

CRP 731 and 732: Countywide Signing & Barrier Terminals

Location: Throughout Chelan County

Last Updated: February 19, 2021

Traffic barriers, such as guardrail, help keep vehicles inside the roadway, away from hazards near the road; they can lessen the severity of crashes. Curve warning signs also alert drivers to take precautions when approaching curves. The photos are from recent road safety improvements made along Squilchuck Road (above) and the Chumstick Highway (right) by Chelan County Public Works.

Funding Sources:

HSIP (Curve Warning Signs)	\$379,500
HSIP (Barrier Terminals)	\$393,700
County Funds	\$8,800
TOTAL:	\$782,000

Project Number: County Road Projects 731 & 732 **Project Length: N/A**

Basis for Project: Traffic safety

Construction: Summer 2021

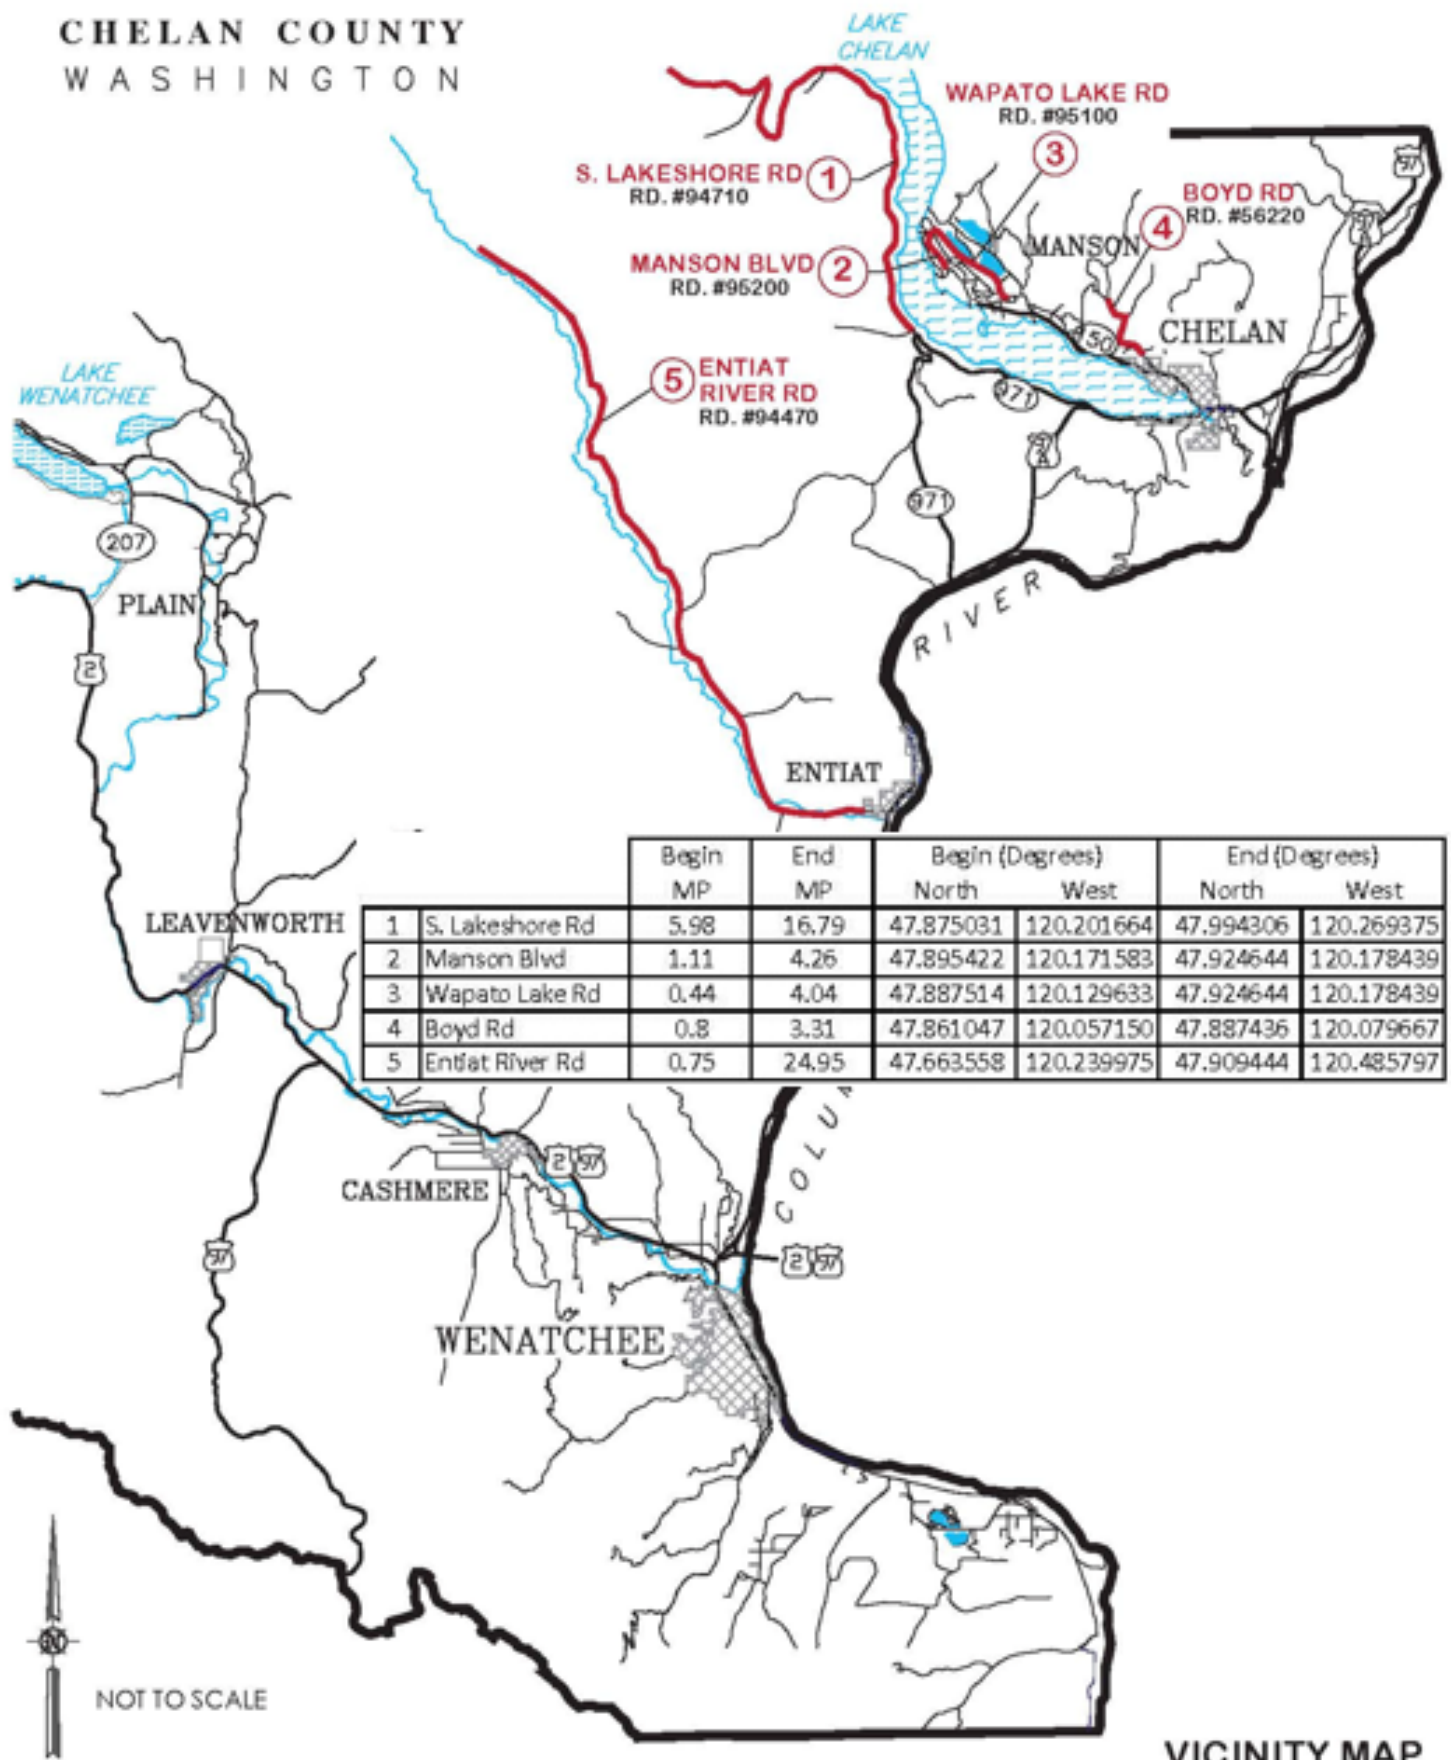

Project Description: Chelan County Public Works collected and analyzed historic and current traffic accidents and trends to determine what safety improvements should be put in place on its roadways to help the state achieve Target Zero. In that research, the 2017 Chelan County Road Safety Plan identified lane departure crashes as a top priority. As a result, the county will install curve warning signs on portions of Manson Boulevard and South Lakeshore, Wapato Lake, Boyd and Entiat River roads. The county also will upgrade guardrail and concrete barrier terminals on portions of the Malaga-Alcoa Highway, Wenatchee Heights Road, Chumstick Highway, Boyd Road and Manson Boulevard.

Status: Both projects are expected to begin in June and be completed in July.

Traffic Impacts: See attached vicinity maps for work areas. Traffic impacts at times may include flagger-directed traffic with minor delays.
