

ICICLE STRATEGY

The purpose of the Icicle Creek Work Group (“Work Group”) is to develop a comprehensive Icicle Strategy through a collaborative process that will achieve diverse benefits defined by all of the Guiding Principles below. The Work Group will use best available science to identify and support water management solutions that lead to implementation of high-priority water resource projects within the Icicle Creek drainage.

Adequate Streamflow
(Dry Year Goal = 60 cfs,
Average Year Goal = 100 to 250 cfs)

**Improve
Agricultural
Reliability**

**Sustainable Leavenworth
National Fish Hatchery**
(52 cfs diverse reliable sources)

**Meet
Treaty/Non-Treaty
Harvest Rights**

**Enhance
Aquatic/Terrestrial
Habitat**

**Square
Lake**

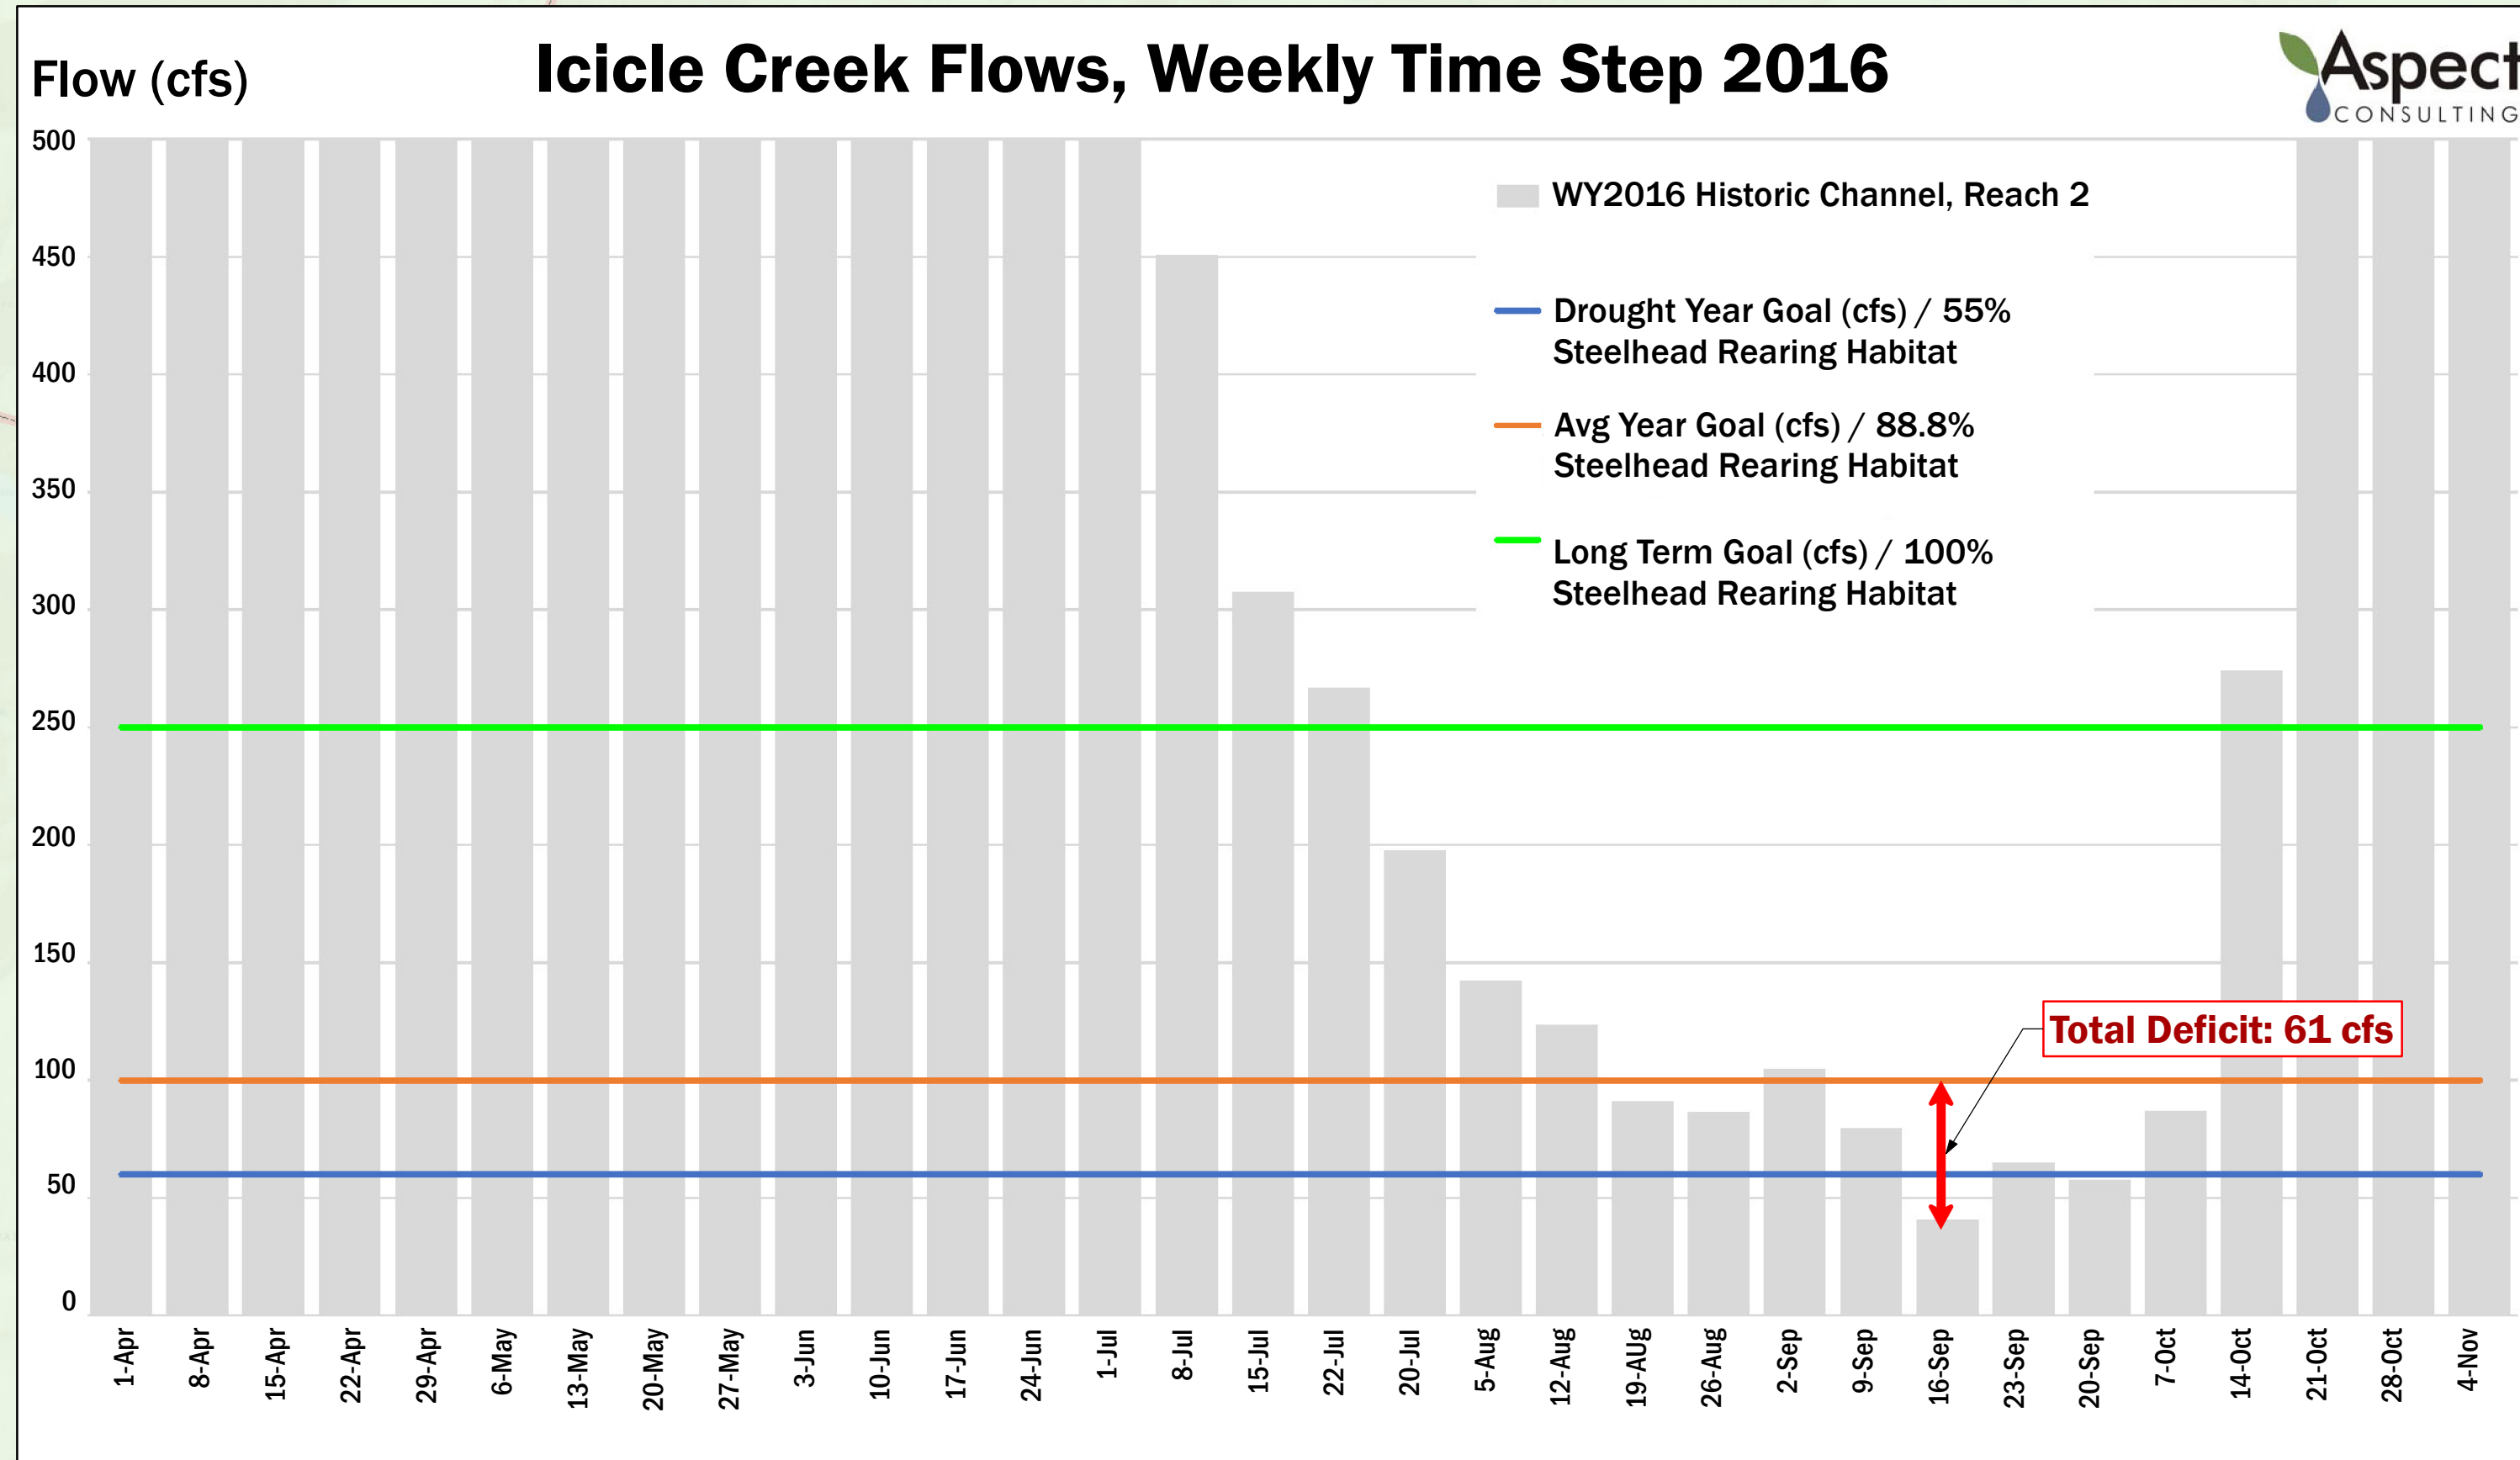

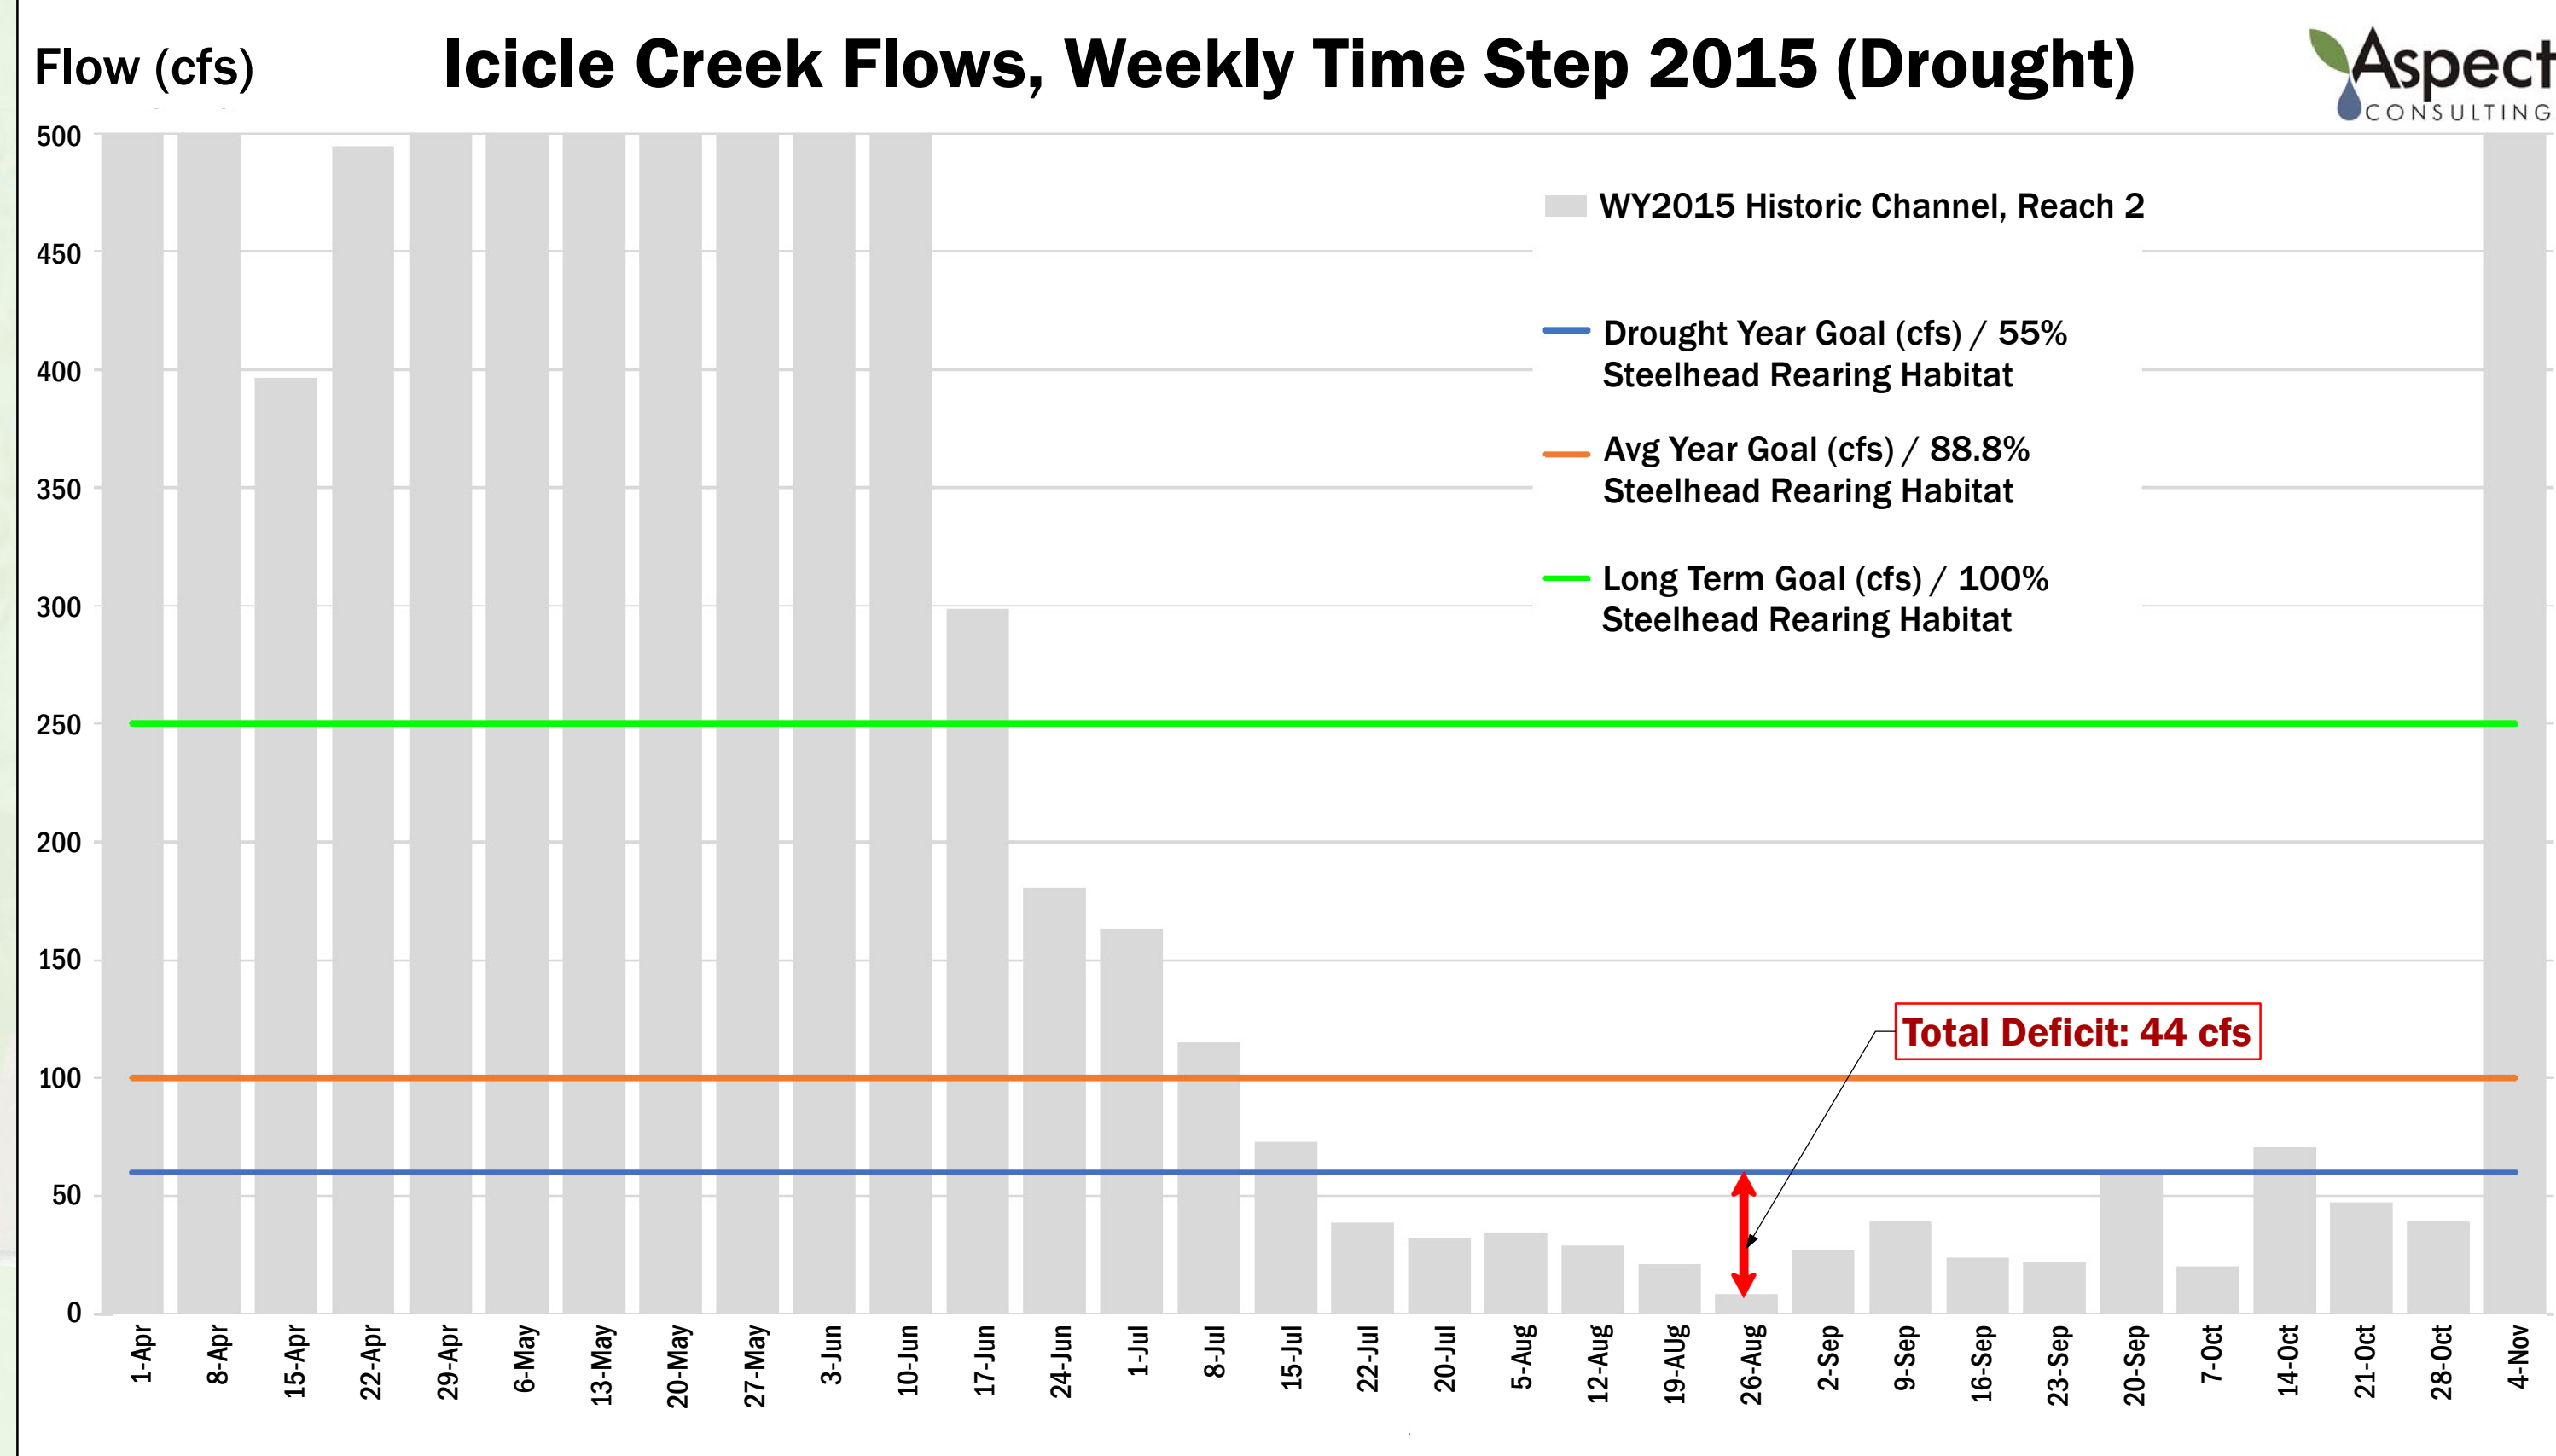

**Klonaqua
Lakes**
