Using the Dual Benefit Analysis in the Chumstick/Peshastin Area for project implementation

Dual Benefit Analysis (in a nutshell)

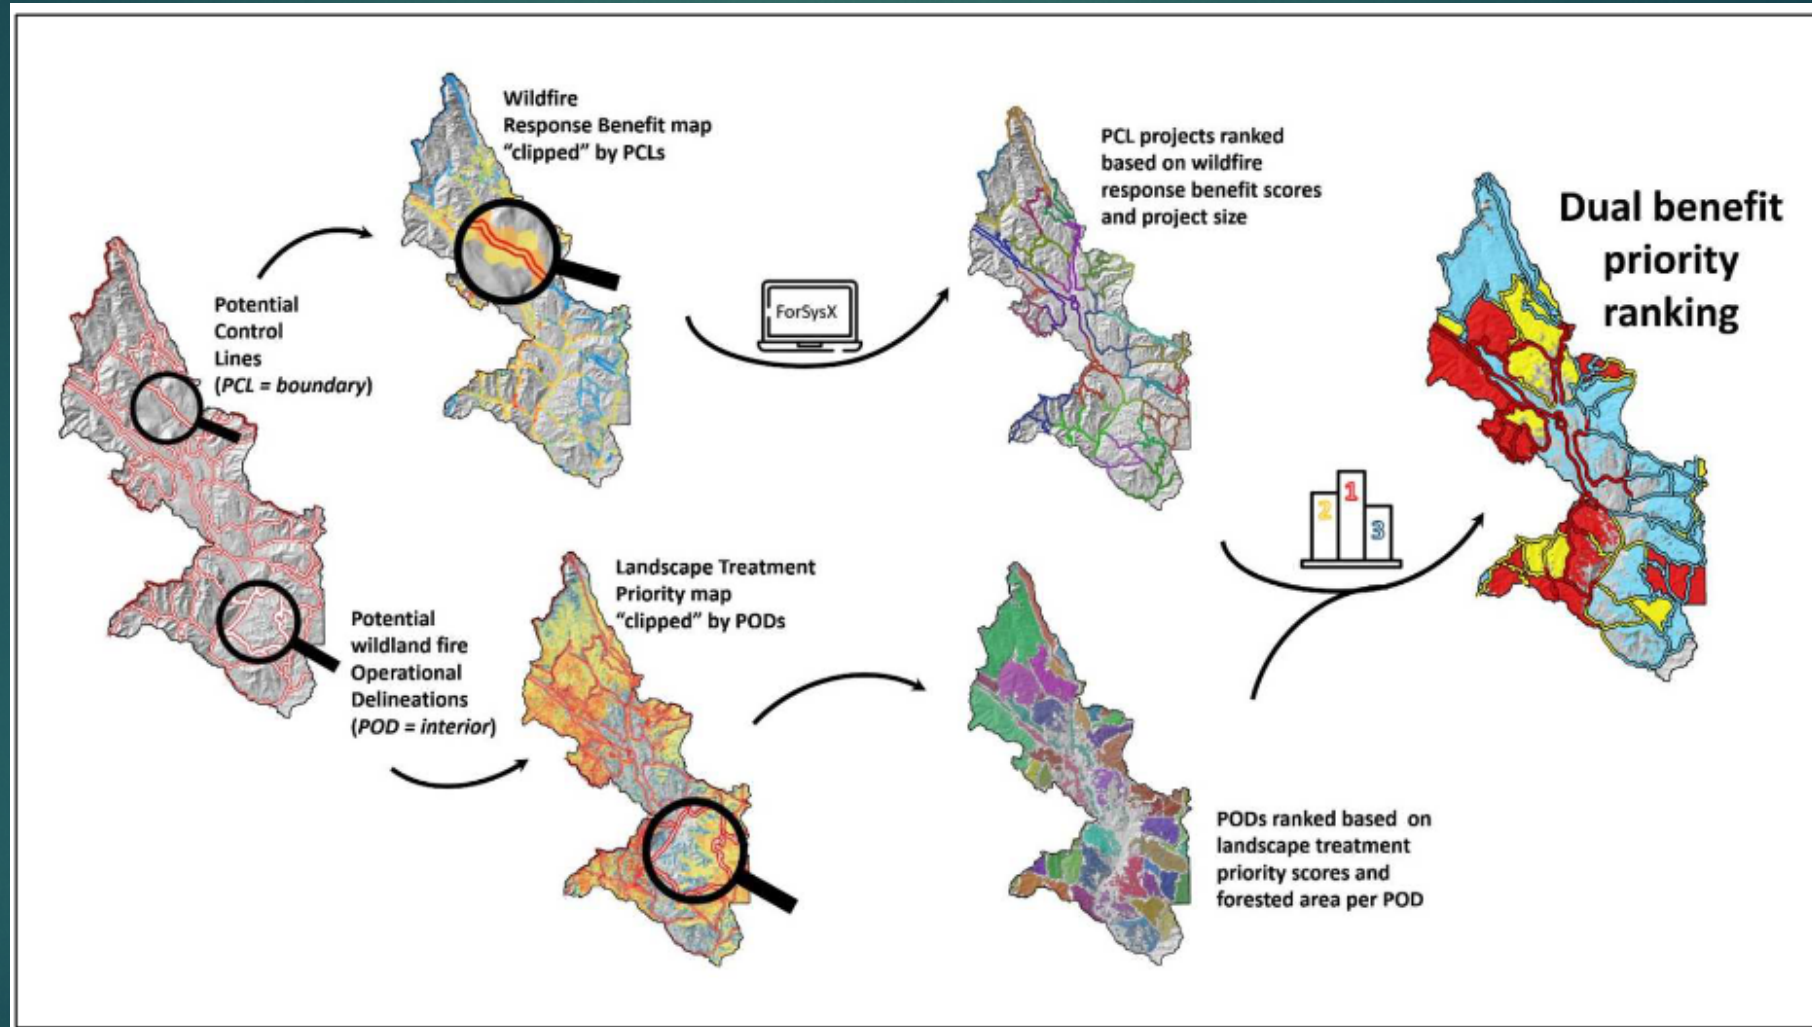

Established as a requirement with House Bill 1784 for DNR to integrate forest health and fire response benefits into planning efforts (Dual benefit analysis)

Regional Conservation Partnership Project (RCPP)

Fuel Break and Forest Resilience Partnership

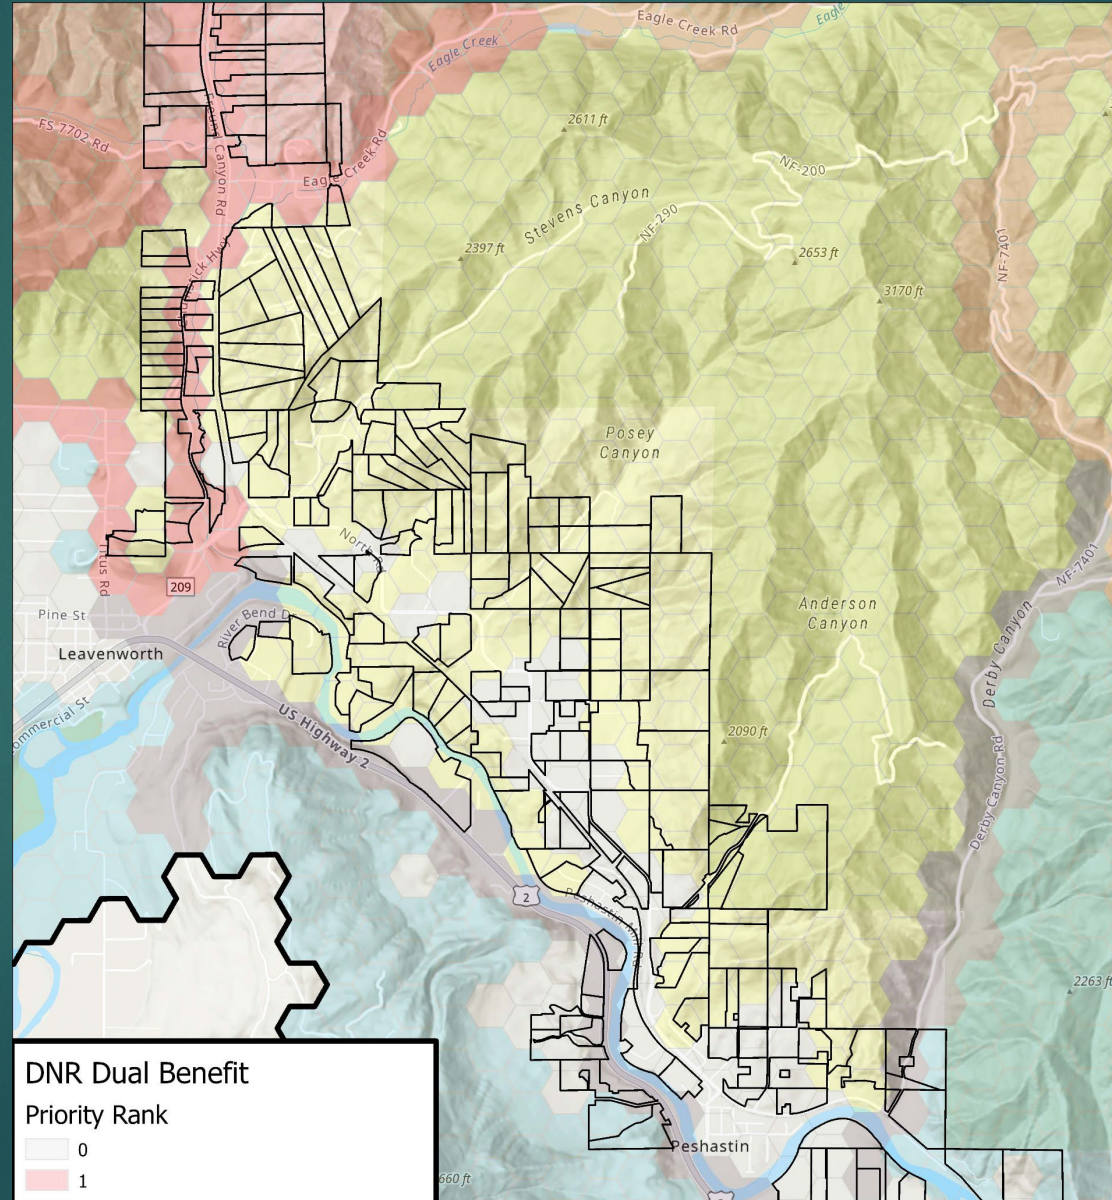

- Partners include Cascadia CD, Chelan PUD, DNR and NRCS
- Focus is on private landowners who fall in high priority dual benefit locations.
- Third benefit added for this project – proximity to high-risk power transmission lines
