THIS MATTER, having come on for hearing in front of the Chelan County Hearing Examiner on October 4, 2023, the Hearing Examiner having taken evidence hereby submits the following Findings of Fact, Conclusions of Law, Conditions of Approval, and Decision as follows:

I. FINDINGS OF FACT

1. This is an application for a Conditional Use Permit for the permitting of an existing residence as a Short-Term Rental within the Commercial Agricultural Lands (AC) zoning district pursuant to the District Use Chart in Section 11.04.020 of the Chelan County Code. Access to the residence being used as the short-term rental would continue to be from Logsdon Lane, a private access easement off of N. Dryden Rd., and domestic water/sanitation for the residence would continue to be from an existing private well and existing septic system that are both located on the subject property.
2. The Applicant/Owner is Gabriel Cohen, 241 Logsdon Lane, Dryden, WA 98821.
3. The subject property is located at 241 Logsdon Lane, Dryden, WA 98821.
4. The abbreviated legal description and parcel number of the subject property is: Lot 3 BLA 2000-118; 10.11 acres. Parcel No. 24-18-35-120-075.
5. The subject property is not located within an Urban Growth Area.
6. The property is located within the Commercial Agricultural Lands (AC) comprehensive plan designation and zoning district.
7. The subject property is currently used for residential and commercial purposes. The applicant/property owner has an existing 2,770 sq.ft. house that was built in 2007 on the subject property and wants to use it as a short-term rental (STR). The other structures that exist on the subject property are used for the Deeproots Landscaping and Nursery company.
8. The property to the north is in agricultural and residential uses and is zoned Commercial Agricultural Lands (AC).
9. The property to the south is in agricultural and residential uses and is zoned Commercial Agricultural Lands (AC).
10. The property to the east is in agricultural and residential uses and is zoned Commercial Agricultural Lands (AC).
11. The property to the west is Wenatchee River and is zoned Rural Residential 1 DU 2.5 acres (RR2.5).

12. The applicant submitted an Aquifer Recharge Disclosure Form, date stamped August 21, 2023. The proposed project does not require a vulnerability report, pursuant to CCC Chapter 11.82.
13. Pursuant to the Washington State Department of Fish and Wildlife Priority Habitat Species Maps, the subject property is within the historic winter-range for mule deer. However, this habitat was historically lost when the subject property was converted to orchard. Therefore, the provisions of CCC Chapter 11.78 would not apply.
14. Pursuant to the Natural Resources Stream Typing Maps, the Wenatchee River flows along the western border of the subject property. Therefore, the provisions of CCC Chapter 11.78 and the Chelan County Shoreline Master Program, would apply if new construction were to occur.
15. Chelan County GIS mapping indicates that the subject property is located within a potential geologic hazard area for erosive soils. Therefore, the provisions of CCC Chapter 11.86 would apply if new construction were to occur.
16. Pursuant to the National Wetlands Inventory Maps prepared by the US Department of Fish and Wildlife Services, no wetlands are indicated to occur on or adjacent to the subject property. Therefore, the provisions of CCC Chapter 11.80 Wetland Areas Overlay District would not apply.
17. No comment was received indicating that the proposed development would be located within an area of high probability of containing cultural resources.
18. Operation of the short-term rental is anticipated to commence upon approval of the Conditional Use Permit and subsequent STR permit.
19. The subject property is accessed off N. Dryden Rd. onto a private access easement (Logsdon Lane).
20. Domestic water would continue to be supplied by a private well located on the subject property, which was documented in the application materials submitted for the CUP.
21. Power would continue to be by an extension of the Chelan County PUD.
22. Sanitation would continue to be provided by an existing on-site septic system that was permitted by the Chelan-Douglas Heath District as documented in the application materials submitted for the CUP.
23. The applicant must comply with CCC Chapter 7.35 Noise.
24. No new structures are proposed that could affect viewsheds of surrounding properties. As conditioned, the visual impact is anticipated to be minimal.
25. The Notice of Application was referred to surrounding property owners within 1,000 ft. (excluding 60' of right-of-way), jurisdictional agencies and departments of the County. These agencies and surrounding property owners were notified on September 20, 2023, with comments due October 4, 2023. Agency comments are considered by the Hearing Examiner and, when appropriate, set as Conditions of Approval. The following is a list of Agencies who received notice and the date comments were received:

30. The Notice of Application was issued on September 20, 2023.
31. The Notice of Public Hearing was issued on September 20, 2023.
32. Chelan County Comprehensive Plan - The subject property has a Comprehensive Plan mapping designation of Commercial Agricultural Lands (AC). Therefore, the proposed use will be reviewed under the AC purpose and uses listed in the Resource Element of the Chelan County Comprehensive Plan. The purpose of the Commercial Agricultural Lands land use designation of the Resource Element is to “assure the long-term conservation of commercial agricultural lands; to protect and preserve the farmers ability to farm; encourage existing and future agricultural land uses as a viable land use and a significant economic activity within the community; and, to protect agricultural land of long term commercial significance not already characterized by urban development from encroachment and incompatible uses.” Uses appropriate for these areas include agriculture, open space, residential, and forestry. Additional uses may be considered with supplemental provisions, such as “...intensification of existing small scale recreational or tourist uses that rely upon a rural setting but that do not include a new residential component...”. The Hearing Examiner finds that the proposed use, as conditioned, is consistent with the goals and policies of the Resource Element within the Chelan County Comprehensive Plan.
33. Chelan County Code, Section 11.93.040: Conditional Use Permit Criteria. A conditional use permit may be approved only if all of the following review criteria and any special criteria listed in this chapter are met.
 - 33.1 All criteria required for a specific use by this chapter can be satisfied.
 - 33.1.1 All criteria required for this conditional use permit can be satisfied.
 - 33.1.2 Criteria for STRs have been addressed below.
 - 33.1.3 Based on review of the application materials submitted, the criteria for the proposed use can be satisfied.
 - 33.2 The design standards of the zoning district within which the lot is located, critical area regulations, and all other applicable development standards and regulations can be met.

- 33.2.1 No development is going to happen and this is not a critical area when STR will have any effects on the surroundings or impact the adjacent zoning.
- 33.2.2 The subject property is located in the AC zoning district, which allows for Tier 2 STRs as a Conditional Use. The site plan of record, date-stamped August 21, 2023, demonstrates that the proposed use would meet applicable zoning setbacks identified in CCC Section 11.30.020. According to Chelan County GIS mapping, the only critical area existing on the property is the shoreline buffer of the Wenatchee River. No new structures are proposed to be constructed as part of the proposed use. Therefore, no impacts to critical area or shoreline regulations would be anticipated.
- 33.2.3 Based on the application materials submitted and the site plan of record, the proposed use would meet applicable zoning and critical areas regulations.
- 33.3. Compatibility with the adjacent uses and the protection of the character of the surrounding area.
 - 33.3.1 This STR is generally compatible with adjacent uses and should have very little effect if the Conditions of Approval are followed. It is located along the Wenatchee River and is isolated at the end of a driveway. An orchard is located to the east and has good separation from a hillside with native vegetation. The downstream property is closed off with a beach and a cliff.
 - 33.3.2 The proposed use, which involves using an existing residence as a short-term rental, is targeting the agricultural and residential characteristics of the surrounding area for commercial use. The Hearing Examiner finds that the proposed use is generally compatible with the agricultural and residential characteristics of adjacent properties due to these uses currently existing on the subject property.
 - 33.3.3 As conditioned, the proposed use would be compatible with the character of the surrounding area.
- 33.4. Detrimental impacts on the natural environment and productive use of surrounding natural resource lands can be mitigated or avoided.
 - 33.4.1 There will be no detrimental impacts to the natural environment. The property has been mitigated in the past with native vegetation and the landscape shows that it has been cared for.
 - 33.4.2 The subject property and several adjacent parcels are all identified as classified resource lands (agriculture) pursuant to the Chelan County Comprehensive Plan. The proposed use of the residence as an STR would not impact the current agricultural use of the remainder of the subject property or the current agricultural production of adjacent properties.
 - 33.4.3 As conditioned, the proposed use would not be detrimental to the natural environment or the existing productive use of the surrounding agricultural operations.
- 33.5. No conditional use permit shall be issued without a written finding that: After adequate opportunity for review and comment, all providers of water, sewage disposal, schools, and fire/police protection serving the development have issued a letter that adequate capacity exists or arrangements have been made to provide adequate services for the development.

- 33.5.1 This STR should have a very limited impact on county facilities. They will all be adequate for this CUP.
- 33.5.2 Chelan County provided a Notice of Application to all providers. Received comments are included in the file of record.
- 33.5.3 Through the process of public and agency noticing, opportunity for review and comments were provided for the proposed development. As conditioned, the proposed use would not result in county facilities reduced below adopted levels of service.
- 33.6 The proposed use shall not result in undue adverse impacts affecting the public health, safety and welfare.
 - 33.6.1 The permit will not adversely affect public health, safety or welfare.
 - 33.6.2 No agency comments were received indicating that the proposed use would adversely impact public health, safety, and welfare.
 - 33.6.3 As conditioned, the proposed use would not result in an adverse impact on public health, safety and welfare.
- 33.7 Adequate provisions have been provided for roads, ingress and egress, stormwater, parking and loading, domestic and irrigation water, sanitary facilities, power, fire protection, and other necessary facilities, improvements or services consistent with the requirements of Titles 11 and 15 of the Chelan County Code.
 - 33.7.1 Provisions have been made in the past to maintain all ingress and egress. The roads are maintained. There is plenty of parking and the facilities are very adequate:
 - 33.7.1.1 Roads, ingress and egress: The subject property is accessed off of N. Dryden Rd., a county right-of-way, onto an existing private easement (Logsdon Lane) that is used to travel to the existing residence that will be used for the STR.
 - 33.7.1.2 Stormwater: No new impervious surfaces would be constructed for the proposed use. The applicant shall comply with CCC Chapter 13.18 for stormwater drainage for any new structure on the subject property.
 - 33.7.1.3 Parking and Loading: Off-street parking must comply with the requirements of CCC Section 11.88.290(3)(C) regarding off-street automobile parking for the proposed use. The site plan of record, date-stamped August 21, 2023, and the application materials demonstrate that the applicant has provided the required parking spaces for the STR.
 - 33.7.1.4 Domestic and Irrigation Water: Domestic water is provided by an existing water right governed by the Department of Ecology.
 - 33.7.1.5 Sanitary Facilities: The existing residence has an existing septic system that has a 4-bedroom capacity and has been previously permitted by the Chelan Douglas Health District.
 - 33.7.1.6 Power: Power is provided by Chelan County PUD.
 - 33.7.1.7 Fire Protection: The proposed development is located in Chelan County Fire District #6. For the annual STR permit in Chelan County,

the applicant would have to go through the annual fire, life, and safety inspection.

- 33.7.2 All necessary facilities, improvements and services are consistent or conditioned per the requirements of Titles 11, 13 and 15 of the Chelan County Code.
- 33.8 Noise, light, heat, steam, erosion, water quality, glare, odors, air pollution, smoke, wastes, dust, vibration, electrical disturbance, physical hazards and related impacts on adjacent properties and to the vicinity can be mitigated or avoided.
 - 33.8.1 This conditional use permit will produce very little if any noise or light pollution effect on the adjacent properties. The closest resident is approximately 1500-2000 feet away and there are mature trees separating the properties. The other pollutions in this light item are not applicable.
 - 33.8.1.1 Noise and Vibration: Noise is regulated by CCC Section 11.88.190 and CCC Chapter 7.35. No construction would occur for the proposed use.
 - 33.8.1.2 Light and Glare: Lights appurtenant to residential development are regulated by CCC Section 11.88.080.
 - 33.8.1.3 Heat, Steam, Odors, Smoke and Dust: The proposed use would not generate heat, steam or odors.
 - 33.8.1.4 Erosion: Pursuant to CCC Chapter 11.86, the subject property contains geologic hazards. Therefore, the provisions of CCC Chapter 11.86 Geologically Hazardous Areas Overlay District would apply for any new construction.
 - 33.8.1.5 Water Quality: As conditioned, the proposed use would have to continue to meet standards as required by Chelan Douglas Health District and Department of Ecology.
 - 33.8.1.6 Wastes and Physical Hazards: No hazards identified.
 - 33.8.1.7 Electrical Disturbance: The proposal would not result in electrical disturbances.
 - 33.8.2 Based on the above facts, noise, light, heat, steam, erosion, water quality, glare, odors, air pollution, smoke, wastes, dust, vibration, electrical disturbance, physical hazards and related impacts on adjacent properties can be avoided or mitigated, as conditioned.
- 33.9 The granting of the proposed conditional use permit is consistent and compatible with the intent, goals, objectives and policies of the comprehensive plan, and any implementing regulation.
 - 33.9.1 This conditional use permit is compliant with aspects of the comprehensive plan and any implementing regulations.
