

CRP 664: Stemilt Loop Road FDR, Phase III

MP 4.40 to MP 8.80

Project Vicinity Map

Project Number: County Road Project 664

Project Length: 4.40 miles

Basis for Project: Road Improvement

Construction: Fall 2013

Project Description: Phase III continued preservation work started in 2010 using Full Depth Reclamation. Full Depth Reclamation (FDR) is a pavement rehabilitation technique in which the full flexible pavement section and a predetermined portion of the underlying materials are uniformly crushed, pulverized or blended, resulting in a stabilized base course. Full-Depth Reclamation (FDR) reduces the need to haul aggregate or haul out old materials for disposal and the amount of materials that must be disposed. This process was successfully used on Stemilt Loop Road in 2010 and 2011. This work remained inside the road prism and extended the rehabilitation work to the end of the road.

Status: Project was completed in October 2013 using both contracted work and County forces.

Funding Sources:

County Road Dollars	\$313,310.00
Rural Arterial Program (RAP)	\$750,000.00

TOTAL: \$1,036,310.00
