time.

Chelan PUD Chelan Ridge Water System

South shore of Lake Chelan near Navarre Coulee Road and South Lakeshore Road.

Inventory: A groundwater well in First Creek State Park, a 100,000-gallon reservoir, and 8-inch PVC and ductile iron distribution lines; approximately 40 service connections plus Lake Chelan State Park.

Capacity and demand: Capacity and estimated future demand are 90 equivalent residential units (ERUs), with 30 ERUs allocated to the State Park.

Chelan PUD Olalla Canyon Water System

Olalla Canyon, west of Cashmere and north of US 2.

Inventory: A spring source, collection box, submersible pump, 3-inch HDPE transmission main, 100,000-gallon reservoir, and 6-inch ductile iron distribution system; 30 connections.

Capacity and demand: Water rights limit use to existing parcels. No additional users are planned.

Planning and needs: No capital improvements have been identified at this time.

Chelan PUD Dryden Water System

Along the Wenatchee River in Dryden, serving both sides of US 2.

Inventory: Two groundwater wells, 6- and 8-inch mains, and an 80,000-gallon concrete reservoir; approximately 62 connections.

Capacity and demand: Water right G4-27929C authorizes 150 gpm and 74 acre-feet annually (24 million gallons). Reported annual supply is about 7 million gallons.

Planning and needs: No capital improvements have been identified at this time.

Lake Chelan Reclamation District Water System

Serves Manson and surrounding commercial agriculture, rural residential, urban residential, and commercial uses. Agricultural and rural residential uses predominate; remaining uses are within the Manson urban growth area. LCRD purchased the domestic system in February 1922.

Inventory: Two Lake Chelan intakes, one raw-water reservoir, a water treatment plant, two finished-water reservoirs, and over 47 miles of distribution lines.

Capacity and demand: Approximately 1,690 connections and a summer peak tourist population of 6,000. The 2025 projection is 1,950 connections and a peak tourist population of approximately 8,500.

Planning and needs: The September 2021 Domestic Comprehensive Plan describes, analyzes, and proposes system improvements. Designed to concur with the County Comprehensive Plan, it is adopted by reference as part of this plan.

Malaga Water District

Serves Malaga and Stemilt. Smaller systems within district boundaries include Three Lakes Water District, Stemilt (water), and the Stemilt Irrigation District Domestic system. The District absorbed the latter in 2010, adding approximately 200 connections.

Inventory: Three wells, seven booster stations, nine reservoirs, and about 20 miles of lines along Malaga-Alcoa Highway, West Malaga Road, Joe Miller Road, Hamlin Road, and Crown Lane, with a spur to Stemilt Hill Road at the Stemilt Growers warehouse.

Capacity and demand: Reported connections total 534, compared with capacity of 1,000 and projected demand of 1,200.

Planning and needs: Up to 13 additional miles of water lines; at least one reservoir, approximately $600,000; and pipe and component replacement, approximately $400,000. Funding is described as difficult following loss of Public Works Trust Fund money. The 2018 Malaga Water District Comprehensive Plan is adopted by reference.

Three Lakes Water District

Serves the Three Lakes Subdivision, Three Lakes Golf Course, and one connection outside the subdivision. Wells are on Tract B, with a nearby reservoir.

Inventory: Two wells, looped distribution lines, and a 100,000-gallon concrete reservoir.

Capacity and demand: Capacity is 280 connections; possible subdivision buildout is 333 connections.

Planning and needs: Buildout requires more reservoir storage and additional water permitting through the Washington State Department of Ecology.

Chelan PUD Peshastin Water System

Serves the community north of the Wenatchee River, east of Leavenworth. Since the 2017 Comprehensive Plan, Chelan PUD acquired the former Peshastin Water District system. Governance shifted from an independent three-member elected commission to a regional, customer-owned utility with centralized management and capital planning.

Inventory: Three active groundwater wells, storage reservoirs, and a distribution network serving a few hundred residential and commercial connections. Infrastructure remains largely consistent with the former district.

Operations: Chelan PUD handles operations, maintenance, compliance, and long-term reliability within its broader water service framework.

Planning and needs: Phased improvements address aging infrastructure and capacity limits: well improvement or replacement, pump station upgrades, reservoir and safety work, and modern monitoring and controls. Funding combines PUD capital planning and customer rates, including localized adjustments for system costs.

Alpine Water District

Formed in late 1999 after customers purchased the PUD-built system. Serves Alpine Tracts, the YMCA camp, Midway Village residences, and Lake Wenatchee State Park.

Inventory: A source well and pump near Lake Wenatchee's east end, 13,800 feet of 6-inch mains along Chiwawa Loop Road, and a 100,000-gallon tank; 54 metered customers.

Capacity and demand: Near capacity in summer when the State Park, Cove Resort, and Midway Village are in use.

Planning and needs: The District is pursuing additional water rights from Ecology and will fund improvements with additional users.

Little Butte Water System

Owned and operated by the Little Butte Property Owners Association. Serves 46 lots on about 906 acres, approximately one mile up Chelan Butte Lookout Road.

Inventory: A lakeside pump house, filtration plant, 96,000-gallon reservoir, and distribution lines.

Capacity and demand: Water rights allow pumping from Lake Chelan.

Planning and needs: No capital improvements have been identified at this time.

Lake Wenatchee Water District

Created by the County Commissioners in May 2006 through Resolution 2006-65 following a favorable public referendum.

Inventory: Two reservoirs totaling about 175,000 gallons, one booster station, and three wells.

Planning and needs: The February 2011 District Plan, updated April 2020, addresses 6- and 20-year growth and includes a Capital Facility Plan. It is adopted by reference.

Planning and needs: No capital improvements have been identified at this time.

Stehekin Water Treatment and Distribution

The National Park Service serves its facilities and some private residences only in the Stehekin Landing area.

Inventory: A Group A transient non-community system that chlorinates groundwater from two 40-gpm, 85-foot-deep wells. A 100,000-gallon concrete tank, built in 1974, gravity-feeds distribution.

Capacity and demand: Production averages 4,145,000 gallons annually.

Planning and needs: No expansion is planned because demand is not projected to increase.

Other Water Systems

There are about 25 small water systems in the county which serve about 2,500 people. As privately-owned systems the planning and capacity is based on Department of Health regulation. Development permits (as noted above) are predicated on determinations of water availability.

Cashmere

- Dawn Lee Courts (100 people)
- Riverbend Mobile Park, LLC (75 people)
- Towns Mobile Home Park (24 people)
- Warner Flats Domestic Water Co Inc (100 people)

Chelan

- Chelan Park Ranches Water Assn (52 people)
- Holden Village (60 people)
- Little Butte Water System (48 people)
- River Irrigation District (280 people)
- Sunnybank Water System (89 people)
- Tract C Minneapolis Beach Homeowner (24 people)

East Wenatchee

- De Chenne Water System (34 people)

Leavenworth

- Chiwawa Communities Assn (150 people)
- Ponderosa Community Club Inc (182 people)
- River Bend Park Water System (47 people)
- Upper Ski Hill Water Assn (102 people)
- Whispering Pines Water Assn (86 people)

Palouse

- Lakeview Utilities (28 people)

Pateros

- Azwell Orchards (28 people)

Peshastin

- Valley Hi Community Club (219 people)

Wenatchee

- Apple Acres Village (212 people)
- East Monitor Water Assn (80 people)
- Turtlerock Homeowners Association (133 people)

Other

- Kahler Glen Golf & Ski Resort (40 people)
- Plain Flats Water System (26 people)

Sanitary Sewer Systems

On-site septic systems are anticipated for rural Chelan County because of lower densities and the cost of treatment plants. Chelan PUD's satellite system program, supported by a memorandum of understanding with the County, assists utilities with technical and administrative tasks, emergency response, and reliable water and wastewater service. The following inventory includes PUD systems and other systems serving areas outside incorporated cities and their urban growth areas.

Chelan and Lake Chelan sewer systems

The City of Chelan operates a collection system and two wastewater treatment plants, receiving sewage from city customers, LCRD on the north shore, and Lake Chelan Sewer District on the south shore.

Provider	Service area and facilities	Capacity and demand
Lake Chelan Reclamation District	North shore: up-lake of the down-lake tip of Rocky Point on SR 150; the City serves down-lake customers. Manson collection and the interceptor send sewage to Chelan for treatment and Columbia River discharge.	About 1,120 connections; summer peak tourist population 2,564. Capacity 1,585 connections. 2025 projection: 1,350 connections and peak tourist population about 5,700.
Lake Chelan Sewer District	Administered by the City of Chelan; all customers are in the County. Collection extends from about one mile up-lake of Minneapolis Beach to Chelan along SR 971 and SR 97A.	No capacity figure listed.

Manson sewers were installed in 1946. Primary treatment and disinfection preceded Manson Bay discharge until 1975, when the Manson–Chelan interceptor began conveying sewage to Chelan. LCRD assumed Manson collection in 1979 and the Manson–Rocky Point interceptor in 1994.

Planning and needs: No capital improvements have been identified at this time.

Chelan PUD Dryden wastewater system

Inventory and service: Gravity collection, a community septic tank, and a drainfield serving 52 connections. Service area unchanged since operations began in 1981.

Capacity and demand: Ecology permits peak-day discharge of 23,000 gallons; reported peak-day flow is approximately 21,000 gallons per day (gpd).

Planning and needs: No capital improvements have been identified at this time.

Chelan PUD Peshastin wastewater system

Inventory and service: Serves Peshastin north of the Wenatchee River, three miles east of Leavenworth. Pressurized collection carries septic tank effluent from homes and businesses to secondary treatment and discharge to the Wenatchee River. Approximately 180 connections; collection unchanged since 1997. The approved area expanded to the Peshastin UGA in 2009. Properties requesting extensions must pay under PUD line extension policies.

Capacity and demand: The source describes a permitted "maximum monthly flow of 110,000 gallons" and a reported "maximum monthly flow" of approximately 80,000 gpd; the time units require reconciliation.

Planning and needs: No capital improvements have been identified at this time.

Dryden and Peshastin water quality improvements

Ecology's August 2009 Wenatchee River Watershed Dissolved Oxygen and pH Total Maximum Daily Load Water Quality Improvement Report requires substantial phosphorus reductions at permitted wastewater facilities. As of December 2016, Chelan PUD was discussing a cost-effective alternative for Dryden and designing Peshastin improvements to meet Ecology's March 2020 deadline.

Planning and needs: No capital improvements have been identified at this time.

Chelan PUD Lake Wenatchee wastewater system

Inventory and service: Serves the lake's north and south shores. About 500 parcels have access; fewer than 300 receive service. Pressurized collection carries septic tank effluent to treatment near Highway 207 and Chumstick Highway. Effluent goes to the Wenatchee River in winter and a spray field in summer. Collection began in 1993, with minor extensions including Washington State Park in 1998; the approved area is primarily unchanged.

Capacity: The 2016 treatment upgrade was expected to accommodate typical growth for 20 years.

Planning and needs: No capital improvements have been identified at this time.

Stehekin wastewater treatment

Commented [SS3]: Needs a full update

Inventory and service: The National Park Service serves its facilities and some private residences at Stehekin Landing. Collection includes 12 manholes and gravity pipe built in 1979–80. A submersible duplex lift station, replaced in 2008, pumps through a force main to the 25,000-gpd plant. The factory-assembled skid plant uses physical-chemical treatment, with subsurface effluent disposal through a drainfield. Biosolids are dried and transported to Chelan's Wastewater Department before land application.

Planning and needs: The 1984 skid and tanks are corroded, and obsolete electromechanical controls are difficult to replace. NPS plans an integrated fixed-film activated sludge biological system, effluent filtration, and UV disinfection to meet Department of Health Treatment Level B limits. The project was awarded for construction in 2023.

Stormwater Controls

The stormwater system for most Chelan County's roads consists primarily of an "open" drainage system, which includes both roadside ditches and culverts conveying runoff to either a natural drainage area or a treatment facility. In the more urbanized areas, a limited number of "closed" drainage systems exist, which typically include a combination of curbs, gutters, catch basins, and below ground piping. These areas include Sunnyslope, Peshastin, Leavenworth, and Manson.

In January 2008, Chelan County adopted a surface and stormwater management utility boundary and program to fund and manage the stormwater needs within the unincorporated areas around the City of Wenatchee. Since then, the County has been collecting and analyzing data to identify stormwater system deficiencies, determining stormwater maintenance needs, and means to improve water quality. This information, combined with the prioritized capital facility projects, have been compiled into the Chelan County's 2012 Comprehensive Stormwater Plan, dated July 2012, that is adopted by this reference.

To avoid potential problems associated with new development and stormwater runoff, it is important to implement county stormwater standards at the time that the development proposals are considered for approval. The County owns and maintains stormwater facilities including 14 dry wells, 5 storage basins, 2,048 culverts, 110,721 feet of open drains, 10 detention areas and other related structures. New development is responsible for improving or extending facilities as necessary, or development is not allowed.

School Districts

- Seven public school districts serve the County. Part of the Azwell School District service area also crosses into Chelan County, but it has no facility buildings in the County. Enrollment and facility figures below retain their stated reporting dates; a dash means the source did not provide the information.

Lake Chelan School District

Facility and location	Size in sq ft	Enrollment	Capital needs
High School and Middle School 215 Webster St., Chelan	105,000	HS 450, including MAC; MS 299	Replace HVAC and bleachers; repair roofing and fire systems.
Morgan Owens Elementary 407 E. Woodin Ave., Chelan	60,464	555	Add electrical outlets; upgrade roof; replace cooling tower, carpeting, and flooring; improve drainage.
District Office 303 E. Johnson, Chelan	4,107	—	Upgrade electrical, plumbing, HVAC, lighting, roofing, and exterior.
Community Gym 1063 E. Woodin St., Chelan	24,995	—	Roof improvements.
Bus garage	—	—	Replace roof, electrical, plumbing, and HVAC.
Football field and locker rooms	13,670 as listed	—	Replace stands, building, track and field, lights, and irrigation.
Glacier Valley Alternative School and Nite Preparatory School 324 E. Johnson Ave.	See below	—	Replace building.
Ball fields Apple Blossom Road	—	—	Add restrooms and concessions.

- The special programs building, also called Glacier, dedicates 40% to fifth grade, 3,920 square feet to preschool, and 1,960 square feet to administration. The adjacent Flattop building is entirely dedicated to fifth grade. Total elementary space is 75,858 square feet for 630 students in 2016–17. The District also leases about 3,500 square feet from the City for CSI, an innovative high school.

Manson School District

- Enrollment is projected to remain stable.
- **Planning and needs:** District needs include transportation facility and football field updates.

Facility and location	Size in sq ft	Enrollment
Administration Office, 135 S. Hill St., Manson	1,200	—
Manson Elementary, 950 Totem Pole Rd., Manson	41,939	308
Manson Junior and Senior High, 1000 Totem Pole Rd., Manson	64,752	352
Football field	—	—

Cascade School District

- The District projects no significant enrollment increase within the next 5–10 years; the projection base year is not stated. Winton School closed and was replaced by Beaver Valley School in 2000 for kindergarten through fourth grade.
- **Planning and needs:** No capital improvements have been identified at this time.

Facility and location	Grades	Enrollment
District Office, 330 Evans St., Leavenworth, WA 98826	—	—
Beaver Valley School, 19265 Beaver Valley Rd., Leavenworth, WA 98826	K–4	—
Peshastin–Dryden Elementary, 10001 School Rd., Peshastin, WA 98847	K–4	178
John Osborn Elementary, 225 Central Ave., Leavenworth, WA 98826	K–4	268
Icicle River Middle, 10195 Titus Rd., Leavenworth, WA 98826	5–8	450
Cascade High, 10190 Chumstick Hwy., Leavenworth, WA 98826	9–12	518

Entiat School District

- The District projected enrollment of 450 in 2006–07 and anticipated a new school within 3–5 years on its existing 25-acre site. These are historical projections pending confirmation of outcomes.
- **Planning and needs:** No capital improvements have been identified at this time.

Facility and location	Size in sq ft	Enrollment
Paul Rumberg Elementary 2650 Entiat Way	23,163 plus 2,400 in portables	211

Facility and location	Size in sq ft	Enrollment
Entiat Junior and Senior High 2650 Entiat Way	23,855, including District office space	173
Elementary and high school offices	3,120	—
Multi-purpose room	9,263	—
Helen Kinzel Gymnasium	8,000	—
Concession stand	484	—
Bus Garage 13580 Davis St., Entiat	4,285	—

Cashmere School District

- The District reported near-capacity enrollment of 1,564 in 2016–17 and was pursuing a new school site for growth, with estimated construction cost of $23.5 million.
- **Planning and needs:** No capital improvements have been identified at this time.

Commented [SS5]: update

Facility or property	Location in Cashmere
Vale Elementary	101 Pioneer Ave.
Cashmere Middle School	300 Tigner Rd.
Cashmere High School	329 Tigner Rd.
Bus Garage	103 Paton St.
District Office	210 S. Division
Maintenance Office	103 Paton St.
Additional property	NNA Tigner Rd.

Wenatchee School District

- Enrollment figures in the following table are for 2014 where stated in the source.
- **Planning and needs:** The District identifies 500 children as the threshold for a new elementary school and anticipates a need as the Malaga–Stemilt–Squilchuck study area grows. Mission View, on Terminal Avenue in south Wenatchee, is the nearest elementary school. The study area's Squilchuck Road corridor would likely remain in Mission View's

service area because of transportation constraints. Approximately 25 acres have been acquired for future expansion in Malaga.

Facility and location	Grades and enrollment	Building size in sq ft and site acres
Wenatchee High 1101 Millerdale Ave.	9–12; 2,069	281,912; 37.98 acres
Wenatchee Valley Technical Skills Center 327 E. Penny Rd.	9–12; —	58,231; —
Westside High 1510 9th St.	9–12; 257	23,165; 7.05 acres
Valley Academy of Learning 1911 N. Wenatchee Ave.	K–10; 208	17,500; —
Foothills Middle 1410 Maple St.	6–8; 609	86,646; 16.61 acres
Orchard Middle 1024 Orchard Ave.	6–8; 485	78,997; 10.67 acres
Pioneer Middle 1620 Russell St.	6–8; 712	112,630; 13.89 acres
Columbia Elementary 600 Alaska St.	K–5; 450	48,509; 6.41 acres
John Newbery Elementary 850 N. Western Ave.	K–5; 513	54,504; 14.43 acres
Lewis and Clark Elementary 1130 Princeton Ave.	K–5; 450	52,093 including two portables; 6.62 acres
Lincoln Elementary 1224 Methow St.	K–5; 502	55,804 including five portables; 14.92 acres. Planned addition: 31,163 sq ft.
Mission View Elementary 60 Terminal Ave.	K–5; 535	54,774; 8.66 acres
Sunnyslope Elementary 3109 School St.	K–5; 305	41,417; 7.63 acres
Washington Elementary 1401 Washington St.	K–5; 582	38,216; 9.02 acres

Facility and location	Grades and enrollment	Building size in sq ft and site acres
Special Education Facility	K–8; —	17,977; —
Castle Rock Early Childhood Learning Center 112 S. Elliott	—	—; roof repair needed

Stehekin School District

- Stehekin Public School, Stehekin, WA 98852, serves the north end of Lake Chelan. Built in 1988, it has capacity for 30 students and reports nine K–8 students. Future enrollment is expected to remain at 5–15; no new school is anticipated.
- The District cannot directly fund high school education. Options include homeschooling, satellite schools, and alternative programs; information is available at the administration office. Public high school students meeting state and local eligibility criteria may receive in-lieu-of-transportation funds for room and board and a designated number of Lady of the Lake round trips.

Law Enforcement

The Sheriff's Office provides 24-hour service in unincorporated Chelan County and the contract cities of Cashmere, Leavenworth, Entiat, and Chelan. Substations are at Cashmere City Hall, the Fire District 3 building in Leavenworth, and Chelan City Hall. School resource officer contracts provide designated school-year service to Cascade, Cashmere, Lake Chelan, and Manson school districts.

Planning and needs: No capital facilities improvements are identified at this time.

Facility or asset	Inventory and condition
Regional Law and Justice Building, Wenatchee	Opened in 1984; houses Sheriff's headquarters, Regional Jail, Prosecuting Attorney, and Superior Court offices.
Jail and annex	A 66-bed annex was added in 2005 for Work Release and Inmate Worker participants. Renovations and double bunking bring reported capacity to 335 beds.
Vehicle fleet	Approximately 76 vehicles.

Facility or asset	Inventory and condition
Capital needs	Several facility areas still need attention following the 2010 HVAC, electronic door panel, and camera improvements; specific remaining projects are not listed.

Fire Protection

Chelan County is home to eight fire districts, using a mix of career and volunteer personnel or volunteers alone. Fire protection also includes the consolidated Wenatchee Valley Fire Department (also serving parts of Douglas County) and federal services in Stehekin.

Wenatchee Valley Fire Department

WVFD was established in 2022 through voter-approved consolidation of Chelan County Fire District 1 and Douglas County Fire District 2. It serves about 81,000 residents across 211 square miles, including Wenatchee, Sunnyslope, East Wenatchee, Malaga, and nearby unincorporated areas.

The department has 120 career, volunteer, and resident volunteer members, organized in multiple battalions with administration, training, logistics, and fire prevention support. Seven of ten stations are staffed 24 hours daily. The source describes regional fire authority governance with six commissioners elected from participating districts.

Services include suppression, basic life support EMS, hazardous materials response, low- and high-angle and water rescue, investigation, inspections, and public education. Hydrants cover about 21% of the area; agricultural and open space uses account for 71%. Wildland–urban interface conditions, tender reliance, access constraints, and growth affect service demand and risk.

Capital needs: The district plans to expand staffing and infrastructure, manage growth, improve communications and community risk reduction, and pursue national accreditation to guide service and performance standards. Facilities include engine and ladder companies, specialized resources, training, fleet, and administration.

Station	Location	Function or staffing
10 Headquarters	731 N. Wenatchee Ave.	Administration, training, ladder company
1	377 Eastmont Ave., East Wenatchee	Engine company, battalion chief
2	200 Airport Way, Pangborn Airport	Aircraft rescue and firefighting

Station	Location	Function or staffing
3	301 Rock Island Rd., Rock Island	Engine company
4	240 35th St. NW, East Wenatchee	Ladder company
11	206 Easy St., Wenatchee	Engine company
12	408 N. Western Ave., Wenatchee	Engine company
13	1836 S. Mission St., Wenatchee	Engine company
14	4852 Squilchuck Rd., Wenatchee	Volunteer station
17	3760 West Malaga Rd., Malaga	Volunteers; fleet and mechanical support

Fire District 3

Serves Icicle and Chumstick valleys, Leavenworth, and surrounding areas, including the Cashmere area. Personnel: four career firefighters and 20 volunteers.

Capital needs: Fire District 3 has identified the need for additional apparatus as shown in the table below.

Station and location	Facility value	Typical apparatus and value
1, 228 Chumstick Rd., Leavenworth	About $3 million	Career and volunteer station: two brush trucks, one tender, two engines, one ladder, one rescue, one utility, and three command vehicles; about $1.1 million.
2, mile 7.5 Chumstick Rd., Leavenworth	About $500,000	Career and volunteer station: one tender and one engine; about $240,000.

Timing	Capital need	Estimate
2027	Rescue truck	$300,000
2030	Tender and engine	$445,000
2035	Engine	$300,000

Lake Wenatchee Fire and Rescue

Lake Wenatchee Fire and Rescue serves populated areas of Plain, Lake Wenatchee, and the US 2 corridor from Chiwaukum to Cascade Meadows Church Camp and White Pine Creek. Personnel: two part-time firefighters and 39 volunteers. Reported districtwide equipment cost: $3.2 million.

Capital needs:

Station	Location in Leavenworth	Typical apparatus
91	21696 Lake Wenatchee Hwy.	Cargo trailer, engine, pumper, rescue, tender
92	2327 Pine Tree Rd.	Engine, pumper
93 and shop	19015 Beaver Valley Rd.	Engine, pumper, utility truck, two tenders
94	21300 Cayuse St.	Engine, pumper, first responder, tender

Fire District 5

Serves about 19 square miles in Manson and borders Fire District 7. Personnel: one career chief and 25 volunteers.

Capital needs: Replace Station 51 and update Station 52, which currently cannot accommodate growing needs. Improvements would allow station staffing and quicker fire and medical response. The District is researching grants and other funding, including the voter-approved bond levy from 2024.

Station	Location	Typical apparatus and ownership
51	250 W. Manson Blvd., Manson	Rented from Lake Chelan Reclamation District; two engines, one brush, one aid vehicle.
52	2010 Wapato Lake Rd., Manson	Two engines, one brush, one tender, one utility vehicle.

Fire District 6

Serves Monitor, Dryden, Peshastin, Valley Hi, and Cashmere.

Capital needs: Fire District 6 has identified the need to acquire a new engine by 2028, at the cost of approximately $450,000.

Station and location	Facility value	Typical apparatus and value
61, Monitor	$410,000	One engine, two brush trucks; $600,000
62, Dryden	$342,000	One engine, one brush truck, one command vehicle; $450,000
63, Peshastin	$282,000	One engine, one brush truck; $450,000
64, Valley Hi	$223,000	One engine, one brush truck; $300,000
Cashmere, number not listed	—	One tender, one brush truck, one pumper; $720,000

Fire District 7 Chelan Fire and Rescue

Established in 1926, Chelan Fire and Rescue serves 125 square miles in northeast Chelan County: Chelan, Chelan Falls, Union Valley, South Lake Shore, 25 Mile Creek, the north shore from Chelan to Manson, Chelan Airport, and Howard Flats to the Chelan–Okanogan county line.

Services include EMS and basic life support first response; prevention and public education; investigation; vehicle, residential, commercial, and wildland suppression; hazardous materials operations response; and technical rescue, including high/low angle, surface water, and ice rescue. Calls totaled 927 in 2015 and 887 in 2016.

Five stations provide service: one staffed by career personnel 24 hours daily and four by volunteers. One source passage reports 17 employees and over 40 volunteers; another reports 11 career firefighters and over 50 volunteers. The fleet is listed as six engines, four tenders, six wildland engines, one ladder, one medium air/lighting support vehicle, two command vehicles, one rescue boat, and one support vehicle.

Station and location	Typical apparatus	Staffing
71, 232 E. Wapato, Chelan	Two engines, ladder, light rescue, tender, ALS medic, two brush trucks, support, marine vehicle	24-hour staffing: lieutenant/EMTs, three firefighter/EMTs, ambulance EMT, ambulance paramedic; home volunteer program and 17 volunteers.
72, 20 Chestnut St., Chelan Falls	Brush truck, engine	Home volunteer program
73, 345 Idyll Spurs Lane, Chelan	Tender, engine	Home volunteer program
74, 46 Airport Way, Chelan Airport	Tender, brush truck, two engines	Home volunteer program
75, 12041 South Lakeshore Rd.	Engine, brush truck, tender	Eight volunteers

Capital needs: Apparatus replacement considers usage, technology, age, capability, and personnel safety. The service-life guide varies by area: engines, ladders, and tenders, 20–25 years; heavy support trucks, 15–20 years; brush/rescue trucks and staff vehicles, 10 years.

District 7 replacement schedule

Year	
2030	Tenders 74 and 75
2031	Tender 71
2034	Engine 71
Annual check	Brush 74; Tender 73

Fire District 8

Serves Entiat, the Entiat River Valley, Columbia River areas from Tenas George Canyon to Stayman Flats north and south of Entiat, and Navarre Coulee. Personnel: 40 volunteer firefighters. Reported districtwide equipment cost: $1.3 million.

Capital need: A future Stayman Flats station is planned; no cost or completion date is provided.

Station and location	Facility value	Typical apparatus
1, 2200 Entiat Way, Entiat	$1.1 million	Engine, two brush trucks, rescue truck, ambulance, tender
2, 4674 Entiat River Rd., Entiat	$235,000	Engine, brush truck, tender
3, 291 Moe Ridge Rd., Ardenvoir	$225,000	Engine/water tender, brush truck
4, Riverwood Subdivision, 20 miles up Entiat River Rd. from Highway 97	$55,000	Engine

Fire District 10 and federal services in Stehekin

District 10 provides wildland protection for 986 acres of private land and about 90 year-round residents in Stehekin Valley and Upper Lake Chelan. Under a memorandum of agreement, district volunteers may assist NPS, Department of Natural Resources, and other interagency personnel on federal land. The district has no structural firefighting capability.

Inventory and personnel: Five volunteer firefighters, including the chief. No station; a brush truck and two pumpers are parked at the power plant in winter.

NPS protects federal lands and federally owned structures in Stehekin and, under an agreement, provides initial wildland attack on nonfederal land. NPS is neither equipped nor staffed to protect privately owned structures.

Chelan County Properties

The following table shows other properties owned by Chelan County Public Works or General Government.

Commented [SS6]: What does Chelco call this?

Public Works organizes road maintenance by geographic district, with district shops or maintenance yards supporting snow and ice control, road grading and repair, shoulder maintenance and ditching, and traffic control device maintenance.

Chelan and Douglas counties coordinate on regional solid waste decisions, but each prepares its own Solid Waste Management Plan, including a hazardous waste element. Separate funding mechanisms mean facilities and disposal options are managed separately, with continued coordination on shared interests.

Name of facility	Address and verification	**Function**	**Facility value**
Core Public Works Maintenance Shops by District			
Wenatchee District Central	210 Easy Street Wenatchee, WA	Road maintenance; administrative headquarters nearby.	
Chelan County Public Works Cashmere Shop	5815 Wescott Drive Cashmere, WA	Road maintenance for Cashmere District.	
Chelan County Public Works Leavenworth Shop	10210 County Shop Road Leavenworth, WA	Road maintenance for Leavenworth District.	
Chelan County Public Works Entiat Shop	9486 Entiat River Road Ardenvoir, WA	Road maintenance for Entiat District.	
Chelan District	23290 Highway 97A Chelan, WA	Road maintenance serving the Lake Chelan corridor.	
Transfer Stations			
Dryden Transfer Station 18.53 acres	9073 Highway 2 Dryden, WA 98821	Solid waste transfer and recycling. Includes the approximately 9-acre Dryden landfill, closed in 1987. Recycling includes scrap metal, wood/brush, motor oil, antifreeze, aluminum, newspaper, cardboard, and plastics #1 and #2. Refuse hauled to Greater Wenatchee Regional Landfill under a contract through 2022. Closed landfill monitored quarterly for groundwater, cap settling, and erosion. Second tipping floor to accommodate an estimated 21,000 tons of garbage.	
Chelan Transfer Station 1.79 acres	23235 Highway 97A Chelan, WA 98816	Solid waste transfer; brush, scrap metal, motor oil, and antifreeze recycling. Adjacent City of Chelan Recycle Center accepts plastics, newspaper, cardboard, paper, aluminum, glass, tin, computers, and televisions.	
Manson Landfill Closed	Ivan Morse Road Manson, WA 98831 Ecology site 4455	County monitoring for quarterly groundwater, cap settling, and erosion.	

Name of facility	Address and verification	**Function**	**Facility value**
Miscellaneous			
Sludge Site 43.93 acres	5675 Colockum Road Malaga, WA 98828	Leased to the City of Wenatchee.	
Manson Landfill Closed Pit #406 12.52 acres	Ivan Morse Road Manson, WA 98831 Ecology site 4455		
Pit Sites			
Shaw Pit K-116 Pit #102 24.56 acres	Stemilt Hill Road		
Shugart Flats Gravel Pit #222 12.25 acres	12383 S. Shugart Flats Road Plain, WA 98826		
Colockum Pit 101 2.02 acres	No street address verified		
Boyd Road 5.12 acres	106 Boyd Road Chelan, WA 98816		
Malaga Pit K-129 5.0 acres	No address verified	Metal building and materials stockpile.	
Arne Sorlie Property 120 × 500 feet	No address verified	Within County right-of-way.	
West Malaga Pit K-104 Pit #104 15.43 acres	No address verified	Materials stockpile.	
Lepley Pit 0.8 acres	Chapman Road	Within County right-of-way.	
Washington Creek Pit PS-K-50 1.9 acres Pit PS-K-2116 2.7 acres	No address verified		

Commented [SS7]: I propose deleting the pit sites.

Name of facility	Address and verification	**Function**	**Facility value**
Leavenworth Day Pit K-155 Pit #220 9.2 acres	7747 E. Leavenworth Road Leavenworth, WA 98826	Materials stockpile.	
State Pit PS K 190	River Glen Orchards		
Stanley Borrow and Gravel 1.63 acres	No address verified		
Plain Pit Site 7 acres	273 State Haul Road Plain, WA 98826		
Navarre Coulee Pit #404	No address verified.		
Rose Avenue Site Pit #407	1165 Roses Avenue Manson, WA 98831		
Entiat Pit #300	No address verified		
Mud Creek Pit #304	No address verified		
County Buildings			
West Annex Building 17,250 sq. ft.	419–425 Washington Street Wenatchee, WA	40-bed jail facility, offices, and motor pool.	$2,620,000
Administration Building 17,848 sq. ft.	400 Douglas Street Wenatchee, WA 98801		$2,490,000
410 Building and Offices	410 Washington Street Wenatchee, WA 98801	Offices.	$592,000
Courthouse 50,625 sq. ft.	350 Orondo Avenue Wenatchee, WA 98801		$11,951,000
Detoxification Center 11,934 sq. ft.	327 Okanogan Avenue Wenatchee, WA 98801	Not funded by the County.	$2,575,000
Juvenile Administration 27,912 sq. ft.	316 Washington Street Wenatchee, WA 98801		$6,670,000
Juvenile Detention Two buildings 39,000 sq. ft.	300 Washington Street Wenatchee, WA 98801	50-bed facility.	$9,900,000

Name of facility	Address and verification	**Function**	**Facility value**
Law and Justice Building 98,560 sq. ft.	401 Washington Street Wenatchee, WA 98801	Includes the 394-bed regional jail facility.	$27,817,000
Jail Annex Facility 8,820 sq. ft.	335 King Street Wenatchee, WA	60-bed facility.	$839,000
Ohme Gardens	3327 Ohme Road Wenatchee, WA 98801	County park with a gift shop, caretaker residence, three maintenance buildings, restroom, lodge, and historic home.	$434,000
Wenatchee River County Park	2924 US Highway 2 Monitor, WA 98836	Office, caretaker's office, picnic shelter, three restroom buildings, shop and storage building, and water treatment building.	$717,000
Fish Ladder	6875 Highway 97	Managed by the Natural Resource Department.	$450,000
Expo Fairgrounds	5700 Wescott Drive Cashmere, WA 98815	County fairgrounds with multiple public-use buildings, maintenance buildings, barns, and storage buildings.	$7,970,000
`Airplane Hangar	NNA Airport Road Cashmere, WA		$7,000

IV. Six Year Capital Financing Plan

Capital facility planning often requires multi-year commitments of financial resources. Capital projects provide the framework to implement the Land Use Element and goals of the County Comprehensive Plan. The 2026-2031 Capital Improvement Program for financing facilities is included in Appendix J. In summary, the Program notes improvements for the Cashmere Dryden Airport, the Commissioners' Office, the County Expo Center, Wenatchee River County Park, Ohme Gardens, Public Works projects, the Regional Justice Center, Sheriff and Emergency Management, and other County facilities. The Program identifies funding sources and gaps in funding over the 6-year period.

Financing for some projects may assume outside grants or voter-approved bonds. If probable funding falls short or projects are eliminated, a reassessment of the land use element may be necessary to ensure consistency between the Comprehensive Plan and Capital Facilities.

V. Goals and Policies

Levels of Service

Levels of Service GOAL CF 1: Provide and maintain acceptable levels of public facilities and services.

Rationale: The provision and maintenance of public facilities and services should be consistent with the needs of the community they serve.

Policy CF 1.1: As the need arises, encourage and participate in the establishment of a regional forum to address area wide public facility and service and utility needs.

Rationale: Similar public facilities and services are provided by several entities that share mutual responsibilities and concerns. Coordination among agencies and districts, including consolidation of services if appropriate, would lead to increased efficiency and effectiveness in meeting needs on an area wide basis.

Policy CF 1.2: Ensure that public services and facilities are able to protect public health, safety, and welfare through planning, design, and improvements that consider future conditions such as population growth, development trends, and the changing impacts of natural hazards.

Rationale: Inadequate public services and facilities may pose a risk to the public.

Policy CF 1.3: Implement development regulations for the provision of public facilities and services that are flexible and receptive to innovations and advances in technology.

Rationale: It is important for local permitting agencies to keep their standards and permitting requirements current and applicable with advances in the provision of public facilities and services.

Policy CF 1.4: Adequate public facilities and services to serve development should be available when the impacts of development occur, or within a specified time thereafter, without decreasing established minimum levels of service.

Rationale: Establishing and maintaining locally desired levels of service for public facilities and services will help to ensure that facility and service needs are met.

Policy CF 1.5 Water Systems: Ensure water plans are consistent with the County's Comprehensive plan and the Growth Management Act.

Rationale: Effective comprehensive planning requires consistency among plan elements and plans.

Policy CF 1.6 Water Systems: Support and encourage water conservation measures by local purveyors and educate users on methods to conserve water.

Rationale: Water is a limited resource. Coordination of water use on a watershed basis is encouraged.

🥦 Policy CF 1.6.1 Water Systems: Support drought planning to increase water conservation, planting drought-tolerant species, and building awareness around individual risk from drought.

Rationale: The County's Natural Hazard Mitigation Plan addresses drought. The County can implement incentives for development to incorporate drought-tolerant landscaping or other design features that conserve water.

Policy CF 1.7 Water Systems: Ensure that individual and public water systems are permitted through the Chelan-Douglas Health District, the Department of Health and the Department of Ecology for appropriate separation requirements and environmental impacts.

Rationale: Seeking domestic water without respect to existing septic/drain field systems, wells and stormwater systems to reduce potential of contamination of the domestic water or negatively impacting existing wells.

Policy CF 1.8 Water Systems: Standards should be reviewed to ensure appropriate treatment and disposal of stormwater to protect domestic water sources from degradation.

Rationale: Storm water discharges are necessary but must be accomplished in an environmentally safe manner.

Policy CF 1.9 Sanitary Sewer Systems: Proactively plan for the development and maintenance of waste treatment and disposal systems to support long-term future development in the County.

Rationale: Obtaining funding and site approval for sanitary waste treatment and solid waste disposal facilities is typically a lengthy process. Projected growth of the area and distance of potential service from existing facilities should be periodically re-evaluated to ensure that these critical needs will be met in the long term.

Policy CF 1.10 Sanitary Sewer Systems: Plan all wastewater conveyance and treatment systems to be environmentally safe, to meet all federal, state and county legal requirements, and to support the orderly development of the County.

Rationale: Conscientious management in the conveyance and treatment of wastewater can help to prevent environmental impacts.

Policy CF 1.11 Sanitary Sewer Systems: Provide referrals to service purveyors during the development review process.

Rationale: Providing these entities referrals will help to ensure that adequate provisions for necessary services are provided.

🥦 Policy CF 1.12 Solid Waste: Coordinate with other jurisdictions in the development of recycling programs to reduce waste and to protect the environment.

Rationale: Staff works closely with all regions of the state, particularly the central and eastern counties. Forming a coalition for a voice of continued state support allows all the Chelan County to provide innovative approaches to solid waste disposal. Consistent with Chelan County Code, Chapter 13.20 promoting and expanding recycling programs, purchasing policies, and employee education can reduce the amount of waste produced and support County goals.

Policy CF 1.13 Solid Waste: Support a multi-jurisdictional approach to disposal of moderate-risk hazardous waste.

Rationale: This policy urges governmental entities in the region to give a high priority to instituting a medium hazardous waste collection program for appropriate disposal at a designated facility.

Policy CF 1.14 Solid Waste: Provide opportunities for the community to regularly and efficiently dispose of household moderate-risk waste and agricultural hazardous waste material.

Rationale: Funding of hazardous waste disposal is critical due to the nature of the material and dangerous handling requirements. Continuous funding assistance is needed by the State, due to the taxes collected on hazardous waste for prevention. Ongoing outreach to the state continues for the needs to fund the collection of hazardous waste. Currently, a facility is under construction and plans for operations where hazardous waste is prevented from contaminating our environment. This policy is intended to stress the importance of providing opportunities for disposal of household hazardous waste and agricultural industry generated hazardous waste.

🥬Policy CF 1.14.1 Solid Waste: Within the priorities of the Chelan Solid Waste Management Plan allow for effective waste-to-energy technologies.

Rationale: Per the County's Solid Waste Management Plan, when used with an energy recovery system, incineration can also produce steam and/or electricity for sale.

Policy CF 1.15 Solid Waste: Maintain and update the Chelan Solid Waste Management Plan.

Rationale: Solid Waste management planning and implementation is individual to the County and its source of funding. Programs will be coordinated with other jurisdictions for the success, efficiency and necessity to solve regional waste disposal problems.

🥬Policy CF 1.16 Stormwater Systems: Maintain up-to-date stormwater plans and regulations that address increased storm intensities and stormwater runoff.

Rationale: Appropriate standards for stormwater runoff for development are necessary to protect public and private resources.

🥬Policy CF 1.16.1 Stormwater Systems: Encourage green stormwater infrastructure that incorporates drought and fire-resistant vegetation where possible.

Rationale: Reduces the impacts of natural hazards.

Policy CF 1.17 Schools: Coordinate with school districts on major development proposals and long-term growth trends to evaluate potential impacts of growth and implement appropriate measures to offset these impacts, such as impact fees or permit conditions.

Rationale: A quality school system is vital to the future of the County. Facilities and services should be up-to-date and consider long-term trends.

Policy CF 1.18 Park and Recreation Facilities: Encourage the continued maintenance and expansion of parks and recreation facilities to meet the needs of area residents and visitors.

Rationale: Access to parks, recreation facilities, and open spaces, contributes to a higher quality of life for area residents and makes the County a more enjoyable place to live and visit.

Policy CF 1.19 Law Enforcement: Ensure the Chelan County Sheriff's Office is able to provide adequate law enforcement services to the County by providing sufficient quantity and quality of facilities, equipment and manpower, as available within the budget.

Rationale: The Sheriff's Office needs to be maintained and improved to meet law enforcement needs, as the County continues to develop.

Policy CF 1.20 Fire Protection: Ensure that development conforms to all applicable requirements of the International Fire Code or alternatives as approved and administered by the Chelan County Fire Marshall.

Rationale: Provisions must be made for the protection of life and property from fire.

Policy CF 1.21 Fire Protection: Ensure the County Fire Districts are able to to provide adequate fire protection to their service areas in terms of quantity and quality of facilities, equipment and manpower, as available within the budget.

Rationale: The fire districts need to be maintained and improved to meet fire protection service needs, as the County continues to develop.

Policy CF 1.22 Fire Protection: Develop a program of fire inspections for all structures, open to the public or used for overnight accommodations.

Rationale: Older buildings or buildings which have undergone a change in use need to be inspected for fire risk and corrective actions taken as necessary. Newer buildings, although presumably inspected during the permit process, should be reviewed on a periodic basis.

Policy CF 1.23 Fire Protection: Maintain mutual aid agreements between city, county, state and federal agencies to provide coordinated fire protection to best serve the residents.

Rationale: A large part of the County is not within a fire protection district. It is essential to the public safety in the County that fire protection be coordinated between all available fire suppression agencies.

Policy CF 1.24 Health Care: Encourage the continued availability of responsive, public and private health care programs and facilities to meet present and future needs.

Rationale: Health care planning needs to adjust to the population it serves. The senior citizen population (65 years and older) is increasing annually. Health care planning must adjust to these changes and the expected growth of the area.

Policy CF 1.25 Health Care: Encourage the continued support of volunteer ambulance services.

Rationale: Volunteer ambulance service plays an important part of the emergency/life safety response in the County.

Policy CF 1.26 Public Buildings and Facilities: Locate and build public facilities so that they are accessible to all segments of the population, including pedestrians and those with special needs.

Rationale: Public facility planning should consider convenient transportation and pedestrian access, and access for those with special needs.

Policy CF 1.27 Public Buildings and Facilities: Encourage and incentivize energy audits policies and the use of energy conservation design strategies in new construction and the rehabilitation of public facility structures.

Rationale: Energy conservation design strategies for public facilities will help to conserve resources and maintain budgets within the anticipated available funding capacities.

Policy CF 1.28: All capital facilities that support life, safety, and welfare should incorporate resilient measures, such as backup power, redundant communications, floodproofing, fire-resistant materials, and air filtration.

Rationale: Protects the community from natural hazards.

Provisions for Adequate Facilities and Services in Conjunction with Land Use

GOAL CF 2: Plan and provide for adequate public facilities and services to serve the County's planned land use patterns.

Rationale: Without the support of necessary public facilities and services, desired land use patterns outlined in the comprehensive plan may not be achieved.

Policy CF 2.1: Where feasible, secure easements to loop sewer and water systems along a logical alignment in preparation for future development.

Rationale: Looped sewer and water systems provide for a more efficient and cost effective provision of services.

Policy CF 2.2: Plan for land use patterns that are conducive to efficiently extending future public facilities and services, which will minimize construction costs.

Rationale: Concentrating development within urban growth areas where adequate public facilities and services exist will allow those facilities and services to be provided in a more efficient manner.

Policy CF 2.3: Size capital facilities to meet anticipated growth in the service area.

Rationale: Capital facilities plans should consider the anticipated growth of service areas to assure that new facilities do not become obsolete due to under-sizing which could result in untimely expansion.

Policy CF 2.4: In rural areas, design public facilities and services to be compatible with the rural and scenic character of the County.

Rationale: Maintaining the rural characteristics of the planning area should be a strong consideration when reviewing the design and location of public facilities and services.

Policy CF 2.5: Extend necessary public facilities and services may be provided for the redevelopment, in-fill and development of existing commercial, mixed use, residential, shoreline and industrial sites outside of urban growth areas consistent with the GMA.

Rationale: The Growth Management Act allows for the provision of necessary public facilities and services for intensely developed rural areas.

Policy CF 2.6: Extend urban governmental services to rural areas when necessary to protect basic public health and safety and the environment, consistent with the Growth Management Act.

Rationale: The Growth Management Act (RCW 36.70A.070(5)(d)) permits for the provision of urban governmental services in rural areas where it is necessary to protect basic public health and safety, and the environment.

GOAL CF 3: Ensure that funding for necessary public facilities and services is identified and that the mechanisms for the collection of fees or revenue are established.

Rationale: Adequate funding for public facilities and services and the mechanisms to attain needed funding should be identified in order to ensure that necessary public facilities and services can be provided for.

Policy CF 3.1: Provide and maintain a six year plan that will finance needed capital facilities within projected funding capacities and which identifies funding sources for such purposes.

Rationale: The Growth Management Act requires local jurisdictions planning under the act to provide a six-year financing plan that identifies sources of funding for needed capital facilities.

Policy CF 3.2: Where appropriate, employ innovative financing strategies for capital improvements, to minimize financial costs to taxpayers and equitably assign costs between existing and new development.

Rationale: Using a variety of alternatives for financing capital improvements will provide a more fair distribution of costs to County residents.

Policy CF 3.3: Establish a process for inter-jurisdictional analysis of annexation-related impacts. On a case by case basis, coordinate with cities to minimize potential economic impacts of annexation activities by implementing development agreements or contracts that:

1. Compensate the County for loss of tax revenue, from annexation of significant industrial and commercial areas during the affected budget cycle; and/or
2. Compensate the city for the cost of providing services and maintenance of infrastructure to newly annexed areas during the period prior to the change in dispensation of full tax revenue. This may include contracting with the County to provide services to newly annexed areas during this interim period.

Rationale: Developing agreements between the County and cities would minimize the potential impacts of annexation activities in the future.

Policy CF 3.4: Impact fees, as provided for under RCW 82.02, should be considered as a means to assure that new development pays its share of the cost of improvements associated with new growth and equitably contributes to the overall financing of capital improvements.

Rationale: Impact fees directly assign a proportionate share of the cost of development to those who will benefit from capital improvements.

Policy CF 3.5: Capital facilities planning should establish shared funding responsibilities among and between local governments, utility purveyors, special purpose districts and the private sector.

Rationale: Coordination of capital facility planning would provide for more efficient, and therefore less costly infrastructure improvements.

Policy CF 3.6: Encourage the multiple use of public facilities.

Rationale: Public facilities designed for multiple use and/or seasons can be more cost effective and provide additional service to residents and visitors.

Policy CF 3.7: Development should carry a proportionate share of the cost for extending and increasing the capacity of needed public facilities and services, in the absence of impact fees.

Rationale: Existing users should not be responsible for costs associated with collection and distribution systems to serve new development. On the other hand, new development should not bear the total cost of new treatment or production facilities that benefit existing users.

Policy CF 3.8: The land use element and desired levels of service should be reassessed if available funding falls short of meeting existing needs. The land use element, capital facilities element, and the financing plan within the capital facilities element should also be coordinated and consistent.

Rationale: This will help to ensure that growth and needed public facilities and services are provided in an efficient and sustainable manner.

Policy CF 3.9: Develop capital facilities that are resilient to the impacts of natural hazards to ensure facilities remain operational during and after disaster events and to support fiscal responsibility.

Rationale: Capital facilities are large investments, and the impacts of future natural hazards should be considered in the design, placement, and operations.

GOAL CF 4: The County should provide a means for the siting of essential public facilities.

Rationale: Essential public facilities include those facilities that are typically difficult to site, such as airports, state education facilities and state or regional transportation facilities, state and local correctional facilities, solid waste handling facilities and inpatient facilities including substance abuse facilities, mental health facilities, secure transitional facilities, group homes and other facilities as defined by RCW. The comprehensive plan must make provisions for the siting of essential public facilities (RCW 36.70A.200).

Policy CF 4.1: Essential public facilities identified by the County, by regional agreement, or by the Office of Financial Management should be subject to the following siting process. A review of possible essential public facilities should occur at least every six years. When essential public facilities are identified and proposed the local government(s) will:

1. Appoint an advisory County-Wide Project Analysis and Site Evaluation Committee composed of citizen members selected to represent a broad range of interest groups. It will be this committee's responsibility to develop specific siting criteria for the proposed project and to

identify, analyze, and rank potential project sites. In addition the committee shall establish a reasonable time frame for completion of the task.

2. Ensure public involvement through the use of timely press releases, newspaper notices, public information meetings and public hearings.
3. Notify adjacent jurisdictions of the proposed project and solicit review and comment on the recommendations made by the Advisory Project Analysis and Site Evaluation Committee.

Rationale: This process will ensure that there is a process established for the siting of essential public facilities and that there is an equitable distribution of these types of uses.

Policy CF 4.2: As identified essential public facilities are addressed, standards should be generated to ensure reasonable compatibility with other land uses is achieved.

Rationale: Development of siting standards for essential public facilities will help to insure that they are appropriately sited and that the impacts to surrounding land uses will be mitigated.

🥦 Policy CF 4.3: Essential public facilities should not locate in Resource Lands, Critical Areas, or areas with high risk of natural hazards, unless necessary and where compatible.

Rationale: Resource Lands and Critical Areas are not the appropriate areas for the siting of most essential public facilities.

CHAPTER 7
UTILITIES ELEMENT

I. Introduction

The Utilities Element has been developed in accordance with the Growth Management Act RCW 36.70A.070 and WAC 365-195-320 to address utility services in Chelan County. The Utilities Element is intended to support coordination of land use planning and infrastructure planning between the County, local jurisdictions and utility purveyors such as natural gas, electrical service, and telecommunications.

The Utilities Element has also been developed in accordance with the county-wide planning policies and has been integrated with all other planning elements to ensure consistency throughout the comprehensive plan. The Utilities Element specifically considers the general location, proposed location, and capacity of all existing and proposed utilities, including telecommunications infrastructure, in compliance with RCW 36.70A.070(4)(a) (2023) and WAC 365-196-420.

This Comprehensive Plan provides a brief description of the public and private utility purveyors that operate in Chelan County and encourages these purveyors to align their capital improvements with the goals and policies of this Comprehensive Plan. The County serves as a coordinator for population growth and related development, encouraging utility purveyors to maintain close communication with the County in regard to the capacity of their systems and to coordinate and review the development of their plans. The goals and policies in this Element shall support the development of utility service regulations to ensure reliable and efficient service delivery to a growing County population.

II. Inventory and Analysis

This section provides an inventory of utilities and their service providers, in compliance with RCW 36.70A.070(4)(b) (2023). It includes public entities and special purpose districts that own utility systems, along with information on the general location, proposed location, and capacity of all existing and planned utilities.

Telecommunication Services

Local broadband and/or telephone service in Chelan County is provided by multiple companies including Ziply Fiber (formerly GTE Northwest), CenturyLink, Spectrum, and LocalTel Communications, for example. Chelan County PUD also provides fiber-optic broadband services to many areas within the County.

Wireless telecommunications service providers include AT&T, Verizon, T-Mobile, and other regional carriers. Federal regulations continue to evolve to address small-cell technology, which improves service coverage by enabling placement on existing infrastructure such as power poles. The general locations of existing telecommunications infrastructure include urban centers such as Wenatchee, Chelan, Leavenworth, and Cashmere, with proposed expansions focused on underserved rural areas and new development zones.

Natural Gas

Natural gas service is provided by Cascade Natural Gas Corporation. Natural gas service is available along major roadways in the Wenatchee and Sunnyslope/Olds Station areas. Expansion depends on customer demand and planned developments. Propane service is provided by Empire Gas, AmeriGas, Ag Supply, and Wenatchee Petroleum, depending on location. Propane delivery is provided to a number of customers in the County. Growth of this fuel as an alternative to electricity will depend on the ability of the PUD to provide electrical service and the specific needs of the customers.

Electrical Utilities

All public electric power in the County is provided by Chelan County Public Utility District No. 1 (PUD), a special-purpose public agency governed by an elected board of commissioners. The Chelan County PUD operates numerous electrical substations and switchyards throughout the County. Proposed substations and transmission upgrades are planned to support population growth in Manson, South Wenatchee, and Sunnyslope.

The District's goal is to provide uninterrupted electrical service within their service area. To satisfy this goal, the PUD has in place electrical sub-stations at the following locations:

1. Wapato
2. Manson
3. Union Valley

4. Chelan
5. Chelan Falls Switchyard
6. Winesap
7. Entiat
8. Entiat Valley
9. Rocky Reach Switchyard
10. Rocky Reach
11. Malaga
12. Kawecki (Malaga)
13. Valhalla McKenzie (Malaga)
14. Alcoa
15. Squilchuck
16. Olds Station
17. Sunnyslope
18. Mission (Cashmere)
19. Sunset (Cashmere)
20. Peshastin/Dryden
21. Anderson Canyon Switchyard (Peshastin)
22. Leavenworth
23. Plain
24. Lake Wenatchee
25. Winton Mill
26. Coles Corner
27. Berne (Stevens Pass)
28. Summit (Stevens Pass)

Chelan PUD advances a set of long-term goals that reflect its role as a customer-owned utility committed to reliable, affordable, and sustainable energy services. These include proactively reducing wildfire risk through continued investment in forest health, system resilience, and community partnerships; maintaining affordable utility rates by ensuring that state and regional programs complement, rather than shift costs onto, local customers; supporting responsible growth by aligning energy planning with resource adequacy and transparency from large load development; and facilitating timely development of transmission and generation infrastructure through efficient permitting and coordinated regulatory processes. Collectively, these goals emphasize local governance, system reliability, and environmental stewardship, positioning Chelan PUD to meet

increasing energy demands while protecting the long-term interests of Chelan County residents and businesses.

III. Goals and Policies

GOAL UE1: Enhance the efficiency and quality of service from utility providers through the coordination of utility, land use, and transportation planning.

Policy UE 1.1: Encourage effective and timely coordination of all public and private utility construction activities, including trenching, to minimize costs and public inconvenience.

Rationale: Coordination of utility trenching activities will allow less costly and less frequent right-of-way repairs and fewer inconveniences to the public.

Policy UE 1.2: Encourage system design to minimize service interruptions.

Rationale: Minimizing interruptions is beneficial to the public.

Policy UE 1.3: Promote the consolidation of utility facilities where feasible.

Rationale: Appropriate consolidation will reduce the overall costs and inconveniences to the public. Examples of facilities that could be shared are: towers, poles, antennas, substation sites, trenches, and easements.

Policy UE 1.4: Coordinate County and local jurisdiction's roadway projects with planned utility expansions, improvements, or extensions where shared sites or rights-of-way may be appropriate. Similarly, encourage utility purveyors to coordinate their utility expansions, extensions or improvements where shared sites or rights-of-ways may be appropriate.

Rationale: Coordination will allow consideration for the appropriate locations of utilities and timing of utility installations.

Policy UE 1.6: Development regulations should provide for adequate utility rights-of-ways or easements concurrent with development.

Rationale: Assurance of adequate right of way or easements helps to ensure that necessary services for development are provided.

🥬 Policy UE 1.7: Coordinate with Chelan County PUD to increase the resiliency of the electric grid and reduce the risk of wildfires through maintenance, upgrades, and vegetation management, among other methods.

Rationale: Reduces potential fire starts caused by electrical infrastructure and increases the reliability of the electric grid when wildfires occur.

🥬 Policy UE 1.8: Coordinate with energy utilities to improve the safety and reliability of infrastructure vulnerable to natural hazards and changing conditions.

Rational: Reduces the risk of power outages during natural hazard events and ensures the long-term viability of utilities.

GOAL UE 2: Provide utilities in a manner which maintains the visual qualities of the County.

Policy UE 2.1: Require underground placement of new electrical and telecommunication lines where feasible.

Rationale: Utilities placed underground help protect the safety of the citizens, may reduce maintenance costs, and maintain a less cluttered environment.

Policy UE 2.2: Require the placement of cellular communication facilities in a manner which minimizes adverse impacts to surrounding land uses.

Rationale: Compatibility with adjacent land uses should be considered when reviewing such facilities.

Policy UE 2.3: Ensure that all maintenance, repair, installation, and replacement activities for utility facilities are consistent with the County's critical area regulations.

Rationale: Where placement of utility facilities within critical areas is necessary, development shall be consistent with the requirements of the County's critical area regulations.

Policy UE 2.45: Development regulations should provide for adequate buffering and screening of utility facilities where such facilities may have a negative visual impact on surrounding land uses or where public access to such facilities should be limited for safety concerns.

GOAL UE 3: Ensure that adequate public utilities are provided to meet the projected and desired land use patterns within the County.

Policy UE 3.1: Encourage energy conservation and the use of cost-effective alternative energy sources, such as solar and wind power.

Rationale: Energy conservation is essential as the County accommodates more people. The utilization of other energy sources should be explored and implemented where feasible.

Policy UE 3.2: Incentivize the use of energy conservation design strategies in new construction and rehabilitation of existing residential, commercial, industrial and public facility structures.

Rationale: As the County develops, the demand for energy will grow. Conservation is vital to continue serving the County and maintain productive and livable lifestyles.

Policy UE 3.3: The capacity of extended utilities should be adequate to meet anticipated growth in the County.

Rationale: Utilities should consider the anticipated growth of the County to assure that new facilities do not become obsolete.

Policy UE 3.4: Implement development regulations for provision of utilities that are flexible and receptive to innovations and advances in technology.

Rationale: As the utility industry advances in technology it is important for local permitting agencies to keep their standards and permitting requirements current and applicable.

Policy UE 3.5: Stehekin Area: Enhance the County's hydroelectric power generation capabilities through improvements to system efficiency, maintenance of hydroelectric facilities, and protection of facilities from erosion and flooding.

Policy 3.6: Urban governmental services should not be extended into or expanded within rural areas except under limited circumstances necessary to protect basic public health, safety, and the environment. Extensions should be financially supportable at rural densities, should not induce or

permit urban-scale development, and should comply with applicable state law and other agreements.

Rationale: Restricting such extensions (unless necessary for health, safety, or environmental) preserves rural character, supports agricultural and resource uses, and reduces the fiscal burden of providing infrastructure in sparsely populated areas. This policy is consistent with RCW 36.70A.110(4), amended in 2021.

🥬 Policy UE 3.7 Countywide: Promote development that recognizes and efficiently utilizes renewable sources of energy like hydropower.

Rationale: Chelan County is a region with an abundance of renewable hydroelectric energy resources.

GOAL UE 4: Document, monitor, and track all public utilities, facilities, and services that are required by the GMA.

Policy UE 4.1: Establish a list of information and contact information for utilities and public entities, including special purpose districts that own utility systems that are necessary to support development.

Rationale: Establishing a list of public entities that own utility systems contributes to coordination and work endeavors development efforts.

Policy UE 4.2: Map the distribution of GMA-required services and facilities, and provide an inventory of existing facilities, level of service standard, and forecast of future needs for those utilities and public facilities and services deemed necessary to support development.

Rationale: Mapping public entities that own utility systems contributes to coordination and work endeavors with other public entities in development efforts.

Policy UE 4.3: Encourage jurisdictions to coordinate on the data, analysis, and methodologies relating to the levels of service standards for all public facilities and services that are required by the GMA. Each jurisdiction may implement and monitor its own level of service standards in accordance with each jurisdiction's adopted comprehensive plan.

Rationale: Coordination on data, analysis, and methodologies between jurisdictions helps ensure practices and level of service standards remain generally consistent within the county.

GOAL UE 5: Protect the quality and quantity of groundwater used for public water supplies.

Policy UE 5.1: Coordinate with local and regional jurisdictions to develop and implement stormwater management programs that manage runoff and improve water quality before discharges reach surface waters or groundwater supplies.

Rationale: Stormwater utilities are critical in managing infrastructure designed to capture, convey, and treat runoff. By coordinating with land uses regionally, development can address drainage and flooding issues that cross jurisdictional boundaries, ensuring consistency in water quality protections. This policy supports compliance with state and federal clean water requirements and protects aquatic ecosystems.

Policy UE 5.2: Prioritize the protection of groundwater resources by maintaining and upgrading water and wastewater infrastructure to prevent contamination, reduce leakage, and safeguard aquifer recharge areas that support public water supplies.

Rationale: By proactively investing in infrastructure and implementing protective measures, utilities reduce the likelihood of contamination, preserve long-term water supply reliability, and enhance public health.

CHAPTER 8
ECONOMIC DEVELOPMENT ELEMENT

I. Introduction

The Economic Element is an optional element in the Comprehensive Plan. The County recognizes the importance of healthy economic development in maintaining the stability of the local economy and quality of life while providing flexibility to serve the community in periods of growth and recession and is open to periodic review and refinement. Industries in Chelan County serve diverse markets and needs that include local, regional, state, national and international markets.

The purpose of the Economic Element is to set goals and establish policies that encourage and support effective economic development efforts and promote economic growth, vitality, and a high quality of life for the future of Chelan County where all residents can thrive. Provisions to support these goals are also integrated in the land use, housing, utilities, and transportation elements.

Growth Management Act Economic Goal: Encourage economic development throughout the state that is consistent with adopted comprehensive plans, promote economic opportunity for all citizens of this state, especially for unemployed and for disadvantaged persons, promote the retention and expansion of existing businesses and recruitment of new businesses, recognize regional differences impacting economic development opportunities, and encourage growth in areas experiencing insufficient economic growth, all within the capacities of the state's natural resources, public services, and public facilities.

II. General Economic and Income Profile

Population & Education

As of 2024, the population has grown moderately by 11% in the last 10 years and is expected to continue growing slowly through 2046.[39] The share of residents with a high school diploma has increased by four percentage points from 2014 to 2024. The number of people with Bachelor's

[39] Washington Office of Financial Management, Official Population Estimates

Degrees has also increased by about the same amount in that period. The number of people with graduate degrees, however, has decreased.[40]

Employment by Sector

Due to the close proximity of the regions two largest cities – Wenatchee (Chelan County) and East Wenatchee (Douglas County), both Chelan and Douglas Counties are interlinked for employment, housing and retail. The four sectors employing the largest number of workers are agriculture (forestry, fishing), healthcare and social assistance; local government and accommodations and food services[41] .

Table8-1
Top Employment Sectors in 2024

Sector	Number of jobs	Share of employment
1. Agriculture, forestry and fishing	7,763	17.3%
2. Local government	7,180	16.0%
3. Healthcare and social assistance	7,105	15.8%
4. Accommodation and food services	4,857	10.8%
5. Retail trade	4,328	9.6%
Total covered employment	44,962	100%
All other industries	13,729	30.5%

Source: Washington Employment Security Department, Covered Employment (QCEW)

Douglas County is similar with agriculture (forestry, fishing) at 19.8%, local government at 18.8%, retail trade at 15.2% and accommodations and food services at 8.4%.[42]

Unemployment

Unemployment in the region is typically higher than the state average; however, it has decreased significantly since 2014. Historically higher unemployment is largely a result of the seasonal nature of the county's biggest employer agriculture, forestry, and fishing.

[40] Census Bureau, 1-Year ACS 2014 & 2024, Table S1501
[41] Washington Office of Financial Management
[42] Washington Office of Financial Management

Table8-2
Unemployment Percentages

Region	2014	2019	2024
Chelan County	6.0%	5.3%	4.7%
Douglas County	6.9%	6.1%	5.1%
Washington State	5.9%	4.2%	4.5%

Source: Bureau of Labor Statistics, Local Area Unemployment Statistics

Income Levels

Median household income measures all sources of income – wage/salary, investments, rents, pensions, transfer payments. The median household income is the value at which 50% of households in Chelan are below and 50% are above. Households are different from families, since they may contain unrelated people living together or single inhabitants in a dwelling. Household income in 2023 was estimated to be $84,430 for Chelan County as compared to $94,553 for Washington State[43].

Average Annual Wage by Industry

The total covered payroll in 2024 in Chelan County was approximately $2.59 billion. The average annual wage was $57,539 or 62.2 percent of the state average of $92,467.[44]

Table8-3
Top Five Industries by Payroll in 2024

Chelan County Sector	Countywide Payroll	Percent of Payrolls
1. Local government	$555,769,034	21.5%
2. Healthcare and social assistance	$549,333,976	21.2%
3. Agriculture, forestry and fishing	$286,685,187	11.1%
4. Construction	$255,146,501	9.9%
5. Retail trade	$166,971,244	6.5%
Total covered payrolls	$2,587,071,256	100%

[44] Washington State Employment Security Department Overview

Chelan County Sector	Countywide Payroll	Percent of Payrolls
All other industries	$773,165,313	29.9%

Source: Washington Employment Security Department, Covered Employment (QCEW)

Although agriculture was clearly the largest job provider in Chelan County in 2024, with 17.3 percent of total covered employment; local government and healthcare & social assistance each provided a payroll over $500 million, ranking these industries first and second out of 22 industries/categories in wages and accounting for 21.5 and 21.2 percent, respectively. More than one out of every five dollars earned in Chelan County is earned in local government, and another one out of five dollars is earned in health services (i.e., at a doctor/dentist's office, in a hospital, nursing home, vocational rehab facility, etc.).[45]

Overall, in terms of employment, Chelan County's economy has grown 1.7 percent since 2019. Table 8-4 displays the top 15 fastest growing industries during this period. Of these top 15, four are from the Healthcare and Social Assistance sector, another four are from the Manufacturing sector, and two each from the Construction and Retail Trade sectors. In manufacturing, the Other Aluminum Rolling, Drawing, and Extruding went from virtually no presence, four jobs in 2019, to over 100 jobs in 2024 and several other industries went from less than 100 jobs to multiple hundred in 2024 including Lessors of Other Real Estate Property and Electronic Connector Manufacturing.

Table 8-4
Top 15 Fastest Growing Industries by Employment, 6-digit NAICS, 2019–2024

NAICS	Industry Name	2019	2024	Change	% Change
531190	Lessors of Other Real Estate Property	71	362	291	409.9%

Cost of Living Index for Selected Cities

Data collected for Chelan County indicates that Chelan County is less expensive to live in than Washington State but more than the US average. The index measures relative price levels for consumer goods and services in those participating areas; it does not measure inflation of price changes over time. A 'cost of living index' above 100 means that community is more expensive than the US average; below 100 means that community is less expensive than the US average.

Table8-5
Cost of Living

Washington State	121.9
Chelan County	107.6

Source: Sperling's Best Places 2024

Commuter Patterns

Chelan County is highly connected to surrounding Counties for workforce and employment opportunities. Of roughly 45,500 total employees, about 35% of Chelan County employees live and work in the county. Another 34% commute from outside the county to work in the county. The remaining 31% live in Chelan County but commute elsewhere for work.

III. Goals & Policies

GOAL ED 1: Encourage efforts to diversify the existing economic base to focus on long-term sustainable economic development throughout the County.

Goal Rationale: The diversification of the economic base through sustainable economic development can help provide expanded job opportunities as well as a healthy, stable and growing economy. Diversification will reduce negative impacts during shifts in industries and from seasonal employment.

Policy ED 1.1: Seek to attract businesses and industries that complement and build upon existing business and industry.

Rationale: Building upon relationships with existing business and industries can diversify the economic base and strengthen positions for existing businesses and industries. It can also stimulate living-wage job creation.

Policy ED 1.2: Incentivize development that creates local re-investment funds and provides jobs in the local community.

Rationale: Diversification and expansion of the County's economic base will expand job opportunities and bring additional resources for the growth and development of the County.

Policy ED 1.3: Maintain the County's rural economic base by permitting limited development in rural areas of industrial and natural resource land uses that are not suitable for urban areas, provided critical areas and surrounding land uses are protected and usage remains compliant with Washington Commerce expectations of land use impacts.

Rationale: Some industrial and natural resource based uses due to their nature are not appropriate to be located in urban growth areas but can be located within remote rural locations within the limits set by rural governmental services, and the protection of the rural character and critical areas. Some such usages could include agribusiness, energy/utilities, transportation and warehousing, along with accommodations, retail and professional/technical services, at a small scale. Said uses can play an important role in support of other industries and businesses in the County.

GOAL ED 2: Encourage the retention and growth of existing industries consistent with the comprehensive plan.

Goal Rationale: It is more advantageous to retain existing home-grown businesses than to seek out new businesses that may or may not relocate or expand to the County. The rapidly diversifying economy features many strong local businesses across all sectors with interest in expanding, opening new branches, and hiring more employees.

Policy ED 2.1: Promote local tourism activities by developing brochures and media advertisements, and supporting local and self-contained events.

Rationale: Marketing of recreational and tourist amenities supports year-round tourism and the relocation of businesses to this area.

Policy ED 2.2: Support ventures in resource tourism and outdoor recreation that are financially viable, adaptable to changing conditions, and support existing local businesses.

Rationale: Support continued investments in signature places and spaces through ongoing maintenance or improvements to recreational features, leading to attracting more tourism.

Policy ED 2.3: The county should recognize the value of archeological and historic preservation to economic development initiatives. This includes promoting historic resources as a tourism resource, while ensuring alignment with state and federal obligations and best practices in preserving the county's cultural and historic resources.

Rationale: Historic and archaeological resources can increase a community's sense of place and contribute to local economies by drawing heritage tourists. Historic districts and cultural landmarks, for example, can serve as anchors for revitalization and job creation in rural regions.

Policy ED 2.4: The county will understand the economic and workforce circumstances of businesses in emerging sectors, such as healthcare, energy, and professional services, and seek to ensure a high quality of life and vibrant economy so these industries can continue to grow and serve their customers.

Rationale: There is a growing recognition that a thriving economy requires quality services and community amenities if it is to expect visitors to come to the region, and to retain existing residents.

GOAL ED 3: Accommodate and support efforts to diversify the agricultural economy.

Goal Rationale: Agriculture plays a significant role in the economic base of the County. Diversity of the agricultural economy strengthens the County's economic base against changes in the market, and workforce.

Policy ED 3.1: Strengthen and diversify the agricultural economy by promoting value-added agricultural activities such as food and beverage processing, eco-tourism, beverage manufacturing, and wineries/breweries and distilleries.

Rationale: The development of value-added agricultural activities can strengthen both the agricultural and tourism components of the County's economy.

Policy ED 3.2: Conserve and enhance existing agriculture efforts and support innovative farming approaches as an essential part of local and regional economy and food and farm product supply.

Rationale: By conserving existing agricultural lands and operations, the county helps maintain a resilient economic sector that is less vulnerable to external market shocks, changing environmental conditions, and development pressure. Additionally, local farms provide fresher, more nutritious food options while contributing to a more secure and stable food supply for local communities.

GOAL ED 4: Local economic development efforts should promote the advantages of working and living in Chelan County, such as availability of work, job security and stability, access to recreational and cultural activities, educational opportunities, quality health care, and affordable housing.

Goal Rationale: Quality of life factors play a role in attracting and retaining employees and businesses.

Policy ED 4.1: Promote and maintain open space, recreation, and cultural and heritage resources that are attractive to both local residents and visitors.

Rationale: These amenities and activities are key to the high quality of life enjoyed by County residents and are important in the retention and recruitment of business and industries.

Policy ED 4.2: Encourage economic development efforts that invite broad community participation and address the needs, concerns, rights and resources of a diversity of cultural groups.

Rationale: County residents come from a broad array of cultural backgrounds and should feel welcomed to express the greatest of what those cultures have to offer for the benefit of all residents.

Policy ED 4.3: Foster a diverse private-sector job base that supports attractive wages and facilitates the retention and expansion of existing businesses.

Rationale: The aim is to retain college graduates and relevant educational certificate holders from the area in addition to decreasing unemployment and under employment.

Policy ED 4.4: Support partnerships which expand vocational, post-secondary and higher education programs to promote a highly skilled, educated and technically trained work force.

Rationale: A technically skilled local labor force will help attract and retain industries paying family wage jobs.

Policy ED 4.5: Support a full range of human and social services necessary to encourage a strong local economy.

Rationale: Adequate human and social services are necessary to meet community needs and contribute to a complete list of services that industries and businesses seek for their employees when locating in an area.

Policy ED 4.6: Ensure an adequate housing supply for all income levels in a variety of housing types by ensuring the provision of middle-income and low-income housing.

Rationale: Adequate, affordable housing plays an important role in retaining and attracting business and industry.

GOAL ED 5: Implement a regional and multi-jurisdictional approach to economic development.

Goal Rationale: A regional approach and a consolidation of efforts are key to the success of economic development for the County.

Policy ED 5.1: Coordinate with the Chelan County Port District and other surrounding economic development entities in the evaluation and ranking of economic Rationale: The Chelan Douglas Port District is a resource to use in making economic development decisions for the economic diversification of the County's economy.

Policy ED 5.2: Promote economic development policies that discourage inter-jurisdictional competition for sales tax revenues.

Rationale: Competition within the region is an inefficient use of limited resources. Economic goals may have a higher chance of success through coordinated and consolidated efforts.

Policy ED 5.3: Pursue improvements to the region's air and land transportation systems to improve year-round accessibility through continued commitment of resources and the development of new projects.

Rationale: The region would benefit from improved transportation systems that provide greater accessibility of people, products, and services to the region.

Policy ED 5.4: Coordinate with adjacent jurisdictions to create an environment that is supportive and attractive to the internet/information technology industries.

Rationale: Chelan County will benefit from regional collaboration for the attraction of high technology industries of both large and small scale.

Policy ED 5.5: Coordinate with the region's cities to develop a process for siting major industrial developments outside urban growth areas, pursuant to RCW 36.70A.365

Rationale: The potential for the siting of major industrial development consistent with RCW 36.70A.365 and the comprehensive plan should not be precluded.

GOAL ED 6: Establish a regulatory climate favorable for economic development.

Goal Rationale: Many factors make up a positive economic climate. Economic development requires policies of positive and predictable support and encouragement for private investment.

Policy ED 6.1: Support the retention of redevelopment of existing industrial areas by economic development agencies.

Rationale: Industrial development and retention of existing industrial activities helps diversify the economy within rural areas.

Policy ED 6.2: Support development of tourism and recreational uses on both public and private lands.

Rationale: Because of its extraordinary geography, the County has many areas with potential for recreational and tourism development. Identification of specific sites requires the assistance of the County.

Policy ED 6.3: Streamline the permitting process and provide the public with excellent customer service.

Rationale: A streamlined permitting process with a customer service approach towards the public helps to provide a positive environment for economic development and a greater degree of certainty in the permitting process.

Policy ED 6.4: Develop and maintain a regulatory system that is fair, understandable, coordinated, and timely.

Rationale: The county should work to ensure that the Chelan County Code is an understandable, accessible, and user-friendly document, maintains enough flexibility to allow for timely responses to unanticipated and desirable developments by eliminating unnecessary procedures.

Policy ED 6.5: Evaluate economic development and resource use implications as part of land use planning, transportation planning, infrastructure planning, and environmental planning projects and in the determination of urban growth boundaries.

Rationale: Consideration of economic development in the process of planning for growth and development is necessary to build sustainable, healthy communities.

Policy ED 6.6: Support economic development by providing adequate levels of infrastructure and promoting technological advancements in public service and facility systems.

Rationale: This will enable the County to meet the demands of growth as these facilities and services are needed.

CHAPTER 9
PARKS AND RECREATION ELEMENT

The Parks and Recreation Element is replaced by the Recreation Element Parks, Recreation, and Open Space (PROS) Plan included in Appendix K.

CHAPTER 10
SHORELINE ELEMENT

I. Introduction

The Growth Management Act considers the goals and policies of a Shoreline Master Program (SMP) developed under the Shoreline Management Act to be an element of the Comprehensive Plan, and the Shoreline Master Program development regulations to be a component of a jurisdiction's GMA development regulations.

This Element was updated and approved by the Department of Ecology September 30, 2021.

CHAPTER 11
TRANSPORTATION ELEMENT

Executive Summary

Over the past century, the Chelan County has grown into one of Washington's most attractive destinations and places to live. This Transportation Element aims to provide a 20-year vision for Chelan County's transportation system, which respects the region's history and character and supports anticipated growth through 2046.

The overall vision for Chelan County's Transportation Element is to provide a safe, balanced, and efficient multi-modal transportation system that serves anticipated local and regional growth. Guidance from county staff, the Board of County Commissioners, the Chelan-Douglas Transportation Council, stakeholders, and citizens helped identify six goals, which serve as the foundation for this plan:

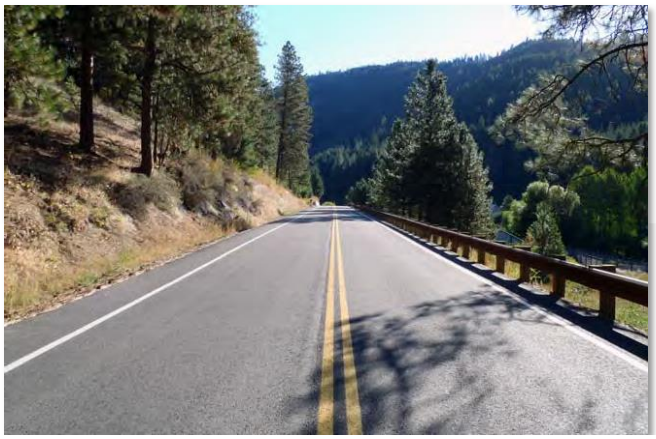
- **Maintain existing transportation facilities** in a state-of-good-repair to ensure their continued function, which is critical to achieving all the county's mobility goals
- Create a transportation network that can be **shared safely by all users** and that provides sufficient access for emergency response
- Plan for a system that is **financially viable**, including consideration of lifecycle costs in infrastructure investments and leveraging outside funds wherever possible to maximize community benefits
- Provide a transportation system that **complements existing and planned land uses**, supports farm-to-market and recreational tourism needs, and balances economic development with existing users
- **Avoid and minimize negative environmental and societal impacts** from the transportation system and enhance the natural and social environment when possible
- **Coordinate with a broad range of groups** (including local, state, and regional agencies, key stakeholders, businesses, and the public) to develop and operate the transportation system.

The Transportation Element sets a framework for understanding, prioritizing, measuring, and creating a transportation network to help Chelan County achieve its vision. This chapter includes seven sections:

11.1 – Introduction:
Describes the purpose of the Transportation Element and the planning requirements it needs to address. Also provides an overview of Chelan County's position in the state and related planning efforts.

11.2 – Conditions and Trends:
Describes conditions for all travel modes in the existing transportation system. This section also identifies challenges and trends that may affect Chelan County's transportation network in the future.

11.3 – Maintaining Our System:
Describes how the county operates and maintains its transportation system, including ongoing programmatic activities and expenditures. This section discusses best practices in state of good repair.



11.4 – Transportation Goals and Policies:
Explains the county's vision for transportation and the goals and policies that serve as the basis for this Transportation Element.

11.5 – Future Transportation Vision:
Details on how to accommodate each travel mode and establish the county's multimodal level of service (MMLOS) standards.

11.6 – Capital Plan:
Provides the 20-year capital plan based on the community's values expressed in the transportation goals and layered network.

11.7 – Implementing the Transportation Element:
Evaluates Chelan County's financial conditions over the next 20 years and provides guidance on plan implementation.

To serve as a useful document for all residents and staff of the county, this Transportation Element focuses on the county's vision and the projects and programs intended to meet that vision. Technical and supporting information are available in the Appendix L.

11.1 Introduction

Chelan County, named for the Salish word for "deep water," is a county rich in history and natural beauty. Aided by tourist destinations like Lake Chelan and the city of Leavenworth and economic drivers like the fruit industry, the county has grown over the past century into one of Washington's most attractive destinations and places to live.

This Element aims to provide a 20-year vision for Chelan County's transportation system, which respects the community's history and character and supports anticipated growth through 2046.

I. Purpose

The overall vision for Chelan County's Transportation Element is to provide a safe, balanced, and efficient multi-modal transportation system that serves anticipated growth. Guidance from county staff, the Board of County Commissioners, stakeholders, and citizens helped identify several key priorities:

- **Maintain existing transportation facilities** in a state of good repair to ensure their continued function, which is critical to achieving all the county's mobility goals
- Create a transportation network that can be **shared safely by all users** and that provides sufficient access for emergency response
- Plan for a system that is **financially viable**, including consideration of lifecycle costs in infrastructure investments and leveraging outside funds wherever possible to maximize community benefits
- Provide a transportation system that **complements existing and planned land uses**, supports farm-to-market and recreational tourism needs, and balances economic development with existing users
- **Avoid and minimize negative environmental and societal impacts** from the transportation system and enhance the natural and social environment when possible
- **Coordinate with a broad range of groups** (including local, state, and regional agencies, key stakeholders, businesses, and the public) to develop and operate the transportation system.

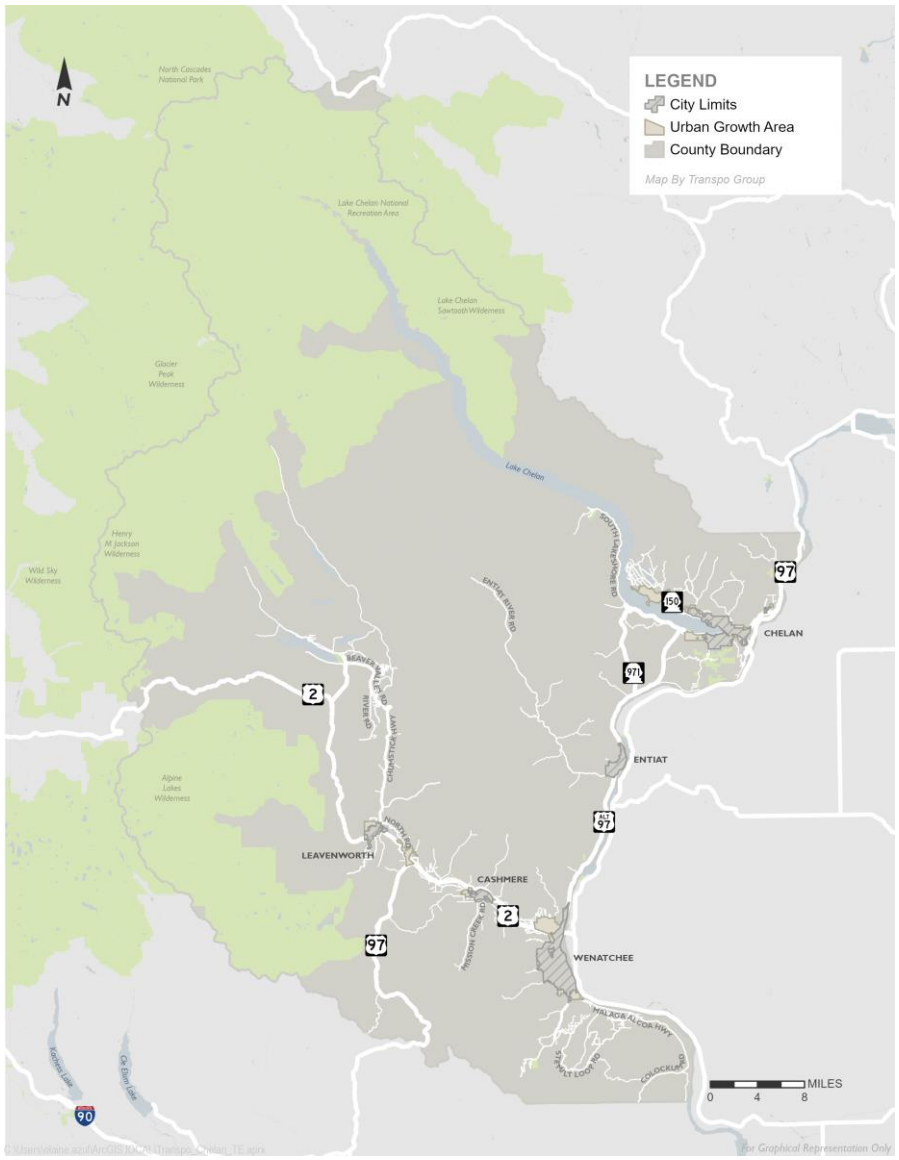
The Transportation Element sets a framework for understanding, prioritizing, measuring, and creating a transportation network to help Chelan County achieve its vision.

II. Planning Requirements

Chelan County's regional location and geographic diversity influence the type and magnitude of the demands put on its transportation system. The county encompasses Lake Chelan, Leavenworth's Bavarian village, several major forests and mountains, many farm-to-market connections, and many other destinations. The county is bordered by the Columbia River to the east and the Cascades to the west. US 2 connects Chelan County to King County in the west and Douglas County in the east while US 97 links Chelan County to Kittitas County in the south and Okanogan County to the north.

Figure 11-1 shows the location of Chelan County in its statewide and regional setting.

As part of the public engagement process, the following agencies and stakeholder groups were interviewed to provide feedback and input for the Transportation Element update:



- Ballard Ambulance
- Chelan County Public Utility District
- Chelan-Douglas Transportation Council
- City of Leavenworth
- City of Wenatchee
- LINK Transit
- North Central Washington Libraries
- People for People
- Thriving Together North Central Washington
- Wenatchee School District
- Wenatchee Valley Fire
- WSDOT

Note that additional individuals, groups, and agencies were contacted for interviews, but responses to the interview requests

Chelan County coordinates its transportation planning with a variety of jurisdictions, agencies and stakeholder groups. Through a robust public engagement process, the update of the Chelan County Transportation Element was discussed with several stakeholder groups and public agency partners. Feedback gathered from these groups was used to inform the update to the Transportation Element.

In addition to the public participation process conducted for the 2026-2046 Chelan County Comprehensive Plan update, a transportation-focused outreach effort was conducted to gather feedback from key stakeholders and the community which were used to shape the Transportation Element update. Strategies through which feedback was collected included Chelan County staff workshops, an online survey, and countywide pop-up events, including a table at the Chelan County Fair in September 2025. Open houses were also held throughout the county (in coordination with the Comprehensive Plan update process) to gather community input on the transportation needs and priorities for the county. The feedback gathered throughout the process was used to develop the transportation network vision outlined in this chapter.

Figure 11-1
Regional Map

Other Plans

As part of this planning process, several local, regional, and statewide transportation plans and documents were reviewed to determine how Chelan County's transportation network aligns with the transportation vision aligns with that set forth by adjacent agencies. This section summarizes some of the key regional plans reviewed.

Growth Management Act

Washington State's Growth Management Act(GMA) requires communities to prepare a transportation element that ties directly to the county's comprehensive plan, land use decisions and financial planning. This Transportation Element Update fulfills that mandate and includes the following elements, as required by RCW 36.070A.070:

- Existing travel conditions and land use assumptions used in estimating future travel conditions
- Estimated travel impacts on state-owned transportation facilities
- Inventory of existing facilities
- Assessment of future facility needs to meet current and future demands
- Multi-year plan for financing proposed transportation improvements
- Forecasts of traffic for at least 10 years based on adopted land use plan
- Multimodal Level of Service (MMLOS) standards for arterials, active mode facilities, and public transportation, including actions to bring deficient facilities into compliance
- Transportation Demand Management (TDM) strategies
- Identification of intergovernmental coordination efforts
- A pedestrian and bicycle component that includes collaborative efforts to identify and designate planned improvements for pedestrian and bicycle facilities and corridors that address and encourage enhanced community access and promote active transportation.

Additionally, given the status of US 2 as a major transportation corridor that travels through Chelan County, this plan aims to coordinate with the Washington State Department of Transportation (WSDOT) and adjacent counties to ensure that this critical corridor can continue toadequately serve the region's needs.

Transportation 2050 – Chelan and Douglas Counties

The Regional Transportation Plan *Transportation 2050*, prepared by the Chelan-Douglas Transportation Council, lays out the long-term goals for growth management, economic, and transportation issues.

The plan identifies four goals for determining the effectiveness of the regional transportation system:

1. **The transportation system accommodates planned growth** – Coordinate land development with the transportation network to ensure that long-term growth and increases in travel demand in Chelan and Douglas Counties can be accommodated by existing and planned infrastructure.
2. **The transportation system provides multimodal mobility, accessibility, and connectivity** – Balance the needs of vehicles, public transit, and active transportation users within the roadway network to allow for mobility, accessibility and connectivity for all travel modes, especially within the context of surrounding land uses.
3. **The transportation system is safe for all users** – Design and implement transportation improvements that prioritize roadway safety for all users and evaluate the benefits and impacts of proposed design treatments on all travel modes.
4. **The transportation system supports community and economic development plans** – Leverage transportation improvements as an opportunity to encourage community and economic development.

Douglas County Comprehensive Plan Transportation Element

Douglas County borders Chelan County directly to the east and since Wenatchee and East Wenatchee are so close in proximity, the workforce, business markets, and residents often cross county boundaries. The planned modal networks and project recommendations identified in the Douglas County transportation element were reviewed and considered as part of the update to the Chelan County Transportation Element to ensure consistency between the two adjacent counties.

The land use pattern in the Transportation Element determines the demand for travel to, from, and through various locations. Therefore, the transportation element has been integrated with other elements of the plan to ensure consistency. Land use forecasts developed and analyzed as part of the Chelan County Transportation Element considered land use growth in jurisdictions throughout the CDTC region, including Douglas County, Wenatchee, and East Wenatchee.

Additional Plans

Other local plans and documents that were reviewed include:

- Cashmere Area Transportation Study
- Chelan County Six-Year Transportation Improvement Program
- Chelan County 2017 Transportation Element
- Chelan County ADA Self-Evaluation & Transition Plan
- Chelan County Roadway Safety Plan
- Chelan County Multimodal Pathways Plan

- Chelan-Douglas Transportation Council 2026-2031 Regional Transportation Improvement Program
- Chelan-Douglas Transportation Council Regional Bicycle Plan
- Chelan-Douglas Transportation Council Coordinated Mobility Plan
- Chelan-Douglas Transportation Council South Wenatchee Bicycle Connectivity Study
- City of Cashmere Comprehensive Transportation Plan
- City of Wenatchee Comprehensive Plan Transportation Element
- Entiat Shoreline Public Access Plan
- US 2 Upper Wenatchee Valley Transportation Corridor Study
- Wenatchee Valley Urbanized Area Freight Study

III. Role of the Transportation Element

The Transportation Element provides a framework that outlines the policies, projects, and programs necessary to implement Chelan County's vision of future mobility. The Transportation Element also projects the financial environment for transportation investments out to 2046.

In essence, the Transportation Element informs the prioritization of projects by identifying the types of investments the county should make to support future travel demand and achieve the established transportation networks. The plan and recommendations contained herein have been developed in alignment with the community's values and financial resources.

IV. Plan Organization

This Transportation Element includes six sections in addition to **11.1 – Introduction**:

11.2 – Conditions and Trends:

Describes conditions for all travel modes in the existing transportation system. This section also identifies current challenges and trends that will affect Chelan County's transportation network in the future.

11.3 – Maintaining Our System:

Describes how the county operates and maintains its transportation system, including ongoing programmatic activities and expenditures on into the future. This section discusses best practices in state of good repair.

11.4 – Transportation Goals and Policies:

Explains Chelan County's vision for transportation as well as the goals and policies that form the basis for the Transportation Element.

11.5 – Transportation Vision:

Details how to accommodate each travel mode and establishes the county's qualitative transportation level of service standards.

11.6 – Capital Plan:

Provides the 20-year transportation investment list which reflects on the community values expressed in the transportation goals and modal networks.

11.7 – Implementing the Transportation Element:

Evaluates the county's financial conditions over the next 20 years and provides guidance on transportation plan implementation.

11.2 Conditions and Trends

I. Existing Conditions

This section describes how people use Chelan County's transportation network today and how that may change over the next 20 years as the region grows. The way people travel is influenced by the land use, travel corridors, and key destinations where people live, work, play, shop, and recreate.

Land Uses and Key Destinations

The places where people live, work, and play are impacted by how a county and its communities guide where development occurs. The Land Use Element of this Comprehensive Plan provides the guidance mentioned here. It is important to consider land use when planning for transportation because it provides insight into areas where more people may concentrate their travel. Figures 11-2 through 11-4 show some of the many key destinations throughout the county. These figures include recreational, educational, and employment locations.

The incorporated cities in Chelan County are Cashmere, Chelan, Entiat, Leavenworth, and Wenatchee. Wenatchee is the largest of these cities and the hub of commercial activity. The cities of Chelan and Leavenworth act as the centers of recreational tourism. Even within these denser communities, the majority of homes are lower-density single family detached structures.

Agricultural and industrial developments are located throughout Chelan County which include farms, orchards, and fruit packing warehouses, particularly along the US 2 and SR 97 corridors. Large stretches of the southwest and northwest portions of the county are highly mountainous, with the Okanogan-Wenatchee National Forest and the Lake Chelan National Recreation Area comprising large areas of public land.

It is important to consider that areas of commercial, industrial, and dense residential land use within the cities, urban growth areas (UGAs), and local areas of more intense rural development (LAMIRDs) tend to have more concentrated trips and can be supportive of alternative modes of travel such as transit, walking, and biking, whereas more rural areas tend to have dispersed trip patterns that are often best accommodated by car or truck. In the following pages, some of the county's key destinations and land uses are described and mapped.

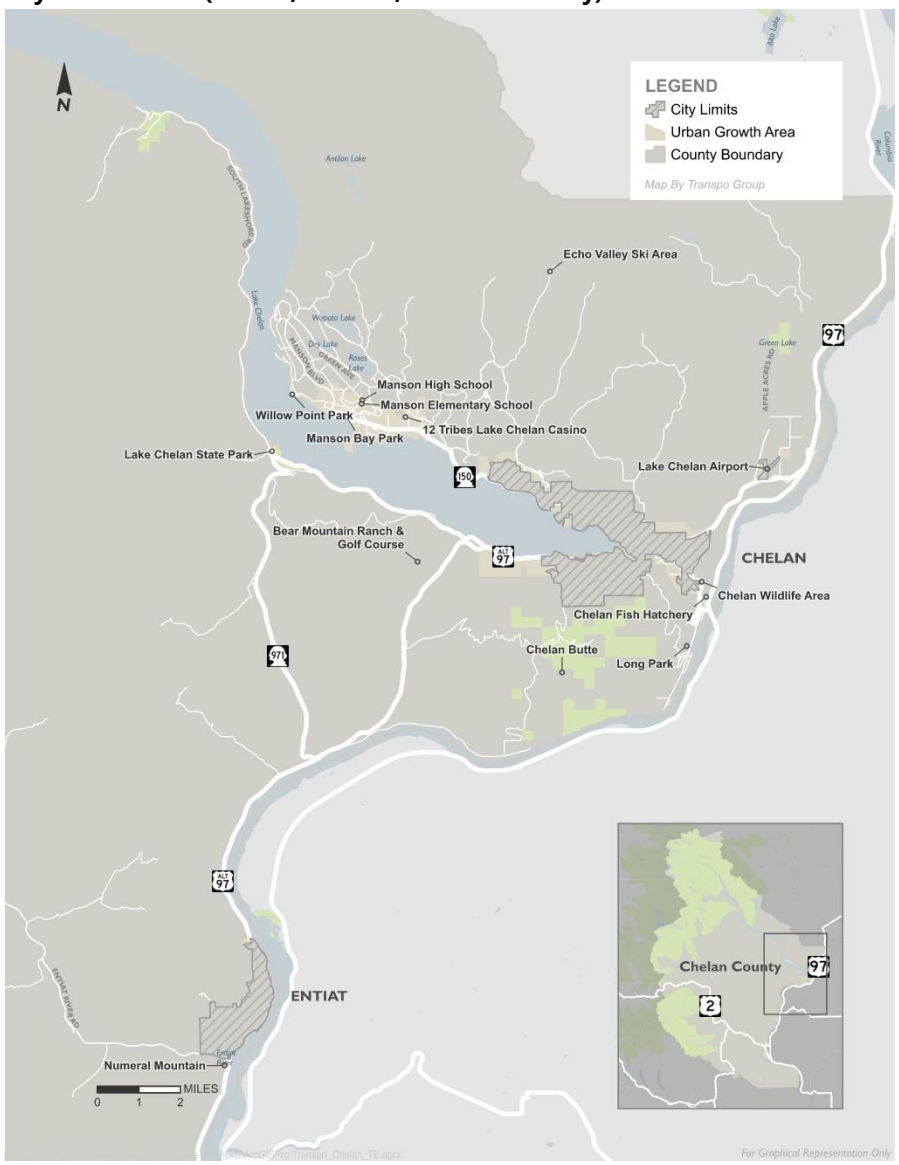
Chelan/Manson Vicinity

Many residents and visitors alike enjoy the lake and adjacent parks to recreate outdoors in the Chelan/Manson vicinity which serves as a gateway to the Lake Chelan National Recreation Area. Various parks, piers, and boat launches provide access to the lake. The parks along the lake generate significant amounts of vehicle traffic in addition to the non-motorized uses at the parks themselves. South Lakeshore Road and SR 150 (along the north shore) serve as cycling routes for residents and visitors in addition to being active motorways.

Besides being a popular tourist and recreation destination with numerous vineyards and wineries, the City of Chelan is also a key employment center. Some major employers are situated in eastern Chelan, specifically agriculture and produce distributors.

Lake Chelan, Chelan

This area also contains two of the four airports in the county: Lake Chelan Airport and Stehekin State Airport.



Lake Chelan Airport is classified as a general aviation public-use airport. This airport provides service for recreational seaplanes that land on and take-off from Lake Chelan. The airport is located approximately five miles northeast of the City of Chelan.

Stehekin State Airport is located five miles northwest of Stehekin on the northern edge of Lake Chelan. It provides access for private landowners and recreational users. The airfield provides an alternative mode of access to Stehekin for residents or visitors. It is also used as a staging area for firefighting and for emergency evacuations.

In addition, commercial water transportation in this area includes passenger boats, commercial barges and small boat service on Lake Chelan. For the communities of Stehekin, Lucerne, and Holden, barges provide the only means of transportation of large goods, fuel, building supplies, and vehicles.

Figure 11-2

Key Destinations (Chelan, Manson, & Entiat Vicinity)

Entiat Vicinity

Entiat is located along the Columbia River and acts as an eastern gateway to the Wenatchee National Forest. It is situated along SR 97A and lies between the cities of Chelan and Wenatchee.

Entiat Park, Entiat (Source: City of Entiat)

Between SR 97A and the Columbia River waterfront is a rail line operated by the Cascade and Columbia River Railroad, which creates a barrier to direct shoreline access. Entiat's *Waterfront Master Plan* (2009) identifies a vision for activating undeveloped land between the rail line and the Columbia River to provide opportunities for commercial development and open space. In addition, the *Entiat Corridor Revitalization Plan* (March 2025) establishes a vision for potential improvements along SR 97A to promote future development along the corridor and identify opportunities to connect SR 97A with future waterfront development. A park and ride facility is proposed at the intersection of Entiat River Road and Entiat Way to provide alternative transportation options to city residents.

Entiat serves as one of the many recreational destinations in the county for visitors and residents with a developing recreational and commercial waterfront area near the Entiat City Park and many opportunities for boating and fishing. Entiat River Road provides access to the Wenatchee National Forest for biking, hiking, hunting, camping, horseback riding, and fishing.

Figure 11-3
Key Destinations (Chelan, Manson, and Entiat Vicinity)

Wenatchee/Sunnyslope Vicinity

The City of Wenatchee is the largest city in Chelan County. This city is a regional hub for employment, freight, residential, and commercial activity. The city borders the Columbia River, also the Chelan/Douglas County line. Access to East Wenatchee crossing the Columbia River is either on US 2/97 or SR 285 making it a key gateway to intercounty movement and transportation.

The Sunnyslope Subarea is a large, unincorporated community north of the Wenatchee River and US 2/97. Easy Street is classified as an Urban Minor Arterial and serves as primary access to the

Sunnyslope Subarea. Easy Street intersects US 2/97 at roundabout in the Olds Station neighborhood of the city and further west near the community of Monitor.

Wenatchee Ave, Wenatchee

South of Wenatchee, the community of Malaga is located along the south side of the Columbia River and currently developed with low- to medium-density residential housing. As part of the Comprehensive Plan update process, the Malaga area, currently identified as a LAMIRD, is being converted to an Urban Growth Area (UGA). Malaga Alcoa Highway is classified as an Urban Minor Arterial and Rural Major Collector and serves as the primary roadway connecting the Malaga community to the City of Wenatchee.

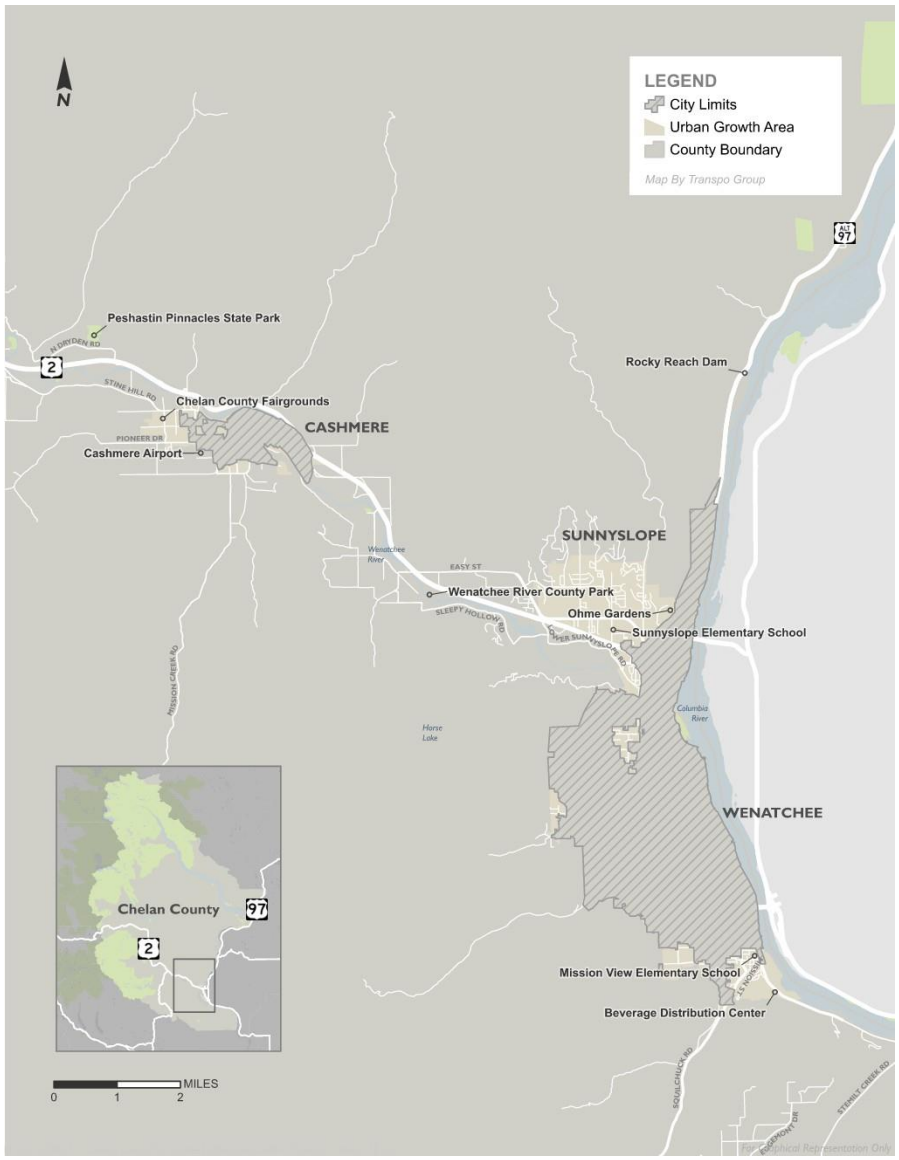
Railroads through the area provide opportunities for regional freight and passenger movement. The Columbia Station in downtown Wenatchee serves as one of two Amtrak stations in the county along its Empire Builder route as well as a transit center for the region's Link Transit bus service.

Currently, no scheduled commercial passenger service is provided at airports located within Chelan County; however, Pangborn Memorial Airport in Douglas County provides that service to Chelan County and its cities.

The City of Wenatchee serves as the county seat and hosts the WSDOT regional office and Chelan-Douglas Transportation Council. Wenatchee offers recreational areas that range from local parks to regional ones such as Confluence State Park. There are also many trails and non-motorized facilities for bicyclists and pedestrians. The Mission Ridge Ski Resort is located about 10 miles southwest of Wenatchee. The area also consists of retail and employment centers, larger retail centers, and other commercial areas that serve the city. Major produce distribution facilities supporting the region's agricultural land uses are located in the northeast part of the City of Wenatchee along SR 97A.

With a population of 35,500[46], the City of Wenatchee is served by the Wenatchee School District and the Wenatchee Valley College, which provides secondary education for students in the region. In terms of public services, the county's main hospital is also located in Wenatchee.

[46] United States Census Bureau. *Quick Facts Wenatchee City, Washington. 2025.* http://www.census.gov/quickfacts/table/PST045215/5377105



Cashmere/Monitor Vicinity

The Cashmere/Monitor vicinity serves as a major employment center for the large fruit and produce distributors in the region. The City of Cashmere has a historic downtown and provides many recreational amenities from local parks to mountain biking trails, to a museum that adds to Cashmere's character.

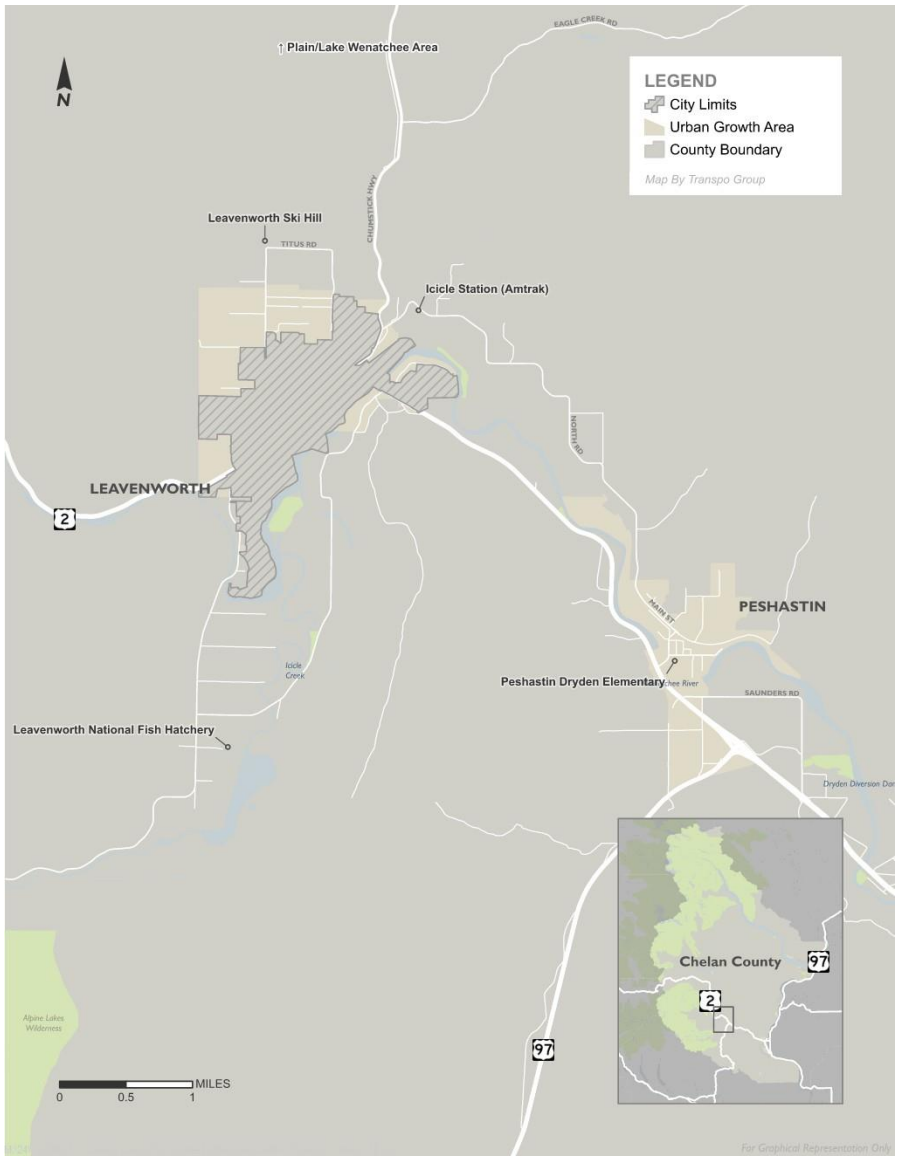
US 2/97, US 97A, and the railroad provide freight and passenger movement through and in the area. Additionally, Cashmere-Dryden Airport is located to the southwest of Cashmere. It is classified as a municipal and county-owned airport that accommodates general aviation operations.

There have been discussions to provide trail access through the area to connect Wenatchee through Cashmere and Monitor to Leavenworth creating an additional option for travelers through the region; Recent planning efforts by the Chelan-Douglas Transportation Council (CDTC) have made progress towards identifying an alignment for the planned multi-use path connecting these population centers within the region.

Figure 11-4
Key Destinations (Cashmere, Monitor, & Wenatchee Vicinity)

Leavenworth/Peshastin/Plain Vicinity

Leavenworth's Bavarian-styled main street is characterized as the historical city center and serves as a major attraction for residents and visitors alike. It features a mix of commercial, residential, and civic destinations, such as City Hall and the Upper Valley Museum. As a result, it generates high traffic volumes for all modes of travel – vehicle, pedestrian, bike, transit, and rail. The area is also home to a couple of major agriculture grower employers of the region.



Downtown Leavenworth, Leavenworth

Many additional recreational attractions are located within this area such as parks, mountain bike trails, hiking trails, campgrounds, and Lake Wenatchee. The Okanogan-Wenatchee National Forest is also easily accessible through the Leavenworth and Plain areas.

US 2 divides Leavenworth primarily separating many of its residential units from its commercial core. US 2 provides access to Stevens Pass and Western Washington.

Lake Wenatchee State Airport, 16 miles northwest of Leavenworth and only a mile east of the lake, provides direct access to Lake Wenatchee. Icicle Station, located east of Leavenworth, is one of two Amtrak stations along its Empire Builder Route in Chelan County, providing interstate connectivity.

Figure 11-5
Key Destinations (Leavenworth & Peshastin Vicinity)

Transportation Network Overview

Chelan County possesses a rich and diverse mix of land uses and destinations that require a specialized transportation plan to ensure efficient mobility and accessibility throughout the county.

The transportation network accommodates many modes of travel, including walking, bicycling, public transit, and driving. Vehicular travel is still the primary mode for most travelers in and around the county.

US 97A, City of Chelan

Rural roads and highways form the foundation of the transportation network with roadways connecting the many communities in Chelan County. Additionally, intercity transit is available between and within many of these communities.

The incorporated cities have relatively well-connected street grids, while rural roadways with limited pedestrian amenities characterize the remaining areas of the county.

The United States Forest Service (USFS) maintains certain roadways within Chelan County. As county residents use USFS roadways, coordination between both parties is important to properly maintain these roadways.

This plan classifies Chelan County's roadways into freeways and expressways (highways), arterials, major and minor collectors, and local streets, as shown in Table 11-1 and displayed in Figures 11-6 through 11-8. Examples of each roadway type and characteristic are also described below.

Table 11-1
Roadway Functional Classification

Roadway Type	Description/Purpose	Examples
Freeways & Expressways (Highways)	Freeways are designed and constructed for mobility and long-distance travel. The freeway network links many major cities and urban growth areas throughout Chelan County.	• US-2 • US 97/97A • SR 285 • SR 150
Urban/Rural Minor Arterial	Minor arterials are designed for higher volumes, but tend not to be major travel ways. Minor arterial streets provide inter-neighborhood connections as well as connections to the regional freeways.	• Chumstick Hwy • Easy St, (within UGA), • Squilchuck Rd (within UGA) • Malaga-Alcoa Hwy
Urban/Rural Major Collectors	Collectors distribute trips between local streets and arterials and serve as transition roadways to and from commercial and residential areas. Collectors have lower volumes than arterials, and can include select traffic elements to balance experience for all modes. Urban and rural connectors differ in the areas that they serve.	• Manson Blvd • W Malaga Rd • N Dryden Rd • Entiat River Rd
Urban/Rural Minor Collectors	These smaller collectors link the major collectors to local roads, providing connections to rural communities throughout the county.	• Joe Miller Rd • Camp 12 Rd • Totem Pole Rd • Mission Creek Rd
Local Streets	Local streets are the lowest functional classification, providing circulation and access within residential neighborhoods and in accessing private properties	• Kimber Rd • Mountain Home Rd • Boetzkes Ave • Viewdale Ave, • Zager Rd

Figure 11-6 Functional Classification (Chelan, Manson, & Entiat Vicinity)

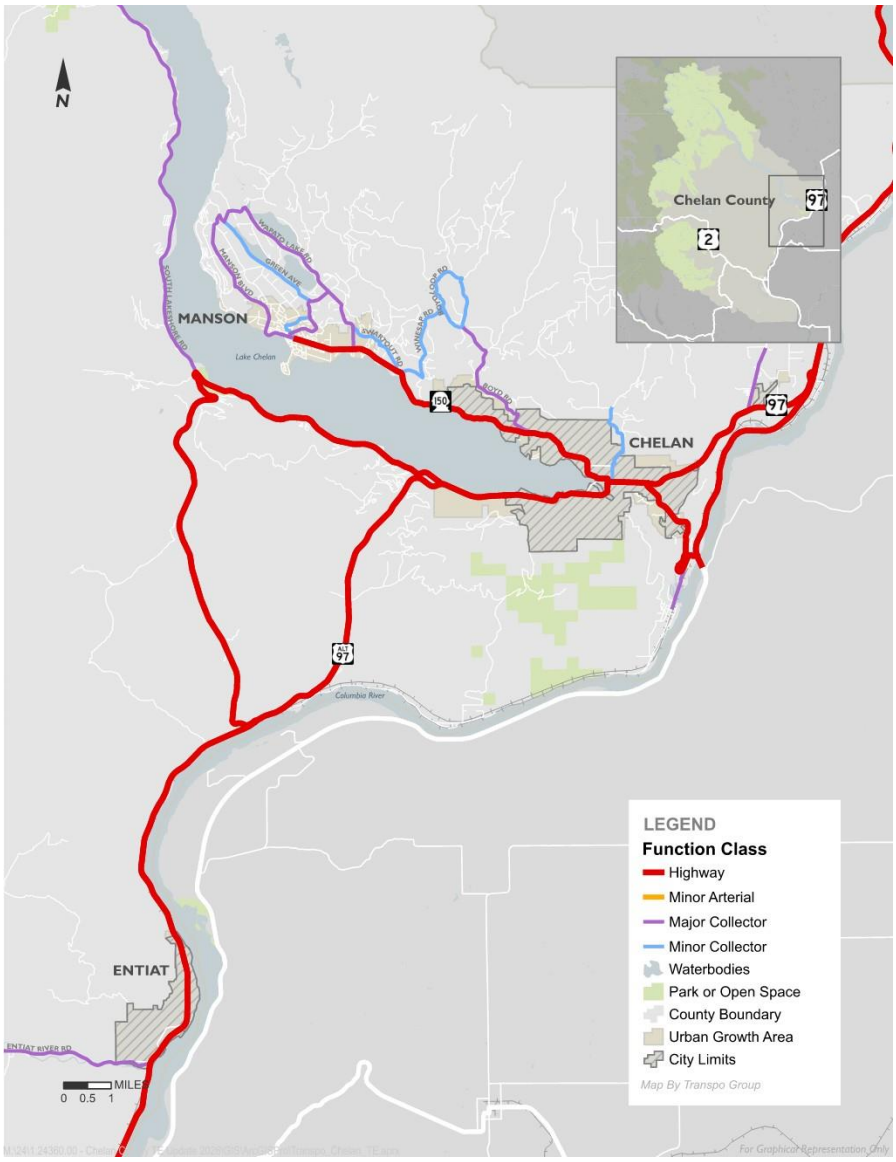


Figure 11-7 Functional Classification (Cashmere, Monitor & Wenatchee Vicinity)

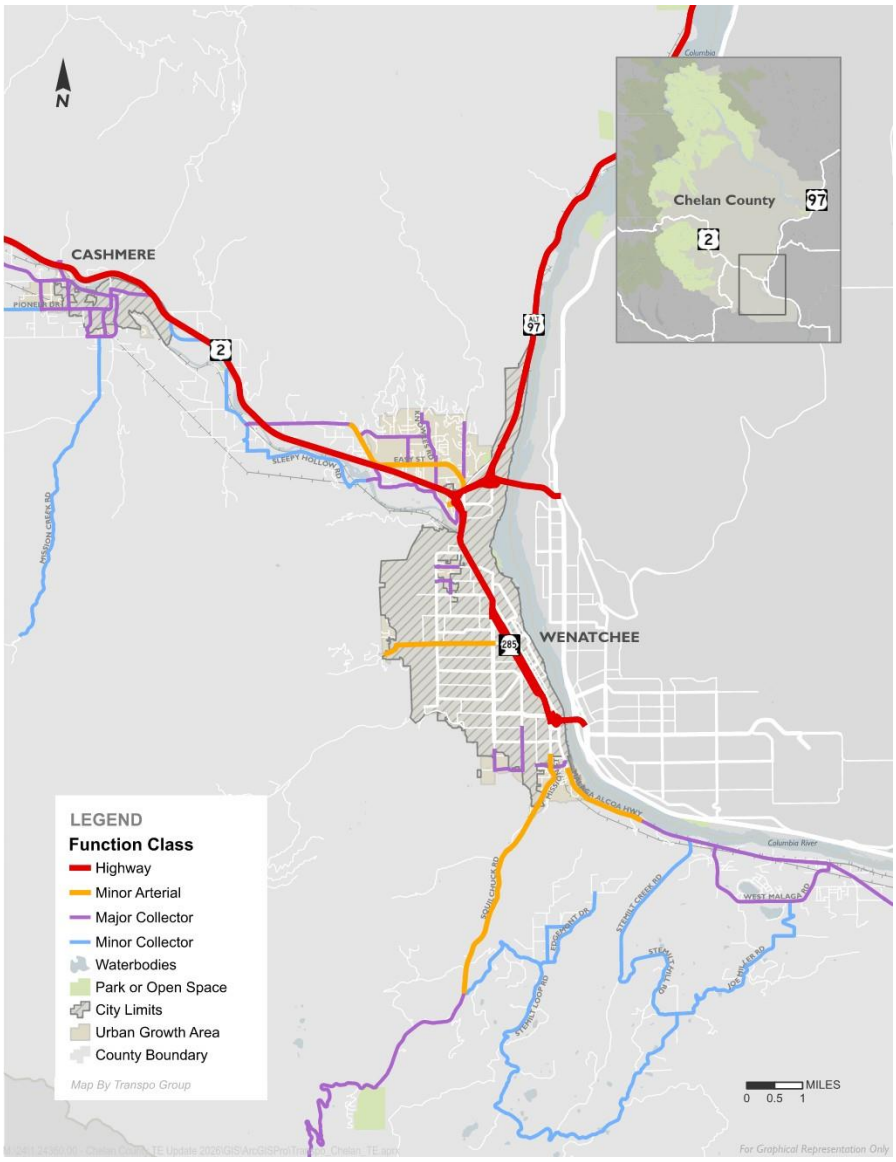

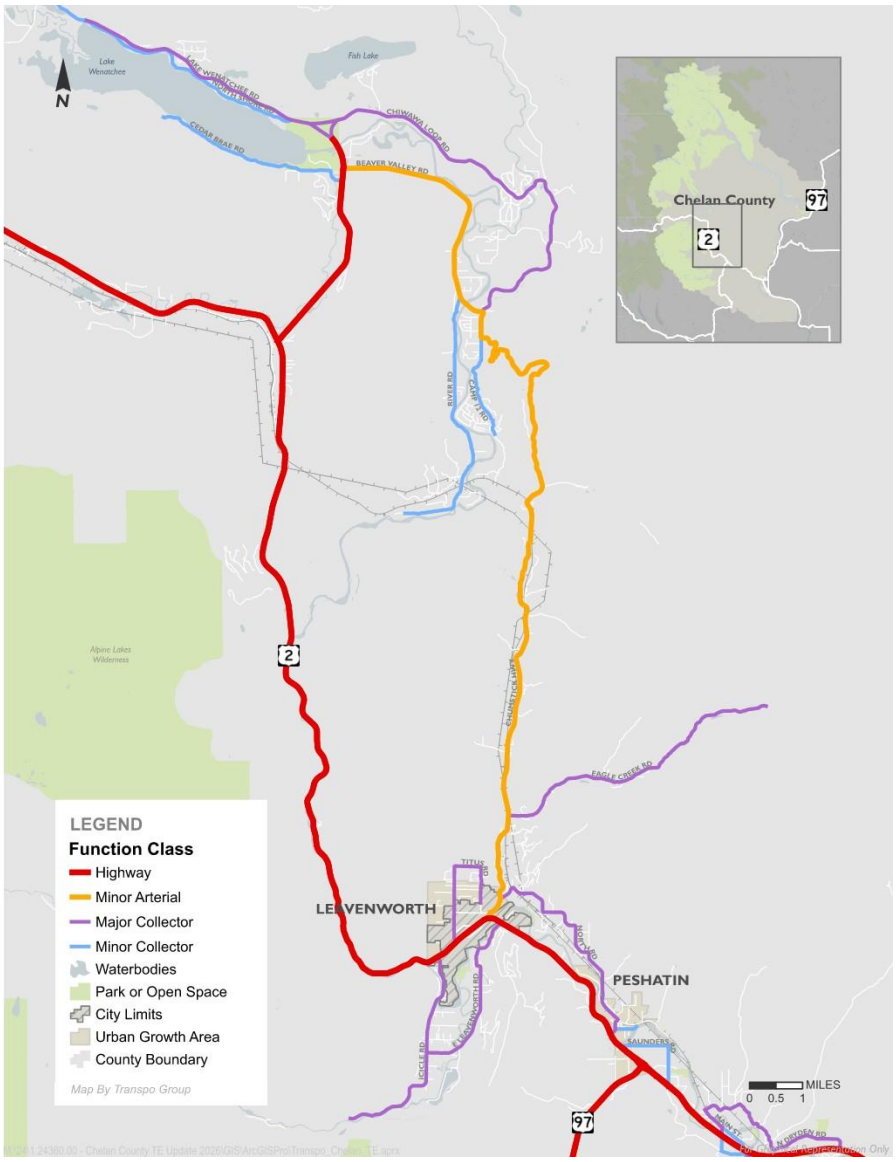

Figure 11-8 Functional Classification (Leavenworth, Peshastin, & Plain Vicinity)

Pedestrian and Bicycle Network

Provision of facilities for walking and biking is a goal for providing a functional, multimodal transportation system to accommodate all users. Residents and visitors walk and bike as part of their daily travel for many reasons. Children attending school, commuters taking the bus or connecting with a carpool to get to work, bicycle commuters, and senior citizens making mid-day trips, all require safe amenities.

Most of the walkable areas in Chelan County are in incorporated downtowns. Wenatchee, Chelan, Leavenworth, and Cashmere all enjoy walkable downtowns with complete sidewalk coverage.

Outside of these downtowns and in the unincorporated areas, pedestrian facilities are much more limited. Cashmere, Chelan, Entiat, Leavenworth, Manson, Peshastin, and Wenatchee are all identified in Transportation 2050 as communities with higher levels of pedestrian demand47. Nevertheless, based on feedback gathered from community members during public outreach events, many rural county roads also experience active transportation demands. County roadways noted by the community as experiencing higher levels of pedestrian/biking activity include:

- Chumstick Highway
- East Leavenworth Road
- Eagle Creek Road
- Totem Pole Road
- US 2 Hwy
- State Hwy 97
- Manson Blvd.
- E Wapato Way

Countywide, biking is accommodated on trails, and on shoulders along rural roadways. The scenic Apple Capital Loop Trail encircles a section along the Columbia River in and around Wenatchee and East Wenatchee. Other plans include increasing bicycle access and connectivity throughout the county. The county has incorporated "share-the-road" signs on several of its roadways that see a higher use of multi-modal transportation.

Figures 11-9 through 11-11 show the locations of existing pedestrian facilities and bike facilities in Chelan County. As shown, dedicated active transportation facilities are limited within the county and are primarily concentrated in UGAs (e.g., Sunnyslope, Manson, Malaga, and outside Cashmere).

[47] Transportation 2050. CDTC. Figures 3-7. Chelan Douglas 2050 Regional Transportation Plan

Figure 11-9
Existing Pedestrian & Bicycle Facilities (Chelan, Manson, & Entiat Vicinity)

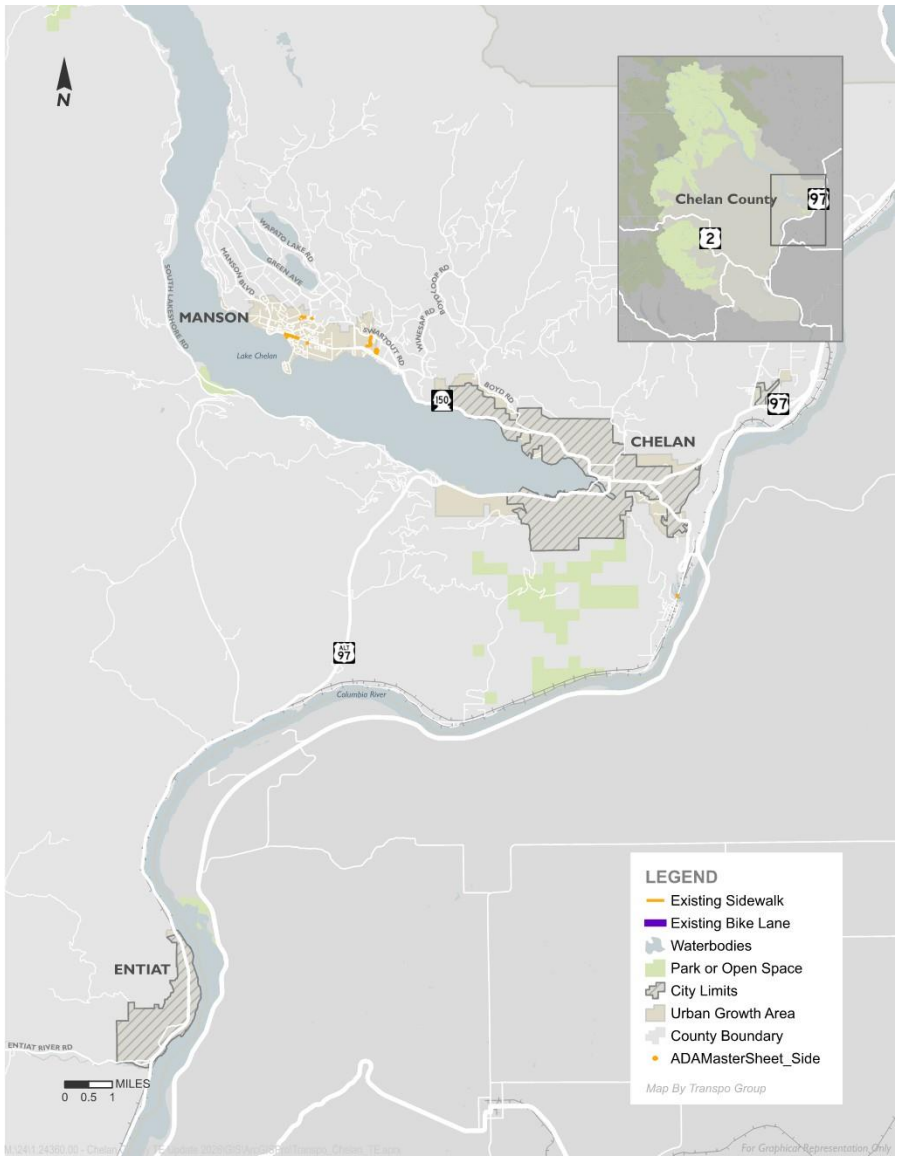

Figure 11-10
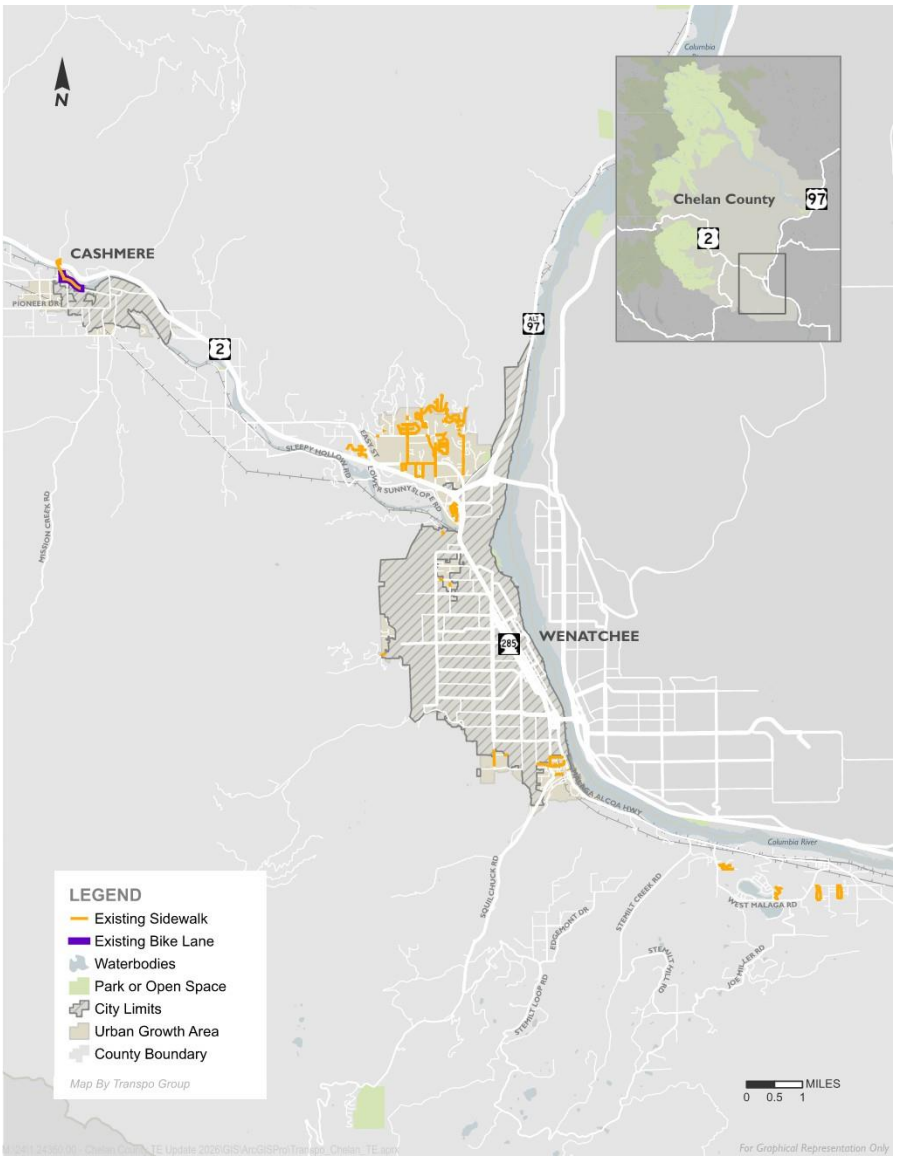
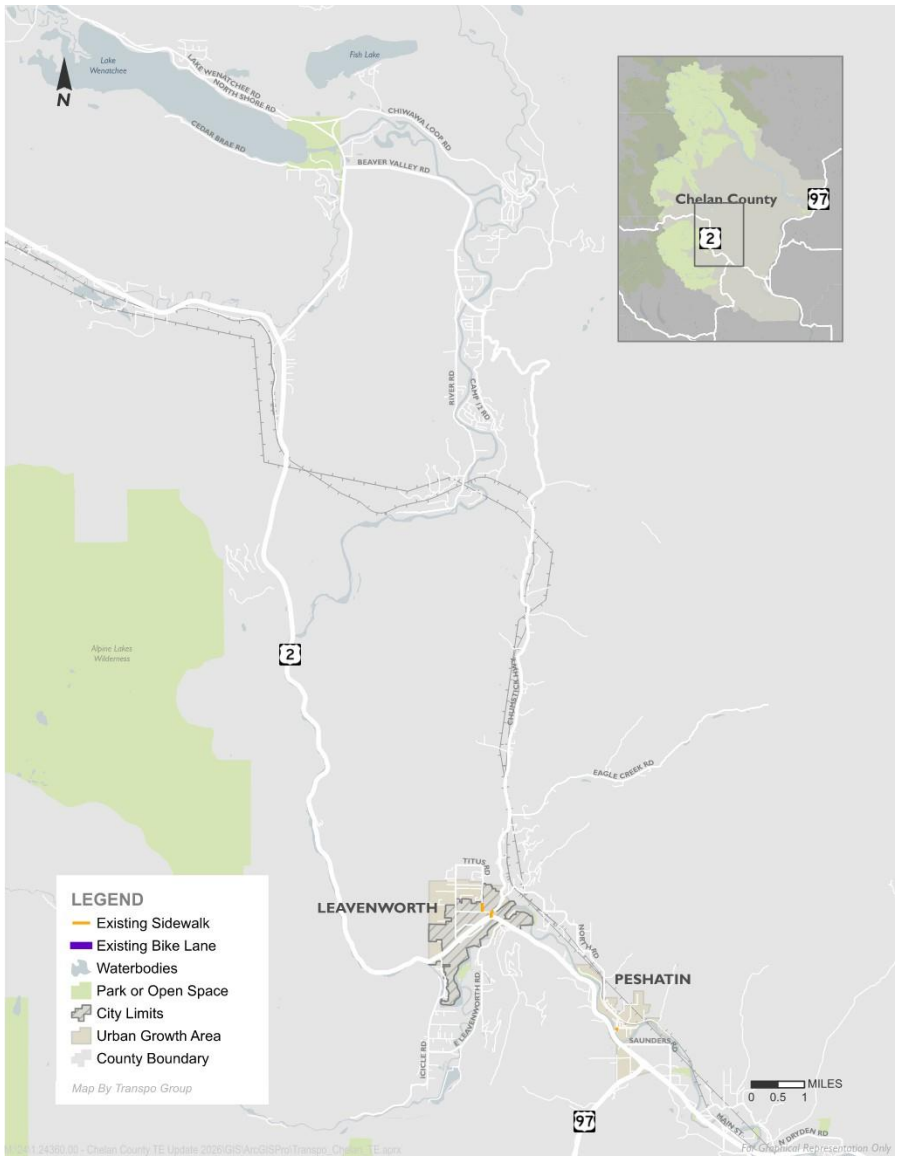
Existing Pedestrian & Bicycle Facilities (Cashmere, Monitor & Wenatchee Vicinity)





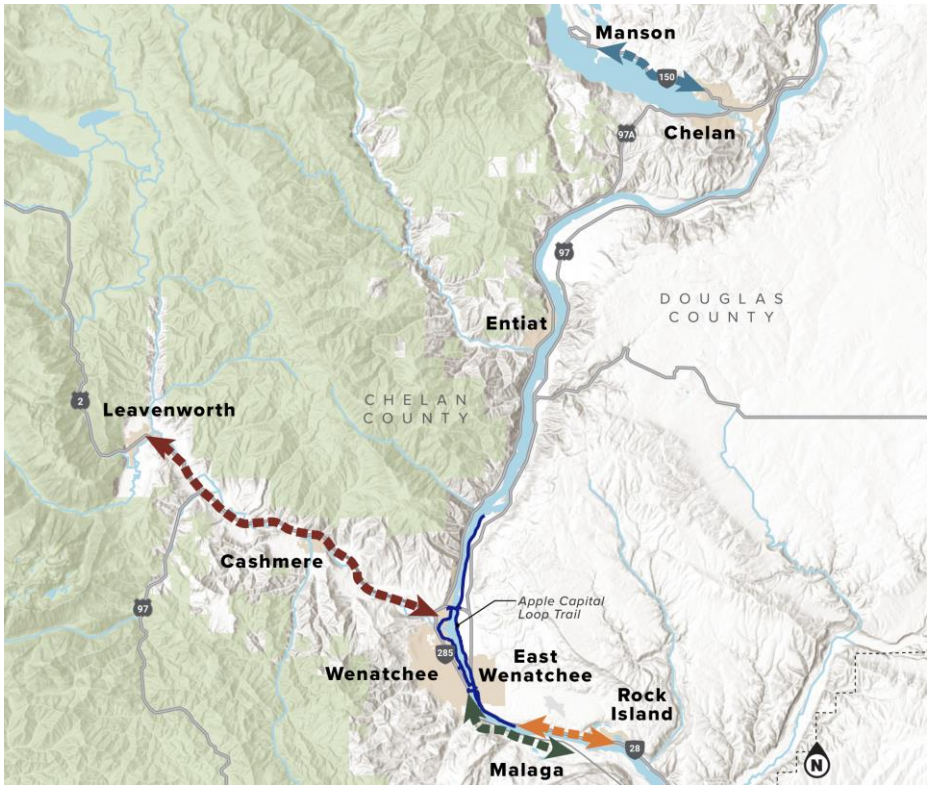


Figure 11-11
Existing Pedestrian & Bicycle Facilities (Leavenworth, Peshastin, & Plain Vicinity)

As part of *Transportation 2050,* CDTC identified a network of planned bikeways and pathways to accommodate bicycle travel throughout the region. While the majority of these facilities are identified in the Wenatchee/East Wenatchee urban area, Community Connector and Rural Connector routes are also identified between population centers to provide connectivity countywide.

In addition, CDTC prepared the *Chelan Douglas Pathways Master Plan (March 2026)*(March 2026) which further identified and evaluated potential alignments and concepts for multi-use pathway connections between several population centers within the region. Figure 11-12 shows the pathway connections evaluated as part of this study. The pathway connections in Chelan County are described in Table 11-2. These planning efforts indicate that providing pedestrian and bike infrastructure remains an important goal throughout the county.

Figure 11-12
CDTC Pathways Master Plan – Pathway Corridors

Source: Chelan-Douglas Pathways Master Plan (CDTC March 2026)

Table 11-2
Chelan-Douglas Transportation Council Regional Pathways Plan

Project	Description and Alignment
Chelan to Manson Pathway Corridor	This corridor will connect Chelan to Manson along the northern shoreline of Lake Chelan, beginning just east of the city of Chelan and terminating in Manson. The path is proposed along the south side of State Route (SR) 150.
Leavenworth to Cashmere to Wenatchee Pathway Corridor	This corridor will be routed along Highway 2 near the Wenatchee River. This pathway corridor connects to the Apple Capital Loop Trail in Wenatchee and crosses through Monitor, Cashmere, Dryden, and Peshastin before terminating in downtown Leavenworth.
Malaga to Wenatchee Pathway Corridor	This corridor is characterized by commercial and industrial uses at the west end in Wenatchee, which transitions to rural residential and agriculture toward Malaga. The planned Waterfront Park in Malaga and a new bridge, which will cross over the railroad tracks at Bridge Street and connect to the Loop Trail in South Wenatchee, are the two major destinations and logical endpoints on this corridor.
Wenatchee to Entiat to Chelan Corridor	The pathway and alignment for this corridor is still in the preliminary development stage, public outreach has not been started.

Transit Network

Link Transit provides local and intercity bus services throughout Chelan County. The majority of transit riders access this service by walking or parking at a park-and-ride lot or on-street parking and then connecting to transit. There are currently 9 Link Transit routes that provide daily service within Chelan County. Most of these routes currently have service frequencies of 30 minutes to 1 hour. Service is offered at all of Chelan and Douglas County's ten park-and-ride lots (Table 11-3), which are located adjacent to state routes. The approximate number of parking spaces provided at each park and ride lot is also provided in Table 11-3. Figures 11-13 through 11-15 show existing Link transit routes that operate within Chelan County.

Link Transit's Columbia Station, located in Wenatchee

Link Transit also operates LinkPlus, a paratransit service that operates as a dial-a-ride service based on pre-scheduled requests. This fulfills the Americans with Disabilities Act (ADA) mandate and is active within a ¾ mile radius of Link Transit's fixed route services in Cashmere, Chelan, Entiat, Malaga, Manson, Monitor, and Wenatchee. Link Transit also provides free Dial-A-Ride Transit (DART) services in Chelan and Leavenworth outside of the fixed-route service area.

Table 11-3
Park and Ride Location and Spaces

Lot Name	Location	Approx. Spaces	Bus Routes Served
Big Y	US 2 & SR 97	41 spaces	22
Columbia Station	Kittitas and Columbia Streets, Wenatchee	64 spaces	All routes except 18, 32, and DART
East Wenatchee	310 Rock Island Rd, East Wenatchee	32 spaces	2
Entiat	SR 97A & Entiat Way	21 spaces	21
Lake Chelan	SR 97A & Center Street (Lakeside)	29 spaces	21
Leavenworth	SR 2 near USFS	43 spaces	22, 122
Olds Station	Surrounding Wenatchee Area	242 spaces	8, 18, 21, 22, 28
Willkommen	Behind Leavenworth Safeway	89 spaces	22, 122, 32
Chelan County Museum	Cashmere	2 spaces	22, 28
Buckshot Honey	400 Aplets Way, Cashmere	2 spaces	22

In addition to Link Transit, Amtrak provides long distance commuter rail services through Chelan County along its Empire Builder Route. The route runs from Seattle or Portland to Chicago. Within

Chelan County, this route serves the cities of Leavenworth and Wenatchee providing interstate transit connections to and from the county.

Figure 11-13
Link Transit Routes (Chelan, Manson, & Entiat Vicinity)

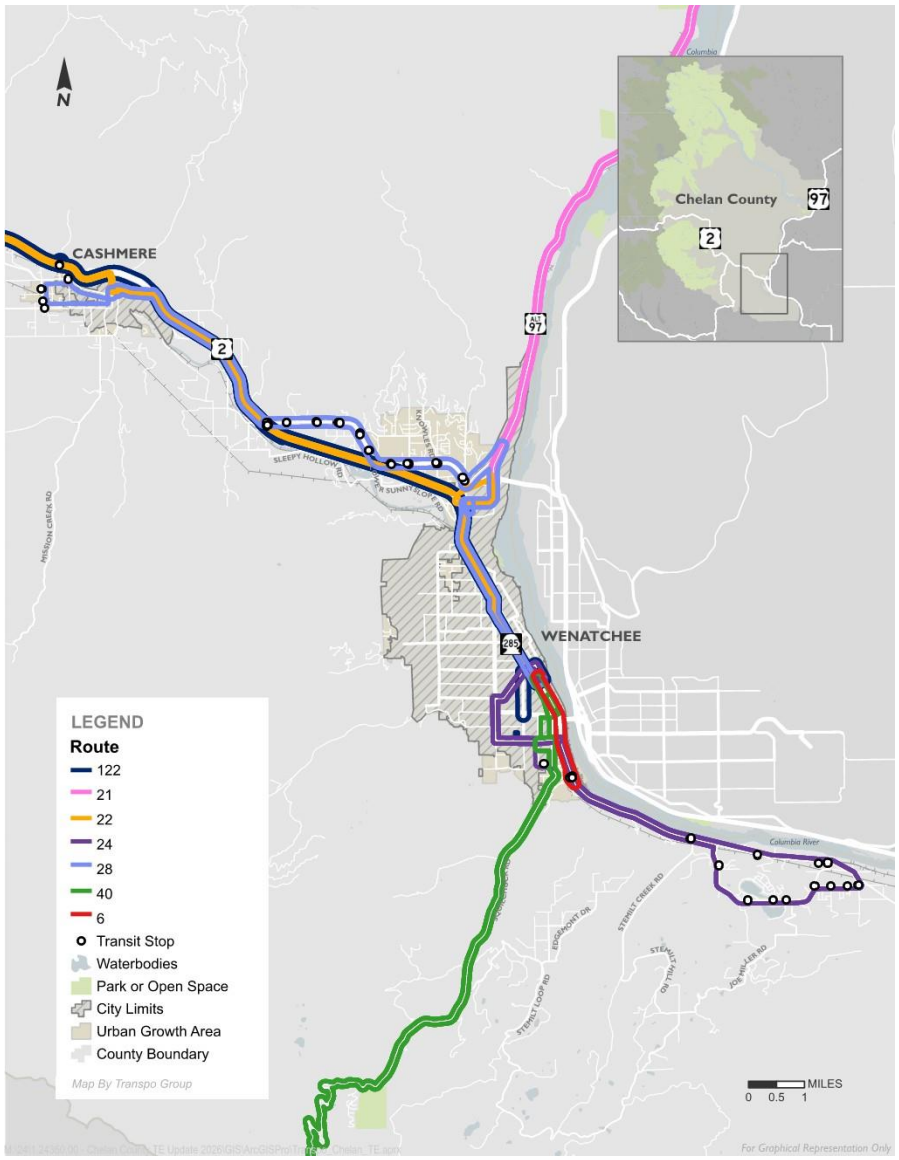

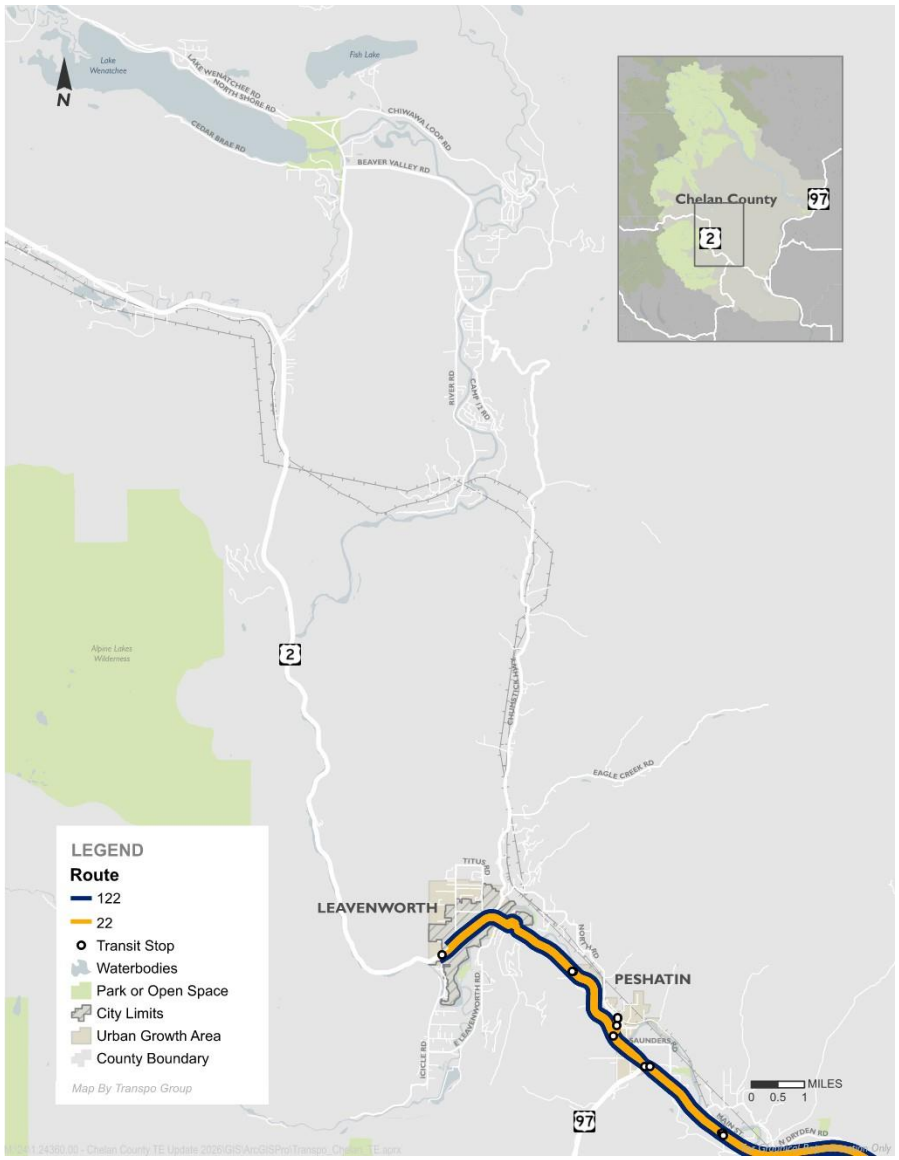

Figure 11-15
Link Transit Routes (Leavenworth, Peshastin, & Plain Vicinity)

Freight Network

Freight and goods movement is a vital and often underappreciated element of the transportation network. Everyone is directly impacted by how goods are delivered to ports, distribution centers, stores and their homes. Chelan County is a key regional player in the movement of goods with major highways and arterial connections to distribution facilities.

As discussed earlier in this section, Chelan County is home to a number of key freight-generating and time-sensitive industries, including agriculture and forestry. Providing a transportation system that accommodates these key economic generators, and a timely movement of goods is of central importance to Chelan County.

US 2, from SR 285 to the Chelan/Douglas County line, is the most heavily traveled roadway facility in Chelan County, followed closely by many of the segments of US 2, US 97, and SR 285 in the immediate vicinity of Wenatchee. The Chelan-Douglas Transportation Council has identified many of these facilities for roadway and signage improvements to better facilitate freight movement.

The WSDOT freight and rail corridors within Chelan County are shown in Figure 11-16. The State's Freight and Goods Transportation System (FTGS) freight routes within Chelan County are shown in Figures 11-17 through 11-19. The FGTS classifies highways, county roads, and city streets according to the average annual gross truck tonnage they carry. These classifications are classified as shown:

- T-1: more than 10 million tons per year
- T-2: 4 million to 10 million tons per year
- T-3: 300,000 to 4 million tons per year
- T-4: 100,000 to 300,000 tons per year
- T-5: at least 20,000 tons in 60 days and less than 100,000 tons per year

The freight network in Chelan County includes rail and water transportation as well. BNSF runs between Everett and Spokane, passing through Chelan County. The BNSF route supports double-stack intermodal containers and is connected to the transcontinental BNSF network. The Columbia River Railroad Company runs another line connecting to the BNSF mainline in Wenatchee, extending to Entiat, Chelan Falls, Chelan, and Oroville in Okanogan County. The route primarily serves small industrial and agricultural locations.

The major commercial water transportation operators are Mountain Barge Services and the Lake Chelan Boat Company, whose barges transport many of the large goods to Stehekin, Lucerne, and Holden. The US Postal Service utilizes the passenger ferry system in these communities as well.

Figure 11-16

Auto Network

With most Chelan County residents, employees, and visitors relying on driving as their primary mode of transportation, the county's roadway network is critical to the transportation system.

Most of the congestion in Chelan County is experienced in the urban areas or at certain times of year – nearby ski resorts in winter or routes accessing Lake Chelan in the summer. Vehicle Level of Service (LOS) analysis was conducted on major arterial and collector roadways (the county's highest class of roadways) throughout the county and summarized in Appendix L. Roadway segment operations were evaluated and assigned a vehicle LOS grade based on their operations in terms of volume to capacity ratio. In Chelan County, the standard for a roadway to be considered "acceptable" is LOS C or better in rural areas and LOS D or better in urban areas. Table 11-4 describes the Level of Service definitions laid out in Chapter 17 of the *Highway Capacity Manual* (HCM) (Transportation Research Board, 2010), which is a standard methodology for measuring the performance of roadway segments.

Table 11-4
Vehicle Level of Service Definitions

Level of Service	Description
A	Free-flowing conditions
B	Reasonably unimpeded operation
C	Stable operating conditions, but individual motorists are affected by the interaction with other motorists
D	Less stable operating conditions where a small increase in flow may cause substantial increases in delay and decreases in travel speed
E	Unstable operation and significant delay
F	Over capacity, with delays

As described earlier, traffic volumes on the county's roads vary by season. Peak tourism seasons draw heavy traffic, and crop harvest times see increased numbers of trucks on the roads.

Based on traffic counts collected over many months of the year, spring (May) and fall (October) were identified as a "typical" month as it generally avoids abnormal travel seasons during the summer and winter periods. In contrast, August represents peak summer conditions, when tourism and the

agricultural sector drive traffic congestion. For the Transportation Element, traffic volumes from spring and fall months were used to evaluate roadway LOS under typical (non-peak) conditions.

Under current year conditions, no County roadway segments are shown to operate below the county's LOS standard under typical (spring/fall) conditions.

2050 Forecast

Traffic volumes seen today are forecast to grow based on population and employment growth both in the county, as well as regionally. To ensure consistency with the Land Use Element of the Comprehensive Plan, housing growth allocations for unincorporated Chelan County, summarized in **Table 5**, were used to refine the model land use assumptions in the CDTC regional travel demand model.

Table 11-5
Unincorporated Chelan County Housing Growth Allocation

Region	Total No. of Dwelling Units Demanded
Manson UGA	227
Rural Chelan County[1]	1,704

Source: *County of Chelan Land Capacity Analysis* (Points Consulting, June 2025)
[1] Within rural Chelan County, 109 of the demanded dwelling units would be accommodated within the proposed Malaga Urban Growth Area (UGA).

Annual growth rates were then calculated from the CDTC regional travel demand model for areas of the county expecting more intense land use growth (i.e., Sunnyslope, Malaga, and Manson). These annual growth rates are consistent with historical growth in Chelan County, where development is expected to occur based on current development patterns. The annual growth rates used to estimate future traffic volumes countywide are summarized in **Table 11-5a**.

Table 11-5a**. Chelan County Annual Growth Rates**

Area	Annual Growth Rate
Sunnyslope[1] (Wenatchee UGA)	2.8%
Malaga UGA[1]	2.5%
Manson UGA[1]	2.3%
All Other Areas[2]	1.0%

[1] Annual growth rate developed based off volume forecasts from the CDTC Regional Travel Demand Model
[2] Annual growth rate developed based off historical traffic count data

Forecasts of future (2046) traffic volumes were estimated using the annual growth rates presented in **Table 5a** and roadway segment operations were evaluated under typical future (2046) conditions**.** Based on the forecasted volumes, only two county roadway segments are expected to fall below the county's vehicle LOS standard:

Forecasts of future (2046) traffic volumes were estimated using the annual growth rates presented in **Table 6** and roadway segment operations were evaluated under typical future (2046) conditions**.** Based on the forecasted volumes, only two county roadway segments are expected to fall below the county's vehicle LOS standard:

- Easy Street, near the intersection with US 2
- Malaga Alcoa Highway, south of the City of Wenatchee.

The finding that the Malaga Alcoa Highway will fall below the county's LOS standard is consistent with more intense development associated with the conversion of the Malaga LAMIRD to a UGA. Since the Malaga Alcoa Highway serves as the main access roadway between Malaga and the rest of the county, it is recommended that operations along this roadway be monitored as the area develops to ensure continued access to the Malaga community. Additionally, as the Malaga UGA develops, the County should coordinate transportation improvements and land-use decisions with Link Transit so that future public transportation is considered in corridor design, pedestrian connections, development access, and the location of major residential and employment growth.

The county is aware of the capacity issues along Easy Street, especially near the US 2 and US 97 interchange. The county recognizes multiple projects that could improve conditions

Based on the regional demand and the forecasted traffic volume, county roadways should be able to accommodate anticipated local and regional growth for the next 20 years. Nevertheless, the county should monitor key segments especially near freeway interchanges and potential bottleneck locations to maintain an efficient roadway network.

in this area, including the proposed Confluence Parkway in the City of Wenatchee. Chelan County will work closely with WSDOT and the City of Wenatchee to address the expected increase in traffic.Safety

Between 2019 and 2023, a total of 581 crashes were reported in Chelan County, 39 (7%) of which resulted in a fatality of serious injury. Figures 11-20 through 11-22 present the crashes by crash type, the pedestrian/bicycle crashes, and the fatal and severe injury crashes, respectively, for the 5-year analysis period.

The county has prepared a Safety Action Plan that follows WSDOTs Target Zero methodology where primary crash factors and high-risk behaviors are identified so that a countywide, or systemic, approach would be taken to generate high priority mitigation projects. The analysis found that lane departure crashes are identified as the top risk factor for crashes within the county. Over half of collisions involved a stationary object along rural roads (i.e. trees, signs, guardrails). As part of the Safety Action Plan, the county has identified several safety projects and programs to address these crash types. This Transportation Element looks to build on and implement the recommendations of the safety plan.

In line with the policies outlined in the Safety Action Plan, Chelan County strives to provide safe access routes to schools. Through WSDOT's Safe Routes to School (SRTS) grants program, the county is evaluating safety needs around schools in South Wenatchee (Mission View Elementary School) and Manson (Manson Elementary and High Schools). The outcome of these projects is to identify the necessary active transportation facilities to provide a safe walking route for local students.

Figure 11-20
Crash History – Crash Type (2019–2023)

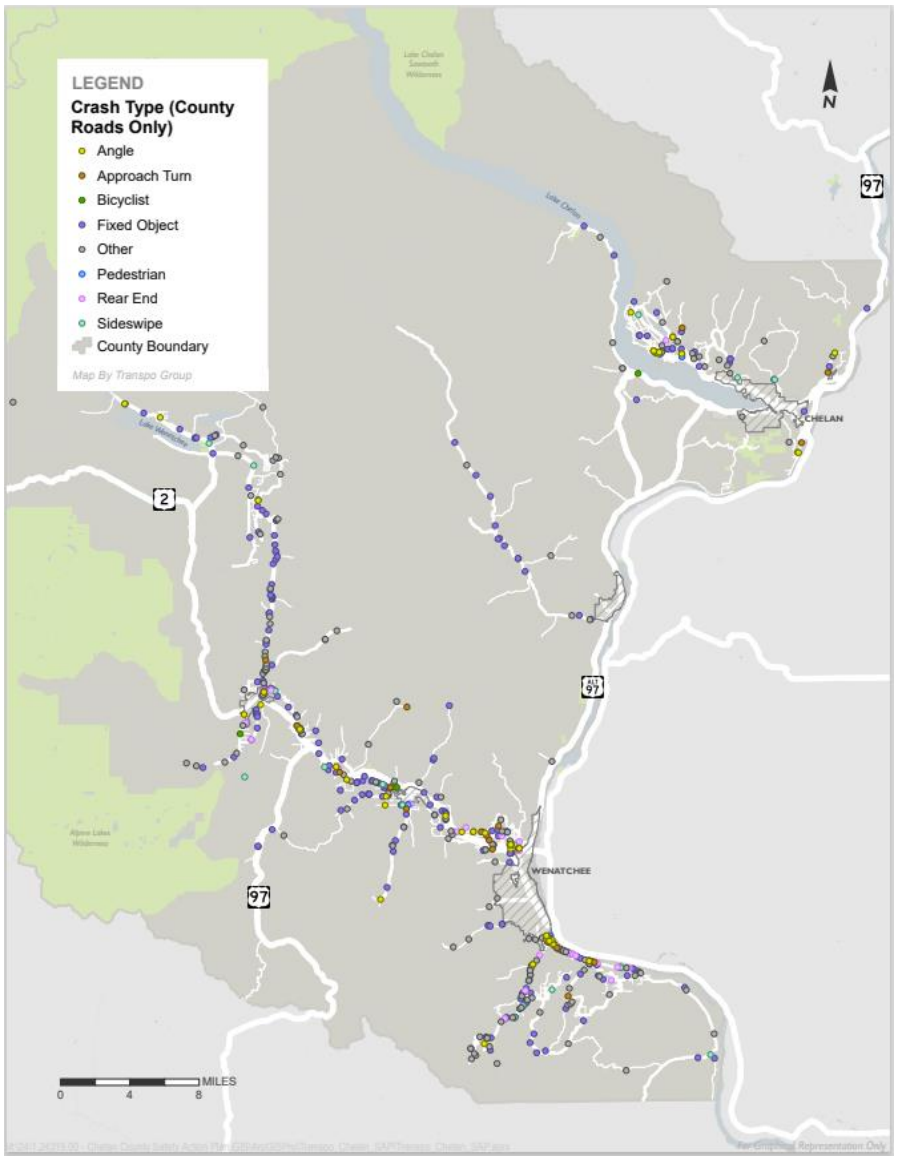

Figure 11-21
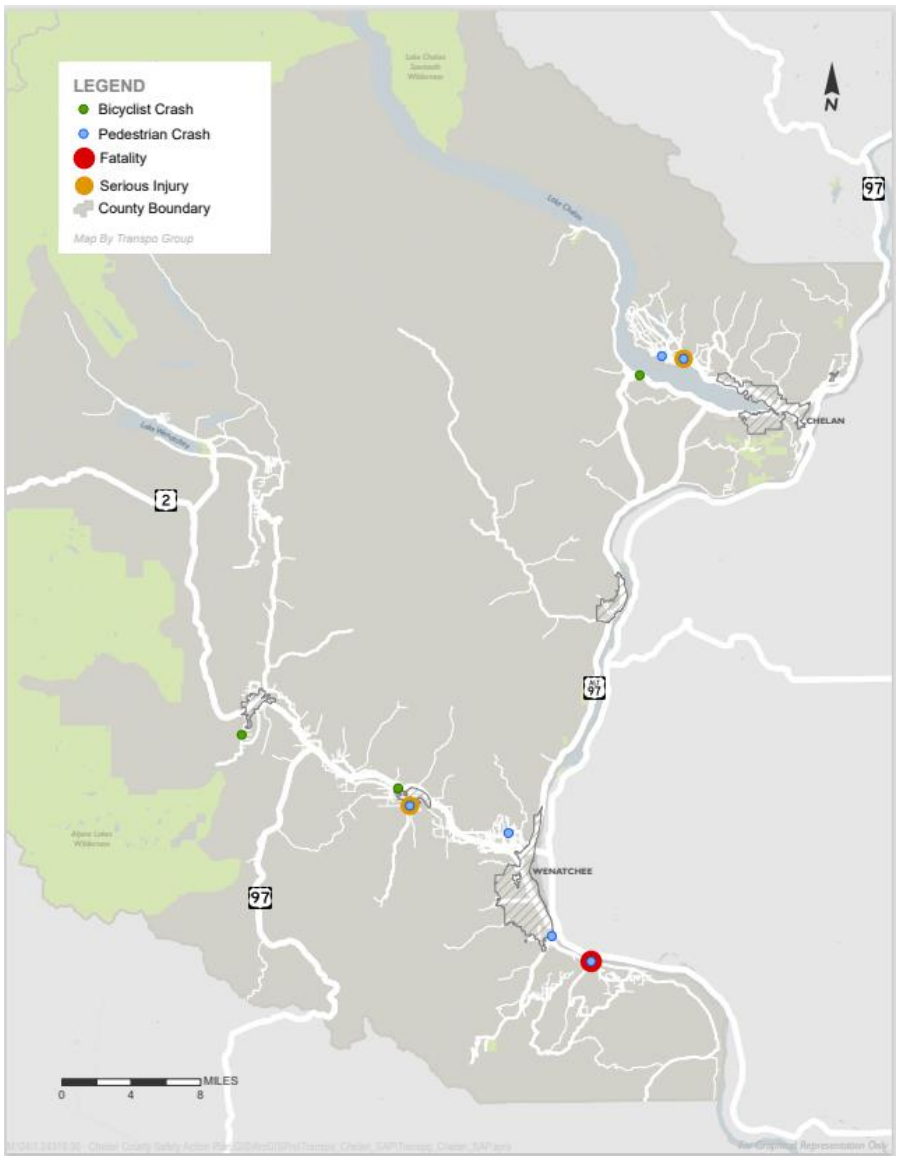
Crash History – Pedestrian and Bicycle Crashes (2019–2023)



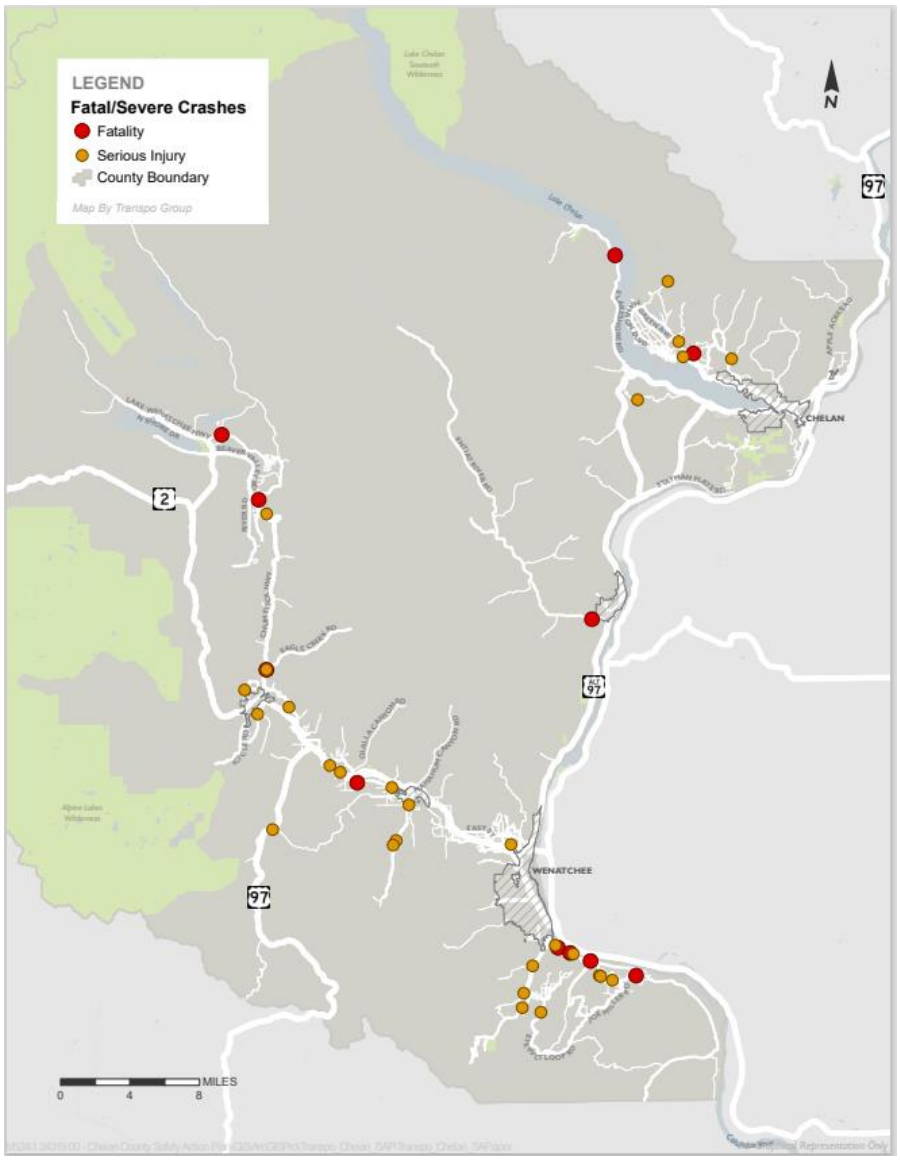


Figure 11-22
Crash History – Fatal and Severe Injury Crashes (2019–2023)

II. Opportunities and Challenges

Chelan County has several important challenges to face as it prepares for future growth and development. Each community and stakeholder possesses a different set of priorities, which the county must balance as it works to provide a multimodal network that serves diverse needs.

Network Connectivity

Maintaining a Functional System

The county's vast roadway network needs to be maintained to provide access for all roadway users. A poorly maintained network will hinder the county's ability to support future development as well as life safety and emergency operations. An important component of the roadway network is the county's bridge inventory. Bridge repair and maintenance is crucial to regional connectivity. In addition, seasonal changes and natural hazards (landslides, stormwater runoff, and fallen trees) guarantee that maintenance will be a significant component of Chelan County's transportation plan in the next 20 years.

Pedestrian and Bicycle Infrastructure

Sidewalks are generally available within city jurisdictions. However, in more rural areas of the county, only shoulders are provided and in most cases no separated pedestrian facilities are provided at all. This limits the mobility of pedestrians outside of city limits.

As part of *Transportation 2050,* CDTC has identified planned bicycle facility connections countywide. Chelan County will coordinate with CDTC and other local agencies to plan and pursue funding for the bicycle facilities and pathways identified in this plan and the *Chelan-Douglas Pathways Master Plan*.

Transit Access and Availability

Since population centers are distant from one another, bus service provides significant mobility. The county coordinates with and encourages transit usage and service to help residents, employees, and visitors reach their destinations.

Regional Growth

Regional development will play a role in the growing demands on Chelan County's transportation network by 2046. The county is expected to continue adding residents and jobs at a steady rate. This growth will add traffic to Chelan County's streets, as well as US 2, US 97 and US 97A, which has an

impact on the quality of life for county residents. Continued coordination with regional entities and city agencies will be critical to ensure a complete and connected transportation system that serves Chelan County residents, employees, and visitors in the future.

Funding

Funding for transportation improvement projects as well as preservation and maintenance of the current network has been stretched thin in recent years. The county is exploring multiple options to best maximize its funds to best serve the needs of residents, employees, and tourists in the county. Chapters three and seven of this Transportation Element shed more light on the challenges and opportunities of funding the transportation network.

Safety

Roadway safety has been identified as one of the key priorities of residents of Chelan County. Based off the analysis in the Safety Action Plan, rural county roadway exhibited a high percentage of lane departure crashes (i.e., roadway departure, hitting fixed object, from opposite direction head-on and sideswipe). As part of this plan, the county has identified several safety projects and programs to address these crash types. This Transportation Element looks to build on and implement the recommendations of the safety plan.

Furthermore, the county and individual cities aim to provide safe access to schools through WSDOT's Safe Routes to School (SRTS) program. Agencies apply for the grants in an effort to increase pedestrian safety. In addition, the county is looking to provide more complete facilities such as shoulders, trails, and sidewalks, to support active users. Chelan County's Safety Action Plan (SAP) will be used as a guide map for implementing safety improvements throughout the county.

11.3 Maintaining Our System

The capital plan (Section 11.6) of this element presents the future transportation infrastructure investments that are recommended to achieve the county's mobility goals. However, the vast majority of the county's future transportation system is already on the ground today and needs to be operated, maintained, and preserved over the life of this plan. The critical importance of adequately funding ongoing programmatic expenditures is emphasized in Goal 1 of this plan: Maintain What We Have.

This chapter discusses conditions and trends in programmatic expenditures related to the county's existing roads and bridges.

I. Existing System

The county road inventory consists of approximately 500 miles of paved roads and 56 county-owned bridges. This inventory does not include State Routes or city streets, which are maintained and operated by the State and city agencies, respectively.

To keep this system functioning, the county makes the following types of investments, which are described in further detail below:

- **Maintenance.** Routine and ongoing activities to ensure facility utility, e.g. pothole repair and snow and ice control.
- **Preservation.** More substantive improvements to extend the useful life of assets, like pavement repair and chip seals.
- **Administration and Operations.** Public works transportation administration and support; engineering and planning services that support transportation projects.
- **Capital Outlay.** Buildings and maintenance facilities that support the transportation program.

Maintenance

The county performs regular maintenance on its roadway system. Maintenance is considered a routine activity associated with repairing a physical asset or keeping the physical asset functional during its useful life. The major maintenance activities conducted by the county include:

- Pavement crack sealing and pothole repair
- Gravel road maintenance
- Shoulder maintenance

- Roadside maintenance
- Road storm drainage facility maintenance
- Bridge repair and maintenance
- Guardrail repair and maintenance
- Signing and striping
- Snow plowing and ice removal

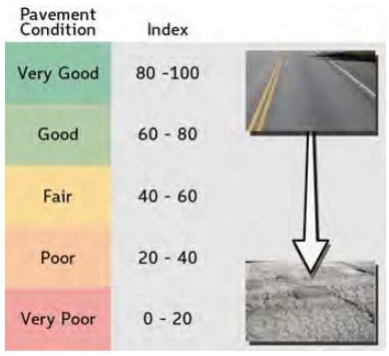
Preservation

Preservation is the replacement or repair of an asset to keep it in service at its lowest life cycle cost. Examples of preservation are replacing a bridge or repaving a roadway. There is a strong relationship between maintenance and preservation, in that if the county's roadways are well maintained, it will maximize their useful life and minimize the cost of keeping the roadways functional when it comes time to repair/replace them.

The following activities are examples of preservation:

- Pavement repair followed by
  - Chip Sealing
  - Hot Mix Asphalt overlay
- Bridge repair/replacement

To monitor pavement maintenance and preservation needs, Chelan County maintains a Pavement Management (PM) program that regularly collects data and rates pavement conditions for all paved roadways under the county's jurisdiction. The ratings are the result of field assessments of the percentage of roadway surface experiencing conditions like alligator cracking, longitudinal cracking, patching, asphalt raveling, and transverse cracking in a given length of roadway. From these observations, the Pavement Surface Condition (PSC) rating is calculated. The rating is a scale of 0 to 100 (Figure 11-23).



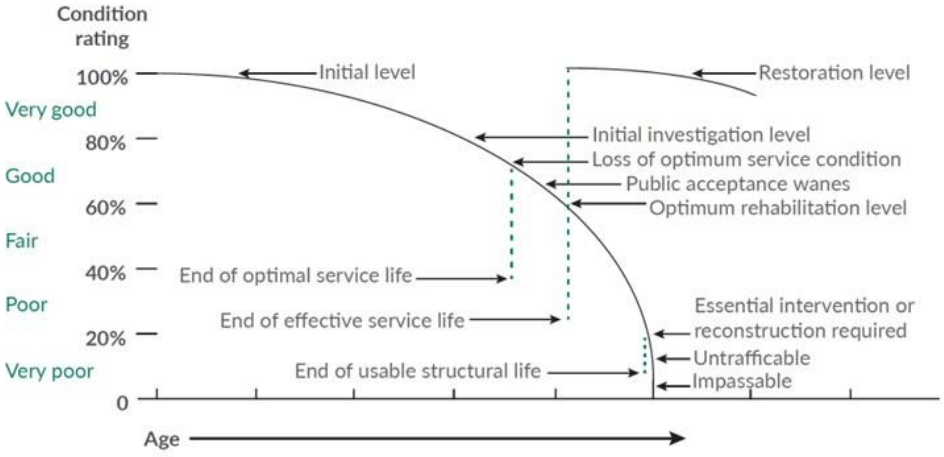


Figure 11-23 PSC Rating Scale

These ratings are used to evaluate treatment strategies, assess overall management of the roadway surface network, and inform future funding needs.

As the figure (Figure 11-24) below shows, pavement degrades in a non-linear fashion. Once pavement falls into the fair/poor categories, its condition rapidly degrades without maintenance intervention. The cost to bring a road into good condition or maintain it at this level escalates quickly as the roadway degrades. A road in good condition can be maintained with simple patching and sealing, whereas roads in fair condition may require an overlay, and very poor condition roads often require full reconstruction.

Figure 11-24
Typical Pavement Deterioration Curve

Source: WSDOT Pavement – Conditions & Performance Analysis

In addition to roadways, the other major asset that the county is responsible for is bridges. The State mandates a biannual review of all bridges to determine their condition. The result of this analysis is a rating of bridges to determine the condition of the structure and if they are functionally obsolete or structurally deficient. Of the 56 bridges under the county's jurisdiction, 3 are rated as being in Poor condition, while several other structures require deck rehabilitation, scour repairs, painting, or structural concrete repairs.

It is a federal requirement that signs be replaced when the visibility of the sign at night falls below a prescribed visibility. To comply with this mandate, the county must determine when signs need to be replaced based on the average visibility of a sign. Different sign material fades at different rates.

There are many other elements of county roads including shoulders, drainage features, walls, guardrail, pedestrian facilities, traffic signals and street lights. Most of these elements have not had a systematic method of evaluating condition over time, with elements of the system replaced only when they fail or fall out of compliance. The county's recent efforts to develop an Asset Management System for all roadway elements will close this gap and provide a systematic means for replacing or refurbishing these elements over time.

Administration and Operations

Another critical component to keeping the county's transportation system functioning are the public works staff that administer and support the system by responding to emergencies, conducting maintenance activities, and providing planning and engineering improvements to the system.

Capital Outlay

Last, but not least, are the support infrastructure for the transportation system, such as snow plows, maintenance shops, and other heavy machinery that are owned and maintained by the county to keep the transportation system functioning year round.

Table 11-6 shows programmatic expenditures over the past 5 years.

Table 11-6
Historical Maintenance & Preservation Expenditures (2021-2025)

	2021	2022	2023	2024	2025	Total
Administration and Facility Operations	$2,880,664	$3,565,190	$3,368,296	$3,009,239	$3,604,825	$16,428,214
Maintenance and Preservation	$7,966,811	$9,052,222	$9,424,529	$11,159,930	$7,782,809	$45,386,300
Capital Outlay for Facilities	$ -	$25,121	$23,121	$ -	$ -	$48,242
Total	**$10,847,475**	**$12,642,533**	**$12,815,946**	**$14,169,169**	**$11,387,634**	**$61,862,757**

II. Budgeting for State of Good Repair

The county evaluated its transportation system inventory and likely maintenance and preservation needs over the next 20 years. Below, each element of the county's inventory is described with annual expenditure needs summarized at the end.

Pavement

There are two primary types of paved roadways under Chelan County's jurisdiction:

- Hot mix asphalt (HMA) is the most durable asphalt treatment regularly performed in the county. These roadways have a design life of 20 years. The county has 28 center line miles of HMA paved roadways, 2 miles of which are in Poor or Very Poor condition (PSC less than 40). (Roadways that are HMA paved generally receive a chip seal within 10-years to further the life of the road. These roads may be listed included in the BST inventory.)
- Bituminous surface treatment (BST), also known as chip seal, is a lower-cost treatment that has a shorter design life of approximately 7 years. The county currently has 427-centerline miles of BST paved roadways, 3 miles of which are in Poor or Very Poor condition (PSC less than 40). The cost of performing an overlay of a BST roadway is approximately $36,000 per center line mile. (An undetermined number of miles of BST roadways were originally constructed with HMA surfacing.)

Table 11-7, below, summarizes the annual investment need for pavement preservation based on this inventory. Consistent with Goal 1 of Maintaining What We Have, this plan recommends front loading pavement preservation costs in the first six years of this plan to address the existing backlog in pavement needs.

Other Roadway Elements

While pavement preservation is the primary cost related county roads, there are other important elements to consider, including shoulders, drainage features, pedestrian facilities, guardrail, concrete barriers, signals and signage. Table 11-7 summarizes costs associated with replacing/refurbishing guardrail, concrete barriers, and signage over the life of this plan.

Bridges

As described earlier, there are 56 bridges under Chelan County's jurisdiction. Of these 56 bridges, only 3 have an Overall Bridge Condition Classification of Poor, as indicated in the Chelan County Public Works Department *Annual Bridge Report 2025*:

- Peshastin Bridge #411A[50]
- Ardenvoir Bridge #505A[39]
- Chiwawa River Bridge #703A

Two of the three bridges in poor condition were addressed in 2024, with the remaining bridge, Chiwawa River Bridge #703A, scheduled for replacement in 2027. In 2024, the County received Surface Transportation Program (STP) Bridge funds to replace the girders, deck, and other structural elements, fully covering the cost of the repairs to the Chiwawa River bridge with Federal Funds.

Table 11-7
Recommended Preservation Expenditures

Element	Conditions PSC	Qualitative Condition	Inventory	Unit	Design Life (years)	Unit cost ($)	Annual Investment
Paved County Roads							
Paved Roads	PSC ≥ 40	Fair to Very Good	490.85	Center line (CL) miles	7	$36,000 per CL mile	$2,525,000
	PSC < 40	Poor to Very Poor	9.66	CL miles	6	$480,000 per CL mile	$773,000
Annual Pavement (Years 1-6)							**$3,298,000**
Annual Pavement (Years 7-20)							**$2,574,000**
Other Roadway Elements1							
Guardrail & Concrete Barriers			83.47	CL miles	30	-	$62,000
Sign/Striping			8,183	EA	10	-	$585,000
Pedestrian Facilities			157,619	LF	50	-	$7,000

[50] Bridge deck replaced in 2024. Bridge condition in the *Annual Bridge Report 2025* does not reflect the improvements.

Element	Conditions PSC	Qualitative Condition	Inventory	Unit	Design Life (years)	Unit cost ($)	Annual Investment
Drainage Facilities			5627	EA	75	-	$423,000
Annual Other Roadway Elements							**$1,077,000**
Bridges							
Bridges			56	EA	100	$5,360,000 for the replacement of 1 bridge	**$107,000** *(Assumes federal funding)*
Annual Preservation Years 1-6							**$4,482,000**
Annual Preservation Years 7-10							**$3,651,000**
Annual Preservation Years 11-20							**$3,651,000**

Notes:
1. Annual Investment Costs for Other Roadway Elements Based on historical annual investments.
Source: Chelan County Public Works 2026.

Major Findings

It is worthwhile to note that this analysis suggests that the county's investments in preservation may need to increase relative to recent spending levels. Historical preservation expenditures average approximately $2.1 million per year. To make room for this growth in preservation expenditures, the county will need to reconsider its funding priorities and potentially consider additional funding sources for transportation. The final chapter of this Plan considers ways to increase transportation revenues, such as local option gas taxes and a levy lid lift, both of which could fund system preservation.

III. Policies to Support a State of Good Repair

The following policies are recommended to enhance Chelan County's ability to preserve its existing system over the course of this Plan. Many of these policies have been applied in other jurisdictions and already with Chelan County.[51]

[51] Pierce County's May 2008 Transportation System Preservation Discussion white paper was a source for some of these policies.

Prioritize System Maintenance Over System Expansion

The cost-effective preservation of the existing and future transportation system should be a funding priority ahead of expanding the system. This Plan recommends addressing the backlog of pavement and bridge projects in the first 10 years, even at the expense of capital expansion.

Identify New Sources of Funding that can Pay for System Maintenance and Preservation

The county should look for ways to increase the amount of annual funding available for system maintenance and preservation activities. In considering new sources of funding, those that can fund maintenance and system preservation activities should be prioritized.

Maintain the County's Transportation System at Lowest Lifecycle Cost

To maximize the county's funding resources, transportation assets should be replaced or rehabilitated at the point of lowest cost in the lifecycle of the asset.

Enhance the Current Pavement Management System to Consider More Comprehensive Inventory of Assets

A comprehensive asset management system for all road assets is a key strategy for being able to accomplish the goal of lowest life-cycle cost for these assets. The county's Pavement Management system is an excellent step in the right direction, although the system could be expanded to monitor the condition of a comprehensive list of roadway assets, such as guardrail, signs, and concrete barriers. A comprehensive asset management system includes the following elements:

- Setting level of service goals
- Developing and maintaining a complete inventory of assets
- Regularly collecting asset condition and usage data
- Tracking costs
- Developing a method for evaluating risk
- Developing a method for evaluating when and how to replace or refurbish the asset
- Adopting performance measures that provide information to best manage the resources used to manage the asset.

Once all of these elements of a system are in place to manage an asset, county staff can justify and allocate the resources needed to effectively preserve the assets.

Develop a Reserve Fund to Address Unfunded Programmatic and Unanticipated Events

In recent years, the county has seen an uptick in system failures related to weather and aging infrastructure. As part of the annual update to the six-year Transportation Improvement Program (TIP), the county sets aside funding to address various maintenance programs for roadway and transportation infrastructure, as shown in Table 11-8. This includes $270,000 annually set aside for emergency projects. The county may consider allocating addition funds to emergency projects, as the need arises.

Table 11-8
Reserve Fund

Need	Annual Cost	Note
Bridge Programs	$40,000	Mostly inspection costs, larger repairs considered in emergency funding
Environmental Mitigation	$25,000	Typically don't use
Guardrail Program	$10,000	This program will be replaced in the future
Pedestrian Facility Retrofit Program	$10,000	Planning and inventory, then construction every 2 years $50,000
Slope/Wall Stabilization Needs	$50,000	Drops to $25,000 in odd years for construction, even years are for design
Hazardous Tree Removal	$5,000	Every 3rd year bumps up to $45,000 for construction
Roadside Safety Program	$15,000	Typically don't use
Emergency Funding	$270,000	$50K for engineering and $220K for construction ($20K for drainage, $50K for bridges, $150K for unforeseen projects)

11.4 Transportation Goals and Policies

This chapter provides a summary of the six main goals that encompass the county's transportation vision. These goals incorporate the many different priorities from different jurisdictions to promote consistency between the county and other stakeholders. Ultimately, this transportation element is guided by one overarching goal:

Provide a safe, balanced, and efficient multimodal transportation system that is consistent with the county's overall vision and adequately serves anticipated growth.

I. Goal 1 – Maintain What We Have

Maintain existing transportation facilities in a state-of-good-repair to ensure their continued function, which is critical to achieving all of the county's mobility goals.

1.1 Maintain a comprehensive transportation system plan, showing roadway classifications, roadway extensions, future facility locations and right-of-way needs.

1.2 Prioritize the cost-effective maintenance and preservation of the existing transportation system over system expansion.

1.3 Identify new sources of funding that can fund system maintenance and preservation.

1.4 Enhance, or add to, the current pavement management system to consider replacement needs of a more comprehensive inventory of assets.

1.5 Develop an emergency fund to address unanticipated events, such as slides and bridge failures.

1.6 Document, in rank-order from highest to lowest priority, Chelan County roads that are to be maintained during snow periods.

1.7 Require a maintenance agreement for private roads that are approved as a result of development or changes in land use.

1.8 Define and implement improvements to preserve the level of service and operations of the existing county road system.

1.9 Implement a transportation concurrency program to deny approval of any development proposal that would cause a roadway segment to fall below the adopted minimum level of service (except for highways of statewide significance) unless transportation improvements or strategies to accommodate the impacts of the proposed development are made concurrent with the development.

1.10 For SEPA review of new development and planning and design of transportation facilities, recognize that the minimum level of service adopted for State Routes and county arterials and collectors is level "C" for rural areas and level "D" for urban areas.

1.11 Prioritize and program road improvements to minimize seasonal road restrictions or closures.
