What about public spaces?

On a scale of 1-5, with 1 being "no way" and 5 being "absolutely great", how do you feel about more houses on smaller lots in Malaga?

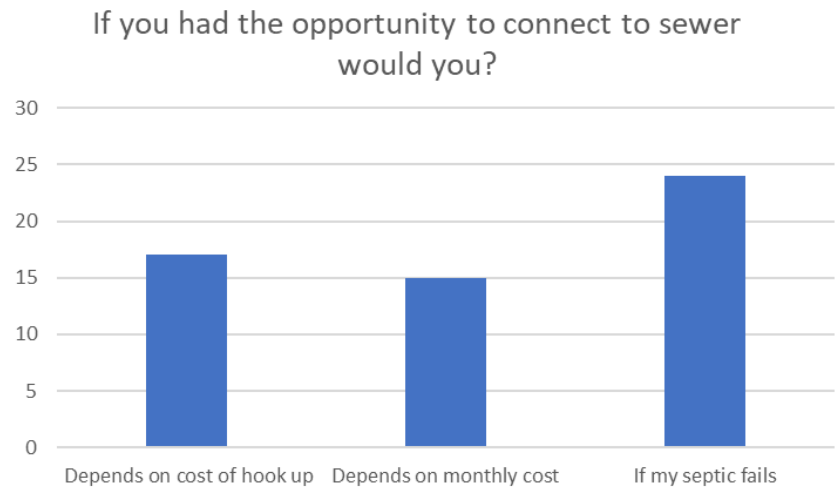

On a scale of 1-5, with 1 being "no way" and 5 being "absolutely great", how do you feel about duplexes, triplexes, or townhouses in Malaga?

If you had the opportunity connect to sewer, would you?

### Comments

Would love to see more of a downtown area with public spaces and opportunities for small businesses to build a stronger sense of community here. We do not want to be in the UGA

I would hate to see property taxes for existing residents to increase! I am also concerned about the Malaga-Alcoa Hwy and the increase in traffic.

Growth is inevitable, put it in the right location

Microsoft has helped. We now have a 24/7 fire dept. and I would like to see money spent on the marina/park and infrastructure.

Public spaces, bridge to rock island area.

More business/schools?/

Add a grocery store and & one more gas station

Malaga should be used for industrial & commercial growth. Would like no high-density housing.

It is growing to (sic) big. There are several Data centers that we don't need.

Keep it rural, no high-density homes.

Remove the R2 and R3.

Improve highway before a lot of growth.

Nice that it is growing but roads need improving Less data centers.

Keep it rural. Keep it AG, no high density no 12K lots. We have to address the domestic water issue 20 years overdue.

Poner mas en expanol

## MALAGA UGA SURVEY RESULTS

The valley needs more housing

A mi me gustaría ver más lugares para ir a disfrutar aquí localmente, también más banquetas para caminar y más iluminación en las calles para salir a caminar en las tardes o en la noche y una clínica sería muy bueno también

Malaga is a rural agricultural community which is growing fast with housing and Industry. We need the Malaga-Alcoa to be improved for the volume of traffic that will be coming with more housing and Industry. South of Malaga is about the only open land left for Industry in Chelan County.

Ag has become a difficult business for small farms.

Industrial needs to stay away from residential areas like off Dixie where gravel pit used to be.

Need grocery store

If you are wanting it to be a community don't mix industrial and residential uses.

Can we reduce the density of the R-1, and R-2 zoning? You spelled Malaga incorrectly in this question. I think we need to think about preserving open space, is there a way of doing that within this UGA process? Is there a way to keep orchards from becoming housing like a land trust for ag land?

I think it's a nice place to live now. It will be really nice when we have more public park space.

Protect our water, no schools
