

2015 Project Photo Page

A series of detention ponds was built on county-owned property near milepost 2.6, or at 2974 No. 1 Canyon Road. Photos show construction (top and left center), completion (center) and the detention ponds during spring runoff (bottom left). A second debris basins project, to be built in summer 2021 at the end of the roadway, will be very similar to the first project, only larger.
