8:00 to 8:10

Introduction – Julie Sanderson, Chelan County Noxious Weed Control Board (CCNWCB), Coordinator

8:10 to 9:00 1 credit Knotweed and Garden Loosestrife, Two Perennial Problems - Jenna Eardley and Adam Pfleeger, CCNWCB These two presentations will cover identification, life cycle and control options for two persistent noxious weeds that are high priorities for control in Chelan County.

9:00 to 10:00 1 credit Pesticide Safety 101 and WSDA Updates - Bruce Olson, Washington State Department of Agriculture In this talk, Bruce will cover new information on licensing, paraquat, worker protection standards. He will also cover pesticide safety topics including hazards & first aid, personal protective equipment and pesticides in the environment.

10:00 to 10:10 Break

10:10 to 11:00 1 credit Weedy Grasses - Julie Sanderson, Chelan County Noxious Weeds This presentation will cover grasses on the noxious weed list, how to identify them and options for controlling them.

11:00 to 12:00 1 credit Site Evaluation and Selecting the Correctly Labeled Herbicide Products – Jon Storr, NuFarm Americas This talk will cover the concept of sites related to pesticide labels, including the definitions of sites, how to evaluate potential for non-target species damage at a site, and choosing the correct pesticide for best control and least possibility of off-target damage.

12:00 to 1:00 Lunch Break on your own

1:00 to 2:00 1 credit Flowering Rush - Stephen Lesky, Army Corps of Engineers This presentation covers Flowering Rush in the Columbia River Basin; its ecology, identification and potential control measures.

2:00 to 3:00 1 credit Targeted grazing: A natural approach to vegetation management - William Porter What is targeted grazing and how does it work? This presentation will cover how goats can be used as an effective vegetation management tool. In the second half of this hour, **Read the Label – Julie Sanderson, CCNWCB** This presentation covers how and why to read herbicide labels, including definitions of different parts of the label and what they mean in practice.

3:00 to 3:10 Break

3:10 to 4:00 1 credit Puncturevine Identification and Control - Dale Whaley, WSU Extension This presentation will help with seedling identification and will cover the various management options for controlling puncturevine, with an emphasis on the best herbicide recommendation and timing for our area.
