

# CRP 678: Chelan County Deck Program

## Peshastin Creek-Ingalls Bridge #321 & Wenatchee River Bridge #20912

Last Update: September 22, 2015

Project Vicinity Map

**Project Number:** County Road Project 678

**Project Length:** Varies

**Basis for Project:** Bridge Rehabilitation

**Construction:** Project Substantially Complete

**Project Description:** The primary purpose of this project is to prevent future deterioration of the existing structures. The condition of the deck on the Peshastin-Ingalls Bridge (#08317800) and the Wenatchee River Bridge (#0007840A) has deteriorated to a point where moisture is easily penetrating the deck surface and impacting the integrity of the steel and its adhesion to the concrete. Both bridges are vital links that serve residential, recreational, tourist, and agricultural traffic. The project is critical to the County in preserving its assets in the most economical manner.

**Status:** **Some follow up concrete repairs are necessary on the Wenatchee River Bridge.** These repairs will begin September 28, 2015 and are expected to be completed by end of day October 9, 2015. Work will begin on one lane, requiring closure and traffic control. Traffic control will be lifted during the weekend of October 3 & 4, then reestablished to complete repairs on the other lane the following week.

**Traffic Impacts:** **Repairs will necessitate a 24 hour signalized traffic control, to allow repairs to cure, however, the signal will be removed during the weekend. Delays will be minimal.**

### Funding Sources:

Federal Highway Bridge Program	\$893,000
